23:38 Unity with God.

Retreat participant: Tell me, in your opinion, God is one, as I understand it?

Irina: One.

Retreat participant: There are only types of his incarnations - Buddha, Christ or what? Explain.

Irina: If you look strictly, we are its particles, and particles are inseparable from the whole, i.e. when we merge, we can each say, like Christ: “I and the Father are one.”

Retreat participant: I am That.

Irina: I am That, for example.

Retreat participant: There is Mohammed, for example.

Irina: Yes. For example, many Muslim saints, going to bed with their feet towards the mosque, although they should have been lying with their heads, when asked: “Why?”, they said: “What difference does it make if I am everywhere, wherever I lie down, I am directed towards God?” . Something like this.

How are you directed towards God everywhere? Because I am him. This is a real feeling, a real experience when you merge with the Universe. And you really feel that Light is emanating from you, which lights up the stars. It's real. We are truly like that, we are spiritual beings.

24:46 Separation from the Spirit. Degradation and development. The right to kill.

Retreat participant: How then to understand separation from the Spirit?

Irina: We separate ourselves, with negativity. Now I will tell you a little about the structure of the Reasonable Spirit in order to understand what emotions are, how we can direct them both for degradation and for development. Let me remind you once again: degradation and development are two paths that are equally respected by God as a choice. Those. we have the right, God gives the right for some Spirits, some of his children to kill others. This is the choice he gives. One lowers his vibrations, and the one who was killed, accordingly, if he does not experience anger and hatred, i.e. forgives, raises his level. This can also be such a tool.

Christ said: “Do not be afraid of those who kill the body, but cannot kill the soul.” Why are our bodies given to us? They are given to us as a tool for growth and development. If we talk about God's desires, of course, he wants us to develop. But if you don't do this, God will not stop loving you.

26:07 Differences between Demon and Angel. A repentant sinner. The Parable of the Prodigal Son. sin

Irina: How is a Demon different from an Angel? By your level, i.e. vibrations. But he, the Demon, remains the same divine essence. She is not taken away from him. Godlikeness is not taken away from any Demon. He still has immortality, he still has creativity, he still has both the Higher Self and conscience in the form in which he is able to perceive it. Of course, he denies it, but it remains in him.

And any Demon remains with the possibility of restoration to the Angelic rank, the possibility of returning to the number of Light Forces when incarnating and passing their lessons. Approximately, if anyone has read the parable of the prodigal son, this is the attitude towards Demons. Christ even said that there is more joy in heaven over one repentant sinner than over 99 righteous people. I see, right? A repentant sinner is one who raises his vibrations, realizes his sins, recognizes them as his mistakes and harmonizes, transfers into Light the negative energy that led him to sins. Sin is an act that is based on the blocks that a person has accumulated. Any questions about this?

27:42 Conditions for the incarnations of Demons. Choice of embodiment.

Retreat participant: Statistically speaking, is it desirable for Demons from levels 1 to 6 to communicate and raise their vibrations in the same way as levels from 7 to 14?

Irina: You know, a Demon can incarnate for various reasons. But he does not incarnate himself, but with help. His incarnation is chosen by his Consulting Angels, who are on the 22nd level, and every Spirit has them. These are his Angels-mentors. They know why he lowered his level so much. He wasn't just a Demon. They know what reasons brought him to this state of low vibrations. What negative blocks does he have, what emotions, feelings does he have, and what lessons and life situations does he need to go through so that if he uses his free will, he will raise his vibrations.

Retreat participant: What if he wants to incarnate, for example, to stay or go down further? Incarnate to do some kind of evil?

Irina: I already said that this is his full right

Retreat participant: But he can incarnate?

Irina: He can incarnate, but not where he directly wants. If he says: “I want to incarnate as a president,” he will not correspond in his vibrations and his development to this position.

Retreat participant: That is. Karma will not allow him to achieve this?

Irina: His Angel Consultants will simply tell him that he has a discrepancy between this incarnation and his vibrations. And it corresponds, for example, to there and there, on such and such a planet. They may offer several options. On such and such a planet, in such and such a country, in such and such a family, or in general in the plasmoid world, they can offer. There are a lot of plasmoid worlds,

56 density levels, and we only live on the 3rd. He may refuse.

Retreat participant: If it is incarnated where only Angels live, try it there.

Irina: They can implement it there too.

…….

29:54 Kirchiton spaceship. Flight to Daraal.

Irina: He took me around all the rooms. When I arrived, I drew and indicated with arrows where everything was. Didn't see this?

Retreat participant: Is there a video?

Retreat participant: We saw it.

Irina: Yes.

Retreat participant: I'll have to look at it today. I did not see.

Irina: They didn't post it on VK? I just don't remember.

Retreat Participant: It's on YouTube.

Irina: He has weightlessness, because... it has no artificial gravity. Other ships have it, but they didn't install the device on it. While you are flying, before the moment of the jump and after, these are 15 seconds of flight to Daraal (although there are 150 light years there). He (Kirkhiton) said that this was simply needed for flying away to a distance, and then arriving at Daraal. And the jump itself is instantaneous. Like this.

Retreat participant: I see.

Retreat participant: Who is now in the subtle plane right here with us?

Irina: There are a lot of people here, actually.

Retreat participant: Who flew in yesterday?

Irina: Who flew in yesterday? Several have already responded: they responded from there, they responded from here. It's all the same. Disnit arrived. Who watched the interview with Katya Lel? Its curator is from Disnita.

Retreat participant: I didn't understand them, I saw their faces, but I didn't understand who they were.

31:26 Reasons for the appearance of aliens. How aliens see the human energy field.

Retreat participant: Why did they appear?

Irina: I was interested in your energy.

Retreat participant: Why did you get interested?

Irina: When they fly, there is a device on the plate that reads the energy-information fields around a person - what he is thinking about, one might say, mental. Like our aura camera, only they have it on a dynamic screen. On the screen, a person is seen as a collection of energy fields. And they look at who is ready for contact, for what kind, and who is not ready.

Retreat participant: Whose teeth should I take?

Irina: Whose teeth to take, whose hair?

Retreat participant: No, please, guys, no. Can I just fly?

Retreat participant: It won't work any other way.

Retreat participant: I want to go to Disara.

Irina: Why specifically to Disaru?

Retreat participant: I have a mentor from there.

Irina: On Disara they took me to Saint Germain.

Retreat Participant: He is a disciple of Saint Germain. I want to go to Disara.

Irina: He gave me tea.

Retreat participant: I read so much in books about Saint Germain.

Irina: And he's with Disaru **.** His house is so big, it's like a palace. He has 15 rooms there.

Retreat participant: I really want to.

Retreat Participant: Yes, a woman not alone.

Retreat participant: Ira, who is still here? Can they introduce themselves?

Retreat participant: At least planetarily.

Irina: I don’t know. Right now two Pleiadians are standing here. Ruan Prioch, I don't know him.

Retreat participant: Whose are they?

Irina: From the Pleiades. Whose curator is this? Is yours?

Retreat participant: And they said I have Saint Germain.

Retreat participant: Oh, you and I will fly.

Irina: Do you want to go to Disara too?

Retreat participant: Why, let’s go.

Retreat participant: For company, right?

Retreat participant: We’ll also take the dog with us.

Retreat participant: Yes, everything has already been prepared for the dog.

Irina : Who knows what Kirchiton looks like? Hands up.

Retreat participant: Everyone who watched the video.

Irina: Tell me what Kirchiton looks like.

Retreat participant: Tall, about 3 meters, he has a head and three eyes.

Irina: He came up and put his hands down. He has such long fingers, such shoulders. He smiles, stands and looks at you like that. A

Pleiadian girl approached him.

Retreat participant: He immediately became red.

Irina: The Eslerites are present here. But this is not MidgasCaus.

Retreat participant: They are closer to the kitchen for some reason, they are probably hungry.

Irina: If you want to eat, we'll pour you some tea now.

Retreat participant: Is my plasmoid here?

Irina: Yes, there are plasmoids here too. I sense plasmoids. You see, come here.

Retreat participant: The food is gone.

Retreat participant: Question. Can you be a little more detailed about the technology of embodiment? A piece of the Spirit that has come a long way.

Retreat participant: I don't hear anything, they rustle.

Irina: They gave the Eslerites a treat.

Retreat participant: In your face. Come on, ask.

35:57 The process of incarnation of the Spirit. Who meets Souls after death, who escorts them to incarnation. Spirit and Soul. Conception. Etheric body, vital energy.

Retreat participant: Question about embodiment technology. How does this particle of the Spirit land through the mechanism called the

Soul, and then infiltrate the body?

Retreat participant: How does the Soul end up in the body, is this what you mean?

Irina: When an incarnation has already been selected for the Spirit, it is carried out by Angel Guides from the 21st level. Their task. Who do we have from level 21? Here, my colleagues greet me. From the 21st level, the Angel Guide, his task is to meet Souls after disembodiment and take them to the Spiritual World. And, accordingly, accompany you to embodiment.

Retreat participant: These are the same things Angels do, i.e. meet after incarnation and escort to the next incarnation?

Irina: Each Angel Guide can do both. They also have a specialization there, some like what more, some like to meet, some like to see off, some like both.

Retreat participant: Can you clarify this point? If I am from the 21st level, I am now embodied here, what is happening, what is the participation up there?

Irina: Once she is embodied, she no longer does what she does as a whole person. She is simply processing this experience that you send to her through the spiritual channel. Only when you leave the body will you unite with her if you go to the Spiritual World after leaving the body. This is possible, for example, when your body falls asleep. Then you will be able to act just like the Guide Angel.

Retreat Participant: If she returns to level 21, right?

Retreat participant: Girls, don’t get distracted, please. Let's close one question, then ask another, if you don't mind. So, there is a group of comrades who accompanies you to the incarnation. Is that how it is? A particle of the Spirit gradually condenses, materializes through the Soul and directly penetrates the body?

Irina: I understand, this issue has already been considered. Okay, now. The fact is that each Spirit is present at the conception of its body. We were all present. And our children were also present at their conception. In spiritual form, we stood side by side, and when dad's sex cell connected with mom's sex cell, a cell of a new body appeared, then the Spirit introduces into it his life Force, which he received from God for incarnation. When the Spirit is in the Spiritual World, it has no life Force. He is simply Spirit. When he receives life force, he becomes a Soul. He seems to be enveloped in it.

Retreat participant: Can you describe it somehow? Maybe some kind of form?

Retreat Participant: Just walking in. How the Soul inhabits.

Irina: He receives ethereal Power. One might say, the etheric body. And when the Soul leaves the body, it does not immediately, but gradually loses its vitality when it goes to its own level. For the first few days she is generally in the astral plane, i.e. next to the material world. Or she can leave immediately - it depends on her, on the reaction of her relatives. It depends on a lot.

Retreat participant: But the question remains. How does the Spirit get into the shell, which begins to divide?

Irina: How to understand "how it gets"?

Retreat participant: I'll clarify. Here is the word "Soul". Spirit and Soul are two different things.

Irina: I said that the Soul is a Spirit united with the Life Force. Did I say something unclear just now?

Retreat participant: He has a question, how does this connection happen? How? Here the Soul stands and watches how the cells have merged. The cells merged and began to divide. At this moment, how does she get into this lump, which begins to divide, how does it materialize and later turn into a person?

Irina: Can you explain to me how water turns into gas?

Retreat Participant: Yes.

Irina: You can't.

Retreat participant: Why?

Irina: Because I didn’t see it.

Retreat participant: But there is an explanation for this. Those. it receives so much energy, the molecule begins to vibrate.

Irina: What is energy?

Retreat participant: Good question. The same as you and I ask, what is energy? How does it get to the molecule and start vibrating? This is vibration, energy, and it begins to vibrate stronger.

Irina: And this is the reverse process. Energy comes from the Spiritual world to the material world. Also vibration.

Retreat participant: That is, in principle, it all comes through vibration, right?

Irina: Yes. It begins to coincide with its vibrations with the vibrations of these cells, its vital Force, and connects. Like a key in a lock. As soon as it connects, this cell becomes independent, not just independent, it becomes another organism. Not the same as the mother's body. She already has, firstly, a different DNA, and secondly, she already has the vital Power of another Spirit. Already from the moment of conception. The spirit itself stands nearby. He is next to his mother. He, of course, can go (to the Astral, to the Spiritual World), but he is already coming to her. He is waiting. For an earthling, this is 7 weeks of pregnancy before the moment when he can already enter. A nervous system

sufficient to accommodate it has already formed.

43:19 Causes of miscarriages.

Retreat participant: What causes miscarriages?

Irina: If no one interfered, on your own?

Retreat Participant: Well, yes.

Irina: So, for some reason, the Spirit was taken back to the Spiritual World, because perhaps he was needed for some mission. Let's say someone has incarnated, and now this Spirit is needed there. Or perhaps they simply found a more favorable place for him to incarnate, because he met someone there - other parents, for example. And they chose another incarnation for him and brought him out of this.

42:56 Genetics of a child from a spiritual point of view.

Retreat participant: That is. genetic matching of mother and father occurs, and there is an operation of mismatch?

Irina: There are many children who were born this way, with these deviations. A lot of our children are now born with genetic disorders and live.

Retreat participant: There are statistics on abortions, i.e. miscarriages that occurred before 10 weeks of pregnancy, there are genetic abnormalities. Could this be the reason?

Irina: Genetic deviations exist in any organism. Every organism contains cells with genetic abnormalities. There are always micromutations. They can't help but be. I am now telling you from a spiritual point of view how this happens, and not how materialists explain it.

Retreat participant: Still, there is a discrepancy when the Spirit cannot incarnate into a low-quality body?

Irina: In any case, he chose it himself. He chose it himself, no matter how poor quality it was. He himself chose him to undergo a certain experience or for his parents to undergo the experience. It may be that he agreed with the Spirit of the mother that it would be during pregnancy that she would come out of incarnation, so that she would develop, for example, or work through the fear of death. Could this be possible? Quite. This may be a contract between the Spirit of the mother and the Spirit of this child. This could happen.

I always tell from a spiritual point of view. Why? I'll explain now. Because any question you ask me, I already automatically look at it like the Spirit. And I (I don't know why) for some reason I think that's how everyone looks.

Retreat participant: That is. Your way of thinking is somewhat different from ours, as I understand it?

Irina: Look. What are you saying?

Retreat participant: Of course, spiritual reasons are primary.

45:03 Differences in the perception of materialists and idealists. Spiritual experience.

Irina: Probably everyone now hears and is affected by questions from the level of their consciousness. But I answer from my level of awareness, understanding and even beliefs - those that I have. And for some reason I think that I am speaking clearly to everyone, although this may not be the case, of course. This is natural for me because I am Spirit. I now feel like I'm immortal. Therefore, I consider any question from the point of view of the Spiritual world, because the material world is actually a small part of the Spiritual.

Retreat participant: The spiritual world is the root cause.

Irina: All the atoms that exist in the Universe are only a small part of the energy, the manifested energy of the Divine Forces, small. Thin-material worlds, 56 levels of density, we have only 3 - in the dense-material world, how many times more is this? This is a little more part. The spiritual world is an even greater part. And the Absolute itself - only some of its individual qualities can be described in our words. And its fullness, its energy can only be felt with the heart. How does the materialist approach differ from the idealist approach? Because the materialist tries to put the entire spiritual experience into words. This is one of the differences. Unfortunately this is not possible.

There are things that can only be felt with the heart. And there are things that cannot be proven to a person, or even explained that they exist, until a person experiences them. For example, if you have never tried sugar, and I tell you about its properties, but you only taste salt, you will not be able to distinguish them. It will look the same to you. I will tell you that it evokes such a taste, and you will ask: “How is it different? What exactly is the difference between sweet and salty? I only know salty. Explain to me. Ah, you can’t explain it, which means you’re in error. Because you are not answering my question specifically.”

They will tell you that it feels good. What is “nice”? How is it pleasant if I don’t know it? Do you understand what I'm talking about? Approximate approaches of a materialist and an idealist.

In order for you to answer all your questions for yourself, you all need your own spiritual experience. This is why Cassiopeia exists, among other things. To not just give answers to questions, but to teach each of you to look for this Light within yourself. There is an inexhaustible, eternal spiritual source within you that contains the answers to all questions. And when you know all the joy and all the fullness of union with Him, you will be asked a question, and you will already know the answer. This happens to everyone.

Retreat participant: Everything is clear.

Retreat participant: I would like to come to the spiritual through the material. I want technology, I want knowledge.

Retreat participant: Doubts get in the way.

Irina: Good question. To come to the spiritual through the material.

Retreat participant: For example, the birth of the Spirit itself, when a piece of God is separated. When she has a desire to be separate, an understanding that I am separate from God. Are there midwives there? This part has separated. Who carries this Spirit further, to the 35th or some other level. Is there some Spirit there that receives this Spirit, as by seniority? In that hierarchy of God?

Retreat participant: This is an association with a midwife, right?

Irina: After leaving the incarnation?

49:46 Primary birth of the Spirit. Awareness of oneself as the Spirit.

Retreat participant: No, the very primary birth. The very first. The very birth of the Spirit, separation from God.

Irina: He appears at the level at which he has realized himself. He can realize the Light from which all Spirits emerge, which permeates all levels of the Spiritual World. All. He appears on the spiritual level, he does not yet have matter. He has never incarnated yet. The spirit can become aware of itself for the first time at any level from the 1st to the 24th. He simply realizes himself exactly like this, with these qualities. And then, when he incarnates, he will work with them. Archangel Metatron told me about this. There was an article on VK, who read it? "Birth of the Spirit". Nobody read it?

Retreat participant: Alexey dropped me off to read yesterday.

Irina: My contact with Metatron?

Retreat participant: No. This is about the development of the Spirit.

Irina: Who read my article “The Birth of the Spirit”?

Retreat participant: Nobody read.

Retreat participant: I looked it up.

Irina: Interesting? We have an archive of materials on VK. Maria Sokalskaya and the girls collected an archive of materials. And probably no one can answer your questions more accurately than Metatron, right? He is one of the Archangels. Here, I have an article “The Birth of the Spirit.” She is not big. I'll read it, it won't take long. And after I read, you will ask questions that you do not understand, and we will move on to the structure of the rational Spirit, right?

Retreat participant: Let's do it.

52:08 Archangel Metatron “Birth of the Spirit.”

Irina: This was conveyed by Archangel Metatron, the head of the Council of Hierarchs of the Spiritual World of the Milky Way Galaxy, the ruler of the Jewish and Christian egregors on planet Earth.

“Every intelligent Spirit is born of God outside the time of the material world. This process is eternal and infinitely simple, but at the same time infinitely complex and incomprehensible.

The flow of Divine Light beyond the limits of the Spiritual worlds and material universes known to you is heterogeneous. It consists of the impulsive energy of Divine Consciousness.”

Conveyed at my level of concepts. All these are words behind which there is a certain reality, and I ask you to feel it with your heart now, because we were all born from it.

“The speed of the impulse flow is infinite, and the direction is self-

closed. Light impulses of Divine Thought carry the potential for self-organization into an autonomous spiritual entity.” Is everything clear yet?

Retreat participant: I don’t know, I don’t understand anything.

Irina: It’s not clear, no?

Retreat participant: Can I not understand now? I'll understand later.

Irina: Why?

Retreat participant: He will catch it and then reveal it.

Irina: Interesting. OK. “The moment of encapsulation of a separate Divine Thought is elusive for awareness of it itself; it depends on the Divine Will, driven by the power of Love.

At the birth of the rational Spirit, two Divine impulses merge together and forever, giving rise to a third one, striving to separate itself from the Divine Flow.

This process can only be approximately described in modern Russian, but it is quite accessible to understanding through a view from the spiritual Heart, which remembers and knows the Divine Truths, regardless of the ideas of the Mind.

The Impulse of Divine Love merges in the Stream of spiritual Light with the Impulse of the Divine Mind. Their fusion is accompanied by a flash of Light of a different frequency of vibrations and generates the Will of the newborn Spirit, the beloved child of God.”

Now everything is clear?

Retreat participant: I see.

Irina: Move on. “The will gives rise to the desire for autonomy and gives rise to self-consciousness, as a primary monad around which the impulse of Divine Love and the impulse of Divine Reason are encapsulated.

Subsequently, from the Impulse of Love, the spiritual Heart develops (which we will now talk about, about the structure of the Spirit), from the Impulse of the Mind, the spiritual Mind, and from the Will born by them, all the Energies of the spiritual Essence arise.

Since this process occurs outside the boundaries of all worlds and spaces, it is irreversible and cannot be determined in time and space.

The process of encapsulating a new spiritual essence inevitably includes its attraction into the world of disembodied Spirits to the level that will be closest in terms of the qualities of the Spirit, built into a structure by its self-consciousness, with the help of the Will’s desire for autonomy from the Divine Flow.”

Do you understand, right?

Retreat Participant: Yes.

Irina: “The level of the world of disembodied Spirits, where a newborn Divine child ends up, depends on the strength of his volitional impulse to separate from the Flow of the Mental Energy of God, which he recognizes as Father and Mother at the same time. And also from the attitude towards God that arose at the moment of encapsulation of self-consciousness, the rising of the star of the spiritual Heart and their surrounding by the Crystal of Will and the Sphere of Reason.”

A little bit in images, but, in principle, these images are given to make it easier for a person to imagine what is happening.

“The newly born spiritual entity adapts to the world of disembodied Spirits, with the help of Angels, Arhats and Consultants (This is the 23rd and 22nd, i.e. it adapts)

Her first incarnation, when she is ready for it and agrees, cannot take place in a world below the thirty-fifth density level, according to the Divine Law on the gradual adaptation of intelligent Spirits to the conditions of the material world."

Retreat participant: What is density level 35? How much do we have?

Retreat Participant: 56.

Retreat participant: 56, and we are on the 3rd level, right?

Irina: In general, in the material world it is 59. We are on the 3rd. I just read it, does everyone understand everything?

Retreat participant: It's interesting when they call God the Absolute, it's Love. And here is the second hypostasis of God-Mind. Born from Love and Reason, i.e. two hypostases. And they usually keep silent about the second hypostasis.

Irina: There is also Volya, of course. How she realizes herself and where she realizes depends on the impulse of the Will, and at this level she will end up.

Retreat participant: The mind is how we heat the burner, the substance ignites. There are vibrations.

Retreat participant: May I ask a question? But can you tell us a little more about Metatron?

Irina: It's possible. He came to me to convey this information.

Retreat participant: Can he tell you about his earthly life?

Irina: I was in contact with him at that moment when I was passing it on. He said that he came to convey information for Cassiopeia, for our group. So he conveyed this one about the birth of the Spirit.

Retreat participant: Is he present here now?

Irina: I just read what was passed on to me.

Retreat participant: Everything is clear.

…….

59:03 Beginningless beginning. Eternity.

Irina: God has always been there, he didn't come from anywhere. There is such a concept as "beginningless beginning". This is in the material world.

Retreat Participant: At the point where there was nothing, nothing exists. God has always been there.

Irina: He is the beginningless beginning. He is the one who always exists. And we, his children, also, by the way, can be said to be eternal, because we arose only in God, therefore we have no beginning in the material world.

Retreat participant: Thank you.

59:39 The perception of the world by the enlightened. The world is an illusion. The story of Irina Podzorova's enlightenment.

Retreat participant: Just now they were talking about separation from God. But I wanted to ask, on the contrary, about the connection. The process of enlightenment. I dug in and got a little confused. All enlightened masters say that after they have had this process, they

see that there is only perception. No, only I exists, it turns out, and I perceive everything. That's why they say that the whole world is an illusion. I wanted to know more about what happens to these creatures after incarnation? Immortality? It's as if they are already merged with God, it turns out? Is individuality lost?

Irina: If the individuality of the Spirit disappears, there is no one to even say: "I am everything." Individuality is the one who speaks, the one who feels, the one who senses.

Retreat Participant: That's what they say. It is clear that they still exist here. They say that it is I who speaks, it is simply action that goes through me. I'm beyond everything. Beyond all concepts.

Irina: This state can be felt by anyone who focuses on their Spirit. It's very simple actually. It prevents us from feeling the perception of our surroundings. If we tune in to our Higher Self, at least for me there is nothing complicated here, I can, looking at the sky, in one minute feel that I am dissolving and containing everything within myself. For me there is nothing complicated here. I thought it was all like this.

Retreat participant: Is it always like this for you? Do you look at the sky and dissolve in one minute?

Irina: Almost from the age of 12, when I (who watched the film, I talked about Light) had this. And when I felt this Light, by the way, I was not doing anything about it, I was an ordinary girl. This was before contacts. Contacts with Kirchiton began at the age of 13. And this is at 12. But I will really remember this day for the rest of my life.

It was October 12, 1998. I was an ordinary girl. I wasn't interested in anything like that. I had no contacts or any esoteric teachings. I just went to school. We lived in a big village. I grew up in a peasant family, we had a farm. An ordinary girl.

I listened to Dmitry Malikov's song "My Distant Star" (I will never forget). I felt that a ray of Light was piercing me, which was dissolving me. And he loves me endlessly, and I am completely safe in him,

wherever I am and whatever I do. And this feeling - I am not a body, I am in it, a feeling of eternity - I have always been, am and will be.

Retreat participant: Cool for you.

Participant retreat: I listen to Malikova.

Irina: I had it myself. I didn't do anything like that. How long did this last? I closed my eyes, I heard that they were singing a song, but I did not understand what they were singing. This state has passed. But from that time, in these few minutes, I became a completely different person. I stopped being interested in some things that interested me before. Some books, some conversations with friends. They talk about it, and I think: “What does it matter if I am Spirit?” I already have some thoughts like that. But I thought this happens to everyone.

Retreat participant: Didn’t you immediately share this with everyone?

Irina: I told my mom that I had it. She didn't even understand what I was talking about. “Which Light?” “The Light permeated me, I am an eternal immortal being.” She’s like, “How do you know?” I say, “I feel it. You are also an immortal being." “Leave me alone,” he says, “from me. I don’t know what it is.” I waved it off.

It felt so strange to me. I thought how a person can live. I already understood it then, like God. I am a child of God and a child of absolute Love, and that everyone is like that. How is it possible to live and not feel this? This is impossible. If anyone knows it? Are you familiar? Tell me, were you surprised that others don’t feel this?

Retreat Participant: Everyone seems to understand this. When you start to explain, they look and don’t understand.

Irina: You think: “What is he looking at?”

Retreat participant: I think these parishes are unique for everyone.

Retreat participant: To each their own.

Irina: Do you think everyone experiences this?

Retreat participant: There are opportunities, and there are challenges. We can all jump onto the roof of a house, but only a few jump.

…….

01:05:07 Life after death.

Irina: I look at her, and she has such rejection, i.e. such an understanding that this does not happen. I look at her and say: “Do you have a son?” And she had a son whom I knew. He was already a grown man. I once called her, I don’t remember, Aunt Anya, I think: “Do you have a son?” She says: “Yes.” “Has he never offended you in any way?” “Why, he offended us, we had scandals, misunderstandings.” “Why didn’t you pour hot coals from the stove on it? He would have burned. And you would be happy and sit.” So I answered her directly, can you imagine?

Retreat participant: Good example.

Irina: She looked at me like that.

Retreat participant: Convincing.

Irina: She couldn’t answer anything. This is the answer I came up with. And then it was also interesting when I went to the funeral.

In our village, it’s customary that if there’s a funeral, everyone you know is invited. I remember they called my mother and me - a young man had been killed. His parents called. The body was brought from the morgue, the investigation took a long time. In my opinion, they

never found who did it. And I knew this family - this mother, this man. And so she cries there, and I feel that he is next to her. I couldn't communicate like that just mentally. I feel that he is nearby, and I feel his sensations, that he hugs her and says: “I am here. What's happened?" And he feels guilty that he made her cry like that. I look at her and think: “Why is she crying? He's immortal."

We start talking to her. She says: “So I lost him.” I say "No. You haven't lost him. They will only bury the body, but he himself exists. He's here now." I started telling her some things, to which she pulled away.

I felt it. I felt it like warmth, like vibration. When it passes, the air seems to vibrate ever so slightly. I say: “Why are you crying?” “Why, he was killed.” “They couldn't kill him. How can you kill the Light, tell me? How can you kill the Spirit? This is how you kill an immortal being, how?” “What kind of immortal is he if he was killed?” I say: “This body was killed. He just walked out of it. He's alive now." Moreover, she is also a believing woman, she is Orthodox.

01:08:32 The location of the Spirit after disincarnation. 40 days. Necrotic bindings. Parents' day, wake.

Retreat participant: It is believed in Orthodoxy that after disincarnation the Spirit stays here for 40 days. How long can he actually stay or can he leave immediately?

Irina: He can leave right away, or he can even stay here for months if something is holding him back. Not here, but in the Astral, in astral space. Spirit guides come for him, but he does not follow them. Nobody is forcing him. He remains in the Astral, close to the material world, appears in dreams - he wants to convey something, for example.

Relatives with negative emotions can make necrotic connections. They begin to feed him with their energy, their vitality. And, if he is of low development, low vibration, he can get used to it. In general, the Spirit is nourished from divine sources, but it can get used to this energy. This will delay its development and will harm the person and his

health. This is called necrotic binding. I'm just watching them. I will show you how to watch them.

Irina: The fact is that the binding can persist not only when he is in the Astral Plane, even when he is in the world of disembodied Spirits. She is not material. She goes there too. The spirit can be at its own level.

Retreat participant: Will this somehow affect the Spirit?

Irina: Yes, this delays its development. If bindings are created by negative energies, they enter it. But if it is a high Spirit, a high vibrational Angel, he can protect himself from them. A person throws an attachment at him, but he does not perceive it. He defends himself from her. Binding cannot cling to this Spirit: it is high there. If the Spirit is from lower levels or even middle levels, such a binding is possible.

Retreat participant: But these traditions: parental days, going to the grave, commemorating, communicating, are these bindings?

Irina: It's feelings that create, not rituals. If they remember with a bright feeling - love, gratitude, desire for bright, favorable incarnations for this person, gratitude for who he was, love for him, wishing him happiness in the world where he is - these are not attachments at all. These are light energies. They go to him, but they do not create an attachment. They just support him.

Retreat participant: And if they cry, why did you leave us?

Irina: Either they cry, or they get angry, offended. These negative emotions can be created if they are strong and long lasting. They can create attachments, not even to a relative, but to an absolute stranger. If there are necrotic attachments, this is all resolved with the Higher Self: we go out to the Higher Self and ask: "Do I have necrotic attachments?"

If there is, we ask: "To whom, to what emotion, to what chakra, what percentage of the vital Force goes?" You might even ask, "How does this affect your health?" The answer will be straightforward - how it

affects. Then we introduce this Spirit. He comes, i.e. a person sees his image, we work with this emotion. If it's an offense, we forgive him for what he did. If this is a feeling of guilt, then we ask his forgiveness. If it's just melancholy, we send him Love and wish him happiness in his incarnation, accept his death as his choice to move on. Something like this.

Retreat participant: May I ask a question? I'll just read it, otherwise it's a long one, I wrote it down.

Irina: Come on.

01:12:55 Does a person need help? The Material World as a tool for teaching creation.

Retreat participant: The Nativity of Christ serves as a prototype of the birth of Christ in the consciousness of every person, that this great Soul appeared in the world to show the direct path to God, to free humanity from the shackles of the material world. He showed that God abides not only outside of us, but also inside every person, that the organic mortality of beings is a human illusion, that Christ, in whose guise and thanks to whom he performed his great deeds, is the same Christ who abides in each of us. us. This means that if we understand all his aspirations, we will be able to accomplish all the same achievements and even greater deeds. After all, everything in this world is from God. What one person has done, another can do. Accordingly, death is not a mandatory rule in this kingdom. It's easier to take your body with you, then you won't have to be born again from your mother's womb and come to consciousness, which, unfortunately, does not accept your memory. Accordingly, having raised your vibrations, you can lower them, taking on any form on any plane. The true salvation of humanity is the awareness of one's divinity without intermediaries in the form of Spirits and other forms, their incarnation, for what exactly is created behind the illusion of forms is the creator of all Universes.

Irina: In principle, yes, but I don't agree with the shackles, firstly, of the material world, and secondly, with the illusion of the material world. Well, and, accordingly, that no help is needed at all in realizing Divinity. We even need help with learning to read and write. Children cannot

learn this on their own. Of course, it happens that the Spirit itself realizes this, but often it needs help, like the energy of older brothers who have already walked this path. As, for example, the same Christ and his disciples, whom he, by the way, called to be the Light of the world. If you are the Light of the world, the material world is not a shackle for you, but a wonderful opportunity to raise your vibrations.

Retreat Participant: Jesus said, “I am everything.” So he learned through his reflection? He believed that “I am everything,” but at the same moment he saw the difference in forms, i.e. different faces, etc.

Irina: He said: “I and the Father are one.” To say that all this is God is the same as saying that this edge of a nail is me. It is the same to say that the Universe is God. And everything is God. This is only a small part of his energies. He is much more. In general, God created the material world from his energies, not at all as an illusion, much less as a shackle. He created it, actually, so that we could be happy here. Here and now. And he created it as a tool for learning to create. You can create anything from matter (from material elements). You can, for example, create for yourself any body you want. You can build it as the Temple of God. You can destroy it like some kind of garbage dump. Both are learning. Learning how to operate in the Light of God. We didn’t talk about the structure of the Spirit, we have such an interesting conversation today. We have 15 minutes left.

01:17:00 Structure of the Spirit. Mind, Energy, Spiritual Heart.

Irina: Now write down what the Spirit consists of, at least. Now I will list. The Intelligent Spirit consists of Mind, Energy and spiritual Heart.

Each of these component structures of the Spirit consists of three faculties. This is how absolutely all Spirits are structured, no matter where they incarnate. They were embodied to different percentages, but, nevertheless, the structure is the same.

01:18:07 The mind of the incarnate Spirit. Thinking, Imagination, Memory.

Irina: So, the Mind consists of Thinking, Imagination and Memory.

Retreat participant: Like the Tree of Life, 10 sephiroth.

Irina: The body is probably the tenth. About Yes. This is all data from the Interstellar Union (ISU). Thinking is the ability of the Mind to process information and make decisions. Do you have any questions about Thinking? Or is everything clear? Do you understand what this is?

Retreat Participant: Yes.

Irina: Imagination.

Retreat Participant: Our ability to think and imagine is our ability, in fact, to think?

Irina: Yes. One of the abilities of the Mind that enters the Spirit. All this comes during incarnation, is not part of the body, manifests itself through the brain, yes, but is not part of the body. Just as electric light appears through a light bulb, but it is not part of the light bulb. It's clear?

Retreat Participant: Yes.

Irina: Good: Imagination is the ability of the Mind to create new images (the creative ability invested in us by God, his likeness), thoughts, ideas, and even scientific theories. There is also imagination there, we are putting new things there. If we process and make decisions with thinking, then with imagination we create.

Retreat participant: What about analysis?

Irina: Analysis and synthesis are just two operations that are accessible to thinking. Analysis is a mental operation that allows you to decompose information into its component parts. Analyze. Synthesis is

the opposite movement, we make up a whole from heterogeneous information. From parts to a system. Systems thinking. Normally, the Spirit should develop all these abilities of Thinking, all these mental operations, both analysis and synthesis. This is what they teach in school. If anything, they teach analysis mainly in the exact sciences, where formulas will need to be analyzed. And synthesis is taught more by natural sciences, like history, even drawing. Putting together puzzles, when we put together puzzles, we make up a whole from parts - it's like putting thoughts together. Memory is the ability of the Mind to preserve and reproduce information perceived or created by the imagination. Memory is also divided into conscious and unconscious, operational and long-term. These are all parts of Memory.

01:22:54 Transfer of information from embodiment to embodiment. Intelligence. Unconscious.

Retreat participant: If Memory is not part of the body, if it returns each time, then how does memory information get to the next body? To the next incarnation?

Irina: With Spirit.

Retreat participant: And also through light molds, right? Through the conductor?

Irina: When you perceive something with your body, it goes to your brain. And the brain pumps it into its spiritual Memory. And all this remains in the conscious or in that part of Memory that we call the intellect. Or in the subconscious part of Memory, which we call the unconscious. You remember everything you saw from childhood. But you don't realize that all this is actually stored in the Spirit. If you look at the bodies, the Memory of past incarnations also exists, it is stored in the Higher Self, and partly it is given to the embodied Spirit upon request, if the Spirit considers this to be possible in a given case. This is approximately the level of the causal body, if you look at the bodies.

01:24:19 Structure of the Spiritual Heart. Feelings, Desires, Instincts.

Irina: Next comes the spiritual Heart. This structure of the Spirit consists of 3, one might say, energies. Or, more precisely, 3 parts, 3 structures. The spiritual Heart itself, it is called the Heart, but has no relation to the physical. This just means that this is the core. This is the essence of the Spirit itself, where its personal vibration is recorded, which changes, recorded at the energetic level. As they say, “God’s truth will be written in your Hearts.” This does not mean in the physical, but in the spiritual.

The Spiritual Heart also consists of three structures: feelings, desires and instincts. Yes, we all actually live by feelings and desires, and the Mind is only a tool for achieving them and processing information.

The embodied Spirit, which incarnates into a body, has instinctive programs written into the body at the DNA level. But the Spirit, when it connects with the body, one might say, takes or downloads these programs into its spiritual Heart in order to execute them. They are found by the incarnate Spirit in the spiritual Heart. Instinctive programs are the point of connection between the Spirit and the body.

Retreat Participant: One more time. Instincts enter the body through the gene code, right?

Irina: Instincts that are laid down strictly for each species, i.e. it's called animal instinct. They are called “animals” not because they are bad, but because we share them with animals as biological beings. Now I'll tell you. Let's start, probably, with instincts.

01:26:47 Self-preservation instinct. Sexual instinct. Leadership and power. Herd instinct. Pleasure.

Irina: A person at this stage of development, an earthly person, has 5 instincts. I’ll name them now, you all know them. The first instinct is called the “instinct of self-preservation.” Does everyone know what it is and how it manifests itself?

Retreat participant: Of course.

Irina: The second is called the “reproductive instinct” or sexual instinct. I want to say right away that all instincts manifest themselves from the moment of incarnation, i.e. in this case, from the birth of the child, i.e. since childhood. Including the sexual instinct, the instinct of reproduction, in the form of enjoying one’s body, certain sensations, also manifests itself in childhood, even before puberty.

Both instincts are absolutely necessary and divine energies. The instinct of self-preservation is necessary so that we fulfill our task and do not go into the Spiritual world because it is better there. The instinct of reproduction is needed so that we create new life here and so that we enjoy union with a loved one in the form of sexual intercourse, because this is a form of divine Love manifested through the body. That's pretty much how God intended it. Why did he think this way? Because giving birth and raising a child is not a very simple task. Pregnancy, childbirth and raising a child is not an easy task. Therefore, the sensations that arise during sexual intercourse are some compensation for this birth. If this process did not exist, there would be no attraction to it, because there are attractions to it, although the sensations there are clear to everyone, and they are even the same, they are repeated, but this does not reduce the attraction, because instinct. If there weren’t this instinct, there wouldn’t be this attraction, this desire to give birth to children simply realized by the mind would not be enough. We also share it with animals.

The third instinct is called the “leadership instinct” or “power instinct.” Do you understand what this is? This is an instinctive program that allows you to strive for power and organize any communities. It is also a necessary instinct, both in animals where there are some kind of packs (there is also a leader there), and in intelligent beings, because in any society there is a leader. And the leaders, and the laws by which everyone else lives, and the leaders monitor their implementation. If there are no these leaders and these laws established by them, society will turn into chaos. Those who served in the army understand this well. Accordingly, even in a school class, even in a kindergarten group, in any religion, any sect, any football team, even in any family there is a leader. One or more of them, who, depending on their spiritual qualities, fight for leadership or accept each other as they are. The leadership instinct is also a good tool for learning love lessons, by the way. He is also divine. Every Spirit who comes, for example, to the presidency or the post of governor, came for a reason, but because this is his task of incarnation. It is not for nothing that he is in power, and not us. Another thing is if he does not fulfill the task of incarnation

in the sense that he does not manifest this power in the same way as a divine being, he lowers his vibrations. And then he can get into the next incarnation in that country or in that city where the same power will be exercised over him, so that he realizes this influence on the other side.

Retreat participant: How does he realize if he doesn't remember?

Irina: He realizes this at the level of the Higher Self, one might say, because when he leaves that incarnation, he will remember everything.

Retreat participant: Yes, I'll have to remember.

Retreat participant: When he incarnates, he will forget.

Irina: The qualities will remain in him. Those qualities that allow him to feel. In general, qualities are feelings, we also call them vibrations. Now we will just talk about feelings. All these acquired qualities and experiences remain in the form of feelings, not emotions (emotions are something else), but feelings.

Now I'll finish about instincts. The next instinct, the fourth, is called "herd".

Retreat participant: How?

Irina: Herd instinct. It allows us to gather in communities and love communication. This is also a necessary instinct for the exchange of experiences between different people.

But if it is manifested too strongly, a person may develop fears, for example, that he will be different in some way from society. If the instinct of self-preservation is too strong, irrational fears may appear that are associated with danger to life. Is it clear what these fears are? Those that a person cannot explain to himself are not dangerous, but he is still afraid. It happens. This happens due to unprocessed

experiences in childhood or in a past life. And because of this, too strong an instinct of self-preservation is activated.

If the reproductive instinct, the sexual instinct, is activated too much, a person can replace and confuse sexual desire with true unconditional Love. This also happens. This kind of experience can also happen in families.

The fifth instinct is called hedonistic. I will say it in Russian, this is the instinct of pleasure. Thanks to him, all people strive for pleasure rather than pain, and avoid pain. Thanks to him, children like ice cream more than pea porridge.

Retreat participant: There are those who love the other way around.

Irina: Instinct can be redirected to anything. If something pleases them, it is still an instinct of pleasure. Thanks to him, we all like bread with butter and cheese better than without it.

And indeed, this is a wonderful instinct if we do not let it dominate us. Why are we given the pleasures of the material world through the body and, in general, the receptors of this body that can perceive pleasure? So that we thank God and rejoice in this world. If we do not turn pleasure into selfishness, but accept everything with gratitude and the desire to share it with another incarnate Spirit, then this develops us. And if we begin to develop our instinct for pleasure in such a way that we neglect spiritual values...

Through the instinct of pleasure, God's desire for us to be happy is manifested.

01:34:57 Is it necessary to fight for the truth? Is it possible to kill in war? Justice and Love. How to act - with justice or with love?

Retreat participant: Then this happiness prevents someone from doing something - do you need to fight it, do something, or let it go by itself? I'm just like a defender of the Motherland. I'm interested in what

to fight with, who to beat, who not to touch? Or let it go, everyone gets their punishment there, etc.? How are you doing with this?

Irina: What does “defender of the Motherland” mean?

Retreat participant: A defender is a defender of justice. This human thing, love.

Irina: What are you protecting your Motherland from?

Retreat participant: From attacks.

Irina: Who?

Retreat participant: Negative manifestations.

Irina: From the war?

Retreat participant: No, there is no war.

Irina: Well, now we don’t have a war in the state. At least no one attacked us.

Retreat participant: There are areas that prevent us from developing, growing, etc.

Retreat participant: He’s probably talking about general aggression.

Retreat participant: Yes, yes, about aggression.

Irina: You know, about protection. Ashtar and I talked about this in great detail because he participated in the war against the reptilians 12 thousand years ago. In principle, they asked him there: “Does killing such a Spirit that attacked reduce vibrations or not? Is it even possible

to kill in war? Or in general, let it go as it goes?" A clear answer was given that everything depends not on the act itself, but on the motives. If we consider the murder of one intelligent Spirit by another, this is a conclusion from the incarnation. Yes, it's bad, it's prohibited by the commandments, it lowers vibrations, it alienates you from God. But it all depends on the motive.

If a person killed another person for the reasons of protecting the weak from aggression, from the seizure of his homeland, his children, from slavery, etc., he did not wish harm to him personally. There was no aggression towards him personally, but only regret that he was doing this, then that's one thing. But if a person killed and sedated his grandmother with sleeping pills in order to inherit an apartment, then this is a different motive and a completely different matter. Changes vibrations differently. And even this grandmother fell asleep peacefully and did not suffer, and the enemy whom the soldier killed received suffering from wounds, pain, this does not mean that his act was fairer and purer. It's not about pain.

Retreat participant: That's understandable. Question about something else. You need to maintain spiritual purity.

Irina: Monitor the purity of your spiritual Heart, why are you doing this? For the sake of love or for the sake of some kind of justice you only understand?

Retreat participant: Someone attacks someone, someone offends someone, but we are on the sidelines, right? Now I don't really know, do I need this? Now the situation is incomprehensible, there is no war, no peace, nothing. You can take care of yourself as much as you like. But what if it's boring? Just take care of yourself.

Irina: Of course, but how can it not be boring if it's the hardest thing to do with yourself? There is an answer to your question in the 5th chapter of the Gospel of Matthew, where there is the beginning of Christ's Sermon on the Mount. Open it now. Chapter 5 of the Gospel of Matthew. And read everything carefully. There are 44 verses, I think. As long as I remember. There is an answer to your question. How to treat enemies, etc.

Retreat participant: Justice, it can be different. One understands, and the other understands that he is for justice.

Irina: Yesterday we also talked about justice, at about the same place.

Retreat participant: One thinks he is doing well, and the other thinks he is doing well.

Irina: Exactly. Justice is a feeling of one's own truth, a truth that is recognized as truth. Truth, indeed, everyone has their own, but there is only one truth. Truth created us all. Everyone. There is a very good song, I love it very much, when they sing that the Ukrainian people and the Russian people are both Orthodox believers, and they pray to Christ in the church before the battle. On the Ukrainian side and on the Russian side. Before the fight. This is the song. It describes that they are so identical, the same hair color, the same eye color, that from above they are like one family. God will look at them, they are like one family. And they pray to the same God. They pray, they bow for victory, Ukrainians. And ours pray for victory, bow down. And such a question at the end of this song, addressed to God: "So who, God, will you help?" Who will answer?

Retreat participant: Both.

Irina: Will she help both? And what will he help with?

Retreat Participant: I think he will withdraw and watch.

Irina: Yes, he will give everyone a choice.

Retreat participant: You yourself chose this situation.

Irina: The prayer is clear. But sometimes it's easier to pray than to change yourself, right?

Retreat Participant: Yes.

Irina: But regarding justice, you need to act with justice or with Love. These are two different things. Please remember who is in favor of acting fairly, have you ever made mistakes in your life?

Retreat participant: Of course.

Irina: In relation to other people, I mean now.

Retreat participant: Of course.

Irina: Who hasn't made a single mistake?

Retreat participant: I didn't.

Irina: You see, people don't believe me.

Retreat participant: Let him not believe it.

Retreat Participant: I agree with what we are doing. We can even do this unconsciously. From our position, it seems to us that we are not to blame, but a person from a different position, from a different perspective, experiences completely different sensations. You cannot predict what he experiences from your actions.

Irina: Did you make mistakes? Well, let's say those things that we are ashamed of?

Retreat participant: Of course.

Irina: How would we like those whom we have offended to treat us in this situation? For love or justice?

Retreat participant: For love.

Irina: I will say that those who offended us also want the same thing.

Retreat participant: Of course.

Irina: That's understandable. Well, until 3 o'clock. You need to rest.

January 5, 2021

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Participants of the retreat in Abkhazia (12/28/2020-01/07/2021).

#236 Why is fluoride dangerous? How fluoridation of water and toothpastes affects the human body.

https://blog.cassiopeia.center/chem-opasen-ftor-vliyanie-na-organizm
https://www.youtube.com/watch?v=lad3C3pKudY

00:21 The effect of fluoride on the human body. Consequences of using sodium fluoride.

Vladimir: Fluoride is found in most toothpaste brands around the world. Is this a system flaw or error? Or a wrong, sincere understanding of our doctors? Or is there a centralized goal behind this: to affect the thyroid gland, reduce its activity, and worsen the possibility of contact with the Spiritual World? Or there is a global goal behind this, and doctors are unconsciously realizing it. When I talk about a goal, do I mean the earthly structure that realizes this goal through fluorine?

Irina : He says: “It’s not the scientists’ mistake.” I will now talk about fluoride. Among your scientists there are many biologists and doctors who show that in such concentrations fluoride displaces calcium not only from the teeth. Once in the stomach, in the digestive tract, it removes calcium from the bones, replacing them with fluoride. This makes them softer. Calcium is deposited in the vessels, which leads to rapid calcification and the development of atherosclerosis, to some types of kidney stones, calcifications.

Fluoride, especially one of its active compounds, sodium fluoride, is the most commonly used. Sodium fluoride is not only used to make toothpaste; it is added to drinking water. Not prohibited. This industry is more developed in the USA. They add this despite criticism from scientists who have found that such concentrations will remove

calcium from the body.

With high concentrations, it affects the nervous system, which leads to a decrease in emotionality, volitional potential of the individual, and weakening of memory. This is possible at high fluorine concentrations. Smaller ones cause damage to teeth and bones. If applied to teeth.

Scientists who advocate this practice believe that it destroys some oral bacteria, changing the acidic reaction to an alkaline one. But an acidic reaction in the oral cavity does not form without reason. When bacteria consume sugar, it remains after eating and releases special acids as a metabolic product. This is what destroys tooth enamel.

Fluoride is very actively absorbed into the blood through the gums. This is an active element. As I already said, it can lead to damage to bones, blood vessels, kidneys, and decreased immunity, leading to cancer. In high concentration it affects the nervous system and the brain. Not just the pineal gland, the whole brain.

If it is constantly entering the body in large or small quantities over many years, it can cause weakening of memory, a weakening of the brain's ability to manifest the rational principle of the Spirit. That is, it will be difficult for a person to think and analyze information. This is possible in case of chronic poisoning with so-called fluorides. But you are not asking me about the impact. I already told you. You ask why this happened.

05:17 Sodium fluoride is a by-product of uranium production. Reasons for using sodium fluoride in America and Russia.

Vladimir: Absolutely right.

Irina: I will tell you about my research. As a biologist, I have been researching this issue. After Maria asked me about this, I inquired in my archive. The reason was that a by-product of uranium production when making nuclear bombs containing uranium was a very large amount of sodium fluoride, as it was extracted from the ore.

Maria: We already have this information.

Vladimir: So, so what?

Irina: In America, one chemical company began to get rid of fluoride. People began to suffer and get sick from this. The government, intelligence agencies, hired scientists from the academy and ordered them to solve the problem. Scientists have said that fluoride is beneficial. After that they began to add.

Maria: It's on the Internet.

Vladimir: How does this happen in Russia and why?

Irina: In Russia, supporters of research about improving the quality of teeth and getting rid of certain diseases began to write about this. Scientific licenses were obtained. There were, of course, critics. But in Russia the government made this decision independently.

Vladimir: In Russia there are also motives to get rid of fluorine, which remained after the history associated with nuclear weapons. Did these motives play a role here? Therefore, the Russian campaign took up the idea.

Irina: Yes, this option is possible **.** I simply named those who were the first to address this issue. And since Russia produces a large amount of uranium, the intelligence services may have become interested. I admit that this is also one of the reasons. The second reason is not so global. It is due to the fact that rapid tooth decay allows doctors who treat and change teeth to earn a lot of money on paid services. They are interested, even if their bosses don't know it.

Vladimir: Everything is clear. I don't know about Masha, everything is clear to me, Yes, please, Masha.

Maria: I knew this information even before Mead from the networks. I was interested in this question. This information is known in Russian,

German, and English literature that I have read on this topic. In principle, what Mead just said is confirmed. These are the interests of large concerns. First, get rid of this material, which is used in many poisons, such as rodent poisons and other substances. We have a lot of criticism here about these substances.

Irina: He’s telling me now that there are a lot of critics in Russia too.

09:11 Accumulation and removal of fluoride from the body. Calcification of blood vessels. Fluoridation of water. Water purification with activated carbon. Compositions for cleaning teeth.

Maria: Meade, please tell me, the concentration of the substance that we have in toothpastes during daily use accumulates in the body and acts as a blocker, as a blocker of the pineal gland? A physical organ that promotes communication with the Spiritual and subtle worlds.

Irina: Fluoride can accumulate in bones. He's telling me now. Fluoride accumulates in the body over the years with constant use. It comes out very poorly. The period of elimination of fluoride, in the form of fluoride, is about two hundred days through the kidneys, through all body systems, complete elimination. If you no longer consume it, bone tissue begins to be replaced by calcium, and fluoride is eliminated.

Maria: I saw photographs of the pineal glands, organs removed from the body, in comparison: in the photograph of a healthy pineal gland there is a natural color, in the photograph of a fossilized gland there is calcium, some kind of hard substance.

Irina: She doesn’t cover herself with calcium. You saw the calcification, as I already said, of blood vessels. It is surrounded by vessels.

Maria: It seems so.

Irina: It can be deposited anywhere: in the pineal gland, in the brain, in the heart, in the aorta. Look, the pulmonary arteries often become

calcified. This is the result of atherosclerosis. It is not caused by fluoride, but can be aggravated by calcium deposition.

Vladimir: Mead, do you think there is a motive: through the pineal gland to reduce our sensitivity to spiritual techniques? Neither doctors nor representatives of concerns may know about this motive. This is conveyed through plasmoids, which influence through the astral world. Their purpose is present with the imposition of fluoride? Could this be possible?

Irina: Precisely the pineal gland? Decreased mental abilities are possible. But the pineal gland... I didn't see much difference between the spiritual practices of those who use it and those who don't use it. Moreover, in America, many people drink water without even knowing it. In Russia it is less developed, only in large cities. In the USA, water fluoridation is more developed.

Regarding those chronically poisoned by fluoride, I have made my position clear. I can add to it, to avoid this poisoning it is not enough not to buy pastes containing fluoride.

What can purify water? Activated carbon cleanses best. There are special filters with magnesium oxide that clean ninety percent, this is activated carbon.

It is best to prepare fluoride-free dentifrices. Use natural ones that were known in ancient times. Take white clay powder, dilute it with water and add various essential oils. Tea tree, eucalyptus, and cloves are especially useful. They improve dental health.

13:20 Unknowingly using fluoride toothpaste. Carrying out the ideas of plasmoids through egregors.

Vladimir: Thank you very much, important information. I have one last question on this topic. Mead, do you see any signs in the noosphere that there was some kind of agreement between circles in the United States and Russia about the use of fluorine in different forms for the population? That they did this not individually, but centrally?

Irina: Perhaps. The goal will be clear, because quite large politicians and the military take advantage. For example, I know about this.

Vladimir: What do they use?

Irina: Toothpaste.

Vladimir: So, on the contrary, I'm saying that some top politicians agreed to poison the population in America and in the United States. I'm asking about this. Could this be possible?

Irina: He says that they clean themselves with fluoride.

Vladimir: Confirmation of my words, or vice versa, since they clean themselves, they do it unconsciously.

Irina: They do it unconsciously. Because they believe the information that is presented that this is correct. They may not be aware of the criticism or may not pay attention to it. You said that sodium fluoride is known to be harmful. Yes, I know, you should know about this.

Vladimir: We can assume that in large countries, I don't want to say the word "conspiracy," but there is some agreement to do this with the population, fulfilling the low-vibration goals of the embodied rulers.

Irina: If we consider it a conspiracy of plasmoids that contributed to the emergence and strengthening of the idea in the egregors of the Earth, so that people's bodies would get sick, and they would feel despondent from this. Quite logical.

Vladimir: Plasmoids, whose unconscious contactees are representatives of the ruling elite. These ideas are instilled in them, and they implement them.

Irina: The ideas of plasmoids can be carried out through egregors. Whether they are conscious or unconscious contactees, the ideas that

are in the minds of many people are carried out through egregors. They are connected to these egregors.

Vladimir: Well, I see.

Irina: They act through the Earth's noosphere.

16:06 Fluorine in microdoses is an important element for the body.

Vladimir: I received an answer. Masha, maybe you can add. I want to summarize the most important information we have received. We found that fluoride compounds are found in large quantities in toothpaste and water, especially in the United States and Russia.

Irina: Regarding the lack of fluoride. They say. Fluorine in microdoses, this is also a necessary element, is contained in sufficient quantities for life. It is found in all plants and animal products. If a person eats a varied diet, then he will have enough fluoride. There will be no shortage.

Vladimir: I see, thank you. I'll finish my thought. These compounds are also found in drinking water, especially in the United States and Russia, in huge quantities, in almost all brands of toothpastes. I have five toothpastes and they all contain fluoride.

Irina: I will say that there are toothpastes without fluoride, as indicated in the composition.

Vladimir: Yes. But I found the simplest ones, bought in stores; they all have them. It is clear what can be found. This means that this was done deliberately, since according to the official version it is considered useful for destroying bacteria and good for teeth. The reason is in the United States and Russia. We know more precisely about the United States, but we can guess about Russia. Mead did not confirm this to us.

This is due to the fact that during developments related to nuclear technologies, nuclear weapons, and the transformation of uranium, as I understand it, a large amount of fluorine-containing compounds remains, which simply have nowhere to go. It would be nice to recycle them, while at the same time telling them that it is useful. But this is only one part of the story, and the second part...

Irina: It’s not easy to dispose of, it produces too much fluoride. It is impossible to dispose of it through toothpastes, since small doses are added so that the person is not poisoned quickly, otherwise the effect will be immediately noticeable. Motive: to convince the population that this substance is safe.

Vladimir: And then use it more widely. But that was one thing, and the second...

18:45 Minimum lethal dose of fluoride. One of the causes of diseases of the spine and joints. Conspiracy against yourself.

Irina: I want to talk about fluoride. If you look at the minimum lethal concentration for humans, then its concentration is much lower than, for example, lead. That is, generally accepted lead is less toxic, especially in its pure state or in combination with inorganic elements. Well, and fluorine...

I asked the Tashigan people to provide me with information about the dosage in modern toothpastes. They investigated, like medicines, through contactees: one hundred milliliters of toothpaste contains a sufficient concentration - they spoke in their units of measurement - if used internally at the same time, to kill a person weighing up to fifteen kilograms.

Vladimir: That is, a child. It's clear. This means that this was one motive, and the second motive, which has already superimposed: more destruction of tooth enamel than benefit. This makes it possible later...

Irina: Kostya.

Vladimir: Bone tissue. This gives the opportunity to earn money, to a greater extent, to dentists. Bone tissue is a different story.

Irina: Now he's talking. This is one of the reasons why diseases of the spine and joints are common in your civilization.

Vladimir: That is, everything related to the skeleton is a consequence of drinking water with fluoride and toothpastes. Interesting information was found out today. That is, there is more harm from fluoride than the benefit from these compounds.

A conspiracy emerged. I asked Meade whether there was collusion between the United States and Russia. The answer is not entirely certain. It is not clear: “yes” or “no”.

Irina: Some of our toothpastes are advertised in capital letters. They write that it contains fluoride.

Vladimir: Yes, it’s exactly the same here. Fluoride toothpaste is advertised to be better. We already understand the goals.

I want to say something important. We have made it clear that behind this there may well be low-vibration plasmoid civilizations that, through specific individuals with influence, through egregors: spiritual, scientific, introduce these ideas with the aim of harming us. They have their own goals to cause harm, for example, the destruction of physical bodies. We also found out an important point - to reduce our possibility of spiritual contacts.

Among other things, fluoride affects the brain and the pineal gland, which is involved in establishing our spiritual contacts with the Spiritual World, with our Spiritual Self and with other subtle substances. That is, to separate us from the Truth, from the Light. It is completely understandable why this is the goal of low vibration plasmoids. They introduce ideas through earthly people, who, by their vibrations, tend to be on the same level of perception with them. It could be anyone: politicians, scientists. Such a mechanism.

Friends, I am glad that we have covered this topic. Anyone who has been deeply interested in conspiracies can rejoice. We somehow confirmed something, but very locally and in a very specific way. Not in terms of the presence on Earth of some kind of single evil force that commands us all.

Irina: Yes. Senior politicians and military personnel can brush their teeth with fluoride toothpaste.

Vladimir: That is, they themselves are also unconsciously victims of this.

Irina: A conspiracy against ourselves.

Vladimir: They are victims. Not some earthly shadow structures that know everything and are evil. All these people are victims themselves.

Fine. Masha, if you want to say something, please, if not, then we will finish.

23:56 Intuitive refusal of children and adults to brush their teeth.

Irina: Even dentists can clean them themselves and give them to their children. Such pastes also exist. I understand now why children, and not only children, even adults, feel repulsed from brushing their teeth.

Maria: Yes, the Higher Self prompts.

Vladimir: This place needs to be kept on record. I'm telling those who will install it.

Irina: They tell me: "I've lived my whole life without brushing my teeth. On the contrary, they don't hurt for me." And why? He says: "Why spread caries from one tooth to another with a brush? Mom told me to clean. And I'll do anything, but rejection comes like a brush." Many people have told me this.

Vladimir: It is possible that Masha asked this question at a conference about children. Many children refuse to brush their teeth because they subconsciously feel that most toothpastes contain harmful ingredients. This component will interfere with contact with the Higher Self, and will physically destroy their tissue. They feel it, but we think they are being capricious.

Irina: Their Guardian Angel takes them away, but their parents don't understand and force them.

Vladimir: I think we will finish now. The information is very serious for everyone. Important information.

Irina: Not only children, but also some adults. I've met: some people don't like brushing their teeth. They already have a subconscious rejection, even if the paste is without fluoride.

Vladimir: Yes, I know that too. And dentists insist: "Brush after every meal, at least twice a day: morning and evening, the more often the better." Also unconsciously, but they perform the same role, they pour grist into the same mill.

February 26, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Vladimir Goldstein - administrator of the Cassiopeia project, journalist from Chicago;

Maria Sokolskaya - administrator of the Cassiopeia project;

MidgasKaus is a representative of the planet Esler, a biologist, psychologist and specialist in alien civilizations.

#237 Reptilian in the uterus for 500 euros...

https://blog.cassiopeia.center/reptiloid-v-matke-za-500-evro
https://www.youtube.com/watch?v=ECmrvh5psH0

00:21 Identifying the reasons for seeking help for healing.

Irina: Please tell us how you saw them?

Participant: I haven't seen them myself. At the age of 4, energy entered me, into my uterus. I couldn't understand what this energy was at 4 years old. Now I am already 56 (years old).

Irina: Stop! We settled on one. Don't run so hard, otherwise I won't understand anything.

Participant: Okay.

Irina: You were 4 years old?

Participant: Yes, yes.

Irina: What happened, more details?

Participant: An energy unknown to me then entered my uterus.

Irina: How did you feel?

Participant: Something has entered the uterus.

Irina: Why exactly in the uterus? How did you feel?

Participant: Because some kind of energy entered the lower abdomen. I didn’t understand what kind of energy this was.

Irina: How did you feel it, like what?

Participant: Now, at 56 years old, I can explain that it was excitement of the uterus.

Irina: What excitement?

Participant: So, when a woman gets excited. And then it was incomprehensible to me.

Irina: Yes. At 4 years old did you feel sexual arousal?

Participant: But I didn’t know about it.

Irina: Okay, stop. At 4 years old did you feel sexual arousal?

Participant: Yes. I didn't know this. Some kind of energy has come in.

Irina: And it was because of this that you were spanked?

Participant: Yes, yes.

Irina: It’s kind of strange.

Participant: Well, yes. It turns out, yes.

Irina: Do you have children?

Participant: Yes, daughter.

Irina: Would you spank her? How could your mother spank you for this?

Participant: I don’t know. Don't ask now. She has been gone for 10 years now.

Irina: Why, you can just ask. Do you want to talk to her?

Participant: You know, I want my health to be restored. And I don’t even want to conduct an investigation. Because my husband has already left. And I always have these files, because I always have a problem with this.

Irina: Yes. Do you think that at 4 years old it was a reptilian?

Participant: I didn’t know what it was. Wait, this is just the beginning. At the age of 17, I lifted heavy things, because I was the eldest, I helped, everyone had hernias. I lifted something heavy and a ligament broke on my right side. I lay there for three days. I will quickly (tell you). Then for the rest of my life I was not allowed to lift anything heavy. Somehow I gave birth to one child, and my stomach dropped again.

They made holes in me eight times, but nothing was found here in Germany. And here in Ukraine, there was a grandmother, the Kingdom of Heaven. She lifted the uterus with two fingers. He says: “Your uterus is drooping.” She picked it up. We came here and started picking holes. Now there is a spike on a spike, it doesn’t matter. The point is that I was framed. When I started getting sick, my husband said: “That’s it, you’ll probably never be healthy, I’m leaving you.” And left. They sewed up my uterus and sewed up my urinary tract. Yesterday I went to the doctor, they said that the urinary tract had broken again and needed to be stitched up. That is, they used my body in the second chakra. Just like an incubator.

Irina: Who told you about this?

Participant: I sent you two videos on WhatsApp.

Irina: Tell me in your own words, I didn't watch them, I don't have time to watch the videos.

Participant: Regressionologists said that they were reptilians. Here (shows video).

Irina: So, now, just a minute, I'll look at everything myself.

Participant: Yes, of course.

Irina: A regression session is cleansing and liberation from interference, from low-vibration entities of the infernal world, magic, witchcraft, curses, generic problems, egregors, larvae and other energy parasites.

Participant: He is now working with Olga, and there are sessions there.

Irina: How do they work? Explain, at least in a few words?

Participant: The three of us. He makes sure nothing happens, he is next to her. Immerses her. She closes her eyes (this Olga has her eyes open), and they look at the subtle world.

Irina: Who else did you visit? I understood this one.

Participant: I'm also on VKontakte, here are the girls (shows a video).

Irina: What are their names?

Participant: What are their names? They don't post their videos.

Irina: How did you find them?

Participant: I found them on VKontakte through a regressologist, this friend.

Irina: When did you contact the second and the first?

Participant: To these women in the summer, that is, a year difference.

Irina: You turned to Pavel first, do I understand correctly?

Participant: Yes, yes.

Irina: Before contacting him, you didn't know that you had reptilians?

Participant: Of course not.

Irina: No, right?

Participant: No.

Irina: And when they looked at you, what did you feel?

Participant: I was tense. And when they cleaned me, they found a dried up reptilian there and pulled him out. And then we looked: why did my husband leave, why am I sick. We looked at everything, cleaned everything. It became much easier for me.

Irina: How much?

Participant: Essential.

Irina: What time?

Participant: What time? Psychologically, of course, I felt better.

Irina: What time?

Participant: I can’t say how long. It got better, but not all the problems were solved, and I went to other regressologists. And they cleaned out my uterus.

Irina: Did they say the same thing as those?

Participant: Yes.

Irina: How could they say the same thing if the reptilian had already been pulled out?

Participant: This reptilian was pulled out. And these found that the reptilian was together with the jellyfish.

Irina: So he appeared again, or what?

Participant: I can’t say. But they (assured me).

Irina: You said that you were the first to pull out a dried-up reptilian.

Participant: Yes.

Irina: Did they find him again?

Participant: No, they didn’t find it. They found caviar with jellyfish.

Irina: No, you said they found a reptilian with jellyfish. Do you remember what you found?

Participant: I remember. The first time they found a dried reptilian, they removed it. But Mona and Pavel did more than just that. They cleaned me and removed all sorts of stories from my life, what the gypsy had guessed, they removed all sorts of things, and I felt better. But not everything was removed. I felt better, but I understood that something else was needed, because something else was bothering me. I then turned to these girls. They found eggs from octopuses on me, and they cleaned me up.

Irina: Who are octopuses?

Participant: I don't know any comments. I do not see.

Irina: Reptilians - I understand perfectly well who they are. What about octopuses? Who is this anyway?

Participant: They cleaned my uterus from octopuses, from these eggs, from calves.

Irina: And they said where these eggs came from in your uterus?

Participant: Yes, she said. She couldn’t tell whether it happened in a past life or not. But in this life, he says, they waited until you were born and from the age of three. She said from three, and I know that it was at the age of 4, because I felt more like an adult.

Irina: Where did some octopuses come from in your uterus?

Participant: She said they entered me when I was 3 years old.

Irina: How did you get in? Where did you come from?

Participant: They started laying in the uterus at 3 years old, she said.

Irina: Where did you get them from?

Participant: She didn't say.

Irina: You didn’t ask?

Participant: There was a whole list of problems, even before this. There was no move before that. I was glad they cleaned it up.

Irina: And when did they clean you, these girls?

Participant: In the summer, this summer.

Irina: And then what happened?

Participant: In June. There was nothing.

Irina: How did you feel?

Participant: I was just glad that they cleaned me up. That's all.

Irina: Has anything changed after this work?

Participant: No, it hasn’t changed.

Irina: Nothing at all?

Participant: Psychologically I felt better, but these problems...

Irina: What result did you expect?

Participant: I wanted them to cleanse my second chakra, and I thought that it would be easier for me in terms of the second chakra and its work.

Irina: Has this wish come true?

Participant: The bladder was already torn. No, it didn't happen.

10:52 Spiritual cause of body illness.

Irina: So you wanted healing on a physical level?

Participant: Yes, yes...

Irina: Why do you go to an esotericist for healing on the physical level?

Participant: Who should I go to? I went to the doctors. They stitched up my uterus - they stitched it up, good. The urine was sewn up. It has now broken off. I went to the doctor yesterday, they told me again: “You need to stitch up your bladder again.” Second time.

Irina: Do you understand that esotericists do not work as doctors?

Participant: I understand.

Irina: And what result did you expect?

Participant: I also turned to doctors, I turned to esotericists. They took it away from me, they mended it, but it’s torn again.

Irina: So, you are doing something wrong.

Participant: What can I do wrong?

Irina: If your body tells you that you are going down the wrong path, because no people can help you.

Participant: I just don’t know what to do...

Irina: Have you watched any of my videos?

Participant: Of course! I am subscribed to your channel.

Irina: Have you watched the video “Chips, Connections, Reptilians”?

Participant: They checked everything on me - for chips and connections.

Irina: You didn't answer my question.

Participant: No, I didn’t watch it.

Irina: Very sorry. You need to watch the video “Chips, connections, reptilians”, where my interstellar friends clearly say that what other regressologists say about connections and clean up is called a way to make money on other people’s problems. How much did you pay to both?

Participant: A lot.

Irina: Name the amount, don’t be shy.

Participant: You will scold me later. That's a lot.

Irina: I won’t. I know the prices.

Participant: The girls were paid 200 euros.

Irina: And Pavel?

Participant: 500.

Irina: What?

Participant: Euro.

Irina: Okay. Pavel 500 euros. How long did they work?

Participant: 2 hours.

Irina: And the girls?

Participant: Also about 2 hours, a little more.

Irina: Great. What can I tell you? These are special people, regressologists, whose goal is not to help a person, to put it mildly. Find a problem that can be cleaned up, and say that you cleaned it without any checking.

Participant: Well, yes, it turns out that way.

Irina: I'm still putting it mildly now. In fact, now I want to, when I see people like you, and I've already seen a lot of them, with exactly these problems, and who went and paid for the words that a reptilian was pulled out of them. But nothing changes in life, they don't connect with the Higher Self, nothing. When I saw one, I said: "Light and Love." The second one I saw: "Light and Love." But when I saw 100 people like this, how many can you behave like this? I'm not talking about you now.

Participant: I just don’t have the information, so I...

Irina: I’m not talking about you now, but about them.

Participant: This is their karma.

Irina: No, not only their karma, but also your responsibility. You don't want to take responsibility for yourself. Do you want to solve everything with money? You won't solve anything with them.

Participant: Why? No, you're wrong. I do exercises every day. What I know is that I go to the doctors and they operate on me. My whole stomach has already been repaired, 8 operations and nothing is found.

Irina: You don’t go inside yourself to ask the Higher Self what is the cause of the disease? Are the reptilians to blame for everything? And you have nothing to do with it? You can't solve anything with money. You can’t buy health, even if you give 1000 euros.

Participant: You know, if I had the opportunity to get an answer. What do you think, I didn’t ask? If I had received an answer, I would not have given the money.

Irina: That’s why I say that I have a completely neutral, kind attitude towards you. But when I hear stories about Pavel’s and these girls’ canals, two-hour cleanings for no apparent reason, for this money, and leaving the person with his own problem. I would like to talk to them a little, or release another video. Because, in fact, there are a lot of people like you. They pay huge amounts of money.

Now I will briefly explain to you. Any physical illness that is not particularly cured by medication has a spiritual cause. And this reason is not in reptilians or octopuses. This reason is in negative blocks, emotions, thoughts of the person himself. Some blocks exist in the aura. Have you heard anything about negative blocks?

Participant: Of course.

Irina: So no one can clear you of these negative blocks for a long time, except you yourself. You can cleanse your energy in different ways: cosmoenergetics, magic, and others. But this just gives time for you to connect with the Higher Self and change your thoughts, your attitudes, which led to the emergence of negative blocks. Do you understand what I'm talking about now?

Participant: I understand. But I love people, I forgive everyone. I don't know where these blocks are.

Irina: And for you to find out, you need to talk to the Higher Self. That is, it may slip past your consciousness, do you understand what I'm talking about?

Participant: Maybe yes. Yes maybe.

Irina: And not them, they cannot do this, because they have their own Higher Self there. And you yourself must do this, without setting any prices.

Participant: Okay. Thank you. You are a bright person! It's so good that you exist. And how good it is that they have now established contact with us. I would rather like there to be light, love, honesty, justice all around, and for us all to be happy. Thank you!

Irina: You have a very bright smile.

17:49 Practice "Session of connection with the Higher Self."

Participant: Thank you! Tell me, I'm probably not a contactee? No?

Irina: Come on, close your eyes like this.

Participant: Let's do it.

Irina: How do you feel?

Participant: Dizziness now, okay. There's a blue light coming here.

Irina: Yes, that's right. You see, you have good sensitivity. Can you feel my energy?

Participant: Yes, I feel it.

Irina: What is she like?

Participant: So soft, affectionate, so tender.

Irina: You have a lot of fears.

Participant: Yes. Yes.

Irina: Now I will speak as a regressologist. I feel brown clouds flying around you like smoke.

Participant: Yes, yes, I'm alone now and...

Irina: I just sent you my phantom, it's standing next to you.

Participant: Yes, I see.

Irina: He hugs you.

Participant: Oh, thank you! Yes.

Irina: Do you feel it?

Participant: Yes, I see.

Irina: What kind of energy is this?

Participant: So tender, affectionate, like flowers blooming in May, such energy flows.

Irina: I give you the energy of life.

Participant: Thank you.

Irina: How do you feel?

Participant: She's straight on the head (stroking it).

Irina: Yes. I can just mentally imagine how I stroke your head and run through your hair.

Participant: Yes, now it's as if my hair was moving, I felt it.

Irina: I'm playing with a phantom.

Participant: I feel a presence.

Irina: I'm telling you now: "You are my little girl, I love you."

Participant: Yes, I feel that.

Irina: I fill you with my Light. I love and accept you for who you are. Feel the Divine presence in your Soul.

Participant: I was kind of dark, but now I'm filled with all the Light.

Irina: Yes, because I cleanse you. I cleanse the astral body, I disperse these clouds. You are the Light. You are happiness. You are Love. You are the infinite immortal Spirit. What do you feel?

Participant: Bliss. I'm flying, I'm in heaven.

Irina: Do you fly?

Participant: Yes.

Irina: Let's fly together. Go ahead, ask your Higher Self: “Am I offended by my mother?”

Participant: Higher Self, what?

Irina: Ask: “Higher Self, am I offended by my mother?”

Participant: Yes.

Irina: Is she alive now?

Participant: No.

Irina: Ask: “Higher Self, do I have an attachment to my mother?”

Participant: Yes.

Irina: You see. Ask: “Where in the body is it located?”

Participant: They show the uterus, the second chakra.

Irina: Here's the link for you. And there is no reptilian there. These regressologists, they saw it as some kind of external influence, and

their perception was that the reptilians were enemies. Therefore, they cannot correctly recognize the cause. Close eyes. That's why they told you so. They said so not out of malice, but because they see it that way. And now you see the real reason. Look what this binding looks like?

Participant: There is some kind of cord and a dark spot going from me to my mother.

Irina: Say: “Higher Self, what percentage of life force goes through this connection?”

Participant: Wow **,** 48.

Irina: You give almost half of what you eat to your mother, just throw it away into the void.

Participant: Yes.

Irina: It’s impossible to clean up from this. Until you do it yourself now. I will help you. Will you talk to her?

Participant: Yes. Yes.

Irina: How do you feel now?

Participant: I feel my mother.

Irina: I fill you with energy, the power of life, Light. What do you feel?

Participant: I became more stable, solidified, otherwise I was so (loose).

Irina: Now I'm touching your binding. Ask: “Higher Self, how does this

attachment affect my health?”

Participant: Depressing.

Irina: Is this the cause of my illnesses?

Participant: Yes.

Irina: Can I break it?

Participant: Yes.

Irina: How long will my physical body need to recover?

Participant: Oh, 3 months, 3 years, I don’t understand.

Irina: Ask: “Higher Self, after breaking the attachment, how long will it take my body to restore all organs?”

Participant: 6 months.

Irina: And what will happen 6 months after the connection breaks?

Participant: Goes: “ Nothing.”

Irina: What will happen to my health 6 months after the connection breaks?

Participant: Health.

Irina: So my genital health will improve?

Participant: Yes.

Irina: Will I stop needing operations?

Participant: Yes, no - it’s coming. I'm a little worried. I have this pain point.

Irina: What's coming first?

Participant: Yes, no.

Irina: Should I have surgery?

Participant: Yes.

Irina: And if I don’t break the connection and have surgery, what will happen?

Participant: Not good.

Irina: What will be bad?

Participant: I will feel bad.

Irina: And if I break the connection and have surgery, then what will happen?

Participant: Okay.

Irina: Will I have no more breaks?

Participant: No.

Irina: No?

Participant: No. Goes 3 times: “No, no, no.”

Irina: How long after the connection is broken is it better to have surgery?

Participant: In 3 months.

Irina: Okay. Say: “Higher Self, thank you for your answer.”

Participant: I thank you.

Irina: Come on, introduce your mother.

Participant: Yes. I feel her energy heavy.

Irina: Describe her.

Participant: Small, tortured.

Irina: What does she look like?

Participant: People like me - small and very tortured by life.

Irina: Look into her eyes.

Participant: The heat is coming.

Irina: How do you feel?

Participant: She loves me.

Irina: How do you feel?

Participant: Offense.

Irina: Say: “Mom.”

Participant: Mom, I forgive you, forgive me too, please.

Irina: Tell me why. Mom, I forgive you.

Participant: Mom, I forgive you.

Irina: Tell me why.

Participant: Because I received little love from you, because I nursed my younger sister. She brightened, somehow it became easier.

Irina: I forgive you for beating me as a child.

Participant: Yes, this is nonsense. I forgive you for everything. Forgive me too, please.

Irina: The moment you beat me, my sexual energy manifested itself.

Participant: No, before that it appeared.

Irina: Yes, you beat me for displaying divine sexual energy, and I forgive you for that.

Participant: I forgive you for everything.

Irina: How do you feel?

Participant: The light has gone, light, light.

Irina: And how do you feel?

Participant: Mom was so heavy. There was light, but I felt better. The lower abdomen became lighter, and my mother became half lighter in energy.

Irina: Say: “I forgive you for the misunderstanding.”

Participant: I forgive you for the misunderstanding. Oh, how hard it is... I forgive you for the misunderstanding.

Irina: I forgive you for the inattention.

Participant: I forgive you for your inattention.

Irina: I forgive you for being rude.

Participant: I forgive you for being rude.

Irina: For unwillingness to listen.

Participant: For unwillingness to listen and understand.

Irina: For not wanting to caress me and give me your tenderness.

Participant: For not wanting to caress me.

Irina: And give your tenderness.

Participant: And give your tenderness.

Irina: I understand how you feel. I'm with you.

Participant: I'm with you.

Irina: And I'm with you, do you feel it?

Participant: Yes, yes, that's how love went!

Irina: How do you feel?

Participant: Different color vibrations started, it's really love. The love of a person for a person is straight love.

Irina: How do you feel now?

Participant: I feel love.

Irina: Okay?

Participant: Yes, very much. Thank you.

Irina: Say this: "Mom, I understand that you did this because of a lack of love in yourself."

Participant: Oh, exactly. Mom, I understand that I did this because of a lack of love in myself.

Irina: And I give you my light of love.

Participant: And I give you my light of love.

Irina: So that you are truly happy.

Participant: So that you are truly happy.

Irina: So that you know God.

Participant: So that you know God.

Irina: In yourself and in the world.

Participant: In yourself and in the world.

Irina: And so that you become a bright divine being.

Participant: And so that you become a bright divine being.

Irina: Fill it with light. Imagine that light is coming from your palms. He goes to her, into her spiritual heart. What is she doing?

Participant: It dissolves all the darkness that she had.

Irina: What is she doing?

Participant: She feels better, she feels relieved.

Irina: Accepts?

Participant: Yes, yes.

Irina: How do you feel?

Participant: Happiness.

Irina: Yes, I feel the flow. Fine. You're doing a good job. Well done! Great. Now say: “Mom, I break the tie between us.”

Participant: Mom, I’m breaking the connection between us.

Irina: By the power of divine light.

Participant: By the power of divine light.

Irina: I ask you to switch to food from divine sources.

Participant: I ask you to switch to eating from a divine source.

Irina: I wish you bright, favorable incarnations.

Participant: I wish you bright, favorable incarnations.

Irina: In any of the divine worlds.

Participant: In any of the divine worlds. She connected immediately.

Irina: Great.

Participant: Such a big pillar of light.

Irina: It fell on her, right?

Participant: Yes. He fell on her.

Irina: Have I disconnected from you?

Participant: Some kind of dark hand from me, it has now turned gray

and brightened.

Irina: Passed out?

Participant: She doesn’t exist.

Irina: Passed out?

Participant: It seems like she passed out. Yes Yes.

Irina: How do you feel?

Participant: Freedom.

Irina: We don’t open our eyes, we work. We're not done yet. So. Okay, Say: “Mom, I love you and accept you for who you are.”

Participant: Mommy, I love you and accept you for who you are.

Irina: I'm letting you go. Go to the world where you are supposed to be according to divine laws.

Participant: I'm letting you go. Go to the world where you will live according to divine laws. She waved her hand.

Irina: Gone?

Participant: She waved her hand and stood somewhere a little further.

Irina: Say: “Do you want to tell me something?”

Participant: Yes. What do you want to tell me? I love you.

Irina: Thank you and I accept.

Participant: Thank you and I accept.

Irina: I love you and bless you.

Participant: I love you and bless you. That's it, gone.

Irina: How do you feel?

Participant: Relief, freedom. Straight, oh, freedom!

Irina: Okay. No, no, that's not all. A little bit more. So. Say: “I apologize to my body for creating this attachment.”

Participant: I apologize to my body for creating this binding.

Irina: And for the creation of this block.

Participant: And for creating this block.

Irina: I forgive myself for being offended by my mother.

Participant: I forgive myself for being offended by my mother.

Irina: Yes. By the power of your Spirit.

Participant: By the power of your Spirit.

Irina: I transform the energies of this binding.

Participant: I transform the energies of this binding.

Irina: Into the energy of divine light.

Participant: Into the energy of divine light. Now there was a bang and she came out.

Irina: And I direct this energy of light,

Participant: And I direct this energy of light.

Irina: To strengthen your immunity.

Participant: To strengthen your immunity.

Irina: For the regeneration of all organs and tissues.

Participant: For the regeneration of all organs and tissues.

Irina: To harmonize the hormonal system.

Participant: To harmonize the hormonal system.

Irina: And to strengthen the etheric protection of my biofield.

Participant: And to strengthen the etheric protection of my biofield.

Irina: How do you feel?

Participant: Like a water stopper, so is the second chakra, and the dome is silver, a transparent dome.

Irina: How do you feel in it?

Participant: Good, good, like the water around.

Irina: And in the body?

Participant: There is freedom in the body. How painful it is still there. It’s as if the cork has been knocked out and now it’s free. It hurt there, but it will pass. When the wound heals.

Irina: Say it again: “By the power of your Spirit.”

Participant: By the power of your Spirit.

Irina: I transform the energies of the block of this resentment.

Participant: I transform the energies of the block of this resentment.

Irina: Into the energy of love.

Participant: Into the energy of love.

Irina: Healings.

Participant: Healings.

Irina: Women's harmony.

Participant: Women's Harmony.

Irina: How do you feel?

Participant: A pillar through me. The cork came out and there was a wide white pillar through.

Irina: Isn’t it filled with light?

Participant: It’s like it’s through, the plug has come out.

Irina: Is it filling up? Filled with light?

Participant: It is through and through, there is light here and there.

Irina: Say: “Thank you and accept.”

Participant: Thank you and I accept. Oh, the back is closed, but the front is filling up.

Irina: I love you and bless you.

Participant: I love you and bless you.

Irina: Okay. Now say: “I love and accept myself as I am.”

Participant: I love and accept myself as I am.

Irina: I am God's beloved child.

Participant: I am God's beloved child. Everything was closed, everything around was filled.

Irina: I love and accept my body as it is.

Participant: I love and accept my body as it is.

Irina: I love and accept my sexual energy.

Participant: I love and accept my sexual energy.

Irina: This is the divine power of creation.

Participant: This is the divine power of creation.

Irina: I fill my body with the light of divine love.

Participant: I fill my body with the light of divine love.

Irina: Every organ.

Participant: Every organ. An orange flower came out and bloomed on his stomach.

Irina: Every cell.

Participant: Every cell.

Irina: Every molecule.

Participant: Every molecule.

Irina: My body is the materialized light of divine love.

Participant: My body is the materialized light of divine love.

Irina: I thank God for this body and for this life.

Participant: I thank God for this body and for this life.

Irina: How do you feel?

Participant: Warmth in the palm, orange lily in the lower abdomen (laughs). I thank you! How does it work for you? Let me work for you? I imagine myself only as a good fairy. I'm a former artist. I really can't find myself here. Yes.

Irina: Okay?

Participant: Okay, okay. Thank you. I'll sleep now. After the session.

Irina: Are you going to fly away now?

Participant: Yes. All the best to you.

Irina: One more question. Say: “Higher Self, am I a contactee?”

Participant: Yes.

Irina: Who do I have contact with?

Participant: I don’t understand what he’s saying.

Irina: Who is this?

Participant: Some kind of energy is coming out - I don’t understand what it is.

Irina: Are these plasmoids?

Participant: Yes. It went right away - yes.

Irina: What is the purpose of the contact?

Participant: Enrichment.

Irina: What energy do they enrich me with?

Participant: Svetlaya.

Irina: I thank them.

Participant: I thank them.

Irina: Higher Self, what is the purpose of my incarnation on Earth?

Participant: Development.

Irina: What should I develop?

Participant: Develop all your abilities.

Irina: Which ones?

Participant: Contactee.

Irina: Wow! Am I fulfilling my task?

Participant: Yes, no, yes, no.

Irina: What’s stopping me?

Participant: You. I'm disturbing myself.

Irina: Why am I interfering?

Participant: Vanity, probably.

Irina: What fuss?

Participant: For myself.

Irina: What fuss am I disturbing?

Participant: You need to sort yourself out and calm down.

Irina: I am completely calm.

Participant: I am completely calm.

Irina: I am one with the divine light.

Participant: I am one with the divine light.

Irina: How do you feel?

Participant: This (state) is as if I'm in honey. I'll go to bed now.

Irina: Will you fly away?

Participant: I'll go to sleep, I have this (condition) now.

Irina: Such weightlessness.

Participant: Yes, yes.

Irina: Do you want to communicate like that yourself?

Participant: I want to, of course.

Irina: Higher Self, can I communicate with you like this?

Participant: Yes.

Irina: How to get in touch with you?

Participant: What?

Irina: Ask: “How to get in touch with you?”

Participant: How to get in touch with you? Some energy is flowing, I don’t understand.

Irina: Just a memory of it?

Participant: Yes.

Irina: How often can I communicate with you?

Participant: Often.

Irina: Okay. Higher Self, I thank you for this contact.

Participant: Higher Self, thank you for this contact.

Irina: Thank you for your light of love.

Participant: Thank you for your light of love.

Irina: Thank you for breaking the connection with my mother.

Participant: Thank you for breaking the connection with my mother.

Irina: Thank you for cleansing my energy structure.

Participant: Thank you for cleansing my energy structure.

Irina: I love you.

Participant: I love you. Such a ball went.

Irina: Sending love to you too.

Participant: Yes, yes, yes...

Irina: Thank you and I accept.

Participant: Thank you and I accept.

Irina: I love you and bless you.

Participant: I love you and bless you.

Irina: Now I will count from 1 to 5. When I say 5, you will return to your normal state of consciousness and completely connect with your body. One two three four five. Open your eyes.

Participant: Oh, I probably said something wrong there, right? (laughs).

Irina: Well, how?

Participant: Super, super! You know how good it feels when someone

took you by the hand and led you across the road. And you yourself are afraid like a hare.

Irina: Well, how? Did they work like that?

Participant: They are there among themselves. And I was sitting.

Irina: They didn’t take you?

Participant: No, we didn’t.

Irina: Do you like it better?

Participant: Yes, of course. I was still shy and afraid, because I was afraid to accept how much life had brought me, I didn’t even believe it.

Irina: You took everything fine.

Participant: Thank you! My God, thank you! Health, happiness, joy. I've been waiting for your channel. I've been waiting for aliens my whole life!

Irina: How are you feeling now?

Participant: It’s like I’m 20 years younger!

Irina: That’s right, all your energies have returned to you.

Participant: It’s so easy, I want to jump! Jump like a girl. Oh how good! I hug you all!

Irina: And I hug you!

Participant: Thank you! How can you learn to be a contactee?

Irina: You can also learn, and you will lead people just like me. Want?

Participant: Of course I want to! Of course I want! I've wanted this all my life! I've wanted this all my life!

Irina: And not just pull out some dried up reptilians! Why do you need them?

Participant: Yes. It's kind of strange. God knows.

Irina: Regarding the operation, you will do it in 3 months. The spiritual cause has been eliminated. I congratulate you, you cleaned everything well and entered quickly.

Participant: Yes, I'll come in quickly. Thank you very much, thank you! I am so glad! I lived for this minute! All of my life!

Irina: Yes? Or maybe it's worth trimming personal moments and posting a video? Would you mind?

Participant: No, I don't mind, no. I'm like a queen, a torch. Let it light the way for everyone else!

Irina: Because look what they did to you. I wanted to scold them very much. Alright enough.

Participant: Bye-bye, I won't delay you.

Irina: Bye.

Broadcast March 26, 2021.

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

A participant who asked for help.

#246 Live broadcast. Answers to questions from channel viewers.

https://blog.cassiopeia.center/pryamoj-ehfir-otvety-na-voprosy-zritelej-kanala
https://www.youtube.com/watch?v=bl_UDOf0kzQ

00:06 About the channel “Mass Schizophrenia”. Announcement of the start of construction of a large Cassiopeia Center near Voronezh.

Maxim: Strange, our chat is empty.

Irina: Hello everyone! Maybe it just doesn't work?

Maxim: Then we will have to reboot if it doesn't work. We have a chat in a new window.

Irina: How interesting!

Maxim: Interesting! Today we have a chat in a new window.

Irina: Mid, look at your name - Miiiiid. "Where is he?"

Maxim: Yes, I can hear everything.

Irina: He sees. He says: “I see you.”

Maxim: Guys, hello everyone!

Irina: Hello everyone! Happy upcoming Cosmonautics Day. Tomorrow will be Cosmonautics Day.

Maxim: The camera doesn’t want to show you well, see?

Irina: Did you obscure Mid?

Maxim: Our camera doesn’t work. What is it!? That's it, she left. Thank you, Mead, for stepping away.

Irina: What a dense astral body you have (laugh).

Maxim: Yes, great. Guys, hello everyone! We won't have a very long broadcast today. Today, as always, we had our graduation ceremony. There were a lot of them. People came from far away. We even had a person come from the United States.

Irina: Yes.

Maxim: Who received the certificate. We didn’t show it to you all today so as not to take up broadcast time. Come on, I’ll sit down and briefly tell you the most necessary information.

Guys, hello everyone! I want to tell you that, probably, the Cassiopeia channel and the Cassiopeia project in general are gaining great popularity, for which I thank you all. But due to the fact that we began to gain momentum, a huge amount of lies, falsehoods, and slander against us began to appear on the Internet. And especially for me, as the project manager. I will ask, please, even if you see negative

comments, do not leave negative comments on these comments. Just try to communicate normally and adequately. Because now the face of our entire organization is being checked.

In the chat they write: “The hairstyle is super!” Got my hair cut. Hair is very annoying. Due to the fact that we have an official organization and people who write lies and slander against me, as the head of the organization, will bear administrative responsibility in accordance with the legislation of our Russian Federation. I want to once again declare to everyone openly and frankly that the Cassiopeia project has never deceived anyone, is not deceiving and will not deceive. On the contrary, it adjusts spirituality, the Higher Self, the structure. Our project has a huge number of highly qualified psychologists who are contactees who work with people on the condition of payment according to their hearts. That is, in terms of the state, we provide qualified psychological assistance without charging any prices for it.

Therefore, I want to wish all slanderers and all liars who are trying to discredit our project that they will bear not only administrative, but also spiritual responsibility for what they do. So, guys, I won’t take up your time anymore. Hi all! I adore you! You help me support this project, making it grow. I direct the donations that you send to the development of the project. And this summer I will begin the construction of a large center near Voronezh, where each of you can come, have a good time, improve your physical health and spiritual health. This will be available to absolutely everyone who helps the project.

Irina: In the chat they write: “Today you are like Mead.”

Maxim: Yes, this is what I wish for “Schizophrenia”. Guys, the “Mass Schizophrenia” channel is very deceiving you. He is a liar, a scoundrel. And I think that, in any case, we will find justice for this person. And I will be obliged to write a statement to law enforcement agencies that this person is deceiving me and slandering me. He cuts and frames Irina’s videos in such a way as to show us in a bad light. In general, there are plenty of liars and scoundrels. I will not fight with them, let our government agencies deal with them. So, guys, I hugged everyone again. Thank you so much for your support! In the summer we will begin construction of a large center. Therefore, I invite everyone to the tent camp, where we will conduct classes, meditative practices, and engage in construction. I will inform everyone about this a little later.

So, Irin, who is present with us today?

05:40 Greetings and introduction of live broadcast participants.

Irina: Hello, dear friends! Present with us today are: MidgasCaus from the planet Esler and LiShioni from the planet Shimor. All this week they were with us, with our students. They listened carefully as I told them about the Higher Self and answered questions. They watched me answer students' questions. They showed me how to teach me how to communicate with plasmoids, and took part in students' astral travels.

Maxim: Wait, galactic news!

Irina: Galactic news.

Maxim: Guys, in any case, there will be cosmohealing. We are now looking for a normal platform, so don't worry, don't worry. We will simply stop all actions that are directed against us, moving to another platform where it is impossible to block us. Galactic news, sorry Irish.

07:07 Intergalactic news. Change of ruler on the planet Daraal.

Irina: MidgasKaus says: "I remember the news related to the planet Daraal. For the last 210 years, one ruler named Xilion has ruled there. The other day a message came from the planet Daraal that he had gone to the world of Spirits. And now in his place will be a Daraalian, whose name is Gliharaon. They announce news when some rulers leave for the Spirit World and another comes. I remind you that Daraal has 150 million inhabitants. They have one single ruler, one country, one language." Here's the news.

Maxim: Mid, thank you very much for the galactic news.

Yes, they started blocking the cosmohealing channel. Moreover, some group of people immediately begin to write complaints that we are scammers, that we are carrying out some incomprehensible practices. Accordingly, YouTube reacts and blocks. So we need to move to

another platform.

08:30 Is it possible to get diagnosed at MidgasCaus? The latest equipment in the Cassiopeia Health Center.

Maxim: How can I get diagnosed by MidgasCaus?

Guys, unfortunately, at the moment MidgasCaus does not conduct diagnostics. But in order to go for diagnostics to MidgasCaus, you first need to go through the Higher Self. Then get in a big line and get it done. Due to the fact that there were a large number of complaints from people that MidgasCaus prescribes our drugs, which Irina cannot prescribe to you, we decided to stop a little with MidgasCaus diagnostics.

At the Wellness Center we have the latest equipment that can test you just as well as MidgasCaus does. Why? Because it is built on new biomagnetic resonance technologies. Therefore, come to our wellness center. Accordingly, in the wellness center we will completely look at your entire body - the physical body and other bodies. Right down to the etheric body, where we will show and give you feedback on your physical and energetic parameters, and where what affects what.

09:47 How to correctly calculate your spiritual level? Project "Tree of Life".

Maxim: Is it possible that there is an error in calculating the level? Doesn't match the original at all.

That is, a person writes when spiritual levels are calculated - it does not coincide with the original.

Irina: To calculate the spiritual level, you need to take the name in the language of the country of birth where the birth certificate was issued. Or another document certifying the birth of this person. You need to take the date of birth as it appears on the birth certificate.

I remind you that since the date of birth is taken, this data is valid at the time of birth. That is, at the time of death in the previous incarnation, where the Spirit went and where it came from to Earth.

Maxim: In fact, the level is calculated at the time of birth.

Irina: Yes.

Maxim: Now you could either increase or decrease your spiritual level. At the time of birth, your spiritual level reflects your goals. Therefore, in the here and now, your spiritual level may change. How to determine it? You can look at the spiritual levels, and approximately, through dialogue with your Higher Self, understand what level you are at now.

Irina: Yes, you can ask your Higher Self.

I saw that such answers were given.

Maxim: “What if the clerk made a mistake”? Guys, we cannot rule out some mistakes. Indeed, maybe someone made a mistake in something, so write to me in a personal message. We will count it again and do it all.

Irina: I was told that in the Spiritual world it is known what date will appear on your document. The past, present and future are known there. And what date is in the documents is known in the Spiritual World. Therefore, they send the Spirit to incarnation precisely from the level that corresponds to this day and this name.

Maxim: Yes, in addition, we also have a very interesting project. Of course, for many it is difficult to understand. But it is very interesting - this is the “Tree of Life”. There are a very large number of interesting parameters indicated for determining and developing your bodies. Starting from the physical and ending with the mental, astral, causal or other bodies.

12:27 How to respond to negativity on the Internet.

Maxim: “Don’t pay attention to the negativity. This has always been and always will be."

It's good when you can ignore the negativity. But some people who are trying to carry this negativity, they are trying to spread this negativity throughout the Internet due to the fact that they are engaged in PR. And if we do not react to this negativity, it will turn out that we ourselves agree with what they say about us. Therefore, we cannot ignore the negativity that exists. But we can give feedback to this negativity in a simple, adequate form.

Very often you are deceived by people who do not know us at all. And if this is a planned action, then responsibility for this action on a spiritual level will be borne by those who planned it. Therefore, we cannot help but react.

13:28 About the Ark of the Covenant given to Moses. The Cassiopeia Wellness Center is open to everyone.

Maxim: What kind of Ark was given to Moses?

Irina: Yes, the Ark was handed over to Moses - according to records in the Interstellar Union databases. Moses was given a device, which was (he is now showing me) a means of communication between him and the base where Moses’ curators from Tumesout were located. This was the connection with the base. For some reason he shows me this wand that looks like a wand, and it has crystals inserted into it. It had to be activated in a certain way. He had a mental activation, and at the same time he had to press on a certain stone (this crystal) with certain thoughts. This activated the energetic power of the crystals included in it. This rod was to be kept in a box made of special wood, lined with gold, as a metal that screens some types of radiation and conducts some very well.

Maxim: Anyone can come to our wellness center. You do not need to become a Cassiopeia volunteer in order to join our wellness center.

After the video, I will place under this video a link to the website of the Wellness Center, where you can find out what is happening there and what we are doing there.

15:19 How does castration of animals affect their energy and karma?

Maxim: Mid, how does castration of animals affect karma and the animal itself?

Irina: Whose karma?

Maxim: On the karma of the animal itself.

Irina: They have no karma. They have no intelligence.

Maxim: How does castration affect the energy of an animal?

Irina: Castration affects the energy of an animal in much the same way as the artificial suppression of the reproductive instinct in humans. The animal becomes calmer emotionally, for example. This is reflected in its energy, but the animal does not lose any energetic properties, does not lose its Soul. His soul remains - the animal Soul. I believe that this is a useful means of not having to destroy the young of these animals that are born afterwards.

16:38 How long do Souls wait for a new incarnation?

Maxim: How long do Souls wait to incarnate, say, on Earth? Is there some order of implementation?

Irina: A very average period for Souls in the Spiritual World is set at approximately 300–350 earthly years. But this is an average period, which was chosen due to observations of many millions of Spirits. But, naturally, it happens much faster and longer than 300–350 years.

Maxim: Much faster - by how much? Let's say, how long can there be a minimum period of incarnation from one body to another?

Irina: There were cases of incarnation literally within a few weeks.

Maxim: From one body to another body, right?

Irina: And they were 10,000 years later.

Maxim: And for all 10,000 years the Spirit was in the Spiritual World, without incarnating anywhere?

Irina: Yes.

Maxim: Wow!

17:40 Are there Interstellar Union bases in Crimea? Life and freedom of contactee Irina Podzorova.

Maxim: How many bases are there in Crimea?

Irina: Interstellar Union?

Maxim: We communicate with the Interstellar Union. We will not infiltrate other Federations.

Irina: The Interstellar Union has a Burkhada base and a Burkhada colony base - the planet Lakhior, which is located in the constellation Libra.

Maxim: “ Freedom for Irina!” And who limited it, this freedom? I have heard versions that I keep her in slavery. Irin, please tell me again, is no one tormenting you? No one is holding you in slavery? Tell it so people can understand. Maybe people think that you are in some kind

of limited position?

Irina: Now I'll tell you how I live. When I was at sea, I talked there with our people who came to the retreat - it was in Sevastopol and Loo. I communicated with them at personal receptions and at conferences, at conversations and in between. Maxim just walked around and made sure that I ate on time, went to the sea and went to bed.

Maxim: Because if you don't keep track of this, then Irina was constantly being dragged somewhere.

Irina: He followed me and led me by the hand.

Maxim: There's something wrong with the camera again. Mid, please step away from the camera.

Irina: Actually, interesting.

Maxim: Look, huh?

Irina: Laughs.

Maxim: How to work when the equipment is buggy all the time?

Irina: That's his telekinesis!

Maxim: Ah, telekinesis!

19:44 Features and problems of searching for a missing person using a photograph, through the Astral. Energy of a living and dead person.

Maxim: Irina, please tell me, can you find the missing person? There are probably some problems in a person's astral search. What

variations are there to find a person, and are there any at all?

Irina: Yes, Mead and I have already tried this. Those people who have disappeared can only be searched for by photos. And you can search by photo only through the Astral. Because, even though you look in the Akashic Chronicles, even though you look where his physical body is, in any case, this is a search outside the physical body. Physically, you don't know where to go, where to look for it. Accordingly, what problems arise here?

The first problem is related to the photograph itself on electronic media. Most often, this is through a phone or computer, that is, you look through the screen of an electronic device.

An electronic device emits its own radiation. And because of this, the energy of the photograph is somewhat distorted. The signal from the photograph is no longer correct and can be read incorrectly by our subconscious.

Maxim: That is, the energy reflects the moment the photo was taken, do I understand correctly?

Irina: Energy reflects at the time the photo was taken, and retains some connection with the person in the future too. But this connection is weakening every month. The more a person's energy changes, the less and less this connection becomes.

Maxim: But from a photo you can determine whether a person is alive or dead?

Irina: As for whether he is alive or dead, one can determine, but here, too, there are some difficulties associated with the human condition. If this person was suddenly killed or had an accident, that is, he was suddenly taken out of incarnation, and he ended up in the astral world, parting with his body forever, and he is still full of vitality and feels as if he were alive. Many do not understand that they have died, even a few earthly days, if you look at it that way. They resist this feeling and think that they are having some kind of terrible dream. Accordingly, since he

is full of vitality, his energy can resemble a living person. This is especially true for children whose energy metabolism is increased, and for young, healthy men.

If a living person is in a state of what you call a “decline in vitality” - despondency, depression, hopelessness, then the person may have little vitality left and from the photograph it can be read that he is dead. First of all, the amount of etheric energy is read from the photograph. This is the first difficulty, but it is not the most important.

The main difficulty is determining the location. Whether he is alive or dead, that is a particular matter. What's the difficulty? The fact is that astral travel occurs in the astral body. But in the astral body there are no receptors - eyes for perceiving objects of the physical world that are in the physical body.

In the astral body, the Spirit sees only the Spiritual world, the astral world, a projection that gradually descends into the physical world. Therefore, the astral world often resembles the physical. But if we start looking for a specific place, we can see, for example, where the body is, or where the person is - the astral projection of this place. But finding out where it is in the physical world will be very, very difficult. Even you, who live on this planet and know where which city is located, where which square of the area is. And for us, alien specialists, for whom this planet is a place of work, and we do not walk around your cities, but are simply at the base - this is even more difficult.

Maxim: Yes, that’s why there are problems in the search. And it is almost impossible to give a 100% guarantee that your missing person will be found. That is, there are many nuances here.

Irina: There is also such a thing that many esotericists look at the same person in different ways. They get different results. But the answers they give still contain part of the truth that happened to him. Moreover, they can calculate what he was thinking about, what he was afraid of for reality and describe it.

Maxim: Yes, guys, that’s why we don’t undertake the search for

missing people.

Irina: I tried it.

Maxim: It's difficult. And we cannot deceive you, because you hope that we will find your relative, but in fact this is a very difficult moment, it needs to be investigated and studied. You need to have a person who in the Astral will visit the entire Earth, the entire planet and knows all the places.

Irina: And it is desirable that the one who is looking for him knows him personally. Because this is especially difficult when you don't know the person personally and have no idea about his worldview, and so on. You may see something in this state, and it will be the contents of his memory, and you will think that it is true.

Maxim: Try contacting a private investigator or law enforcement agencies. I think this is no worse than searching in the Astral.

Questions about the charge of water in Epiphany, is there heaven and hell? All this is in our videos. Moreover, we have our own website "Cassiopeia", where you can, using a search engine, by request, approximately get to these videos, to the texts under these videos. We have a lot of videos translated into text. So come to the site and make inquiries. And by request, look for all the answers. We have already given these answers several times both live and in video broadcasts, so we will not repeat ourselves.

26:51 About the possibility of scientifically proving astrology. False contactors. How to combine esoteric (spiritual) and material (financial) egregors?

Maxim: Is it possible to scientifically prove astrology?

Irina: Try this. In order to scientifically prove astrology, one must adhere to the principle of the science of scientific evidence, which is independent of the consciousness of researchers. What does it mean? This means that you, for example, as a human researcher, read the

astrological characteristics of, for example, the Ascendant in Libra or the Moon in Scorpio, or something else. That is, you read all the astrological characteristics that interest you.

Then you take, for example, 50 or 100 people, study the position of their planets and write a special graph - the position of the planets according to their horoscope, which can be found on the Internet by date of birth. You write about the likelihood and frequency of occurrence of certain character traits that are implied by these signs, depending on the actual dates of birth. Maybe you will make a discovery.

Maxim: Guys, in order for us to classify esotericism as scientific, we must accept that the Spiritual world exists. And this is currently impossible for our science to do.

Irina: There is no evidence.

Maxim: Yes. They cannot even prove the existence of subtle worlds, not to mention the Spiritual world. Why? Because there are no instruments that could measure the vibrations of even subtle bodies, not to mention spiritual vibrations. Therefore, at this point in time, the best devices are contactees who can receive feedback through their Spirit from those structures that contact them.

I ask you to be careful, as there are a huge number of false contacts and scammers on the Internet. And I understand you perfectly well when you start pouring a bunch of dirt on us, that you have already fallen for false contacts, scammers who are trying to intimidate you by hook or by crook, to lure some money from you. Therefore, in our project “Cassiopeia” no one is luring anyone out of anything. All payments are made according to your personal desire, according to your heart. And everyone who was trained in the Cassiopeia project carries exactly the same knowledge, on exactly the same system. This was precisely what was developed in order to get rid of swindlers and swindlers who scam people out of money. Due to their ignorance of spirituality and due to their lack of understanding of the structure, what they are connected to, and how it affects people.

Irina: The curators said that it is possible to combine the esoteric-spiritual egregor with the material-financial egregor without limiting some people who do not have the necessary financial support from this spiritual knowledge.

That is, you can get paid for your work, as everyone wants. But at the same time, do not alienate or refuse to accept those who are not able to pay certain amounts of money, if these are fixed amounts for services. This is the first task, precisely for the harmonization of the financial egregor with the esoteric, for the benefit of both. This is the first.

And the second consequence of such a decision is those people whom humanity calls charlatans, swindlers, false contacts, false psychics. The best way, if not to fight them, then to harmonize these people in society, is if the vast majority of esotericists of all specializations are accepted for payment according to their hearts. Fraudsters, false contacters, and anyone else will not agree to this, because for them it carries a certain financial risk.

Maxim: Yes. A person who is determined to make money has a minimal goal of bringing and transmitting spiritual knowledge to you. It is aimed at making money. And in the Cassiopeia Project and everyone who has been trained in the Cassiopeia Project - we set ourselves on the goal of passing on this knowledge to you. And have no interest in deceiving you to make money.

31:43 Does the Spirit have a limit on the number of incarnations? What are “old souls”?

Maxim: Is there a limit on the number of incarnations of the Spirit?

Irina: No. I have met Spirits who have more than 18,000 incarnations.

Maxim: Is there a Spirit that has billions of incarnations?

Irina: No, I haven’t seen such Spirits yet.

Maxim: Maybe not on Earth, Mid?

Irina: I didn't see Meade either. He says: "I saw a Spirit who had perhaps about a million incarnations. These are very old Souls, and they incarnated very often."

Maxim: Then I have a question. And if there are Souls that have millions of incarnations, then it turns out that they have been formed since the formation of the Universe?

Irina: Yes. The fact is that Souls were born in the Spiritual World. And incarnations in the material world are counted only with the beginning of this real era of manifestation of the Universe. Over the (period of) about 20 billion years that have passed since the manifestation of the Universe, including both the subtle and dense material worlds, one could incarnate in them either frequently and live many short periods of life in different worlds. And also a short period of time, if viewed from the material world, is spent in the Spiritual world. In the Spiritual world, time does not exist, but this is if you count it by material periods.

Maxim: Basically, a million incarnations, there is such a Spirit, just very old, right?

Irina: "Old" is such a name... You can say so in the material sense. In a spiritual sense, we are all the same age. We came out of the One God, and time does not exist there.

Maxim: Yes.

Irina: "Old" means having passed through many incarnations.

33:51 How to find out if a deceased relative is now incarnated?

Maxim: Is it possible to find out if a relative is now incarnating in someone or somewhere?

Irina: You can ask him through the Higher Self, invite his Soul. Simply, if you say that you need to have a serious conversation about something. You can ask him this question when he comes. There are no distances in the Spiritual World. He will feel that you are calling him through your spiritual channel, and he may answer you.

34:19 Representatives of the planet Helenoppa. How to contact curators?

Maxim: Girl, Anastasia Kolbik, writes: “Good evening, dear Irina, Maxim and Mid! Please answer the question: what can you say about the planet Eleopia? I am a contactee, Archimedes from the planet Eleopia comes to contact me.”

Irina: It's called differently. Now he calls me something like Helenoppa, I just know the planet. He shows me that this is a Constellation between the Constellations of Libra and Scorpio, between them. Residents living there are very similar to the inhabitants of the planet Gihor precisely in skin color, they are also green.

They have green skin and are small in stature. But they are not organosilicon, but organocarbon. I studied this planet only from the catalogue. I was not there. She was remembered for the fact that in their bodies there is a large percentage of sulfur-containing amino acids.

Maxim: Nastya, in fact, you simply need to either come to us or study, so that through your Higher Self you can connect with those who come to you. And ask him personally, through his own relay, so that we understand who it is, what it is, where it comes from? It is advisable to do this, because how many times - so many names of planets can be, it’s all conditional. But what you said is comparable to the name of the planet that Mead spoke about.

36:03 What are mind and consciousness, their difference?

Maxim: How does the mind differ from consciousness? If possible, briefly. I just know that there will be a lecture now, so I’ll keep it as

short as possible. Mead, please tell me, what is the difference between mind and consciousness?

Irina: He says: “Maxim knows how I can answer. Because he remembers how long ago two years ago I answered a similar question to him.”

Maxim: Yes, this is an hour and a half lecture. Again we have something with the screen. Mid, please move away. Thank you, darling.

Irina: Come closer to me, sit here (Irina says to Mid). Can not.

Maxim: Irin, move less, otherwise the camera won’t have time to catch you.

Irina: He says: “Mind and consciousness. I will give knowledge on the structure of the Spirit, which is in the Interstellar Union, what we call “mind” and what “consciousness”.

Reason is a part of the intelligent Spirit, which consists of three faculties that are included in it. This is a combination of three structures: memory, thinking and imagination. You all know what it is. Thinking is the processing of information. Imagination is the creation of new images. Memory is the storage of images and perceived information. But consciousness, according to the teachings of the psychology of the Interstellar Union, does not enter into the structure of the mind, but into energy fields, into energy states. The energy structures of the Spirit consist of 3 types of energy: emotions, will and consciousness.

If we talk specifically about consciousness, then this is the energy of the Spirit, which is manifested in this Spirit for the perception of the surrounding world and oneself. This energy is found in the mind, in the spiritual heart, and so on. That definition in psychology, which I read from earthly scientists when I studied your ideas, that consciousness is a reflection of objective reality into subjective ideas - this is, approximately, perception.

38:51 How do chromosomes find their specific homolog in the space of the nucleus?

Maxim: Irin, look at the question! This question is purely for Mead. After I read this question, I want to say: “Take out your astral headphones, and now listen carefully!”

Question: “Hello! During the prophase of the first meiosis, conjugation (bringing together) of homologous chromosomes occurs before their crossing over. How do chromosomes find their specific homolog in the space of the nucleus?”

Irina: He’ll read it again now.

Maxim: Yes, read it yourself. How does a chromosome find its specific homologue in the space of the nucleus?

Irina: They find a specific homologue thanks to the information that is recorded in the chromosomes themselves at the DNA level. In earthly science this is usually called “complementarity,” but it is there with the help of an intranuclear enzymatic system and with the help of one of the types of RNA that helps these homologous chromosomes come closer together (unite). This is a joint structure that operates, the fact that you described the process from the point of view of biochemistry, and it occurs there at the energy level. And, accordingly, this happens almost instantly.

Maxim: Thank you, dear Mead. Of course, again, as always, I am delighted with your answer. But I didn’t even understand the question (laugh).

" Who are Lightworkers?" "Who created God?" “How to communicate with the Higher Self?”

We have a huge number of articles on this subject. These articles are on the website, in the “VKontakte” section. There is a video that talks about how to communicate with your Higher Self.

Guys, we filmed a huge amount of material for you. There are a huge number of these answers in this material. Don't be lazy, take a look, study the channel and the VKontakte group. This group was created for you to increase your level of awareness of perception. And so that everything falls into chains and places.

41:43 What is the chronology of civilization related to? How did Vanga predict the future and with whom did she contact?

Maxim: How did Vanga predict the future if it does not exist? What is the chronology of the civilizations of the planets Burkhad, Esler, Disaru, Tumesout, Selbet?

Irina: The chronology of civilization is most often associated with the most significant event for the planet - this is the period of the planet's revolution around the mother Star. And on those planets that you listed, where humanoid civilizations live, this is also no exception.

About Vanga, I can say that the past, present and future simultaneously exist in the Spiritual world. How do they exist? The past exists in the version in which it happened. The present also exists in the version in which it occurs. The future exists in all varieties of forms and options - this is called the Time Line, we have already told you this. It exists in all variants that can occur according to the law of cause and effect. There are more probable and less probable future event lines.

Vanga was in contact with representatives of alien civilizations (there were several of them), and with representatives of the Spiritual world, including representatives of the Spiritual world (from the Angelic level) who revealed to her that version of the future, which, with minor variations, could be embodied in material reality. She saw it in the form of pictures and conveyed it. Why did they give it to her? In order to show very materialistic-minded people at that period of human history that there is a Spiritual world where there is no time.

Advertising on the Cassiopeia channel on YouTube. Cassiopeia website.

Maxim: Guys, I ask you all, help the development of the channel, the information on the channel - please like it. I will also have a short message for you. We had a situation when YouTube began to reduce the number of subscribers and block comments. We can't get to 100,000 subscribers, so we'll have to turn on advertising on YouTube. This is not to monetize the channel, but so that YouTube itself can promote and advertise our channel.

Because YouTube does not promote channels that do not have advertising. But I have great news for you! On our website you can watch all our videos without advertising. Therefore, by including advertising on the YouTube channel, we give you the opportunity to watch videos on our website without advertising. The link to our website will be in the VKontakte group and here under the video, if it is not already posted in pinned messages. Therefore, here on the channel there will be advertising, specifically for the video that you will watch, but it will not be on our website.

45:30 Is being overweight or underweight a sign of ill health? Health of contactee Irina Podzorova. Testing the body using equipment at the Cassiopeia Center.

Maxim: Irina, why are you overweight? This is a sign of ill health.

Irin, explain to them what health is and what illness is. Because a lot of people don't understand how healthy you are. Guys, let me answer this question for you. I won’t bother Irina with such nonsense that you write.

Irina: This is the medical world, please read or ask any doctor who has studied medicine. What do you ask? What are signs of ill health, overweight or underweight? According to all tests, examinations and equipment readings, I have absolutely normal health. Everything is fine with my organs, with tests, including hormonal ones, etc. There are no deviations, this is just my body structure, and it is individual for everyone. I am sure that you see a lot of such people around you.

Maxim: Whoever wrote this, I can suggest you come to the wellness center. I'll put you and Irina next to each other on the equipment. And

you can see which of you will be healthier based on the signs you wrote about.

Irina: You can go get tested.

Maxim: Yes, you can go get tested. And you will see that Irina is an absolutely healthy person who breathes and glows with energy, she just has such a constitution. I want to tell everyone that Irina even goes to the gym. Which is important for me, as a person who is interested in sports, as a friend and comrade.

Irina: I wanted to say that as a child I was not overweight. And I was even a pretty skinny girl. But I was not healthy then - I was sick, I had infectious diseases, colds, and low immunity. And the lack of excess weight did not add to my health at all. I don't have that now.

Maxim: “Maxim is a jealous person.” No, I'm not jealous.

Irina: He's just talking.

Maxim: I'm just saying. Irina is like a sister to me. And I am ready to explain to every person that everything is fine with her, because we live nearby, we live together.

What kind of equipment? This is the latest equipment that does testing based on cell vibrations. In our Wellness Center we will be able to fully see what is going on in your body, in the cell, in the lymph, in the brain. We can take your DNA apart. By determining what vibrations are in you, we can fully look at what structures you have, what structures are destructive, and what is happening to your health.

Irina: Yes, I was surprised myself when I was tested on this device. We have a doctor with higher medical education who conducts testing. When she did the testing, she didn’t know anything about me at all. She didn't know about me or about the Mead diagnosis he gave me. Not about what the doctors told me about the condition of my body. I didn’t know about what I had before, I didn’t tell her anything. At this point, she had known me maybe a day. And I didn’t tell Maxim these

things either. However, this device showed it all, even more than I expected.

Maxim: Therefore, follow the link to the website of the Wellness Center. There you will see what kind of equipment and devices they have. In our Cassiopeia structure, we will test and study the latest equipment - biomagnetic resonance technologies and other technologies that are now available for research and some are even patented.

49:26 Are narcissistic personality disorder and other psychopathic conditions inherited?

Maxim: Dear Mid! Tell me, is NPD - narcissistic personality disorder inherited? Or other reasons?

Irina: All psychopathy, psychopathic conditions and psychopath-like syndromes are not inherited. Only some features of enzyme metabolism in the brain and metabolism in the nervous system as a whole are inherited, which affect the incarnate Spirit according to the principle of resonance from the physical body through the etheric body and all structures of the Spirit.

But those terms that are designated in your psychology and psychiatry are descriptions of psychospiritual, spiritual states that depend on the level of vibrations. Including in a past life, and in this life, on the number and type of blocks, for example, energy ones.

For example, from contact with various kinds of plasmoid civilizations. This is a certain totality of the psychoenergetic structure of a person, which can have completely different causes, but approximately the same consequences.

Maxim: Great. So, we have a maximum of 10 minutes of broadcast left. Now we will choose a question.

51:07 About changes on Earth after the end of the Quantum Transition.

Maxim: What changes will the end of the Quantum Transition bring to Earth?

Irina: The end of the quantum transition will bring to Earth an increase in the vibrations of space and all atomic, molecular, ionic structures into which Spirits are embodied according to density levels. This will allow the Spirits to feel more connected with their Higher Self (Spiritual Self) and to follow the path of spiritual development. All this together will lead to the fact that the majority of the population will go to the Light, do good, and radiate unconditional love from themselves - this will be easy to do. And for those Spirits who go destructive, everything will interfere with them, all space, and there will be fewer of them. All this will lead to the entry of the Earth into the Interstellar Union.

52:22 Does nutritionology (the science of nutrition) have any prospects? Zaliathar's opinion on the diagnostics carried out by MidgasCaus. Dietary supplements from “Cassiopeia”. Hippocrates on body and soul.

Maxim: What can MidgasCaus say about such a direction as nutrition? Can Mead recommend nutritionology specifically?

Mid, before you say, I also want to say. You know guys, our doctor who sits on magnetic resonance equipment is a nutritionist. And the most interesting thing is that she is a MidgasCaus contactee, just like Irina.

Irina: Yes.

Maxim: That’s why he is also in direct contact with her. Using the equipment, plus the possibility of contact with MidgasCaus, gives a very interesting effect.

Irina: He says: “I talked to her about nutritionology. And she asked me questions, and I asked her clarifying questions. This is just a contactor. She agreed to be my contactee and matched my vibrations. She is a doctor with higher medical education. We communicate with her. Her name is Nadezhda.

We talked to her about this science. And I concluded that this science has prospects, since recommendations for taking nutritional medications, various plant enzymes, and so on - this usually stands at the intersection of pharmaceutical or phytotherapeutic, homeopathic care and information medicine, that is, by vibrations."

Maxim: By the way, in our Wellness Center we use bioenergy information preparations, plus we will now open a line of dietary supplements. MidgasCaus promised that he would give us the right direction on dietary supplements and create the right recipes. Why? Because at this point in time he has already conducted more than 3,000 diagnostics of people.

Mid, how many diagnostics did you perform? With Irina - about 2,500. Do you carry out such diagnostics with other contactees?

Irina: Yes, I do, but to a lesser extent. In general, how many diagnostics did I carry out? I probably looked at about 5,000 people.

Maxim: About 5,000 people?

Irina: Yes.

Maxim: In principle, you agree to help us organize plant-based bioactive supplements. And you can recommend which structures need to be combined.

Irina: Yes. I wanted to say a few more words about the diagnostics that I carried out. And about those drugs that I talked about.

Maxim: Yes.

Irina: The fact is that we talked about this with Zaliatar, to whom I brought Irina in the astral body. He is a spiritual healer. We talked to him. Did he ask me what I was doing? I told him about the diagnostics that Irina and I were conducting. He said yes, it is good and effective.

But if the spiritual cause of the disease is not eliminated, or if it is not eliminated enough, it can only be eliminated on the etheric and astral level, but this attitude will remain on the mental level. Those are those symptoms and conditions, symptom complexes that were eliminated or suppressed by drugs - physical drugs and herbs, that is, I consider herbs and chemical drugs to have some kind of chemical, biochemical and plus energetic effect, because every herb and every medicine has its own vibrations, in addition to what it has a chemical composition.

These symptoms may return to the same extent, or the disease may spread to another organ. If you re-diagnose and treat this disease again, then it can pass, for example, through energy and manifest itself in some way in children under 14 years of age, who are energetically connected with their parents. I agree to continue to carry out diagnostics, but as Maxim said, after communicating with the Higher Self. Excluding emergency cases when there is a threat to life, for example.

Maxim: Guys, if you remember Hippocrates, to whom doctors used to take an oath. I heard that they no longer take the Hippocratic oath.

Hippocrates clearly said that in order to treat the body, you first need to treat the Soul. Now think about what Hippocrates was talking about, to whom all doctors in the Soviet Union swore an oath.

Irina: “Don’t ignore it.”

Maxim: Guys, so that we don’t ignore you with your question about supervision, you should come to us here. Or make an appointment with specialists for contact with the Higher Self.

Through the Higher Self, specialists will identify your curator, set up contact for you, and set up competent interaction. Everything can be done. We cannot do this on the air, since there is no time, opportunity or understanding of what kind of contact you have.

57:56 Is the earth round?

Irina: The rarest question: “Is the earth round?”

Maxim: Rashid, look, you have a choice - to believe one contactee with plasmoid civilizations, who said that the Earth is flat, and who is trying to make fake videos about this. Or believe our official science and the science of our Interstellar Union, which clearly say that in our 3D space the Earth is round. For plasmoids, the Earth is indeed flat.

Mid has already left, and it’s not about Mid (the live broadcast was interrupted). I think it's already a matter of YouTube. Look, 200... another 100... Guys, just before our eyes... But no, look, 1600, 1700. That's it! Oh guys, okay!

Irina: “I offended the plasmoids.” Offended the plasmoids that the Earth is round (laugh).

Maxim: By the way, yes, maybe. No, really, maybe!

Irina: Why is there a chat then? It doesn't stop.

Maxim: Guys, we are finishing the dialogue, the broadcast. We were glad to see and hear you all.

Irina: They write: “No sound.” And someone laughs, they have it.

Maxim: No sound? Yes, how come there is no sound? We are here.

Irina: The video is fine.

Maxim: No sound. All! Bye everyone! We kiss everyone! They failed for 2000 and that’s it.

Irina: Bye everyone!

Maxim: There is sound, I understand. Guys, I wanted to thank you very much. I want to say hello to all the envious people, all the scum who speak badly of us. Guys, I really wish you Light, love, true happiness! I want you to take your worthy lessons. And you received the same lessons that you do for us, so well done to all of you! You are all great! And everyone will be punished. I will also punish legally. We'll ask our interstellar friends, Ivan Yonten. As we were told: “Ask channels to be sent to them that will clean them.” Guys, we will try our best, work in the Light, in love, in truth. I’ll tell you honestly that the Cassiopeia project has no background. We are not foreign agents. We have an officially registered autonomous non-profit organization whose goals and objectives include contacting, clairaudience, clairvoyance, and clairvoyance. We are studying this whole topic. We give feedback. The Charter of our organization will soon be posted on the website. Therefore, to all the people who make money from you, who are trying to ruin our lives - a huge, huge hello!

Irina: Hello!

Maxim: See you all!

Irina: And see you later!

Broadcast April 11, 2021.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the

astral world and its interactions with the material world.

#247 Answers to questions from the Cosmohealing chat. Health sessions of the Intergalactic Service.

https://blog.cassiopeia.center/otvety-na-voprosy-iz-chata-kosmohiling
https://www.youtube.com/watch?v=Oj8hhptvpvE

0:10 Introduction of meeting participants.

Irina: Hello, dear friends. My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today our beloved and bright healer Gulya Malyarova is our guest. Hello, Gulya.

Gulya: Good afternoon everyone. My name is Guzel, last name is Malyarov. I am a contactee, healer, doctor. I am in contact with the Intergalactic Medical Service of the Pleiades (IMS), I am a conductor of their energies.

Irina: Hello, Gulya, hello dear viewers. Today we will talk about such an interesting phenomenon of our society and our society “Cassiopeia”. Many of you are already familiar with it, it’s called Cosmohealing. We will answer questions from viewers of our channel and those who have already taken advantage of healing sessions, who have already attended Cosmohealing healing sessions. People had questions.

Now present next to me are our curators MidgasKaus - a biologist from the planet Esler, LiShioni - a specialist in astral interactions and the study of the astral world, and the direct curator Guzeli, a representative of the Intergalactic Medical Service (IMS) from the Pleiades Laatar star cluster. He is also here today and will answer questions.

01:56 The goals of the Intergalactic Medical Service in helping earthlings. Medicine in the Pleiades.

Gulya: Greetings to all our curators as well. And the first question is this, from visitors to our sessions, in particular Roman made a very large selection of questions. I combined them and want to ask. What goals does MMC pursue in helping to heal earthlings? If these are several goals, please list the main ones.

Irina: Thank you for the question. The representative of the Intergalactic Medical Service of the Pleiades (IMS) Laatar answers.

Our goals in helping earthlings are that we want them to be healed. This is a form of selfless help. This is their profession, their calling, this is how they carry out the task of their incarnation. On the Pleiades planets, everything is in order with medical care, with the prevention and treatment of diseases. But many medical specialists and bioenergy specialists who know medicine, biology, and work on subtle material planes, work on the astral plane, they devote their time and their energy to caring for those worlds that do not yet have such opportunities. Why? Because in these worlds our brothers and sisters from the Spiritual World are embodied, but only in the bodies of earthlings. And we help them with the goal of our spiritual development, growth in unconditional love. This is their main goal.

04:25 Exchange of energies during a Cosmohealing session between earthlings and representatives of the Intergalactic Medical Service. Energy of bodies of humanoids, plasmoids, humans. Aura. High vibrational and low vibrational energies.

Gulya: Is the MSME something like an ambulance in the Interstellar Union or the Galactic Federation of Light?

Maxim: Gulichka, hello, I'm here. I'd like to clarify a little. The tricky question was, what are they pursuing? What are the goals? I would like to personally clarify one point, a very slippery one. When we say that we work with people, we exchange energies. When you work with us, what energy do you receive and where do you direct it?

Irina: This does not mean humanoid, but more plasmoid representatives. Humanoid representatives have the energy of the physical body, it is produced by their body, the physical. From their food, from their oxygen, they cannot absorb the energy of the physical body of earthlings in such a form that it would be directed somewhere by them, especially in a healing session. This refers to representatives of plasmoid civilizations of our Galaxy and not only from the Pleiades, who can tune the frequencies of their subtle body to assimilate the energies of the etheric body of an earthling. What energy is taken in during the healing process and where is it sent, right?

Maxim: Yes.

Irina: He says: " The human body continuously radiates life force in the form of heat, namely the physical body. The etheric body radiates in the form of energy, which goes to metabolism, immunity, the astral body radiates in the form of emotions, the mental body in the form of thoughts, and so on. These are all energies that are directed to the Spiritual world, to the astral world.

The exchange of energies between the healers who come to you and you yourself occurs at the level of your vibrations. We use the energies of our mind, our thought forms and heal a person at the level of his aura." He is now showing me an image of how they invest energy in a person's aura, in the etheric matrix of his organs, it happens in different ways. "The energies that a person releases are all different during sessions; our healers can assimilate their thoughts and emotions only in the case of high vibrations of these energies. For example, if a person is grateful to us, experiences feelings of sincere gratitude, love, happiness, joy, this increases the energy of us, plasmoids.

If they are low vibration, then they cannot be assimilated by us, plasmoids, and leave space. We have techniques, special energies on how to dissipate them, but this also wastes energy. The energies of anger, fear, hatred, they are too heavy for us, low vibrational, and their clots go down. Clots are dark formations that look something like viscous resin. This all goes down from a person and cannot be directed to the exchange of energies between him and us, but we can use special energies of our spiritual heart to dispel them. This also takes time and effort."

Maxim: Thank you, Laatar.

09:08 Diseases that can be healed by the Intergalactic Medical Service. Spiritual causes of diseases.

Gulya: What earthly diseases can MMS help heal? How developed is this method of healing that they use in our Galaxy? At what levels does the treatment take place? Three questions in one.

Irina: What earthly diseases can help heal? First question. Almost all diseases of the physical body and disorders in the energy sphere, provided that the spiritual causes of the diseases are realized, which led to a decrease in the vibrations of the etheric body and the appearance of disorders on the physical level. If this awareness was not there, representatives of MMS can temporarily support a person, fill his etheric, astral and mental structures with the Light of their love, their own energy, their positive attitude towards life. But if a person then does not change his attitude towards the world and his illness, this energy will dissipate and it will not last long.

10:35 How developed is Cosmohealing in our Galaxy?

Gulya: How developed is the method of healing in the Galaxy?

Irina: In our Galaxy, this method of healing, or rather not even healing, is healing for you, but in our country, the prevention of diseases of the physical body, its disorders of various organs, is quite developed. Energy treatment, including at a distance, is considered by many civilizations of the Galaxy to be more promising than the chemical method, since it is considered more advanced, since those initial stages of the disease and disorders that have not yet manifested themselves on the physical level are eliminated. A lot of children, for example, in the civilizations of the Galaxy use this method. Parents and children use this method. It is considered the most developed system of helping the incarnate Spirit.

11:57 At what levels is treatment carried out during Cosmohealing sessions? Chakra tuning. Atman.

Gulya: At what levels does the treatment take place?

Irina: Since we are in astral bodies, it is the plasmoids who are in their subtle-material bodies, and the humanoids are in astral bodies, but charged with etheric energy, that is, their life force, but not in physical bodies, so the work takes place on the etheric level with ethereal ones matrices of internal organs. If necessary, the work takes place at the astral level, that is, the representative of the MMS can fill the astral body of a person with his emotions, if, of course, they are similar in vibrations; whoever came is called a healer and a patient. At the mental level, at the causal level and at the spiritual level, work also takes place in the form of hints.

A person is adjusted to the harmony of all chakras, all energy centers, so that he can more easily configure his spiritual channel for communication with the disembodied part of the Spirit. This is what you call the Atman level. At this level, there is no automatic attunement of a person to the Higher Self, but only assistance in connecting with it. And if the person himself desires it and strives for it.

13:55 Treatment of cancer, genetic and congenital diseases with Cosmohealing. Down's disease, Alzheimer's, autism - spiritual causes of chromosomal diseases?

Maxim: I still have one more question. Do you work with diseases that our medicine cannot cope with: cancer, genetic diseases, congenital diseases. Can people with these diseases receive Cosmohealing sessions?

Irina: People with any diseases can take Cosmohealing sessions. It doesn’t matter whether your earthly medicine can help with this, because the work of the MMS occurs on a different level, not physical. The most important thing here is to understand the spiritual cause of the disease and eliminate it. If this is impossible, then complete healing on the physical plane is impossible, but it is possible to alleviate the patient’s condition in almost all cases. The patient’s attitude, his love for us and his own belief in success also play a role here.

Maxim: Yes, but what about genetic congenital diseases?

Irina: There are many of them, which ones? An example must be given.

Gulya: Down's disease is a genetic disease. Alzheimer's disease is not genetic, however, we do not have a cure for it.

Maxim: Childhood autism.

Gulya: Yes, autism.

Irina: That is, all these chromosomal abnormalities, as I understand it, can cause metabolic disorders, accumulation of certain substances in parts of the body, or abnormal cell structure. Yes? Got it right?

Maxim: Yes.

Irina: If the Spirit, who incarnated into such a body with genetic disorders on that planet where they cannot be eliminated by the means of this planet, when he chose this incarnation, he knew in advance the characteristics of this body. Therefore, about the reasons for such a choice of body, if he himself is not able to find out by his state of the brain, using his brain to reach the Higher Self, because his receptors are broken, he cannot go out, then his parents can do it instead of him, for example . If he cannot do this, then his parents, through whom he was incarnated in this world, can. They can access their own Higher Self and through the Higher Self connect with the disembodied part of the Soul of this child or person. And ask him about the purposes of incarnation in such a body and how his condition can be alleviated, by what methods? But usually, after 10-15 sessions of Cosmohealing, even children and adults with chromosomal disorders experience an improvement in their physical and mental condition. If this is combined with taking correctly selected medications according to vibrations, then the effect of the medications is enhanced, and they better adapt to the physical world and to their body with these features. It can only help, but not heal, because he chose this program.

17:54 Limitations on the number of Cosmohealing sessions.

Maxim: I see, but how many Cosmohealing sessions can you take? Are there any restrictions on accepting sessions?

Irina: No, there are no restrictions. You can go through them as many times as you like according to your well-being, desire and advice from your Higher Self.

Maxim: Thank you. Gulichka, let's continue further.

18:15 Level of medicine of the Intergalactic Medical Service. Organ regeneration using DNA.

Gulya: What level of medicine does MMC have? Is it possible for them to regenerate damaged organs, restore lost limbs, completely remove scars, scars, restore teeth, spine, and so on?

Irina: Mead says that they can grow individual organs and parts from cells. Not an organ transplant like yours, but from the cells of the person himself. Moreover, they can get another organ from the cell of one organ simply using DNA information.

Gulya: Do they make it from stem cells or from any other cells?

Irina: He tells me that even if you take a skin cell, its DNA will still contain information about the entire organism. Only in a skin cell is activated, since it is a skin cell, that part of the DNA that is responsible specifically for these cells, for their functions. That is why, for example, a skin cell is different from a liver cell, from a kidney cell. And their DNA information is the same, only different areas are activated. Our medical technologies can activate different sections of DNA from a single cell.

Gulya: Great!

20:00 Medical capabilities and technologies on the planet Disaru. Inhabitants of the planet Disaru.

Gulya: As a consequence, the question is, do the residents of Disaru take advantage of these opportunities and the same procedures?

Maxim: I'll explain. Disaru is a planet very similar to ours. These are also our earthlings, taken 12,000 years ago after the war to another planet, where they were already slightly developed differently, and where Saint-Germain came from. Many people don't read our information, they just join Cosmohealing, so I made a small introduction to what the planet Disaru is.

Gulya: Yes.

Irina: Yes. These are people who were taken from the planet Venus, who were our ancestors. 200,000 years ago they were taken to Venus, and then during the war 12,000 years ago with the reptilians in the solar system, they were transported to the planet Disara. That is, these are our direct ancestors and not descendants, but genetic brothers, so to speak. They are the same people like us genetically, practically the same people, there are small differences, but they are genetically similar to us more than anyone in the Interstellar Union.

All participants and members of the Interstellar Union enjoy the same rights and technologies that the Interstellar Union provides. As soon as the Earth enters it and officially joins the Interstellar Union, the ships of the Interstellar Union will bring to Earth specialists, including medicine, who have already studied your languages, and will collaborate with your scientists, biologists and doctors on the gradual integration of Intergalactic Medicine into your society.

Gulya: We still have a long way to go.

Maxim: Such a little fantasy. Aliens will arrive and save the Earth.

Gulya: Yes. For now we will use Cosmohealing.

Irina: Otherwise now there will be a vote for the Interstellar Union again.

22:25 Is it possible to connect low-vibration entities during Cosmohealing sessions? Fears, destructive emotions. High vibrations are the best protection during Cosmohealing sessions.

Gulya: Such a question. Is it possible during Cosmohealing sessions to receive connections from other Spirits who may want to control the body? How to recognize them and distinguish this process from working with MMS?

Irina: What other Spirits are these?

Gulya: They write that during the session some dark people can connect to you, come and influence you, and so on. People also express many such concerns.

Maxim: Really, a lot of people are afraid that they will now trust us, and some entities will connect to them, who will suck a lot of energy from them, and will control them, introduce settlers, and so on, so forth. People have such fears that during Cosmohealing sessions they might catch something.

Irina: If there is no trust in the treatment process, there is no trust personally in our guide, contactee and full-fledged employee of MMS Guzeli Malyarova, then we ask you not to undergo these sessions. Trust is important here, openness, love and complete acceptance of what will happen to you are important here. The inclusion of destructive emotions: fear, mistrust, suspicion and doubt prevents us from fully helping you, as it charges your auric field with energy that is incompatible with us.

In addition, fears can attract destructive plasmoids that feed on energy charged not with trust and love, but with fears and suspicions. How are they destructive? They are destructive in that, having received food in the form of your energy, they will provoke you again to release these negative emotions, helping you create your own blocks on the etheric-

astral level, not paying attention to the fact that these blocks contribute to the appearance of diseases in the physical body. They are absolutely not interested in this. Even if they know about it, it doesn't interest them.

If you experience positive emotions of trust, openness, love, you charge your life force with these emotions, which continuously emanates from you even in the process of breathing and generating heat, and charge this life force with highly vibrational, highly spiritual plasmoid civilizations. And with this you help us humanoids, too, and them to complete the process of your healing.

Maxim: I will add that, as a project manager, I myself enjoy these sessions.

Irina: Yes, I went through it too.

Maxim: Therefore, I clearly understand that I communicate, being next to Irina, with different things: with destructive subtle civilizations and with demonic structures. And I can clearly assure you that there is no destructive force here, there are no demons here, there are no settlers here. The task of MMS is to help, help in self-healing, teach you to self-heal.

Irina: LiShioni also says: “I am a specialist in the astral world and a scientist who has studied plasmoid civilizations for a long time, too, since the study of the astral world in our country takes place on Shimora after the study of subtle-material civilizations. And I, as a scientist, a specialist in plasmoid civilizations, can also tell you that such messages that you said that someone will connect to a Cosmohealing session can be initiated, written by people who themselves are in contact with low-vibration plasmoid entities. But they are not aware of this contact; they take their thoughts as their own. These plasmoid entities, seeing that this contactee of theirs has entered a site where many people gather, this plasmoid decides to lower the vibrations of these people, so that in case their contactee is believed, but they still go to this session, but they have doubts, so that then connect to other people.

Gulya: They make a knight move.

Maxim: Yes, yes, what we receive, we manifest. If we hear that messages of this kind appear during a Cosmohealing session or in a Cosmohealing chat, we need to treat this person carefully and help him get out of this state of fear and self-doubt. I know for sure that if you project feelings of love, feelings of joy, feelings of happiness, no one can approach you... Yes, I never defend myself with anything personally, I project these feelings out of myself. And when I project these feelings out of myself, this is the strongest protection for me. Why? Because low vibrational entities cannot approach these vibrations.

Irina: Yes. If in a light egregor or in a light society, in a cloud of light high-vibration energies, a person or several suddenly appears who are trying to introduce some kind of discord, doubts, then these people with a high degree of probability can be agents of influence of low-frequency plasmoids or simply even demons of disembodied Spirits . Although they do not feed directly, like plasmoids, they are simply pleased that you lower your vibrations and thereby move away from God, just like them.

Maxim: Thank you. Gulechka, let's continue.

29:17 How to take Cosmohealing sessions yourself? Contactors of the Intergalactic Medical Service.

Gulya: Yes. Next question. When independent sessions occur without a master, without me, at what stage is this acceptable? Is the process of calling a session on your own intended to teach us how to start a healing program on our own, as if we called an ambulance by calling the hospital directly, and not through a specialist, who obviously physically may not be enough for everyone. Does it mean that by expressing a request and intention for healing, helpers are sent to you forever, or does the body learn to heal itself over time? How long will this method of healing be available to us?

Irina: A lot of questions in one. Let's take turns.

Maxim: Yes. I'll formulate it now. Can a person undergo sessions for himself, calling MMS to himself?

Irina: That is, including the recording?

Gulya: Yes.

Maxim: Either including the recording, or just entering this state yourself.

Gulya: Someone imagines a voice, they tell me, someone imagines, if they were in person, hands, someone then just thinks about it, relaxes and that's it, the session is over. How does this happen? How do curators see him?

Irina: This is a really very important point, if this happens to a person, he just came to the session, or he is also a contactee of one of the visiting MMS specialists. In fact, MMC already has several tens of thousands of specialists, and more and more are joining. They have their own contacts. Anyone who, for example, can start a session by simply calling the curator, relaxing and presenting something, calling him, he is already a contactee. He feels it. It happens that even the curator himself tells him that he needs to accept the session at this moment. Here this person himself must decide through the Higher Self, for example, if he wants to find out with whom to contact, set up a more conscious contact, ask his name, and so on, and work with him further.

If we are talking about a person who is not a contactee, who does not feel his presence, nor thoughts, nor anything else, but simply by appointment. For example, there are many people who cannot take part in a session when it is open to everyone. At this time they are at night, sleeping or at work, and they can only watch the recorded sessions. If it's by recording, then the very inclusion of your session, the music, your face, he sees your face - this is your image. And when you say the words of attunement to a session, if a person believes in it, puts energy into it, lies down, and no matter what time this happens, his consciousness tunes in to this frequency. And the MMS curators, who are in the Earth's noosphere around the clock, they feel this call

and come to him, no matter how many times he repeats it. If he doesn't just turn on to watch it, but with faith that healing is happening and with the desire to receive it, if he gives consent.

33:39 How to alleviate side conditions during a Cosmohealing session? Getting out of the body, positive attitude, relaxation during Cosmohealing.

Gulya: Thank you. A question. When the activation and attunement of the chakras of the subtle fields takes place, the body experiences discomfort, there may be headaches, a feeling of vibrations in the chakras, a buzzing, some people say like a phone in their back pocket, and these are the chakras that are buzzing. How can we alleviate this condition for people?

Irina: To alleviate this condition for people, we advise you to lie down, relax and, if possible, leave the physical body. Allow yourself to get out in any way. It is best to be in a state of astral or mental travel during a session so as not to feel what is happening to the physical or etheric body. Sometimes these processes are indeed accompanied by not entirely pleasant sensations. In order not to feel them, of course, it is better to go out.

Gulya: Or go to sleep, sleep, that will also be a way out.

Irina: If neither one nor the other succeeds, then you need to lie down, relax as much as possible, and not listen to the sensations of the body, because listening can intensify this. You can think about something good, you can remember your bright moments in life, you can focus on those images that will appear on your inner screen when you close your eyes. Try to think about something abstract but pleasant. This will help raise your mental body vibrations and make the work of those medical specialists in the subtle body who are near you easier. And thank them, you can mentally talk to them, ask them questions, send them the light of your love, send them your gratitude - this will relax you, and the more relaxed you are physically and psychologically, the less unpleasant sensations there will be.

36:02 Reasons for physical activity during a Cosmohealing

session. Energy blocks in the body. What is the correct way to end a Cosmohealing session in emergency situations?

Gulya: Thank you. Here's a question: if the body is very actively involved in the work, but the head has not yet matured. When the body begins to do yoga, qigong, pranayama, and so actively that a person lies down and his whole body becomes, I apologize, do and work like in the gym. But the owner of the body changed his mind and no longer wants enlightenment. How to stop this process? One girl wrote to me with such a plea, request and screams: "Help, I'm lying down, my body turns on itself, but I don't want to anymore," although after some time she wrote: "I feel better, but I don't want to." these endless somersaults." How to get out of this as gently as possible, because the head is not ready yet, but the body wants enlightenment. How to align your head and body?

Maxim: They gave you the switch, but forgot to turn it off, right?

Gulya: Yes.

Irina: You know, Laatar is now smiling and saying: "Before I talk about how to get out of this, I need to first explain the mechanism of this process. A person most often asks his body to stop due to fears that he does not understand what is happening. I want to explain to you what is happening at this moment with the physical body. The physical body is built in the image of the etheric matrix, the etheric body, which repeats all the organs and parts of the human body, including its muscles, its internal organs, its brain, all departments and so on.

It happens that energy does not flow freely through the channels of the etheric body, it stagnates due to certain blocks, and not only in the chakras, but simply in the etheric body there are some blocks that can be created by you yourself, by your interactions with subtle civilizations in past. Some kind of bindings, your own thought forms that you have long forgotten, and various programs of your mental body. All this can remain in your etheric body. When curators and MMS specialists begin to cleanse your etheric body with their energy, their vitality, for cleansing they direct energy through the channels of the etheric body, of which there are a lot.

Sometimes this process takes place calmly, and sometimes with a certain type of nervous activity, a person's temperament and the type of his etheric body, this process is accompanied by muscle contraction. This is an absolutely normal phenomenon, a reaction to the impact on its energy. Your body may begin to make various movements of the limbs, breathing movements, head, turn, and so on.

In order for this healing process to be successful, it is necessary not to interfere with the movements of the physical body, but at the same time position yourself so that nothing interferes with its movements. Naturally, if such phenomena occur to you, then at the time of treatment it is better to be in the room alone or with that person who understands what is happening, so that you do not have any impulse to restrain yourself."

Gulya: To be shy.

Irina: Yes. If you think that someone is looking at you, if you restrain these movements by willpower, then you will simply slow down the movement of energy through your body. These movements cannot cause you any harm, they will stop as soon as the session ends, and you will feel more alert and cleared of blockages in your body.

It must be remembered that on the physical body energy blocks can manifest themselves as spasms of your muscles, increased tone, and so on. From these movements that your body makes during the session, your body relaxes, and the processes of blood circulation and immunity begin to activate in the physical body. If you feel that your body wants to move and remember what I just said, then you will not have fear. You will be in a completely relaxed state and, as if from the outside, observe these movements, then they will end as soon as this block goes away.

But if you no longer want, for any reason you no longer want to participate in the session, not only for reasons of movement. For example, you want to terminate this session because you feel unwell due to side effects. For example, you have a blockage and you feel unwell on a physical level, you feel dizziness, nausea, headaches, this sometimes happens at the time of cleansing. Either someone has come to you, or some business has arisen and you need to interrupt

the session for any reason, then you can do this completely calmly.

Just close your eyes, mentally or out loud, thank the representatives of the medical service who were with you, thank all the bright forces of the Universe for their help in my healing and my help on the path to the Light of God. And I thank the representative of MMS on Earth Guzel Malyarova, I send her the Light of my love, mentally sent the light of love to the image, this will facilitate your contact with her and with her phantom, which is also next to you. After this, you can thank and say: “I’m ending the session,” and calmly get up, just turn off the video. And when you turn off the video, music and whatever is happening, and according to your intention to end the session, MMS representatives will understand that you have other things to do and will stop working with you.

44:01 Cosmohealing sessions for infants, young children and incapacitated relatives.

Gulya: Thank you. Next, the next question is for Laatar. How to properly conduct sessions with infants and older children who cannot just lie down, relax and imagine and think about something. And also how to conduct sessions with incapacitated relatives?

Irina: Very often we observe that when we come to children under three years old, they see us, talk to us and even greet us. They, on the contrary, stop showing concern, look with interest, as it seems to their parents, into space, but in fact they look at us, and we also work with them. But sometimes it happens that children can be frightened by unusual sensations, the sight of our representatives, and even if they do not work with them directly, but work with their parents, they will feel this by a change in energy, and then they may show anxiety. Here you need to look at the circumstances. If it is possible to calm the child, pick him up, rock him, and hold him close. Or just sit with him, don’t lie down, sit with him, but don’t turn off the session, don’t turn off the music. Even a sitting session, for this reason, will still be performed.

If a relative is incapacitated, he can be in any position at the time of the session; there is no need to force him to lie down. You can ask him to do this, but if he doesn’t want to, then he can be in any position, but there is no need to force him to lie down. You can explain to his level

of understanding that he needs to lie down. If he knows how to talk, you can explain that Angels or bright Spirits will come now and help him so that he can tune in.

Gulya: I say: “God will heal.”

Irina: Yes. If he is able to understand speech. If you can't, just leave it in the position it is in and start the session. The angels and MMC representatives know why he is in this position and will still heal him in this position that he is in.

47:11 Cosmohealing sessions in the early stages of pregnancy. Appeal to the Higher Self to choose a treatment method.

Gulya: Thank you very much. Some questions have already been answered. Another question. In our medicine, pregnant women up to three months are considered not to be particularly stressed. Cosmohealing sessions - are they possible from the beginning of pregnancy? The fact that they help you get pregnant before pregnancy is definitely a fact, but what next? I want to hear from the first sources.

Irina: In general, there are no contraindications in terms of energy, because MMC representatives feel the energy of a pregnant woman, and they will never harm this, neither the child nor the mother. The only thing that her body can perceive the impact of energy as is stress. If she is already in it, in a state of toxicosis and so on, this can harm her health. But this is not for all pregnant women; some tolerate it normally, and, on the contrary, this condition improves after the session. Here it is important for this woman to talk, for example, with her Higher Self and ask about participating in the session.

Gulya: The result will come from the opportunity, from the trust in this session.

Irina: Yes. Everyone's body is different. One will react positively in this state, the other will not. Here you need to ask your Higher Self. In general, I would advise, not only pregnant women, but every person, and not only about Cosmohealing, but about any treatment method

that doctors, healers, traditional medicine or alternative medicine advise you, to ask your The Higher Self, how vibrationally this process suits you.

49:40 Teaching the art of Cosmohealing and transferring knowledge to students from the master Guzeli Malyarova.

Gulya: Such a question. They also wrote in the chat. Nobody is eternal, people are not eternal either, if Guzel is not there, then who, what, how?

Irina: Laatar smiles and says: “In fact, Gulya, when she asks this question, she knows the answer to it perfectly, because even now, at this moment in time, she is actively preparing students. These students, even those brought to her by my colleagues, who are contactees with MMS, with Archangel Raphael, with Archangel Michael.” He is now showing me several girls.

Gulya: Yes, I have very good results from the work of my students. I'm just inspired by them.

Irina: Man is not eternal, only our physical body, both ours and that of earthlings, is temporary. But the Spirit is eternal and after the decomposition of the material body into elements that it took from nature, the Spirit still continues to fulfill its task, including on Earth. And Guzel, I believe that Guzel already knows about this, because we talked with her mentors in the Spiritual World. Should I say this? We spoke with her Angels, mentors, consultants in the Spiritual world, and they told me that they told her this, through her Higher Self, that even after she leaves for the Spiritual world, she will come from the Spiritual world along with the MMS and participate in these sessions.

52:06 Practical benefits of interaction between healers and patients during Cosmohealing sessions.

Gulya: And this is the final question. What to strive for, what perfection? What kind of excellence is expected from the sessions? Of course, the sky's the limit, but what to expect?

Irina: Now Laatar says: “Dear friends. The task of MMS is not only to help in the treatment of physical illnesses and in alleviating mental illnesses: depression, various kinds of psychoses, neuroses, and so on. Or mental disorders, mental pathologies, and also help in connecting with your Higher Self. Curators can help you on the path to the Light, can give you information, can give you answers to questions about your life situations. To be your teachers and at the same time your students, too, because we actually learn a lot from you too.”

Gulya: Great!

Irina: You earthlings have a lot to learn, especially the love and patience that you show in these difficult earthly conditions and the conditions of your society.

53:43 Final part and thanks to the meeting participants.

Gulya: Thank you. On such a wonderful note, the pressing questions are over. I think that they will appear further, and we will continue these meetings, so we are very grateful. Maxim, do you want to say something?

Maxim: Gulechka, I want to thank you and say thank you very much for your sessions, because many of my people, friends go through these sessions, they thank you and say thank you very much from the bottom of their hearts. I go through them myself. Gulechka, thank you very much for being a guide. At your sessions, I feel very comfortable and saturated with energies with the curators, from the Interstellar Union, from MMS.

Irina: Yes, I also sometimes go through these sessions when I have time. I also feel that they come to me, and we visit the Pleiades with them. I lie down and they show me right away. Alexey also has sessions with us.

Maxim: Yes, yes, and Leshka is passing, the master of our project. Therefore, Gulechka, thank you so much!

Irina: Thank you, yes. See you again!

Gulya: We thank everyone, and Laatara, MMS, we thank LiShioni, Irina, MidgasKaus. We thank everyone for such a meaningful, I hope, conversation, and it will be useful for all the people who will receive sessions and improve their health.

Irina: I thank you, dear friends, I thank all our curators. See you again!

Maxim : We'll be happy!

Gulya : Bye!

Broadcast April 12, 2021.

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Guzel Malyarova – healer-contactor with the Intergalactic Medical Service;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

MidgasKaus - representative of the planet Esler, biologist, psychologist and specialist in alien civilizations;

Laatar is a representative of the Pleiades star cluster, a specialist of the Intergalactic Medical Service (hereinafter referred to as IMS).

#248 Ether, Schumann Resonance, radioactivity. Types of radiation. Vibration characteristics of frequencies

https://blog.cassiopeia.center/ehfir-rezonans-shumana-radioaktivnost
https://www.youtube.com/watch?v=QgwrKoUU3T4

00:21 Diversity of ethers of the Universe. Ether. Akashic Chronicles, torsion fields, prana, astral veil.

Irina: We have a homogeneous concept of “ether”, but in general there are several types of ether. There is ether, which is an intermediate energy between the material world and the Spiritual world. Even between the plasmoid worlds and the Astral there is also an ether, which is a buffer zone, a layer. Moreover, it is also heterogeneous. There is Akasha, there are torsion fields, prana, there is the veil of the astral plane - these are all types of ether.

The energies that are contained in thin-material plasmoid worlds are also, one might say, forms of ether, but they are no longer the same ether. For us, this will all be ether, because we are not yet detecting it with instruments; the latter we only detect gamma radiation. That’s it, we won’t record anything further.

01:23 Spectrum of electromagnetic frequencies.

Irina: Let’s analyze the spectrum of electromagnetic frequencies. The first thing we detect is heat. Then we begin to record radio waves, the entire spectrum: long, medium, short waves, VHF spectrum. Then comes the 5G spectrum. Next is infrared radiation - microwave ovens, they are at the junction. Then there are light waves - red, orange,

yellow, green, blue, indigo and violet. All.

We teach this frequency spectrum at school. Further, after violet, the visible spectrum of waves visible to the human eye in the present form, in third density, is limited to several hundred gigahertz, from red to violet. And then, after violet, there are long and short ultraviolet, x-rays and gamma radiation. All. With gamma radiation, the types of radiation that we detect have ended. You can see in the table how much it will be in hertz, or rather in millions of hertz. But further there are other vibrations that make up certain levels of density in which other worlds live.

03:05 What does the Schumann frequency reflect? Radiation, isotopes.

Presenter: The Schumann frequency reflects what?

Irina: The Schumann frequency reflects the general vibrational qualities of the planet: the biosphere, hydrosphere, atmosphere, lithosphere - all its layers.

Presenter: Our planet, right?

Irina: Yes, our planet. It is the total vibrational characteristic of the frequencies of all layers and environments of our planet. Radiation, like all levels of energy, is contained in all atoms, but it is not released in all of them. If you know the word isotopes, then you will understand that any substance can be radioactive in isotopes. The fact is that isotopes and basic substances of this element are taken into account in the Interstellar Union as a single element; they are not divided into isotopes. And radiation is the release of second-level energy, which occurs either spontaneously or because it is knocked out by other energy.

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Presenter.

#252 TRUE “SCHISOTERIC” and CONSEQUENCES OF 16 CONNECTIONS. We put THIS out only by keeping our promises.

https://blog.cassiopeia.center/istinnaya-shizoterika-i-posledstviya-16-ti-podklyu
https://www.youtube.com/watch?v=49lZds1UE1M

00:05 Introduction of participants.

Natalya : Let's communicate, because I don't care what kind of live broadcast it is. In principle, I have a serious conversation with you. I don’t know what channel it will be on. Let's see, we'll come to an agreement. How well will everything go for us?

I will tell about myself. I understand very well many things that are happening in the world. I perfectly understand the mystical side of this world. It's quite complicated. I know perfectly well, I understand that Irina has contact, I don’t need to prove anything. I just saw a flying saucer the day before yesterday. For me, it’s like a car passing by. Although I don't have contact with them. Regarding mysticism, I’ll tell you a little about myself so that you also have an idea. Maybe, you know, we saw it. In certain circles they know me, I shake this space well.

This world has two sides of the coin: one is the physical world, which we see with our own eyes, and the second is the Spiritual world, the mystical world. And for a large number of people, when they fall into mysticism (not just “I looked at the images, I read Castaneda, and let’s

practice”), there is a mysticism of a physical order.

I also had a kind of abduction. But I didn’t communicate with such creatures. When I returned, I was covered in bruises. And the communication was with energy. It was a physical departure. I had such crashes when I left my body. I won’t tell you everything, there’s no point. I am going through such a path, so that it is clear, which is called in this world “Twin Flames”. But this name is absolutely wrong.

I have 16 housemates. I have 16 connections with different people. The mysticism that I experience, and I experience it, so to speak, if from childhood it was in minimal quantities, then with age, from the moment I performed any matrix functions, my matrix overlapped, and I actually live in several realities . I understand how complex these processes are, and I’m not alone. There are people who experience such processes (they have a rather destructive effect on a person when he does not understand the world).

I’ll tell you right away that when this started happening to me, my reality changed, and I began to understand the world, went to all sorts of psychics, healers, started reading spiritual literature, but it turned out that they couldn’t tell me anything. The processes that happened to me only aggravated them in me. And I had a period when I closed myself off from the whole world for six months, fell into a comatose state, and in order to survive and not go crazy, I just sat and studied the world. I studied all the sensations, departures, visions, with whom I communicate. It has reached a fairly serious level where it borders on insanity. I'm not crazy, but I brought myself to this level. Then I began to study the experiences of other people. And now I give people information, primarily those who are experiencing mystical events, and for whom the school of this world is not able to help, but only aggravates their problems. It's clear?

Irina: Yes, of course. Now I’ll tell you a little about myself for our and your viewers. You probably know.

Hello, my name is Irina Podzorova, I will be a contactor with extraterrestrial civilizations. We met Natalya on one of the Youtube channels, where our videos are actively discussed. We corresponded a little and exchanged opinions. I want to say right away that different

opinions and disagreement with each other are absolutely normal.

Natalya, you know that we have a lot of people. They have different beliefs, they do not coincide with each other. This is an absolutely normal phenomenon, because there is a great variety of forms in the world. Look at your hand, even on the same hand all the fingers are different. Not to mention people. Our general disagreement on ideological issues cannot at all prevent us from showing love for each other, being friends of high vibrations, and collaborating to some extent, of course, with mutual consent and desire.

Natalya: Look, Irina, regarding various beliefs, I will say right away - there is truth. In reality, there are points that are true and cannot be disputed in any way. And these moments are very important. There are a variety of forms. The forms may be different, but there is truth. For example, I will tell these truths now. Look, I have 16 connections. People call them “Twin Flames”. I lived through seven circles of hell. You can't imagine what it's like to get into the insides of another person. I had a connection with one person, and then, like in the series “Sense8,” I had 16 of them! This is all for a reason, I understand this too, because waking up in this world and seeing the truth is quite difficult.

I have been in contact with different people. These are men. And I will say this: we all love equally. We all have the same energy when we are on a high vibration: as I love, you love the same way. As Maxim loves, so does another man. We all love the same, we all sound the same. We all have the same energy field. This is Love. When we are happy and joyful, we all sound the same. When an animal loves, it emits exactly the same energy of Love. This is one condition for everyone. When we experience pain, we all hurt equally. If, for example, I am spiritually hit, I will experience pain, this pain will be akin to an atomic bomb. If they offend an animal, take it to slaughter, or do something else, the animal will release exactly the same nuclear bomb into space. Understand?

Irina: Natasha, apparently we’ve already switched to “you”? Fine. I understood you perfectly. Now I wasn’t even talking about the truth, which exists alone, but talking about different opinions and beliefs that objectively exist among different people. If you have studied this issue, then there are maybe five or six major religions alone. If we start to

look at them, we will see that they are divided into many small denominations, moreover, in each of them there are two completely different people, even who sit next to each other and communicate, if we consider their opinions and beliefs in detail, they will still be somewhat to differ from each other.

Natalya: It seems that there is a wide variety of forms. We live in the same program, it is quite narrow. For example, my field is pumped up, and I feel the field of this world, and I feel the fields of other worlds. I feel it like a small program, a small box. This program contains a small set of programs, attitudes and beliefs. If you do it, they can all be sorted into specific groups. And all the religions of this world are actually broadcasting from the moment of the invasion (because this world was invaded), and the unified field in which we all once existed was torn. This is a single field of Love. We were torn into different parts, and we became easier to control. The basis of all religions (we don't take the Bible, the Gospel and the coming of Jesus Christ - we will also need to talk about this separately), if we take religions - Buddhism, all the others that existed before, in general, everything that existed before is one religion. It has one foundation: consciousness, the mind realized itself and began to cognize and create forms, right?

Irina: This is what I'm talking about now, forms. But the truth you are talking about is really one. What is truth? This is the source of everything. Before we talk about religions and about invasions, and about programs that we were captured by someone, we must generally decide on an understanding of fundamental things. For example, what is the universe, more specifically, of course, the Earth, and the universe in general for me, and what is it for you? Who created it and why? Then I'll tell you.

Natalya: Let's do it this way. An uncle once told me a good thing. He told me: "Why are you crawling around the bottom, look at the world from the position of God." Let's define who God is. God is a spiritually healthy being. As such, in essence, God does not exist. God is a story, a picture for us. That there is someone superior who created the Universe, which, in principle, is broadcast in many religions. God. Let's find him. Who is God? Finding God is very, very easy. I have experience. I'm just saying, Irina, that I was driven around the world by my nose, dragged through the mud, so that I could understand a lot of things.

Finding God is very simple: you love, you rejoice, you are happy, you want to live, you want to create. When you are depressed, when you are angry, when you hate, what do you do? You yourself know that a person is destroyed. He has a desire to commit suicide, because the spiritual pain that he experiences at these moments is akin to hell. And the bombs that he emits into space destroy the entire world around him. This is human energy. A person can heal with his Love and can kill with his pain that comes from him. Not even with a word, but with the pain, with the energy that comes from him.

12:45 Creation of the world.

Irina: Let's do it this way. Who created this world?

Natalya: There is life, right? Found God - Love. There is Love, there is happiness, there is joy - there is life. Love created worlds. She creates forms. This philosophy, which can be traced in religion and Christianity. Love creates worlds, Love creates forms.

Look: I created a form. I love her, I'm interested in her. But at some point I lose interest in this dress. What does the dress do? It disappears in space. No dress. When I create a dress, in addition to the form, a third element is included - information. I'm telling you this now, post it if you want, don't post it, I'm telling you this so that you can comprehend it and maybe change your design. When I create a form, the third element is included - mind, consciousness, information. That is, I created Love, an information form. I love it, the form is beautiful, the form fulfills my intentions. But when I lose interest in it and go on building, this form disintegrates into nothing. Protomatter.

Irina: What, is a form beautiful only when it fulfills your intentions?

Natalya: When there is Love in it. Here's a look at what's happening. When I create a form, I put my energy into it.

Maxim: Natasha, what is Love?

Natalya: Wait, Maxim, let me finish. You just need to comprehend this.

The form becomes God. Because this is a spiritual construction, it has God inside, and the construction of a spiritual being itself is a material information form. But changing a dress is wonderful, energy flows into space, it changes shapes, and that's wonderful. Because we all love the same and we all observe the same. Listen further.

There comes a moment when the form becomes aware of itself. "Consciousness has become aware of itself," they say in this world. When these moments happen, then that form becomes God. Or, as they say in the Bible, becomes a "fallen angel." And so it happens, according to the law of the Universe, that the energy of the Father leaves it.

Maxim: What does it mean "becomes God, becomes a fallen Angel"?

Irina: She becomes God for herself and breaks away from God.

Natalya: Autogenerates. Consciousness realizes itself, and this form without God, without the Divine energy of life inside, like a dress, the dress simply realized itself! My body - Soul is gone, and my zombie has become aware of itself!

Irina: And?

Natalya: She needs life to live. Because if she doesn't live, that is, receive God's energy...

Maxim: How can we wear a dress without a uniform?

Natalya: It will cease to exist. This is where vampirism comes from.

Irina: Natasha, we're just going to get confused now. Now you have imagined yourself a little in God's place. Okay, I'll introduce myself too. Here I am creating a certain form. Then I lose interest in her, or she becomes self-aware. So what am I doing? Since I am Love, if I am God, what do I do for that form that has realized itself separately from me? I create conditions for her, those worlds in which she can live.

What I do: I create for her a world in which she can live and develop in herself that Love that was originally invested, that is, in truth, in goodness, beauty, in happiness, in the end. I will do this out of Love.

Natalya: Look here. The parable of the prodigal son, which is written in the Gospel. You know this parable. Nothing happens to the form. The soul is mortal, as they say. Form is mortal. Either the form allows God into itself...

Maxim : Is the soul mortal?

Natalya : The soul is mortal. The soul-form is mortal. The soul is mortal, it simply disintegrates. One observer remains if Love leaves her.

Maxim: Why then was it necessary to create a form with consciousness so that this part of consciousness would disintegrate?

Irina: She realized herself.

Maxim: She realized herself, why should she fall apart?

Natalya: She begins to vampirize to gain life. It does not fulfill the intention of the creator. She fulfills her own intention. It is not in tune with the energy of Love. Imagine a world where everyone is Love.

Maxim: And from whom does she vampirize?

17:43 Divine and “uterine” love.

Natalya: To understand the world in general, you need to imagine a structure. Peace in Love and world without Love. In our world, Love does not exist. There are forms in our world.

Maxim: Wait, if there were no Love, then you would not exist.

Irina: You wouldn't have been born if it weren't for the love of mom and dad, first of all.

Natalya: No, my parents didn't have Love, here all people are born without Love.

Irina: How were you born then?

Natalya: Because if there was Love, you would understand many things. Love is always waiting.

Irina: How were you born without Love between mom and dad, how were you conceived?

Natalya: How do people usually conceive in this world? What is it, between a man and a woman?

Irina: Do they conceive without Love?

Natalya: Sex between a man and a woman in this world has nothing to do with Love.

Irina : Isn't sex a manifestation of Love through the body?

Natalya: No, sex is not a manifestation of Love through the body.

Irina : What kind of plasmoid information? I already see that you are a contactee, density level 15-17, I already see approximately. Okay, okay.

Natalya: I don't know how to determine density. Irin, look. To understand that there is no sex in love...

Maxim: Natalya, wait, can I ask a question? Let us return to the fact that the Soul is "mortal".

Natalya: You need to know what Love is. When there is Love, when you experience energy within yourself, the need for sex, as such, on a “pure” level disappears. Because Love itself is a very orgasmic feeling.

Maxim: Natasha, have you ever loved yourself?

Natalya: Look, guys. Regarding “did I love myself?” Yes, I am a person who falls in love and who has experienced a lot of “uterine” love. What is meant by “uterine” love? Desire, passion, some kind of sexual attraction. These are normal conditions common to all people.

Maxim: So you just said that sex is without Love! How can you say that this attraction is a form of Love?

Natalya: I’m talking now about “uterine” love.

Maxim: Huh?

Natalya: I experienced states of reaching the divine level, as they say. To the level of a spiritually healthy world.

Maxim: No, wait, look, you just said that...

Natalya: This is bliss, Love, and it has nothing to do with “uterine” love between a man and a woman.

Irina: Where did you even get the idea that this has nothing to do with it? Where does this information come from?

Natalya: Where from? Because I lived this, Irina, from my own experience.

Irina: And millions of other people lived this experience differently, so what?

Maxim: Wait, so maybe this is your personal information that has nothing to do with the world?

Natalya: This is both my information and information from those people who reached this level.

Irina : Millions of people loved their husbands and wives with divine, selfless, unconditional

Love and had sex or didn't, it didn't matter at all. There are millions of them, I'll just give you examples now. And how do you know that your mom and dad weren't like that?

Natalya: In this world people don't know Love. If there was Love in this world, then there would be no wars, there would be no sick people in this world, and in this world a man and a woman would not get divorced, would not fight, but would respect each other.

Maxim: Wait, did someone say that there should be only Love in this world?

Natalya: It's very difficult for people to get rid of. But it is so. Sex is a "uterine" level. In a spiritually healthy world, sexual manifestations exist. Souls merge together. There is a merging of Souls, but this is a completely different state, these are completely different energies that are not characteristic of humanity in this world, and it is difficult to experience them.

21:10 Illusions. The matrix illusory nature of the world.

Irina: And if now a blind person stands in front of you and says: "The sun does not exist." What will you tell him?

Natalya: So the Sun does not exist. This world is an illusion.

Irina: Whose illusion?

Natalya: The Sun does not exist, we do not exist.

Maxim: Then it turns out that you too are an illusion.

Natalya: This is an illusory world, this is a world of temporary form.

Maxim: Natalya, you are an illusion.

Natalya: People are not tied to this body for life. This is our temporary manifestation here.

Maxim: Natalya, then it turns out you are an illusion. I understand correctly?

Natalia: My form in this world is an illusion, yes.

Irina: Are you a form?

Maxim : Are you the form or the content?

Natalia: My form is an illusion.

Irina: Are you form or content? Are you body or spirit, first?

Natalya: I am Spirit.

Irina: Is it form or content?

Natalya: Form, content, Spirit... No, this is not a little form, this is not a little content. It's impossible to put it into such language, not to say it. Spirit is a state of Love.

Maxim: Wait, one second. You were just talking about a dress that recognizes itself as a dress.

Natalya: Yes, this is a form. So you don't understand, look: this is a dress. And inside this dress is the Spirit. We are not born here. My Spirit fell here. I fell, the Spirit is not born. They fall here. In order for my Spirit to fall here, it passes through several matrix layers, lowers its vibrations and enters this body. Creates and materializes this body.

Maxim: Why do you call it a fall? This is the transition from the Spiritual world to the material world.

Natalya: No, this is not a transition. They fall into this world.

Irina: Vibration.

Maxim: Who said that they fall into this world, and where do they fall from? Explain, I don't understand this.

Natalya: Spiritual beings fall into this world. Guys, your idea of the world is not entirely correct. You are looking at it from the perspective of the matrix world. You broadcast this information.

Maxim: Natalya, well, listen to me, please. You see, you have already entered, you have now come up with our idea of the world for yourself and are already giving some kind of assessment that it is wrong.

Natalya: What is Love? Okay, what is Love?

Maxim: You didn't ask what we think?

Irina: Can I now say a little, in very simple words, that there is an eternal dispute on Earth, which is more primary - Spirit or matter? He's completely forgotten. Now look: the words "Spirit" and "matter" are just words. Or, as you say, "forms." Now look.

Natalya: Irina, there are simple philosophical concepts - "nothing". There is "nothing happened." This is initially a philosophical concept, right? This is the foundation of philosophy. There is "nothing", it is also called "protomatter". "Nothing", it is mentioned in the Bible, it is mentioned in the Gospel. There is "nothing". There is nothing.

Maxim: Natalya, look: we are listening to you.

Natalya: There is life that creates forms out of nothing. This is a philosophical concept.

Maxim: Natalya, we listen to you and pause when you express your opinion to us. We cannot just listen to you when you interrupt us to explain your point of view on the issue we have raised.

24:35 State of Love. Creation in Love. Contacting.

Irina: Moreover, I never heard who created the material world. Simple question.

Natalya: Love.

Irina: Great, but from what did Love create the material world?

Natalya: There are all kinds of practices, there are exits from the body. Love creates worlds, creates forms based on its energy and those thoughts that Love itself gives birth to.

Irina: Why did Love create the material world?

Natalya: Worlds are created for happiness, love and joy. Well, imagine for yourself - do you love what you will create? No, so you throw arrows at me. To understand, you feel the very moment of birth in Love. So you love - what will you create when you love?

Maxim: Wait, but that was not the question at all. We are talking about the fact that God is

Love, Love creates worlds.

Natalya: Transferring the state of Love is easy! And imagine how I create something in Love. Will you really create this world in Love? Will you really, from a state of Love, create war, create lessons, create hunger, misfortune and disease?

Maxim: So, you are saying that Love does not have freedom of choice?

Natalya: Love has no freedom of choice. Because there is Love. To understand, you need to experience the state of Love. You like. Is it really possible that when you love, you will create a bombing? Or will you create a disease?

Maxim: It doesn't matter what you create in Love.

Natalya: It matters! These are important concepts. You must experience states of Love in order to understand the truth.

Irina: Do you have children?

Natalya: Yes.

Irina: And they never fought, or what?

Natalya: This is the matrix level. Understand? This is the world that was attacked by a parasitic system, and which was created to take away our energy.

Irina: They never fought, they always obeyed you, right?

Natalya: They fought, and they listened to me. Because I lived a matrix life. I didn't know what the state of Love was. I had "uterine" desires, and I had "uterine" affairs.

Irina: Why did they fight if you told them not to? What are they then? Where did they get such freedom of choice?

Natalya: There is a system of this world. It is built entirely by a parasitic structure. Parasitic egregor. We all go through the same schools, we all receive the same information, and we all go through the same lessons invented by this world. When you don't understand the world, and we are closed, we are born here, we fall here, we materialize, we are completely closed. We live according to the scenario proposed by this program. That's why our kids fight, we get sick, we get laid, we get divorced, and so on and so forth.

Maxim: And who created this program?

Irina: Who created this program? Okay, I understand.

Maxim: Who created this program?

Natalya: This program was created by Satan.

Irina: Where did Satan come from?

Natalya: This is a form that has realized itself, began to consider itself God and began to create its own reality.

Maxim: Where did Satan come from?

Natalya: He came into this world, tore up the power plants and began to dictate his own rules to the world.

Maxim: Who made it? Natalya, please answer, who made Satan?

Natalya: This world is occupied by a parasitic system.

Irina: Who created Satan, you ask?

Natalya: I explained. Satan is a form, it is God.

Maxim: Who created the form?

Natalya: It's written in the Bible, you know? This is a form that has realized itself and renounced the creative energy, the one who created it. The Bible says "fallen angel".

Irina: Who created Satan?

Natalya: He was not created, he became.

Irina: And before he became, where did he even come from?

Natalia: It was a spiritual being who began to consider himself unique, who began to consider himself chosen.

Irina: Where did it come from? Does it have a beginning?

Natalya: Yes.

Irina: Where is it?

Natalya: This creature was created by the Creator, Love.

Irina: So, Love created Satan, do I understand you correctly?

Natalya: She didn't create him, he became like this.

Irina: Why did he become like this? By whose will?

Natalya: He realized and began to consider himself God.

Irina: And by whose will did he become conscious?

Natalya: And he has the will.

Irina: You said that Love does not create will?

Maxim: "Love is weak-willed" - you said, "that there is no freedom of choice"?

Natalya: Many people who live Love understand perfectly what I'm talking about. To understand this, you need to live the state of Love. Will Love create a lesson? When you love sincerely and purely, would you wish harm on your child? Love has conditions, it needs to be understood.

Maxim: You wish your children harm, no?

Natalya: Don’t talk about children yet, we’re talking about others. This is a satanic world, this is a hellish world.

Irina: Why did you give birth to children in it?

Natalya: But because I fell into this world. I didn't understand many things.

Maxim: You are suffering here, Natalya, right?

Natalya: I had to go through a lot of mystical experiences in order to understand the simple truth: that life is created by Love.

Maxim: Natasha, you are suffering in this world, please tell me. Are you feeling bad here?

Natalya: When I know Love, I can be in this state and live in hell. Do you understand? And when you don’t know Love, you will feel bad everywhere.

Maxim: You didn't answer my question.

Natalya: Now you and I are walking in circles. I think either it will reach you and open up, or it will reach others.

Look, about channeling. How does the Soul receive information? How does the spiritual essence receive information? Here, Irina, tell me. How does the Spiritual Essence receive information?

Maxim: You don’t answer our questions, we can’t answer your questions.

Natalya: You don't understand what I'm saying. You don’t know the state of Love, Maxim.

Maxim: How do you know that I don’t know the state of Love?

Natalya: You created a system, you created a cult of worship, but you yourself do not experience the state of Love, you do not know it. It’s even difficult for you to imagine that Love does not create war.

Maxim: Natalya, do you know the state of Love? Tell me please.

Natalya: It’s even difficult for you to imagine that Love does not create evil.

Maxim: Do you know the state of Love? Please answer my question.

Irina: I found a scythe on a stone. Listen, Natasha. If you have a state of Love, then now you will never interrupt me and will listen to my picture of the world.

Natalya: I don’t have the state of Love now. Like you, Irina, like Maxim. Why don't I have a state of Love? Because we are banned in this world. I'm closed at the moment, so I can afford to say that.

Irina: I listened to you, by the way. I listened to your system, I asked you questions, half an hour has already passed, we have another half hour, and now I will briefly tell you my worldview system, which, of course, is passed on to me, just like you, but okay, that doesn’t matter.

Natalya: Irishenka, my sunshine, I know your worldview system completely. I left there, you know?

Irina: So why shouldn't I talk about her?

Maxim: No, wait, we have to tell you our worldview system in any case, you don’t let us talk to you at all.

Natalya: Guys, you have a classic, “uterine” worldview. I really came to tell you about what you are doing, so that you understand a little. What are channelings? How does a spiritual being think, Irina, please tell me.

Irina: We agreed on the Youtube channel that everyone would express their worldview. You did it.

Natalya: No, I know your worldview, Irina, you understand?

Irina: We agreed, why then?

Maxim: Wait, the audience doesn’t know her worldview!

Natalya: You are receiving parasitic information. What is channeling?

Maxim: Wait!

Irina: I won't talk to you now. Now you are breaking the agreement. You and I agreed on the YouTube channel that we would each express our own worldview. You're breaking now. Why do this?

Natalya: Okay.

Irina: Yes, great. I asked you a question. Now I explain the worldview. God is love. He is an absolute spiritual being who is beyond this world. He gave birth to all of us intelligent Spirits. From Yourself, from your Light. It is also called “Eternal Light”. Then he created material worlds, 59 levels of density. At first, less dense - thin-material worlds where plasmoids live. And then he created our dense material world or physical Universe. For what? So that we, Spirits, can incarnate here and develop Love, truth, beauty and life. Why exactly in incarnation should we do this? I will explain. Our Spirit does not have the opportunity to develop and show its Love outside of incarnations. And matter makes him capable of change.

Natalia: What is development in your understanding?

Irina: Development in my understanding is an endless approach to the Absolute and its qualities.

Natalya: How will you approach the Absolute?

Irina: By developing his qualities in yourself.

Natalya: What should you develop in yourself? Are you so stupid that you can’t tell the difference between a kiss and a kick? Tell me, please. There is no development as such in Love.

Maxim: Listen, well, after these phrases, “you’re so stupid,” I think that we...

Natalya: Not stupid, right? So, you know how to distinguish a kiss from a punch? Guys, I'm not insulting you, you're insulting yourself. You say that you are developing. Can't you tell a kiss from a kick? You can, that's right.

Irina: Natasha, are you sure that this shouldn’t be cut out, but everything should be displayed?

Natalya: Leave it, leave everything. You insulted yourself by telling yourself that you are developing. And I tell you: can you tell a kiss from a kick?

Irina: So, wait. Are you now sure that the word you spoke was spoken in Love?

Natalya: And I already explained to you that I was closed. If I were in a state of Love, I would not be able to do many things at all, because if I were in a state of Love, I would do other things. And now these things would be of no interest to me. And communication with you too. But I want to convey to you that the information that is transmitted through you is not entirely from healthy guys. Look here.

Maxim: Are you saying that we can't distinguish a kiss from a blow-off, or what?

Natalya: Yes. It turns out that you cannot distinguish a kiss from a blow-off, since you are developing and you need lessons.

Irina: Yes, I see. Do I have the right to convey the information that is given to me?

Natalya: If you understand everything they say... I don't know, maybe your channel has some violations, if you understand the truth, appreciate the state of Love...

Irina: For me, my condition is natural. And for you it's yours.

Natalya: What you say cannot be said. Irin, I'm really telling you. Tell me, what is channeling?

Irina: Natasha, who can stop me from doing this?

Natalya: And because you are responsible for what you say, at the beginning of the video I said that I saw this path, and the fact that I went through it completely cooled me down. Because, look, simple point, what is channeling?

Irina: Am I responsible to you?

Natalya: Yes, and in front of other people who are here.

Irina: In front of what other people? Only in front of you?

Maxim: Tell me, please, how did we harm you with our information?

Natalya: Wait, look, what is channeling?

Maxim: Channeling is the transfer of information.

Irina: Yes, this is a contact.

Natalia: How does a spiritual being think? How does it get information?

Maxim: It thinks exactly as much as it has the ability to think at the level of consciousness in which it is located.

Natalya: Imagine an apple. This apple was cut and scattered into different parts. Previously you possessed an apple. Remember: a spiritual being always speaks in parables. I don't always succeed. Sometimes a parable comes down because there is a lot of meaning in a parable. A high-level spiritual being will never transmit linear information (channeling is linear information).

There is an apple. It was cut into pieces and scattered. So, the apple is our thinking, it is our way of obtaining information. Channeling is just one way of receiving information, telepathic contact. One of the methods. We see this world with our own eyes, this is also one of the ways. We see images - this is one way.

We see images of different levels, we see images of different densities, we see images of different dimensions - this is a different level of our vision. We are in this body, but we can leave it, being healthy now here, and we will be in one plane, and we can leave the body and move to another plane. Because a spiritual being thinks multidimensionally and receives information not only through channeling, but through observation of this world, observation of other spaces and observation of thoughts, pictures that are constantly present in the field. In a spiritually healthy world, as soon as one climbs higher, he receives this information instantly, from everywhere at once. Here we receive it in pieces, or these are called “messages”. You have received a “message” of information.

Maxim: How do you know that you are the truth if you are an illusion without Love?

Irina: The fact is that I have already received information from you that “this world is hell.” But I feel differently, not my curators, I, the person, as I am.

Natalya: What do your curators say?

Irina: I, as a person, from childhood, even before contacts, from the age of twelve, feel that this world is a form of Light, that this world, for me personally, no matter what it is, is a divinely heavenly bright place of Love. And if I tell you now that I agree with you, that the world is hell, then I will deceive you. You don't want me to deceive you.

Natalya: I recently looked on the street, a child was roaring, crying, he had cancer. You see,

there are a lot of homeless animals, a lot of people, that is, this world is suffering. A world in which even one spiritual being suffers is quarantined, you understand? Because it emits an “atomic bomb” into space. I didn’t know this before, I also walked, searched, walked around the world and also considered it paradise, and also passed by sick people.

Irina: What do you think, I’ve never suffered? You are very much mistaken.

Natalya: Of course, I suffered, we all suffer. Irina, you see, the fact of the matter is that we all go through a series of sufferings.

Maxim : Without pain there is no growth, Natalya.

Irina: You can’t improve without pain.

Natalya: What, can’t you tell a kiss from a kick?

Maxim : According to you, I can’t distinguish anything at all!

Natalya: So this is a hellish world, you know, they create special conditions for you.

Maxim : So for you it’s hellish!

Irina: Why should I agree with you if my Soul, my Self, tells me differently? It shouldn't be like this!

Natalya: Okay. Do you think there can be suffering in the world of Love?

Irina : Yes.

Natalya: How come, just imagine: you were born in love...

Maxim : Because in order to appreciate love, the Lord gave suffering.

Natalya: Wait, Maxim. So you gave birth to a child and sent him to suffer. So you love a child, and you gave birth to him, and what next?

Irina : Wait. Even what he is born with - he is born with suffering for me and for him.

Natalya: Why? You love, you gave birth to a child in joy. You will give him the best of yourself. What kind of child do you think you'll grow up to be?

Maxim: Different children. It all depends on how the child perceives what kind of society he has, what kind of dad he has.

Irina: He has his own will and Spirit.

Natalya: What is your will? You gave birth to a free form. You see, guys, if you gave birth to a child in Love, gave him all the best from pure Love, he accepts your Love.

Maxim: Nothing like that! You can raise a moral monster who will walk around and project through his ego.

Natalya: You see, you are now broadcasting information from this world. And you cultivate it, continue to broadcast it.

Maxim: What world are you in, Natalya?

Natalya: I came here to change this world, to take it to another level. And you are in this world.

Maxim: How can you change the world when you consider it hellish?

Natalya: So that people realize and understand where they are.

Maxim: So that they understand that they need to love, right?

Irina: You've already been telling me for 40 minutes, I haven't realized anything. I didn't realize that this world is hell.

Natalia: What is channeling? Channeling is the control of an avatar, another being. You and a bunch of people gave their brains to someone. What kind of free will do you have? Nothing fits in with you at all. Channeling and free will and freedom of choice are simply complete inconsistencies. But you don't think for yourself, they think for you and give out information.

Irina: You are a contactee yourself. So, are you also manageable?

Natalya: I receive information in volume. Understand?

Maxim: “I’m a super contactee, so I don’t give a damn about other contactees,” is that how it turns out?

Natalya: Yes, I don’t give a damn about other contactees, now I’ll explain why. Because I want to be myself, and I don't want my brain to be controlled by just anyone. I strive to receive information in volume.

Maxim: Except you, no one wants to be themselves!

Natalya: You see, there are levels of vision, as I just described to you. It’s just that what I’m saying, esotericists and philosophers will understand me perfectly. Your level is still, sorry guys, you can’t understand. Don't be offended, I treat you well, but you still can't understand these things. Review it, think it over.

Maxim: It’s okay, let him talk. Speak, speak, Natalya.

Irina: Then you can read the comments yourself.

Natalya: Comments from sick people, it’s real when they don’t understand simple things, and you drive them into these states. Those who need it will understand. You drive them into these imaginary states, selling your brain to an unknown destination.

Irina: Have you been examined? Please show me your psychiatrist or psychologist diploma now.

Maxim: And research of the entire audience that listens to us.

Irina: Yes, all the “sick” people you just mentioned. This is already called condemnation.

Natalya: Irina, look, it is so, I went through it, because I went through all your schools.

Irina: Did I call you “sick,” or maybe he called you?

Natalya: What if a person doesn’t know how to think for himself? What is contacting? You connected your brain apparatus to someone and say everything that is told to you. Absolutely what they tell you.

Maxim: You are a contactee. Please tell us where you connected your device?

45:04 Religions. The purpose of Christ's coming. Comprehension of information.

Natalya: What kind of contactees are you if you can't feel the difference, that the level of contacts is different! I receive information multidimensionally! I don't need to rattle my brain, but with my brain I can hear words, like you do now!

Maxim: And she doesn't receive information multidimensionally, right?

Natalya: A person receives information, spiritual essence, multidimensionally.

Maxim: Natalya, where do you know how Irina gets information? How do you know that all people are sick?

Natalya: Because you make people sick! It's not clear what channels you connect to. Selling their brains. A person is not able...

Maxim: Who connects whom? Show at least one video where we connect to some channels!

Natalya: Okay. Look. It sounded like Irina, she communicated with Christ. You said that Christ came into this world, and His purpose, now I'll even read how it sounds, look, this phrase sounds like this. Christ: "The main purpose of My coming to Earth and My sacrifice is the creation of such a religion." Guys, what are you talking about? What level is this? This is where religions are created? Do you understand that...

Irina: Don't you know what religion is? Now I'll open the dictionary and read it to you.

Natalya: In a spiritually healthy world, religions do not exist.

Irina: There is. I say it exists. This will now be just an empty argument.

Natalya: If you don't experience Love, if you don't know how to create in Love!

Irina: You just admitted that you don't experience it either, you just admitted it.

Natalya: I explained to you throughout our entire video that I...

Maxim: How can you tell us that we don't feel Love when you yourself don't know what Love is?

Irina: You yourself said “I don’t know what Love is.” I remember that.

Natalya: No, I explained to you at the beginning of the video, I said more than once that I know what Love is. At the divine level, as they say, in the Spiritual world... Irina, I have already explained several times that I experienced these processes. And people who experienced the processes of Love within themselves and found themselves in a spiritually healthy world...

Irina: Now tell me the purpose of meeting with me in this video.

Natalya: The goal is to say the following: what kind of information that you transmit, it goes through the parasitic system. God has no religion. When Christ came here, he gave one commandment: “Love one another as I love you.” And Christ crucified the world. With His coming...

Maxim: Christ spoke the same phrase constantly, besides this, he didn’t know any other phrases?

Natalya: And he came to show the world, he came to launch the image of God, it is written directly in the Bible. I know this because I know Love. He didn’t come here to create religions, you know? He came to awaken this world. He said: “I did not bring you peace, but a sword.” Because with His coming the transformation of this world began.

Irina: And you say “there is no such thing as suffering.”

Maxim: A sword is suffering?

Natalya: Where there is no suffering? Because, I explain once again - when a person suffers, he is in space...

Maxim: In the Spiritual world, I agree with you, there is no suffering, because there is no growth there.

Irina: And at low levels there is.

Natalya: This world is material, it is too material, and this world of physical sensations.

Maxim: You yourself chose this world, and you yourself fell here, as you say.

Irina: Incarnated.

Natalya: I chose it for specific tasks. Because that information...

Maxim: Correct. Because these tasks can give you the opportunity to grow in your spiritual level.

Natalya: They are fooling your brains, a lot. What is channeling? This is a connection to the operator. Operator through your brain... You don't think, you don't learn to think, you don't know how to think! Here people's thinking is dead. And channeling is so simple in general... You can't even understand simple things! Because everything is already here...

Maxim: Let's put it on the channel, really. Let people know how people can contradict themselves. When they tell me that there is no Love, and then she says that she was in Love and gave birth to it.

Natalya: You don't even understand what I'm saying. You guys can't even comprehend this.

Maxim: You don't understand that you judged everyone, you said that "I'm a star, and everyone else is an idiot."

Irina: Let us talk like this: what was the purpose of our meeting?

Natalya: You should have understood the following. Those creatures with whom you communicate are a parasitic system that controls this world.

Irina: Yes, great. Thanks for the answer. Now tell me, am I obliged to agree with you now?

Natalya: You won't agree, I'm just telling you now. Then it will come to you. Any word you say in your video can be challenged. Any word you say in your video is a blow to the human psyche. And with any word, with any of your words, you are sending a person down the wrong trail.

Irina: I say: am I obliged to agree with you now?

Natalya: You can't even comprehend the information, you've already sold your brain to someone who doesn't know.

Irina: I understand you. Do I have to agree with you?

Maxim: Wait, so it turns out that I sold my brain?

Natalya: By and large, yes, I have to agree.

Irina: If I don't agree, what can you do?

Natalya: Irisha, I don't do anything at all. I warned you. I said what I said, you know?

Irina: If I take it and don't agree, what will happen to me?

Natalya: Don't agree, Ira. You understand, you don't have to agree at all. But the world is changing.

Irina: I don't agree.

Natalya: Don't agree.

Irina: I have my own system of the world, which completely suits me, which I have harmonized.

Natalya: I conveyed what I could, Irina. She conveyed what she could.

Maxim: How did you convey all this now? Are you in contact? How did you convey it just now, tell us. Are you in contact?

Natalya: Guys, I am one hundred percent in contact. I explained it to you at the beginning of the video.

Maxim: Is this 100% channeling?

Natalya: I am not channeling. I explained it to you.

Maxim: How does contact differ from channeling, from the transfer of information? Have you been given information now?

Natalya: I'll explain to you. You can't even understand a simple thing: channeling is a telepathic connection. This is one way of contact. He's not important, and he's not the only one. A spiritual being must comprehend the information itself.

We receive information in various ways besides channeling. We see dreams, we see images,

thoughts come to us. We are all, each of us, being led through this world. And our vision depends on the purity of our channel.

Maxim: Natalya, in general, I already understood you. Do I understand you correctly that you are on a channel with a highly spiritual entity that transmits information to Irina in order to protect her?

Natalya: I am passing on this information, guys, on my own behalf. In my field there are many who are trampling. They are leading me.

Maxim: What does it mean “there are many trampling in your field”? Have you given up your field for the trampling of any entities?

Natalya: Guys, how each person’s field is attached to some channel, do you understand?

Maxim: You haven’t answered any of our questions.

Natalya: Maxim, what questions did you have, please tell me!

Maxim: Are you in contact?

Natalya: You can’t understand one thing. Yes, I am in constant contact, I have many beings with whom I am in contact. There are situations when I am led or adjusted to some situations.

Maxim: Whose brain are you looking at when you transfer a contact?

Natalya: Maxim, I explain that information is obtained in various ways. There are a lot of ways to get it, a lot of levels.

Maxim: What does this have to do with methods of obtaining information and condemnation of Irina’s contact?

Natalya: You don’t really do anything at all, you don’t have any meditations, because you can’t understand simple things!

Irina: What kind of meditation? You haven't studied it yet. We have a meditation channel.

Natalya: What to study, Irina? I listened to you a couple of times, but it’s not worth listening to, this is first grade, elementary school.

Irina: Explain for people who is worth listening to.

Natalya: Me.

Maxim: Natalya, you are a star. I am posting this video on our channel so that we can finally see a real contactee who has the best contact. Who knows that all people are sick, that there is no Love, that everyone is a freak, except the person himself who projects it.

Irina: That we live in “hell”. A great discovery, indeed.

Natalya: I am not a contactee.

Maxim: Who are you?

Natalya: I am a spiritual being who has known Love, who has seen that there is no Love in this world. The hell you create is over.

Maxim: Natalya, I wish you the right lessons on this planet. And we personally didn’t give you any hell.

Natalya: Take the lessons yourself, you understand, if you can’t tell a kiss from a punch, that’s your problem. I can, I don’t have lessons, you know? You have lessons.

Maxim: Sunny, get on with your life, sort out your head, your contacts, who you are, what the structure of the universe is. And if you don’t like our information, don’t listen to us anymore, under any circumstances.

Natalya: You can’t fit what I said, you couldn’t even fit it in, you know?

Maxim: You just have so many “stars” that it can’t fit into us!

Natalya: You're sold, understand?

Maxim: Sold, yes, we are sold to Love, that's right! And who were you sold to, Natalya?

Irina: Sold, brutes! Beat them!

Natalya: You didn’t even understand the simple things I told you guys, really.

Maxim: Beautiful! Sun! We love you freely, and I am very sorry that you are living in the hell that you have invented for yourself. We cannot help you, it is your personal choice and you have freedom of choice.

Natalya: What level, you didn’t even understand what I said. I said a simple thing.

Maxim: We don’t understand what you’re saying at all. We don’t understand, no, we bow to you, yes, we say thank you very much.

Natalya: Spiritual slavery, you understand?

Maxim: If it weren’t for you, we wouldn’t understand the essence of the universe!

Natalya: You don’t even understand Christ, you’re doing some kind of crap.

Maxim: We didn’t understand anyone. You are the only one who understands everyone.

Natalya: People have been brainwashed. They created some kind of network of contactees, you know?

Irina: So powder it, we’ll give you the opportunity now, powder it!

Natalya: You are not able to accommodate being powdered!

Irina: Powder people's brains, can't you powder them?

Natalya: You see, you can’t tell the difference between a kiss and a punch! So what can I do?

Maxim: Can you distinguish a kiss from a kick?

Natalya: Of course I can!

Maxim: How is it different, a kiss from a punch? Tell us, so wrong and misunderstanding!

Natalya: There is love, and there is pushover, it's still very simple, Maxim.

Maxim: No, no, wait, how do you distinguish a kiss from a kicker? There is Love, there is a bang - this is understandable, but how do you distinguish a kiss from a kick?

Natalya: Maxim, now you're just starting to repeat some set of words that simply don't make any sense.

Maxim: Because you don't answer the question.

Natalya: Yes, because there is no question, Maxim.

Maxim: If you asked us this question.

Natalya: What question did you ask me?

Maxim: How do you distinguish a kiss from a punch?

Natalya: Yes, simple! This is a blowout, and this is a kiss! I didn't understand the meaning, you don't know how to differentiate, so differentiate, the lesson was invented for you, understand? Because there is a concept of "spiritual joy".

Maxim: What makes you think that I can't tell the difference?

Irina: Come on, shall we put her out?

Natalya: Why are you teaching others then, how to distinguish a kiss from a punch, then why are you telling others about your lessons?

Maxim: I don't tell anyone about kickoffs and the kiss.

Natalya: Now you found out about it. It turns out that you can tell the difference, and you don't need any lessons.

Maxim: If it weren't for you, of course, I wouldn't be able to tell the difference between a kiss and a punch!

Natalya: You want Love and happiness, but you had to go through suffering.

Maxim: So I am grateful to my mentors for this suffering, because I would not be able to love now the way I love.

Natalya: Apparently, from birth you couldn't distinguish a kiss from a punch.

Maxim: Do you have any other phrase, an example of how you can communicate with a person differently, giving him the opportunity to understand that he cannot distinguish something?

Natalya: Maxim, what about you? Can you tell the difference between a kiss and a kick since childhood, but you couldn't tell the difference between someone kissing you and kicking you? So, excuse me, where did you come from, what world?

Maxim: How do you know that since childhood I have not been able to distinguish a kiss from a blow-off?

Irina: Because you call suffering a divine lesson.

Maxim: Oh, so I should always live in kisses?

Natalya: Maxim, this is normal, natural, you know? This is your system and your curators, it's interesting for them to give kickbacks.

Irina: Who are they giving kickbacks to?

Maxim: Tell us how they distribute kickbacks?

Natalya: You have a parasitic system, you understand?

Maxim: No, stop.

Irina: Here? Yes, this is your parasitic system, you're sitting over there, feeding plasmoids! They suck all the energy out of you.

Natalya: You can't understand, you understand.

Irina: Now the plasmoid is talking to you too.

Natalya: Maxim, look, there are practices of leaving the body. Have you had out-of-body experiences?

Irina: Of course not, why should I?

Maxim: What are you, Astral, what Astral, what are you talking about? We can't distinguish a kiss from a punch, but they tell us about the Astral!

Natalya: The Astral is you between worlds. What level of access to the Astral plane did you have? Did you come out with your body?

Maxim: Okay, that's it, we're finishing the conversation. Natalya, I don't want to talk anymore for one simple reason.

Natalya: You have nothing to say.

Maxim: Yes, listen, let's end the conversation with the fact that we have nothing to say! We don't want to waste our precious time on "nothing to say"!

Irina: We fall silent before your divine personality!

Maxim: And we thank your divine Soul for enlightening us, for giving us so much information and answering all our questions that we asked you.

Irina: Thank you and accept!

Maxim: Yes, thank you and accept!

Irina: We love and bless! Goodbye, Natalya.

Natalya: Goodbye.

April 18, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Natalya Prozorova - guest.

April 6, 2023

#255 Beekeeping and methods of its harmonious development. Tips for beekeepers. Honey, pollen, beebread, propolis.

https://blog.cassiopeia.center/pchelovodstvo-i-metody-ego-garmonichnogo-razvitiya
https://www.youtube.com/watch?v=gU2eFNzpq7s

00:22 Introduction of meeting participants.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today we have a conference about bees, beekeeping and methods of its harmonious development.

Next to me is MidgasKaus, a specialist in biology and psychology from the planet Esler, my curator, and there is also a representative of the plasmoid civilization who oversees the creation of the collective Souls of insects - Achrius from the 25th density level, the constellation Pegasus. Also with us is the disembodied Spirit - Savvaty, who lived in the 15th century on Earth in Russia, was a monk, raised bees and communicated with plasmoid worlds about how to interact with them correctly. He is now at the 23rd Angelic level and has come to answer questions if necessary.

Alla: Very nice. Let me introduce myself: my name is Alla, I live in northern Italy in the mountains. I am a beekeeper - this is my hobby.

01:52 Origin of bees and development of beekeeping.

Alla: When did bees appear, and who created them?

Irina: MidgasKaus says: according to the science of the Interstellar Union and the evolutionary chains we have identified, bees appeared approximately 150-120 million years before the present.

They were created by representatives of plasmoid civilizations, who created collective animal Souls for embodiment in insects. The purpose of creation is to train plasmoid civilizations, to create such animal Souls that will be able to collect the energy of pleasure in the material world and do this collectively, since honey is a symbol of planting.

03:07 Reasons for honey crystallization. Liquid honey in honeycombs.

Alla: Next question: why does honey in honeycombs not crystallize for a long time, unlike pumped honey?

Irina: Honey crystallization, MidgasKaus answers, depends on temperature, composition and accompanying microflora. Accordingly, the honeycomb contains honey and resin, which has a detrimental effect on those fungi and microorganisms that accelerate crystallization - the process of precipitation of carbohydrates.

Alla: Probably this resin is propolis.

Irina: Yes, that's what you call it.

Alla: Because if I pump out the same honey, it begins to crystallize immediately after a few months, but in the honeycomb it remains liquid for 2-3 years.

Irina: There is an optimal environment for existence in this form: temperature and microbiological, and even light. Preservation is affected by light.

04:33 Containers for storing honey.

Alla: We pump out honey in stainless steel honey extractors. Does honey lose its quality due to this procedure? How long does honey retain its quality?

Irina: When stored in a dark, cool place in containers made of natural materials that do not undergo oxidation, honey can retain its properties indefinitely. There are cases when honey was found in Egyptian pyramids or Mayan tombs, while it retained its properties.

Accordingly, a stainless steel alloy, compared to aluminum materials, for example, will be more stable and will not react with the amino acids it contains. Stainless steel material is a good material. But it is best to store it not in a metal or plastic container, but in a wooden or ceramic one.

Alla: Or in glass.

Irina: In glass only in a dark place.

06:05 Methods of combating bee diseases and preventing the strengthening of their immunity. Varroa mite. Location of apiaries. Blue iodine. Essential oils.

Alla: Okay, let's start about bee diseases. Viruses, infections, fungal diseases of bees. How to deal with them? Bees have many diseases and many enemies. Why did God create this?

Irina: What do you mean a lot? Compared to whom?

Alla: Lately it has become very difficult to keep bees. It was simpler 60 years ago. Then there was no Varroa mite, which is now found all over the planet except Australia. He kills families. If you don't treat the bees, they just all die.

Irina: Savvaty will answer, he saw bees in the 15th century. He says: you need to position the apiary in such a way as to create an optimal temperature microclimate. This will strengthen your immune system. If the mite multiplies, this is a sign that, firstly, you are giving too much sugar. They love sugar. Also, maybe they communicate with those bees that are already infected.

There are products that kill this mite, but they also kill beneficial microorganisms that form immunity. Normally, wax and propolis contain substances that disinfect and inhibit the proliferation of these parasites, microbes and fungi. If this does not happen, it means that the immune system is already compromised.

Why has this increased in recent years? Because the immunity of bees is weakened by emissions from industrial enterprises: pesticides, herbicides that remain on plants and are consumed by bees as food. Therefore, natural immunity is weakened compared to what it was before.

Natural and harmless methods of combating these parasitic diseases and prevention: strengthening the immunity of bees. When you put water, a drinking bowl for bees (Savvaty shows a wooden vessel). There you can add (MidgasKaus says) a tablespoon of starch iodide or iodinol for every liter of water. Do you know such a remedy?

Alla: I don’t know that.

Irina: This is blue iodine.

Alla: Let's find out.

Irina: Not brown iodine, but blue. This will help prevent fungal, bacterial, viral and parasitic infections.

Alla: Thank you very much.

Irina: And if there is already a lesion, then inside the hive you need to fold paper on which drops, for example, of eucalyptus oil are applied.

Alla: Okay, but I wanted to ask about oils.

Irina: If we use fir oil, it helps against ticks. The dosage is 5-7 drops per 1 hive. Apply to cotton wool or cardboard, but not to plastic, because... it kills all properties.

Alla: Okay. Bottom or top?

Irina: From below, because in the heat these vapors rise upward.

Alla: Great. And I always secured it at the top. Thanks a lot!

Irina: Tea tree oil and clove oil are more suitable for treating fungi. Fir and eucalyptus are more suitable for treating parasites and ticks. This is modern prevention. And in the 15th century, to prevent this from happening, they treated it with an infusion of wormwood, tansy and wormwood. They made an infusion and washed the hive with it using brushes.

Alla: Is it possible to give syrup? I give syrup: wormwood, fir, spruce. I brew it and give it to the bees in syrup.

Irina: It makes sense to give it, but the spores and eggs of these mites remain inside, in wooden buildings, so we treated them with wormwood infusion. Later, tobacco, tansy, and high temperatures became popular: the hives were dismantled, washed with hot water, or simply kept in direct sunlight for a certain amount of time. This killed the parasites.

Alla: Viruses kill more.

Irina: I want to emphasize that the well-being of a bee colony depends on the mental and astral harmony of their owner. He feeds them with his energy. Communicating with them, he feeds them with his Light. If this Light is distorted by blocks, then the bees begin to suffer from various diseases.

Bees feel better and bring more honey from cheerful, highly spiritual, loving people, then the bees are not aggressive. They are like a reflection of their owner, because their collective animal Soul reacts to the state of the Soul of the incarnate intelligent Spirit.

14:53 Acids against mites and bee immunity.

Alla: In Europe, by law, we are required to treat bees with oxalic and formic acid against mites. How do these acids generally affect the immunity of bees?

Irina: They are very toxic. If acids are used, then the most harmless for bees are citric and succinic acids. There are some that are for sale. Also, malic, citric and succinic acids at high concentrations are destructive to ticks, but do not destroy their blood cells.

Alla: Can I spray homemade diluted apple cider vinegar?

Irina: Apple, wine, which also contains malic acid. It is found in fruits.

Alla: Is sorrel also destructive? A solution of oxalic acid is added to the syrup and sprayed on the bees, or poured over the hives.

Irina: These compounds are effective, but they destroy the bees' blood cells. After this treatment they will need to recover. You will need to add anti-toxic herbs to your bee food. For example, violet infusion, which removes toxins.

16:46 Treatment of bees with herbs.

Alla: What herbs vibrationally suit bees? I dry the herbs and sprinkle them with flour to clean them.

Irina: He shows me that it is good if, firstly, wild herbs such as tansy, sweet clover, mint, motherwort, that is, the entire family of Lamiaceae, grow around the apiary, and that there be families of cereals and cruciferous plants, like cress. The cruciferous and cereal family. They provide the necessary materials to produce food for the larvae.

Alla: Nettle?

Irina: He shows me the Lamiaceae family.

Alla: Garlic?

Irina: What other question? He listed herbs.

18:25 Treatment of bees with bioenergy. The influence of the owner on bees.

Alla: Is it possible to treat bees with bioenergy and how?

Irina: As I already said, they react to the human Soul, to its frequency. Do you mean which energy methods are suitable?

Alla: Yes! Can I heal with my bioenergy?

Irina: Yours?

Alla: Yes.

Irina: Yes, of course. You are the owner and your condition affects their condition. To do this, you can represent the head of the bee family and send Light to her and her children that she gives birth to. You can talk to her mentally. Saying: “I love you, I send you Light, love and goodness. Thank you for the pleasure you give people.” They respond very well to this, their immunity increases, and their productivity increases.

19:42 Asian wasps and their control.

Alla: Okay, thank you. Now new enemies have appeared: huge Asian wasps. They destroy bee colonies. In Italy there is a fight against them. Maybe they can tell you how to deal with them?

Irina: MidgasKaus says: “Under no circumstances use any pesticides, especially organophosphorus compounds, in the apiary and within a radius of 2 kilometers from it. This will kill more bees than wasps. They can bring this poisonous food to the larvae and the queen bee and poison them, causing the death of the colony. Within a radius of 1.5–2 km, where there is a danger of treatment with similar preparations, for example, by other owners of summer cottages, it is generally undesirable to install an apiary.

If there are a lot of wasps and damage is felt from them, there are two main ways to deal with them. The first is to follow them, find the nest and destroy it in a protective suit. Fire is most effective. Do this not during the day, but at night, when they will all be inside.” He shows me: in a protective suit, after sunset, usually at 11:00 pm, when it is dark and the wasps go to sleep, you need to take a net or a device with which you can pick up the nest, put it in a plastic bag, tie it and burn it. If it is possible to get it. If it is in a hard-to-reach place, then, if possible, pour boiling water there. Again, do it at night to make it more effective in killing the larvae.

But if you still haven’t found the nest, then you can use baits that the bees themselves don’t pay attention to, rather than pesticides. They can also be used in the apiary. They are capable of reducing the wasp population by 80% in a short time. There are two types. The first is to take a vessel like a bottle, only you don’t need to add sweets there: sweet water, syrup or fruit juice, but add the juice that you have already purchased...

Alla: Fermented.

Irina: Yes, it’s best to use fermented grape juice or any compote for this, add a little yeast there, and put it in a warm place. Bees do not pay any attention to it, because they are repelled by fermentation, but wasps, on the contrary, are attracted to it. You can place the vessel in such a way that once they get inside, they can’t get out. If you place several of these traps on the windward side, from where they fly, they usually fly by smell, then you can quickly reduce the population of these insects.

And the second method is small pieces of minced meat, the protein of which is necessary for feeding wasp larvae. The bees pay no attention to him at all. There are hunter wasps that hunt bees and other insects. They pay more attention to minced meat. Mix it in a 1:1 ratio, for example, with boric acid, which is harmless to bees in this mixture, and spread it out. If there are pets in the apiary, then in places where they do not go, i.e. not on earth. This way you can also reduce their number in the summer. But don’t use pesticides or add anything toxic to the water. This causes the bees to die.

Alla: That's understandable.

Irina: It’s just that he now says that some people do this. They think it's safe for bees, but it's actually not.

Alla: I didn’t know about minced meat, but about the bottle - yes, we do that.

Irina: Both wasps and cockroaches are very good at flying towards beer.

Alla: Yes, we make beer, vinegar, add yeast, sugar. We know this. Now scientists even attach beacons to these wasps and track the nests. Wasps can kill an entire family in a few hours.

Irina: They not only kill, they also bring infection. Since they have the same family, they suffer from similar diseases. Even if a wasp just flies by quietly and eats something, it can infect the area. This is how wasp diseases spread. They live in the wild, outside of human care, so they exhibit various diseases.

27:03 Wild bees. Feeding bees.

Alla: Bees can no longer live in the wild?

Irina: There are many types of wild bees. They are not domesticated yet.

Alla: How to feed the bees so as not to harm them, and is it necessary to do this? It happens that they have collected little food, and we feed them with syrup.

Irina: It's possible to have more amino acids. Jam is very useful for them: apricot, apple, black currant. Dilute it and make syrup. Not sugar, but fruit acids. You can feed them with the same honey. Dilute it with warm water. Not hot, but warm up to 30–35 degrees.

Alla: That's what we do.

Irina: It will dissolve in warm water, but in hot water it will lose its properties. Or dilute with jam instead of sugar. Give them these syrups. Raspberry, currant, and plum fruits are very useful. Blackthorn and rosehip syrup will strengthen their immune system and they will really like it. For them, this will be a very valuable source of essential amino acids.

28:54 Hive shape and material.

Alla: Which hives are most suitable for bees? Is rectangular shape ok? Do angles not affect their development?

Irina: The hive can be of any shape: rectangular, square or round. They themselves will create an optimal environment for themselves, building the honeycombs at the angle that is necessary. The material is more important. Recommended from coniferous wood: cedar, pine, as it is less susceptible to fungi.

29:42 Relationship with bees.

Alla: How can we make sure that the bees do not sting or die during inspection?

Irina: He says: "The disposition of the Soul not only towards the bees, but also towards your household, towards all the people around you, peacefully, with prayer, with peace, with love for God, promotes energy exchange with the animal Soul of the bee family and a decrease in aggressiveness not only towards you , but also to your relatives and friends."

30:22 Nature spirits to protect and help bees.

Alla: Which Spirit of Nature should we turn to to protect and help the bees? How can I contact him?

Irina: You can also turn to the Spirit of Nature, you can turn to the spiritual patrons of these insects. Just one of them, Savvaty, is present here. In the Christian egregor, he is one of the spiritual patrons of these insects, because during his life on Earth he was engaged in beekeeping. He loved these insects very much. They multiplied very well with him, did not get sick, gave a lot of honey, because with his love for God and for these God's creatures he gave them the strength to multiply and be useful.

Therefore, with prayers to Savvaty and Zosima, who lived in the Novgorod land in the 15th century, you can protect and protect bees from all evil Spirits, from all physical and subtle forces that can influence them. Savvaty answered.

Alla: Thank you!

32:07 The instinct of theft in bees.

Alla: Bees have a very developed instinct for theft. They steal from weaker families, exterminating them. What can be done to reduce this phenomenon?

Irina: Do not place apiaries closer than 2-3 km between them. Especially if there is a shortage of forage areas where they collect herbs. Those bees that live nearby in their hives in the same apiary better sense each other's smell and energy and react negatively to the arrival of bees from other apiaries.

They can defend themselves. In this they are very similar to ants, who also create similar protection for their anthill. Therefore, the instinct of theft manifests itself in case of nutritional deficiency, especially for their larvae and the uterus. They may start looking for it in other hives.

Any bioresonance therapy works, in the effectiveness of which a person believes and strengthens these waves.

There was a very interesting question about a beekeeping product. It will be right on topic.

34:08 Medicinal properties of bee venom.

Alla: I wanted to ask about bee venom.

Irina: What exactly?

Alla: Does he treat joints? It is very useful, very widely used in Russia and Ukraine. But in Europe this is prohibited. I would like to know about bee venom, is it really that useful?

Irina: It contains substances that reduce inflammation, kill various microbes and cleanse the body of toxins. In moderation, it is useful, unless, of course, there is an allergy to this product as an excessive reaction to the incoming protein substance.

35:05 Allergy to bees.

Alla: A related question: many beekeepers have no allergies the first year, but from the second year they begin to become allergic to propolis, to the poison. What to do?

Irina: The cause of allergies lies deeper. This may be psychosomatic, spiritual or parasitic. Allergies don't just happen. It is always a symptom of something deeper.

35:32. Nutritional value of bee bread and pollen.

Alla: Bee bread or pollen? Because these are the same product, only pollen is not fermented, and beebread is a product already fermented with honey.

Irina: MidgasKaus says: “Their composition and appearance are different. Bee bread contains more nutrients and antiseptic substances. It is considered a more valuable nutrient. Both pollen and beebread have the ability to cleanse the body of toxins and increase its ability to adapt to various harmful environmental conditions. Even to ionizing radiation.

Bee bread cleanses of toxins, normalizes blood pressure, cleanses blood vessels of cholesterol plaques and contains a lot of vitamins, microelements and valuable amino acids in an easily digestible form. Can be used for those who have an unbalanced diet.”

37:11 Properties of royal jelly. How and why to use royal jelly and propolis. The healing properties of beeswax.

Alla: Royal jelly. Is it as useful as they say it is?

Irina: In moderate doses. These are substances that are produced to feed the queen and her larvae. It comes in two types: for ordinary larvae and for queen larvae.

What is for the uterine larvae can be several tens of times higher in hormone content. Royal jelly contains a lot of female hormones. It can be used to stimulate metabolism, immunity, and nerve cell regeneration. For both women and men, it can be used as a genital stimulant for reproductive processes. Enhances reproductive ability, conception, sexual desire, pleasure and all experiences during sexual intercourse.

Of course, the benefits of bee bread, pollen, honey and royal jelly depend on many factors. It

cannot be the same for bees from different regions. It all depends on the region of residence, the amount of different herbs for feeding bees. In coastal areas, honey is more saturated with iodine and is more beneficial. In mountainous areas, certain substances in the soil, such as calcites, contribute to the accumulation of a more concentrated dose of nutrients in honey and beekeeping products.

If, as I have already said, for preventive purposes you give blue iodine in a dose of 1 tablespoon per 1 liter of water, then you will enrich the bees' diet with iodine, which is lacking in regions far from the sea.

I also wanted to say that if damage has already begun, for example, by aspergillosis or mites, then the affected honeycombs and hives can be treated with the same blue iodine, without diluting it, in a concentration of up to 10–15 ml per 1 liter. Spray the hive like an aerosol. This is completely harmless to bees and does not cause any harm to either the larvae or the honey. They will even absorb the droplets that fall on them, because iodine promotes proper metabolism.

Now, how to use royal jelly correctly. It is advisable, of course, not to swallow it, but to keep it in your mouth under your tongue. There are many blood vessels into which all substances are absorbed, and gastric juice destroys them. It can be diluted with honey, as it has a rather specific and unpleasant taste for many. The usual dosage is 30 g per day, 5-10 g before meals. Can be placed under the tongue until completely absorbed. There are manufacturers who offer capsules for oral administration, but the most useful are what I named.

Alla: Thank you!

Irina: You can chew propolis to disinfect the oral cavity. Even if you swallow a certain amount of it, nothing will happen other than benefit. When you eat honey in the comb, do not spit out the wax. It can be swallowed in small quantities up to 25 g per day. It will only cleanse your blood of toxins. Natural beeswax disinfects the intestines from fungi, candida, and E. coli.

Alla: Very interesting information.

Irina: It absorbs 20 times more toxic substances from your intestinal wall than it weighs itself. And in the intestinal wall there are a lot of lymphatic vessels. This way you can cleanse your lymphatic system.

Alla: Good information. Thank you!

43:51 Drone homogenate.

Alla: We make drone homogenate from drone larvae. Squeeze and use. Is he useful?

Irina: What is this anyway?

Alla: These are from drone larvae. They are collected, squeezed, and milk is obtained. It looks somewhat like royal jelly. I think it's male hormones. Used in Russia and Japan for treatment with this liquid.

Irina: Savvaty says that such extracts from the larvae were not used. They feed them milk anyway.

Alla: Three days after the egg is laid, they feed milk. And then with beebread and honey.

Irina: On those days when they are fed milk, they still contain these substances. They don't see much difference. Royal jelly already contains all the necessary elements.

Alla: Royal jelly is very difficult to get, but this is very simple, there is a lot of it.

Irina: They don’t see any particular benefit in this, from the same death, for example.

46:45 Contact with bees. Defender bees when attacked by enemies.

Alla: Thank you! Maybe he can add something else from you?

Irina: Ahrius didn’t say anything. Do you have anything to add to what MidgasKaus and Savvaty said? Yes, I have something to add.

Each plasmoid that creates the collective animal Soul of bees puts into it a particle of its Light and the enjoyment of life. This is why bees love sweets so much. They are like little children. It is important to treat them exactly like children. Do not show aggression, fear, or distrust towards them, and then they will answer you in kind. They really feel a person, his location.

If a person comes to the beekeeper with aggressive intentions or simply with hidden anger in his Soul, the bees may react to this and suddenly attack him. This is how they protect their owner and his family from aggression. Even if a person is not really in danger, they see it in their energy.

I also want to tell you that I witnessed how in Ancient Rus', even before the birth of Christ, in every settlement there were people who surrounded these settlements with apiaries made of bee logs. When attacked by enemies who were much stronger than these Proto-Slavs, and the Slavs could not cope with the Roman soldiers, their swords, spears and protective iron armor with their weapons, they had one way out - to go out onto the street of the settlement where the attack happened and release from each apiaries of 1000 bees.

Usually children or teenagers released bees with pure intentions, so that they themselves would not be attacked by bees, they sprinkled themselves with powder from flower pollen. This told the bees that they were theirs. And the aggressive invaders smelling like horse sweat irritated the bees. They emitted black thoughts and became the target of attack by at least 10,000 bees, and the army of legionnaires was powerless in front of them. No spears or swords helped. They fled in disgrace without causing any damage to this settlement.

Alla: Interesting.

Irina: He just showed me the image.

49:56 Protection against ticks. Actions to take when bitten by a tick. Borreliosis, encephalitis.

Alla: Can I ask one more small question? Beekeepers are often bitten by mites because we are often in the forest in the grass and catch them. They are dangerous. How can we protect ourselves from ticks?

Irina: Before going out into the forest, I would advise treating your clothes with a solution of eucalyptus, lemon or clove oil. He will scare them away. And dress in light-colored clothing, where the dark tick will be visible. If you find him attacking, don't pull him away.

Alla: Twist it out?

Irina: You can seal him with a plaster, blocking his airways, which will cause him to get out on his own. You can block his oxygen with polyethylene and a bandage on top. After a few minutes it will come out on its own because air will not penetrate. Unscrewing it can break it. Because he has a rather delicate proboscis. And if you have low immunity, inflammation is possible.

Alla: Yes, this often happens.

Irina: You just need to cut off his breathing. Then he will be forced to stop feeding, will begin to move, and you will feel that he is crawling. Open it and take it out.

Alla: If there is an encephalitis tick, then it will infect.

Irina: There are vaccinations for this.

Alla: Everything is clear.

Irina: There are vaccinations against borreliosis.

Alla: I don't know, I haven't heard. My friend in Germany has been treated for borreliosis for a very long time.

Irina: For tick-borne encephalitis. These are viral diseases. And there have been some developments of vaccines against borreliosis, but I don't know now. MidgasKaus says that in epidemic areas where you can get something from ticks, it is, of course, better to get vaccinated. Especially for children who love to walk in nature and lie in the grass.

Alla: I asked the sanitary service. They told me that there are no vaccinations.

Irina: In Russia there are vaccinations against encephalitis. Can be done as desired. In general, they are required in areas where there is a high prevalence of ticks. There are vaccinations for pets: dogs and cats. But diseases that are transmitted to dogs and cats are safe for people.

Borreliosis and tick-borne encephalitis are dangerous for people. It is important to increase immunity and find out the spiritual causes of the disease: why this particular tick found you.

Alla: If this tick was sent, then the person deserved it. Probably so?

Irina: He attracted this event to himself with his thoughts. This infection is the dissolution of his cells. This means that he has such thoughts and such blocks at the mental level that corrode and dissolve him. He does not accept something from the world around him.

Alla: Thank you!

Irina: MidgasKaus, Akhrius and Savvatiy thank you all for your attention and desire to learn more about such wonderful insects. They also thank you, Alla, for interesting questions.

Alla: I thank them too. Thanks a lot! I learned a lot of new things. Thanks a lot!

#268 Hyperactive children. Attention deficit disorder. How to help a child? Advice for parents.

https://blog.cassiopeia.center/giperaktivnye-deti-sindrom-deficita-vnimaniya
https://www.youtube.com/watch?v=qr4GqA2VhpA

00:22 Hyperactivity. Causes of hyperactivity.

Sofia : Children are very often hyperactive, and they are prescribed various medications that inhibit their activity. But at the same time, most likely, mental development is inhibited, and intoxication of the entire body and brain occurs. How can you help such children? Do they need pharmaceutical help? How else can you influence them to help?

Irina : Hyperactivity manifests itself in distraction. You can help without pharmaceutical methods. To do this, you need to find the cause of hyperactivity. Hyperactivity is the desire of the Spirit, embodied in a child, to attract attention. Parents need to find out through their Higher Self what emotion the child lacks, what he wants to convey through his activity, but is not yet able to express in words, and give him this emotion. This is the first point.

Perhaps he is afraid of something, lacks tenderness, cannot express it. To attract the attention of his parents, he does things that earn him attention. An option is possible when he wants to convey some information, for example, from the Spiritual World, but he does not succeed due to insufficient development of the speech apparatus.

02:34 Help for hyperactive children.

How to help a child? Firstly, do not limit his activity to violent methods, but find useful uses for it. It is very useful for such children to be in nature and communicate with animals. It is useful to direct their energy to helping adults with some simple actions. Typically, these children learn motor skills very well and quickly. It is easier for them than other children to do something with their hands if they are taught and shown the action once or twice, for example, planting seedlings.

Due to hyperactivity, the child has hyperactive attention. It may not last long. If you show him several times, he will remember faster, he will develop motor memory.

Due to the rapid manifestation of the energy of the Spirit in the child, the speed of thought, the speed of emotions, and body movements are fast and dexterous, correctly fitting into space. He has no awkwardness or insecurity. If he has been hyperactive since childhood, he can move very precisely and save his movements to accomplish a goal.

If you show and tell that every seedling bush is a living creature that wants its root to be planted in the ground and watered with water, and it will produce a tasty fruit. Show them, tell them, call them by name. You will be surprised: he will learn to do this. If you give him a few bushes, he will plant faster than an adult. While you plant two, he will plant five. He will do it quickly and won't break anything, if you explain to him that you don't need to press on the plant, it will break and die.

If something hurts, don't scold him, he's not used to doing that yet. Stroke the bush, say: "Now we will not be able to get fruit from it, we need to bury it, bury it in the ground and wish this plant Light." Explain in accessible language that it will not grow so that he understands.

Second point. What can you do if you don't have nature or land? The child will quickly get bored of playing with artificial toys, drawing, and sculpting. These classes are not interesting. Such children have a good sense of nature and plasmoid worlds. They gain energy and joy, and become calmer.

At home, in a city apartment, you can show how you cook, wash dishes, do cleaning, accompanying this with interesting stories. You do it so that people come and rejoice. That is, get him interested in something, and he will do it faster than you. He has an innate energy that far exceeds that of an adult because he is a growing organism. The Higher Self directs a greater flow of spiritual energy to the cells of his body to enhance metabolism in the cells, for growth.

Sofia : Thank you, thank you.

#269 Reasons for overeating. Food addiction, eating disorders, nutrition, psychology.

https://blog.cassiopeia.center/prichiny-pereedaniya-zavisimost-ot-edy-rasstrojstv
https://www.youtube.com/watch?v=FJLFJ82mp5U

0:21 Feeling hungry. Feeling full. Causes of overeating.

Irina: Why do some people eat more than others?

Maria : Is there such a gene, of course. If this is not the case, how can it be explained?

Irina : No, there is no such gene. Everyone has family and tribal differences in how food is processed, but they are insignificant. The amount of food largely depends on family traditions, firstly. Secondly, on the character of the person himself, on the psychotype of his personality, on his physique. There are many factors on which the quantity depends. Even from the quality of food.

If, for example, he does not receive some of the vitamins or minerals he needs from some type of food, his body will signal to him that he is hungry. Even if he has eaten a lot of other food, he will absorb it, this happens. You need to look at the microelement composition, what imbalance there is.

Perhaps it contains parasitic life forms, the growth and development of which also require vitamins and microelements. For example, vitamin B12 is used by various helminths and requires a lot of food to replenish it.

Perhaps a person is experiencing some kind of stress, and in order to drown out his instinct of self-preservation, he eats, because in the subconscious the feeling of satiety is associated with calmness, since even after birth, immediately after the child has eaten his mother's milk, he is put to bed sleep, and he is loved and protected. It can be different.

Maria : Okay, thank you.

Irina : The feeling of satiety is usually associated with a feeling of calm. This is already on a subconscious level from deep childhood. Absolutely all people have it, and, as far as I understand, all mammals have it. Test the physical body, perhaps it is missing something.

02:40 Food diary. Thirst is like a feeling of hunger. Sweets.

Irina: If you eat too much of something, firstly, you need to write it down. Without changing anything in your diet, just start recording not only food, but also the amount of liquid, for example. You must remember to do this for at least 14 days. If you drink or eat something, whatever it is, without changing your eating habits, just observe. You forget a lot.

Maria : Yes, it is.

Irina : Then, when you read this, you will see those products that are repeated or which, on the contrary, are not enough or do not exist at all. You want them, but for some reason you replace one with another. This happens, they are not all replaceable.

It happens that a person (I'm talking about fluid deficiency again) who experiences (thirst) for many days, he no longer feels thirst as thirst, he feels it as hunger. Therefore, when a person feels that he needs to drink water, and he eats dense food, which makes him want to drink even more in order to dilute it, so that it is digested, and he again understands this as hunger. This point needs to be analyzed further.

The help of a competent doctor will not hurt here. Once you ignore thirst and drink, then it turns into a feeling of hunger in a person's brain, that's how he feels. A person confuses them, because if you feel like you want to eat, drink water first and after 15 minutes ask yourself again.

Maria : Okay, thank you.

Irina : Only unsweetened water. Sweet water may well replace the intake of any food, but it will not contain many essential vitamins and microelements. Many people eat a lot of sweets, and they get a lot of energy from this food, but at the same time they do not get the necessary substances that are found in other foods. The body, experiencing an acute deficiency of these substances, essential amino acids, microelements, again signals the body that it needs food, although it has received a lot of energy. Another possible imbalance is this.

Broadcast May 15, 2021.

#270 Answers to questions and the start of a new project “Women’s Practices”.

https://blog.cassiopeia.center/otvety-na-voprosy-i-start-novogo-proekta-zhenskie
https://www.youtube.com/watch?v=wszq_v0O_84

0:05 Introduction of meeting participants.

Maxim : Dear friends, hello everyone!

Irina : Greetings everyone, hello!

Maxim : First question, as always, how can you hear us?

Irina : How can you hear us, please tell me?

Maxim : Nobody hears? Great! Everything can be heard perfectly. Irisha, who is with us on the live broadcast today?

Irina : Hello, dear friends! Today with us are our curators LiShioni from the planet Shimor and MidgasKaus from the planet Esler, who are already well known to you, and, of course, the head of our project Maxim.

Maxim : I'm here. Guys, we had a wonderful retreat in Belarus.

Irina : Yes.

Maxim : I want to thank all the participants who completed this retreat, received certificates, and if someone appears on this live broadcast, please give feedback in our chat - whether you liked the retreat or not. Maybe we need to improve something in the retreats, so we are waiting for your feedback.

01:44 Announcement of the new project “Women’s Practices”.

Maxim : Plus, a very interesting women's project has appeared. We have graduated from a wonderful contactee who will lead "Women's Practices", because there was a huge demand for them.

Now girls can attend the chat and "Women's practices", which will raise a huge amount of new feminine energy, structure them, and there will be many, many interesting things in this chat with these practices. The link is below the video in the description, there is both a news channel and a chat for practice.

Join this chat, write to us. Twice a week we plan to conduct "Women's practices" aimed at increasing and qualitative changes in feminine energies.

02:43 Intergalactic news about the unification of the Galactic Federation of Light and the Interstellar Union into one organization - the United Community of Civilizations of the Milky Way Galaxy. About the military conflict in Israel.

Maxim : As always, let's start with the news.

Irina : Moreover, we have news (MidgasKaus says) related simultaneously to the activities of the Interstellar Union in the Galaxy, as well as to the Galactic Federation of Light and recent events on Earth. For the first time in the history of the Galactic Federation of Light, a few days ago a decision was made to unite the Galactic Federation of Light and the Interstellar Union into one organization.

Maxim : What are you talking about! I didn't know about this.

Irina : Two days ago a decision was made to merge. The unification itself, so that all structures come together, will take another 5 years. This new community will be called the United Community of Civilizations of the Milky Way Galaxy.

Maxim : Have we come to the point where the Galactic Federation of Light is merging with the Interstellar Union?

Irina : Yes, they made a decision at a joint meeting of the Council. Raom Tiyan and Mirakh Kaunt from Burkhad asked to convey greetings to you, and also the inhabitants of Tumesout. The Interstellar Union and the Galactic Federation of Light have united. This happened, including as an example to you, earthlings.

We are aware of the recent events in Israel and call on the political military leadership of the warring powers to show spiritual intelligence, compassion for the victims and joint efforts to find a common solution in the light of God. It is always possible, since this conflict on the territory of such a state, where there are many places of power, leads to an increase in negativity on the entire planet. Those who decide to use weapons greatly lower their spiritual vibrations.

Please, if you or one of your loved ones hears me now, through a contactee, before you decide to press a button that can destroy the lives of other people, imagine that it was your child who did not wait for his father from the battlefield, and how he will live. Make decisions in the light of Divine love: in His light everything becomes clear, true and invincible.

Maxim : Yes, I now feel like I'm in a real series, like "Star Trek," when some actions and associations take place. Guys, I'll be honest, this is interesting news for me, and I'm very glad that such harmonizations and unifications are taking place.

I would, of course, like for the same harmony to someday occur on our planet; so that religious egregors learn to accept and understand each other, so that people of different faiths, different religious beliefs learn to unite in a single impulse to achieve high vibrations for planet Earth. We will continue to see what happens. I thank MidgasCaus for the very important and interesting news for me.

Irina : Yes, we had a lot of contact with the Galactic Federation of Light during your past retreats, when representatives of one of the divisions of the Galactic Federation of Light - the Galactic Health Service - came in subtle bodies for the improvement and spiritual healing of people to "Cosmohealing" sessions.

Representatives of the Interstellar Union were also there, and even then a decision was made about greater integration of these societies with each other. In the end, this led to a result that would affect the Galactic Federation of Light, the Interstellar Union, and, undoubtedly, contacts with earthlings.

Maxim : It turns out that previously the Interstellar Union consisted only of humanoid, dense-material civilizations. Now the new one, let's call it a confederation, will consist of dense-material and subtle-material beings. I understand correctly?

Irina : There will be a single Galactic Commonwealth of the Milky Way. No longer a union, like the community or commonwealth of the Milky Way Galaxy.

08:36 Where is Jesus Christ now?

Maxim : Guys, I look at the questions: "Where is Christ? What is he doing now?" In fact, in Belarus we had a third conference with the phantom of Christ, where people asked personal questions to him and received, accordingly, personal answers. Really, where is he now?

Irina : He said at the conference, I remember that he had already returned to Burkhad in a physical body. In response to one of the questions, he said: "I have already returned to my island." We did not specify when this happened.

Maxim : On na Burkhade?

Irina : When he spoke to us, he said: “I returned to the planet Burkhad.”

Maxim : Irina, question: “Where is Goldstein?” Goldstein took a vacation after dancing at a retreat in Belarus.

09:51 Jesus is the Firstborn Son of God. Prophet. Allah is the Creator God.

Maxim : Are Jesus and Allah the same thing?

Irina : No. Jesus is not Allah, these are different beings, different entities. The fact is that God, the creator of the Universe, was named after Allah. The word itself, naturally, is much older than the emerging religion of Islam. It denoted the creator God in various religious cults before the emergence of this religion.

Jesus is the Firstborn Son of God, who came to Earth as Jesus Christ in Israel 2000 years ago. For Islam, Jesus is a prophet. A prophet is not one who speaks prophecies, but one who lives a righteous life, like a righteous person.

Maxim : It’s clear, Allah is the Most High God, and according to them, Jesus is a prophet.

Irina : Allah, according to the teachings of Islam, did not incarnate. He cannot incarnate because he is Spirit and fills the entire Universe. Therefore, Allah himself cannot incarnate, just as in Christianity, for example, it is believed that God the Father did not incarnate, but only God the Son.

11:32 Shape of the Earth for different civilizations.

Maxim : What shape is the Earth?

Irina : Really, they wrote it?

Maxim : Let’s repeat ourselves, people didn’t watch us before, didn’t study us.

Irina : MidgasKaus says: “If you are a Spirit embodied in a humanoid body type in third density, for you the Earth has a shape close to a sphere.

If you are embodied in some type of plasmoid life form, for you the Earth looks like a plane.

If you are incarnated into another life form, for you the Earth may have the shape of a

multifaceted crystal, for example. If embodied in the third type of plasmoid civilization, then the Earth for you may look like flashes of light."

Maxim : It all depends on what civilization we are embodied in, and different civilizations can see our Earth differently. For us, for humanoids, it is round, right?

Irina : Yes.

12:44 Underground rumble.

Maxim : Thank you. Our interstellar friends know nothing about the earth's roar? Nowadays, many people hear a rumble in cities, as if pipes are making noise. In cities they hear some kind of rumble coming from the ground. Don't they know anything about this?

Irina : Are you digging bases, or what? "No," he says, "we don't dig under cities, we already have enough space."

The fact is that at the moment of the quantum transition, as you know, all quanta increase the level of their vibrations. They can increase from 2 to 50 times every day. They increase the level of their vibrations every day, and this causes an acceleration of vibrations on the material level in atoms and molecules, and this can manifest itself in the form of sound.

The surface layers of the earth's crust can produce such a sound because the vibrations increase somewhat unevenly. Due to its density, the vibrations of the earth's crust increase more slowly than, for example, the vibrations of the atoms that make up the gases that make up the atmosphere. Therefore, there may be such a sound as a sign of a quantum transition.

Maxim: Thank you, Mid.

Once again I want to remind everyone that today at 21:30 after our broadcast a new project "Women's Practices" will be launched. The link to this project is below this video. As soon as the video ends or now, you can go to the Telegram chat, subscribe, and it will clearly say when, at what time, where to go in order to get to these women's practices.

14:55 Hitler's meetings with aliens.

Maxim : Another question: "Did Hitler meet with aliens?"

Irina : According to our information, he met with them 2 times, he had a contactee with the planet Tashig. He met with him in his physical body, they were taken to the base. This was before the start of the Second World War, that is, when he was just interested in contacting. They met with him 2 times, and he also wanted to contact them. The first time they wanted to

install a chip on him, but it didn't match the vibrations. The second time he was with the contactee, it was 3 months after the first contact, and he no longer wanted to contact, but simply accompanied the contactee.

16:03 Could Earth join the Interstellar Union?

Maxim : As an observer, could Earth join the Interstellar Union?

Irina : Observer? We do not have the concept of "as an observer." We have a full-fledged, full-fledged member of the Interstellar Union.

Now it is called the Interstellar Union, but no matter what this organization is called, admission to it will still take place according to the same rules. Perhaps some rules will change after the accession of the Galactic Federation of Light, but there is a rule that will remain unchanged - this is to accept civilizations only after they have eliminated low-vibration aggressive energies from the noosphere of their world.

A sign of the elimination of these aggressive energies from the noosphere will be the absence of organized military action for five Earth years, as well as the adoption of a law in all states of the Earth abolishing the death penalty, and the adoption of a law in all states of the Earth on respect for human life from the moment of its conception.

These are the main postulates about the recognition of importance - the incarnation of any intelligent Spirit until the moment of its natural exit from incarnation. These laws at the state level of all states will indicate a sufficient degree of awareness and the number of vibrations of love in your hearts, in the hearts of the majority of the population, which will say that this is enough to join us.

18:05 The purpose of writing the book "The Revelation of John the Theologian." Calculation of spiritual level. Tree of life.

Maxim : Thank you. What was the purpose of writing the book "The Revelation of John the Evangelist"?

Irina : LiShioni says that he asked Archangel Michael, Archangel Raphael, the leaders of the Christian egregor, and they said that the main purpose of transferring this information to John the Theologian was a warning, that is, to warn him and through him all Christian believers that if people on Earth will move away from God, from the Light, from love...

To leave God - for them it meant to leave love, from high vibrations to low ones. If the majority of the population did this, it would lead to a catastrophe, which is described as wars, epidemics, destruction, earthquakes, and so on. All this will happen if people sow the seeds of destruction around themselves.

But before they are sown, the plant of this anger of destruction and rage, resentment, must first grow in the Soul of the person himself. Since this was a warning, one of many possible futures was shown if all people cultivate this evil within themselves.

Maxim : I see. There are questions about the spiritual level. In order to calculate your spiritual level, you must indicate your date of birth and the name you were given at birth. Plus, you can go under our video and see links to all our projects.

We have very interesting new projects, such as “Tree of Life”. We now have a complete calculation, we have finalized this project, and now you can get all the information along with all the transcripts and explanations.

Plus there is the “Cassiopeia color” project, where you can also get very interesting information about you by providing your date of birth and name.

In general, be sure to look at the links below to all our projects, social networks, where there is a huge amount of information that you will need in order to study us and understand us.

20:47 How does water stay on a round Earth? Gravitational energy.

Irina : What a good question...

Maxim : Which one exactly?

Irina : If the earth is round, then how does water stay on the Earth?

Maxim : Since such questions are asked, we must definitely tell them.

Irina : Firstly, due to the gravity of the Earth. Our Earth has a very large mass and density and, secondly, due to the centrifugal force that occurs when rotating around the Sun and its axis.

Please take a bucket of about 5 liters, pour a little more than half of water into it and begin to quickly rotate this bucket from top to bottom. This way you will see that when it is at the top it will not spill out. The centrifugal force will attract it to the bottom and walls of the bucket, because there is gravitational energy in the world, which acts in such a way that all planets, galaxies and stars are held in their places, and also all small parts are held on the surface of the planets, starting from your body and ending with the oceans.

22:16 Processes that occur during a kiss. Transferring energy from the fifth chakra.

Maxim : The question was: “Does Irina kiss passionately?” and “What process occurs during a

kiss?" I see you kiss everywhere on retreats. What processes occur during a kiss on the energetic and physical levels?

Irina : I'm talking specifically about centrifugal force, I'm not confusing anything. Centrifugal is the one that holds.

Maxim : Irina, don't you even remember the question?

Irina : What do you mean, what happens during a kiss?

Maxim : What, perhaps, chemical elements are released, some processes take place at the energy level, some kind of transfer and exchange of energy occurs.

Irina : MidgasKaus says that in ancient times this gesture - touching any part of the body with the lips meant the transfer of energy from the fifth chakra, i.e. from the chakra of creativity and plus breathing healing. This was healing for your child, for a loved one - the transfer of love through the lips. For example, a kiss on the mouth or on the lips indicated that a person, with his creative energy, approves of this person's words, and so on.

If there was a kiss on the forehead, it indicated that the person approves of the words, recognizes them as true, the mind of this person. Naturally, this is also a transfer of energy.

Maxim : Regarding the questionnaires with questions for admission to study: Kuznetsova is doing this for us. She is a specialist in recruitment for training, all the information is on our website - cassiopeia.center, a link to the site is also under the video description. Therefore, you can go to the website, look, search, there is a form there that you fill out and send to us.

We will also have a men's program, but a little later. We are going to do it, but for now we started with a women's program, women's practices, because a large number of requests come from women. 90% in general in the project are feminine energies. Men react very hard to this topic, and, in general, men are more material and less spiritual.

I personally know from myself that before, when I was a materialist, I always demanded material evidence. Until I was given any evidence, I didn't believe in anything, so I clearly understand why not such a large number of men are in the project, believe and trust it.

25:47 Age of planet Earth.

Maxim : How old is our planet?

Irin a: MidgasKaus says: "According to the Interstellar Union, your planet was formed about 8.5 billion years ago."

26:27 Question about the AllatRa project.

Maxim : You are asking about AllatRa. We do not participate in the AllatRa project; we do not know what they were created for. We did not communicate with them, together we tried to find points of mutual understanding in the form in which we could do this.

I certainly have some questions that I haven't yet answered about this project. I hope that someday we will meet with their leader or with those people who can answer us those questions that slightly do not comply with the rules of the Interstellar Union, especially in providing evidence of movement on ships and being in the earthly bodies of the Anunnaki.

The idea of the project that they are positioning is good, but, of course, there are questions, and I would be happy to meet with the leaders and talk about what they are positioning.

27:34 Contacts between Earth governments and aliens.

Maxim : Which Governments are in contact and have cooperation agreements with extraterrestrials, and is it possible to talk about this?

Irina : MidgasKaus says: “LiShioni and I are scientists who fly to Earth and are allowed to contact you by the Interstellar Union Contacts Commission. When we studied at our educational institutions and went to work on the contact commission, we were told that contact with the Governments of countries not included in the Interstellar Union and somehow influencing policy at the treaty level is prohibited, because this is interference in affairs of civilization.

If there are contacts with people included in these Governments, then only at the contact level. If they are vibrationally suitable, then they are in contact with some civilization of the Interstellar Union or the Galactic Federation of Light, but this is not an official agreement, because official agreements cannot be concluded with a person until the Earth is part of the Interstellar Union. These treaties will not be valid, and for them to be valid, general laws must be adopted on Earth and in the Interstellar Union. They are not accepted.

Therefore, if anyone contacts from the Government, it is only as a private person. Who exactly is in contact, we do not have the right to disclose the names and surnames of contactees to other contactees without their desire, their curators and the contact commission.”

29:35 About the resumption of physical contacts with aliens. About the upcoming meeting with Mitya and about Captain Bill.

Maxim: You ask: “When will physical contacts resume?” Physical contacts will resume, we have very interesting news: we have agreed with representatives of the Interstellar Union and representatives of the planet Mantuk to meet on the Ashtar ship with Miti. Irina will personally meet Ashtar, whom she has not seen, and will personally ask Mitya questions, everything

related to the transfer of the information to Captain Bill that he conveys.

Irina : Yes, Kirchiton came to me in mental contact. We have been making requests for a long time about my contact with Miti, who is known to be in contact with Captain Bill. Ashtar told me that he knew him, this information was already on our channel.

Moreover, Ashtar told me in the Astral that Mitya's contactee is more than one Captain Bill, and it's very strange why Captain Bill doesn't know this.

There was such a conversation, my conversation with Ashtar is on our channel. I received requests from many people to go to meet Mitya for the next physical contact.

Maxim : "Slippers... Who are you laughing at, that you will be dating Ashtar." People's slippers are laughing. Never seen it?

Irina : I am very glad that I raised your vibrations.

Maxim : And your slippers.

Irina : It is the right of any person to believe or not to believe. What can I say? If a person thinks that I am flooding, then that is his full right.

Maxim : There was a request regarding contact with Mitya, because a large amount of contradictory information is transmitted by Captain Bill, in contrast to the information transmitted by representatives of the Interstellar Union. It took us a long time to coordinate this meeting, and finally it was agreed upon for us.

Irina : Please, if you find it funny, laugh. The fact is that if you think that I'm deceiving or uploading something, that's your complete right.

Maxim : If you believe, you can simply leave this channel and continue to develop other channels.

Irina : It's up to you to choose whether to believe me or not, just like every person, but there is one "but": I have the right to believe my curators in what I see, where I fly, and so on.

I have exactly the same right as you. You and I are free people, we live in a free state, and no one can forbid another to believe or not believe. Therefore, please do not believe it - this is your complete right, especially since I will also tell you: "If your heart tells you that this is not so, follow your heart, please."

Maxim : Under no circumstances should you believe us, listen, watch us and be upset about this.

Irina : If this upsets you, it's better to really switch to channels that will bring you joy. Why would you waste time of your life on something that annoys you? This, of course, would be very strange. In any case, the matter is yours.

We are now talking about Mitya: he agreed, but he said that he could not meet with the contactee of the Interstellar Union without the permission of his Government of Mantuk, which is located in the Andromeda Galaxy, he sent a request there. He said that he was waiting for an answer, and just a few days ago the answer came to the Interstellar Union. They immediately informed my curator Kirchiton, who would directly lead me to a meeting with Mitya.

Kirchiton had already met with Mitya, talked and said that Mitya was ready to give me half an hour so that I could ask questions that interested me and my listeners, followers, as he called it. I'm ready to do this. I will soon have physical contact, and everything that will be there, everything that I will ask him and everything that he will answer, I will be ready to tell you as it is.

Maxim : Vladislav, study the materials, photographs. Providing any evidence in any form is prohibited, so it will not be possible to photograph Kirchiton.

Once again I want to remind everyone that at 21:30 after this live broadcast we will begin a new project "Women's Practices".

Irina: He asked to clarify where to meet. No, we will not meet on the planet Miti. His planet is in another Galaxy, they won't take me there. We will meet on a ship near Ashtar, which flies at a distance of approximately 30 astronomical units from the solar system.

35:06 Fire in Jerusalem.

Maxim : Is the fire really starting in Jerusalem?

Irina : Yes, from egregor.

Maxim : All this is reality. Indeed, this is a miracle for us earthlings, because we do not understand how it works.

35:18 Reasons for contact with Mitya.

Maxim : Who is Captain Benamity?

Irina : There is such a contactor.

Maxim : Why did we make this contact with Mitya personally? Because Captain Bill refused to contact us, and we were unable to ask questions personally to him or his representatives, so we decided not to get into trouble right away.

As a result, when they refused us and said that they would not communicate with us about this, we decided to personally communicate with him about the contradictions that arise from the information provided by the Interstellar Union and from the information provided by contactees or people who translate this contact into Russian.

36:00 Nefertiti.

Maxim : Where did Nefertiti come from?

Irina : She was an earthly woman who was born to her parents and was a ruler. He now shows me that she was a priestess, but at the same time the ruler of Egypt about 4000 years before the birth of Christ, that is, 6000 years ago.

She contacted, like all the highest Egyptian nobility of that time, came on ships to the Tumesoutians, to the Burkhadians, to the Eslerites when they arrived. At that time, it was allowed to interfere with the human body and heal his body. She had some form of tuberculosis and they cured her.

37:05 Fathers of Christ: physical and spiritual.

Maxim : Here the man is confused: we say that the father of Jesus Christ was from Burkhad, and at the same time, we say that the father of Jesus Christ is God. The man is confused, who is the father of Jesus Christ?

Irina : He had two fathers: one physical, the other Spiritual, just like yours. You also have two fathers: you have a physical father who gave birth to you as a body. When you live in the material world, you are a body and a Spirit at the same time, that is, you have your body and your Spirit, and you are some such community, the essence of these energies. Your father gave birth to your body, he is your father in body, and God gave birth to your Spirit, so you have two fathers - Spiritual and physical.

37:55 The flight speed of an airplane does not depend on the speed of rotation of the Earth. Elon Musk and V.V. Putin contactees?

Maxim : If the Earth rotates at a speed of one and a half thousand kilometers per hour, why does the plane arrive at the same time from east to west and from west to east? Because

there is the gravity of the Earth and the density of the atmosphere. The atmosphere spins along with the Earth, and planes fly through this atmosphere, so don't bother yourself and don't invent unnecessary circumstances for yourself.

Irina : Why should they fly differently?

Maxim : They believe that if the Earth is spinning, then the atmosphere remains in place.

Irina : The air density is not so high that it could hold up the plane. It rotates, but air is not water, it is much less dense, therefore, even if the plane flies against the rotation of the air, it still flies in the same time. The plane is denser, it has more aerodynamic thrust to fly, so there is no noticeable difference there.

Maxim : Who is Elon Musk? He is a billionaire and philanthropist. He is an earthly man, just like you. The only thing is that we didn't watch Elon Musk because we didn't get permission to see what Spirit was embodied in him.

Irina : Yes.

Maxim: Vladimir Vladimirovich contactee?

Irina : You see, dear friends, they still won't answer the question of whether he is a contactee or not. Without that person's permission, it is considered unethical. He must ask such questions himself.

Maxim : Therefore, ask Vladimir Vladimirovich these questions.

Irina: So ask: "Are you a contactee?"

Maxim : Well, guys, 1670 people. If possible, like and support us so that we can be seen and heard, because your likes will help us further promote the project and so that more people know about it.

Once again I would like to remind you that immediately after this broadcast at 21:30 a new project "Women's Practices" will be launched. Try it, come to this project, take a look, because it will be led by a wonderful contactee who was trained at the Cassiopeia school. The energies are simply colossal. Especially the presentation of information, the structure that will be transmitted. So at 21:30, the link is below this video.

40:49 Where did God come from?

Maxim : So, I'll stop, let there be any question. If God is the root cause of everything, then where did God himself come from? Does it have some kind of beginning?

Irina : No, God has no beginning: he existed, exists and will always exist. It is also called "gratuitously causal." It is the only cause of all things that had no cause. This is God, because he is eternal, and there was no time or state outside of time whenever he existed.

41:22 Burial of Lenin.

Maxim : Lenin wants to be buried?

Irina : You need to ask him that. Please do the séance yourself and ask. Then tell us.

41:35 Reiki. Construction of St. Petersburg.

Maxim : What are reiki? We have already answered this question several times. These are plasmoid civilizations that transmit.

Who built St. Petersburg? Petersburg was built by many.

Irina : Many tribes built St. Petersburg. Long ago, in the pre-Christian period, there were tribes on this site who built many small fortresses on the site of modern St. Petersburg. They are now showing me a village surrounded by a high wooden wall. Many people built it, it was destroyed many times, and then other cities were built in its place.

42:27 Announcement of the project "Healing through the Higher Self."

Maxim : Guys, I completely forgot, we still have a project, because not everyone can immediately study to become a contactee. We have opened a health project "Healing through the Higher Self", where you will be treated by a specialist using new equipment, and Ilya as a psychologist, contactee, and Irina will lead you there for one day. This is a 7-day course, you can sign up for it by going to our website and finding "Healing Course through the Higher Self."

In addition to the contactee course, we have a course on "Healing through the Higher Self", and also all on a donation basis, on the condition of payment according to the heart. This is the main task and essence of the project - to transfer all spiritual knowledge from a commercial structure from the payment assigned by contactees to payment according to the heart, that is, for the payment that the person himself is able to help and support.

43:30 Incarnations by acquaintance, from one level.

Maxim : Can people from the same spiritual level, having met in the Spiritual World, agree to incarnate together?

Irina : They can, of course, not only from one spiritual level. A group of Spirits can agree on some business on Earth or on another planet, or on several planets in general, and incarnate.

Maxim : Well, guys, we literally have 5-10 minutes left, because we still need to prepare a platform for the new project “Women’s Practices”, which will be at 21:30.

While studying online is not possible, for now studying is offline, and if you want to study to become a contactee, then it can only be offline.

Online we will have various courses for advanced training and training. Plus, everything that will happen in our Center, new projects, courses, any opportunities for you to study, complete your studies, gain knowledge, you can find on our website cassiopeia.center, so see the link to the site, it is below the video. Dig deeper and you will see links to all the projects and, accordingly, to the site where you can find all the information about the projects, videos and much more.

“Women’s practices” will not be recorded, only online. The Cassiopeia Project does not take or maintain records; it is online only.

45:11 About the Kazan shooter.

Irina : There were many questions about the Kazan shooter.

Maxim : Can we answer something about the Kazan shooter?

Irina : There was such an incident in Kazan. When this news was on the Internet, I already showed my curators what happened, and I read it to them. Naturally, without the will of this person, they will not look at what is there, who is near him. I showed them a video of the interrogation of this man, he was only 19 years old, who shot more than 20 people in almost 10 minutes.

MidgasKaus said that, naturally, he would not diagnose him without this person’s permission, but first said that there were low-vibration plasmoid entities next to him, and there was also the energy of disembodied Spirits from lower levels, that is, demons.

But how it all happened, why he came into contact with them, this can only be found out if he wants. There was a certain influence on him, but why it became possible, why he allowed it, how he attracted it, this can only be with his permission.

46:40 How Irina felt during her contact with Christ. The power of the energy of Jesus Christ.

Maxim : Irina, how did you feel after your contact with Christ?

Irina : I felt great. During contact with Christ, I felt how the Light dissolved me, I dissolved in it. And at the same time I felt that I was answering the question, and in front of me were the images that he was showing me, and while I was translating them into words, I immediately felt that he was helping me speak them. That is, I speak and listen to myself from the outside, I hear what I say.

Maxim : I was sitting next to you at the third conference, sweating, sometimes lost in prostration, my 3D reality turned into 4D along with images, with thought packages. This is a very interesting energy.

Irina : And me too, when he spoke at all three conferences about the events of his life, I found myself not in this room, but there, what he was talking about. For example, when he talked about how the Apostle Peter walked on water, I myself found myself in this boat, I didn't see anything around me, I just spoke. I was still thinking: "Who will listen to me here now?" - because I was already there. I then asked him mentally: "Why do I have such a vision?" He said: "Because the thought forms of even my phantom have such a vibration that transfers consciousness into this world, changes it."

48:29 Physical contact with Kirchiton. Higher Self

Maxim : Submit an application to organize physical contact for me with Kirchiton or with whom I match in terms of vibrations, according to all the parameters for physical contact.

Irina : Such issues need to be resolved through your Higher Self, firstly. Secondly, we do not submit such applications. You yourself submit an application through your Higher Self. If it approves this contact, then you are a vibrational match. To do this, you need to turn to your Higher Self yourself; if you have such vibrations, this will not be difficult for you at all. Or, if you doubt anything, through any specialist at the Cassiopeia Center with whom you will be scheduled for an appointment.

Maxim : Make an appointment with specialists, phone numbers are in our chats and on the website. You can go to the website and find everything there.

49:21 Is it a sin to put a dog to sleep?

Maxim: Is it a sin to put a dog to sleep? The man writes for the tenth time.

Irina : No. Putting a dog to sleep is not a sin in itself, but what is the motive? If you put a dog

to sleep in order to watch it slowly die because of your cruelty, for example, because you hate someone, take your anger out on it, then this is not a sin.

What is sin? If it increases your cruelty, then it is a sin. If you put her to sleep because she is sick, or because you, for example, can no longer take care of her, then this is not a sin.

It would be a sin if you simply throw her away somewhere where she will remain, suffer, and turn into a wild dog. Perhaps she will be hit by a car there and so on. That is, if she is left without your care, it will be a sin. If you do this for objective reasons, then no, it is not a sin.

50:39 Reasons for the lack of communication with the Higher Self. Night flights of objects over Kaliningrad.

Maxim : If two of your specialists have already tried to take me to the Higher Self, nothing worked in both cases. Why do you think?

Irina : So you have some kind of block, something is blocking you. Perhaps you don't believe yourself. Distrust and self-doubt greatly reduce sensitivity. Try making an appointment with me, if possible, or with any other specialist. Perhaps you are simply not expecting the kind of contact that is there.

The Higher Self always answers mentally, remember this. Since it is in the Spiritual World, it does not speak with voices. If you are waiting for a voice and don’t hear it, it may seem to you that there was no contact, or perhaps you are not concentrating enough and cannot catch the first thoughts that come, and you cannot say it, you are starting to come out of a state of relaxation .

Another third option is that you may not know how to relax at all, that is, something is stressing you out, you need to learn to relax.

I can give you one recommendation that will help you learn this and more easily get in touch with your Higher Self. For 21 days, do the practice of autogenic training for 30 minutes a day, preferably before bed. It’s better to start on the waxing Moon. The Moon is growing right now, this will enhance its effect. If you miss a day, start over. After 21 days, you will already enter a state of relaxation very easily, and it will be easy for you to hear your Higher Self.

Maxim : They write: there are a lot of things flying over Kaliningrad back and forth, at different speeds, I see them at night with binoculars, does anyone know? MidgasCaus, did you know, they fly back and forth over Kaliningrad, did you know?

Irina : At least they took it on video. Anything can be: planes, helicopters, drones, Chinese lanterns. There may, of course, be representatives of alien civilizations, but they will not do it so openly that they constantly fly. There's something different there.

53:08 Is it possible to repeat the path of Christ?

Maxim : Is it possible to repeat the path of Christ?

Irina : In what terms is “the path of Christ”? Physical?

Maxim : Of course, is it possible to repeat the path of Christ?

Irina : Which way? Where?

Maxim : Somewhere.

Irina : Where did he go? Spiritual path of Christ? Of course, it is possible to repeat, and we all, all Christians, all who believe in Christ as God, are called to repeat his path on a spiritual level, that is, to become his disciples.

His disciples are called to become like him, that is, to have the same feelings and thoughts as his. And his feelings and thoughts were all contained in his God the Father. He said so: “I and the Father are one.” This means that he completely felt like Love in any circumstances.

If you want to repeat the path of Christ at the level at which this is possible for your incarnation, you simply remain in a state of absolute unconditional Love in any circumstances in which you find yourself.

But, as Jesus Christ correctly noted, “it is always a cross.” He told his disciples: “Take up your cross and follow me.” Why did he say that? The cross is a symbol of his crucifixion. They crucified him for his love for the world. With this symbol, he emphasized that unconditional love for everyone without exception will give rise, although temporary suffering, but suffering for your body and for your Soul on this planet, because our planet is not yet so highly vibrational to accept such people: there will be corresponding consequences, it is necessary understand this.

55:06 Is it possible to load the Earth into an alien ship?

Maxim : Irina, last time we talked about a ship that is larger than our solar system. Is it possible to load our planet into this ship?

Irina : Do you want us to be taken to the Burkhada system? Perhaps, of course.

Maxim : I think that perhaps there is no point. Because if you take out one of the points of our Galaxy, you will destroy it all.

Irina : To place a planet in the hold of such a ship, it is necessary to create for it the conditions that it has in the solar system, for example, light, gravity, certain magnetic fields, and so on, otherwise life on it will die.

Purely theoretically, it is possible to do this with the energies and capabilities of the Interstellar Union, but, indeed, as Maxim said, there is simply no need for this, since if God the Creator put this planet in its place in the Solar System, then it should be there , and there is no need to move it somewhere else.

56:27 Is it necessary to be baptized when entering a church?

Maxim : Is it necessary to be baptized when entering a church? Does this make sense in everyday life? Is Jesus Baptized? A provocative question, by the way.

Irina : You know, whether you need to be baptized when entering church, or in everyday life, it's up to you to decide. What does it mean to cross yourself? Rebaptism is a testimony of your faith. The cross is in this case a symbol of Christianity. When you are baptized, you do two things: first, you do external things for the world, you show everyone that you are a Christian, namely an Orthodox Christian.

The second thing you do is by folding your fingers in a certain way and while thinking about Christ, that is, praying to him. For example, "Lord, have mercy" or some other prayer, mentally you direct through your fingertips the energy that comes to you through the Christian egregor channel, there are energy channels in your fingertips to activate the sixth, third energy center and the entire space, that is the fifth and fourth energy centers and, accordingly, to the channel of the hands through which this energy passes to our actions.

There are two goals here for you. The first goal is that it is important to show people around you that you are a Christian, and the second goal is that it is important for you to belong to this egregor and thus join it. Naturally, if you believe in it, then, of course, you need to do it, if not, it doesn't matter to you, then without faith there is no point in doing it.

58:35 How to cross yourself correctly - with two or three fingers? Is observance of rituals important?

Maxim : How to cross yourself correctly - with two or three fingers?

Irina : This also depends on the specific tradition to which you belong, because this way and that is actually correct. Those who were taught two will be two, those who are taught three will be three.

All these questions are secondary, just like, for example, lighting candles in a temple or something else. These are ritual questions. Certain rituals in certain religions should not hide the internal content of this religion from you, otherwise there will simply be no meaning in it.

59:30 Drawings in the margins.

Maxim : Last question: who makes drawings in the margins and why?

Irina: We asked a similar question. MidgasKaus and LiShioni remember this and said that these are mainly representatives of Tashiga, as well as Pleiadian civilizations, who, by sending automatic probes with a spherically directed magnetic field of a certain configuration, change the state of plants in the field in order for these patterns to appear.

They are doing this, as I was told, as a test to see how earthly civilization will react to this, and they are also very interested in options for deciphering these signs. They put a certain meaning into them. Options for deciphering these signs on the part of our scientific community and, in general, this is a test for our society as a whole. This is the first goal.

And the second goal: how people will react to the appearance of these circles if it is clear that no person approached or drove up to this field in a car. How will they explain this to themselves if there is no other evidence of the existence of alien civilizations?

01:01:02 Project “Women’s Practices”. Retreat in Buryatia on Lake Baikal.

Maxim : Excellent, and on this wonderful note, dear friends, we say goodbye to you. We meet at 21:30 at “Women's Practices”. The link is in the description of this video below, follow the link, we are waiting for you.

“Women’s practices” will be held every Tuesday and Thursday. Today we are spending Tuesday.

Guys, bye everyone! Thank you very much for your help with the project. In the summer I will have the difficult task of starting construction of the Center. I will definitely make a photo report. Our next retreat is planned in Adygea.

Irina : In Adygea?

Maxim : On Baikal. In Buryatia. Let's go to Lama Itigelov, we will have a wonderful retreat there, where we will also teach you how to communicate with subtle-material and humanoid civilizations, with the Spiritual world. We will tell you what energy is and answer all your possible questions.

Thank you all, thank you all so much again for your support!

Irina: Thank you everyone!

Maxim : Bye everyone!

Broadcast May 16, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

MidgasKaus is a representative of the planet Esler, a biologist, psychologist and specialist in alien civilizations.

CASSIOPEIA 20 - Irina Podzorova - Extraterrestrial intelligence about the consciousness of earthlings. How does human thinking work? Spirit Structure -

Information transmitted by our space friends through Irina Podzorova, a contactee with extraterrestrial civilizations.

https://www.youtube.com/watch?v=cpe1u7mQBMM

00:00 Start of video. New chat “Ukraine-Cassiopeia”. Health center "Cassiopeia-Gihor". Telegram chat for questions.

Maxim: Oops! Look, they're waiting for us. We don't have a chat.

Irina: Hello. Let's see. Look at the interesting numbers we had at the beginning today.

Maxim: Yes. I don’t understand, where is our chat? Has our chat gone somewhere?

Irina: I don’t know.

Maxim: Yes.

Irina: They turned it off.

Maxim: They turned off our chat. How are we going to write to this chat? Oh, connected!

Guys, hello everyone! As I understand it, many will now come to this broadcast and are already rubbing their hands that we have some serious disagreements in Cassiopeia. By the way, how can you hear us? We always check the sound. You can hear everything. Great! Thank you, Volodya. In fact, very interesting situations are happening around “Cassiopeia”, and as I understand it, many low-vibration destructive entities, people, simply cannot cope with their emotions. We have, of course, an interesting situation with Ukraine. For some reason, our chat administrator decided that she could take 500 people away from us, but I will say this: it’s impossible to take anyone away from Cassiopeia. This is an opportunity for us to unite together once again, we have created a new chat in Ukraine.

Guys, Ukrainians are my beloved, dear, I am a crest myself and I don’t hide it, and I really love my native Ukraine. We are all people here on this planet, and it doesn’t matter what nationality we are, so be sure to unite, get structured and read, study us. How much information and dirt is pouring in my direction, I know this very well, and what I am no longer is, an intelligence officer, a reptilian, a security guard, and everything else they have called me and called me names. But, despite everything and despite everything, I know what I'm doing. I know what an interesting job I'm doing. I know why I do this and I do it with love. Therefore, I want to send all the inhabitants of the old chat “Cassiopeia-Ukraine” my open heart, my open love and I say that please join us back in another chat that we have already created, which is open for you, and is waiting for you with love and with all the warmth and kindness with which we treat other people. The most interesting thing is why I was on air and immediately, one might say, interrupted Irina. Firstly, Irina and I want to congratulate Ivan Yonten. Vanya, happy birthday, happy birthday. Yesterday was your birthday, and I very much thank all my curators and mentors for being in our

project, for participating in this project with your already huge school, you already have about a thousand students who are studying at your school. We are very happy and wholeheartedly support our joint project. I know that you will soon open the Cassiopeia-Gihor health center in Moscow. I'll tell you a secret. I gave Vanya a lot of equipment so that he could also look at you and your physical body - do testing, and your energy bodies - do testing both before the session and after the session. And in general, I think that Vanya, thanks to this equipment, will be able to write a very good research paper, which he will conduct, and he will be very successful at it.

Further. We have slightly changed the rules on how you can ask questions. There is a link under this video, and there is now a chat in Telegram. You will have to subscribe to this chat, and from the next broadcast I will read all the questions you ask Irina from this chat. Why? Because it is very convenient there, there is a bot assistant, there are certain settings there. New chat of Ukraine, thank you, Volodya, it’s actually already in the line, but you sign up below using the link. We have a chat on Telegram, with the help of which you can ask your questions during live broadcasts, specifically Sunday broadcasts. And I will read all the questions on live broadcasts from this chat.

05:13 Information on the Baikal retreat 2021.

Maxim: Plus, I have another very good news about the Baikal retreat. We love you so much and we didn't expect you to submit such a huge number of applications. At first I thought that such a number of applications was impossible to accept and process. But! We will hold two retreats on Lake Baikal. One retreat will be from the 7th to the 17th, full program, and the second retreat will be from the 18th to the 28th-30th. We will now decide on the departure dates, because we will be determining the plane. Therefore, guys, not 140 people will go to the retreat, but 280 people will go to the retreat, this will be in two sessions. Please wait, if you have submitted an application, you will definitely receive a message within two or three weeks, or a specialist will call you back, because there are a lot of applications and it is very difficult to process these applications... (Call). Just two seconds, I’m sorry, I didn’t turn off my phone during the live broadcast, otherwise it’s not very good, I apologize right away. So, about the Baikal retreat. They will definitely call you back, and almost everyone who applied in the first three or four days will get in. In one day we received about a

hundred applications, and in these four or five days we have already received about 280 applications. So don't worry, everyone who applied first will definitely get into the retreat, a specialist will call you back, you'll just have to wait.

Now, due to the fact that we have formed a new chat in Ukraine, and the old chat has left with old energies, as I understand it, interfering with the general development and growth of people, we decided to experiment, and we decided to take questions directly from this chat and ask . Questions from our new chat in Ukraine. That's why I'm leaving you guys. See you all at the Baikal retreat. We have two passes. I repeat once again, from the 7th to the 17th there are 140 people, and from the 18th to the 30th another 140 people. We will have a surprise at the second retreat, but I won't say anything about it yet. We have very interesting plans for the second part from the 18th to the 30th; a very interesting person should come to us for the second part of the retreat. All guys, bye everyone, I'll be here next to you asking questions right from the chat itself.

08:11 Greetings from the meeting participants. Beginning of checking the activities of alien bases of reptilian civilizations.

Irina: Hello, dear friends, I greet you all! I also greet the people of Ukraine, and I greet everyone who remained in the previous chat.

Our curators are present with us today. As always, our curators from the planet Esler MidgasCaus, a biologist, psychologist and specialist in alien civilizations, are present with us. Also present is our curator LiShioni from the planet Shimor, a specialist in astral interactions. Also today, a representative of Burkhad Bergastre, who is already familiar to you, specially came to this broadcast, he is here, he has already been on the live broadcast with Raom Tiyan, he is present here and will express, among other things, his attitude to what is happening. He already knows about what happened from me.

And as always, we'll start with galactic news. Bergastr, you visit us very rarely, which means you have more time to be interested in galactic news than our curators, who visit us more often. What has surprised or delighted you so much, perhaps, in our Milky Way Galaxy over the past week? He says: "I heard an appeal from Vladimir

Goldstein, which was given after Irina told him via video link about her contact with a representative of the M31 Galaxy, with a representative of the planet Mantuk, whose name is Miti. She talked about her contact, and at the end of her story, Vladimir turned to the planet Pikran, that is, to representatives of my planet, with a request to understand the activities of those civilizations that Mitya named in his address to the Cassiopeia community. The news is that your request, dear Vladimir, has been fulfilled. Now the check began, naturally, from the Earth's Selbet bases. The largest Selbet base on Earth is located... Not Selbet, this is its colony. Yes, Selbet colony."

Maxim: Wait, TV viewers don't know what the question was, and I don't understand what they're talking about. What was the question, can it be voiced, or what was the request, or what was the message from Vladimir Goldstein, what was there? Bergaster, excuse me, please.

Irina: Indeed, not everyone knows what the question was. The fact is that in telling Vladimir about my flight to Ashtar on the ship and meeting with Mitya, I read in the notebook what he told me. And this was later shown on our YouTube channel, including, as he believes, about the conspiracy of the reptilian races and our earthly, so-called political elites. He told me and I wrote it down. The purported goals of this conspiracy, if it exists. This has not been proven, but he asked representatives of the regional galactic community to look into this situation. When I read all this, Vladimir joined his request and asked Pikran's representatives to also look into this.

Maxim: I know that. I remember it. And then I just focused on this.

Irina: And now they have begun checking the activities of the Selbeta colony base on Earth, whose planet is located in the constellation Ursa Major. Its name is Hraltis. Representatives of Selbet live on this Hraltis, but it is already like a colony. Their base on Earth is located in Russia in the lower reaches of the Don. There is such a place. It is located underground. There are more than 700 employees there, but not only reptilians, but the Interstellar Union in general. Mitya also pointed out to this base that there are some earthly people there who are secretly being transferred technologies that can be integrated, according to him, into the science and technology of the Earth unnoticed by the population of the Earth. And for observers from the Interstellar Union,

who also monitor Earth's technologies. Supposedly there are specialists there who are in contact with earthlings. What will this check be for? The check will be to see if there are earthlings there, as he reported, under the guise of biorobots from the planet Pikran, or under the guise of representatives of Disaru. For this purpose, a comprehensive genetic analysis of all representatives of Disaru that are there will be carried out. It will make it possible to distinguish those minor genetic changes that these two races have in connection with the relocation to Disara. After this check is completed, I will, of course, tell you the results, but it won't end there. Selbet's bases on the Moon will be checked, and the bases of all the reptilian civilizations that he listed and their colonies in the Solar System will be checked. It will take approximately 95-96 days to check everyone who is there for belonging to the earthly civilization. While the checks are being carried out, the activities of those physical contactees who belong to the reptilian races will be suspended. Now physical contactees can only contact civilizations that are not included in this list, which Mitya indicated so that if the inspection authorities find earthlings there, so that they will not have a reason to say that these are their contactees. Accordingly, for 95-96 days, physical contacts are possible only with the permission of the Interstellar Union, and only for those races that are not included in the list of these civilizations and their colonies, which Miti indicated. I will tell you about the results of this check and whether the earthlings were found, and if so, what is their reason for being (there), how they will be motivated.

Maxim: Very interesting things have started. That is, now permission for contacts will be given in full, and permission will not be given for 96 days to precisely those reptilian civilizations that Mitya listed in order to find people at their bases who cooperate with them, it turns out?

Irina: Yes. Right now there is a test on Earth. In about three to four days, but this will depend on the results of this check, but if everything there is according to the law, which corresponds to the Interstellar Union, if everything there corresponds, then we will already check the bases outside the Earth. We'll check a few more reptilian bases on Earth. This will all take about ten to twelve days, and after this time the possibility of physical contacts with reptilian civilizations will be closed for 90-96 days. This has already been announced to the Galaxy, and this, by the way, was news to them.

Maxim: Interesting! We will wait 96 days for the results of this check.

So, well, Irin, let’s move on to the questions?

18:10 The reason for the discord is in the previous chat in Ukraine. Laws of business etiquette.

Irina: Yes. And now Mead, LiSioni and Bergaster, they know about what happened yesterday, I told them, and other contactees also told them, yes, I remember who it is, Mead just told me, who else told him this, one of the contactees , who lives in Ukraine. What can they say about this, since our topic is such a difficult one, like some kind of discord.

Maxim: Yes, guys, I really want to apologize to all the people who were in our chat and who, without their permission, were simply taken somewhere else. Guys, please understand correctly, not all people are conscious, not all people are adequate, not all people are without ego, so I apologize to all the people who were in this chat. By our mistake, because we did not take away the rights from this chat, we relied on the words of the person and the promise of the person that he would transfer the rights, and ultimately this situation happened. I personally, as the project manager, apologize to everyone who was in this chat and who was taken away from us and taken with our information, and began to spread misinformation and tell all sorts of bad things about “Cassiopeia”. So guys, forgive me, please, next time we won’t make these mistakes.

Irina: MidgasKaus and Bergastre have now talked, and they want to contact Elena personally. They are sure that she will watch this video. If she doesn't look, I ask her to send it to her, because they think these words will be important.

Maxim: Elena, the chat administrator who ran the chat?

Irina: To the Elena who created the chat. By rights, she was the owner of the Cassiopeia-Ukraine chat until yesterday. Yes, she was in our project, since naturally, chat owners are in our project. Elena, we haven’t talked much at all, but in any case, I will convey what they want to convey to you.

Mead says: “Elena, I know the essence of the conflict between you and Vladimir Goldstein, as well as those who supported him. But this is only an external reason. The internal reason, as I understood it from the stories of contactees, the internal reason is your internal doubts about the correctness of the path that the leaders of the Cassiopeia project are taking, not even the project itself, but its leadership. The reasons for these doubts are very multifaceted, and they are known, of course, better to you, but in any case, guided by the rules of business etiquette, which is known both in the Galaxy and on Earth, its rules are approximately the same. Since we are, after all, intelligent Spirits, divine beings, and we have similar ideas about morality, about what Light is, about what Darkness is, as a negation of Light, about the fact that Light is love, and so on. It is on the basis of all this that the norms of so-called business etiquette are based. What it is? These are the rules by following which in society you can attract more people not with your words or assurances of love for them, but with your actions, which will see your personal example. But, unfortunately, I did not see this sign in the action that you committed yesterday. I will explain in detail why, as it will be important to you. Your action did not contribute to the implementation of this business etiquette, which simply involves respect for each other as individuals on all sides of the process. I think that when you created this chat, you initially agreed that it would be a chat belonging to the Cassiopeia project, like everyone else. What is owned? This means fulfilling its goals and objectives. It was with this condition, as contactees told me, that you created the chat. They told me that this was your voluntary desire, that is, it was not any request of theirs, but was your completely voluntary desire, which came from the heart. You did it, you created a chat and ran it.

Maxim: We need to shorten the speech a little, because I don’t want to focus attention on a person who completely ignored all his promises and everything else. I believe that there is no need to focus on it.

Irina: You could, as soon as you had the contradictions that I said about, that the idea appeared in you that the management of Cassiopeia was going the wrong way, that was also your full right, yes. But the laws of business etiquette in this case require transferring the chat to those administrators for whom it was created, and creating your own chat for other purposes. This would be completely correct.

Maxim: In general, Lenochka, next time, before you do something, please ask those people who are in the chat how they got there, why

they are in the chat, and create your own chats there too recruit people.

Irina: Firstly, this is not gossip, but the requests of my curators, and I could not ignore my curators, since they want to convey this to her, MidgasCaus, for example. He conveyed it anyway. Whether a person hears it or not, I'll say it much more briefly now. He says that, Lena, if you created this for "Cassiopeia" from the bottom of your heart and then changed your mind about being in "Cassiopeia", then you should not have been an indicator of your love, no, in no case, but an indicator of your love It would be good for this project and respect for people to give this chat, which you created for us from the bottom of your heart. As we originally agreed. And create your own (chat), with new rules, from one person, as Elena Kuznetsova and all of us are doing now. Accordingly, everything turned out the other way around. But this is what Mead wants to say and says that these are the laws of business etiquette, which are similar in different worlds. How you feel about this is again up to you, I conveyed what they told me.

Maxim: And I am sure that, Lena, you will take your specific lessons, and I think that they will benefit you, as well as our project. Apparently, many people were there not out of pure heartfelt desire, and I welcome everyone who returned, I support them, and I am ready to continue to answer questions.

26:30 Why do things you don't dream about come true? Why don't wishes come true?

Irina: Okay, now we can answer questions.

Maxim: Yes. Now we can answer questions. Go. Question. It has been noticed that in life most often things or circumstances happen that you didn't dream of or want, but what you strive for and want eludes you and falls apart. Why is that?

Irina: MidgasCaus answers like a psychologist, he answers like this. I will tell you my opinion, since the question is not asked in the abstract, but there could be many different reasons. I will tell you about the most common ones, from my point of view. If what you were afraid to think

about is happening and what you want is not happening, the most common reason for this is the creation of events by your guides in conjunction with your Higher Self so that you learn not to be afraid, for example. That is, having received the experience that you are afraid of, you are taught to accept it and not experience fear in the future. If you didn't get what you were looking for, perhaps it wasn't beneficial because if you got it, you would lower your vibration. This is what I am saying in the most general terms, but the question is asked in such a way that it is impossible to answer more precisely.

28:09 The meaning of visiting the graves of deceased relatives.

Maxim: Why visit the graves of deceased relatives, and what is the point?

Irina: Yes, you have such a custom, LiShioni is answering now. You have this custom of visiting the graves of relatives. You see the meaning of this in communication with their Souls. You see the meaning that if you come to the body, this is the memory of a relative, this is an external reason. And the internal reason why you need this memory is communication with their Souls, that is, with those images that are in your memory, and through these images with their Spirits that are in the Spiritual world.

Naturally, for this it is not necessary to come specifically to the cemetery, but you have developed such a custom for many reasons that when your religious cults were formed, the cult of veneration of ancestors was very strong and widespread, especially among the Slavic peoples, also in India and China . You have gone through a long journey of forming this custom over many thousands of years. They prayed to the ancestors, made sacrifices to them, asked them to intercede before the Gods, and so on. Why did such a cult form? Because ancient people felt a very strong spiritual connection between themselves and past generations of people. They called it the Rod, that is, with their ancestral egregor, as the totality of all Spirits.

30:09 Oath, promise, betrayal and their influence on fate.

Maxim: Here’s the question. When a person makes an oath, a

promise, or he engages in treason, how are these concepts interpreted in the Interstellar Union, and do they influence the fate of a person from the point of view of the Interstellar Union?

Let's say a person made a promise and then did not fulfill it, or a person made an oath and did not fulfill it, or a person committed some kind of betrayal, realizing that he was doing something to harm this person.

Irina: An oath, a promise, an agreement - this is a certain choice of path. Now Bergastre is answering. An oath, a promise, an agreement are different names and, one might say, stages of the same phenomenon, which is called "choosing a path." What you called betrayal is going back. Returning back to the state that was before the promise.

We look, if this was a promise of Light, that is, to develop in the Light, that is, an agreement, one might say, evolutionary, then the annulment and betrayal of this agreement is a return, that is, degradation of the Soul to the state in which it was before. At the same time, a person, his Spirit loses all acquired vibrations, qualities, loses, not only loses, but loses access to those qualities of the Soul that were developed during this path, when he walked along it, because he returns back. If this agreement was drawn up for the purpose of degradation, because there is an agreement about crimes, for example, we agreed to commit something criminal together, then the betrayal of this agreement stops the degradation.

32:18 Irina Podzorova on the ship of Ashtar Sheran. Project "Light Body".

Maxim: I see. I saw a very interesting question for you to tell about the Ashtar ship. We now have a new project with representatives of the Interstellar Union. Tell us a little about the project, what we will have, what our new project will be. Most likely, we will start it next week.

Irina: Thank you for the question. I also really wanted to tell you about the Ashtar ship. I was physically there last week for the first time in my

life. Ashtar physically had me on the ship. But before that, I had been there many times in the Astral Plane. I want to tell you that the rooms that I saw and the image of Ashtar in the physical body, how it looks in the astral body, it is practically no different. That is, when I saw his physical body, I recognized him immediately, I thought it would be different, but it is no different. It can be clothes and eye color; in the Astral the eye color is often different.

Maxim: Tell me what project Ashtar proposed.

Irina: Ashtar, I'll tell you now, he invited me to lead a project called "Light Body". Even earlier before this, several months ago, in the Astral, Ashtar taught me one of the ways to enter the Astral, which is called the "Light Body". This method is very simple. Those students at school who came to me, some of them from those streams, I carried out this practice with them. There is a special practice, it takes a short time. As a result of this practice, everyone leaves their physical bodies and ends up, when they give instructions upon exit, onto a ship to Ashtar Sheran, and not just onto a ship, but into his healing rooms. There are rooms where there are devices for changing the vibrations of the astral, mental and etheric bodies, the ratio of vibrations of different chakras. All this then affects the physical body in a positive way. I conducted such experiments several times, and they were always successful, that is, everyone got on the ship, and everyone then felt an improvement in tone and general well-being. On my last astral journey before the physical one to the ship to Ashtar, he suggested to me: "Irina, create a project on the Internet where you will lead people via video using the "Light Body" method to my ship." I say: "Okay, when I fly physically, we'll talk about it." I talked to Maxim, he said, yes, it's good, and this is a good project.

Maxim: Yes, with a representative of the Interstellar Union we will go through various kinds of astral travel and practices. And one of the trips will be to Ashtar's ship to his Light room for the regeneration of the Light body. This, I think, is one of the powerful and one of the most powerful projects that we have. We, of course, have "Cosmohealing", we have the "Galactic Federation of Light" project, we have "Meditation", we have the "Women's Practices" project, and by the way, you can find out about all the projects by subscribing to chat in Telegram in which you will ask us questions. There is a pinned message there, and at the top of this chat you can find out in full about all our projects and take part in them. Therefore, we are preparing the

newest project sometime next week. This project will take place, this is how we communicate with you now, live. Because on this live broadcast there will be a huge number of your curators and mentors who will help take you into the astral body, coordinate and supervise all situations, and Irina will control you. And, accordingly, Irina, together with your curators and mentors, will lead you out of the Astral.

Irina: Yes, and when I was in physical contact, we talked with him, and he said that the session should take about 30-40 minutes, that is, 10 minutes to go out, stay there for 20 minutes and then return you to share in the chat with impressions. I am sure that almost everyone will succeed, especially those people who have already communicated with their Higher Self at least once. What is needed for this? Naturally, this requires sensitivity, but not as great as, for example, for ordinary astral travel. Because this method is based not only on visualization, but also on breathing. Breathing itself helps to gain energy for the Light Body. And then we'll talk in more detail directly at these sessions. Ashtar also told me that this is not just a way of traveling to his ship to harmonize the physical and all subtle bodies of a person, which undoubtedly brings him spiritual healing and harmonization. This, he said, also increases the vibrations of the etheric and astral body, because it allows the Divine Light to pass into every subtle structure, and this helps to undergo the Quantum transition more correctly and harmoniously.

38:09 Spiritual Teacher Maxima Rusana, healer according to the Merkaba system.

Maxim: Yes, dear friends, I also have very interesting, wonderful news. Finally, my very first teacher of energy practices, Merkabah, is joining our project. My very first teacher, my beloved spiritual mother, Claudia, joins our project. She joins us on terms of payment according to her heart. She and I had disagreements precisely on this issue, that a person who is not able to pay the amount that the healer himself wants cannot get to this healer. Therefore, according to the Merkabah system, she will deal with the restoration of very severe cases that our medicine does not even treat. But there is one small "but", she simply cannot take on more than two or three people a day, this is impossible, because the Merkabah flows are the flows of one of our creators, this is the Burkhad (Pikran) channel, she has very serious achievements. She and I will soon have a live broadcast so that you can get to know her, so this is very serious news for me. We have a very strong,

serious master of the Merkaba system appearing in our project. And it will restore people according to the same system.

Irina: They already thank Ashtar for Merkaba.

Maxim: I think that Ashtar can also be thanked for Merkaba.

Irina: Yes, they all participate in this. Indeed, Claudia is a very competent specialist and a kind person who has been a contactee with Pikran for a very long time and works fruitfully with his energies. As soon as the “Light Body” project is ready, I am waiting for all of you, there are no contraindications for it. Indications for it, how to prepare for it, this is a quiet room, so that no one disturbs you, you can sit relaxed, you don’t even need to lie down, this is not necessary, while sitting it’s even easier to imagine the Light body inside. And we will all visit Ashtar’s ship together in the astral body.

Maxim: I’ll tell you a secret that Claudia even decided to take on cancer patients. We initially talked about this for a long time, but she hesitated for a very long time, did not take on such responsibility, but now she has agreed on these points with her curators and mentors, and she is ready to take on difficult cases using the donation system. We don't take it. We don’t take people to the Wellness Center, because this is a very big responsibility for people, and our medicine should give people what it tells them about.

41:25 How to recover from viral and infectious diseases? Recipe for an anti-inflammatory and blood purifying agent.

Maxim: Next question. Many people, after suffering from Covid, have experienced strong changes in their mental state: all kinds of fears, anxieties, panic, almost impossible to concentrate, very poor concentration. Because of this, it is impossible to fully conduct mental activity, and most importantly, it is impossible to meditate and pray. How can you help in such cases to return to normal?

Irina: MidgasCaus answers. The conditions that you described are called asthenia with an anxiety-depressive component. Such

conditions often occur not only after a new virus, which you call the Covid virus, but also after a severe course of influenza viruses, parainfluenza, adenovirus, measles and so on, that is, after those infections when the body spent a lot of vitality on immunity, on suppressing this infection. And then it continues to spend its energy on removing toxins that were formed from the breakdown of your dead cells and viral particles. The body needs time to remove them, due to the fact that toxic substances are in your blood, lymph, brain fluid, and so on. They circulate throughout the body. And since the Spirit influences the body, the body also influences the Spirit, which means that the vibrations of the Spirit through the energetic connection decrease. But, naturally, they do not decrease only if the Spirit itself does not oppose anything to this state of the body.

What can you do to get through this period not only with less suffering, but also with great benefit for yourself? Firstly, cleanse the blood and lymph of your dead cells and other particles; taking anti-inflammatory and blood purifying agents, such as, for example, calamus root mixed with violet tricolor herb, will help with this.

Maxim: Please tell me, Mead, what recipe is possible? Because this recipe will be used by so many people.

Irina: This is the simplest and most accessible. If for a person weighing around 70 kilograms, then a teaspoon of calamus roots and a tablespoon of dry violet tricolor herb. All this (pour) 200 ml of boiling water and leave for forty minutes in a warm place. Then divide these 200 ml into four to five servings and drink throughout the day, preferably 20-30 minutes before meals in equal portions, this will be the daily dose. Accordingly, if you weigh 100 kg, then increase the dose. If you weigh less or a child, then in half, it depends on body weight. These are useful anti-inflammatory and cleansing herbs.

If you feel severe depression, depression, oppression, negative emotions come to you even when you are doing something else, on your own, then only in this case can you add a teaspoon of St. John's wort flowers to the collection. But then don’t stay in the sun without sunscreen and protection for more than two hours, because this can have a negative effect, especially since it’s summer. If you don’t have calamus, you can replace it with a tablespoon of calendula, it is also anti-inflammatory. I’m giving this the most general thing, which is

suitable for 80 percent, and then you need to look at the vibrations.

46:27 Additional information on the Baikal retreat 2021.

Maxim: Great! Guys, about the Baikal retreat. At the Baikal retreat you will receive all the information from our masters. We have the best masters of the Cassiopeia project going there. We will have a retreat there, a training retreat, we will have classes, events, astral practices, mental practices, practices of going into space, into the Astral, into the mental, into the causal. You won't even have free time there. I tell you right away, you are going there to study, to practice how to contact energies, with the subtle world, with the Spiritual world, and much, much more.

47:09 The importance of spiritual practices after illness.

Irina: How long to drink this? 5-7 days will be enough to withdraw. This is about the body. Now, regarding spiritual practices. They need to be strengthened. Despite the fact that you will not be interested in doing this, you may not have the desire to do this, they need to be strengthened in order to keep your vibrations of the Spirit higher than they were before the illness. Your own spiritual practices are suitable for this: meditation, communication with the Higher Self, for some astral travel, for others reading prayers. For almost all people, reading the mood: “I am the Universe” of the planet Pikran, which was transmitted, is good. It is aimed, however, not only at increasing vibrations; it is read much less frequently on Picran. It is aimed at connecting with all the light Spirits of the Universe in special cases when help is required. In any case, you can read it in this state. And also your prayers related to your religious traditions, if you sincerely believe, reading religious, spiritual, esoteric literature and simply light literature that is written by people, for example, literature about good deeds, about the Light, which will delight you. Conversely, reduce the amount of information that causes you negativity, for example, watching any videos that frighten you or irritate you, and so on. This will lower your vibration. At this point, do not study low vibrational things, it can harm you. Come to your senses a little and get stronger, then start studying some negative aspects of life, if you want to. That is, strengthen your spiritual practice, except for herbs.

49:37 Lethargic sleep, coma.

Maxim: Question. Please tell us about lethargic sleep and the burial of people in this state? We talked about this, we even gave the example of Christ's friend who fell into a lethargic sleep. Watch our last broadcast, we talked about this.

Irina: Yes, it happened before. Probably, about modernity, they probably wanted to ask the question: is this possible now, right?

Maxim: Can you tell me a little about lethargic sleep? What is it, what is the process, and how is it buried?

Irina: How does lethargic sleep differ from ordinary sleep, as well as from other states and from physical death? It differs in that, unlike an ordinary dream, the astral body for various reasons does not return to the physical due to damage to the body or for reasons of the desire of the Spirit itself, and by Spirit I mean not only the embodied part, but also the Higher Self, that is, how they are connected and for some reason they do not want to connect with the body at this moment. Either it is damage to the body itself, which prevents it from connecting, but in this case the life thread between the astral body and the physical does not completely break, so physical death does not occur. All processes in the body slow down extremely, there may be problems with breathing and heartbeat, but in any case it does not stop completely.

Now Irina asks whether now, like two thousand years ago, a person can be buried in this state? The fact is that two thousand years ago this was possible because there were no uniform standards for examining the body of a person who died. I researched this issue, studied the standards of medical care, and I want to tell you that according to the laws of your world, as far as I have studied them, burying a person, burying or in any way destroying his body, burning, and so on, is prohibited by your laws, until signs of death appear. Those signs of death that cannot appear during lethargic sleep or coma of any origin.

They are well known to appear three to four hours after physical death

and never appear before the thread breaks. These signs are well known to your doctors and are recorded. Therefore, if a medical professional was invited to the scene of a person's physical death, who records this in writing and is responsible for his result, he must check the known signs of death that are described in the literature. I don't know, I can explain, but is it worth spending time on? I think they will read it.

Maxim: I think this is a separate question. Guys, I have a big request to everyone, there are so many of us, please like, please subscribe to our channel, because with this we can further spread this information and allow people to increase their awareness, perception, doubt even something, sow what - a certain grain for the growth and development of every person. Just like and subscribe to the channel so you can see new videos and new alerts. We have a huge number of them in preparation, plus we have a huge number of projects. We are currently preparing a music album - this is "Cassiopeia-healing" and "Cassiopeia-meditation", where you can buy music for donations that will heal you and help you in meditation, but you can see about these projects and everything else on our website https://cassiopeia.center/

54:11 Palm oil. Shea Butter. Recommended proportion of vegetable fats in the human diet.

Maxim: So, Irin, the next question is from the "Ukraine-Cassiopeia" group. Are vegetable fats harmful to the human body? That is, palm oil, Shea butter? What kind of Shea butter is, I honestly don't even know myself. But are vegetable fats harmful to the human body?

Irina: Just these two or in general?

Maxim: Is palm oil harmful to the human body?

Irina: There are no completely harmful or completely beneficial products for everyone. It all depends on the amount of use, on the age of the person, on the condition of his body. As for palm oil, I know what this product is, I have researched its properties, I have been asked to do so. This name refers to the fruits of the tree, but it can be in different forms that go on sale. Depending on how purified it is, it

changes its properties, that is, it is purified from those substances that are found in the fruits of the tree and give it an unpleasant taste and the ability to quickly deteriorate and be treated by certain microorganisms. Depending on the degree of processing, it has some different (properties).

What does it have in common? Specifically, for children under at least 14 years old, I would not recommend consuming such a product at all, including in your sweets, more than twice a week. The complex of fats that is found in palm oil, also in coconut oil, there are a few of these substances, they tend to bind with the organic calcium compounds entering the body into some insoluble compounds, which does not allow calcium to be absorbed correctly, and it is necessary for the replacement of cartilage, in including the spine. So, to avoid osteoporosis in adulthood, osteochondrosis and weakness of the musculoskeletal system, it is better not to give it more than twice a week in small quantities until the child's growth is completed. It is coconut and palm that have this property.

As for adults. Any vegetable oil does not contain, for example, cholesterol, but can contribute to its increased production by the body itself. The rules here are the same as for other vegetable oils. The share of fats in a person's diet from all his products should not exceed 10-15 percent, this is all together with animal fats, 5% animal fats and 5% vegetable fats, and the rest is proteins and carbohydrates, if you look at these substances, there should still be trace elements and vitamins. It should be all in one package. If you keep no more than 4-5% of your diet for any vegetable oil, including palm oil, then there will be no harm. But the fact is that manufacturers often replace carbohydrates and valuable proteins in products, this sometimes happens, and therefore you need to look at the composition of the product, where it is indicated in percentage what it contains.

Maxim: I understand.

Irina: Shea butter? It has a slightly different composition. In your European countries it is not customary to eat it, but, nevertheless, in its homeland, this is South Africa, the local population eats it, and in some areas it is the only source of fat, there are no, for example, sunflowers or olives, but for you it is unconventional.

Maxim: I understand. Guys, I want to remind everyone once again: below this video there will be a link to the chat, and you can ask all questions during the live broadcasts through this chat in Telegram. It is very convenient for our use, there will be an assistant who will help me select questions that have not yet been aired, so see the link under this video, subscribe to this chat and post questions there on Sunday live broadcasts. I will definitely ask all questions.

So, next question. Our broadcast today is dedicated to the “Ukraine-Cassiopeia” chat due to the fact that some small events took place there. As I understand it, war is a war in the minds of people, and everything that happens happens for the better and for a certain development of events and situations. Therefore, today’s entire broadcast is dedicated to answering questions from the “Ukraine-Cassiopeia” chat.

01:00:04 Warming, melting snow, rising water levels. Water is a symbol of cleansing the Earth's noosphere.

Maxim: Many prophets and soothsayers talk about significant flooding of coastal areas. What we see happening to the climate as a result of the melting of glaciers and the calving of huge icebergs indicates possible significant changes in the land area, even changing geographical values. When is such an event possible in the life of our planet, and is it possible?

Irina: Yes, it’s quite possible. In what time frame depends mostly on you, on your civilization. The greenhouse effect that exists, you create yourself, and moreover, you create conditions for the outer layers of the hot core of the Earth to approach the surface, the activation of volcanoes and, accordingly, underwater volcanoes, and this may not necessarily be in the form of an eruption, but in the form of heating the bottom layers of water . This is facilitated by precisely such geological processes and the active development of hydrocarbon-containing minerals, that is, if you take something from the earth layer in a large volume, what was contained there and maintained some formation pressure, it can shift and all this affects the channels that go to the ground. I told you the physical reason. The spiritual reason is, naturally, the influence of plasmoid civilizations on this process can also be such actions as melting glaciers, raising the water level, they show on the physical level that water is a symbol of purification, that

they want to cleanse the Earth of the energetic dirt that has accumulated in its noosphere.

01:02:12 Where do wars begin?

Maxim: Irish, I have run out of questions, I propose to end the live broadcast. We have 3,000 people on the line, I think we need to pay attention to our people in the chat. Guys, people really kill other people in war. I mean that the main war is waged in the minds of people, and everything else is then transferred to the physical world of reality. First, everything is formed at deeper, higher, mental and spiritual levels, and then everything moves to lower earthly moments, to physical bodies and to the discord of people precisely at the planetary level.

01:02:56 Who is Radomir? Christ consciousness.

Maxim: Who is Radomir?

Irina: Yes, they asked me, I already asked. Radomir is a very common name in pre-Christian Slavic tribes. It meant “He who rejoices in the World.” The one who rejoices at any manifestation of the World.” What Irina asked me about the contacts of such a contactee as Nikolai Levashov, who wrote about Radomir that he was Jesus, as his incarnation, or that he was instead of him much later. I can tell you that this information came to this contactee from those curators from the plasmoid worlds with whom he was in contact. Because they called the priest who had contact with them earlier Christ, according to his characteristics. However, Jesus Christ in the 1st century, two thousand years ago, existed on the territory of Israel, and representatives of the planet Burkhad have already said a lot about this, including the phantom of his mother and the phantom of himself. Therefore, Radomir, based on the information that I learned from Irina, was a contactee with his phantom, with his Christ Consciousness, who considered himself to be him.

Maxim: He was not a phantom. He was in contact with the Christ Consciousness itself, right?

Irina: By the way, contactees with the Christ consciousness and its phantom are possible not only in the Christian tradition. It depends on vibrations.

Maxim: That is, Christ consciousness is obtained, this means that even before the incarnation of Christ, a high spiritual essence with a certain consciousness was formed, which we now call Christ consciousness. Is this how it works?

Irina: He was already forming his consciousness, even when there was no Universe, it's called Logos. In the form of this Logos this consciousness existed. Even when he was embodied in Yahweh, when he was embodied before that, it was still the same consciousness, it did not change.

Maxim: Our broadcast is coming to an end. Of course, if we get 2,000 likes, then we will be happy to extend this broadcast, but now we will answer the last question, now we will choose, Irin, the last question with you. We'll stop somewhere. If we get 2,000 likes, then we will continue, as I understand it will be interesting. Oh, it's begun! Just two seconds, I'll stop somewhere now. Here.

01:06:27 Video recording with Gray.

Maxim: I just saw the video on Instagram. Gray walked along the road. Gray, meaning an alien, was walking along the road, and people were filming him. Is there some service that looks for them and takes them home? Where to report?

Irina: Please, was Gray walking along the road?

Maxim: The video was that Gray was walking along the road. Could this be possible, could Gray just walk along the road and be filmed? And in general, is it possible for this to happen?

Irina: Gray was sitting on my couch, didn't I show you the photo?

Maxim: Well, Irin, the program did it.

Irina: What do you think, there are no such videos?

Maxim: In fact, of course, contacts and direct evidence are prohibited, and I think that the Grays will not walk along the roads to be filmed.

Irina: This is very dangerous for him.

Maxim: Yes, this is not only dangerous for him, it is in principle prohibited by the rules of the Interstellar Union.

Irina: Yes, that is, even if he passes safely, and no one invites him to drink tea, and the police patrol does not ask for documents, then in any case, he will be punished for such initiative.

01:07:40 Life on the planet Burkhad.

Maxim: Good question: “What kind of dishes do they have, disposable ones or do they wash the dishes?” I'm even interested in this myself.

Irina: Robots wash.

Maxim: Bergaster, let’s say, knows?

Irina: Why disposable tableware? We have a lot of different dishes, we even get used to our dishes, but they are cleaned by robots, not only with water, but with a strong flow of air along with water, bubbles.

Maxim: You see, they accuse me of choosing stupid questions. Yes, serious questions, I even wonder, where is the serious question here?

01:08:20 The greatest ruler in the history of the Earth.

Maxim: From the history of the Earth, do the curators know about the greatest ruler on Earth? When was he, who and what was his name?

Irina: It will be very subjective now.

Maxim: Very subjective, yes.

Irina: Great for whom?

Maxim: What does greatest mean? The one who could probably split the Earth, I don't know what a great ruler is.

Irina: LiShioni is speaking now. From the history of the Earth that I studied, I was fascinated by those rulers who gathered peoples into one whole, that is, into one country. They did this, of course, using different methods characteristic of their era, nevertheless, they strived for the Light, for the good, for the prosperity of their country in the conditions in which they lived and in the understanding in which they were. A very striking example is Alexander the Great, who did not just come to conquer the land, but to offer peace and annex people into his country, and give them some kind of unified law. This is again a very subjective opinion, because in fact there were many such imitators later.

01:09:50 Maran about dark entities on Earth.

Maxim: Maran said that two billion dark cosmic entities came to Earth, is this true?

Irina: How much?

Maxim: Two billion dark cosmic entities. Is it true?

Irina: Did you get into embodiment? Meade asks.

Maxim: It says we got to Earth. Where, or whether it will be implemented, is unclear.

Irina: To Earth, as I understand it, into incarnation. Because to Earth means to be born on Earth. Now LiScioni says that Maran is, in any case, a representative, as far as we communicated with this creature, he is a representative of a subtle-material civilization. For him to get to Earth means to incarnate at any of the Earth's density levels. Did he call them dark? Maybe everyone who is lower than him in spiritual level, but he has a spiritual level there...

Maxim: We will not say his spiritual level, so as not to confuse the contactee Maran.

Irina: This level was valid for him at the time of incarnation. In fact, he is his 17th at the time of incarnation, and he told us this, I now emphasize, the spiritual level. The level of density at which he is embodied is different, he is embodied at the 23rd density level. And he also has contactees. And what he called dark entities, perhaps he called them, he simply sees as dark those who do not correspond to his level or even his level of density. Here you need to check with him. If this is the 23rd density level, and he looked from his level at the Earth, then he saw incarnating entities on the Earth, and these are not only people who are at the 3rd density level. Two billion. For what period? Again, it was important to clarify with him.

01:12:15 Is it true that 50% of the Earth's population are phantoms?

Maxim: Here is a question from Vyacheslav Semenov. Certain subtle-material civilizations claim that among the total population, 50% are phantoms, programmatic beings of civilizations that create events for embodied Souls.

Irina: One more time. Software creatures of civilizations?

Maxim: Yes, which create events for embodied Souls.

Irina: What civilizations?

Maxim: Vyacheslav, I will tell you that we have raised this issue more than once. What they call phantoms, in fact, simply can Spirits who are at low levels of vibrations, that is, on the first three chakras, as we say, work constantly, that is, they are not fully included in the process. Therefore, for this issue, we need to hold a separate conference, where we will tell and explain why contactees of subtle-material civilizations tell this story.

Irina: There was already an article in VK that I received from Mira Count, it was even earlier, it was about spiritual death. This process was described there, what it is, and how it differs from physical death.

01:13:25 Curse, damage, signs. Sign about a black cat.

Maxim: Well, let's ask the last question. Please tell me who he is in contact with... No, no one. We don't know, we'll need a photo of him. Now, I found it.

Curses, damage, omens - what are they from an energetic point of view?

Irina: It’s probably time to make a separate conference.

Maxim: Yes, most likely, it needs to be done separately, but in short, what are curses, damage and signs, what is it from an energetic point of view?

Irina: Curses, damage and omens are, firstly, things of different natures, all three. Very briefly. A curse is a conscious desire to destroy either the physical body, or the Soul, or the connection of the Soul with God, that is, separation from something, from life most often. This is the concept of excommunication, which is pronounced out loud or mentally, with the full desire for it to come true. This is a very strong thought form, charged with anger and resentment. It was created by man himself.

Damage is a negative mental program, a certain structure created at the mental level with astral substructures embedded in it. This is such a complex astral, mental program, charged with vital force, aimed at harm, at negativity and strengthened by similar desires of representatives of subtle civilizations who are the curators of this person who practices this magic. This is already a magical program. She is already together with these plasmoids, which help the magician in this. They may have some common goals.

Signs are some observations of people who have been observing some process for several years or decades, or centuries, and have identified a certain pattern that is being fulfilled there. But it can be expressed, since people often, especially in ancient times, thought figuratively, this can often be expressed in figurative form, and also this event could have happened a long time ago, this series of events, and in the present modern world lose relevance. You can give any example of a sign and you can find the meaning there.

Maxim: Yes? A black cat crossed the road.

Irina: What does this sign mean?

Maxim: No luck. I went to school as a child, when a black cat crossed my path, I turned back and walked along another street.

Irina: What if it's white?

Maxim: White - he ran.

Irina: What if it's black and white?

Maxim: Black and white? Did not pay attention.

Irina: Yes. Signs about black cats. Moreover, they were not only that she would cross the road, there were also special beliefs about people who have black cats and black cats. The original origin of this sign dates back to the very ancient civilization of Ancient Egypt, that is, the

plasmoid...

Maxim: In short, Irish. An entire conference could be held about these black cats.

Irina: Yes, just let the black cats in now.

Maxim: Yes, yes, everything has its own meaning.

Irina: In short, there was a plasmoid called Bastata, who later was the cat goddess Bastet. She appeared to people in the form of a black cat with green eyes. Some magicians began to worship her, make sacrifices, and so on. Then, at the moment when Christianity fought against pagan cults, all this gradually turned into a bad omen.

01:18:05 The best planet in the Universe.

Maxim: I liked the question. This is an extreme question. What's the coolest planet in the Universe?

Guys, the coolest planet in the Universe is the Earth! Here I live, and every day I have nothing but jokes! And I look at it all, smile and thank my curators and mentors for giving me every time another day on this wonderful planet, where everyone makes fun, grows and makes fun along the way. Guys, thank you all very much for this broadcast, for these questions.

Ukraine, I love you no matter what, no matter what situations happen there. The Cassiopeia Project aims to increase awareness and perception. Subscribe to our channel, like, subscribe to the site, and be sure to, link below, subscribe to the channel in Telegram. All subsequent live broadcasts on Sunday will be held with questions only through this channel. Guys, bye everyone, thank you very much for the broadcast.

Irina: Bye everyone!

Maxim: Special greetings to Ukraine!

Broadcast May 30, 2021.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

Bergastre is a representative of the planet Burkhad (Pikran), a specialist in contacts with the Earth, a specialist in safety in contact situations, director of the security service for contacts with worlds not included in the MC sector of the Milky Way Galaxy.

Video in text
April 26, 2023

#294 Militant opposition in the Galaxy: a reptilian from the planet Horika through contactee Vasily.

https://blog.cassiopeia.center/voinstvuyushchaya-oppoziciya-v-galaktike-reptiloid

https://www.youtube.com/watch?v=SWfmi2RI_7c

00:18 Meeting a contactee from a reptilian civilization.

Maxim : Dear friends, hello everyone! We have a very interesting meeting today. A contactee with a reptilian civilization called us. We were told that they wanted to talk to us about misinformation, about our transmission of incorrect information, about our curators, our mentors. That's why we invited you to visit us today for communication. Hello, what's your name?

Vasily : My name is Vasily.

Maxim : Vasily. This, as you know, is Irina.

Irina : Hello.

Maxim : She is a contactor with extraterrestrial civilizations. We will have an interesting meeting today. We will now watch Vasily's curators and receive the information that representatives of, as they say, reptilian civilization wanted to convey to us.

Vasily : Because I don't see who I'm communicating with. This is the information they give. I have had contact since the mid-90s. I stopped talking a long time ago, I haven't communicated for 5 years, but after watching your programs, I thought I should go out and ask around.

Literally the day before yesterday he came out for the first time and said his name. They never told me what their names were, because they said that we distort their names very much, they don't like it. I then invited them to speak not their own, but a common noun. I don't know what was given to me, whether it was a proper name or a common noun. I can request now. They said that they disagreed with Irina's curators in many ways. I'll ask around for some information now.

Irina : Of course, ask around.

Maxim : Yes, ask around. Can i ask you? You have been in contact since 1990, do I understand correctly?

Vasily : Since the mid-90s, around ’96. Now I can’t say for sure.

Maxim : How did your contact begin? Just briefly.

Vasily : It was opened to me by a man who wrote very interestingly, I liked it. She didn’t even write in Russian, but in some language closer to Eastern.

Maxim : Such squiggles?

Vasily : Yes. She wrote it and I liked it. I asked if I could? She described what kind of contact there should be, who should come out with me. Not reptilians, but creatures whose names ended in “silt.” As I understand it, this is one of the Angels.

Maxim : Spiritual level?

Vasily : Yes, spiritual level. That's why I didn't think that a dense material one would ever come out. The day before yesterday he said: “I am dense material.” And he began to describe himself.

Maxim : Now, at this moment in time, how do you feel them - with their presence, in mental images?

Vasily : Or he sends me information, because it is not mine. I can’t think about their planet, how they behave. You close your eyes and images appear.

Maxim : Thought images, thought packets?

Vasily : Probably, if you go to the Astral at night. I wouldn’t want to go there, to these Astrals. What they show there is unpleasant to me.

03:28 Choir Shu Mag. Khor Shu Mag's ideas about the Universe.

Irina : Vasily, please ask if they feel us now? Where are they located?

Maxim : Irina, I would like to get feedback from you.

Vasily : Yes, of course, Voronezh, we are here with you.

Irina : Okay, thank you, curator. Please introduce yourself in the form in which you can do this through the contactee, so that I know how to contact you.

Vasily : I already said – Khor Shu Mag.

Irina : Chorus Shu Mag. Khor Shu Mag, thank you. Khor Shu Mag, are you embodied in the material world?

Vasily : Yes, I am a reptilian.

Irina : Are you embodied on the third level of density?

Maxim : According to the terminology of the Interstellar Union.

Vasily : I didn’t understand this question.

Irina : Do you know about the existence of subtle worlds?

Vasily : Yes, we are familiar with the religion of your curators.

Irina : Have you yourself communicated with representatives of the subtle worlds?

Vasily : I don’t.

Irina : Are there such researchers in your world?

Vasily : We don’t like talking about this, we are realists.

Irina : What do you call reality?

Vasily : The dense world and what you can touch.

Irina : Where does the dense world come from?

Vasily : It’s better for someone else to say this. Next time.

Irina : Khor Shu Mag, just your ideas, what you studied at school, what is the origin of the universe. At school, in my world. This is necessary for us to understand each other.

Vasily : I am a philosopher, writer, researcher.

Irina : Great.

Vasily : I’ve been on Earth for a long time, I know Russian like a native. More than 110 years.

Maxim : I have a question for him right away.

Irina : Now he will answer where the universe comes from. We need to find out now how they see him. Because without this we will not agree.

Maxim : Yes. Does he know about the existence of the Spiritual World?

Vasily : I have been working with Russians for more than 110 years.

Irina: If only the dense one is real for them...

Vasily: Now the answer will come from others. He doesn't answer the question.

Irina: Okay. This means that you don't want to talk about the universe right now, your right. Tell me, Hor Shu Mag, your planet is in the constellation Leo at a distance of 47 light years. I already know everything.

Vasily: Wait a minute, I called it wrong - Khor Shu Mag.

07:33 The attitude of the Khor Shu Maga civilization to the Interstellar Union.

Irina: Chorus Shu Mag. Your planet is located in the constellation Leo at a distance of 47 light years. Are you familiar with the Interstellar Union, whose capital is located in the constellation Cygnus and is called Picran?

Basil: Yes.

Irina: Is your civilization part of the Union?

Vasily: No.

Irina: Are you familiar with the Galactic Federation of Light, whose center is located in the Pleiades cluster, the planet Futissa?

Basil: Yes.

Irina: Is your civilization part of the Galactic Federation of Light?

Vasily: No.

Irina: I understand you. Can you name the main reasons for this decision by the government of your planet?

Vasily: Idle talk. They are of no use to us. Although Selbet is our relatives.

Irina: I understand. What use do you have in studying the material world, in transforming it, more than Pikran and the Interstellar Union?

Vasily: We have our own technologies, we don't want to let anyone in.

Irina: Khor Shu Mag, you said that the Interstellar Union is of no use because of their idle talk. No point, what exactly?

Vasily: Movement, development, only prohibitions.

Irina: How long ago did your world separate from Selbet?

Vasily: Deadline?

Irina: Yes, in earth years, how long ago did this happen?

Vasily: Now, he's probably communicating with someone.

Irina: Approximately, great accuracy is not needed, as you remember.

Vasily: About 6 billion of your years.

Irina: What do you take in one year?

Vasily: One revolution of the Earth around the Sun.

Irina: Okay. This means that your civilization was not a participant, together with Selbet, in the creation of our race.

Vasily: No, they took our quantum engine and use it as their own.

Irina: Who are they?

Vasily: If they fight, is it okay?

Irina: Okay, write.

Vasily: Your star brothers.

Irina: When did this happen?

Vasily: About seventy years ago, this is again by earthly standards.

Irina: Which specific planet of the Interstellar Union took your idea for this quantum engine?

Vasily: Our relatives.

Irina: Selbet?

Basil: Yes.

11:05 Reasons for the non-acceptance of the Interstellar Union by the civilization of Khor Shu Maga.

Irina: Who gave Selbet this data from your civilization?

Vasily: I don’t want to talk about it. Let's talk about what doesn't suit us and what we don't agree on.

Irina: Just one last question on this topic, so that the position of your civilization is clear. Do you think that those who use your idea of your engine in the Interstellar Union are now, at this time, responsible for the actions of Selbet and that representative of your civilization who transmitted it?

Vasily : I don’t know about that. We are a warlike civilization, any questions can cause war. It's very difficult to decide everything.

Irina : War? Repeat, because Maxim was leaving. Very interesting answer, please read it.

Vasily : I don’t know about this, we are a warlike civilization, it’s hard to decide everything. Any questions can cause war.

Irina : LiSioni wants to comment a little. (LiScioni says our curator is from the Interstellar Union). He already handed it over himself. They still communicate with each other. He has already answered him, he even wonders what will happen through you. (LiScioni speaking). Hor Shu Mag, why didn’t the war cause the fact that Selbet transferred to you, as his colony, those achievements of the Interstellar Union that allowed you to fly to the constellation Leo? I am now talking about a gravitational engine, which was discovered, by the way, by a representative of the planet Tumesout.

Maxim : How interesting. Why then don’t you fight for what technology was given to you?

Vasily : This is not true.

Irina : This fact is known, including to your scientists. Maybe you just don't know?

Vasily : No. Let me ask now, what is “no”?

Irina : I’m now talking about the gravitational engine, which existed earlier than the 70 years you’re talking about. It existed on Selbeth even before the separation of your world. Ask Selbet where they got it from.

Vasily : This is our invention, our relatives from Selbet.

Irina : Selbet joined the Interstellar Union when this engine was already there. It was shared with them, just like with everyone else.

Vasily : I cannot agree with this.

Irina : Everyone expressed their position.

14:38 Free will in the world of reptilians. Khor Shu Mag about astral travel.

Maxim : I still have questions. I hope you will pay attention to me and answer my couple of questions. I'm wondering if you know about the existence of the Spiritual World?

Vasily : Of course.

Maxim : Do you know that Spirits incarnate not only in you, but also in us, and we can be brothers?

Vasily : We are familiar with this religion, with these postulates. Now I will write.

Maxim : It’s normal, I feel the flow, everything is fine.

Vasily : Of course, we are familiar with this religion, with these postulates. Why did so many Spirits become communists and fight with God?

Maxim : Is this a question for me?

Vasily : No.

Irina : If he said: “Why?” - of course, this is a question.

Vasily : Why did so many Spirits become communists and fought with God, and fascists who killed their own kind, if the Spirits were being prepared for life on Earth?

Irina : He already has an answer.

Maxim : I need to write it down.

Vasily : Is this a miscalculation or such an interesting calculation by the Spirits?

Irina : Now he will answer himself.

Maxim : I have a question. Does your civilization remember past lives during incarnation?

Vasily : No.

Maxim: Do you have freedom of choice?

Vasily: He’ll pick it up now. Can't find the term.

Maxim : That is, can you freely choose what to do?

Vasily : No. After training, everyone knows where and how they will live, what they will do.

Maxim : Are these rules your restrictions on the freedom to choose where to live and what to do?

Vasily : Everyone is happy, no one is hungry.

Irina : I have a few more questions, because the question has arisen about the existence of the Spiritual world and past lives. Khor Shu Mag, do you consider yourself an immortal Spirit?

Vasily : No.

Irina : What form are you in next to us now?

Vasily : I told you, I am a reptilian. There is no need to go to the Astral, in your opinion. We have a direct relationship with any planet.

Irina : I understand, there is such a way. I have it too. Khor Shu Mag, you know about the existence of astral travel among other curators.

Vasily : I don't admit it. If you want, I can invite someone else to join you who likes to talk about it.

Irina : You know that we communicate with astral bodies, for example.

Maxim : The fact that our curators come in astral bodies.

Irina : Many contactees do this.

Maxim : And many contactees communicate through astral bodies.

Irina : The contactees themselves come out.

Maxim : You are now in the astral body in order to transmit information through your contactee.

Vasily : I heard about it. No, these are direct contacts.

18:15 Form of contact between Choir Shu Maga and Vasily.

Irina : Where are you now? What's around you?

Vasily : On our planet, we call it Khorik.

Irina : You call her Khorik. So your eyes are open now and you can see your surroundings?

Vasily : My home and my relatives.

Irina : Okay, how does your thought end up on Earth?

Vasily : Something like your Morse code into your head into the pineal gland.

Irina : How does this thought travel 47 light years faster than the speed of light?

Vasily : Our technologies. This is for the specialists.

Irina : Explain how you understand this.

Maxim : Do you now use any technologies when communicating with us?

Vasily : I have a device on my head for transmitting my thoughts.

Irina : Do you see images and do you hear us through the contactee, and our images?

Vasily : Yes, in your opinion, a monitor, but not an iron one.

Irina : I understand. Now look at this monitor, is anyone else here? I mean, except for the three of us. Not in physical forms.

Vasily : Of the humanoids?

Irina : Yes, from humanoids.

Vasily : Vague images in the form of a hologram.

Irina : That is, in the form of energy, do I understand correctly?

Vasily : Yes, that's probably more accurate.

Maxim : Are there people on your planet who can communicate without these devices?

Vasily : On Earth.

Irina : Do you have people on your planet who can consciously leave their physical bodies?

Vasily : Reptilians.

Irina : Not on Selbet. Do you have people like this on Khorik?

Vasily : Reptilians, not people.

Maxim : Yes, reptilians. Do you have those on your reptilian planet who can consciously leave their bodies?

Irina : Not in a dream, but consciously.

Vasily : These are those who moved from Selbet.

Irina : Moved from Selbet.

Maxim : Look at how skewed civilization is. Civilization was given technology, but it was not taught spirituality.

Irina : I already understood. Okay, you said there are humanoids here.

Vasily : Technology is not needed here. That is, it turns out to be a complete denial of the Spiritual world, so you don’t have to ask about it. He wanted to explain what he didn't like.

Maxim : He will explain everything now, we will definitely listen to him.

Irina : We must first define the terms, otherwise we simply will not understand each other. That is, he said, he sees humanoids here, our curators in the form of a hologram, or more precisely, in the form of energy. This is very good. Khor Shu Mag, I thank you for these words. Tell me, is this hologram or energy, it was separated from the body of our curator. This is astral travel. What do you say about this form of contact? Just your opinion.

Vasily : It doesn’t suit me, but it’s interesting. I don't have it.

21:50 Khor Shu Mag about the reality of thoughts. Dictatorship and prohibition of spirituality on Khorik.

Irina : For example, my curator Kirchiton also studied, but does not go to the Astral. He uses mental contact and physical contact. This happens in the Interstellar Union too, that is, not everyone likes astral travel and is suitable for their vibrations. But the surprising thing is that your civilization does not deal with this layer of reality. Okay, this is, of course, up to you. We have now decided that for you there is only what you can touch. Can you touch your thoughts and feelings?

Vasily : Nonsense.

Irina : You just said that for you there is only the dense world.

Basil : Yes.

Irina : Are yours, for example, love and hate, dense for you? Are your feelings dense?

Maxim : Are these feelings real for you?

Vasily : I don't understand.

Irina : You said that for you only what can be touched by your five senses is real. I understood that, for example, this table would be real for you if you were here. For example, your thought that you are Khor Shu Mag, is this thought real for you, that is, are you real?

Vasiliy : Ya - yes, born.

Irina : What about your idea that you exist? When you close your eyes and stop seeing this world with your eyes, will your thoughts remain in your head?

Vasily : If I die, no.

Irina : If you just close your eyes.

Maxim : Can you close your eyes? Are your eyes not always open?

Vasily : We can.

Maxim : If you close your eyes, will you feel the reality that you are real?

Vasily : That is, scroll through your thoughts about your affairs?

Irina : Yes.

Vasily : Report to senior management?

Irina : Yes, are they real?

Vasily : When he closes his eyes, he is like we are drawing up a report to do for the top bosses.

Irina : Are these thoughts real for you?

Basil : Yes.

Irina : You said that for you reality is only what you can feel, touch? Can you touch your thoughts?

Vasily : No.

Irina : So are they real or not?

Vasily: Thoughts - yes.

Irina : So, what is real for you is not only what you can touch?

Vasily: I don’t understand well what you’re talking about. A bias towards the spiritual is your strong point.

Maxim: How is this our strong point? It is just a question. This is not a deviation. This is a question that you answer and ultimately avoid answering by saying that this is a bias towards spirituality.

Vasily: This is a difficult topic for us.

Irina : Why? What's hard about it?

Maxim : What’s hard about the topic about the reality of thoughts?

Vasily : Ban.

Maxim : Ban? Who established this ban?

Irina : I also wanted to ask.

Irina : A dictator.

Maxim : So you are saying that in the Interstellar Union there are only prohibitions and no development, and, at the same time, you are saying that you have a dictator on your planet who forbids you to study spirituality?

Basil : Yes.

Maxim : So, where are there more prohibitions and where is there less development? On your planet or in the Interstellar Union?

Vasily: Interstellar Union.

Maxim : Where did you get the idea that the Interstellar Union? The Interstellar Union allows us to think that thoughts are realities. There is no dictator in the Interstellar Union who forbids you to do something. Are you military?

Vasily : He says so. I wrote there above that he is a philosopher.

Maxim : Are there many military people on your planet?

Basil : Yes.

Maxim : You are not a military man?

Vasily : No, I am a philosopher.

Maxim : I see. So, I'm now approaching the topic of what you don't like about the rules of the Interstellar Union and their contact with us, and not only with us, and in the transfer of the information that they give us. What do you personally not like, or what do your dictators not like?

Vasily : Everything is very sleek.

Maxim : Sleek to what?

Vasily : They say what you want to hear.

Maxim : Isn't dictatorship a direct indication of how you should hear, how you should think?

Vasily : No.

Maxim : So you don't consider dictatorship a direct instruction?

Vasily : It is not direct, it is democratic centralism.

Irina : I understand. We are now moving on to more specific issues. You said that everything is sleek, they tell us what we want to hear. They should tell us what we don't want to hear, as I understand it, in your opinion?

Vasily : There must be opposition.

Irina : There are opposition parties in the Interstellar Union, including in relation to Earth. Another thing is that their polemics do not go beyond the framework of, so to speak, verbal polemics.

Maxim : Explain, he doesn't understand.

Irina: They can argue with each other on some issues, but only for the purpose of finding some kind of truth. Not with the goal of imposing your will or taking power. Specifically, what rules do not suit you in the Interstellar Union? Specifically.

Maxim: There is no opportunity to speak out completely, I didn't say anything.

Vasily : Swears.

Maxim : It's okay, let him swear.

Vasily : They discovered the Earth and created you, and you are not the masters on this planet. Papa Carlo flogged Buratino, and now Pinocchio says that Papa Carlo was not here.

Maxim : Do you want to be our hosts?

Vasily : Not us, but Selbet. And they do what they want. I wanted to talk about this. I've already talked about this. We have the rights of being created, we are not the masters of this planet. That is, they flew in and created it, the children grew up and began to tell their parents. Parents want to say who is boss here.

Irina : If children are given complete freedom to destroy each other, you yourself can imagine what this could lead to, Khor Shu Mag.

Vasily : What is the question?

Maxim : We want to listen to you. We want to listen to exactly those claims and your personal thoughts in relation to what is happening on our planet, and how, as you say, we are being deceived.

29:23 Reptilian race. Reptilian raids on Earth.

Vasily : Now I will talk about the reptilian race.

Maxim: Okay, go ahead **.**

Vasily : As owners, we or they (Selbet means) conduct experiments constantly. They use your organs, both dead and alive. Skin, bones, retina,

Maxim : What do they use it for?

Vasily : For your needs.

Maxim : What does this mean?

Vasily : Leather is very valuable.

Maxim : Who gave you this information?

Vasily : Just as the Chinese want to become white and with big eyes, they also have the same ones.

Maxim : So they want to be like us?

Vasily : Change the skin, yes.

Irina : Do your scientists know that in the Interstellar Union, biotechnological cell planning technologies were already discovered 10 million years ago?

Vasily : I don’t know about that. I will continue.

Irina : He says that you can take one skin cell.

Maxim : Who gives you this information if you yourself do not visit the planets personally in your physical body?

Vasily : Our Indians, who raid on Earth.

Maxim : Aliens. What does it mean that there are raids on Earth? Are you allowed contact with earthlings? They are not part of the Interstellar Union.

Vasily : Who will ban?

Irina : If the rules are followed, anyone can enter.

Maxim : He said “Indians”. That is, these are those who can act without any instructions.

Irina : Are you allowed to have physical contact with earthlings while following the rules of Picran?

Basil : Yes.

Irina : Naturally, I know, of course. This means that you are also allowed to install chips.

Basil : Yes.

Maxim : Does the contactee have a chip?

Vasily : From me?

Maxim : Yes.

Vasily : More than 25 years.

Irina : Allowed. (LiScioni speaking). I heard that reptilians take the skin. He wants to answer because he knows such technology. (He says). If Selbet residents need a retina, skin, any organ...

Vasily : ...and bones, he says.

Irina : ...and bones, for this there is no need to take this from the whole person. You can take a few cells, and after 7-10 Earth days there will be a pure population of cells grown in special biotechnological generators. If they really need it that much. We also transferred this technology to them, meaning the Interstellar Union, and it is available to everyone. It would also be available to you if you were in the Interstellar Union.

Vasily : It's easier to fly to you. We have money, in your opinion, and it costs a lot.

Maxim : One second, it turns out that yours are flying in and taking our skin?

Basil : Yes.

Maxim : That is, you are violating it, it turns out. Is your civilization breaking the rules and using us as guinea pigs?

Vasily : Of course.

Irina : They say, and Selbet too.

Maxim : Wait. Maybe you want to convey this information to us so that

our interstellar friends can deal with this situation?

Maxim: Do you understand what's going on?

Irina: They are not talking about Selbet now, firstly.

Vasily : I said that the Interstellar Union meeting is a bureaucracy. We have military power behind us. Militarized slang.

Irina : I understand. Such civilizations. The question here is what you just said that the civilization that is part of the Interstellar Union is carrying out.

Maxim : No. He said that their race, from their planet, "Indians" fly here and take our skin.

Irina : Does Selbet take it?

Vasily: We are talking about Selbet.

Maxim : Why would Selbet take our skin when they have cell growing technology?

Vasily : It's at the state level, and the "Indians" he was talking about are less controlled.

Maxim : Vagrants, we call them.

Vasily : "Uncontrollable", this is from their planet. I don't know, maybe it's all revealed.

Maxim : I don't understand. Just a second, I want to clarify. That is, you just said that "Indians" from your planet fly in and take the skin from our people. Not just skin. Bones, retinas, much more. I

understood you correctly? Just "yes" or "no".

Basil : Yes.

Irina : I understand. So, both about Selbet and about them.

Vasily : Who can, who has the opportunity to fly from their planet, for example. And from Selbet something like this is being carried out at the state level.

35:34 Technology of biotechnological cell planning on Selbet.

Irina : They have biotechnology, we know that. The Interstellar Union also knows. He himself transferred these technologies.

Maxim : As far as we know, the reptilian civilization is one of the largest civilizations spread across the Galaxies. Can you now talk not only about Selbet, but about those civilizations that are not part of the Interstellar Union, but are reptilian, and “Indians” like you attack and commit these atrocities? Do these bad things?

Vasily : Small group. Now. Maybe I won’t write now, the information goes through my head and then into my hand. An organization that is like the KGB.

Maxim : That is, this is a secret organization under the supervision of the government, do I understand correctly?

Basil : Yes.

Irina: (LiSioni speaks). If the representatives of your planet, where the military ideology is carried out, are militarized (as you said), and use the tissues of the people of the Earth for any of their purposes, but you do not have the same technologies that are on Selbet, and transferred by us, then this is already a choice of politics your government. Do not enter the Interstellar Union, do not obtain these technologies, but

simply create a negative image of us in front of your people.

Maxim : Of course, bureaucracy, there is a discussion going on there, but here they have a totalitarian regime.

Vasily : A natural product is better than artificial leather.

Irina : He shows me, it's not artificial. The cell itself divides under certain stimulators of mitosis, and there is life, vital force in it. It is transmitted from cell to cell, that is, it is not simply the reproduction of substances at the amino acid level. This is precisely the rewriting of DNA transcription, and it gives rise to new cells. All this has been studied for a long time, and I think your scientists are also doing such experiments, but they can be artificially inhibited by the government of your planet for certain purposes.

Vasily: Secret technologies are not distributed, they are kept secret. A certain group of reptilians deals with certain specific issues, that is, he is a philosopher, he likes to philosophize. He does not know any technologies, so he does not recognize spirituality. It's like a resume now.

Irina: Is your contact, Khor Shu Mag, initiated by the military? Is it carried out under their control?

Vasily: No, he has been doing this for a long time, and it makes no difference to him who he talks to, either me or you.

38:43 Rules of the planet Horik for contacts with earthlings.

Maxim : I'll ask you one more question: can you be wrong in your judgment about us and what information they present to us?

Vasily : Arguments. Prove me wrong.

Maxim : We have such a rule - the presumption of innocence. We

don't have to prove anything to you. You owe us an explanation of your form of proof, and I asked you a specific question: can you be wrong in your judgment?

Vasily : What did I say, this information is from my group of reptilians.

Maxim: Could your group of reptilians be mistaken in the complete information about the Earth and the Interstellar Union?

Vasily : We will be glad if our authorities allow us to look at this information.

Irina : Khor Shu Mag, but when you made contact with an earthling, you came out with the permission of Pikran. You yourself signed that you are familiar with the rules of contacts. Was there permission, as you said, to take any organs from a person without his consent?

Vasily: Horik. What about Horik? They have their own authorities, it turns out.

Irina: You yourself said before that you are in contact here with Pikran's permission. You said that they created us, etc. We remember this conversation. And that they give permission to contact earthlings, and you received it, to install a chip, for example, to a contactee. Since you received it, or some of your colleagues received it, it means that they signed on Picran that they are familiar with the rules of contact, for example, not causing physical harm. There was this rule there, did you see it?

Vasily : Our authorities are bringing certain information to our attention. Some people decide on these issues, others sign them.

Irina : I see. Have you yourself seen these Picran rules for contacting earthlings, as a contact specialist?

Maxim : I understand. They sign papers with their government, with a group of some scientists who belong to the government.

Irina : The government signs with Pikran.

Maxim : And they sign with the government.

Irina : I wonder if they don’t leave the boundaries of their planet at all?

Maxim : No.

Irina : I’ll ask now, do they have ships at all, ones that can fly?

Vasily : They don’t even sign.

Irina: What are they doing?

Maxim : They don’t even sign?

Vasily : He doesn’t sign. The group that decides this issue.

Maxim : Just gives permission?

Vasily : Yes. It's just a chip.

Irina : Khor Shu Mag, you yourself saw the rules of Picran, which were specially invented for contact with earthlings. There is a commission for contacts on Picran. It's called the "Commission for Contact with Young Races."

Vasily : Only adapted for us.

Irina : Have you physically left the boundaries of your planet?

Vasily : No.

42:05 Space flights for the inhabitants of the planet Horik. Life expectancy on Horik. Life on the planet Horik.

Irina: Do you have spaceships that can make interstellar flights?

Maxim: Yes, finally.

Basil : Yes.

Maxim : He said that there are “Indians”.

Vasily : He said that it was very militarized.

Irina : Can you, for example, buy a ticket yourself, as a civilian, and visit Pikran.

Vasily : Of the 7 billion, 3 billion are military.

Irina : I understand. Do you sell tickets to other planets?

Maxim : Of the 7 billion, 3 billion are military - this is a completely militarized colony.

Irina : I understand.

Maxim : They are not part of either the Interstellar Union or the Galactic Federation, which simply concluded agreements on the absence of wars.

Irina : So, there should be passenger starships, I think so. Do you have passenger starships to other planets?

Vasily : I’ll retire in 400 years.

Maxim : What is your life span? Approximately confirms age.

Vasily : The average is 800, but there are individuals up to 1000, the birth rate is regulated.

Irina : Khor Shu Mag, you said that there are immigrants from Selbet on your planet.

Maxim : Their numbers are regulated.

Vasily : These are cousins and second cousins.

Irina : They from Selbet fly to live with you in a certain city, as I understand it, or how do they live there?

Vasily : Organize and command.

Irina : What do they tell your residents about the Interstellar Union? They are part of it.

Maxim : Good question. If they control and arrive.

Vasily : I learned about this from you.

Irina : When I asked: “Astral travel is being studied by you?” - you say: “Only by immigrants from Selbet.” Is that how you answered?

Basil : Yes.

Irina : These settlers from Selbet, how many of them do you have on the planet, if you know?

Vasily : There are more than 1300 in our colony.

Irina : I mean those who arrived from Selbet quite recently, are there any there? At least for the last 50 years.

Vasily : Rotation is frequent, but there are no new ones.

Irina : What is “frequent rotation?”

Maxim : Change occurs often, but there are no new individuals.

Irina : Do you have direct communication with Selbet, as with the planet from which you came? Any flights?

Vasily: Only those who have passed the test.

Maxim : Listen, it turns out that someone from Selbet could organize an entire planet for himself. On it, organize your own specific rules and not let them into Selbet.

Irina : Too much time has passed.

Maxim : In order to maintain an army of 3 billion Selbetians, so that it can be released.

Irina : Too much time has passed. Some generations must have changed there already.

Maxim : No. Look. This could be a certain individual planet that is specifically not allowed into the Interstellar Union and is kept separately. Some ruler of Selbet.

Vasily : The dissatisfied are liquidated.

Maxim : That's what I'm telling you.

Irina : (LiSioni speaks). Since they are not part of the Interstellar Union, this planet is under its own government, with its own laws, and so on.

45:29 Are there contacts with the Interstellar Union on Horik?

Irina : Does your planet have contacts with the Interstellar Union? Not with the Earth, but with the Interstellar Union.

Maxim : They were completely deprived of spirituality there, they have a totalitarian regime there, they have complete subordination to management, they have their own laws there, but at the same time they obey those who fly from Selbet. Fine?

Irina : Let's see now. Do they have contacts?

Vasily : I will try to find someone in my circle who has more authority.

Irina : That is, he himself has not seen the Pikran rules, he says that they are given an adapted version. At the same time, he says that the Interstellar Union allegedly does not control something. It's all strange.

Maxim : “Gathering of bureaucrats.” Maybe they are simply being told that the Interstellar Union is a gathering of bureaucrats, so there is no need to join there.

Irina : She says that the state has approved the Selbet people to take skin and bones, which means killing and taking, as I understand it. And when I ask if you have seen the rules of Picran (now LiScioni asked) in order to see the rules for everyone’s contacts, he says: “Only an adapted version.”

Maxim : Yes, only for them. That is, it turns out that this planet is purposefully not allowed into the Interstellar Union in order not to make them free. They are all subordinate there; there is no democracy there. For them it is a transformed democracy through a military regime. And they have technologies for communication, communication, but there

is no awareness of spirituality.

Irina : (LiSioni speaks). In addition to the Interstellar Union and the Federation of Light, there are dozens of such planets that communicate with each other or are simply isolated in their own world, but are not included either here or here for various reasons. This is a good example of your civilization, what would happen if, with the level of consciousness that you have now, you could master interstellar travel?

Maxim : Very interesting.

47:43 Description of representatives of the drag empire.

Vasily : We are told that you are in the empire of the drags and obey them.

Irina : Vampires who?

Maxim : They are told that we are in the empire of the drags and obey them. How can we be in a drag empire?

Vasily : Your leaders and government.

Maxim : Our leaders and government?

Basil : Yes.

Irina : But Pikran, the capital of the Interstellar Union, is not a reptilian planet. This is a planet of anthropomorphs.

Vasily : So what?

Irina : Empire of drags, you mean Selbet? Drags - dragons?

Maxim : What is a “drag empire”, by the way. Wait, I have an interesting picture here now. The drag empire he is talking about may also not be part of the Interstellar Union, and may also visit our planet, and could also come into contact with our rulers.

Irina : Who do they call the “drag empire” and its capital? They can call either Burkhad or Selbet or anyone else.

Maxim: Well, yes.

Vasily : The Milky Way entered the neighboring Galaxy.

Irina : There is an Intergalactic Union, we know that.

Vasily: No. Physically.

Maxim : What does it mean, “physically entered”?

Vasily: Your Earth is on the periphery of the Milky Way, and the Galaxies have collided with each other, and you are in the dredge zone.

Irina : What is the capital of the drag planet in Pikran language?

Vasily : He suggested someone. He has no authority.

Maxim : What do dragos look like in his opinion? Let him explain what he understands as “drago”? What is this? Civilization of the reptilian type, or humanoid, or some other type, height, age.

Vasily : He writes: “White and gray, 5 meters tall.”

Maxim : Are they of the reptilian type?

Vasily: White imperial individuals, i.e. reptilians, with wings.

Maxim: This is not the first time I've heard about this.

Vasily: Reptilians with wings. White.

Maxim: Are they from 5 to 8 meters?

Vasily: He didn't see until 8, they are at the bottom of the social level.

Maxim: At the bottom of the social level among reptilians?

Vasily: At home. Scientists, military.

Irina: Okay. And for what reason is the Earth called that it is part of the dredge empire? What influence they have on Earth, let him then write, since he names a certain civilization.

Vasily: They are the owners. Can not say. Someone higher in rank and position can answer your questions.

Maxim: It's strange, you don't answer questions. They also scare us on Earth about chemtrails, but no one can prove anything. They provide either fakes or photographs of non-chemtrails. What you are saying now is very alarming.

Vasily: If you want, they will get in touch themselves.

Maxim: Through your contactee?

Vasily: Through me.

Maxim: Well, that's very interesting, what do you think?

Irina: Let him come out.

Vasily: We'll assign a number to Maxim.

Maxim: Yes. This is already more interesting, I already wanted to finish.

Vasily: And let him ask questions.

Maxim: What do you mean "assign a number"?

Vasily: When they opened the contact, they gave me some number.

Irina: I hope they don't install a chip.

Maxim: It's okay, I'll be a reptilian contactee.

Vasily: Like an INN, probably. I don't know what these numbers meant, so I can't say.

52:26 Is the Drag civilization included in the Interstellar Union?

Irina: Is this Drago civilization included in the Interstellar Union?

Maxim: Dear friends, if you want us to make a continuation of this video next time, you need to subscribe to our channel and like it. Then, based on your likes and the number of subscriptions, I will understand whether we should continue this conversation further with the higher representatives of the civilization of this planet that we were just talking about.

Vasily: To the question that was. They are older and more powerful, and accordingly, they do not recognize this and do not enter anywhere. "Shall we assign a number?" - they ask.

Maxim: Assign a number for what?

Vasily: For communication.

Maxim: What an interesting answer. I will be happy to answer questions from the Interstellar Union. If the Interstellar Union allows you to give me a number, I will be happy to assign it.

Vasily: I'm waiting for an answer.

Maxim: LiSioni, explain to him about assigning numbers.

Irina: (LiSioni speaks). Assigning a number to many reptilian civilizations is like an access number to information.

Maxim: Only through the permission of the Interstellar Union. If the Interstellar Union approves you to assign me a number, please do so. I trust the Interstellar Union completely.

Vasily: Okay.

Maxim: Everything is great.

Irina: (LiSioni speaks). Do you allow us to assign a number for communication? This is like a form of your permission to contact, and it can be not only here and now. If your Soul gives permission for contact, conscious consent, then this contact will happen if you match the vibrations. This number is the definition of vibration.

Maxim: Imagine, I match the reptilian vibrations.

Irina: They have it in the rules. Picran creates rules for everyone.

Vasily: The time will be 1-2 hours at a strictly defined time.

Maxim: I have no time to deal with your contacts. I have a very big job on this planet, and it's easier for me for you to transmit information through contactees at a time convenient for me, and not for you.

Irina: What is he saying?

Maxim: He's trying to set up a contact, trying to make him a contactee.

Vasily: I don't have the same level of access, what it conveys through me, with whom I communicate.

Irina: Can he give you permission to have a number?

Vasily: I had some number. I'll ask at home.

Maxim: Please ask here, because if they give you the opportunity, we will then make a video after a while with a more highly qualified military man who has more information about contacts and access, and about drago.

Vasily : I can't answer yet.

Maxim : Okay.

Irina : He wants to ask him about Drago. We will now find out what group they call it.

Vasily : This is classified information. The structure that controls these issues. No access. Everyone's access level is different.

Maxim : Now he can find us a contactee who has the access level to

answer these questions?

Vasily : No, in a month yours.

Maxim : Great, then we will dock in a month. I hope you will also stay in touch with him? Can you stay in touch with him? Or do you not have access to transmit such information or receive it or accept it?

Irina : Can you give this level to the contactee? Or is it necessary for me or Maxim?

Maxim : Will you be present at the meeting?

Vasily : I will tell you the name and time of departure. Only the first time.

Irina : Will you pass it on through Vasily or will it have to be through me? Can you give Vasily this level of access as a transmitter?

Maxim : So that not Irina herself, but Vasily came to us, and we also shot the same video?

Irina : I think that this is also important for him.

Vasily : If he wants.

Irina : Do you want it?

Vasily : I don’t know. I haven’t sat down or written for 5 years.

Irina : Are you interested in finding out and being a transmitter yourself? Maybe they'll upgrade your access level now.

Vasily : I don’t understand why and who will need this information?

You in the organization get along with it and concentrate.

Maxim : Earthlings really need this level of information now. Because a large number of planets come into contact, and each planet provides its own information, which differs from the information of the Interstellar Union. This sometimes misleads people who have contact with the Interstellar Union, and creates fears on this planet, which make it possible for destructive civilizations to exist and attract them to this planet. It seems to me that this is some kind of controlled colony by one of the Selbetites.

Irina : Selbet will now disown them.

Maxim : Of course, he will disown it.

Irina : He can fly to another planet only in retirement. This means that interstellar travel costs so much for them.

Maxim : They have a completely totalitarian regime.

Vasily : Hollywood made a movie about reptilian idiots. They walk around in wide raincoats and laugh constantly, they live somewhere in a garbage dump. There is such a movie.

Maxim : Our planet is very full of idiots, so they reflect reptilians in the form of themselves.

Vasily : Maybe someone has seen this movie?

59:44 Planet Ragelia is an empire of dredges. Plans to increase reptilian genes in earthlings.

Irina : LiSioni wants to convey some information through the Choir of Shu Maga to the planet's government, and he is sure that the government of his planet, in some form, knows about this conversation and is monitoring it. It’s about drags.

Vasily : Good advertising, there is also a princess in the form of a person marrying an American.

Irina : LiShioni (our curator from the planet Shimor in the constellation Andromeda) wants to convey to the government of Horik and the entire population. To those who know and hear about it. The fact that some of you consider (I will say in Pikran language) representatives of the planet Ragelia to be the masters of the Earth, then how will you motivate such a judgment? After all, not a single percent of genes are present in earthlings from this civilization. (Ragelia is the one you are talking about, the “drag empire”, not far from Rigel, from the constellation Orion originally, now they have a colony).

Vasily : Just about genes.

Irina : They match the description. Yes, they are partners of the Tumesoutians, but they did not give their genes. Selbet gave 5%. They had an argument that escalated into war. Ragelia never fought with Earth. There was no such thing.

Maxim : Why should they fight if this is a fairly developed, powerful race. They clearly understand why fight with those whom they will definitely defeat?

Irina : Physical contacts for the last 600 years with earthlings. Astrally, they say. On the contrary, they are constant critics of physical contacts, if it’s about Raheliya. He asks: “Didn’t you see such people on Pikran when there was a general gathering of civilizations?” “I don’t remember something.”

Maxim : Are they part of the Interstellar Union?

Irina : Yes.

Maxim : Which are called “drago”.

Irina : It is Ragelia who enters, but there are colonies that have separated.

Vasily : Over the next 50 years, the reptilian gene will be increased to 30%. This will help you become more resilient and withstand radiation. This is one of those issues that no one can interfere with or prohibit. These are your two generations.

Irina : (LiSioni speaks). We know about Selbet's plans, including joint genetic modification, and the hybridization of earthlings and Selbet people.

Maxim: Up to 30%, up to the third part they just want.

Irina: Yes. But these experiments are carried out with the consent of the contactees. Those. The specialists who do this take cells, as we said.

Maxim : And with the consent of the bureaucratic apparatus that we talked about.

Vasily : He wrote that no one can interfere. This is all they have planned.

Maxim : Just because you have plans does not mean that you will be able to do it, because we are a colony of the Interstellar Union.

Irina : You said that 30% of the entire population will have such genes. You need those hybrids that are obtained in this way, if you have successful experiments, you need to resettle them on Earth and replace earthlings with them. This cannot be done, because it will not happen without violence. Moreover, in two generations.

Maxim : Two generations want to hybridize.

Irina : This is a lot. People will not agree to this, and if they show

violence, the Interstellar Union will intervene.

Maxim : I wouldn’t be surprised if now he says about vaccinations, that vaccinations are in order to introduce reptilian genes.

Irina : It’s easier to introduce it not into vaccinations, but into intrauterine devices. It’s better to spray it on rubber products right away, so that it hits the genes.

Maxim : You can’t go to reptilians, you’ll give me an idea.

Vasily : You talk from topic to topic. I'll tell you then. From the plans: the number of languages and nations will be reduced. The numbers are stabilizing.

Maxim : How are you going to do this without our consent?

Irina : I keep the whole conversation in my head: everyone here is full and happy, those who are dissatisfied are eliminated. How unhappy will they be?

Vasily : English will be in Europe. Gays can, hints at the population size.

Maxim : I have a question. How are you going to do this without asking us, without asking our curators? Why did you decide that you can dispose of us? This means that you don’t like being controlled, but you yourself can control us.

Vasily : Your consent is not needed. You are created, not self-developed.

Irina : Who created them? You?

Vasily : And reptiles too.

Irina : Besides reptiles, who else created us?

Vasily : People.

Irina : Their participation in the gene pool is greater than that of reptiles.

Vasily : It will be equally.

Irina : Who will decide whether it will be equally divided, our civilization or yours?

Vasily : Drag dictators.

Maxim : Drag dictators?

Irina : Are drag dictators not yours?

Vasily : Emperor.

Irina : These aren't yours, are they? Are you a different civilization?

Vasily : Drags and reptilians are one branch.

Irina : I understand. Those colonies that belong to the Rigel group are the 292nd sector, approximately the constellation Orion and part of Taurus, the 292nd sector of the Galaxy. Is this what you mean?

Vasily : This is for your benefit, they collected the uniform.

Maxim : Do you decide for us what will benefit us?

Basil : Yes.

Maxim : Who are you to decide for us? Are you depriving us of freedom of choice?

Vasily : The owners.

Maxim : So you are our hosts?

Basil : Yes.

Maxim : What can I say here?

Irina : We will show you. Let people think. We asked everything, we all expressed ourselves about the Spiritual world.

Maxim : They do not have a Spiritual world, and accordingly, they do not develop spirituality. They have equipment. They are not part of the Interstellar Union, they are not part of the Federation of Light. They are directly subordinate to the drags, as far as I now understand, or contacts with the drags. They believe that we should not have freedom of choice in who we should be.

Irina : There are plans. (LiScioni smiles as he speaks). At the present time, even you, Khor Shu Mag, are forced to contact this contactee according to the rules of the Interstellar Union. You can't change his DNA unless he wants to.

Vasily : Soviet Union all over the Earth. The future generation is not yours.

Maxim : Whose?

Vasily : Our future for 50 years, he wrote. Our next two generations.

Irina : (LiSioni speaks). I paraphrase the words of Solomon, who was the incarnation of Saint Germain. He was talking about a person. I will paraphrase for your race: “There are many plans in the heart of a reptilian, but only what is determined by the Lord will be accomplished.” What is determined by the Lord will be accomplished.

Vasily : It will be so if it works out. What your God wants, even his Son does not know.

Irina : You know what God wants, as a part of God. You need to look into your heart and you will see the truth there, which is in the light of Love.

Vasily : Spiritual again. I have not developed this.

Maxim : If you are our hosts, then why did you ask my permission to contact?

Vasily : If you don’t sit down to write, there will be no conversation. This requires consent.

Maxim : If you are our masters, why do you need my consent?

Vasily : It works for dialogue.

Maxim : Doesn’t the master have the opportunity to order his slave to enter into a dialogue?

Vasily : In this case, no. You can only send information. It needs to be processed and voiced.

01:10:29 Prohibition on modification of the human race.

Maxim : So you are not my master if you cannot order me. Who is my master then?

Vasily : We are talking about the restructuring of the race and composition of the Earth.

Maxim : Without our consent, without the consent of those who created us together, you have no right to do this.

Irina : There is already a ban.

Maxim : There is a ban. You can't do anything until you regulate this ban. And this ban was given precisely by those whom you call bureaucrats.

Vasily : If they can. That is, he insists that they do not need permits or approvals.

Maxim : They do it out of chaos. Complete lawless people.

Vasily : We decided to complete the stage.

Irina : Now we have listened. Curator, I thank you. Khor Shu Mag, I thank you.

Maxim : And I thank you, Khor Shu Mag.

Irina : For all the answers.

Maxim : For your frankness.

Irina : (LiSioni speaks). And on Selbet there are groups that advocate such an expansion of contacts with Earth. In any case, we have freedom of opinion. But these opinions cannot cross the boundaries of physical actions, to contacts. Because if they break the law, they will be isolated. They understand this very well.

Maxim : You will not be allowed to change us, because there are rules of the Interstellar Union, to which you obey.

Can you imagine the chaos they have on the planet?

Vasily : I told you where I disagree. I've seen a lot of videos online.

Irina : (LiSioni speaks). How do you, Maxim and Irina, like to get acquainted with alternative views on your race?

Vasily : They write that our uniform will not be changed. Content only. They say that this is only for the good. It turns out that we don't understand.

Maxim : Indeed, we don’t understand that it’s good for us that they will turn us into reptilians. How can we understand this?

Irina : I have a question, Khor Shu Mag. Is your contact with contactee Vasily, his visit to us, connected with checking the Interstellar Union of all reptilian bases on Earth and not only?

Vasily : I wanted to talk to you, this is my initiative. I only talked to them twice.

Irina : This desire to talk to me is due to the fact that a check of reptilian bases has begun for compliance with the laws of the Interstellar Union. Now it has begun. If you are in contact with Selbet, you know about this.

Maxim : They consider us artificially bred, like, animals. And, at the same time, he says that our “Indians” are taking your skin. Of course, if they think so, they will fly here and take the skin. For them, we are animals that can be changed, changed, built into something.

Irina : (LiSioni speaks). This technology has been known for many millions of years.

Maxim : It is clear that they do not use this technology. They generally consider us animals. It’s easier for them to just take a ready-made animal than to use this technology. Moreover, they most likely do not have access to this technology.

Irina : He believes that such scientists might even be banned on their planet.

Maxim : They have technology, but they do not transfer it.

Irina : They may not allow the promotion of this technology because they think it is expensive. He talked about it.

Vasily : I wanted to talk to you personally, this is my initiative. I have seen videos online and do not support the views of your curators. I spoke out. The conversation ends.

Irina : Which views do you not support?

Vasily : I wrote about it. The methods they use. We need to end the conversation. We are repeating ourselves.

Maxim: I'll ask the last question. That is, you completely deny the existence of the Spiritual world and the subtle material world, did I understand correctly?

Vasily: Correct.

Irina: So, these are the views you don’t support in the Interstellar Union? Then his suggestions. How does he propose to contact the Interstellar Union?

Vasily: He does not agree that the curators convey that we develop ourselves, and no one interferes. That was the essence of his desire to meet you.

Maxim: We know that they are interfering, but they are only interfering in terms of promoting us.

Vasily: They interfere in such a way that they do not need permission from anyone. Bureaucrats.

Irina: LiSioni does not agree that permission is not needed. If they violate, they will simply be put in a galactic prison if this leads to any consequences. If they don't, they will be removed from contacts. If these are some kind of criminals who fly to Earth, then this is already outside the laws of the Interstellar Union, but they can be detected and isolated.

Vasily: Selbet is behind us, fight.

Irina: So Selbet already fought 12,000 years ago. I think the Selbet race remembers very well the traditions of their homeland about this. About the consequences of this war.

Vasily: They don't think they lost the war.

Irina: Why did they stay outside the Interstellar Union for 250 years? They agreed to isolate those who started it.

Vasily: Technology.

Irina: There are such views.

Maxim: We understand everything, we thank you for this contact. The contact was very informative. I think that this was a very useful contact for those people who watch us.

Vasily: Summary. Your resume.

Irina: Summary. Since you have criticism of the Interstellar Union, LiSioni wants to ask then for your suggestions, Hor Shu Mag. They will be transferred to the Interstellar Union, regarding contacts with earthlings. What to change?

Maxim: What should be changed in terms of contacts with earthlings, and how to conduct these contacts correctly?

Irina: I will pass everything on to the contact committee. Oh, hi. The Burkhadians came up and were also listening.

Maxim: Let it go.

Vasily: Will you communicate with Vasily, Maxim or someone else from your team?

Irina: So he doesn't give them anything?

Vasily: He said he'll pick someone up if you agree.

Maxim: Yes, we agree. We're meeting in a month.

Irina: I don't know. I can chat or he can.

Maxim: No, let's do the same through him.

Irina: Will I have to write or will he come in the Astral Plane? Oh, they don't know how to walk in the Astral.

Vasily: Who will be the interlocutor?

Maxim: Irina.

Irina: Will I have to write, or will he come in the Astral Plane? I also

know such a contact. I already have additional chips.

Vasily: He said to write in Russian. He said that it is a public language. He understands, he has been on Earth for more than 110 years.

Irina: They scanned me, checked me? Will I be able to transfer? Will they be satisfied with my transfer?

Vasily: Quite.

Maxim: Everything is great.

Irina: Please.

Maxim: Then, see you later.

June 24, 2021.

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia Project and the Center for Spiritual and Physical Development;

Vasily – contactee;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world;

Khor Shu Mag is a representative of the planet Khorik, a reptilian.

#296 Live broadcast. Vaccination - truth and lies about vaccinations! Projects and practices of the Interstellar Union

https://blog.cassiopeia.center/vakcinaciya-pravda-i-lozh-o-privivkah-proekty-i-pr
https://www.youtube.com/watch?v=usu3cPzqMwE

00:07 Welcome to the participants.

Irina: Hello, dear friends! I greet you all. Good evening.

Maxim: Hello everyone, dear friends. We are on another interesting broadcast. As always, we have a lot of new interesting news. By the way, we are very happy: a lot of negative videos are being made about us, which means that, to some extent, we are becoming more popular. Cool.

Tell me, please, how can you hear us? I will now watch the chat in Telegram: question and answer. I would like to remind everyone that you can ask questions you want to ask in the Telegram chat. I will give a link to the Telegram chat on the side. "You can hear it perfectly." Thank you very much for your feedback. Let's start with very interesting news: another video was shot about us about Irina's astral travels, about the practices of the Interstellar Union, where Irina goes to the Astral.

Irina: She also talked about physical flight. And then about the astral.

Maxim: These are probably super mega sleepers. They know everything for sure. Therefore, I say a huge hello to these sleepers who see reptilians everywhere, see “grays” everywhere, and they are trying to get rid of reptilians and “grays” for a lot of money. If you want to see the whole truth about some sleepers, we have a video: “A reptilian in the uterus for 500 euros.” This is how sleepers work. They first create a bunch of fears. Then you are relieved of these fears for a lot of money.

02:22 Law of energy exchange.

Irina: Greetings (MidgasCaus speaking). When they say that earthlings give their energy to reptilians and, supposedly, aliens of any race, which does not matter, you can blame any race, they take away energy and life potential, these words are designed for the egoistic principle in man. “This is mine, I have less of it, someone has more.”

You are a divine being, and according to divine law, no one has the right to take your energy from you without your consent. But, there is one “but”.

You yourself can voluntarily give energy to any entity if you begin to send it some emotion, some feeling. Here it is very important to understand that even just thinking about some creature, about any creature, about an earthly creature, about an earthling, about an alien, about a disembodied Spirit, about a plasmoid, about some kind of personality, you are already sending energy. Any thought is energy. This is the basis of any esoteric theory, any practice. Even if you ask the girls who were in this video whether they will confirm that any thought is energy, most likely they will confirm this. Because everyone knows this from esotericists.

Maxim: Guys, the task of these sleepers is to spread misinformation to our audience, to intimidate you, and part of the audience will come to them to cleanse themselves for a lot of money. Therefore, be careful with such sleepers who talk negatively, so that later they can remove this negativity from you for money.

Irina: To sow negativity, they take advantage of people’s ignorance in

spiritual matters. Even the very word “aliens are taking away energy potential” is already aimed at the target audience that is completely unaware of the laws of energy exchange. We can (LiScioni says) protect people from this negativity only by explaining to them the laws of the true Divine World. Each of you knows these laws in your heart.

05:15 Energy of thought.

Irina: Any thought is energy, any word is energy. That is, every thought and word consumes your energy potential. For any feeling, for any emotion. These two girls who watched Irina spent an hour of their time and said a lot of words. They directed their thoughts to Irina, sent energy to her at that moment and to those entities that communicated with her. For example, if they called Ashtar a reptilian, talked to him, thought about him, at that moment they were already directing their energy to him.

But what it was charged with is, of course, a question. That is, the energy can be charged either with positive feelings, positive or negative, but it cannot but exist if they have already started talking about Ashtar, Irina, Mitya, and so on.

Maxim: Yes, guys, be more careful when communicating with people who say that you cannot communicate with light beings. In the video they talk about how they cannot communicate with light beings.

Irina: And then they communicate with Seraphim Sarovsky.

Maxim: It's okay. Be careful when communicating with such people.

Irina: They say that light beings will not fly to Earth in a physical body, that they only come in “Spirit”. What are they saying by this? The “dark” ones only fly on ships, and the “light” ones come in the “Spirit”.

This suggests that they perceive technological progress as evil. That is, they believe that if an entity arrived on a ship, if it has a chip, then it means it is engaged in dark deeds. This view is common among some esotericists who do not understand the true price of matter and the true

value of technical progress.

But please note that these two girls are enjoying the fruits of earthly progress in the form of a computer. This means that they are from dark forces if they condemn progress.

Maxim: Irina, I propose to finish the conversation about incomprehensible sleepers who create an audience for themselves in order to later earn money.

07:39 Interaction of energies. Consequences of negative energy.

Irina: They won't be able to earn money if they explain to people that every thought is energy, every feeling is energy. If they said that Ashtar was a reptilian, and they had such a feeling, they sent energy to him themselves, he did not take it away.

If you send negative energy of fear, as Maxim said, anger, hatred, irritation to any entity, this energy, if you sent it to a light entity, will leave it back to you, it will be reflected from its field. Your energy potential, which is charged with negativity, if it is a light, high-vibration entity, will go back into your field. Strengthened to the extent that its field is more powerful than yours.

If there is a negative entity, it will absorb this energy, but, according to the laws of exchange, it will send you its own, which is charged with negativity. Your choice is who to send your energy and what kind.

Maxim: Therefore, guys, our project becomes dangerous for many other projects due to the fact that we tell you and show you how energies work, how to work with these energies, how to work with entities, with space.

Today the broadcast is dedicated to all our projects and practices. Under this video there is a link that will take you to all the practices of our Cassiopeia project. Also to the practice conducted by Irina from representatives of the Interstellar Union.

Today was practice. Irina conducted astral travel at 14:00. Every Sunday on the ship to Ashtar. This time there were a lot of people. Many more people went to the Astral.

Guys, join us. Every Sunday at 14:00 Irina conducts astral practices. We will choose one day a week, during lunch we will teach people how to relax properly. Until you relax, astral practices and travel will be difficult.

Irina: To go to the Astral and remember your journey, a person must have relaxation skills. If he doesn't know how to do this, everyone will leave, and he will only just begin to relax. He does not know how to do this quickly, and this delays him.

Maxim: A huge hello to all sleepers and regressologists. To everyone who pours a lot of energy on us.

Irina: They give us a lot of energy.

Maxim: And potential. Irina, let's start with galactic news. Today there are 1100 people. You can already tell the news. Will LiSioni or MidgasKaus tell the story?

Irina: LiSioni wants to tell you. Galactic news is connected with Irina's astral flight to Ashtar and with the physical one - with Kirchiton to Ashtar Sheran and Mitya. With that meeting that took place a month ago.

On Picran they announced that an official response from the government structures of the planet Mantuk had arrived. From there Mitya. They do not support his accusations regarding the reptilian races that he listed. They consider all the arguments he lists to be his personal opinion.

However, the verification of all reptilian bases on Earth is almost complete. The Tashigan bases remain. No further violations were identified. Our security service reported. Now they will begin to check the bases in the solar system.

Maxim: Great news! Guys, chemtrails have become very active. Some secret government space programs. They even began to unite. We are ready to give feedback to any contactee who talks about chemtrails or secret space programs. According to the Interstellar Union, we can explain what is happening.

Irina: (Mead speaking). There is one more news, rather an observation of planet Earth. In the last week, negative emotions regarding fear for one's health and harm to health have intensified. That is, there is more negative energy on this topic in the Earth's egregors. It is associated with a general fear for one's health, for one's physical life and the life of one's children.

13:16 Creating the future.

Irina: I want to remind you once again, dear friends, that the reality in which you will live tomorrow is being formed today, now. Therefore, if you create images that you are being vaccinated with the wrong vaccine, that you will die, that it will be bad, that your government will drive you into a concentration camp, then material reality will gradually begin to adapt to them. From God's point of view, you have the right to such a strange choice. But still, God and all the bright beings of the Universe wish you not to be in fear and despondency, not in powerless anger against the evil Masonic or other government, but in acceptance, love, creation, creativity. Only this helps to increase your vibrations and the surrounding space, your egregors, including political ones, and eliminate all problems with physical, mental and spiritual health.

Maxim: Today the most pressing topic is the topic of vaccination. And I would like the representative of the Interstellar Union MidgasKaus from the planet Esler, a biologist, a psychologist, he is also a doctor on his planet, to talk in more detail about what vaccines are, what are they needed for? Is there any suspicion that vaccination on Earth is designed to reduce the population? Why is vaccination necessary?

Irina: Maxim is right in dispelling fears. But this cannot be done without explaining the phenomenon that is feared. There are many myths surrounding the phenomenon of vaccination. They are generated by

certain forces in your society, which are called in the language of the contactee the anti-vaccine movement.

16:09 Anti-vaccination movement. Vaccine.

Irina: Such a movement exists, as far as I was able to trace in egregors. The goals of the creators of the movement are to reduce the vibrations of earthlings, trust in medicine, and in science in general. Creating a negative image of medical and scientific workers, government agencies. They have their reasons for this. I want to talk about vaccination, what it is. We'll start with history.

Maxim: Just shorter. We cannot occupy the entire airwaves with vaccination. Briefly, just about vaccines, what vaccines are needed for, and whether the vaccines that are now being made on Earth are dangerous.

Irina: The word “vaccine” is translated “cow” from Latin. Would it be interesting to know what the cow has to do with it?

Maxim: People are not interested in what the cow has to do with it, Mid. People are wondering what the vaccine is for and whether it is possible to get vaccinated. Whether it is necessary or not, we understand, everyone decides.

17:55 How the vaccine works.

Maxim: What is the vaccine for and is it possible to make it? Is it possible to get vaccinated? What are the consequences of vaccination?

Irina: Briefly. Even in ancient times, it was noticed that cows suffered from the so-called “cowpox”. Milkmaids who milked these cows develop the same blisters on their hands as cows have on their udders.

It was also observed that people who had blisters and then went away

did not get smallpox. There were epidemics of smallpox, entire cities died, and those who survived were either mildly ill or not ill at all, those who had blisters on their hands. That is, those who became infected from cows.

Scientists began research and found out, without knowing that it was a viral disease or an infectious disease, that in a mild form the disease causes a person's immunity to it in a more severe form. This began the introduction of a microbe into the human body so as not to get sick in the future.

That is, vaccination is a form of protection. How does it work?

Every person's blood contains cells called lymphocytes. These are human biological immune cells. Lymphocytes are responsible for immunity in the blood and tissues of the entire body. Lymphocytes have a unique ability to remember the microorganisms they encounter. They remember for different times. Depends on microorganisms.

Vaccination is based on this feature of lymphocytes. That is, when a foreign protein enters the blood, lymphocytes begin to interact with it, developing a defense system for the entire body. What is it for? When this microorganism enters in large quantities.

Maxim: Irina, Mid, people are not interested in what a vaccine is! A lot of negative messages: "Are we idiots or something, don't know what a vaccine is?"

Irina: She writes that it's interesting!

Maxim: No, they are not interested. I am 100% sure of this. The people, as uneducated as they were, will remain uneducated. Not interested!

Irina: Then what's the question?

Maxim: There was a specific question. Is the vaccine currently being

made on Earth against coronavirus dangerous?

Irina: He can't answer without explaining. You see, they write about the genome.

Maxim: Explain further then.

Irina: I explain the mechanism of action of the vaccine so that people understand. It acts mainly on lymphocytes, which remember information about this microbe. When it enters the body, defense systems are activated to destroy it and eliminate it before it multiplies.

That is, when a microbe enters an unvaccinated body, lymphocytes need time to study it and develop a defense system. In a vaccinated body, this time is not needed. To be short and precise. I'm saying it as simply as possible now. Everything is more complicated, but I simplify it as much as possible.

22:51 Human genome.

Irina: What is the genome, what can change it? The genome is the information contained in chromosomes at the DNA level. Your DNA is changed by any virus that enters the cell, starting from the influenza virus, any acute respiratory disease, papilloma virus, all types of hepatitis: A, B, C, HIV infection, etc.

Any viral agent changes the DNA of the cell into which it enters so that the cell begins to produce proteins that the virus, and not the body, needs.

23:40 Composition of the COVID vaccine. The body's reaction to the vaccine.

Irina: Specifically about COVID **.** The vaccines that I have studied, the vibrations of people that I have examined with these vaccines, lead to the conclusion that there are no live or dead virus particles in COVID vaccines. In this vaccine.

Maxim: What does this mean?

Irina: There are no viruses there. For example, there is a vaccine against the measles virus. It contains a live but weakened virus.

Maxim: No, guys, we were not vaccinated. We got over COVID. We have developed antibodies. To vaccinate or not, choose for yourself. If you have not been sick, you are an old person, you have normal immunity, there is no prohibition on this vaccination.

Irina: There is no point in putting a live or dead virus into the COVID vaccine. There is no viral particle there. There is a piece from the body of the virus. If the body of the virus is like a crown. A small part of the crown was cut off from the main virus and placed into the vaccine. A segment of a virus that contains a protein specific to it. Lymphocytes react to it and develop protection against the whole coronavirus. This is the point of vaccination.

It is impossible to get coronavirus from a vaccine. It does not contain it even in dead form. Your temperature may rise, but not because you got COVID from the vaccine. An increase in temperature indicates that your body has begun to produce a large amount of antibodies. Antibodies are substances that are produced by lymphocytes to protect against the virus, which is created by the vaccine. But it does not increase in everyone; each body reacts differently. For some, it increases slightly, for some, lymphocytes produce antibodies without an increase in temperature, for others, with an increase in temperature. But you should not think that if the temperature has not increased, then antibodies have not been developed. They are produced without an increase in temperature.

26:49 Side effects of medications and vaccines.

Irina: Regarding safety. I emphasize that any vaccine is a medicine. Any drug can have side effects that are individual to each person.

A list of the most common side effects is usually found in the instructions for the drug. Acetylsalicylic acid, any vitamin preparations

you take, any vitamin (B6, B12) have side effects.

All herbs have side effects. For example, frequent use of coltsfoot leaves in large doses causes liver damage, especially in children. Licorice root in large doses causes complete hormonal imbalance, especially in premenopausal women.

Any medications, herbs, or substances that you take internally have side effects that may or may not occur depending on the individual reaction of your body.

If you are taking medications for illnesses, for example, you were a child and took antibiotics, painkillers, etc., then you were at great risk: you could experience side effects that are described in the instructions. But, nevertheless, you did it.

If you have taken drugs or herbs throughout your life, then I see no reason not to get vaccinated for fear of side effects, because they are no more likely to occur from the coronavirus vaccine than from any other drug.

29:14 Safety rules for vaccination.

Irina: To reduce the likelihood of side effects, there are rules for vaccinations. The first rule of any vaccination, including COVID, is to take it without fear. If you are afraid of a side effect or negative impact on your body, then any medicine, even the best in the world, any vaccine, the most expensive drug will significantly reduce its positive effect and may become harmful. Having accepted it, you will endow, charge with your mental energy that it should harm your body.

Maxim: Guys, we are not with the Masons. We tell simple things that are conveyed by a representative of the Interstellar Union. He is a biologist, psychologist and energy specialist. We are for enlightenment, for increasing the level of awareness and perception. You are kept in fear in order to control you. We are trying to tell you that there is nothing to be afraid of. If necessary, I will get vaccinated on the advice of interstellar friends, I am not afraid of this matter.

Irina: I'm not afraid either, please.

Maxim: I'm not afraid to get vaccinated. At this point in time, I do not need vaccination. Why? Because I was sick, I have antibodies in my body.

Irina: They write that they have very high antibodies, but they were forced to.

31:06 Forced vaccination.

Maxim: Mid, how can you explain to them when they are forced to take the vaccine? People don’t want to, they are afraid of the vaccine, but they are forced to get vaccinated.

Irina: Your local rulers and officials from the Ministry of Health are not familiar with energy security laws. Therefore, they make decisions in this way: through fear of being fired from work, they are not allowed to go anywhere, they are forced to take the drug, supposedly showing concern for everyone. The law was released.

This is typical for earthlings, for your civilization, and manifests itself in many areas. There have been vaccinations against other dangerous, from the point of view of your government structures, diseases before. During the period of dangerous epidemics, up to the impact of security agencies, they vaccinated.

Maxim: Guys, if there were no vaccines on Earth, we would have died long ago, like Pithecanthropus. There are forced vaccinations because there is an understanding of how the virus spreads. I'm not talking about what you should or shouldn't do. I say that there is nothing wrong with the vaccine itself, you are simply intimidated by chemtrails, the world government, etc. I will say this: to some extent it is, but not in the form in which it is presented.

It is up to everyone to decide whether to vaccinate or not, but there is a group of the population that the state is obliged to vaccinate. Because she will work with other people. If the state has made a decision, you

have a choice: stay at this job or leave and not get vaccinated.

Irina: Once again about side effects.

33:47 Preservatives in the coronavirus vaccine and other vaccines.

Irina: The vaccine against COVID, the composition of which I was able to feel at an energetic level, in addition to a piece of coronavirus, contains fillers that preserve it and prevent it from collapsing. This is a protein substance, it can be destroyed, preservatives are needed.

Maxim: What preservatives? Mead, please tell me.

Irina: Most often, these are inorganic aluminum compounds. You get them in larger quantities from aluminum cookware, from Almagel and similar drugs that are used for high acidity of gastric juice. This is usually aluminum hydroxide or aluminum salts in inorganic form.

Maxim: Vladimir Maximov correctly says that the problem is trust in the authorities. Now there is a huge amount of misinformation against the authorities regarding chipization and 5G. This is done in order to destroy our statehood and sow fear in us. Our task is to unite, and not to destroy what exists.

Irina: What? “We vaccinated my grandmother against COVID and, as soon as the grandmother is nearby, Bluetooth looks for a connection.”

Maxim: Aluminum crumb connects grandma to Bluetooth.

Irina: There are many who have been vaccinated. We need to check Bluetooth to see if it establishes a connection with the vaccine.

Maxim: They ask what to do with aluminum, lead, and other agents that enter the body along with the vaccine?

Irina: He said that this vaccine contains aluminum. Hydroxide.

Maxim: Are there other connections?

Irina: There is definitely no lead.

Some vaccines contain organic mercury compounds, but not this vaccine. Some contain formaldehyde, but not this one. Mercury compound in the amount that is found in 300 grams of sea fish.

Formaldehyde is found in some types of whooping cough vaccines. They are made for children. It is found in greater quantities in the inhaled air. Factories produce formaldehyde, especially those that make plastic. He is everywhere in the atmosphere.

36:48 Will immunity from vaccinations decrease?

Maxim: Mid, if you get vaccinated every six months, will your immunity decrease?

Irina: What to vaccinate against?

Maxim: From different viruses. From coronavirus, from T-virus, etc.

Irina: It was necessary to explain in more detail how the vaccine works. This is memorization. How can immunity decrease from remembering any pathogenic agent? Does your memory get worse if you read a book?

Maxim: No, it’s not getting worse.

Irina: How can immunity decrease from memorizing an antigen? Explain the mechanism.

Maxim: Tanzelia, I'm not saying that I'm the only smart one, I've been living with aliens for a year and a half. Therefore, I would like to explain why people are kept in fear. They begin to have a destructive attitude towards a bright project that is built on love, from the heart. The Soul of Irina, mine, and many people who support our project is invested in the project. I would like to tell people that we live in the Light of Love, in the Light of God.

Many contactees, regressologists, sleepers spread dirt. I don't wonder why so many people get sick and die.

I wake up every morning and thank God for every day. It doesn't matter whether I'm vaccinated or not, everything is according to God's will. As long as I need to live, I will live in this Love. If I have to die tomorrow, I will die and will not stop loving God.

Guys, ask your questions in the Telegram chat. We love you very much too, and it's a shame that they keep you negative and give you terrible information. Moreover, even our graduates and friends fall for this information. When we call each other, we have to work with people for a long time to explain the situation that is happening not only in Russia, but throughout the entire planet.

39:43 Safety rules for vaccination.

Irina: (MidgasKaus speaking). I always consider the likelihood of different actions by your authorities in this situation. If stricter vaccination measures are taken than now, and they are forced, you will go there. They can do that. To protect you in this situation, I, as the curator of Irina and the entire Cassiopeia project from the Interstellar Union, am obliged to tell you.

If you take this substance with fear, you may have the most unpredictable reactions. Therefore, any medicine, any vaccine, any food must be taken with gratitude to those who created them.

Maxim: We will probably rename the topic of the broadcast to "Vaccines and the usefulness of vaccines." We wanted to talk about

the projects of the Interstellar Union.

Irina: Let's say this: "Vaccines. Benefit or harm?

Maxim: Does the virus have vibrations?

Irina: Every living being has vibrations and every substance.

Maxim: Irina, they ask you to tell us about today's astral flight to the Ashtar ship. How many people did you see there? Who was there on the ship, what happened? When I sat next to him and controlled the program, the broadcast, I felt that I "flew away" twice.

Irina: I saw you there.

Maxim: "Maxim, let me listen!" Yes, listen, of course. All the programs, all the programs that are made so that you listen and hear what our interstellar friends are telling you. Tell me, Irisha.

Irina: He doesn't instill fear, but warns. If you take the drug in high vibrations, it will have the most beneficial effect. If you take the best drug, vaccine or food in the world with fear or another negative emotion, it (at least) will not bring the benefit that it could. Your psychological attitude plays a big role.

Maxim: "Maxim always proves unconditional Love by screaming."

Irina: Why scream? He doesn't scream.

Maxim: I talk very emotionally when I understand that people are in fear. I am very pleased when people are in Love.

42:57 Astral visit to the ship of Ashtar Sheran.

Maxim: Please tell me, Irisha, about today's flight to the Ashtar ship. What was there, who did you see, what was happening?

Irina: Today I flew with you to the ship of Ashtar Sheran and his team. I was not only on his ship, but on seven other ships, moving between them. I remember it. I was surprised that representatives of various civilizations gathered there in astral bodies. If you see a creature, it is not necessarily physically on the ship.

Maxim: "Let your alien expand himself with these vaccines."

43:41 The effect of terrestrial viruses on aliens.

Irina: Mid, are you going to get vaccinated? And you, LiSioni? (Mead speaking). We have our own methods of protection, especially since a virus from another planet does not affect us because it has not, evolutionarily, developed ways of introducing itself into our cell.

Maxim: Guys, please like us if you like our programs. Sometimes you want to cancel live broadcasts because the questions are the same. But because you support us, like us, we see that you need us, we go on air every Sunday.

Irisha, tell me, sorry, interrupted. We have a chat in Telegram. I read the questions from it, and you read from here. People will think: "Why do I go to the Telegram chat?"

"Irisha, you look good." They ask: "Who did your hair?"

Irina: Maxim.

Maxim: Before the broadcast, I combed her hair.

45:00 Representatives of the Sagittarius civilization on the ship of Ashtar Sheran. Intelligent underwater civilization.

Maxim: Tell me, Irisha, about the contact.

Irina: There were representatives of various civilizations in astral bodies. You don't have to be physically. There were representatives of civilizations that I did not know. I asked where they were from.

We were from one of the planets in the constellation Sagittarius. It was the first time I saw such creatures. Their skin is grey-blue. The blue-gray color shimmers in their astral bodies. They said that their physical body had the same color.

They are located in the constellation Sagittarius, over 2000 light years from Earth, and are part of the Galactic Federation of Light. They are not included in the Interstellar Union. They treated. The spirit was restored. They directed the rays, just like cosmoenergetics sessions are done. Reminds me. They made movements with their hands along the chakras of the astral bodies.

I was surprised: this is the first time I've seen this civilization; I've heard a lot about them, but I've never been. In the constellation Ursa Major there is a civilization of intelligent underwater creatures. They resemble our dolphins, only larger, different colors, different eyes.

Let's say roughly: intelligent dolphins. They incarnate not animal Souls, but rational Spirits. Their nervous system is capable of receiving an intelligent Spirit.

Since they live underwater and have fins instead of arms, they swim. They do not have the ability to build a spaceship and physically travel in space. This civilization is part of the Interstellar Union. They can travel in tanks specially created by other civilizations.

In the Astral there are no obstacles to visiting other worlds. I saw that they could take the form of a dolphin or fish, only their eyes were human, round. This was the first time I met these creatures. They observed the work of representatives of the Interstellar Union and the Galactic Federation of Light. It was obvious that they were there for the first time.

I saw that Krishna and Jesus Christ were present in the form of phantoms. I turned to them. They told me that they came with contactees. There are contactees with whom phantom curators are almost constantly in phantom form.

Maxim: Guys, the day before yesterday we had a filming: the first conference with the phantom of Krishna. Two hours long and incredibly interesting. Our moderators will quickly prepare it for release. The conference, to be honest, was 5 points. Questions and answers - great. That is why, probably, his phantom was present during the flight.

Irina: He was present. We talked a little about how we filmed a video with him yesterday. Vladimir Goldstein and I and two representatives of the Vaishnava tradition took part in the conference with Krishna. Maxim was with us.

Today was a very interesting journey, many civilizations gathered together.

49:36 Study of the ecology of the Earth by Tikhtians.

Irina: I saw at Ashtar and on other ships many representatives of the planet Tikht. Those who study the ecology of the Earth, including spiritual and biosphere ecology.

The Tikhtians, with the help of thought forms, attached sensors to the astral bodies of people in order to read the vibrations of harmful and beneficial substances that are in physical bodies. Their devices can read from the astral body. They have communication between the astral body, a part of the Spirit that has emerged from the body, and physical devices. This communication occurs at the level of contact with plasmoid civilizations. They create fine-material structures that are a link in the transmission of information.

Maxim: You are asking questions about Irina. Irina goes to the gym. Nothing unnecessary bothers her. Irina, do you go to the gym?

Irina: Yes, of course, I go.

Maxim: If a person is comfortable and comfortable, he should love himself.

Maxim: Irina, such a question. Were there grasshopper-like creatures on Ashtar's ship? Insectoids, most likely?

Irina: Most likely, they were. I didn't notice them this time. I spoke with Ashtar, MidgasKaus and LiSioni. They were with Ashtar.

Then I moved to another ship and saw the Tikhtians. Then - Maxima. You were “made” there too.

I saw many earthly people who flew up to me in the Astral Plane, and we exchanged energies. Some of them thought it was so real that they wanted to hug me.

52:07 Civilization of the planet Disnit.

Maxim: Some contactees said that they were visited by aliens with white skin, black eyes, and short stature. What race is this?

Irina: Reminds me of representatives of the planet Disnit. The first planet is located in the constellation Eagle, the other in the constellation Aquarius. They differ in numbers. The one in the constellation Aquarius is a colony of the one in the constellation Eagle. They are in contact with earthlings. They have white skin, they are small in stature, and they have black eyes that resemble round black coals.

Maxim: Many people reproach us for not wanting to tell the truth, that we are not ready to contact real reptilian contactees.

We have a video. We will continue filming with reptilian contactees, and are ready to enter into dialogue with any contactees who talk about chemtrails, about the world's hidden governments, about space programs and much more in which they did not participate. We are

ready to give feedback and enter into dialogue. We are easy to find. We look forward to your proposals for holding a joint conference.

We are not afraid to tell the truth. When we begin to clarify the truth that others say, others don't really want to hear it. "Reptilians and "grays" will save us"? Love will save us, guys.

Now there is hysteria with vaccination. They almost assign QR codes. What is this? To vaccinate or not? The disease affects both of them. What should I do?

Guys, we already answered. You probably missed the beginning of the broadcast. You will need to reconsider it. It is up to everyone to decide whether to vaccinate or not. It's a person's choice. Our state obliges certain structures and organs to be vaccinated. They act in accordance with internal regulations.

If there were no vaccines on our planet, we would all have died out long ago, like mammoths, especially in the 18th century, when there was black smallpox. If a vaccine against smallpox had not been invented, we would have already left this planet and disembodied.

54:35 Reasons for the decision on universal vaccination.

Irina: The most severe and dangerous course of coronavirus occurs in people with weakened immune systems, the elderly, patients with cancer, chronic infections, bad habits, and so on. There are many such people.

Why do they want to vaccinate a large part of the population? They think it's safer this way. Power structures have a definite plan. If a healthy person is not vaccinated, and the virus is in a mild form, that is, he will not feel it, but will spread it. He may be near a person who becomes ill with a dangerous form. If he is vaccinated, the likelihood decreases.

To ensure that the vaccine brings maximum benefit if you decide to do so, there are certain rules. MidgasCaus has already said that we have

a VK article about the rules of vaccination. If anyone wants to get vaccinated, what rules should they follow so that vaccination brings maximum benefit and protects against this disease as much as possible.

Maxim: Irina, please read the question for now.

Irina: Should I recite the mantra “om mani padme hum” during vaccination?

Maxim: Guys, if you are worried about whether to get vaccinated, the only time is when you have a weak immune system. You can worry. Immunity can be boosted. There are a large number of herbal preparations to boost immunity before vaccination.

56:32 Complications of the nervous system due to the vaccine. How to protect yourself?

Maxim: After Covid, complications on the nervous system. How to help?

Irina: A complication on the nervous system can be from negative emotions associated with this. I've seen this before. (MidgasKaus speaking). The person got vaccinated, came home and began studying information about this vaccine on the Internet. He came across a video, which he watched and “understood” and believed that there was something in his body that was destroying it, and it “couldn’t be gotten out of it.”

This can cause harm. The main guarantee of your safety in the world in which you live now is monitoring your emotions and raising your vibrations. Translation of negative emotions into positive ones, into Light.

How to do it? If you come across information on the Internet, in newspapers, on television, among friends that causes you fear, even under the guise of concern for your health, then the goal of the creator of this information is to lower your vibrations. Perhaps so that you

become like him, to feed on the energy of fear, to destabilize the world's egregors. They have different tasks.

58:22 Information from reptilians.

Maxim: I have a question: “Maxim, could this reptilian philosopher deliberately mislead about Draco’s plans in order to sow doubt in Cassiopeia and the Interstellar Union?”

Guys, regarding the video conference with the reptilian: we showed the video so that you understand why many contactees with reptilians carry this information.

The reptilian worked on instructions from the government and did not answer many questions. He said that he did not have clearance, or that he was forbidden to talk about it.

We will have another conference with the same contactee. A reptilian who has access to the requested information will contact him. This information is passed on to contactors, so they carry it. This information contradicts information from the Interstellar Union.

Maxim: Last question, and we will end today's broadcast. He is very full of emotions.

You can find a video about blood type.

Zeland is a contactee under psychotropic drugs. On mescaline. He doesn't hide it.

Irina: I tried to read his book, but I didn’t understand anything. Sergey Lazarev is clearer.

1:00:15 Appearance of humanoids from the cat planet.

Maxim: They ask if we have contacts with the cat planet.

Irina: Yes, I have already communicated with them. In the chat there are contactees with aliens from another Galaxy who have green skin. They have a body like our cats. We had a conference with these creatures.

Maxim: You can find her. It's in a collection of videos on YouTube.

1:00:47 Harm from electromagnetic radiation.

Maxim: “Mid, Irina and Maxim, tell me how polluted large cities are from electromagnetic radiation? What does this mean for future generations?”

Irina: Should I understand electromagnetic waves in the classical sense of physics or as they are explained by conspiracy theorists?

Maxim: Wow, that’s an interesting question!

Irina: They explain it differently.

Maxim: Do conspiracy theorists explain it differently?

Irina: Yes. They equate electromagnetic radiation, which vibrates below the light spectrum, with radiation, with radioactive radiation, which goes higher than the light spectrum.

Maxim: Tell us not conspiracy theories, but what the Interstellar Union thinks.

Irina: Electromagnetic waves, from the point of view of the science of the Interstellar Union, are types of energy of the first level that come out of atoms and move in space, creating electric and magnetic fields. We divide them into electric and magnetic. You consider them

electromagnetic. I know that Irina recently had a conference with Ra Tiyan on physics issues, where he spoke in detail about how these fields look in space.

I had a conference with an engineer. Is it not on display yet?

Maxim: Some conferences are exhibited 2-3 months after they took place. The conference will definitely be about electromagnetic fields. Let's create an intrigue so that they wait for the conference.

Irina: Electromagnetic fields of frequency that are below the spectrum of light that the human eye can perceive are safe. The only thing they can cause, if the source of the waves is located next to a person, is an increase in temperature. Cells cannot be damaged because they have little energy for this. They have a low vibration frequency, lower than the nerve cells of the body, they have a semblance of electricity. That is, you emit electromagnetic waves.

As for electromagnetic waves: radio waves, ultra-high radiation waves, ultra-high frequency waves on which microwave ovens are built, and so on, all these waves are lower in frequency than the first color in the color spectrum, red. The highest frequency in the light spectrum is violet. Higher in frequency than violet is ultraviolet: long-wave ultraviolet, short-wave ultraviolet. I will speak in terms of your science so that you understand what I mean.

Only long-wave ultraviolet has a moderate irritant effect on the skin because it begins to damage the outer epidermis. Its frequency is very high. When these waves oscillate very frequently, a large number of times per second, they begin to damage the skin proteins, the substances that enter the skin.

The short-wave ultraviolet spectrum is even higher in frequency. There may be sunburn. You can observe this. That is, in addition to the visible spectrum from the sun, there is also an ultraviolet component that passes through the atmosphere.

Above the short-wavelength ultraviolet spectrum is x-ray radiation. It

can damage human cells even more, but less than radiation.

Radioactivity is gamma radiation, the highest frequency.

Maxim: I think this should be told at the conference. We are not having a conference, but a live broadcast. People want answers to pressing questions. This must be done at the conferences for which you are registered. Watch our videos. They have this information. It can be found in the search.

Visit our website https://cassiopeia.center/ . You can find a huge amount of information on it. If you want to learn about all of Cassiopeia's projects, there are links below this video. You can go to the chat in which we conduct Interstellar Union practices. You can see all the projects: cosmohealing, cosmoenergy, women's practices, meditation. I'm already lost in the number of projects we have.

Irina: We have cosmohealing, cosmoenergetics Gikhor, practices of the Galactic Federation of Light, practices with Ashtar Sheran, meditation practices, women's and men's practices.

Maxim: There are no male practices yet. Male chat only.

Irina: Men's chat.

Maxim: You can see what we have by following the link.

Cosmohealing is held every Wednesday, Friday and Sunday. Cosmoenergetics sessions Gikhor – Monday, Tuesday, Thursday, Saturday. Meditations, health sessions of the GFS, women's practices, practices of the Interstellar Union, meditative practices, interstellar radio. There is a calculation of the spiritual level, there are parameters of the Spirit, life tasks, the Tree of Life, Messages from guides, and many other projects that have been created for you.

If someone doesn't like it, please don't watch it. Everything that is done is done with love for you and it depends only on your desire whether to

support the project or not. There is a description and a link under the video on how you can support the project. If you use other projects, you can support them.

Guys, thank you all so much. I understand and love you. I understand why you have such questions and dissatisfaction.

We try to give the information that is reality for us. We are trying to convey what is in our hearts, an understanding of what our interstellar friends are telling us.

Many are trying to misinform you, create a negative attitude towards our project, humiliate the project, make you come to the purges after our project. Guys, listen to your Heart. We do everything from the Heart with Love.

Irina: Mead is not offended by anyone, he loves us all very much. The answer has been given many times about alcohol, about doses, about whether it lowers vibrations or not. There were also answers about ayahuasca. In every regional chat, in Telegram there is a table called “taplink”, there is a dictionary of terms, a table of time codes, etc.

Maxim: Please visit our website. On our website you will find a huge amount of information. You can search for articles, videos, informational points https://cassiopeia.center/ . You can search for the site “Cassiopeia” on Google, and they will give you https://cassiopeia.center/ .

The fact that there are a lot of me, please forgive me. I am the project manager, let there be at least a little of me in the project.

Guys, see you all again. We are always glad to see you with your “many” and “little”.

Irina: Yes.

June 27, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world.

Video in text
April 28, 2023

#301 Vaccination and chipization - revealing the whole truth.

https://blog.cassiopeia.center/vakcinaciya-i-chipizaciya-raskrytie-vsej-pravdy

00:00

Irina : Hello, dear friends!

Maxim : Friends, hello everyone.

Irina : Greetings. Good evening.

Maxim : Our first question is: how can you hear us? Now I'll be watching questions and answers in the chat on Telegram. How can you hear us?

"Give me a link to the live broadcast." Well, there is a link to the live broadcast.

Irina : Great.

Maxim : Guys, we have a very exciting topic today. Today we have the topic of vaccination, chipization, revealing the whole truth. Indeed, today we invited on the air a representative of the MS from the planet Burkhad, he is also the head of the Galactic Security Service, his name is Bergastre. Plus today we will have MidgasKaus from the planet Esler.

Irina : Lishioni.

Maxim : LiShioni from the planet Shimor, we will have a whole party today. I think that not only they will be suitable, but also other representatives of other representatives of the Interstellar Union (IC), the Galactic Federation of Light (GFS), because the topic is very interesting, very exciting, very slippery, ambiguous.

But before we start broadcasting, I want to tell you some news. I have very good news for you: we have 30 additional places for the retreat on Lake Baikal. Where we will communicate with Lama Itigelov, where Irina and the teachers will teach you how to communicate with the Higher Self. We have 30 additional places for the second stream, the link to sign up for the retreat is below this video. The hotel provided us with this opportunity. They said they had found 30 additional places. Therefore, everyone who wants to, follow the link, fill out the questionnaire form, and specialists will definitely call you. Anyone who has already received feedback does not need to do this.

Irina : Hello everyone, good evening. My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today we have a very interesting topic for our live broadcast: vaccination and chipization, revealing the whole truth. We, together with our interstellar friends, decided to make this the topic of our live broadcast, since last time the conversation about this was not finished, because the topic of the live broadcast was all your questions, and not just vaccination.

It was clear that many of our subscribers were interested in this topic, so many questions were raised again and again during the week in all chats. We decided to do a live broadcast on this topic, although last Sunday, as Maxim said, I completely agree with him that this topic is for a separate conference. But we decided to do it live.

Maxim : Because this is a very, very exciting topic. Today we will try to answer any of your questions that you ask in the Telegram chat with representatives of MS, with those whom we trust. Absolutely any.

Irina : Yes, we'll report news about vaccination now.

Maxim : Guys, before we continue, we had a long discussion with representatives of the MS. I'll tell you honestly, before this

conversation, I was also a little afraid about the vaccine, about the vaccination, but after that we decided to get vaccinated with the whole “Cassiopeia”. In order to show you that there is nothing unnatural here, there are no conspiracies.

Simply, a situation will arise now when they start buying cure codes for themselves, and in six months or a year the mutated virus will begin to slowly kill them. And people will start dying in droves. And people who bought these Cure codes for themselves will say that they died from the vaccine. Now the problem will begin.

Therefore, in order to show everyone that Cassiopeia and interstellar friends are not afraid of vaccination, we decided to all get vaccinated. We have this week off, we are going to celebrate my birthday on July 6th and Irina’s birthday on July 11th. And after our birthdays, we all together (we have 12 people here in Voronezh) we will all go get vaccinated, and we will do it on record. So that you don’t say later that we deceived you.

It’s up to everyone to choose whether to get vaccinated or not, but every unvaccinated person who carries the coronavirus will create mutations of that coronavirus, which can ultimately spread even to those who have been vaccinated.

So let's lower the temperature a little. We will ask the right questions.

06:23 Introduction of participants.

Irina : Now I will introduce. Who is next to us?

Maxim : And what galactic news.

Irina : Next to us today is the head of the MS security service from the planet Burkhad or Pikran, his name is Bergastre. Our curators are also present with us: MidgasKaus - a biologist, psychologist, specialist in alien life forms from the planet Esler, and LiShioni - a specialist in astral interactions from the planet Shimor.

07:10 The reason for the anti-vaccination movement according to the Interstellar Union.

Irina: (Bergaster speaks). I greet you all. I researched, including today, during the flight to Ashtar Sheran's ship, I examined people and their light bodies of those who were grafted and those who were not grafted - this was clear from their mental fields, the difference in vibrations.

The galactic news that I want to report is that I, as the head of the security service of the Galaxy, have discovered that there is active sabotage on Earth, creating a negative image of power structures, as well as scientific institutes, including medical ones, with a certain purpose. Having examined, together with disembodied Spirits from high angelic levels, the noosphere of the Earth and its leading egregors (including the political and scientific egregors that you have on Earth), I was able to identify the main culprits of the spreading panic associated with vaccination against a virus new to earthlings.

Much was clear even when it began to spread from China. It was also clear that many earthlings did not have natural immunity against it. It would take time before it worked out.

So, the culprits of the general mass anti-vaccination movement, its ideologists and main leaders of this movement (but they are hidden from the eyes of the majority), are the heads of large pharmaceutical corporations, closely connected with the financial structures that you call a collection of banks. That is, they put money in the bank, and the banks and pharmaceutical companies are headed by the same people or relatives.

Maxim : Bergastr, am I understanding correctly: at the head of all this are corporations that are interested not just in making a vaccine, but in selling medicines to treat sick people?

Irina : I will now move on to their goals. I researched their goals. This is very clearly visible in the egregors of the Earth.

Yes, indeed, at the head of all this mass hysteria are very literate, including biological and medical people who understand that if the coronavirus was suffered by a person unprepared for this with a vaccine, then his immunity will take a long time to recover due to the consequences of this infection (especially respiratory system, cardiovascular system and nervous system).

This is all because in your cities, as representatives of the planet Tikht have already said, there are a lot of substances containing nitrogen oxides. Nitrogen oxides weaken immunity in the lungs, macrophages. Many people have bad habits, such as, for example, smoking cigarettes, the tobacco smoke of which contains formaldehyde and carbon monoxide, which (active and passive smoking) also affect the immune system.

All this, together with the coronavirus, leads to the fact that the immune system takes a very long time to recover, tissue regeneration worsens, depression begins, etc.

The heads of pharmaceutical corporations, so to speak, have calculated in their backrooms the losses they will suffer if more than 60% of the population is vaccinated. They will not be able to make money from the medicines they sell against the coronavirus itself and its complications.

I remind you, dear friends, that if a person is hospitalized with a diagnosis of coronavirus, and there are already quite a few of them, the state allocates a fairly large amount of money for his treatment.

That is, if he had been vaccinated, if he had had a mild form of this disease, he would not have been hospitalized, then this money would have remained in the Ministry of Health.

Maxim : Nobody bribed us, I'll explain again. We absolutely trust MS representatives.

Irina : He conducted such an investigation.

Maxim : We have no desire to convey anything wrong to you. I myself will personally go with Irina and the entire structure to get vaccinated. And I know for sure that everyone who is not vaccinated will bring new mutations. This virus will mutate and, ultimately, kill absolutely everyone who has not been vaccinated in a year and a half.

Irina : It's just the same question.

13:25 About the dangers of vaccinations.

Irina : You write such outrage that your friends got vaccinated and then died from a severe form of Covid.

Dear friends, those who have already been vaccinated, I know that there are already millions of them. I know that you have been vaccinated and you are feeling well. People like this write to me, and people like this talk to me. I ask you: do not be silent! Write about your vaccination experience.

I understand that sometimes you don't want to get involved with everything that is happening, with these nanochips, DNA changes, GMOs, that you were bribed by the FSB. I understand you well that you do not want to get involved, but perhaps the life of some elderly person depends on your message about your experience.

Maxim : You unsubscribed, but you try to listen to us to the end. Listen to exactly the information we are trying to present. These swings on the Internet are arranged for a reason. Everyone is telling lies on your ears. They scare you with reptilians, they scare you with DNA changes.

I'll tell you this: we have killed the planet so much that if I need to become a reptilian in order to survive, I would rather become a reptilian and survive on this planet.

What super vaccines, what DNA changes? Any vaccine, any virus changes human DNA.

Irina : So, this is the first, second, now Bergastr (now LiShioni and MidgasKaus are smiling) through me reads your messages that you write in the chat. (Bergaster speaks). Judging by the messages, my words did not reach the Souls of those listening.

Okay, then I'll say it even more definitely (Bergastr says I have to convey it). I appeal to all government and medical structures of the Earth. So that every person who spreads unverified lies about the vaccine in the public networks of the Earth bears responsibility for this, as for sabotage.

He turned. I had to hand it over.

Maxim : Well, let's move on to the questions. Now let's watch the chat.

Irina : Bergastre said that he wanted to. This is not MidgasKaus, not LiShioni, this is Bergastre, the head of the Galaxy Security Service, he is a military man with us, so he speaks more harshly.

Maxim : Here they write: the vaccine has not yet passed all stages of testing. What virus can it save from if it is constantly mutating? What virus can it save from? So we made a vaccine. It is based on part of a virus that has not yet mutated. It turns out that you can get sick from this virus in the future. Do I get it right? Not with this virus, but with another virus that has mutated.

Irina : Let the biologist answer that.

17:01 The principle of vaccination.

Maxim : Mid, please answer the question. Why are we getting vaccinated? Is it possible to save yourself from a mutated virus, which can then, in any case, infect your structure, even if you have a vaccine.

Irina : (Mead speaking). I greet you all, and I am ready to once again tell you in detail about the mechanism of vaccination.

Why are they vaccinated? They are vaccinated only to teach their immune system to recognize certain proteins in time. Let's put it simply: those substances foreign to the body that are contained in some pathological parasitic viruses, that is, we simply call them parasitic viruses. Those that reproduce in human cells, including changing its DNA. Viruses don't know any other way. They do not have their own cellular structure to feed and reproduce.

They are forced to change human DNA in order to continue their lineage. So, any vaccination, as I already said, is a measure of preventive medicine. Not therapeutic medicine, when they are already treating, but preventive medicine.

Preventive medicine is based on the fact that a healthy person is given substances to reduce by several times the likelihood that he will get sick in the future. It is impossible to completely remove the probability, since each body produces antibodies in its own way, but it is still possible to reduce the probability of the onset of the disease or its severe forms tenfold.

18:56 Mutations of the virus.

Irina : Regarding mutations. The fact is that the mutation itself is a change in the genetic apparatus of the virus in this case. We are now talking specifically about the coronavirus; changes in the genetic apparatus of the coronavirus do not affect those proteins for which antibodies should be produced, from which antigens for vaccinations are made. That is, even a mutated virus will still have those proteins for which antibodies will be produced.

The only thing is that different proteins will be produced there, so the effectiveness of the vaccine from 90% for people may drop to 65-70%, but it will still be there.

Is the answer detailed enough or not?

20:02 The essence of vaccination.

Maxim : Look, the question is this, Mid. A healthy body does not need a vaccine, as they say, but a sick body is dangerous. What is your opinion on this matter?

Irina : He says: I emphasize once again that this is a preventive medicine measure.

It will then be possible to say that an army of many healthy soldiers does not need training. Just imagine that in the Russian army all the soldiers came and were busy playing dominoes and football. They have weapons, but they don't do formation drills, shooting drills, hand-to-hand combat, nothing. Will such an army be combat-ready against one that is prepared?

Maxim : So, in any case, vaccination is like preparing a combat-ready army of immunity to fight the virus?

Irina : I will be even more specific: when the vaccine is introduced into the body, lymphocytes secrete antibodies and not only secrete them, but remember how to secrete them. This is the mechanism.

Because against any microbe, against any bacterium, against any virus, not the same antibodies must be developed, but their own, because all microorganisms consist of different proteins, which means that the antibodies that neutralize them must be different.

When an organism becomes infected, it receives an infection that is, as we call it, virulent, that is, having the full power to infect cells. Then (this especially applies to viruses; a virus is characterized by the fact that, having entered the body in a small dose, it first hides inside the cells), the immune system does not recognize it. And only when the cell has already been completely destroyed, not one or three viruses that have entered, but dozens and hundreds that have formed there, come out of it.

They quickly leave the cells and they begin to infect neighboring cells. And, if there are no antibodies yet, the body finds itself defenseless for some time. He met this antigen, he needs time to adjust this weapon.

And if a virus enters the body, which already has ready-made antibodies produced with the help of a vaccine, when a cell is infected, when many viruses come out of it (infection can still occur, it can catch it), and when the cell dies, these viruses, when they come out, they will already be faced with a ready-made immunity that will neutralize them. This is precisely the essence of vaccination.

23:15 Why do people get sick after vaccination?

Maxim : I see. Mid, answer the question. So people write. Why then can a person get sick who has already been vaccinated?

Irina : The fact is that the immune response takes time. It does not produce in a day. Or in two days. Antibodies against coronavirus are produced within about three weeks. It is after the last injection of the vaccine that the body is still producing antibodies for another three weeks; it does not have complete protection.

Maxim : That is, 21 days after the last vaccination.

Irina : It’s not that he produces it, but he sort of remembers how to produce it. That is, training is still ongoing.

If a person becomes infected during this period, it will not work.

Maxim : Mid, I understand. Here's a question. Here he writes: the whole family got sick twice, do we need to get vaccinated?

Irina : You just see that the first time you got sick, you didn’t develop the kind of immunity that was supposed to protect you from the second time.

Now I will explain the general contents of this memory.

The thing is that each person’s body is individual and stores information about the virus in lymphocytes for different times. And this

does not depend on whether you got the virus naturally, or whether your body overcame it and developed antibodies. Or he developed antibodies to the proteins from the vaccine that got in, anyway, the memory period of lymphocytes is different for all people.

It depends on the strength of your immune system, your age, your lifestyle, and your hormonal status. From energy: the higher the vibration, the longer the antibodies will work.

And the less stress in your life, the better and more varied your diet, the better you sleep. From so many factors.

The average period that I studied, antibodies against coronavirus, developed either after illness or after vaccination, ranges from three days to almost two years.

Six to eight months is a very average period. I have met people who forgot their lymphocytes after three days, or remembered them for two years.

Maxim : Dear Elena. You call us wolves in sheep's clothing and talk about people reading scientific articles.

At the beginning of our broadcast, we said who is interested in you being sick. Pharmacological companies are not interested in giving you one injection and so that you don’t get sick. It would be interesting if you got sick and 240 thousand rubles were spent on you. This is what pharmaceutical companies are interested in.

Therefore, when you listen to articles and videos purchased on the Internet, supposedly by some corporations, who begin to tell you that the vaccine is dangerous, please think about what they are saying there.

We have clearly given you feedback on who is interested in unvaccinated people. Those corporations that will then treat these people and bury these people in coffins.

Whether or not to get vaccinated is your personal choice, but judging by how this virus is spreading, judging by how this is all happening on the planet, vaccination will be forced. Anyway. And if you don't want to get vaccinated, then you will just sit at home.

We are doing this program not to convince you to get vaccinated, but to explain that the vaccine is not as dangerous as they say on the Internet.

We have always been vaccinated. We have been vaccinated a lot. If we had not been vaccinated, we, as humanity, would have died long ago from the Spanish flu in the 18th century.

Irina : I ask those people who, as you claim, after vaccination were taken in serious condition to the hospital with Covid, after three weeks, if they have not caught this virus again, while antibodies are forming, I ask these people to write here, and not their friends.

27:35 Spike protein.

Maxim : According to the independent association of doctors, some vaccines contain the spike protein.

I don't know, Mead, what the spike protein is, which leads to various kinds of pathologies through blockage of blood vessels. It's a question of time. There is also a genetic editing system. Please comment on this.

Irina : Yes. There is a new vaccine. I already told you about Sputnik that it is a fairly effective vaccine that contains a piece of coronavirus in another virus. This adenovirus genetic apparatus is replaced with a piece of antigen in place of the coronavirus. This design makes it impossible to become infected with the coronavirus itself and makes it possible to produce antibodies.

Maxim : Wait, Mid. There was no Spanish flu.

Dear Svetlana, there was a Spanish flu, you have already been brainwashed on the Internet that the Spanish flu didn't even exist anymore, and they killed everyone with a vaccine. I've heard about this version. There was a Spanish flu.

Yes, I'm already a reptilian. Yes, with this attitude of people towards our planet, you know, it's easier to become a reptilian than to try to convey information to tell people how everything really happens.

Irina : Yes, we just called Bergastre to explain to you as the head of the Security Service, and I already talked to him on the ship near Ashtar, I knew that he would speak quite harshly.

This is MidgasCaus trying to put it mildly.

Maxim : Why are you yelling? I'm trying to convey this emotionally, I'm not yelling at you.

Irina : He's just very emotional, he's not angry with you. The fact is that today I already spoke with Bergaster on Ashtar Sheran's ship and already knew his position, quite tough, as the head of the security service.

It's not MidgasCaus that will persuade. He will tell it as it is, as it is in his mind: there is a certain infection from which people are dying, and many have already died. And we were informed, and you already know, this is no longer a secret. These are the things.

And suddenly he sees that some kind of anti-vaccination campaign is starting. Moreover (Bergastre is speaking now), without getting vaccinated, without creating collective immunity for at least 60-70% of the adult population, you yourself are forcing the government to extend a long-term restriction, including masks, passes, etc. You yourself are forcing the government to do this.

Maxim : Of course, because your virus will mutate, new strains will appear. Just like there was a new strain that is now coming to India.

Irina : Why should we watch Galina Tsareva's film? I can't understand. She is not an authority for us at all. She doesn't know more than Bergastre, anyway.

Maxim : Well, let's have the next question.

Irina : Yes.

Maxim : Now. They ask again if you have been sick. We have already said, yes, if you have been ill, you can get vaccinated.

Irina : But not before (advises, MidgasKaus), if you have been ill with coronavirus, and this is directly confirmed by tests. If you have not been tested, you cannot know whether it was an acute respiratory infection or the common flu.

31:07 Why don't people die from the flu?

Maxim : They ask, why didn't we all die from the flu then?

Irina : And they die from the flu. I know such people, in the city of Povorino, not far from us, there lived an elderly couple, a man and a woman, they were pensioners, they contracted the flu from their grandchildren, a simple flu, it was about five years. They contracted the flu from their grandchildren, who brought it home from school, and died from high fever. And then their relatives said that they had a high fever, cough, and were diagnosed with influenza pneumonia. They said their hearts couldn't handle it. It happens. Yes I heard.

Maxim : Why did some people get sick two or three times? We have already said this.

Irina : Because antibodies do not remember this information for a long time. No one can predict how much they will remember.

I want to tell you (Mead says again) that any medicine, any food, any

vaccine must be taken with love, trust, acceptance and gratitude to those who did it in order for it to bring maximum benefit.

32:29 Vaccine contraindications. Vaccines "Sputnik" and "EpiVacCorona".

Maxim : Are there people for whom the vaccine is contraindicated? Who should not be vaccinated?

Irina : These are people who have acute infectious diseases. (Mead speaking). Who has acute infectious diseases accompanied by fever. Immunity may not be developed because it is busy with something else, some kind of infection.

People with allergic reactions also need to be careful, especially with regard to the Sputnik vaccine. At the request of my contactees, I looked at the new vaccine “EpiVacCorona” at the energy level. There is no longer an adenovirus, there is a vibration of separate proteins of the coronavirus itself and aluminum hydroxide. Aluminum compounds, there is no longer an adenovirus. It’s like cutting up several proteins of the coronavirus itself without the capsules protecting it in the form of an adenovirus. All this is like a suspension of aluminum, compounds, and filler, and since there are no adenovirus proteins there, it is less conducive to the development of allergic reactions, but, unfortunately, its effectiveness is not the same as Sputnik, somewhere around 70 -75%. Due to the fact that there are just proteins, but there is no piece of coronavirus itself.

34:30 Vaccination and reduction of the world's population.

Maxim : Is it true that the vaccine was created to reduce the world's population?

Irina : The vaccine was created to stop the epidemic, which is precisely reducing the world’s population. And the coronavirus epidemic has already reduced the world’s population by more than 4 million. This means on the entire planet for all time. A million, not a billion.

Maxim : They say that many more people died.

Irina : More than 4 million (he's talking now). This epidemic reduced the population by more than 4 million people worldwide. And, for example, we have friends who died from coronavirus. And we know these people. They knew, or rather, they went to the Spiritual World. And I'm sure many of you have such acquaintances, friends, perhaps relatives.

These victims could not have happened if they had been vaccinated on time, that is, a vaccinated person, even if he gets sick, will bear it much easier, there is evidence of this.

I ask once again to everyone who was vaccinated, who may have been sick after this coronavirus vaccination, how he suffered. Describe your personal experience in our chats. In our social networks networks. Please don't be silent. I understand that it is sometimes disgusting for you to get involved with all this, but your silence contributes to this evil that is happening now.

Maxim : Margarita, do you think we are hanging noodles on your ears here? In fact, we are trying to explain to you that you are being prepared to be treated by pharmaceutical companies at a very high cost. Therefore, the decision is up to you: are we on time or not?

Irina : So after 17 days, you write.

Maxim : I'll tell you this, guys: if we needed to get hype, if we needed to gain subscribers, real subscribers, we would now be telling you how terribly bad it is to vaccinate. That vaccinations kill the world's population, and everything else. We are not trying to hype, we are not trying to gain subscribers.

We are going to be with you for a very long time. It is in our interests to convey to you the entirety of the information that comes to us from our interstellar friends. We trust them. And we are trying to give you complete information, without any concealments, without any fabrications and everything else.

Irina : You write that your brother was vaccinated for the second time and on the seventeenth day of vaccination he fell ill with coronavirus. But it hasn't even been three weeks yet. This means that he has not yet developed antibodies, as MidgasKaus tells you. Here's your proof.

Maxim : Guys, we are not scientists, we are not professors, but at least we have the opportunity to convey information from MS representatives who are scientists and professors.

Here they write: an independent organization of doctors has already filed a lawsuit against the Ministry of Health for genocide. The composition was examined. There is a whole scientific work of scientists there. YouTube is full of information, but here they are misleading.

Irina : Please file a lawsuit, or apologize for slandering the government.

Maxim : Guys, if we die after vaccination, do not take this vaccination. Guys, we know for sure that with normal, good immunity, no vaccinations are scary for you.

Indeed, there may be some minor difficulties if you have a very weak immune system, but immunity can be increased through echinacea extract and through many other factors. In principle, preparatory measures before vaccination can be done to boost immunity.

Playing sports is a very good way to boost your immunity, so think about it.

Irina : Everything is fair with our interstellar friends, but not with our corrupt officials. How do you buy food from our corrupt officials in stores? How do you know what they stuffed you with there anyway? Maybe there is some kind of slow poison there? Have you thought about this yet?

39:23 Retroviral therapy against Covid.

Maxim : Mid, a question for you. Does retroviral therapy help against HIV infection from covid? What is retroviral therapy?

Irina : From what?

Maxim : Against HIV infection from covid?

Irina : I see. No.

The virus that causes the human immunodeficiency virus is different in structure, and therapy for it does not help against coronavirus or other ARVI viruses.

40:04 Complications from the vaccine. Vaccination for those who have been ill .

Maxim : Will there be complications from the Covid vaccine in 10-20 years?

Irina : (MidgasCaus is speaking now). Based on the vibrations I saw, there will be no complications from vaccinations in 10, 20, or 50 years.

This is the training of lymphocytes, and these substances will be eliminated from the body naturally. There are no substances that could affect a person after a few years. All the information that you receive about what exactly you will get sick against coronavirus has been created specifically.

This is electronic content made specifically to influence your feelings, your instincts of self-preservation, extended to your children and grandchildren. So that you can, under the influence of feelings, refuse vaccination and dissuade your relatives from doing so. And the creators of this content pursue goals, as Bergastre already said, of a mercantile nature in the hope that you will get sick, and your relatives will get sick, and will pay them a lot of money for treatment.

This is only the physical aspect of this conspiracy - the general anti-vaccine conspiracy. Now we are discovering the truth that was revealed to us during the study of the Earth's noosphere. And this is only part of the truth, because the whole truth lies on the spiritual level. People who want to profit from the grief, tears and graves of other people, these people are controlled by dark entities from subtle worlds and demonic levels.

Maxim : Irina, they write here that I interrupted you, should I still have told you how long it takes to get vaccinated for people who have already been ill?

Irina : If this is confirmed by tests, then after clinical recovery, preferably no earlier than six months.

Maxim : After clinical recovery, no earlier than six months?

Irina : Yes, after clinical recovery - this means normalization of temperature, cessation of weakness and cough.

Maxim : Olga Turushinskaya writes that an epidemic is when more than 5% of the population is infected. This figure has not yet been reached. What epidemic are we talking about now?

Irina : (Mead speaking) This threshold is different for different infections.

The fact is that coronavirus causes severe damage to the respiratory and circulatory systems in people, especially those who live in large cities, due to damage to their respiratory organs by nitrogen oxides, stress and other factors.

Such patients who are infected with this virus and cannot cope on their own need expensive treatment and help with their breathing using special devices, which is why the epidemic threshold was announced before 5% of the infection.

43:44 Current vaccine.

Maxim : Here they ask: “Let your friends tell you whether there is a truly working vaccine on Earth.”

Irina : All vaccines are effective if they contain the necessary antigens, and these contain those that he researched.

Maxim : What vaccines did he research?

Irina : Of the Russian ones we are talking about now, I researched Sputnik. It is effective provided that all the sanitation rules that I have already mentioned are followed, in the region of 85-90%. Its effectiveness lies in the fact that severe forms of the disease do not occur during actual infection with coronavirus. This is especially true for older people and patients with concomitant diseases. Epivac is about 70% effective.

I also researched several foreign vaccines. If you call their names because they change, then the efficiency will also be around 80%.

44:54 Antidote against the vaccine.

Maxim : They are already asking whether there is an antidote against the vaccine?

Guys, I’ll tell you this: if someone offers you to remove the effects of a vaccine on an energetic level, they just want to make money from you.

Don't fall for this nonsense. This is complete nonsense. There are no antidotes after vaccines, because a vaccine is a launch of your immunity.

Irina : So, you write that you are not against vaccination, you are against this untested gene mutant.

You see, dear Svetlana. Now that there is an epidemic, unfortunately, there is no time to test this vaccine over decades.

In 10 years, this epidemic will subside on its own, but how many people it will take with it is not known. You don't know this either.

That's when the virus gets into your cells, makes gene mutants out of your cells, which begin to produce proteins characteristic of viruses and stops producing your own.

Maxim : Guys, I'll tell you one little secret of what will happen after a while.

Now people who have not taken the vaccine will buy Cure codes. In six months they will start dying "from this vaccine," and they will tell you that they died from the vaccine they took. Although, in fact, no one did anything.

Now there is a huge, widespread number of people who are trying to buy a cure code for the vaccine. They even offered us, like, to save us, it was Cure codes.

We decided for everyone, under the video, we will film all this as we ourselves get vaccinated. And show you by example that vaccines are safe.

We have a Telegram chat. People in this chat write a lot. We have decided to switch to Telegram chat now so that you can ask questions. We have already prepared a backup site to which we are already transferring all our videos, taking into account the fact that YouTube may be closed to us on the territory of the Russian Federation.

Irina : How will we know that we have been injected with the vaccine? We will be video recording.

Maxim : I will personally video record. I will film the vaccine, I will film the instructions, I will film the doctor, if allowed, who will give us these

vaccinations.

Irina: We will say that this is for you, dear friends.

47:52 Vaccination for allergies.

Maxim : Contraindications include allergies to the composition of the vaccine and myocarditis.

I have aspirin bronchial asthma, a severe allergy. Is it possible to give a vaccine to such a person?

Irina : It is better for an allergic person to take a dose of an antiallergic drug on the day of vaccination.

This is possible under the supervision of a doctor. It's up to you to decide for yourself, because if you don't get vaccinated and become infected with coronavirus (and it is a very strong allergen), no one can predict how the body, not prepared for this injection, will behave. You decide. The risk is greater if you catch the virus.

48:50 Chipization.

Irina : And many people write that chipization.

Our earthly technologies do not have the capabilities to make chips smaller than the diameter of an injection needle, so no one will inject you with any chips through a vaccine. This is impossible with our earthly technologies.

If this were possible, all people would have been given surveillance chips long ago. If we didn't have so many criminals escaping from prisons, we didn't have so many criminals who were searched for everywhere, and we didn't have so many missing people who were searched for in all the forests, all the fields, and they died.

Maxim : My son and I are suffering from chickenpox now. My child and I have allergies. Is it possible to get vaccinated against corona right now when you have chickenpox?

Irina : No, it’s not necessary until they recover, until at least 14 days have passed since the last rash. The immune system must be restored, otherwise the course of chickenpox may worsen and the vaccine will not take effect. She will not produce normal antibodies. She won't protect.

50:15 Vaccination of pregnant women.

Maxim : What should I do if my wife is asthmatic and allergic, any vaccination is contraindicated for her, and she is also pregnant.

By the way, Meade, can pregnant women get the vaccine?

Irina : I did not see anything dangerous for pregnant women in vaccines, provided that they do not have acute infectious diseases during this period.

Neither for pregnant women nor for the fetus.

Maxim : Why get vaccinated every six months, Meade?

Irina : He says that there is no such law.

This is something everyone decides for themselves; if their antibody level has dropped, it can last from three days to two years, 6-8 months is the average period.

So that you do not have to be vaccinated after 6 months, the level of antibodies produced by lymphocytes is high, so that the lymphocytes always remember, remember this virus for as long as possible, you need to keep your vibrations high after vaccination, you need to eat well, rest, be sure not to sleep less than 8 hours, that is, to maintain

your immunity in a certain way. Lack of sleep and lack of all the necessary nutrients from food greatly reduces immunity.

51:45 Freedom of choice during vaccination.

Maxim : Here Svetlana Shvachka asks: “What will aliens say about compulsory vaccination? Where is the freedom of choice? Or are we such flawed mutants that we shouldn’t be given freedom of choice?”

Irina : There is no mandatory vaccination for all people. There is mandatory vaccination for certain groups of the population who come into contact with people at work. This is trade, the service sector. Where they work with people. These are all government institutions: schools, hospitals, pension fund. Where there is a constant flow of people. These people, who often meet other people at work, are required to get vaccinated according to epidemic indications according to the law of the Russian Federation, which was written quite a long time ago. Even in Soviet times there were similar laws. Now, of course, they exist.

According to the law, due to the lack of vaccination at a certain job without documented medical indications, your employer has the right to suspend you from work without pay for the entire duration of the epidemic. This is completely legal.

For what reason is there no freedom of choice here? Many people who do not receive the vaccine and do not have antibodies become asymptomatic carriers of the virus to people they come into contact with during the day, who can become severely ill and die. To protect them, the state orders employers to take this step to reduce mortality.

I've already heard that they won't let you into certain restaurants unless you're vaccinated. The fact is that regional heads can pass certain laws on their territory if they have a large load of coronavirus patients and do not have enough beds in hospitals. They may consider that an unvaccinated person can be an asymptomatic carrier of this virus and infect several dozen people with it. The law does not prohibit this, but it is not necessary to become infected with coronavirus.

If you do not want to get vaccinated, but at the same time you work with people, then you will have to look for either another job or another source of livelihood.

If you don't work with people and don't want to get vaccinated, you don't have to. But at the same time you will have to avoid visiting places where there are large crowds of people. There are such laws.

Why is freedom of choice limited? Freedom of choice ends where danger to other people begins. This freedom of choice ends for the same reason that a patient, for example, with an open form of tuberculosis, cannot openly walk and say that he will not go to the hospital. They could force him in with the police, handcuff him, and treat him with antibiotics right behind bars.

There is such a law. The same goes for some open stages of syphilis, which can be transmitted through household means.

Maxim : Please note that the tendency to say that these vaccines contain chips has now decreased. But still we have Kirill Pimenov, who says: “The rulers have hidden technologies that make it possible to introduce chips into the vaccine.”

Irina : There are no such chips in the vaccine. Let him show these chips under a microscope. There are no such chips in the vaccine.

Maxim : We don’t have these technologies yet. There are technologies where you can notice these chips. They are really 0.1 mm there.

Irina : We have already explained about mutations.

Maxim : Yes, yes. That’s why we don’t have such technologies, much less spend these chips on you in vaccines. That's a lot of chips!

Irina : How much would this vaccine cost then?

56:46 Vaccination of cancer patients .

Maxim : Is it possible to vaccinate people with cancer?

Irina : They already have a reduced immune system, and in a real encounter with the virus without vaccination, there could be very disastrous consequences.

It is also dangerous to get vaccinated because of complications. They will begin to develop antibodies against the virus, but this may take a little longer than in healthy people. May be accompanied by an allergic reaction, high fever, pain, and inflammatory reaction. Either way (Mead says), it's ten times safer. But it’s up to each person to choose.

Maxim : Olga Eremeeva, firstly, we are not lying, we are transmitting information from MS representatives, who are much more competent than many of our scientists, so there is no point in lying to us.

The question is: “Of the 4 million people killed by the virus, how many people were vaccinated?” No such data, Meade?

Irina : The fact is that the vaccine was invented not so long ago, if you count the entire period of coronavirus. There is no data on how many people died from coronavirus after vaccination. But Bergastre says that if a person takes care of himself: washes his hands as usual, lubricates the nasal passages with eucalyptus oil (as Mead said in the first issue), etc., i.e. will follow this after the first injection of the vaccine and for another three weeks after the second, then he will develop antibodies. And the possibility of dying from coronavirus is reduced by more than 1000 times. That is, it drops sharply, and fractions of percent remain there. Those. Only one out of a thousand vaccinated people who have undergone the vaccination period correctly will die from coronavirus.

59:18 How to boost your immune system?

Maxim : Mid, please give me some practical advice on how to prepare or improve your immunity, for example, for vaccinations.

Is there any way to prepare your immune system, to invigorate it so that the vaccine goes down better?

Irina: Yes, of course.

Maxim: Maybe some kind of herbs? Just don't give advice about medications, because we are not a medical institution, we are not allowed to do such things. We can have some herbs or some dietary supplements. Let's say you gave us teas, the composition of teas to boost immunity. I think that the composition of this tea can also be said.

Irina : The most important thing is not to drink any alcoholic beverages for seven days before vaccination and seven days after vaccination.

It is very advisable, if you smoke, to reduce the number of cigarettes you smoke to at least 5-6 per day with a nicotine content of half a milligram, if you count, for each cigarette.

Smoking itself will not hurt, it will just reduce the period of your protection with antibodies, and then you will have to get vaccinated more often. Smoking slowly destroys white blood cells, lymphocytes and, most importantly, reduces their ability to remember antigens. That is, it reduces the effectiveness of your immunity both after vaccination and after a naturally occurring disease.

Alcohol can also reduce immunity; these substances should not be consumed during this period.

Regarding nutrition and sleep. In the period before vaccination and during vaccination, there should be adequate nutrition: optimal content of proteins, fats, carbohydrates, microelements and vitamins. Now in the summer it is very easy to get all this from vegetables, fruits, cereals, dairy products, etc. You don't eat monotonously, but eat as varied as possible so that you get different substances.

(Mead speaking). You do the right portions when you put a lot of

different things on one dish.

1:01:52 Essential oils for immunity.

Maxim : They also ask for recommendations regarding essential oils. What essential oils can be used to boost immunity?

Irina : Eucalyptus essential oil boosts immunity, juniper essential oil, fir essential oil. It can be added to the bath. Tea made from calendula flowers mixed with echinacea flowers also improves immunity well. These are the two components.

1:02:21 Anaphylactic shock and vaccination.

Maxim : Mid, this is a very urgent question. The man's son suffered anaphylactic shock. Is it possible to get vaccinated after anaphylactic shock?

Irina : They don't write why he suffered anaphylactic shock. Maybe he transferred it to soy proteins. This means that those proteins that are in the coronavirus will be safe for it. You need to know what triggered it.

Anaphylactic shock is a severe allergic reaction that indicates a compromised immune system. It may be caused by a spiritual reason that caused the body to react so strongly to an ordinary substance. We need to find out the spiritual reason.

1:03:06 Practice communicating with the body: "Is this right for my body now?"

Maxim : Is it possible to find out from your Higher Self whether he can be vaccinated or not?

Irina : On the planets Burkhad, Shimor and Esler, where our friends are from, it is customary before taking any substance inside (be it food, drink or medicine, some kind of vitamin) to simply automatically consult

with the Higher Self. Not like with the Higher Self, it's as if they're asking, "Does this suit my body?"

You can ask the body itself. This usually involves touching or holding an object to familiarize your body with the vibration of those substances. Your body, your energy structure is capable of reading at a subtle level the vibrations of all substances that you take in the palm of your hand. In the center of the palm there are mini chakras that actively receive information, like the nervous system from the receptors of the fingers.

It is advisable to take this substance in your hand, close your eyes and ask: “Is this right for my body right now?” Right now. Because tomorrow the answer may be different. Your condition may change.

That's what they do. They consult, they do this with any substance: with any medicine, with any food. For example, you are in a store, pick up canned fish in your hand. Through the jar, the vibration is still considered to be the fish that is there.

Maxim : I repeat once again: we are not lying to you. What you are telling us is that “after vaccinations, people begin to die, that the world’s population is declining,” “in Africa they were vaccinated, infecting people with AIDS,” Raisa, you learned this information from the Internet. We said that very large pharmaceutical companies are interested in this. So that you do not get vaccinated, so that you are in fear. Plus, low vibrational entities are interested. If you want to unsubscribe from us, if you don’t want to listen to us, go to the Internet, listen to those people who will save you from all your problems for a lot of money.

Irina : I can come up with that too. A large pharmaceutical company contaminated mayonnaise with a pallidum spirochete and people got syphilis. Is this right for you? Do you like it now? I can think of it too now. There are a lot of things you can come up with now.

Maxim : People hype, people raise their ratings, people make money from you. Many regressologists, super mega contactees then clean themselves from incomprehensible vaccinations for a lot of money,

from some incomprehensible entities that have attached themselves to you, for a lot of money. And you are ready to believe it. But you are not ready to believe in reality, what is really happening.

You know, it seems to me that we are a planet of monkeys who believe the baboons screaming at the top of their lungs: “Pay us money and we will rid you of everything.”

Irina : If it’s impossible to pick up the vaccine, if you don’t have it in your hands, if you’re not given the opportunity to hold it, you can do it mentally. Those. Find on the Internet a photo of the vaccine that will be given to you. There should be a bubble, the manufacturer, what it's called, the type of this bubble. You need to close your eyes and imagine that you are holding a phantom. This works too.

We haven't gotten the vaccine yet, but we plan to after our birthday, which we celebrate. Maxim’s birthday is July 6, mine is July 11. By the way, my birthday will be in a week.

Maxim : We will conduct the next broadcast on Irina’s birthday. We will be back here in Voronezh on the 11th, it will be Sunday, the live broadcast will be entirely dedicated to Irina’s birthday.

Irina : Yes. “There will be no truth here.” No, Maria Volkova, my dear, your truth will definitely not be here. There will be true MS representatives here.

Maxim : (Reading) Maxim, you are distracting from receiving information with your emotionality.

Unfortunately, or fortunately, I am very emotional. I really like to distract the reptilians from the grays and humanoids.

Irina : Yes, exactly, Maxim was born on the birthday of the Dalai Lama. Congratulations.

Maxim: Yes, there is such a sin. The time is 21:09, I suggest you

quickly ask questions from the Telegram chat.

1:07:51 Scleroderma and vaccination.

Maxim : With my autoimmune disease scleroderma, how dangerous is it to get vaccinated, Meade?

Irina : Depends on what the spiritual cause of your scleroderma is. It can be of an allergic nature or of some other nature. What you call scleroderma may be some kind of microbial disease. Inflammation of some microbes. It's just that some of your doctors don't see intracellular pathogens, no matter how they check. This needs to be looked at to diagnose what caused this scleroderma.

Maxim : "So, MS himself does not want to know the truth, and he is at the same time with them."

Irina : With whom?

Maxim : With those who are trying to kill us here.

Irina : Bergaster repeats again. He says: "I, the head of the Galaxy Security Service, have been more than 300 years from the planet Burkhad. I appeal to representatives of government medical and scientific institutions who may receive this video. I ask you to draft legislation that you will send to your political structures. So that unverified information about vaccination, which can cause harm to people who may refuse vaccination in fear, is somehow suppressed or punished."

There can be no question of freedom of speech here, just as there is no freedom of speech, for example, on the issue of drug addiction. Because coronavirus in its future can cause no less harm. This is his opinion.

Maxim : People ask: "Why is vaccination necessary? What if a person just has high vibrations? Is he going to get sick from coronavirus?"

Irina : It turns out that we are a KGB project! Do you still live in the Soviet Union? Are you still in the KGB project? It has not existed for a long time, like it has not existed for 30 years.

Maxim : Whatever they called us. I have already been called both a reptilian and an accomplice of the grays. Guys, in any case, I will tell you what the MS representatives tell us. Exactly the information that will enable all of humanity to move to a new level of awareness and perception.

Irina : “Let’s broadcast live until we answer all the questions.”

Maxim : I'm ready. If we now get 2,000 likes, we will broadcast until we become stupefied. Let's see how much people need the information that MS representatives give us. If you are ready, then yes, we are waiting for your likes. If we get 2,000 likes within 3-5 minutes, then we broadcast as long as we can stand it.

1:11:05 High vibrations and coronavirus.

Irina : For now I’ll answer about vibration. Vibrations, you mean spiritual vibrations. The vibrations from neither the vaccine nor its vaccine decrease or increase. Spiritual vibrations are reduced by fear. Moreover, both from fear of coronavirus and from fear of vaccination.

But fears can be justified and unfounded. Vibrations decrease from any unreasonable fear. Justified fear, for example, real fear for one’s life, does not lower the vibrations. This is protection. And unreasonable fear lowers vibrations because it is unnatural.

If you think that it is not worth getting vaccinated against coronavirus, that this is a fear of the virus, you should be completely logical, and in the case of any disease, not take medicine, believing that this is a fear of death.

You don’t think so, you go to the hospital, you want to be helped when you are in pain. And why? So you don't trust God to heal you.

1:12:51 About vaccination on the planets of the Interstellar Union.

Maxim : Is there a semblance of vaccination anywhere else other than planet Earth?

Irina : Somewhere, where is this?

Maxim : On any other planet, do MS get vaccinated?

Irina : We have definitely had no need for vaccination for 15 million years now. In MS, from the moment of its inception, practically, perhaps in the first 200 years, certain electronic means of correcting the genetic apparatus of the cell itself have been created. Moreover, it can recognize any foreign antigens without introducing any substances, including vaccines, antibiotics, and so-called non-hormonal and hormonal anti-inflammatory drugs, which simply reduce the amount of inflammatory products in tissues. All this is built into our cells at the genetic level at the moment of conception.

Maxim : We were defeated, we got 2,000 likes, we will now have to work until we are blue in the face. Thank you.

Irina : Thank you.

Maxim : Next we answer questions. I'm extending the time.

Irina : So, people are interested. The whole point is that this anti-vaccination campaign is doing more harm than good. We talked about spiritual vibrations, that there are justified fears and unreasonable fears. They said that if you consider the fear of the virus to be unfounded, the same as the fear of the vaccine, then why do you use other advances in medicine, and do not consider it a fear of death.

We also talked (MidgasKaus says) what remedies for infectious diseases are available in MS. At the gene level, they change the structure of the cell in such a way that it very quickly recognizes all

infectious agents. We don't have this yet.

These are the two things we were talking about now.

Maxim : Valentina, we cannot talk about cellular nutrition, much less name the company, so as not to advertise for it.

“They never answered: is it possible to get vaccinated if you have asthma and allergies? They never answered, they write.”

Irina: If you have asthma or allergies, there is an increased risk of complications, but the risk of complications if you get coronavirus without vaccination is even higher than if you are healthy. You decide.

Maxim : Guys, while our broadcast has been extended, I want to tell everyone once again that we have very cool news. We have added 30 places for the second stream of retreat on Lake Baikal, where we will hold a conference with Lama Itigelov. Therefore, our hotel has added 30 places to us, which can accommodate and receive another 30 people.

“Shame on Cassiopeia.” Lara Lai, a huge hello to you. We specially staged a live broadcast to embarrass ourselves throughout the country. So that in two years, when we are vaccinated, you will see that we will not survive.

Irina : Just now Bergastr heard: “Shame on Cassiopeia,” and says: “Shame on the alarmists, because of whom older people are dying.” His answer.

Maxim : “It’s impossible to believe you.” Yes, it's impossible. "Nonsense". Of course it's nonsense.

Irina : Your right, I convey what they ask me to convey.

Maxim : Guys, you can believe other people who tell you about terrible

conspiracies on the Internet. Yes, indeed, there is a world government. Yes, indeed, they control people. Yes, indeed, there is a form of people management in their interests. But you won't believe that we will not be controlled through vaccination, but through completely different things that are already happening. Nobody pays us.

Irina : Why do you think that by refusing vaccination you cannot be controlled and you cannot be used? Why do you think that it is impossible to reduce the world's population by refusing vaccination? Now it is worth stopping vaccination against some dangerous infections and starting the virus. Why do you think this is not destruction?

Maxim : Irina, it's just that all those who have not been vaccinated will wait for the virus to mutate in them and completely kill everyone, even those who have been vaccinated.

Irina : (Mead speaks) World government - he does not mean conspiracy theories, but those world governments that actually exist, now we have governments in the world.

Maxim : I spoke about those governments that exist, I did not talk about hidden ones.

Irina : The fact is that now, since the beginning of the 80s, vaccination against smallpox is no longer carried out. By the way, it is also a viral infection. Even children were vaccinated. First they gave it to adults, then they gave it to children in the maternity hospital, this vaccination against smallpox, also a viral infection.

Vaccinations were also accompanied by complications, pain, fever, and allergic reactions. But no one thought of slowing down the rate of mandatory vaccination. Refusal to vaccinate could result in very serious punishment. Thus, a lot of people were vaccinated until the early 80s. Then they stopped this vaccination because the disease was no longer recorded in the world.

And now, count, three generations of people have not been vaccinated

against this infection, namely against smallpox. Now this virus has been preserved in laboratories. If terrorists launch it in any water supply network, for example, in a large city, then a disaster could happen. It will not be possible to vaccinate everyone quickly.

Maxim : Guys, if there were plans to kill everyone, they would have used a completely different moment.

Irina : There is such a concept as “microbiological warfare”. All states of the Earth at the international level, at the UN level, signed a petition to ban such forms of war: chemical warfare, biological warfare and microbiological warfare.

Maxim : Yes, guys, our Russian vaccine is safe. Our interstellar friends said that there is nothing dangerous in our vaccine, so everyone who wishes can get vaccinated.

Anyone who doesn’t want to don’t have to get vaccinated, but know that you are becoming an accomplice for the virus to mutate. You become the future killer of your relatives and yourself.

Irina : Come on, we will talk only about verified facts, because now I can already see, here is Vladimir Goldstein, thank you, you are writing about your experience. And many others write.

Maxim : And soon we will write about our experience, when we get vaccinated with the whole “Cassiopeia”. We are going to create a normal and healthy nation that will carry high vibrations, will create new generations, and not new degenerates who will scream loudly, spread this virus, create mutations and kill other people.

Irina : Navalny was killed with chemical weapons. What, you think it’s impossible to film about you that you poisoned someone? We can also make a video about you.

Maxim : Guys, we will not get involved in Navalny’s showdown, this is not our topic. We don't get involved in politics. We have the Cassiopeia principle. Here we can transmit the information that the MS and our

interstellar friends carry. Today we are talking about chipization, vaccination and other things.

Irina, I have a Telegram chat.

Irina : Yes, good.

1:22:27 Vaccination and good immunity.

Maxim : Having been vaccinated, I still run the risk of getting sick with coronavirus in the same way and infecting my relatives. Why should I get vaccinated if I myself have good immunity?

Irina : (Mead speaks) If you didn't understand the answer, it means I didn't explain it clearly. It's not clear at all.

Maxim: Let's do it again.

Irina: I will now explain in great detail.

Maxim : We will film as we get vaccinated. Close-up. I will specifically take a camera where we go, so that you can all see what we were vaccinated with, what the doctor told us, and what vaccine we received.

Irina : Since a person did not realize, did not understand that I was talking about good immunity, whether it can protect better than a vaccine, it means that I did not explain well enough.

(Mead says) Forgive me, dear earthlings, I will correct my mistake. Now I will answer in great detail.

Look, you have five types of white blood cells in your blood. One of them is called lymphocytes. Lymphocytes constitute the control unit of all other leukocytes. They constitute approximately 30-40% of all

leukocytes. There are several types of lymphocytes. We know of 6 types of lymphocytes that remember various types of antigens to produce antibodies.

Why is vaccination necessary? So that foreign substances contained in a harmful microbe or virus can enter the body while it is still healthy, while it still has good immunity.

The better your immunity, the stronger your immunity, the better the vaccine will work. Once this foreign substance, in a form in which it can be safe for the body, is introduced into the bloodstream, this substance surrounds another type of white blood cell, which is called monocytes or macrophages, if we are talking about tissues. These are large lymphocytes whose task is to eat a certain foreign protein, a foreign substance. Digest it and put pieces of digested proteins outside their cytoplasm, like rows of amino acids, so that the lymphocytes read the information and remember it.

This microbe is in a weakened form, or not even in a weakened form, like, for example, a crooked measles vaccine; there, in general, a live virus is introduced, just weakened. Or polio.

In the case of coronavirus, it is not the virus that is injected, but only a fragment of it. It is impossible to become infected with coronavirus from the vaccine itself even if you have any immunity; it simply isn't there.

This piece of the virus or chopped fragments of the wall of this virus are eaten by your monocytes, and information about this is transmitted to the lymphocytes, which remember this information and are already preparing weapons, i.e. a set of substances that neutralize this virus when it has not yet occupied the entire respiratory system.

A vaccinated person has protection, it has developed. After the first vaccination, 3 weeks passed, after the second vaccination, three weeks passed. The necessary time has passed, his lymphocytes are fully armed and await the attack. And when a living virus enters the respiratory tract, the mucous membrane of the eyes, mouth, it infects the first cells, it will still infect. He will enter them.

When a large amount of coronavirus has already come out of these cells, then those monocytes, lymphocytes and neutrophils (another leukocytes) that will come into contact with these infected cells, they will immediately determine what it is, and, most importantly, they will determine how to quickly neutralize it. They already have instructions that they have developed thanks to the vaccine. This is from a vaccinated person.

You may not even notice that you have a virus. You simply won't feel it, but at this time your body will defeat it.

If there is no vaccination, the virus enters this body, which is not vaccinated, and while the lymphocytes develop (in several weeks, three weeks) certain antibodies that will effectively destroy the virus, it will already disrupt a lot of different systems, because it reproduces very quickly.

The first few hours the virus increases several hundred times. The immune system simply won't have time; it, the lymphocytes, have no instructions on how to act. He still has to learn. But he has no time to study, the infection has already set in.

Children's explanation. I try to explain it as simply as possible if a person does not already understand.

(Reads) "Don't take the vaccine – it's spiritual death."

Do not inject penicillin - this is spiritual death. Will you like it?

Maxim : Don't take a headache pill, let your head hurt. This is spiritual death.

That's it, guys, stop using medications - this is spiritual death.

Irina : People still didn't understand. I'm ready to explain for another three hours, but I'll explain anyway. Our mid is very patient.

Maxim : Mid, listen.

Irina : (Mead speaking). During this week, while your immunity develops, your strong, super strong immunity, it needs time, which may not be available if the virus multiplies quickly.

At this time, when antibodies have been developed and a full-fledged fight has begun, so many cells in the lungs and respiratory system are affected by the coronavirus that, by eating these dead cells, the immune system begins to damage the body. That's all.

Did he explain in sufficient detail?

Maxim : Yes, he explained it in sufficient detail. Let's continue our live broadcast. You can probably answer some questions for another five minutes.

That was a good question. Still, people don't understand why we are going to get vaccinated with the whole "Cassiopeia" if the virus is still mutating. So what are we going for? Let me explain it to you again. If we go and get vaccinated, then even if we get sick from a virus that mutates, we will get it in a fairly mild form. The immune system will already be prepared for the part of this virus that has been modified. Yes, we will get sick, but at least we will not catch those complications that can be caught without getting this vaccination.

We, as a whole "Cassiopeia", decided that vaccination is normal, and we will not look for any hidden meanings here. I repeat once again, guys, we have killed the planet so much that this fuss about vaccination is such a trifle, you and I will not die out from the vaccine. You and I will become extinct because we have completely trashed our planet, because we have killed the environment, we are killing each other. We will not die from the virus, dear ones, we will die from the fact that we destroy each other.

Irina : Why? We didn't say that we wouldn't accept people on the retreat without vaccinations.

Maxim : “Turn off that loudspeaker.” You can't turn me off, you have to turn me on.

Irina : Accept him as he is. He accepts you as you are.

Maxim : I’m trying to explain to you why we are going to get vaccinated.

Irina : And thank him for these explanations. I could just keep silent now.

Maxim : Guys, regarding the virus: yes, it is laboratory. Yes, it was created. Yes, it was created for a reason. The entire noosphere of the planet allowed this virus to appear. We will not look for who created it and why it was created. We just understand that humanity is ready for this virus.

Irina : We don’t know anything about immunity? MidgasCaus knows nothing. Fine. Then I advise you. Probably, after the broadcast is over, I will send our respected doctor Komarovsky about coronavirus and vaccination against it to this chat, to the comment chat for this video. He said it very well. Maxim, did you watch this video?

Maxim : Yes, and you got Komarovsky, anti-vaxxers. You are looking for a problem where there is none.

In fact, the problem is completely different. There is a problem in civilization as a whole, because you shout that all are bureaucrats, all are penny-pinchers, bribe-takers. As soon as you sit in a position, you begin to take these bribes yourself, you begin to engage in petty behavior yourself. The problem is human civilization, not coronavirus and vaccines.

Irina : You write that we do not accept people for the retreat without vaccination.

The point is that we have nothing to do with it. There are some laws

that allow regional heads, for example, not to allow people into hotels. So far this is not available in those hotels. But we don't know what law will be there in September.

And if they pass a law there that says they won't let you in without a certificate, we are no longer responsible for that.

Maxim : This can also happen. And we, in principle, can also assume this. This may be force majeure.

Irina : Thank you. We send you the light of our love too.

Maxim : Warm water and bright light for you too.

Irina : We wish you to take a warm bath with lavender, drink tea and calm down.

Maxim : Komarovsky is not a virologist, but he worked in the virus department for about 10-12 years.

Irina : He says there that he worked there in the infectious diseases department with children. He is a pediatrician, he has many years (I don't remember) of experience in the infectious diseases department. He worked with diphtheria children, rotaviruses.

Maxim : I will say that many people here are much smarter than Mead, so they clearly know what to do and what not to do.

Guys, you know what? The Cassiopeia Project was created to increase the level of awareness and perception. If you want, don't believe us, if you want, unsubscribe from us, if you want, look for your low vibrations, the belief that someone will save you for a lot of money.

The Cassiopeia project exists on condition of donation. Donation is an opportunity for you to evaluate the knowledge and information that we provide. We are even ready to show you with our own experiment, with

our own example.

These anti-vaxxers are already sick of everyone. You create an atmosphere in which a mutating virus is formed that will eventually fuck everyone up. It is you people who need to come to your senses, not us.

1:35:47 Why don't "seeers" trust the vaccine?

Irina : Very good question. Why are so many seeing people talking about the dangers of the vaccine? Great.

Maxim : Cool question. Let's.

Irina : Seers, do you mean regressologists, hypnologists?

Maxim : Well, there are super mega people there who see the future and feel the vaccines. I've already seen a lot of videos there, where people who see them talk about the horror of this vaccine.

Irina : Because the seers, if they themselves watched the videos created by financial and pharmacological corporations frightening with the consequences of the coronavirus, with their fear they attracted low-vibration plasmoids, who told them all this, understanding everything perfectly.

By the way, these plasmoids hope that compulsory vaccination will be introduced for everyone. They really hope so. And they hope, creating the image that the vaccine is poison and destroys you, that if you are nevertheless vaccinated by force (they hope so), then they will eat well from your fears. You will already be vaccinated, and you will shake all your life.

Maxim : Yes, and with these fears you will go to them, and you will give a lot of money for cleansing you of various entities, for attaching your Soul back. For anything.

Our Russian, as I say, super mega contactees, regressologists, tarot readers will make money on your fears. Plus, thin-material plasmoid civilizations will feed on your fears.

Irina : Bergastre makes another statement for the authorities.

(Bergaster speaks). I am addressing you, dear people, and also those representatives of government agencies who will watch this video. Those fears that people now have, in egregors about vaccination, are induced by distrust of you.

Yes, distrust of you due to the fact that the laws that are passed in the government are implemented on the ground as if there were people there who contradict the very system of power.

And due to the fact that there are many abuses in matters of health care, in matters of paying salaries, in social issues, because of all this, a very large aggressive energy of distrust towards you has accumulated among the people.

You are also responsible for this situation. As wise and good rulers, you must not only make laws, but also ensure that they are carried out locally.

Maxim : Yes, you are absolutely correct. If we needed to promote ourselves now, to gain a huge audience, we would now be telling you how scary vaccines are. Now they would come up with practices that would relieve you of the effects of these vaccines.

In fact, there is no point in us deceiving you. There is no point for us to hang noodles on your ears, to engage in all sorts of nonsense, creating a name for ourselves.

I am sure that in a year, a year and a half after we are vaccinated, some people may not remember what was written here about us.

I remember what other seers said about us. That this project will die

soon, that we will not live to see a certain moment, that we are from the dark ones, etc. Just look at the number of people produced by the project. People all over Russia have already left. Look at the reviews of these people, go to the sites, read.

We are created for you. In any case, what is happening now is fooling people. This plan is being carried out in order to control you and reduce the population. Through you, through those who have not been vaccinated, through those who will create mutations in the future so that everyone else will die.

Irina : Plasmoids, by the way, hope, by sowing this panic, for mandatory vaccination. Here's a paradox: those who tell you about the dangers of compulsory vaccination are the ones who most hope that they will introduce it after all, so that they can eat you later.

Maxim : Yes, friends. Kryon doesn't say otherwise. I read Kryon, what Kryon says about vaccinations. Read Kryon carefully. Everything is clearly described there, everything is clearly explained, and even the causes of this virus. Therefore it is not necessary. Everything he says is normal.

Irina : (Reading) "Maxim is pitting the vaccinated against the unvaccinated"?

Maxim : I told you that we keep our words, and we will get vaccinated after we go and celebrate our birthdays.

Irina : Once again I urge you, dear friends, who have already been vaccinated. Don't just write here. I perfectly see your messages here that you have been vaccinated and that everything is fine with you.

Maxim : I'll also tell you that we got sick. It hasn't even been six months since we got sick, but we'll still go and get vaccinated to be sure of our immunity.

Irina : Once again I urge you, dear friends, everyone who wrote in the chat about vaccinations that you have been vaccinated, I read all this, I

see. I ask you to write about this not only here, but also in our chats. I understand that you may not want to get involved, but perhaps after reading your experience, someone will change their mind and protect themselves and theirs, which is most important. Maybe he has a strong immune system from his elderly parents.

Maxim : Guys, this “man who talks too much”, he is the head of the Cassiopeia project, so I give feedback to everyone who loves life. In fact, I don’t give this with negativity, I give it with an emotional presentation.

Irina: The Kremlin paid.

Maxim : Well, of course, I’m sitting, my pockets are full of Kremlin money, and I’m thinking, where should I spend it, this money? Well done.

Irina : Just like Komarovsky, I assure you that if it is proven that there was a transfer from some government agency to us for the coronavirus, we will pay you a hundred times more.

Maxim : I’ll tell you this: if you prove that we are supported by any law enforcement agency in terms of politics, combat operations and everything else, you also provide me with information, a check, and I will multiply by one hundred and back to you.

Irina : At least for one person, look, we have dispelled doubts, this broadcast was not in vain.

Maxim : Yes, if there is at least one. Nonsense. Of course it's nonsense. Listen to the smart people who tell you who will get rid of the root causes of vaccinations. Everything is fine. We're definitely talking nonsense. Okay guys, thank you so much for broadcasting. I'm really grateful to you.

Irina : We'll meet in a week at my birthday.

Maxim : The topic is very telling. We will have a very interesting super broadcast. I won't tell you what we will do on this broadcast. But on the 11th, next Sunday, at 20:00, the broadcast will be dedicated to Irina's birthday, and she has prepared some kind of gift for you. I won't say which one.

Irina : Bye everyone. High vibrations to everyone.

Maxim : Bye everyone. Thank you very much to all the anti-vaxxers for being with us and for making us talk about everything very emotionally.

Irina : Nothing. I conveyed Bergastre's words, he was very determined. I want to tell you that Bergastre is the head of the Security Service of the entire Galaxy. LiShioni and MidgasKaus are simple scientists.

1:43:42 Coronavirus is a spiritual lesson for humanity.

Maxim : Bergastr, what would you like to say to the people of this planet at the very end of this broadcast?

Irina : (Bergaster speaks) I apologize if I was too harsh. In this situation in which earthly civilization finds itself, it is very important to make the right choice. Let your heart tell you this choice. Just remember that today about 15% of the Russian population has already been vaccinated, and even more around the world. In America and some other countries, almost mass vaccination has already taken place. If these vaccines were dangerous, it would have already been revealed. But so far only the danger of coronavirus has emerged.

Regarding the question asked to me, as the head of the Security Service, about whether MS can help destroy your virus. Spray it into the atmosphere, for example, so that it dies.

You see, we are forbidden to interfere in this way, because this lesson comes to you from the Spiritual world. A lesson in accepting your power first. A lesson in considering your authority, the people God has appointed to care for you. If you don't learn this lesson, your entire

civilization will collapse.

Maxim : Thank you, Bergastre, I think the same.

So guys, thank you all. Thank you for the birthday wishes. See you probably on Sunday. At 14:00 we will have a flight back to the ship to Ashtar, and at 20:00 we will have a live broadcast.

If you think that someone threatened us, that someone bought us, this is nonsense. Everything else we presented to you is exactly what we could give from MS representatives.

Bye everyone. Until next time.

Irina : Light of love and high vibrations to everyone.

https://vk.com/wall-183810725_73936

July 2, 2021

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia Project and the Center for Spiritual and Physical Development;

Bergastre is a representative of the planet Burkhad (Pikran), a specialist in contacts with the Earth, a specialist in safety in contact situations, director of the security service for contacts with worlds not included in the MC sector of the Milky Way galaxy;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world.

#310 Live broadcast. Important information.

https://blog.cassiopeia.center/pryamoj-ehfir-vazhnaya-informaciya
https://www.youtube.com/watch?v=VRjX0bqmc2M

00:04 Vlad Freedom.

Maxim: Today we are going on air without an announcement. There was a 10-minute announcement. The first question: “How can you hear us?”

Irina: Hello. How can you hear us?

Maxim: Now provocateurs will write: “I can’t hear you, close the broadcast.” Great, everything is ok. Hi all! I'll start right away. We have important news!

Firstly, I want to apologize to Vlad Freedom for the last broadcast. Vlad, I'm sorry. They pushed our heads together, they did it purposefully and intentionally. I looked at what you were talking about. You didn't say anything about us at all. I did not find the audio that I was told about (about vaccines and chips).

My apologies. I don't need ethers. It is my mistake as a leader that I fell for the information that was given to me. I publicly apologize. You really didn’t say the words I said on the last broadcast about vaccination.

As soon as I began to study this information, the next day a contactee with reptilian civilizations came to us. To be honest, we broadcast and I'm a little shocked! There will be a video that will change your mind.

I thought that regarding chemtrails, the government, kidnappings - this was all disinformation, the machinations of subtle civilizations. An interesting thing turns out: it turns out that everything is true. I probably wouldn't have believed it completely if this information had not been passed on through Irina.

We will have a broadcast called "Cassiopeia takes off her rose-colored glasses." I am sure that this information will shock almost the entire audience of Cassiopeia. I ask you not to react to this video, but to listen carefully to the information that will be given. We are ready to give information that we have not given before. I am willing to admit that I was mistaken about the information that other contactees give.

Next week there will be an interesting conference called "Cassiopeia takes off her rose-colored glasses." Shocking information that will excite the minds of not only our subscribers, but also the minds of many people who are in the dark.

Vlad, dear, I'm sorry, I was wrong. They pushed our heads together. But the next day information came that changed my mind. I changed my understanding of what we are for, who we are, with whom we communicate, that the world is not so colorful, not so saturated with Love. Watch the broadcast and see for yourself.

Today we had a conference with representatives of the Interstellar Union, the Galactic Federation of Light, the Spiritual World, regarding the information conveyed by representatives of the reptilian civilization. It is not part of either the Interstellar Union or the Galactic Federation of Light and is called the "Order of Six". Guys, wait for the broadcast.

Yes, of course, we are scammers, so I apologize. We train people because we are scammers. You may believe it, you may not believe it. Even if you don't believe it, we will still carry the information that representatives of the Interstellar Union and more give us. Irina is a unique contactee who can receive any information from other

civilizations and the Spiritual World. And every time, as a project manager, I am convinced of this.

Vaccine? Do it if you want, don't do it if you want. This is your personal choice, we do not force anyone, we have expressed how we feel about this. We will not convince or change anyone's mind, this is not in our interests. The world is indeed divided into two camps: "for" and "against". We want to be who we are. We want to bring Light and Love.

Believe us or not, call us scammers, is your own business. We do not convince anyone of anything. I don't lose my nerves. I see your comments. Everything's OK. The world is beautiful and multifaceted. Every time I am convinced of this, I become wiser, stronger and understand why all this is needed.

Bye everyone. I leave Irina to you. I think that today she will answer any questions you may have. In addition to vaccination. All! We closed this topic, we don't talk about it anymore.

Forgot. The most important news! Representatives of the Independent Association of Doctors responded to that broadcast and filed a lawsuit. They are ready to hold a conference with us about vaccination. Our representatives are ready to go to the conference with them. I hugged everyone, I don't say goodbye. I'm near. You will hear my, as you sometimes write, "wild screams."

07:03 Presentation of conference participants.

Irina: Hello, dear friends! A man named Vasily came to us. Through me, information was conveyed by representatives of the "Order of the Six" - a reptilian civilization and more. Maxim knows how to ask questions.

Maxim: I was perplexed after the broadcast, I couldn't come to my senses all day. Therefore, I am sure you will really like the broadcast. Especially those who listen to people who have: conspiracy theories, 5G, chemtrails, vaccination, submission, servility, secret governments. Video for you. It confirms this information.

Irina: While Maxim was speaking, I read a question from our curators: why didn't they talk? We'll talk about this now. After I introduce those who are here and talk a little about the past week.

Our curators are with us: MidgasKaus from the planet Esler and LiShioni from the planet Shimor.

They were with us at a long conference regarding the information we received from the reptilian civilization. The conference was moderated by four of our senior administrators. Representatives of different civilizations gathered, including the Intergalactic Federation of Light and the Interstellar Union, the Security Service. All the questions that Maxim spoke about were answered in detail, in our opinion.

Maxim: You are absolutely correct in writing that not all reptilians and grays are bad. We recently learned that there is a civilization similar to the "grays": a little taller, more silvery skin color, but has absolutely nothing to do with the grays. She is part of the "Order of Six", which provokes people. You will learn about this from the conference "Cassiopeia takes off her rose-colored glasses."

Irina: Then there will be a second part with the Interstellar Union.

Maxim: It's a secret for now about the second part. We spent the whole day analyzing this video. I had no choice but to gather all our curators, because the information I received went against many things.

Irina: So, representatives of the planet Shimor - LiShioni and the planet Esler - MidgasKaus are present with us. They were with us during the conference. Now I want to talk about the week I spent here.

10:29 Re-check of alien bases on Earth and in the solar system.

Irina: Galactic news is traditional.

LiScioni said that an hour ago information arrived in the space of the Interstellar Union, on the interstellar Internet (only it is faster, with

advanced functions). We will call it “interstellar communication”.

Information has been received from representatives of the security service of the Interstellar Union that a re-inspection of all bases on Earth and in the solar system is being prepared by the security service of the Interstellar Union together with the Galactic Federation of Light. Any extragalactic civilizations from the Intergalactic Union who are interested in participating are invited.

Ashtar Sheran will be personally present at these inspections. They will inspect active and abandoned bases, bunkers under them throughout the solar system and again on Earth. Particular attention will be paid to the bases of the planet Tashig and their colonies.

12:18 MidgasKaus about the reason for not accepting any information.

Maxim: Dear Karen! Tell me, is life interesting? Yes? Are we telling the truth, or is someone making up something for us? I, too, like you now, if I were not in the subject, tried to scribble and prove to all people that someone is inventing something for us.

Karen, we are not trying to convince you otherwise. It's up to you to believe or not to believe. I highly recommend that you watch all our previous videos, study us: who we are. The most important thing: think about the fact that we trained a lot of people. We already have 150 students. Please look at the reviews of students who attended our school.

Irina : (MidgasKaus speaks) I also read his message through Irina's eyes. I'll tell you my opinion.

(MidgasKaus says) If a person not only does not believe in the information, but tries to convince others, then in the depths of his Soul he knows for sure that there is a grain of truth in it. He is afraid to admit to himself, otherwise the meaning of participating in the discussion is lost for him.

In him, the struggle is between the Light, bright thoughts and his own darkness. This information frightens him, repulses him, he strives to protect others, but in fact he protects himself from it.

It is vitally important to approach this with full understanding; any of us could have been in this person's place. We don't know what happened in a person's life that set him up in such a way that he tries to go against the society in which he found himself of his own free will.

14:20 Races of dragons. The meaning of the message about checking alien bases on Earth.

Maxim: Guys, you are asking about dragons. Yes, indeed, they exist. Draconian civilization.

There are big dragons - five meters tall with wings. There are small ones - reptilians. There are many reptilians. They exist in the Astral as well as in reality. As with everything, there are both good and bad. The Interstellar Union includes the Selbet civilization, they are friends for us.

Irina: This is the news! It became known just an hour ago. The second stage of testing is launched, starting from Earth. Why report? It's better to keep it a secret so that there is no chance of covering your tracks.

Checks will be carried out at different levels, using various instruments, including energy ones. They will check employees and ships that flew to the solar system. The checks have almost begun. There will be no chance to cover your tracks. We are sharing this news to let you know how seriously we take information from an Earth-unfriendly civilization.

16:05 Cassiopeia's attitude towards vaccination.

Maxim : We have a short broadcast today. We won't talk for long.

I forgot to tell you. After our broadcast about vaccines, many

subscribers unsubscribed from us. About five places have become available for the retreat on Lake Baikal. Visit the site, look for links, sign up. If anyone wants to, but was unable to get to the retreat earlier, I will give the link below after the broadcast. Some people are lucky, but we are not. They started unfollowing us.

Irina: Each person chooses his own path. People unfollowed because of what we said about vaccination. Perhaps we were misunderstood. I will repeat once again my personal position and, I think, the majority of the management of the Cassiopeia project. Our position is that every person on Earth has freedom of choice.

Every person on Earth has the freedom to undergo medical intervention of any kind or to refuse it. Vaccination, like the administration of any drug, like taking pills, is a medical intervention. The person himself gives his consent to it.

But now the conditions of the high alert regime declared by law not only in Russia, but throughout the world, in some countries the restrictions are much stricter: wearing masks, vaccination.

You know about this, dear friends. By law, a person's free choice may not be taken into account. Conditions may become mandatory for certain categories of people, for certain professions, for those checking into certain hotels.

Why is this happening? The laws of the Russian Federation adopted in the State Duma imply the possibility of such events.

Maxim: We are not "sinking" anything, not for any vaccine. We explain the government's position on vaccination. We don't force you, we don't convince you. This is everyone's business. We explain to those people who sometimes do not understand that they live in this state.

19:40 Petr Garyaev. Linguistic-wave genetics.

Maxim: Irina, an interesting question for MidgasCaus about Peter

Garyaev and linguistic-wave genetics. Has he heard anything about this?

Irina: Yes, I heard. I heard from Irina and other contactees. Personally, I did not know this person, I did not communicate.

Maxim: You didn't have any personal contact with Pyotr Garyaev?

Irina: No, I didn't contact you personally. He was a contactee. To find out from the curators, you need to go to the Spiritual world, since he has left the incarnation.

I heard questions from Irina and from the participants of the conference we held.

From the explanations of other people, I learned that he was engaged in linguistic-wave therapy, studying the influence of various human energy states on genetics, the influence of various factors of the external world on this energy state, such as color, sound, music, certain words.

What can I say? Does a person's genotype affect their energy state? Of course it does. The energetic state of a person is transmitted through mental-astral fields, the resonance is transmitted to the etheric field, which is included in all etheric matrices of organs and individual cells. Each cell of the body has an etheric matrix of its DNA. The DNA matrix can be influenced through resonance from the state of astral-mental fields, increasing or decreasing spiritual vibrations. A change in the etheric matrix of human DNA, if the circumstances of the external physical world contribute to this, can already cause physical mutations.

By the word "mutation" I do not use the word widely known in your media society that it is a harmful change leading to any disease. By the word "mutation" I mean any change in the genetic apparatus that can be neutral, harmful or beneficial for the cell. There are developmental mutations.

Mutations are a necessary element for changing the information that a

child received from his parents. He is not their exact genetic copy. He is always different from both dad and mom, thanks to the mutations that occur in him. They occur in any organism due to the large number and speed of cell division.

Another question that Peter Garyaev studied, according to my data, is how one can influence mutations in a positive direction so that they bring health, longevity and life to the physical organism in a new quality mode. To have more energy, higher body tone, improved memory, etc. So that the physical body works at high frequencies of etheric vibrations.

Such influence is possible. I'll tell you. I don't know his developments in detail, but Esler has long studied the influence on the physical organism through the etheric body. Positive influence is helped by harmonious music, spiritual songs, reading books, poems, listening and pronouncing words filled with the pure energy of Love.

It destroys ethereal DNA matrices through human perception of the opposite - words that carry rudeness, insults, and destruction. They destroy slowly, they undermine the etheric matrices of both the one who pronounces (the source to the greatest extent) and the one who listens or reads them.

Maxim : Garyaev's matrices work. Sound matrices also work. Do not worry. Don't worry. Everything works, but in a certain conditionally conscious form of perception. The main thing is to understand it correctly and learn to use it.

25:32 How to find out the program for implementation?

Maxim: Irina, the question is: "How to find out what was planned for implementation, what is not suitable for implementation, and what is suitable?"

Irina: All memory of what was planned for this incarnation is stored in the disembodied part of the Spirit, which we call the Higher Self. The Higher Self is always in touch with your embodied part of the Spirit,

which is called the “Ego”. Ego is an embodied part of the Spirit; it does not imply that a person is an egoist. This is the embodied part of the Spirit that everyone has.

The Ego, the embodied part of the Spirit, can, at its own request and request, enter a state of physical relaxation and mental calm. In this state, consciously turn to your Higher Self with the question: “What were the plans for incarnation, and to what extent are they being fulfilled now? Is there a departure from the plans for incarnation, and how to return to the path of Light, if it has been implemented.” Only through the Higher Self .

Maxim: In general, you need to go to the Higher Self. We have a large number of trained masters who lead to the Higher Self. On pre-conditions. They will work with you, teach you how to access your Higher Self on the terms of donation.

Donation is your gratitude from the heart. You decide how much you can leave to the master.

Those who come to us, study and try to make money from it, they leave the Cassiopeia project.

Yes, “Cassiopeia takes off her rose-colored glasses.” I'm very glad I had them.

27:47 Prototype of the planet from the movie "Avatar".

Maxim: Where is Kirchiton now, how is he doing, Irina?

Irina: Kirchiton? I will have a meeting with him, and I will definitely tell him greetings from you.

Maxim: Irina will have a contact soon, we won’t tell you what date. There are reasons. But we will definitely tell you about Irina’s flight. We have already planned with the administrators where she will fly.

Regarding the movie "Avatar", I think this is the planet Shimor. This is one of the civilizations that is displayed there. Planet Shimor is similar to the planet from the movie "Avatar" and to those avatars that live on the planet.

Irina: LiSioni said: “I want to watch this film through you.”

Maxim: Look through my eyes.

28:37 Transition from 3D to 4D.

Maxim: What do you think, Irina, how will life change when moving from 3D to 4D? Thank you.

Irina: Will life change by moving from 3D to 4D? (LiScioni is now answering).

Maxim: LiShioni, they do not mean the exit from incarnation into the 4th density, dimension. They mean the increase in vibrations in this incarnation. It's a big difference. When you give your answer, think about what people are asking. What will happen when we move to another level of vibration?

Irina: Both in reincarnations and in this incarnation, the answer will be approximately the same, only at different levels of awareness.

When moving from the 3D level to the 4D level, the perception of the Spirit, which is in a new density, dimension, in new place of space. Your perception and self-image will change, it will be a different world.

Will it be similar to this one? To a large extent, it depends on how this transition goes. You will find out the consequences of this transition after it ends, since the future has many options.

Maxim: Thank you, LiSioni. Guys, who couldn’t sign up for the retreat on Baikal, we have a link in the previous broadcast. I will give the link

after the live broadcast. It will end at approximately 21:00, I will give you a link to the recording.

Irina, one more question.

31:16 Probability of a second galactic war.

Maxim: Is a second galactic war on the horizon?

Irina: Today we talked about this with Bergastre and Artis from the Lyra civilization. They said that there is no war on the physical level in the Galaxy, because the MC now consists of 117 civilizations, and those civilizations that have a desire to negatively influence the Earth are not included in the MC. There are, as we were told, only 16 of the civilizations that go into space. This amounts to less power than the 117 civilizations that have gravity drives and military technology corresponding to this level of technological development.

Maxim: Guys, you read our thoughts. I'll tell you a secret. Irina, due to the fact that she did not make direct contacts for a long time, was scheduled to have two contacts this month. They punished her for not going out last month. First contact will be to Mars. It was a secret. The second contact is to the base on Lake Baikal. So everything is fine.

Lazmar writes: “There is no virus. 4D, 5D is rather an internal state.” You write everything correctly, Lazmar! 3D, 4D, 5D is the internal state of the energy of vibrations of the person himself.

The more conscious you are, the less condemnation, pain, hatred, dirt, anger, hatred you have, the higher your vibration and the simpler and easier it is for you to be in this world.

You write that there is no virus there. Of course he's not there! I didn’t get it, my girlfriend didn’t get it, and my friends didn’t get it. It wasn’t a virus, we came up with it ourselves. So don't worry. Everything is fine.

When will there be a broadcast about “Rose-Colored Glasses”? The

broadcast about “Rose-colored glasses” will be next week, somewhere on Tuesday-Wednesday. I’ll say it again: “Just a bomb!” This broadcast “turned me around” as the head of the Cassiopeia project. I can’t imagine what will happen to you, how many crazy people will return to our channel. I did not expect the truth that I heard.

34:01 The reason for the appearance of previously unknown information about the negative attitude towards earthly civilization.

Irina: There was a question: “Why didn’t our curators say anything?” I will answer, this is really important.

Maxim: I also had the same question. Why didn't our curators say anything?

Irina: Today we received an answer to it. I'll answer now.

Maxim: Maybe we won’t? Let them listen to the answer.

Irina: MidgasKaus and LiShioni, with whom we communicate, Raom Tiyan, are scientists. They are engaged in science: the study of space civilizations. We are in space.

Maxim: “Give the floor to Irina! Shut up! Don't interfere! I'm silent, my gentlemen!

Irina: We communicate with scientists. MidgasKaus is a biologist, LiShioni is a specialist in the Astral, Raom Tiyan is a physics specialist. We communicated with them the most. They are our curators. Bergaster is not a scientist. He is a representative of the intelligence services. We invited him less often to individual conferences.

Scientists on all worlds, including the Interstellar Union, are not as interested in politics as they are in their science. Those scientists who communicated with us are tuned in to Light, Love and acceptance. You know their beliefs. This is our belief that there is nothing stronger than

Light. Vaccination and Vaccination Situation: MidgasCaus has been pretty lenient. He said that this is the right of every person. I will explain my position, and you – as you wish. When Bergastr came to the live broadcast the year before last, you heard his position. She was much tougher.

In relation to other civilizations that we were allegedly not told about. On many broadcasts that were with me and our friends, at conferences, my curators repeatedly said that even in the MS there are politicians who are convinced that the Earth is treated too softly, that we are a civilization that poses a danger. Our critics are even in the MS.

Maxim: I am very gentle with people. You miss Goldstein. He would put everything in its place.

Irina: We were told that in the MS there are those who are opposed to the Earth. They have freedom of opinion. You can say whatever you want. They are not punished for this. I have been told many times that there are civilizations that are not included in the MS, whose position on Earth is more radical. This happened in our conferences. I remember.

There is no secret about this. We didn't ask in detail. MidgasKaus and LiSioni did not talk about this in detail, not wanting to sow fears, rejection, anger and other destructive emotions in us.

They bypassed this issue; they did it quite deliberately in order to attune us to the Light. They said that such opinions exist, but they are not interested in them, they are interested in leading us to the Light. When a contactee from the reptilians arrived, then we began to deal with this issue. He, dear friends, did not come to us by chance. So it's time.

Maxim: I know that many people don’t see our live broadcasts. We sometimes have unplanned conferences, so click the bell and be sure to subscribe.

If you like today's broadcast, please like it so that other people can see this broadcast. Especially those people to whom I apologized today. Give it a like. There are practically three thousand of you. We treat you with love. We are ready to talk to you and reveal the truth that is being conveyed to us. Not all information is conveyed. They inform gradually, as I understand it, in order not to frighten people. Give it a like. Let's get 2 thousand likes and extend the broadcast by 15 minutes. If we don't get 2 thousand likes, then we'll see you next Sunday. I will be happy to continue broadcasting.

Today we had a very serious, busy day: graduation of students, conference with MS, Ashtar Sheran, flight, plus live broadcast. We are like “Papa Carlo” all day today.

Irina: This is our day off.

Maxim: Yes, our day off goes like this. We love you. Ask your questions, a couple of questions.

I'm sure we'll have a lot to talk about this week. Especially after the broadcast of “Cassiopeia takes off her rose-colored glasses.” I can’t even imagine what you will say about us and what you will think about us after watching this video. Honestly.

We even had internal contradictions among the administrators: is it worth posting this video at all? We had such information. Many administrators were against posting this video. Yes, Masha? Masha lives in Germany. She is present on the air next to Irina, our wonderful administrator.

We are waiting for two thousand likes. Oh, give it a like for Masha's sake. Who knows Masha, give her a like. She answers you on VKontakte, in the Tree of Life, and makes calculations for you. Mashulya does this.

Irina: Wow, so many likes at once!

Maria: Hello, dear friends! I'm very glad to see you live. Now I’ll figure

out where to look.

Maxim: Masha has never been on our live broadcast

Maria: On my own behalf, I want to thank everyone: both those who support us and those who criticize us. I love you all. I pay great attention to each of your messages. It makes me happy to watch you grow and gain awareness with the help of our interstellar friends.

You cannot imagine with what love, with what patience they treat us and you and your questions. I see this at every conference, at every live broadcast, and every time I admire them and you. I am sure: we have no other choice and opportunity but to reach a conscious level, a spiritual level and become a harmonious, conscious civilization. I'm sure.

Irina: Great.

Maxim: Mashenka, kissed Irina and take your place. Otherwise they will say that they are distracting Irina. They never told you that you were distracting Irina. And they tell me this all the time.

Irina: You see, they never said anything.

Maxim: Look how many messages went out immediately when you appeared on air. If I wear a green dress like you, we will get more subscribers.

Do we put a barcode on our forehead? No, we will not apply a barcode to the forehead with a laser. Guys, I am against it, I am ready to inflict it on the forehead of someone who wants to inflict it on everyone.

42:52 Spiritual causes of climate change on Earth .

Maxim: Guys, we will hold a conference on climate change.

We are facing climate change. I see. Our planet is being cleansed of us. We behave like a virus. We are destroying the planet: we are emptying the depths, sucking out the insides of our planet. We wage wars, destroy the ionosphere, polluting it with destructive thoughts and emotions that lead to wars.

Guys, try at least once a day, in the morning or evening, to think about Love, to think about the beautiful. I understand what you will say: that life is hard, the government is bad, something else is bad.

For yourself, meditate a little, read prayers, Burkhad and Esler moods. Create a monastery corner for yourself at home. Raising vibrations means reaching a new level of awareness. Reach a new level of accepting yourself as you are. Do not condemn yourself, do not blame yourself for anything, but thank (and your curators and mentors too) for the fact that everything is as it is. Are we humorous? We humor. If I didn't use humor, I'd go crazy.

Irina: "Max, we love you!" Look, they wrote it.

Maxim: I love you too. I have a special love for everyone. She's a lot stronger than you think. When I saw Irina, I had no other option but to show her to you, then all the puzzles came together for me. I never considered myself a highly spiritual and spiritual person. I was on simple, earthly low vibrations. Just like many other people who became enlightened, I was relaxing with friends, drinking, smoking, enjoying life until one wonderful moment. Nothing in life just happens.

Let's have one more interesting question. “Make a broadcast about climate change.” We will make a broadcast about climate disasters. You can call it a “catastrophe”. Why? Because six years ago scientists were talking about this. They said what needed to be done, but no one listened. No one will listen until we are washed away.

45:48 The likelihood of the Draconians' plan coming true. Attitudes towards earthlings of various civilizations.

Maxim: “Will aliens capture us?” Irina, come on!

Irina: I will answer this question, which is very important for all of us. The answer is known not from the MS and not from the State Fiscal Service, but from representatives of the Spiritual world. They said that the probability percentage was so small that the Draconians' plan would come true that I was even somewhat surprised at this small percentage, which is visible along the Probability Line from the Spiritual World. You will find out the exact number on air.

Maxim: After you see Vasily, Irina will begin to transmit information from the reptilian, watch the analysis of this broadcast with representatives of all possible galactic federations. The information is so interesting that for me these last weeks have been some kind of explosion, some kind of boom. The broadcast about “Rose-Colored Glasses” is probably the broadcast about me.

Irina: Some administrators were against broadcasting for everyone. I was for the exhibition. I didn’t hear anything special about it from the reptilian when I conveyed the information. LiSioni and MidgasKaus were present with us.

LiScioni later told me that there are civilizations that have different opinions about us, even in MS. Those outside the MS (he stated) have an opinion much worse than the reptilian expressed. He heard about it, but did not want to burden us with negativity.

LiScioni said that they do not pay attention to the negativity, the dirt. This is their own dirt. These civilizations must learn their lessons. We tried to protect you from this dirt, negativity, accusations and we will try to do so in the future. This is our conviction, our Love for you.

We want you, like little children, to grow up in the love and care of your parents - your creators and our common Heavenly Father, without knowing anything until a certain age that someone does not like you. This information will not help you now.

The fact that Vasily came to you and the reptilians gave it through Irina, you should have found out, this did not happen by chance. (LiScioni said)

Maxim: Guys, everything is not accidental. I realized that we couldn't get two thousand likes. It's OK. We promise that we will not hide anything from you. We promise that we will grow and develop. We promise that you will be the first to know about any information that will come to the Cassiopeia project. Why? Because it is in our interests, and we are ready to share, compromise, meet, communicate.

49:50 Vaccination in the Cassiopeia project.

Maxim: “Have you been vaccinated?”

We're in line. In Voronezh we have a problem getting vaccinated, but we will definitely go. I am calling my friends at the clinic so that as soon as the vaccine appears, we will be warned and the entire Cassiopeia Center will be vaccinated, everyone who has expressed a desire.

Even in the Center there are those who do not want to be vaccinated. It’s okay, everyone has their own lessons, everyone has their own path. We don't force anyone to do this. Our decision is to get vaccinated. We will definitely get vaccinated. Why? I believe that I will train my immunity.

Irina: Those who are for vaccination and those who are against, let's respect each other's choice. Please, let's not accuse each other of any conspiracies, mortal sins, or fears. We will respect your choice, even if it is not the same as yours. Respect is a form of Love in this situation.

Maxim: We don’t do propaganda, guys. It's your personal choice. We were asked: will we do it? What does propaganda have to do with this? We don't force anyone to do it.

Irina: Now about the “rose-colored glasses”. The expression (MidgasKaus says) is not accidental. Pink is one of the colors of the planet Venus. This is a symbol of the energy of Love in your solar system, in your astrological charts, in numerological calculations.

Maxim: Irina, let’s finish quickly, otherwise they’ll get two thousand likes now! To be honest, I want to rest. I don't want you to give us two

thousand likes! Please give us a day off today.

Irina: Look at the number.

Maxim: No, we won't! 21:05. Three minutes left. If we dial, that means we'll dial; if we don't, that means we'll go to rest. Thank you very much for not liking us. I honestly want to rest. A very difficult day. But I always keep my promises. Honestly, I'm that kind of person. Irina will correct it. Someone has come. Wait, come on, I'll correct it. Everything is. 1987, 13 more likes. We have to get out, get out. 21:03. I promised to leave at 21:05. "Come on, it's too early to sleep." On my feet since 6 o'clock in the morning. Our release is today.

Irina: Even more, look.

Maxim: I taught a lesson today. Are you kidding us? I was joking! Plus 15 minutes. I understand! Go! Ask questions, we will hold the defense until the end.

Irina: About "rose-colored glasses" - this is a symbol.

Maxim: I agree. Ask questions, you have 15 minutes. I keep my word. If I said it, I'll smash myself into pieces, but we'll do as I said. According to the decision made.

53:50 "Rose-colored glasses."

Maxim: "I want your talismans." There are talismans, they will be soon. We'll launch an online store, everything will be fine.

Irina : Look, "rose-colored glasses" are a symbol of looking through your spiritual heart, filled with Love. To take off the "rose-colored glasses" means to look with some other emotion, with some other feeling. Not necessarily with a destructive one, but with some other one.

54:22 Chemtrails.

Maxim: Guys, we had a broadcast about spraying from an airplane. We explained that this is a contrail. Chemtrails are possible options. When you watch a video with reptilians, you will understand this. There is no technology or sense in this yet. Even if they spray chemtrails, they will not be able to control us using technology. There are no such technologies yet, they will be in the future. So don't worry, don't worry, these are just contrails from airplanes. There are no chemtrails yet. There is also something when the clouds disperse and the weather changes, silver and aluminum are sprayed. This is to change the weather, not to control us. Do not worry.

Elon Musk. What about Elon Musk? Aging billionaire.

“Do the electrical waves used to create rain in the UAE affect nature on a global scale?” Cool question!

Irina: We need the frequency with which they work. We need to find out the frequency.

Maxim: Guys, any global intervention in climate conditions affects the weather and nature around the globe. That's for sure, 100%. If there is this technology, I don’t know, is there such a technology?

Irina: It’s not clear what “electric waves” means? Not electric, but electromagnetic.

Maxim: The weather is influenced by subtle civilizations. When shamans summon Spirits, they summon plasmoids that affect the weather.

We need to look at what kind of electric waves are used to cause rain in the UAE. Maybe they say that these are electric waves, but they use the services of shamans. This also happens.

Irina: We need to see what it is.

56:26 Origin of races on Earth.

Maxim: They ask you to tell us about the races on Earth in a nutshell.

Irina: Exactly race?

Maxim: We have a wonderful article on VKontakte. It describes how races arose on Earth. Irina, can you tell me in a nutshell?

Irina: Yes, of course. The races on Earth that we see today originated from the same race that was on Earth before the war 12 thousand years ago. They were a white race, with white skin.

Due to the fact that energy, climatic and natural conditions on Earth have changed, our creators - representatives of the planet Burhad, changed some sections of the DNA of some rescued people. Therefore their bodies changed. For example, someone has dark, black skin, someone has narrow eyes. The percentage of genes remained the same. They changed specific opuses of people's DNA.

This was done so that people could adapt to different climatic conditions - the first reason.

The second reason is to teach Spirits who incarnate in new conditions to live in peace and harmony with people of different nationalities, appearance and religion. So that civilization can develop faster and enter the MS, where there are even more races.

58:20 The history of the entry of the planet Altras into the Interstellar Union. Genetic changes in the humanoids of the Altrasa civilization.

Maxim: Irina, they ask: how was your astral flight to the Ashtar ship today?

Irina: Good question.

Maxim: Good question. Ira was a little taken aback today. Who was there, who did she see? I've been freaking out for the last week. I think this is no accident. Something interesting is brewing. Irina, tell me what happened on the ship.

For those viewers who are present and do not know that Irina conducts sessions, they are called “Astral travel from the MS to the Ashtar ship.” Irina leads everyone to Ashtar's ship in the Astral Plane. They are met by our alien friends. Based on your internal requests, you are placed in different structures that help you heal.

Irina: Today on Ashtar Sheran’s ship there were representatives of Selbet, a reptilian civilization. Some of them are excellent energy healers. There were representatives of the planet Tashig, there was Ashtar Sheran and, of course, the Pleiadians. There were about a thousand earthlings at the session. There were also representatives of the civilization that was the 116th to enter the MS.

I spoke with a woman from this civilization. She told me. We hung in outer space next to the ship in astral bodies. She showed in mental images how they entered the MS.

The civilization is located in the constellation Taurus, on the border of the constellations Taurus and Orion. Between Taurus and Orion. She said that civilization about 300 years ago (about 280 years) entered the MS. She was 116th. The civilization was of the reptilian type. These creatures have been observed to have increased aggression and short temper due to their reptilian bodies.

The Council of the Planet decided to add genes from representatives of the planet Shimor into these bodies. The genes of the planet Selbet were not suitable (she told me). And the genetics of the planet Shimor were suitable. They combined with theirs by about 48%. This surprised me: more than half. She showed what her physical body and astral image looked like. A typical face of a reptilian lizard, only blue. Even small blue scales and black hair.

The humanoid said that a representative of the planet Shimor flew to them when the planet was not yet part of the MS. He had over 700 contactees. He was the supervisor of these contactees. It got to the point that terrorists raided Shimorets. He was saved. Shimorets came out of incarnation even before the planet joined the MC, but not much time passed before that.

The planet is called Altrasa. There was also a lot of struggle and faction clashes on the planet over MS. When there was a mass contact, Shimor's representative participated in it. In the end, they joined the MC, although there were wars before they fulfilled all the conditions.

1:03:05 Birthday gifts for Irina.

Maxim: Irina, until the last moment I didn't want to say what we bought you for your birthday. But viewers ask. Guys, just let's not get emotional, please, because it was Irina's birthday, and she wanted to make the decisions herself.

Irina: I asked my Higher Self.

Maxim: She asked her Higher Self. She herself wanted to decide where she would spend the money that you sent her. Tell me, Irina, where did you spend it?

Irina: Okay! I want to thank you, dear friends, for your gifts, for each of your congratulations, for each of your emoticons, for each of your smiles, for each of your rubles and for each kopeck that you sent me as a gift. This is all very precious to me.

I want to tell you that all week I went and asked my Higher Self how to spend it, what I should buy. I remembered what happened last year too, when they sent money for gifts.

Maxim: We made a video and showed the gifts. Frying pans, electric kettles, other utensils. Irina didn't have this, but in everyday life it was necessary.

Irina: Now I have it all. I remembered my relatives and decided to use the money this way.

I decided to give part of the money to my mother for her birthday, since I haven't seen her for a long time. We are not dating, she lives far away.

I decided to send some of it to my aunt for gas testing. She lives in a private house, which is heated by a stove. The house is cold, a large amount of fuel is required: coal, firewood. They are unable to cope with this. My aunt lives with her sister, who is sick. This winter they were very cold and cried. I know everything. There is no money, they live on pensions.

I asked Mead and Maxim. Both said: "Decide for yourself. Your gift". I asked the Higher Self, it told me that they needed it. I did this and told about the origin of the funds. Aunt was happy, but did not want to accept.

Maxim: This video is about 12 questions that changed my life or "God's April Fool's Joke." Irina is in the house where her aunt lives.

Irina: I lived with her.

Maxim: There is no gas heating. Irina asked to transfer almost all the funds to her aunt for gas heating; she sent 5 thousand rubles to her mother as a birthday present. Irina spent all the money on her mother and on providing gas to her aunt, with whom she lived, where there is no gas heating in the winter. Guys, thank you so much.

Irina: She conveys her gratitude to you. I said that this was not just money, but a gift, and people sent it. She thanks everyone, Maxim, for this.

Maxim: Why me? We need to thank people.

Irina: And you, as the project manager, and all the people. And she said that she would pray for all of us, for each of you.

Maxim: Guys, we knew that Irina could do very interesting things with gifts. The administrators and I chipped in. Irish, will you show us what we gave you with our project administrators?

Irina: Of course. Here

Maxim: Here's a little thing with the Cassiopeia sign. I don't know whether you can see it or not. Come, show me, try it. Can the camera detect it? Will be able. We gave this little thing, there is the “Flower of Life”, the sign of “Cassiopeia”, MC is our trademark. The administrators and I came together and made such a gift.

Irina: And such a beautiful gift.

Maxim: This is a gift from me personally. I think a beautiful pendant should be on a beautiful chain.

Irina: This is not a report. I just decided to tell you.

Maxim: You asked, we promised to give you a report. That's why we tell.

Guys, our broadcast time has ended. Finally we are going to bed. Thank you very much. Thank you so much for your support and birthday gifts.

1:08:44 Construction of the Cassiopeia Centers.

Maxim: The funds that you send by participating in the projects will go towards the construction of Centers throughout Russia and around the world.

We will do this with Love, with Soul. We invite and wait for you in our open centers. We have centers in St. Petersburg, Moscow, and Novosibirsk. Visit our website, find “Our centers”, which are already open. The centers are waiting for you. I gave the task to all centers throughout Russia: one day a week to accept all people on all equipment on the condition of “donation”, on the condition of “payment according to the heart.”

I am sure that the more centers open, the more opportunities you will have to look, study, test yourself, and go to the Higher Self with specialists.

Thank you all so much. We are waiting for you at the retreat, on Baikal. I won't tell anything. For many, this trip will become very significant in their lives.

Hugged everyone, goodbye to everyone, see you all again. Sorry there are so many of me! But I can’t do otherwise, because I am a leader.

Irina: Bye everyone!

July 18, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Maria Sokalskaya **-** moderator of the VKontakte group, project manager for online learning and other projects;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

#316 Coronavirus – a biological weapon? Impact of Covid on DNA, brain, human reproductive system

https://blog.cassiopeia.center/koronavirus-biologicheskoe-oruzhie-vliyanie-covid
https://www.youtube.com/watch?v=63AqzY8nqLk

00:21 Introduction of participants.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today with me is my curator, representative of the planet Esler, biologist, psychologist, specialist in the study of space civilizations, including our earthly civilization. His name is MidgasCaus.

He greets everyone and reminds that for him the earthly civilization is cosmic.

Nailya: Good evening, Irina. Good evening friends. My name is Nailya Dzhumaeva, simply Nelya. I am a neurologist by profession, working at the Institute of Virology of the Ministry of Health of the Republic of Uzbekistan. For the last 30 years of my medical and scientific activity, I have been involved in drug testing, which is a very important part of electropuncture diagnostics according to Voll.

Since 1996, I have been involved in viral pathology and drug testing related to this viral pathology in general. In 2000, I defended my dissertation on the use of Voll's technique in the diagnosis of chronic viral hepatitis B.

Last year, when the Covid-19 epidemic began, I actively got involved

in this work. This was the month of April and later. But since November last year, I began to notice that the nature of the disease in those patients had changed somewhat. And that's why, Irina, I would like to ask your curators a question.

Irina: Mead welcomes you too. (Mead speaks) Although I do not specialize specifically in microbiology - I am a general biologist, but this is also like a colleague, a researcher, and I am ready to answer questions.

02:24 Origin of coronavirus.

Nailya: Thank you very much. My first question. I start. I would like to immediately warn you that all the questions that I will now ask are, in one way or another, related to the data that I received during the drug testing process.

First question. According to data obtained during drug testing, Covid-19, being a respiratory virus, tends to become chronic. The fact is that viruses of this family of coronaviruses, by definition, cannot cause a chronic course of the disease. How, in your opinion, can this fact be explained?

Irina: Do you call its carriage by chronization of processes?

Nailya: I call it carrier. This is what it is called in some cases, in some chronic viral pathologies. But the fact is that carriage can, among other things, cause pathologies in those internal organs where this virus is located. We are not talking about the upper respiratory tract and lungs. These are completely different organs of the human body.

Irina: The fact is that, according to the Interstellar Union, this type of coronavirus is (I emphasize once again that according to the Interstellar Union) artificially created for conducting experiments to create biological weapons.

We have such data because in the insert of an RNA virus (it's like in DNA, only different) RNA of another virus was discovered, which could

not have been formed, in our opinion, in the opinion of the Interstellar Union, by crossing or some kind of mutation . He shows me how they look like they were cut off.

Nailya: I see. This is a genetically modified virus that has never existed on planet Earth before.

Irina: Yes.

Nailya: But I have another question.

04:40 Genetic modification from the point of view of aliens.

Irina: According to our terminology, any organism with changes from its original genetics is already genetically modified. For example, you as beings are genetically modified. Because you have been modified using special technology.

From our point of view, genetically modified plants are all cultivated plants, the appearance and weight of the fruits of which differ from their wild ancestors. Only you got this not with the help of genetic engineering, but with the help of a certain selection, breeding, etc. But genes change anyway. We call this genetic modification.

The mechanism of this genetic modification is no longer important to us: be it with the help of special tools, special directed fields or through selection. What is important for us is the very fact of DNA changes compared to the original organism and the very fact of mutation or a series of mutations. By this word I mean any change, without reference to harm or benefit to the macroorganism. Any mutation or chain of mutations caused by the mind is already a genetic modification for us. Precisely by the human mind, and not by plasmoid civilization.

Nailya: I see. Thanks a lot. The fact is that such a detailed explanation somewhat anticipated my second question.

06:29 Carriage of coronavirus in the human body.

Irina: This virus, due to the structure of RNA, the outer protein shell, has the ability to fall asleep.

If you compare them with bacterial agents, then this is very similar to the creation of cyt, but without the formation of a capsule. Coronavirus-19 tends to fall asleep inside a cell. And not only in the epithelial cells of the bronchopulmonary system or larynx, or something else. It can fall asleep in blood cells, in lymphocytes, for example; also in nerve cells. This, by the way, resembles the herpes virus.

Nailya: Thank you very much for your answer.

Irina: Therefore, there is only carriage. And the chronicity of the process is not just a carrier state, but a tendency to exacerbations. This is already true for people with weakened immune systems.

Nailya: Does such a forecast assume that every person on Earth will eventually carry the coronavirus in their body?

Irina: For many people it disappears, but for some it remains. This depends on the duration of the disease, on immunity, on the individual reaction of the cellular structure to the introduction of this pathogen. It may be that he suffered the disease and did not become a carrier. It happens that a person does not feel it at all, has not even been sick and wears it. It happens that he got sick, was cured, or he himself was cured by immunity, but continues to carry the virus. It happens differently.

Nailya: Got it, thank you very much.

08:42 Impact of coronavirus on the human body.

Nailya: According to drug testing, it seems that this virus carries some inherent programs that are being implemented gradually as the pandemic unfolds. In the process of observation, today, again based on the results of drug testing, we have already counted four different

variants of the course of Covid-19, including the acute form that is now occurring on Earth. For other forms of diseases, observation is still ongoing; I am not disclosing this information. But I would still like to know the opinion of MidgasKaus, so that he could say, dear colleague, about the underlying programs of this coronavirus?

Irina: About those programs that were initially envisaged during its creation?

Nailya: Yes.

Irina: We studied this virus at the energy level. We talked with those plasmoid civilizations that create a group Soul for him. They exist. This is a form of life, which means it has the form of an animal Soul.

You don't call a virus an animal because it doesn't have a nucleus. We call it an ultra-small animal, intracellular, as you say. Any animal, any living creature has a Soul. If its bodies are small, then the group Soul incarnates. It is created by plasmoid civilizations for these bodies.

Our representatives, our researchers, talked with these plasmoids. It was possible to find out that the program that was originally included in the Covid-19 coronavirus (this type, I will continue to call it simply coronavirus) is the effect on the reproductive system and the impact on human genetics.

The virus itself is capable of penetrating the germ cells of men and women and changing the DNA there, the sets of chromosomes that divide for conception. This is the program. This is designed to weaken the generation that will be born later.

Nailya: The next generation.

Irina: Yes, which will be conceived from them, from the carriers. It affects both men and women. Penetrates into the germ cells themselves, but in such a form that sexual transmission is impossible. They affect DNA, they are inside.

Nailya: Irina, thank you very much, I understand.

Irina: (Mead speaking) There is also an effect on the nervous system by changing the neurotransmitters of the brain, which leads to a subsequent decrease in vibrations, and the person is more susceptible to negative emotions.

12:30 Involvement of plasmoids in the creation of coronavirus.

Nailya: Irina, thank you very much! Then, from everything that has been explained, one question arises. It turns out that plasmoid civilizations also took part in the creation of this bacteriological weapon?

Irina: Plasmoid civilizations take part in the creation of any living creature on Earth. And not only on Earth. Any microbe, any parasite, any insect, animal. They create Souls, which subsequently acquire these bodies.

If you are interested in the question of why plasmoids create precisely such bodies that destroy people, I can answer if you have such a question.

Nailya: As I understand it, the ethics of plasmoids implies that they do not consider bacteriological weapons as something bad that can harm humanity.

Irina: They don't see it as a weapon. They don't see at all, like we do, on a physical level. They see on a subtle energy level that microbodies have been created that can embody the Soul they created. And the degree of its penetration into the human body, the fact that it will come out of incarnation, is perceived by them as an exchange of energies.

Nailya: I see, I understand. We think differently, so it will probably be difficult for us to understand the plasmoids, and it will be difficult for them to understand us.

Irina: Yes, if we give our arguments why you created these Souls of microbes that harm you, they will in any case say that this is a form of energy exchange between the body and the environment. If we say that a person dies from this or something else, then the plasmoid will immediately ask the question, do you want your bodies to be immortal? This will not happen. In any case, this is one of the reasons for leaving the incarnation, which can also be considered on a spiritual level. All that the plasmoid will answer is that if the Creator allowed everything, gave energy for the creation of this Soul, then it is as he pleases.

Nailya: I see. Irina, thank you so much, thanks to MidgasCaus. But alas, in the history of civilization, unfortunately, such cases have occurred. Not so long ago. This was the famous Hitler with a completely similar mindset.

15:22 Coronavirus and plasmoid civilizations.

Nailya: I have the following question. In general, it seems that Covid-19 has in its programs information about the state of all internal human organs in the form of information from the electromagnetic fields of all internal organs and systems of the human body. When a virus enters a person, it scans the body and strives to get into the organ where its information differs from what it receives from the scan results. This variant of the behavior of the virus in the human body is now being actively discussed by the world community. Is it so?

Irina: What I said initially. The plasmoid that creates the Soul puts a certain amount of energy into it. This Soul has some sensitivity. Even the Soul of a plant—the plant Soul—also has sensitivity to thoughts, emotions, and different energies in your world. And the group Soul of microorganisms, the group Soul of viruses too, has sensitivity to energies. It can read the electromagnetic range, for example, all cells, the ethereal range.

Plasmoids that created coronaviruses, herpes viruses, HIV, etc. (they were also created by plasmoids, not by the microbes themselves, but by Souls), they see this not as evil for you, but as development, as evolution. They believe that they have created microbes that will maintain the body's immunity in good shape and help it survive. And if

it dies and does not enter into symbiosis, it will only be because it will have disharmony on the spiritual level. Plasmoid civilizations believe (I confirm this as a biologist) that the same infection occurs differently in different people. The immunological response in tissue to the introduction of the same microbe - streptococcus, staphylococcus, Haemophilus influenzae - is different. There are viruses that, for example, kill 100% of animals and people. The same rabies virus.

Nailya: Yes, of course.

Irina: His Soul was also created by plasmoid civilizations. They will say that if a person died of rabies, it means that his Spirit is programmed for just such an exit, otherwise he would not have come across this animal. He will motivate you with this.

If we say, you are a murderer, you created death, some kind of weapon, then all he will answer is that the murderer is the one who created the death of physical bodies in general. All the same, the person will die, his physical body. And if death is viewed as evil, then any death, from any disease, must be viewed as murder. The following example will be given.

We know that the Spirit assigns itself a certain period in order to gain experience of life here, of living in this reality. If his body becomes immortal, he will simply preserve himself and will not be able to develop further.

Nailya: I see. This is simply a stage in the development of the Soul. Irina, thank you very much for your answer, I have the following question.

19:32 Coronavirus and oncology.

Nailya: According to the data we have received, chronic Covid-19 or, as has been said, carriage of Covid-19 induces a number of diseases in the patient's body, including oncological processes. In general, this is the case with other viruses, if we talk about RNA viruses. These include Covid-19. There is the same virus as hepatitis C virus and

human T-lymphotropic virus. Oncological processes also form there, but the process lasts for years, and there is a clear binding of the virus to certain tissues of the human body. In the case of Covid-19, its omnivorous nature and the speed of development of the oncological process are striking. This fact categorically distinguishes Covid-19 from viruses known on Earth. How can this fact be explained? Or is it a phenomenon.

Irina: What you call cancer is many different conditions of the body. You call it in one word – oncology, from the word “tumor”, “education”. It can be formed in completely different tissues, it can have a parasitic nature, a fungal nature, the nature of formations from a certain form of cyst-like forms of protozoa, including those with viruses inside them. There are such protozoa, for example, the same Trichomonas oralis or symptomatic Trichomonas, which live in any person in the larynx, in the trachea, inside of which, like inside human cells, viruses can also live, parasitize them, Covid-19 can also penetrate there .

Proteins on the surface are like a magnet for them (shows), they attract. Reproduction of the virus in such single-celled parasites causes their irritation according to an instinct inherent in all living things, which is called the instinct of self-preservation. They are irritated by the acceleration of division. They begin to move to the cyst-like level, gathering into round or oval cells, which then surround the internal tissues of a person. This can also form a tumor of a parasitic nature.

A tumor can also form due to changes in DNA mutations in the person himself. This happens from his negative blocks, from his negative emotions. Naturally, a severe Covid illness does not add positive emotions. It creates a background for the body against which the occurrence of cancer is facilitated.

Nailya: I see. The mechanism here is quite complex.

Irina: Cancer is caused by a combination of reasons. There are parasites, decreased immunity, psychological and spiritual reasons. A lot of everything.

Nailya: Thank you very much. Next question.

23:39 Coronavirus and the hypothalamus.

Nailya: According to the data obtained as a result of drug testing, the next organ that is affected by Covid-19 when it enters the human body, after the upper respiratory tract and lungs, is the hypothalamus. This is the area of the brain that is responsible in the body for the functioning of the organs of the endocrine system, for the course of immune reactions in the human body and is a suprasegmental department of the autonomic nervous system. Our observations show that in patients with chronic Covid, this organ is affected by Covid in almost 100% of cases. One gets the feeling that this behavior of the virus is not random. Am I right?

Irina: Yes, this is no coincidence. Migration of these viral particles through the blood-brain barrier into the blood vessels of the brain. The smallest capillaries have inner walls of vessels that allow some substances to pass through and not others.

Nailya: Yes, this is a very serious protection for the brain. But I have the feeling that migration here does not occur through the blood-brain barrier, but directly.

Irina: They are inside lymphocytes. They can penetrate inside, like the same mycoplasmas (larger) or chlamydia. These are mainly lymphocytes, sometimes monocytes, such forms of leukocytes. Already with them, travel inside them. It will be like transport for them. They do not damage it; the lymphocyte itself remains alive. Not like HIV damages the lymphocyte itself. Here he remains alive, even his internal antigen recognition structure is, as it were, under the influence of this virus and does not recognize. The virus does not fight, it is dormant and does not reproduce. If it began to multiply inside, it would reveal itself and would be destroyed by the lysosomal system, which is present in any leukocyte. It travels, can enter the brain, affect nerve tissue (shows), cause neuritis, and cause forms of meningoencephalitis.

About the hypothalamus. For the virus, in its perception, the human

body is not divided into the hypothalamus and something else. For the virus, the human body is a single planet from which certain signals for it come. Viruses in one organism are interconnected by such a connection. You would call it something like electromagnetic, but it is much faster, it is a cellular connection. It is not chemical, but rather energetic.

Nailya: This is an energetic connection, yes.

Irina: They seem to be talking to each other. And they don't just talk. These group Souls constitute the group mind. It is not like a person's or like mine. It is instinctive, like any animal. His main task is to survive and acquire offspring.

Nailya: Thank you very much.

Irina: For him, the hypothalamus is the place where signals that are dangerous to his life come from. For example, strengthening immunity is dangerous for the life of viruses. He sends certain parts of himself there (shows threads, mycelium, only it is energetic), they are connected by invisible threads. He sends a part of himself. This is a viral attack on the hypothalamus, maybe on the thymus. Reduces the body's immune response, which means it reduces the percentage of death of its particles.

He perceives life in the body not as penetration into something else (capture), but as life in the place where life is the only possible for him. It can no longer reproduce anywhere. For him, the struggle for survival begins.

The tendency to create blood clots, the tendency to severe lymphopenia, and thrombocytosis are understandable. This is the effect of certain enzymes and proteins created by one's own cells in order to reduce the number of lymphocytes that destroy it. And blood clots to reduce the speed of their flow through the blood to this place.

Nailya: I see. This, in principle, reflects the somewhat autoimmune nature of the processes. They are expressed primarily in acute Covid,

but, unfortunately, in chronic Covid this fact occurs. Thank you very much, then I have the next question.

29:56 Aliens about the impact of coronavirus on human immunity.

Nailya: If we destroy Covid-19 precisely in these areas of the brain, will this ensure a milder course of the disease? Or it can completely contribute to elimination, i.e. disappearance of the virus from the human body? In your opinion, is this opinion true or not? The hypothalamic area is exposed to external influences.

Irina: The antiviral drugs you are currently taking have difficulty penetrating this zone. And this is understandable, because the molecules of these substances are recognized by the cells of this barrier as dangerous to the nervous system itself.

Nailya: Absolutely. This is where the blood-brain barrier comes into play.

Irina: Yes, this is indeed the case, because these drugs disrupt a certain amount of this axon sheath. Partially dissolve, and individual fibers are separated from them. Antiviral drugs have similar properties. But the Covid-19 pathogen, as far as I have studied it, can be destroyed in your cells themselves not by drugs, but by your own antibodies.

Nailya: Actually, that's what it's aimed at.

Irina: The problem is that the body's inflammatory reactions are directed against itself. This happens for a reason, but under the influence of a virus that redirects the attack of lymphocytes, the attack of certain eosinophils that already secrete antibodies, etc., is directed against the body itself. When they hide, they secrete substances so that the lymphocytes do not release substances that stop these inflammatory reactions. It turns out that a chain reaction occurs, from which the cells of the body themselves are destroyed. Viruses only enter this gap faster. They have such a cunning mechanism that they created artificially.

The very penetration of a virus into a cell releases a substance onto the surface that the cell confuses with its own, and itself captures it. He doesn't forcefully penetrate (he picks up some key), but he sticks to her, and she lets him through. Because it imitates the substance that she needs. This is not called an attack method, but a virus sabotage method.

Nailya: In this way he tries to avoid the immune response, redirecting reactions against the person himself. We call the confluence of such processes the autoimmune course of the process.

33:32 Advice from aliens on treating coronavirus infection.

Irina: You have drugs on Earth that restore all parts of the immune system and prevent the virus from doing so.

Nailya: Yes, there is.

Irina: These drugs, by restoring all parts of the immune system, make it possible to increase the level of lymphocytes, which has fallen in these patients. They allow you to increase the level of antibodies, and also dramatically improve the visibility of viruses and other harmful microorganisms for all types of human leukocytes. They become visible. These drugs also accelerate tissue regeneration, dissolve microthrombi, and reduce the prothrombin index. These drugs are known and available to you; they are thymus-based drugs.

Nailya: Modulators of the so-called cellular immunity. Timalin and tactivin.

Irina: Not immunomodulators, such as polyoxidonium, they act on the wrong link. They will work, but weakly.

Nailya: These are chemical compounds, and these preparations are organ-based and are prepared on the basis of the thymus gland itself of various animals.

Irina: Yes, they usually take it from animals with a syringe (shows).

Nailya: It depends. There are different technologies used there.

Irina: They make a drug that is injected. The interferon preparations you use restore one link of the immune system that is damaged, which allows antibodies to form faster. But the link itself is broken, when immunity is redirected against cells, interferon does not restore. The same movement as it was, so it will be, everything will go in the same sequence.

The use of tactivin, thymalin (to some extent thymogen) in certain doses, especially in case of viral pneumonia and damage to the respiratory system, is desirable in the first five days from the onset of the disease.

Nailya: From the onset of the disease - clinical manifestations or from the virus? These are different things.

Irina: From the onset of symptoms. It is advisable to start this treatment in the first five days. It is very good to combine it with small doses of heparin, but you need to be careful and look at the liver's reaction. Do not prescribe any corticosteroids under any circumstances. This increases the viral load.

Nailya: That's right. The virus responds very well to corticosteroids and happily enhances its replication when doing so.

Irina: There must be a special diet during treatment with a low dose of heparin. Watch the liver reaction. If there are no rashes, if there is no pain in the liver, or an increase in certain enzymes, heparin can be used. If the liver has a negative reaction to heparin (nowadays many people have weakened livers and begin to have harmful reactions), then clopidogrel can be used. I would not recommend aspirin, especially through tablets; you can just take it in solution in small doses. Weak heparin or clopidogrel if there is a reaction to heparin. Clopidogrel is in many cases easier to tolerate.

Nailya: Irina, thank you very much for the information. Our doctors are already doing all this. This mechanism of Covid's behavior has already been deciphered.

Irina: If you start in the first five days after symptoms appear, you can cure a person completely, even from pneumonia, in 10 days. He will be healthy.

After 10 days, the patient's alveoli are already affected by lesions inside, like foam. There is swelling from the immune system's useless attempts to change something. The body becomes exhausted in the end because it attacks itself and does not understand what is happening. These links need to be restored.

If more than 7 or 10 days have passed since the onset of the disease, and you have just started treatment with thymus preparations, then you need to double the dose. Give the same. The use of heparin is already becoming more mandatory if the course is severe.

Nailya: Naturally, yes. This is provided for by the protocols for the treatment of acute Covid-19.

Irina: Double the thymus preparations. Treatment can take up to twenty days.

Nailya: It varies, there are more.

Irina: If these drugs, what I call, double the dose. The standard dose, if we take Thymalin, is approximately for an adult who weighs more than 70 kg, 10 mg Thymalin intramuscularly. Double dose, respectively, 20 mg daily dose. It's been 20 days already. He will need to complete the course, even if his temperature drops, he will feel better, he must not stop. If you cancel it earlier, the residual viruses will again tighten all parts of the immune system.

Nailya: I see. Thank you. This is approximately how we now imagine the pathogenic development of this disease. Russian protocols provide for all this.

Irina: The most effective use of thymus preparations is the earlier, the better.

Nailya: At the very beginning. It's clear.

40:31 Coronavirus and herbs . Nutrition for coronavirus.

Irina: (Mead speaking) Licorice root contains substances that completely inactivate the virus.

Nailya: Licorice root contains glycyrrhizic acid. She uses this herbal drug, but it is, in fact, an analogue of glucocorticosteroids. In this regard, it is relatively safe.

Irina: It should be used not alone, but in combination with thyme. Take thyme and licorice root in combination, add milk. The effect of this acid on the virus will be enhanced and removed as a side effect.

Nailya: I see. Thanks a lot.

Irina: This person must also be given protein foods.

Nailya: Protein nutrition.

Irina: Even if he has no appetite, he should eat protein foods little by little and get vitamins. Otherwise, thymalin will not have any effect, because there will be nothing to produce these antibodies from.

Nailya: This is an additional factor, clearly.

Irina: He will receive stimulation, but it will be in vain for him, he will not give the necessary substances. Products with sugar and white flour should be completely removed from the diet. They cause an avalanche-like growth of the virus. The higher the glucose level in the

blood, the more rapidly it rises, the faster they multiply in the cells.

Nailya: That is, the virus reacts faster to simple carbohydrates.

Irina: (He speaks) Now any infection multiplies faster, because everyone loves glucose as a source of energy. For a person, a sufficient source of glucose during this period will be found in fruits, dark bread, cereals, in moderate quantities. It would be enough. He does not need high-grade sweets and flour during this period.

Nailya: Irina, thank you very much for such a detailed explanation of the treatment process in these patients.

Irina: Also (he says) it will be very useful to give an infusion of chokeberry and pomegranate juice. They also deactivate this virus.

Nailya: Decontaminated? Interesting information, something to think about, thank you very much.

Irina: Drink the juice of the black rowan (shows). You can additionally give a tincture of aspen bark. It heals the body very well from all toxins and viruses.

Nailya: Thank you very much for the additional information. I think it will be very useful to our doctors. Thanks a lot.

43:52 Alien medicine.

Nailya: Irina, this is a question for MidgasCaus. I believe that the most developed civilizations have long abandoned pharmacological methods of influence. We are talking about information methods of influencing pathogenic microorganisms. Is it so?

Irina: We have different methods of influencing the body, but we have developed preventive medicine. Our cells are already programmed at the genetic level to resist one or another microflora. Both the era of

antibiotics and the era of vaccination are long gone. We can change DNA at the genetic level (they have the same as DNA, but only many helices).

Nailya: Yes, you once explained that they have much more than our two threads. They have a much larger ladder.

Irina: They can change individual areas themselves, during conception. When a child is born, any pathogenic microbe that comes into contact with him will be neutralized during the first 10 cell divisions. It is simply recognized by the tissue macrophages themselves, which we also have in certain quantities, analogues to your cells. Our immune system will protect too. This will be an analogue of vaccination, only not with a vaccine, but at the genetic level, and against everything at once. This protection works. You don't have such technologies yet.

Nailya: I think we won’t have it any time soon.

Irina: We also used to have the same technology as you. Several million years ago. For me this is history, of course. Our scientists and doctors also created certain antibacterial substances at the dawn of our medicine, created certain weakened microbes that caused immune reactions. That was all.

Nailya: It's all in the past.

Irina: Everyone recognized this as ineffective. At the genetic level, DNA is now being changed. Also, each child is injected into the bloodstream, when he is born, with a solution that contains a suspension of nanochips. They are invisible to the eye, they are like little robots. They are distributed throughout all organs and tissues, throughout all vessels and observed. For example, they have the function of recognizing the composition of the blood where they are located. They can recognize, for example, the contamination of a vessel and clean it: emit certain impulses, and there will no longer be any congestion in it, there will be no blood clot.

The penetration of microbes can also be recognized by these chips, and a colony of our analogues of leukocytes is sent there by special signals.

Energetically. We have devices that can treat a person who is sick with something other than germs. We have hospitals, and if our humanoid is injured, or his immunity is weakened by some harmful factor, then the natural immune defense may also decrease, and ordinary microbes, which are harmless to everyone, may penetrate.

To treat such disorders or poisoning (maybe he ate something on another planet), we have energy installations that change the frequencies of his organs. They are reconfiguring. You have those too. But for us they can work not only with physical bodies, but even at a distance, for example, with astral bodies. They channel such energies. Each organ has its own frequency, and it models a special field. The vibrations increase, but they are in resonance with the organ.

You can come in the mental body, in the astral body, as Irina does when she leads to Ashtar Sheran. Enter this device and receive harmonization of healing of the subtle bodies. Then return to the physical body and transfer this energy there. And let all organs be harmonized.

Nailya: Dear MidgasCaus, similar methods of influence exist on Earth, they have a long history, for 20-30 years already. This is called bioresonance medicine. This therapy practice is now used in almost all countries of the world.

Irina: I know. I have a contactee, also from Cassiopeia, who does this (he talks about the doctor who diagnoses and treats us), this is my contactee. She agreed to contact. She asks me when she diagnoses people, and I tell her.

Nailya: I see, great. May I ask the next question? Thanks a lot.

50:15 Light fields.

Nailya: We have developed one method of influencing Covid-19. A well-known antiviral drug on Earth is used, which is placed in a field capable of transferring the properties of the drug into the patient's body. The death of Covid-19 in this field occurs within a few hours. The speed with which the virus is dying is amazing. I would really like to ask about the characteristics of the field. I'll explain a little what we're talking about.

The field is formed under the following conditions. A beam of light, in our case a laser beam, makes a complete rotation around its axis, forming a circle. Stacked, these circles form a cylinder. When the light source is turned on (I'll say it again, this is laser radiation), a certain field is formed inside the cylinder. This is a field, this is matter, unfortunately, I was not able to get an answer from any physicist here on Earth, but I think that this phenomenon is present in space. I'd really like to know what we're dealing with.

Irina: This is a laser beam that rotates at a certain speed, as I understand it?

Nailya: Yes, definitely. There is a given speed, a given power. The parameters are set there. It must be said that the energy of this radiation is extremely low, but the phenomenon occurs when placed inside.

Irina: You can deal with both the photon field and the quantum field. Most likely, this is their overlap. These are certain energies that are released from atoms under certain conditions of their existence.

This light rotates, it also acts on substances, on air molecules, on the molecules of the person himself who is receiving this treatment. A certain amount of energy is released from the atoms. In our opinion, this is a field of light.

Nailya: Pole world?

Irina: We have light energy. This is the first level of energy in an atom. A quantum field is the superposition of different fields on top of each

other. Completely different fields, down to particles of the graviton field.

Nailya: Graviton field. Could this have something to do with gravitational fields?

Irina: Yes. This may relate to electromagnetic fields, to gravitational fields, to the light field, to the thermal field. For example, heat is also a form of energy for us.

Nailya: Please tell me, does a similar field exist somewhere in outer space? Is it the norm? Or are these artificially created fields?

Irina: Such fields, but in a different range of pressures and temperatures, for example, are formed in the center of stars. They rotate, there's just a different temperature and pressure, and this is such an analogue. And through this light field it is possible to transmit vibrations that restore a person.

Nailya: I see. This field, according to our data, is capable of transmitting the properties of a drug into the human body or simply anywhere else.

Irina: Yes, if this field is not neutral, if it is charged in advance with some information, it can transmit.

Nailya: This information is being transmitted. In principle, this field exists in space, it is known, and indeed has such properties. It is capable of transmitting information.

Irina: Yes. It's just that it's created there by plasmoid civilizations that live in the center of stars.

There are plasmoid civilizations that create not Souls, but the stars themselves from the surrounding matter. They mentally rotate it, mentally condense it until there is light, warmth from this star. They continue to compress the core, control the process of converting hydrogen into helium, etc. This process of star formation also occurs

under the auspices of the plasmoid civilization.

55:08 How plasmoids perceive time.

Nailya: I see. Dear MidgasKaus, what does such a concept as time have to do with this? I mean those processes that occur inside stars. The time we have here on Earth is linear.

Irina: Time itself is not linear or non-linear. This is a sequence of certain events, and you, people, perceive at your level of consciousness as a flow, as if from the past to the future. In the center of the stars, when these civilizations live, they perceive time differently.

How do they perceive it? We can say that the lifespan of their subtle bodies is very long. And the fact that, for example, for a plasmoid it will be one day, for you it will be, perhaps, hundreds of years.

Nailya: I see. In principle, the concept of time is generally relative. In different objects of space it proceeds completely differently. For us this is one thing, there it is another.

Irina: For other forms of life, for example, your day, your day, for some insects and small animals it takes up perhaps one third of their life.

56:48 The future of earthly medicine from the point of view of aliens.

Nailya: I see. You are right, of course. I wanted to ask one last question. Is it possible to assume that information technologies in the future of the Earth will be used in the treatment of viral diseases?

Irina: I would really like that. Information technology is the future of your medicine. Moreover, if it is combined with work with each patient, not only with the physical body, but also with his energy, with his Spirit. With a mandatory trip to the Higher Self and clarification of spiritual reasons. Without this, any treatment may not have any effect at all, or

may have a temporary effect.

Nailya: Irina, thank you very much to MidgasCaus, thank you very much, Irina, for creating this contact today. I received a lot of information, I still need to process it. I am truly grateful to you for everything. I wish you all the best. And all the best to your channel “Cassiopeia”. Future further creative successes. Thank you very much!

Irina: Thank you very much! (Mead speaking) It was very interesting to answer, thank you all. Thank you, dear viewers, see you again!

July 31, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Nailya Jumaeva - neuropathologist (NII Virology Ministry of the Republic of Uzbekistan);

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien civilizations.

#321 Report on our vaccination. Opening of the online school Cassiopeia-SACRAL

https://blog.cassiopeia.center/otchet-o-nashej-vakcinacii-otkrytie-onlajn-shkoly

00:03 Introduction of participants.

Irina : Hello everyone.

Maxim : Yes, dear friends, hello everyone. The first question that interests us is: How can we be heard? Uzbekistan, good evening! Good evening from St. Petersburg!

We have great news today. Ashtar Sheran personally came to us today for a live broadcast.

Irina : He wants to watch me broadcast live.

Maxim : Yes, we have other news for you there, very cool. But we'll talk about this later. Today Irina conducted the Interstellar Union (IC) practice. “Astral flight to the ship of Ashtar.”

Irina : It was very interesting.

Maxim : As of today, electricity has been cut off everywhere, even in some factories nearby. I don’t know how interconnected it all is, but when we were doing the practice, Schumann’s frequency was 600. From us this, not from us, whether it was accidental or not, we don’t know. We can only then ask Ashtar Sheran in the future what he thinks about our practices of astral travel to his ship, and let him tell us more today.

Irina : He wants to propose.

Maxim : Should I make an offer?

Irina : Another, one might say, practice. Now it can be held before the live broadcast.

(Ashtar Sheran speaks). I greet you all, dear Divine Souls, in the Light

of Love. I know from Irina's curators that the broadcast traditionally begins with galactic news. I have something to tell you.

02:02 Violation at the Tashigan base on Earth and its consequences .

Irina: All this is connected with the investigation that MS is conducting at the suggestion of Mitya from another Galaxy. He is my friend, and Irina met him physically on my ship. Mitya then suggested checking some bases on Earth and on other planets in the solar system that belong to alien civilizations.

I inform you that two violations have been identified. At the Tashiga base in the Trans-Ili Alatau region and at the Esler base, exactly where MidgasKaus lives. These violations are quite old. I'll tell you what they are.

First. Tashigan base. A violation was discovered when the curator handed over a part from his ship's engine, which cannot be manufactured on Earth. He passed it on to his contactee. The contactee provided this to his relatives. Relatives, secretly from the contactee, told reporters. The contactee subsequently went missing. He was no longer found. He went, one might say, to the store. Relatives later reported him missing. Until now he has not been found. This happened a couple of months after the evidence was presented.

An investigation was carried out, including by me personally. I just recently visited the base. I was again on your beautiful planet. I visited the Tashiga base. I managed to find out that this incident is recorded in their contact history. At that time, the Tashigans did not pay attention to the transfer of this evidence and did not transfer it to the contact commission.

I have now done my own research through the Spiritual World. And I managed to contact this contactee and find out that he had already left the incarnation, and, moreover, left in a violent way, about three years after his disappearance, while in a closed institution. Details are not needed here, but it was all pretty sad.

The Tashigan man who gave him evidence still worked at the Tashigan base. But thanks to the case discovered, including by me, and representatives of the Galactic Federation of Light, and representatives of Burkhad, this case was investigated. He was sent to the planet of criminals for 15 Earth years because he allowed the death of a contactee.

05:31 Violation at the Esler base on Earth.

Irina: The next incident was in 1992. It did not entail such consequences, but, nevertheless, it was a violation.

One of Esler's representatives, while flying over the Vladimir region on his flying ship, saw a boy of ten years old and came into unauthorized contact with him, without asking permission from the MS to contact him. The boy made contact. Esler's man took him onto the ship. He took him around the Earth. To Earth's orbit. Showed him the Earth from space, then brought him back. But his landing, his contact, were seen by some residents of the village where he lived.

I did some research. This was in 1999, somewhere around the month of August. I conducted an investigation into the consequences of this incident. Fortunately, this did not cause any consequences. There was no further contact with the boy. Perhaps the villagers did not tell anyone else about this.

But since the specialist did not give the contact record to the Contact Commission (but should have), now (he was still working at the Esler base) he is removed from contacts and is on his planet Esler. He has been removed from contacts for several years, he will just take up other work now. Then, perhaps, he will be admitted when they have another conversation with him. But he is not sent to the planet of criminals. Such cases.

MidgasCaus knew him, but he didn't know about this incident. He was not at the base at the time. The chief of MidgasCaus and this alien, Odus, saw this recording, but did not provide it to the Contact Commission on Burkhad. That is, he hid this violation of the rules by his employee. A conversation will also be held with him in the near

future. I haven't met him yet, but I will. Why am I telling this news now? So that you understand that the history of contacts with earthlings has been raised over the past 50 years and is being carefully studied. These two cases were identified.

Maxim : I thank you, Ashtar, for coming to us on the live broadcast. I (and not only me, but also people) have questions. Can you answer us? Can we ask you questions of any nature?

Irina : Yes.

08:51 Names and position of Ashtar Sheran.

Maxim: Please tell me, is Ashtar Sheran a surname, first name, patronymic, rank or what else? Many people ask why Ashtar Sheran, and if you have some other name, then what can they call you?

Irina: Ashtar Sheran is the name I was given on Sirius when I was born on the planet Desev, which was orbiting Sirius B at the time I was born.

My rank at this time is commander of the Galactic Fleet. I can be not only near the Earth, but also in another place in the Galaxy. Fleet commander of the Galactic Federation of Light (GFL), to be precise. This is roughly the commander. I now have more than three thousand and a half ships at my disposal.

You can simply call it Ashtar.

Maxim: Thank you, Ashtar.

Irina: Yes, they called me Indra. When I flew to Earth, the peoples who lived there after the war called me Indra.

Maxim: Indra? What does Indra mean?

Irina: Indra is a deity in their language who causes thunder and lightning. And he is also the god of War.

11:03 Causes of fires on Earth.

Maxim : Provocative questions **.** They write to us very often: “Help. Ask our Interstellar friends, the fleet, and anyone else to put out the fires on Earth. Can you help us put out the fires on Earth?"

Irina: The fact is that the fires on Earth that are now occurring are an increase in the vibrations of that world, from the sixth to the ninth density level, where the Salamanders, the Spirits of the element of fire, are located.

They are close to people, in the same space, but at a different level of density.

When some low-vibration radiations of people enter their world, they begin to cleanse their world of this lowering of the vibrations of their world. They begin to very strongly activate the energies in their world, passing more energy through themselves. They also spend their energy on this. And from this, such phenomena arise in the material world. We are now talking about forest fires. Do I understand correctly now?

Maxim: In general, in principle, about fires. There are fires now in Turkey, in Greece, forest fires in Siberia.

Irina : There are forest fires due to the fact that people do not take care of forest areas. Old trees are not cut down on time, fallen trees are not removed, and the forest is not cleared for young trees.

In this case, the Spirits of the forest, which exist and are called “Leshy,” negotiate with the Salamanders, with the element of fire, so that they cleanse the space in this way. On the scorched earth that remains, the seeds that fly from other trees sprout very quickly because the remaining ash and ashes serve as fertilizer for them after a few years. And everything grows. If you have seen a fire in a forest,

you may see (the plants) lighter and brighter green than the surrounding forest. That is, preventive measures are needed here if fires are already happening.

Maxim: Yes, Ashtar, we understand. Here's another question. Can you help put out these fires?

Irina: Do you mean our technologies?

Maxim: Yes.

Irina : Such interventions are possible only with the permission of your government, which they will give us as a sanction to enter your atmosphere and make sure that these fires are extinguished.

Maxim : I see. Interesting. How will they give permission if they don't recognize you?

Irina : Almost all of your governments already know about our existence. Not only have they encountered many ships and aliens that have been shot down and fallen for other reasons, they also talk with contactees. And many of them are contactees with some civilizations.

(Ashtar speaks). These fires were extinguished. Rains could be caused and fires extinguished when humanity was in a more “childish” phase of existence. And now this is the exam that you need to pass: how can you handle it yourself. And fires are not the biggest problems in your society.

The biggest fire you have is within your society. And until it goes out, physical fires will only be a reflection of it, just like wars, for example.

But we are prohibited from interfering directly. This will lead to mass contact. This will lead to disruption of your environment, for example, and so on. Because the means that we have are not harmonious for your space, for your Earth.

Maxim : I understand. Thank you, Ashtar.

16:15 Hacking of English television in 1977.

Maxim: There is a very interesting question from Lasmare Space Lander. The question is: " On November 26, 1977, the television airwaves in England were hacked. There was a message to earthlings, conveyed by Vrilon, Ashtar's assistant. Was it actually you as GFS? Is he really your assistant?

Irina : Yes, there really was an assistant, but he gave me a different name.

Maxim: Which one?

Irina : Avertalakh.

Maxim : So was there really such a hack on the airwaves on November 26, 1977? Did you really infiltrate the airwaves?

Irina : My entire fleet is divided into separate units of approximately 300-350 ships.

Here is one of the leaders of this link of 300 ships, Avertalakh, in the late seventies, I didn't remember the exact date, he decided to make contact with earthlings in order to convey information (on his own initiative) for earthlings. He decided to do it en masse through the media. He created devices that could imitate your radio waves, and with their help he entered the airwaves, simply making the power of his transmitter several tens of times greater than the power of radio stations that transmitted television programs. And on these radio waves he conveyed certain things: a call to earthlings to increase their awareness, to stop being aggressive, to develop their minds.

I want to say that he did this from Earth orbit. He did not approach the planet himself. It was impossible to figure him out, and his ship could not be shot down. Therefore he considered it safe.

I want to say that there was no punishment from the State Fiscal Service or from Futissa for this. The same as from the planet Burkhad. The only thing with him was to monitor the reaction of society. And then he saw for himself that it was ineffective. So he said, he converted, and a few years after that the war happened in Afghanistan.

He himself was disappointed: “I did it, and the earthlings did not listen.”

Maxim : Yes, it’s hard for earthlings to listen. Because earthlings consider us contactees to be crazy. How can they listen to crazy people?

Irina : They weren’t contactees anymore, they announced it through TV, and they still didn’t listen.

Maxim : How can they believe in aliens when they believe more that it was simply a hacking of the television broadcast by some scammers.

Irina: That's what they said. Even I had information that they even found these scammers who admitted to it.

Maxim : Unfortunately, or fortunately, we behave this way.

20:05 Tunguska meteorite.

Maxim : Another question. Can you tell us anything about what the Tunguska meteorite is (in our understanding)? There are very strong discussions about this. What was it. How can you explain what the Tunguska meteorite is that fell to earth?

Irina : The nucleus of a comet that melted and fell apart during friction with the Earth. Why didn't you find him? So it melted from the high temperature. But it contained individual inclusions of stones, which were scattered over a large area, but dissolved into very fine dust. There was such an explosion because a very sharp increase in the temperature of a piece of ice provoked a large wave of air expansion.

If it had been an alien ship that had fallen, there would, of course, not have been such a wave.

Maxim: That is. it was just a huge big icy comet with dense matter interspersed there. Yes?

Irina: Yes. She flew in such a way that at first the Earth passed (in about a day, two) through her huge tail. And the tail consisted of tiny specks of dust and pebbles. And people saw this for a couple of days at night. We observed flights of a large number of meteorites and fireballs all over the Earth at night. Larger stones were already flying, creating a bright glow in the atmosphere, but they still did not reach the ground, they simply went out. He is now showing me how the stone flies and glows just like a lamp in the sky. And still they did not reach, but the cannonball fell.

Maxim: Thank you very much, Ashtar.

22:03 Causes of climate disasters.

Maxim: And I have one more question. Many people think that these climate disasters that are happening on earth are actually climate wars controlled by earthly governments.

Irina : Not by governments, but by yourself.

Maxim: What does this mean?

Irina : By yourself, through your thoughts. You receive from nature what you send to this nature in the form of thoughts about each other and the creation of God in which you are. I already said that if we or you put out the fires, it will not solve anything. They'll just start somewhere else. The plasmoids of fire, on the contrary, will ask us: “Why did we interfere with the purification?”

In addition to humanoids, I communicate with many plasmoids, Spirits

of the elements in the Galactic Federation of Light. There are a lot of them. Now the number of plasmoid civilizations that reside in the GFS has increased even more. And several terrestrial plasmoid civilizations have already wished to join the GFS. They are now in the process of being tested for entry and integration into our community. I communicate with them a lot and I know what they will answer. And those who increased vibrations in the element of water, which caused all the rivers to rise, rains, underground springs, etc. to become more active.

Fires are the activation of fire plasmoids, the purification of space. When something has burned, some space, it can no longer burn there. You can only take preventative measures to make this happen at least less often. I can tell you about them, of course.

Maxim: I think we won't waste airtime. I have many more questions.

Irina: Shamans? In fact, if the plasmoids do not want to stop this, the shamans will not agree with them. They will answer them like this: "We are clearing the space." This has happened before. They answered their contactees: "We can no longer live like this, in such low vibrations. Just black smoke rises from the ground, and in order to dispel it, we increase the vibrations in the spaces, their density. This causes fire to appear on the material plane." Moreover, they distribute it like this.

I want to tell you and make a proposal so that in general natural disasters happen less often. This includes: fires, floods, earthquakes, volcanic eruptions, hurricanes. This is also the activation of plane plasmoids, so that cases when people are killed by lightning or drown in bodies of water become rare, which can also be caused by the impact of some plasmoids on the psyche. Not for everyone, but it is possible. Especially for children. And also all epidemics, various diseases, viruses, bacterial and parasitic effects, when they become widespread, spread from person to person and quickly become resistant to all medications. When such things happen constantly, one after another in a chain (a flood, a fire, a hurricane, an earthquake) - this is a sign of a very low-vibration state of the noosphere of this planet. And the more it decreases, the more these cataclysms there will be. It's like a vicious circle here. First, some kind of cataclysm is caused, people, because of their reaction to it, lowered their vibrations

with fear and various destructive emotions, this further provoked all these cataclysms.

My proposal is this. Before practicing with me, or perhaps on any day or evening of the same day, for example, before a live broadcast, devote 10-15 minutes (no more) to meditation. In the “sitting” position, when we will all be together at the same time with Irina, with me, with all of you, with the curators of Irina and Maxim. Together, with our eyes closed, we will fill ourselves with the light of Divine Love, lowering it from the cosmic plane and passing it through all our chakras, then imagine the Earth in front of us and envelop it in light, while simultaneously saying special words that increase the vibrations that I will tell you.

Maxim : Before the practice, which is on the “MS Practices” channel, just before the flight on astral travel, we will do this practice together, right?

Irina : Yes. But only then we will need to start a little earlier and finish a little later.

Maxim : We will finish a little later then, but next time, next Sunday at 14:00 we will begin this MS practice “Flight to the ship to Ashtar” with this wonderful practice.

Irina: This will help reduce the frequency of these cataclysms of yours on Earth.

28:17 “Magnetism” after vaccination.

Maxim : Vlad Venetsky wrote: “The first two vaccines are the Soul leaving the body. The third is the seal of the Antichrist. The soul does not come to judgment. Her self-awareness is erased, and she goes into the world of stones and grass billions of years ago.”

Vlad, first of all, I want to greet you. And I want to inform you that Irina and I, and not only Irina and I, but in principle in our center we decided to get vaccinated. And the most interesting thing is that we are

absolutely alive, and there are Souls in our place.

Irina: Souls are here.

Maxim: They are inside us. No one is going to leave anyone. No one is going to put any sign of the devil on anyone. Ashtar Sheran is here next to us. Tell me, Ashtar, please, are the Souls in our place?

Irina: Your Souls are in place and glow with Divine Love.

Maxim : There is one small nuance. But I don't even know if this can be shown live? We began to experience internal changes. Very serious. And I would still like to demonstrate what changes have begun to occur. And we will talk about these changes in the next broadcast. I'll give you an example. Iron spoon. This is the place where we were grafted. We take it (sticks a spoon to the vaccination site on his hand).

Irina : Here.

Maxim : Got it? To make it more clear to you. Here is an iron knife. So I lowered my hand. (Sticks a large iron knife to the grafting site.) It sticks to the grafting site. (Irina laughs)

Irina: Yes. Me too.

Maxim: Look. (Irina lifts her sleeve and Maxim sticks a knife on her at the injection site) Put your hand down, you're holding it wrong. (The knife stuck and hangs)

Maxim : Please! Sticks. And the spoon too. Let's show the spoon, which also sticks.

Guys, these are the changes we have internally, there are changes. We will talk about these changes in the next broadcast. Just on the next broadcast. Our souls are in place. But the spoons began to stick. This is such nonsense. Small, but it happens. I think everyone will be

interested in going to the next live broadcast. It will still be called “Sticking Spoons and Knives.” That's what we'll call this next live broadcast. Because they write a lot about the disappearance of Souls and much more. So guys, stay tuned for the next live broadcast. See you on the next live broadcast. Irina stays with you. I continue to control the whole process, but the spoons stick. So everything is fine.

We will just invite Mead, a representative from the planet Burkhad, who will explain to us what happens in our body after this vaccine.

Irina : They write: “We have become magnets.”

Maxim : Yes. We have become magnets. We, however, missed all these comments (read the comments). So great. “Stainless steel is not magnetic.” I don't know, I can take another spoon. I can try taking a ladle. Everything sticks. And the scoop sticks.

32:06 Online school “Sacral” in the project “Cassiopeia”.

Maxim: Guys, on this cool note, I want to tell you that in our project we have been asked for a long time to open an online school. And we have finally formed an online school of “Cassiopeia”, which is called “Sacral”. At the bottom of this video you will find a link. You can go to our online school, where you will meet the strongest, most wonderful teachers of this school, whom we recruit all over the world. And most importantly, these teachers will not set any prices for you. All the knowledge of all teachers at the Sacral School will be transferred to you on the terms of your gifts from your heart, i.e. There will be no prices for training at the Cassiopeia school.

Comments: “You guys are having fun there!”

Irina: They write: “The iron is hanging.”

Maxim : I tried the iron too. Sticks! Seriously sticks.

Irina: They write that it sticks even without vaccination. Maybe you

were vaccinated in a dream after all? Through the window.

Maxim: If you don't believe that we have changed, next week I will even make a video of how we were vaccinated. We specifically asked. I'll show you the video. We have a video. We asked the doctors. It was very worth it. In order to make a video of how we get vaccinated. Everything was real.

I don't know, I probably won't be able to attach the barbell. Heavy.

Guys, we have a new project. This is the "Sacral" school, where you can get exclusive knowledge from teachers from all over the world on donation terms. I will transfer all esotericism to the conditions of donation. And I will tell you that I will try in every way to combine psychology and esotericism, as much as possible in this world, in this society and in our state.

Reptilian vaccination? Not really. Normal cool vaccination. Now I wrote to the doctors that iron objects began to stick to us. Hopefully the big money will start sticking in soon.

Irina: Stay away from large metal structures.

Maxim : Merkabah? About Merkaba, we have a teacher at school who will teach you Merkaba. So look at the link under this video. The link will be available just after the broadcast, or now it is already visible to some. And there will be a "Sacral" school where you can find a teacher on Merkabah and can even take courses. And not only according to Merkabah.

(Reads comments) People, this is a trap. Well, of course it's a trap. Srikas! What did you think?

Eating without spoons? This is how we will eat without spoons. We'll stick them on.

Irina : There are wooden spoons.

Maxim : Let's switch to wooden spoons and cups.

35:46 Contacts in the Jupiter region.

Maxim : Ashtar, information has been received that some events are taking place somewhere in the Jupiter region. Someone is making an agreement there. Some documents are signed. There are some kind of secret governments, or some kind of extraterrestrial civilizations. Is something really happening near Jupiter now? Is there such information?

Irina : Venus, Saturn and Jupiter are three planets; there are a lot of plasmoid civilizations on them that are in contact with earthlings. Yes, various contracts and agreements can be signed there. This is a form of contact. Many are already making contact with earthlings.

And I want to tell you about what Maxim read just now, about vaccinations, about printing. I would like to appeal to you, to Maxim, to Irina, to MidgasKaus, to LiShioni. Do you think spreading rumors like this helps raise the vibrations of the Earth?

Maxim : They don't understand. That’s why they write that we are obscurantist. Guys, we are not obscurantist. We really try to look at everything with a smile, with positivity, with love. Anything, no matter what happens, because obscurantism is now happening in full on the Internet. You are being tuned to absolutely low vibrations. You are made to hate each other, to hate the government, to hate the planet.

Irina : Or this question: “Will I lose strength if I meditate every day to protect the planet?”

Maxim : Why would you be scared to lose your strength when we have the single energy of the Creator, which is in limitless quantities around you.

Irina : (Ashtar asks) Who can ask such a question, at what level of awareness is this person?

Maxim : Ashtar, our people, unfortunately, think that if they direct their energy to something, then they lose it.

Irina: Does the sun lose its power when it shines? And if you are not there, it will still shine.

Maxim : Many people think that they are losing.

Irina : And if you are not there, it will still shine.

Maxim : Ashtar, we are all at a very low level of awareness. And I, until the moment I met Irina, I was also at the same level of awareness of perception. I was lucky that Irina was nearby. And I have the opportunity to communicate with you every day and receive a large amount of adequate information that goes into all the building blocks. But in fact, a large number of people simply use the Internet. They watch and are filled with fear, pain, resentment and hatred, misunderstanding, humiliation.

38:43 The influence of people's opinion on government actions. Political egregors.

Irina: They watch on the Internet what they offer to watch. What you are offered to watch on the Internet is a reflection of the information in your society. And the state's reaction to these things that are spreading on the Internet shows the true goals of this state.

Were there videos from government agencies, from medical structures and from government agencies that expose these videos?

Maxim : No. Did not have.

Irina: This means that they are so interested in the stability of their society where they are.

Maxim: In principle, yes. Why? Because videos appear, but there is no exposure of these videos.

Irina : Even just explaining things to people.

Maxim : Yes, and we run into trouble when we try to explain this to people through our interstellar friends.

Irina : We actually do their work.

Maxim : We are doing our job. We are trying to convey to people the Light of true Love that we are talking about.

Irina: For example, they made a video about how the vaccine contains some substances that change DNA. We have a lot of videos like this.

Has the Ministry of Health made a video that will show the detailed composition of the vaccine and talk about each component? Which will show people before vaccination, after vaccination, who have passed all the necessary tests? How has their health changed? For example, two weeks before vaccination, the day before vaccination and two weeks after this vaccination.

Maxim : Our government is one hundred percent sure that this is obscurantism, and there is not such a large group of people who can harm vaccination.

Irina : They may not harm vaccination. But they distribute such videos, articles on the Internet and in the media space, information space, and talk about it with friends. And then, everyone who watches it spreads it further. This may not harm the state, but it reduces the vibrations of the Earth.

What feeling did the person who said that those who were vaccinated gave their Soul to the devil make you feel? What is this feeling?

Maxim : What feeling? Resentment and hatred towards those who vaccinate.

Irina : What about a person who is unconscious? How will he feel?

Maxim : The same thing.

Irina : What if it’s a hundred people? What if it's a thousand? What will happen to the planet's noosphere?

Maxim: Question. Is it possible not to vaccinate on high vibrations?

To vaccinate or not to vaccinate is absolutely every person’s business. And we don't force you.

We decided to train our immunity through vaccination. And we received clear feedback from our interstellar friends. And we have no fear towards this vaccine. Therefore this is our choice.

Irina: They write: There is no trust in our government and the Ministry of Health. What is trust? Trust is faith, a manifestation of faith.

When can trust arise? When there is Love. If there is no Love, as for an individual or a group of individuals, or for oneself, then there is no trust.

Maxim : I agree.

Irina: What do you think happens in society when there is no Love and trust in the rulers?

Maxim : Distrust of him.

Irina: What happens in the noosphere?

Maxim: Negative vibrations.

Irina: And what image of rulers in the political egregor is created by the people who do not love the ruler?

Maxim : Once again.

Irina : What image does the people build of the ruler and his assistants, of all these relevant ministries? Those people from the people who do not like the government and do not trust it?

Maxim : Of course, a negative image.

Irina : Will a negative image strengthen rulers when connected to it? When he sleeps, does his astral body connect with him?

Maxim: All this negativity will be directed at this ruler.

Irina . Any ruler and his immediate circle leave their bodies at night when they sleep. Same as you. Where does the ruler's Soul fly when he sleeps? All day long he thinks about his affairs in the government, resolves issues, and this is a very difficult job. I know what it's like to manage several hundred thousand people. But managing millions is much more work, which requires a lot of mental and nervous effort. Therefore, he is busy with his thoughts all day. And when he leaves his body, it makes no difference whether he consciously or unconsciously goes to that egregor to recharge his strength there. What if he connects with the negativity that was emitted to him during the day? He returns to his body with what vibrations? And what decisions will he make for you? Don't they teach you this at school?

Maxim: No. We have a very self-centered society, all our thoughts and emotions are directed only at ourselves.

Irina: Don’t they teach “Fundamentals of Political Management” at your school?

Maxim: No. We don't teach that kind of stuff. Definitely not about vibrations.

45:07 Fake “magnetism” after vaccination.

Maxim: Of course, they ask your opinion about vaccinations. I don’t know if it’s worth talking about them at all? We do not convince anyone to do them. This was our choice. We specifically made this choice in order to train. Yes, we made Sputnik-V. We have our second appointment for the second vaccination on the twenty-third. Then we will definitely tell you live what is happening and how it is happening. I want to tell you that in fact, these shootings on the Internet, with these things (spoons, knives) are fake. It's fake. You can even check. If your skin is a little sticky, let’s say you haven’t washed yourself all day, then objects will actually stick to your skin. I can show you the other hand, without the vaccine. Objects will also stick to it. Here you go, on the other hand. There is no vaccination. So it's actually fake.

Irina : No. My hand doesn't hurt.

Maxim : Ashtar, please move away. We can't set up the camera.

Irina : They write that many people have a very hard time withstanding the vaccine. I didn't feel anything at all. “How do you feel after the injection?”

Maxim: No. I have Tatyana, my girlfriend, she really felt very bad for two days. Temperature 38-37.9-38.2 even. But this is how her immunity works. She actually felt a little bad. But basically she feels absolutely fine now. Everything is fine with her.

Irina: How did you feel?

Maxim : I felt the temperature inside increased. But in a way that would make me feel bad, no. I didn't feel bad.

Irina: I measured it specifically for two days, it was 36.9. I didn't feel anything at all.

Maxim: You look like you're wearing a bulletproof vest.

Therefore, you can do as you see fit. I believe that high vibrations are good, but at the same time training is needed. This is what I personally think. And you - according to the testimony of your immunity. Especially at a time when they are trying to mow us down with artificial biological weapons.

47:45 Ashtar on the advisability of vaccinations.

Irina: My opinion about the vaccine? Fine. Since they ask me so, I can say my opinion about any vaccine (says Ashtar).

Maxim : Please tell me your opinion about the vaccine.

Irina : I believe that two questions are confused here. Personal with public. That is, is vaccination necessary for society and is it necessary for each individual? These are two completely different questions that are not related to each other. I will answer each one.

Question: Is this vaccination necessary in society? Should it be administered to certain groups of the population and according to what rules? Who decides this?

This should be decided by a person related to your medicine and who knows the statistics on this disease for which the vaccine is being given. And he must compare what will happen if he does not introduce this vaccination in the area of some social activity. He decides where to introduce it and where not to introduce it. For this you must have laws, and I think you have them. You should have them in your medicine about disease prevention. We need to look at your laws. I don't know them.

But as for the personal attitude towards vaccination, this is a very

personal individual question for everyone. And it is connected with your health, with your treatment. Every person on Earth, by his free will, has the right to take or not take some drug. This should be written into the law of any state. But if a person has made a decision, then he takes responsibility for it and for the consequences too. And if he does not take the drug or vaccine, then he also takes responsibility for the consequences of not taking the drug.

That is, a person who is offered to be vaccinated or wants to do it himself must soberly compare both the advantages and disadvantages. Assess what he may gain or lose if he is vaccinated or not vaccinated. And you definitely need to consult with your Higher Self.

I know for sure, Irina told me about this on her last flight to me and today she said that she did not ask either MidgasCaus or LiSioni about her vaccination. She tried to ask MidgasCaus this. He told me that he answered her: “You decide this with your Higher Self. I won’t tell you anything here.” Neither "yes" nor "no". This is your personal business." And she went to her Higher Self and asked him: “Do I need to be vaccinated with this drug?” (Name which one). She received the answer “Yes.” So she went to get vaccinated. This is the ideal thing to do. This is my opinion.

Maxim: And my Higher Self also said: “Go, do it, don’t be afraid of anything.” But indeed, we have not developed certain actions or studies when vaccination is underway. I know for sure that these vaccines were developed a long time ago. Back in the fifties, sixties, seventies. This vaccination is based on other already developed vaccines. That's why we have a vaccination law. Vaccination is presented freely. There is a choice to get an exemption from vaccination if you have a really weak immune system or poor health. But honey. recusal is given very rarely.

Irina: But there are jobs where it is mandatory to get vaccinated.

Maxim : These are people working in social institutions. These are kindergartens, hospitals, military. But it has always been like this, and it will always be like this.

Irina : They have a lot of vaccines there. And not only from Covid.

Irina: (reading) How to get to the Higher Self?

Maxim : You can call a specialist. Dial the phone. There is a link under the video. You will be connected to a specialist. You will be able to communicate with your Higher Self. I say again: “The Cassiopeia Project does not assign any prices to anyone.” You yourself thank the specialist, as you see fit, for the actions that were performed on you. Therefore, there is no point in the project cheating you out of money or extorting money from you. It makes sense to give you knowledge. To convey to you the knowledge that we ourselves possess and continue to carry this knowledge.

53:25 Ashtar contactors.

Maxim : Ashtar, how many contactees do you have on Earth and can other entities represent you?

Irina: I have more than two and a half thousand astral contactees.

Maxim : How do you serve such an army?

Irina : I send them phantoms.

Maxim: Don’t you need to come yourself to make contact? Is it enough to form and send a phantom?

Irina: Yes. Many people do this. Including Mirakh Count can do this, and Archangel Michael. Naturally, both LiSioni and MidgasKausa taught the same thing. And how much they use it, you need to ask them. I think they know how to do this too. I know for sure that MidgasCaus already told Irina how to form her phantoms and control them. There is nothing complicated.

Maxim: People have died before without vaccines. Therefore, the

question is very controversial: who will die and from what.

Irina: My dear viewers. I'll tell you a huge secret. Both those who were vaccinated and those who were not vaccinated will still emerge from this incarnation. Your body will die anyway. This may be a huge secret for you, but, nevertheless, it is so.

Maxim: That’s right, after vaccination the disease is much less severe. That's right. If you catch the new mutated virus, you will not have such severe consequences. Because your immunity will slowly begin to work with it. It is so indeed. After vaccination, the disease progresses more easily. Those who are in the know say everything correctly.

55:03 Lion **'s Gate** .

Maxim : Ashtar, tell us about today’s date: 08.08. This is the Lion's Gate. And why exactly today did we come to your ship on an astral journey? And why did so many people's equipment break down and their electricity go out? What could have influenced this?

Irina: Today is such a day, and such a configuration of the planets, and a configuration of the energy field around the Earth and the Earth’s magnetosphere, which happens once every 522 years. And since this coincided with the active period of the quantum transition, all this made it possible to create such energy in space that will help you move through the quantum transition faster. And all the negative egregors in your noosphere will rise faster and manifest themselves faster. That's what's happening now.

I had about one and a half thousand people at that time.

Maxim : Yes, today there were a large number of people who were really able to go on this astral journey. And, as I understand it, many have learned to relax through meditation. And today it was much better. And there were a very large number of people on the ships.

Irina: Yes. And I saw what happened there. There were a lot of spiritual entities there, and I even saw the mother of Jesus Christ

there. I talked to her. One of her phantoms was there.

Maxim: One of the phantoms. We just need to clarify, because people here are not used to the word “phantom”, and they think that this is the only face that can appear. Therefore, it is always necessary to clarify.

57:11 “Generator or time line converter” on the Ashtar ship.

Irina: And I talked with the phantom of Jesus Christ himself. He was present there today too. This is not surprising, because today is the day when I decided to turn on a special device. It is called “Generator or Converter of Time Lines” (Irina was in them in the astral body).

This is a device that allows you to see the version of the future that is most desirable for you. See, study and understand together with the Angels, your consultants and curators who come at this moment with your permission. See to what extent the version of the future you created (when you are there at this moment) is your reality, to what extent it coincides with your plans for incarnation.

Maxim: One minute until the end of the broadcast, guys. And, as always, please like. If we get 2000 likes with 3000 thousand people, we will extend the broadcast by 15 minutes. I always keep my words, so give it a like. We reach 2000 likes.

Irina : In the meantime, I’ll have a drink.

Maxim : Yes, I’ll bring some water now. We're recruiting two thousand. If we don’t recruit, it means we’re not interesting. While you're liking it, click the bell to subscribe to our channel and don't miss the next Sunday live broadcast. 1377 likes, okay 2-3 minutes. We will try to conduct live broadcasts correctly in order to gain an audience. By liking, you help us convey this information to more people.

59:45 The role of Maxim Rusan in the Cassiopeia project.

Maxim: “ Maxim, why does Irina need you?” Is this just a question?

Why do I need Irina? In order to help Irina carry information from our interstellar friends. In order to develop centers around the world. In order not to offend Irishka. Because there are a lot of weirdos who are trying to do not very good things, that's why I'm around.

Irina: Maxim is the Great Divine Soul, thanks to whom you all saw all my broadcasts.

Maxim: I consider myself the same divine Soul as all of you here **.**

Irina: How are you all here?

Maxim : I believe that we are all embodied here in this wonderful world, in which there are a huge number of lessons that can be taken with you. And do you know how much negativity you heard towards yourself, towards the project, towards Irina? Even my former friends throw a lot of negativity at me. And they think I'm crazy. I want to tell everyone, guys, that I found myself, and I found myself within. I will share what I found with you. And I found the most wonderful divine creation on this planet. This is Irina, who can convey to you information from representatives of not only the Interstellar Union and not only the Galactic Federation of Light, but also any other subtle and dense material civilizations. Many people still haven't realized that this is all real. And I'm not offended by anyone because you don't believe us. I am not trying to convince anyone that this exists. We are trying to bring you some awareness.

If you knew that I live with aliens every day, that I communicate with them every day. That I can communicate with any subtle material structure, civilization, or Spiritual world. You would be very surprised and would understand why I am doing all this. Because I understand exactly the tasks of my incarnation. I found myself. I will help Irina, convey to you all the information that our interstellar friends bring to our world, creating centers. So that each of you can find your true self. So that in these centers you can undergo training and various practices. So that you are not scammed out of money by other incomprehensible healers, regressologists, tarot readers who are only interested in your money.

I'm interested in your awareness. She interests me because I shouldn't be here right now. But they left me here for something. So that I can help Irina convey everything to you. Whether you believe in all this or not, I will not convince you of anything. Guys, I love you even for who you are. These negative people are trying to throw a lot of things, a huge pile (I won't say what) in our direction.

1665 likes. I love you all very much. Thank you for your support. For what you do for us. Game up to 1666 likes.

Thanks again. Visit our school "Sacral". Link below this video. Please visit our masters, whom we have already trained. Nobody will set prices for you. This does not mean that it will be a poor reception. This means that the masters who work with the "Cassiopeia" project have decided to transfer this entire spiritual plan to the conditions of the Donation. There is no point for us to cheat you out of money, there is no point in deceiving you. Believe it or not. But it makes sense to give you the level of awareness and the level of perception that I personally receive while being in this project as a leader.

Guys, everyone was hugged. All the best. We love everyone. Thank you so much for the support you give us. I am sure that next year we will meet in our new center, which is located near Voronezh. We'll spend a wonderful New Year there. And we will study there, and we will relax there together. I will wait for all the people who helped our project. Guys, I hugged everyone. Bye everyone. See you again!

August 8, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan – head of the "Cassiopeia" project and the International Center for Spiritual Development "Cassiopeia";

Ashtar Sheran is the head of the space fleet of the Galactic Federation

of Light (GFS).

#324 Recruitment of volunteers for the Cassiopeia project is open

https://blog.cassiopeia.center/otkryt-nabor-volonterov-v-proekt-kassiopeya
https://www.youtube.com/watch?v=6VgEtiV45_o

00:02 Benefits of volunteers.

Irina: Hello everyone!

Maxim: Friends, dear ones, hello everyone! The most basic question: how can we be heard? There is very important information: today we have a live broadcast. We do not have any live wellness sessions. Today at 14:00 there was an astral flight.

You can hear it well, everything is great! Guys, I heard you. I heard that I still appear a lot on air. We will devote the time of live broadcasts to communication between you and Irina. I will try to interfere less with the broadcasts, adjust and control them less. Irina, can you read the questions and answer them yourself?

Irina: I'll read what I can.

Maxim: Great! Today's broadcast is dedicated to recruiting volunteers for the group. We decided to open a new set. Our project is expanding and we need help. Many will say: "Why should I be a volunteer?" I will now tell you the main advantages of volunteers.

Firstly, we teach all our volunteers not only esotericism, not only energy practices, but also financial literacy. All our volunteers who come to the project have the opportunity to get to training without

waiting in line so that we can speak the same language.

Volunteers have an absolute advantage in terms of consultations if they suddenly need some kind of urgent help and mutual assistance from the project. That is, if a project has the opportunity to help a volunteer with any knowledge, opportunities and means, we will definitely help. We treat volunteers not as people who work and toil for the project, but as our friends who help us develop this project.

Dear friends, in order to become a volunteer with us, in order to help us develop our project on this planet, follow the link to the volunteer application form. I guarantee you that any person who helps the project will definitely encounter the fact that in the end, the project will begin to help the person. Many volunteers who are already in our project can give you feedback on this matter.

We never forget our helpers. We are always ready to meet you halfway, to provide additional education, to complete your education. You will definitely be able to come to the Cassiopeia school and undergo not only contact training here, but also health improvement through the Higher Self. Volunteers have all the advantages to enjoy the benefits of the project.

Therefore, we are waiting for you, dear friends, to join our large team. I would even say to a large family, which is slowly starting to gain momentum and is starting to irritate low-vibration people, low-vibration entities and many other projects that are built only on a commercial basis. We are waiting for your visit!

I have one more good news. Two people refused to attend the second round of the Baikal retreat. Therefore, we have two places for the Baikal retreat. A link on how to get to the retreat is also under this video. Under the same video you can find a link on how to calculate all your spiritual levels, how to calculate the tree of life. It's all under the video.

Today the broadcast is dedicated specifically to the interests of our volunteers. I will ask Irina, if she sees our volunteers in the questions, to answer the volunteers' questions specifically, because the entire

broadcast is dedicated to our friends who help us. I will not interfere with this broadcast. I will try to leave the broadcast at your disposal, at the disposal of our viewers who help the project grow, as well as those who get high here, hype, and write all sorts of nasty things. Write more, because every comment you make is an opportunity for other people to find us and watch us. I won't ask you to like anymore. Please do not put them, do not subscribe to our channel and do not watch our new videos.

Irina was in contact. We decided not to fly far. Kirchiton took Irina to the Tikhtian base, which is located under Lake Baikal. The information is simply bomb! I did not even expect such a level of information, such a level of reception of Irina at the Tikhtian base. Wait for three parts about Irina's flight not to some Mars, but here on Earth, where there are bases.

Dear friends, thank you so much again! I won't take up your time anymore, I'll give it to Irishka. She will answer your questions. And in this live broadcast and in future broadcasts, I will try to make sure that there is less of me, so that you have more time to be with Irina.

Bye everyone! Many thanks to the volunteers we already have. Now you will find out who is our guest today and galactic news.

Irina: They already write there so that you don't leave them and read the questions, that it will be boring without you.

Maxim: No, I believe that likes are given by those who want to do it. If anyone doesn't want to miss a new video, they should subscribe to the channel. I won't ask anyone else. Guys, this is your awareness. If you want, like, if you don't want, don't like. We need an informed audience. That's it, I'll shut up, I'm gone!

07:19 Exit from the Galactic Federation of Light of the civilization of the planet Harishtimr.

Irina: Hello, dear friends! Today our curators are present next to me: LiShioni from the planet Shimor, MidgasKaus from the planet Esler,

Ashtar Sheran came to us. He also decided to answer your questions. He came in the form of his phantom. At this time he is on his ship in full consciousness.

MidgasKaus and LiShioni left their bodies, although they are now telling me that due to increased contacts, they are also actively creating phantoms. MidgasCaus and LiShioni have phantoms who are now working in other places with other contactees. With the arrival of people in the Cassiopeia project, their number increased for one and for the other.

So, Ashtar Sheran wishes to inform you of galactic news that is directly related to his work in the Galactic Federation of Light.

(Ashtar Sheran speaking) Hello, dear friends! I came here to tell you this news and to answer your questions as much as possible. I have already participated in one of the live broadcasts, and I really liked it. I already know about Irina's flight to the base of the planet Tikht under Lake Baikal. The Tikhtians themselves, who flew to me, including in a physical body, told me about this.

On their planet this news is already known. By the way, the head of the Tikhtian base told me that I was so far the only earthly person who was there in a physical body. There were only in the Astral.

Maxim, people write: "Maxim, we need you, we love you."

Maxim: I love you too. I'll just keep quiet for now and watch the broadcast and the comments.

Irina: Bring Maxim back, please.

Maxim: I'm here, I'm not going anywhere, I just won't get into the comments now so that you can communicate personally with Irina.

Irina: (Ashtar Sheran speaks) I am reporting galactic news. Quite recently, a few earthly days ago, we had a meeting of the Galactic

Federation of Light, the results of which are now being actively discussed by the entire Milky Way Galaxy. Not only in the Interstellar Union, but also in the Galactic Federation of Light.

The fact is that one of the humanoid civilizations of the Galactic Federation of Light, which has been a member of this Federation from the very beginning and which is also located in the Pleiades star cluster, decided to leave the Galactic Federation of Light because of the decision made by the leadership of the Galactic Federation of Light on cooperation with the Interstellar Union of the Milky Way Galaxy. This civilization in its language is called Harishtimr - this is the name of their planet. The point is that they refused to be in the Galactic Federation of Light because of disagreements with the Interstellar Union regarding the presence of certain civilizations in it, which they consider, to put it mildly, unethical. They gave various reasons.

In my personal opinion, the Harishtimrans were making purely racist arguments. This is racism, only cosmic. It was veiled racism, covered with a false color, which covertly conveyed the idea of the superiority of some races over others due to genetics, body structure, skin color, belonging to reptilian races and much more. We had a long and unproductive debate, as a result of which they decided to leave the Galactic Federation of Light.

I, of course, regret the decision made by the Harishtimrans, I send them the Light of my love and decided to tell you that our work with the Interstellar Union continues anyway. I want to say that the inhabitants of this humanoid civilization are also located in the Pleiades cluster. They were opponents of one of the reptilian races joining the Galactic Federation of Light, which joined it a little over 260 Earth years ago. Nevertheless, we accepted this reptilian race. This is not Selbet, this is a different race. It is located on the border of the constellation Hercules and the constellation Corona Borealis. When we accepted this race, the Harishtimrans were already about to leave the Galactic Federation of Light, but still remained. And now this is the decision.

This is the news. The entire Galaxy is now discussing it. The Interstellar Union, represented by representatives of Burkhad, officially expressed sympathy for us, since we have lost one of the most active members of the Galactic Federation of Light. However, representatives of the planet Burhad, like me, consider it impossible to discriminate

against any race based solely on external characteristics, as well as on past crimes. Those civilizations that are now recognized by all as bright ones also have a dark past.

Maxim: Is there a possibility that these civilizations will return?

Irina: (Ashtar Sheran speaks) Describe them. Many people here have curators.

Maxim: What do they look like?

Irina: Height is about two and a half meters. The skin color is bright white, like the Burkhadians, but their head structure is different. Round head, no hair, round face and very high elongated forehead. The round head twists back in several spirals, and the back of the head is oblique. Eyes can be dark or blue. It depends on their nationality. They live about three thousand Earth years. This is their average lifespan. Sometimes it's less, sometimes it's more.

Maxim: Do they have many contactees on Earth, and what do they do?

Irina: They have not only astral contactees, but also physical ones with the permission of the planet Pikran. They took permission as members of the Galactic Federation of Light. I don't know what will happen to them now. This will be decided by Pikran and representatives of Harishtimr.

They have five colonies in other constellations: in the constellation Aquarius, in the constellation Pisces, in the constellation Cepheus, and so on. One of the colonies, which is located in the constellation Pisces, has already protested against the decision of its mother planet. She is not a member of the Galactic Federation of Light, but may join. At least they were the only ones who expressed official protest.

Maxim: Let's hope for the best, that civilization will return. This is galactic news to ponder.

Irina: We promised at the beginning of the live broadcast to send Light to everyone.

Maxim: If this is a little practice, then let's do it live.

Irina: Let's go. So, Ashtar Sheran said that either at the beginning of the live broadcast, or at the beginning of the Light Body practice, do a practice to increase the vibration of the entire Earth. This is a very short, simple practice. It is based on visualizing the Light within your heart and imagining the planet as you fill it with Light. So, dear friends, it will take no more than a few minutes, but the main thing is to do it all together.

19:13 Practice from Ashtar Sheran on filling the Earth with Light.

Irina: I ask you to close your eyes, relax and focus on your heart. Concentrate your attention on the center of your chest. When you do this, you will first energetically and then physically feel your heartbeat. Energetically, this means that you will feel it intuitively. Concentrate on this feeling. It will intensify.

What is now contracting rhythmically within you is your Spiritual Heart, which sends energy to your physical body and all your chakras in the energy body. Imagine that there is Light in your chest. Whoever finds it more convenient to imagine the Sun, let him imagine the Sun. Whoever feels comfortable imagining fire, let him imagine fire. It depends on which image is closer to you. The main thing is that it is an image of Light. Now you concentrate on it and say to yourself, mentally: “I am the creative Light. I am the creative Light. I am the loving Light. I am the loving Light. I am the Light of the absolute energy of Divine Love.”

Now, right in front of you, imagine the Earth, as it is closer to you. Either in the shape of a globe, or like in the movie. Imagine a blue ball with continents, oceans, surrounded by clouds. Imagine that you are nearby and that it is the size of a football. Mentally, without physically straining, take this ball into your astral hands. This is an image of the Earth. Now, as you exhale, direct the Light from your heart through your hands into this ball and say to yourself at the same time: “I send

my Light of love to all the people of the Earth, to all the plasmoid civilizations of the Earth. I fill the lithosphere, hydrosphere, atmosphere, biosphere and noosphere with the Light of love and healing. All spheres of the Earth become spheres of the Divine Mind. I ask Heavenly Father to cleanse all the shells of the Earth from all energies incompatible with the Light of his eternal Love."

While you were saying this, you continued to fill the Earth with Light. Concentrate on this feeling for a few seconds. Great! Thank your Higher Self: "I thank my Higher Self for helping me harmonize the energy of the Earth."

Now you feel the backflow because the Earth feels it. All people feel on a spiritual level, all plasmoid civilizations and residents of those shells that we have listed. Breathe this backflow into yourself. When you inhale with the intention of receiving energy, it does not dissipate. Say: "Thank you and accept. Love and blessings. I promise to use this energy to develop unconditional love."

Now I will count from one to five, when I say, "Five," you will return to your normal state of consciousness and fully connect with your body. One two three four five.

So open your eyes. We have done this practice. We sent Light to the Earth. You can now write your questions. You can describe what you felt, it's at your discretion, but we are ready to continue the live broadcast. Thank you, Ashtar Sheran!

Maxim: Thank you, Ashtar, for the practice! Really very simple, very interesting practice.

Question from a viewer: I usually pass a column of light through the top of the head, along the entire spine and through the heart. I create a field around the Earth and at the same time experience waves passing through the body.

You can do different practices. This is one of the practices. We will still focus on the issues. We thank you too for being with us.

Irina: Blue light, warmth in the chest, tears - this is all normal.

27:40 Clothes for going to the Astral.

Maxim: When you go to the Astral, how should you dress? And in general, what does a person look like in the astral body? People are interested in whether it is necessary to have clothes in the Astral Plane?

Irina: LiShioni smiles and says that you need to put your best suit next to it. When you go out into the Astral, you will put it on. It's a joke.

You can practice astral travel in any clothing or without it at all. The astral body takes on the image of the physical body, unless you specifically changed its image with any thought form, what clothes it will wear. Most often it happens that the astral body appears in its usual clothes, which are in the person’s subconscious.

That is, if you do not specifically create any image of the astral body, it can take on any image. The astral body can be in any clothes, for example, which are currently on the physical body, and if, while in the Astral, you think about how your astral body looks to others, then it will take on this image. Including clothes, facial features and so on.

29:35 How to secure astral travel?

Maxim: So you can come to the Astral in the form of a reptilian?

Irina: If you accurately imagine this image, then yes, of course.

Maxim: It turns out that many healers who see reptilians can simply be deceived by jokers who can take on these images?

Irina: They can. Yes, and reptilians can take the form of white-winged angels. It's not difficult for them.

Maxim: How do we understand that this is Ashtar, and not a reptilian who took on the image of Ashtar?

Irina: If you don't know the energy of a reptilian, you won't understand. Only by answers. You can't understand this from the image itself. It can be easily accepted.

Maxim: So you need to have feedback in order to understand?

Irina: Yes. You need to understand that I, for example, treat reptilians, anthropomorphs, insectoids, plasmoids, and many other races absolutely equally. For me, everyone is children of God, everyone is children of Light. And those who have retreated from the path of Light go through their lesson of returning to this Light themselves, and the entire race is not responsible for them. Now, if Ashtar Sheran comes to you or someone else and says the opposite, then it won't be me.

Maxim: Most contactees are not that advanced. They work on a whim. How can you determine for sure that the person in front of you is exactly who he claims to be?

Irina: (Ashtar Sheran speaks) The question must be asked. If you doubt that it is, for example, me, Ashtar Sheran, then this being who has taken my image, you can ask the question: "Show yourself in the Light of God, who are you?" If he takes on another image, not the one he really is, be it an embodied Spirit, a humanoid, a plasmoid, a disembodied Spirit, then this will greatly lower his vibrations. True, this does not always work, because lowering vibrations may not matter to him if he has bad goals, for example.

Therefore, you can understand only by the answers. That is, if you suspect that it is not me, or that it is not MidgasKaus, or that it is not Archangel Michael, but someone else, you must first ask yourself, what is confusing you? And if the answers differ, for example, now I said that for me all races are equal, that in each race there can be a criminal, and maybe a saint, I now mean a criminal of the Law of God. This can happen in absolutely any race, including mine, and among reptilians, and among insectoids, and on Esler, and on Burkhad - it can happen anywhere.

If there is such a criminal, then the entire race, the entire planet is not responsible for him. And if supposedly Ashtar Sheran comes and says something else, that the whole race is responsible, that the whole race must be rejected because of the crime of one, even if it does not support this criminal, then an answer is still needed, but it will not be me.

Maxim: I understand. It’s quite difficult for people who are just entering into esotericism, who are starting to engage in regressions, some other things, going on astral travel, to make up their minds.

Irina: There is one way in which you definitely can’t go wrong – the purity of your own heart. When you purify your heart and see the true essence of whoever comes, it is impossible for you to create an illusion. You can already feel the energy. Behind the words you see their purpose. It's not difficult at all. To do this, you just need to cleanse your heart of everything that does not relate to unconditional love.

Maxim: Ashtar, how easy it is for you to say such things! Many people on Earth don’t even know what love is, what it means to love yourself? And now you say to clear away everything unnecessary and leave only love. Many people don't even know what it is.

Irina: This means they will deceive themselves and others.

34:55 Scientific work of MidgasCaus.

Maxim: So, we will raise awareness. A very interesting question: what kind of scientific work is MidgasCaus currently doing? What is he doing now on his planet?

Irina: (MidgasKaus speaks) I am now working with contactees and setting up contacts with them with different levels of consciousness and contact settings. The work I had in researching terrestrial organisms is finished. It has already been sent for research to the expert center of the planet Esler. Now I'm working with contactees. I already have 58 of them. I’m setting up my phantoms.

Maxim: Great! At this point in time, you are researching contactees on Earth and transmitting information. Do you have many contactees who can test people's energy?

Irina: (MidgasKaus speaks) Yes. I teach this to some people together with LiSioni and Erwin, who is a plasmoid of the thirty-seventh density level from the Betelgeuse system.

Maxim: Say hello to Erwin! I haven't heard or seen him for a long time.

Irina: (MidgasKaus speaks) I already said hello to him in the Astral Plane, he sent you the Light of his love.

Maxim: Thank you! Irina, choose the next question.

36:40 Causes of death.

Irina: Why do the poor people of the whole world die from a flood, from a fire? I didn't finish reading...

Maxim: Why do the poor people of the whole world die from a flood, from a fire? The lungs of the planet are burning. Beasts, God's creatures. And also from coronavirus. Yesterday, 800 people in Russia died, disabled people are suffering.

Irina: Because we have a material world, where some creatures are born, others die for various reasons: from floods, from accidents, from wars, from diseases. If the people of the whole world do not die, then no one will be born. This is the law of our world. It is called: "He who is born must die, he who dies must be born!" This is the law. Simple but effective.

Maxim: There are many reasons.

Irina: She simply asked: "Why are they dying?"

Maxim: This is the law. Everything dies, everything manifests.

37:48 The name of Archangel Uriel.

Maxim: What is the name of Archangel Uriel, and is he incarnate? Where does he live and what does he do?

Irina: Archangel Uriel's name is Archangel Uriel. He is not embodied. He is one of the Guardian Spirits of the Christian egregor. He very rarely makes contact with earthlings. Only if you need to talk, for example, about the power of prayer. He is engaged in teaching people prayers.

38:18 Civilizations of our Galaxy.

Maxim: I'll ask a question from Bueslav, although he behaves very violently in our chat, but it's a good question: besides reptilians and humanoids, what other species exist? Tell me please. Among those who watch us, many do not understand.

I can't leave the air because it's convenient when I read the questions and Irina answers them without being distracted.

Tell me please.

The Galactic Federation of Light includes many civilizations. Mostly plasmoids. There are ten times more of them. What civilizations? Ashtar, help Irina. Tell us what civilizations exist in our Galaxy and not only in ours.

Irina: (Ashtar Sheran speaks) According to the terminology and classification of the Interstellar Union, which is shared by the Galactic Federation of Light, a humanoid is an intelligent Spirit embodied in a third-density body, that is, in a physical body consisting of atoms and molecules.

They come in anthropomorphic forms that look like people. From the Greek “anthropo” - man, “morpho” - form. This is the one who has the form of a man.

A reptile is a certain cold-blooded, oviparous creature, and the ending “id” means similar. Reptile-like. This is also a type of humanoid.

Humanoids are divided into anthropomorphs, reptilians, insectoids, and other races like birds and crustaceans. These are all humanoids.

Those Spirits that are embodied in subtle bodies are called plasmoids. Plasma on Earth is the fourth state of matter. To put it simply, it is an ionized gas. I will speak in earthly terminology. A gas from whose molecules certain electrons have been released and from whose atoms ions have been formed. They usually come out because the gas is very hot under high pressure, glowing.

But according to the terminology of the Interstellar Union, a plasmoid is a creature in which there is no gas, but simply energy. The ending “-id” means plasmoid-like. What is its similarity? The fact is that it has a subtle body structure, but at the same time it is invisible. It glows just like the Sun, which consists of plasma, or ball lightning. He may live in the center of the stars. It is similar to plasma, but not plasma itself. Just like a reptilian, similar to reptiles, but a crocodile itself, because a crocodile is an unreasonable animal in which the animal Soul is embodied.

There are 59 density levels in total. The third density level is just humanoids.

Maxim: This is according to the Interstellar Union. Other civilizations may have different gradations of density levels. We transmit information only from representatives of the Interstellar Union.

Nobody writes the script for us. Please watch all our videos and live broadcasts. On live broadcasts it is impossible to work according to the script.

Irina: (Ashtar Sheran speaks) We humanoids are on the third level of density, that is, people, anthropomorphs, reptilians, insectoids are all on the third level of density. Plasmoids are found in density levels ranging from four to fifty-nine.

Creatures consisting of substances of the first and second density levels do not exist, but sometimes those plasmoids that create these elements appear to be the first or second density level. This is the solid and liquid state of matter. This is quite correct according to their terminology.

Maxim: There is also the Spiritual world, which also has its own gradation and levels. In order for you to determine what level you came from, you can follow the link under this video and find out from what level you incarnated here.

Question from viewer Lisa: forget about the negativity, don't pay attention, take care of yourself, we love you!

Lisa, thank you so much! I can't ignore the negative, I'm trying to transform it into a constructive positive. I will try to behave very correctly. Do not respond to haters, to various comments. I will try to watch and look for questions.

Tell me, please, has Svarog Day already arrived? What is "Svarozhiy Day"?

Irina: I had a conference with Veles about Slavic gods, about Slavic customs. It hasn't been posted yet

Maxim: Soon you will see this conference on our channel. Everyone who loves this topic will be very surprised.

Irina: Veles is a high-density plasmoid, forty-four or forty-seven, I don't remember now. He talked about which creatures the ancient Slavs called by the name of this or that God.

46:27 Who is Svarog?

Irina: Veles also talked about Svarog. Svarog is the ancient Slavic name for the firstborn son of God, Jesus Christ. It was still in the pre-Christian period.

Maxim: What does this mean?

Irina: Christ is “anointed” in Greek. In Hebrew his name was Mashiach. This Spirit also had its own name. It was the Slavs who gave him the name Svarog. At that time there was still a proto-language. They decomposed this word into two syllables and one letter: Sva-ro-g. “Sva” is Light, “ro” is form, “g” is help, healing, salvation, deliverance, mercy. And all this together was deciphered as “light form for salvation.” The image that Svarog, or the firstborn son of God, took for salvation.

Maxim: It turns out that this was before Christ?

Irina: Before his incarnation as Christ.

Maxim: Before his incarnation as Christ, he was incarnated in the Tumesoutian Yahweh.

Irina: He was embodied in Yahweh, but still, in the form of the Spirit and phantoms, he came and made contact.

Maxim: That is, when he was incarnated on Tumesout, he, in any case, contacted earthlings, coming in the form of a Spirit. Was this incarnation in Svarog?

Irina: Yes. He emerged from the incarnation of Yahweh approximately five hundred years before his birth in the form of Christ.

Maxim: Thank you very much! I didn't know about this.

Irina: If you look at the meaning of who Svarog is, then Svarog's day is the day of Christ, the day of his second coming, when the Earth will enter the Interstellar Union. This will be Svarog day. Until it comes.

49:44 Wives of Ashtar.

Maxim: Got it, thank you very much! Please tell me, was Ashtar married to Amatua?

Irina: (Ashtar Sheran speaks) No.

Maxim: Who were you married to, and do you have a wife?

Irina: (Ashtar Sheran speaks) Yes, I have a wife. I have only one.

Maxim: What's her name?

Irina: (Ashtar Sheran speaks) One of my wife has already left the world of the living. Then I got married again and acquired my beloved. My first wife and I were spiritual sisters. Her name is Aliara. She is about three and a half thousand earth years old.

Maxim: For your twenty-five thousand, I think that... But you don't have twenty-five, you have fifteen thousand years. Well, anyway, for your fifteen thousand it's one fifth.

Irina: (Ashtar Sheran speaks) I am fifteen thousand years old, but this is our average life, we can live longer.

Maxim: They write: " Max, the time has come to understand that there are an infinite number of worlds, realities, time branches of events. Everything is here and now."

Maxim: Victor, you are saying everything correctly. There are many possibilities. Everything is here and now. Therefore, here and now we

consider all these probabilities, possibilities and events. When you enter the Time Tape, know that you both go into the future into the probability of events, and into the past you go into the probability of events that could have happened, but are not true.

Our project is also not the truth, but it takes place and explains only what can be consciously understood and perceived. Therefore, we are not the truth in the first instance. We do not convince anyone of anything, and we will not convince anyone of anything. We are trying to find some kind of compromise together, to communicate in the same language in order to develop unitedly.

“What are the oversoul and monads?” We have already answered this question several times. Please watch the video.

"Is there life on the Sun?" The same thing was answered repeatedly. There are plasmoids in the form of subtle-material civilizations.

“Is Ashtar Sheran the Slavic God Perun?”

Irina: Not Perun. Indra. Perun was a Burkhadian. This will also be in the conference on Slavic gods. We had a conference with Svetlana Slepova. She asked questions.

53:08 The number of parallel worlds.

Maxim: How many parallel worlds are there?

Irina: (Ashtar Sheran speaks) An infinite number, if we take some version of the future development as a parallel. In the Astral Plane in the Time Tape, all worlds are visible at the same time.

Maxim: Ashtar, do you have an assistant Miranda? She took me to healing today. Or is this my fantasy?

Do you have any assistant, let’s say not Miranda, but just an assistant?

Irina: (Ashtar Sheran speaks) I have more than two hundred and fifty female assistants.

Maxim: Two hundred and fifty female assistants?

Irina: (Ashtar Sheran speaks) Precisely those who heal. They are from different civilizations. There is a woman with a similar name - Amarana.

Maxim: Who asked this question, think about it.

Irina: (Ashtar Sheran speaks) She has dark hair.

Maxim: Guys, we will soon talk about Buddha at the conference. On Monday we will have a conference with a Buddhist.

By the way, you know, I learned such interesting news! One of the forms of lines of Buddhism was organized by Ashtar Sheran's assistant, Ptagh, who was once incarnated on Earth. But we will learn about this at the conference.

Irina: And on Tuesday it will also be interesting.

Maxim: Slavic god Svantefit, who is he?

Irina: In the Slavic language there was no letter "f" at all. Therefore, this is clearly not a Slavic god.

Maxim: In the Slavic language there was no letter "f" at all?

Irina: No. All words with the letter "f" are borrowed.

Maxim: Then the question is posed incorrectly. Ask the question

correctly.

Irina: Ashtar Sheran and Mid say that they have not heard such a thing.

Maxim: “ Ashtar Sheran, are you communicating with some Shanni now?” I don't know who Shanny is.

Irina: (Ashtar Sheran speaks) There is such a Shanni Riso. He is also from my planet. It is about a thousand years old. He is one of the commanders of a small detachment of twenty-five ships.

Maxim: I’m now learning interesting news from subscribers. This is also very interesting news for me.

Maxim: “ Maxim, raise your vibrations.” Believe it or not, Zhanna, I do this every day. I’m trying to raise my vibrations and go from low reptilian ones to high Divine ones.

“ Why doesn’t Ashtar Sheran help put out the fire in Yakutia?” Guys, we answered this question. As soon as the government allows Ashtar to help put out the fires, they will help. As long as there is no mass contact, no one will allow anyone to do anything. And without the free will of our government, no one will help us. But to do this you need to confirm that they exist and establish contact.

Irina: (LiScioni speaks) As soon as you, dear friends, join the Interstellar Union, scientists and specialists will fly here to help you solve your environmental problems, including floods, fires, volcanic eruptions. We will work on this in an open way.

Maxim: They say that Shanni is the spiritual name of an earthling contactee.

Irina: Whose?

Maxim: Ashtara. If I understand correctly, Shanni says that he is a contactee of Ashtar Sheran.

Irina: (Ashtar Sheran speaks) I have many contactees, but I don't remember this particular name. I know that Shanni Riso is my employee.

Maxim: Maybe this contactee took his spiritual name due to the fact that you have an assistant. Anything is possible. Ashtar, what is the name of your ship?

Irina: (Ashtar Sheran speaks) Nibirud.

Maxim: It looks like the planet Nibiru.

We also talked about the Yeti, the question is inappropriate. Watch the video. Type "Yeti" in the search, I think you will find it.

"Ashtar, tell me, what was the name of your planet, how did it die?" The same. We also talked about this. There is a video with Ashtar Sheran where he talks about this.

58:51 What will happen in the afterlife if you don't prolong the race?

Maxim: " What will happen in the afterlife if you don't prolong the family?"

Irina: It will depend on your vibrations at the time of death. This has nothing to do with procreation. All that matters is your personal attitude towards this.

Maxim: Guys, we don't know Shanny's contactee, we haven't communicated with Shanny. Some Artem, channeler. We don't know this contactee. He didn't establish contact with us, didn't get in touch. We cannot confirm that he is a contactee until he contacts us. We

need to organize a conference and find out everything there.

Irina: We have a video about Agni Yoga. I'll tell you now how to search for videos. If you want to watch a video about Agni Yoga, go to the main YouTube page. In the search bar write: “Agni Yoga Cassiopeia.” And our video will be released immediately. Likewise, if you want to watch about Ashtar Sheran, also write in the search bar: “Ashtar Sheran Cassiopeia”, and all the videos in which he participated will be there.

Maxim: Here’s what a volunteer writes: “I’m a volunteer from Orenburg, I caught a cold in my kidneys. Help me please!" Our dear volunteer from Orenburg! Please come to us in Voronezh. There is always a place for you to live. We will look at you completely using the equipment that we have and try to help you in accordance with the requests that you have. I am sure that we can help you harmonize your entire body, not just your kidney. Come, call me personally, I will meet you personally, put you up in my hostel, carry out all the examinations and help you get rid of your problem, if you are really our volunteer.

“Who is Torhan of the Pleiades?”

Irina: (Ashtar Sheran speaks) I don’t know all the employees, but I heard this name. This is someone from the Pleiades, from Futissa. Maybe I personally communicated with him, but that was a long time ago. Basically, I heard such a name, and he is from the planet Futissa.

Maxim: Ashtar, who is Tion? Haven't you heard of this name?

Irina: (Ashtar Sheran speaks) Tirson. This is also an employee of the Galactic Federation of Light, and he is also from Futissa. It is very difficult to talk about names, especially from the point of view of the contactee’s perception.

Maxim: They ask: “Will you meet with the Yeti?” I think we're meeting a yeti here in the comments.

We had a conference about Melchizedek?

Irina: No.

Maxim: Let’s have the last question and we’ll finish. I won't ask anyone to like. I don’t want to do this anymore, because there was a lot of negativity about this. So, last question.

Irina: But then it’s not about names. Nikola Tesla in the Spiritual World.

01:04:00 Volunteer activities.

Maxim: “What will the volunteers do?” Guys, our project has a place for absolutely any volunteer employee, from programmers to artists, transcribers and many other professions. There is a link under this video, fill out the form, and our administrators will definitely call you and tell you how you can use your knowledge and skills in our project. The project is growing and developing, so we are always waiting for all volunteers.

"Talismans and amulets." We have no plans for talismans or amulets.

We have new products. With the help of our intergalactic friends, we have created a very interesting biogeocenotic structure of bifidobacteria, which will completely restore the entire biogeocenosis of the entire human body. We have already launched this for sale, but more on that later. Now we sell only for our centers. We don't have much of what we've created. We get feedback from people who use it. We have already conducted research, but just in case, we receive feedback from all our employees, volunteers and those people who undergo health improvement in our centers.

01:05:40 How to become a contactee of Ashtar Sheran?

Maxim: “ I want to be an Ashtar contactee. What is needed for this? »

Irina: (Ashtar Sheran speaking) Get in touch with your Higher Self. Ask if you can be a contactee with me. Does this align with your mission in life? If the answer is yes, ask your Higher Self to invite me. I or my phantom will come to you and we will talk mentally. When I arrive, I always say hello. I don't come here to stand and be silent.

Maxim: Guys, thank you very much for supporting our project. This year I am laying the foundations of two large buildings on our land. Next year, before the New Year, I will try to build Centers where you can always come, spend time there, communicate with like-minded people, improve your health and just relax. All Cassiopeia employees and project volunteers who help the project develop are welcome to come.

Volunteer responsibilities are determined by the senior volunteer group, depending on which group you fall into. Transcribers do one thing, artists another, IT specialists another.

We welcome everyone to our big family! Join us! I guarantee you that, in any case, the project will teach you and help you, because you will help us - grow and develop.

Irina: Mid and LiShioni are resting in the Astral Plane.

On the basics of Hinduism, we already have a video with Krishna, with Agni.

Maxim: There are a lot of videos. Look out for a video soon where Irina visited the Tikhtian base.

Irina: We have a video on Vedic culture and astrology. Look!

Maxim: Yes, there are already a lot of videos. Go through the search to our channel, try to find it.

Irina: “Can’t a volunteer come?”

Maxim: You can come. Our centers will be open to people on a donation basis. We will always wait not only for volunteers, but also for ordinary people. Volunteers have special conditions for visiting centers, training, and much more. But only volunteers will know all this. Come and find out everything.

Irina: I can't tell you about the snake civilization. I don't know what you mean by this: reptilians, plasmoids or someone else.

Maxim: Bye everyone! We love and adore everyone! Thank you very much for supporting us and our project.

Irina: Thank you for your support! See you again!

August 15, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

Ashtar Sheran is the head of the space fleet of the Galactic Federation of Light (GFS).

#328 Live broadcast. Answers on questions. Opening of two new centers in Samara and Novosibirsk.

https://blog.cassiopeia.center/otvety-na-voprosy-otkrytie-dvuh-novyh-centrov
https://www.youtube.com/watch?v=sTT1wHwkTOU

0:04 Cassiopeia centers in Samara and Novosibirsk.

Irina: Hello, dear friends!

Maxim: Hello everyone! I'm looking at Moscow, Rostov region. Good evening. How can you hear us? From the Cassiopeia center in Voronezh (laughs), hello guys! We are just a little lower than you, but we will soon rise to you. Super! You can hear it well.

We have so much interesting news that I don't even know where to start broadcasting. First of all, I want to thank you all, our dear viewers! There are now one hundred thousand of us. This was a very interesting level for us. We have finally reached this point. Now a hundred thousand people can hear us. This is very, very important for us, and I bow to you all for trusting us, for watching us, studying us and considering us.

Guys, hello everyone! In addition to the fact that we have one hundred thousand subscribers, we have wonderful news - we have opened two Cassiopeia centers. There is equipment there that we use in the centers. These are Oberon, Crownoscope, Aurabuk. Guys can see you in these cities. This is the city of Samara. Samara, hello! In Samara we have wonderful specialists. A wonderful family opened a center with all the equipment. They have bioenergy massage, Oberon, and Crownoscope there. The most important thing is that they will adhere to my request, as a leader, that one day a week they will accept people completely on a donation basis. Link to the center below

the video. It's in the description.

We also opened a branch in Novosibirsk. Yes, it’s far from Voronezh, but it’s also of high quality. They will also be able to take you to Kronoscope and Aurabook, and take you to the Higher Self. You will be able to work with a specialist with a very good reputation and reviews. Novosibirsk, hello! The link and phone numbers are also below, under this video.

Our next news is even more interesting! As you all know, we are organizing a retreat on Lake Baikal. We are organizing it with Lama Itigelov, with a conference, with trips to datsans. With training practices - morning, evening. It will be a very eventful retreat. The most interesting thing is that we sent Irina to one of the bases on Lake Baikal. Tikhtian base, right Irish?

Irina: Yes, the base of the planet Tikht, which is part of the Interstellar Union.

Maxim: As always, we filmed a video. Many thanks to Vladimir Goldstein, he always captures these moments. And we have already filmed a whole video about her visit to the Tikhtian base, what happened there. The most important thing is that all the detailed information will be received by those who come to our Baikal retreat. By the way, under this video there is a link to sign up for the Baikal retreat. I hope there are still free places there. Hope dies last. In any case, they will give you feedback and call you.

And the most interesting news is yet! We have finally developed a very interesting drug. These are bifidobacteria that completely restore the microflora of the human body. They are developed using technologies from our interstellar friends. We spent six months developing and studying, of course, based on what we already had here on Earth. You will learn about this drug next week. We shot a whole video (for) forty-five minutes, where my assistant Evgeniy and our scientist, who helped us develop this group of bifidobacteria, which will completely restore your biogeocenosis and internal immunity, and the immunity of your entire body. Every time we grow and develop.

Plus, right after the Baikal retreat we arrive, and together with you I am pouring the foundation of our Center, which we will complete immediately after the winter, after the new year. By the next new year, we should have reached the entire Center, at the initial stage. This is the first stage when we will be able to accept about fifty people at the Center on the same conditions under which we already accept here in Voronezh. For training in all energy practices, contacting, and transmitting feedback. We only have donation. In the Cassiopeia project there will be no prices for the transfer of spiritual knowledge, for teaching spiritual knowledge and for spiritual work.

I don't dare distract you anymore. The most important news is one hundred thousand subscribers, two open centers, Irina's flight to the Tikhtian base, and we have finally released our group of bifidobacteria. I won't tell. You watch the video, you will understand what we did. For our people, for our species, we have created a structure that will help completely restore internal and external immunity.

I see galactic news in the studio! Guys, bye everyone! See you at the Baikal retreat! The recording link is below this video. As far as I remember, there were two or three places left. Call you too, they will definitely call you back.

Irina: Bifidobacteria are good. We drink them all too.

Maxim: We have already drunk the entire course. I completely got rid of heartburn, which tormented me for seven years. She didn't torture me too much, just little by little. Having restored the biogeocenosis of the whole organism, I completely got rid of this internal problem, which caused me a little discomfort. The inability to digest food is a huge amount of information that I probably don't absorb well.

I will answer. We already have a website ready, next week you will see a video, and if you want to try them with us, because our entire Center has tried them. Before giving you such an exclusive and wonderful product, we completely tested it on ourselves, on all our specialists. When the video with bifidobacteria comes out, there will be a link below on how to purchase it.

Irisha, further galactic news.

08:57 Strengthening the security of the Earth by the forces of the Interstellar Union.

Irina: Hello, dear friends! Greetings. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Our curators are present today - LiShioni from the planet Shimor, and MidgasKaus from the planet Esler. They will answer your questions. First, galactic news.

(MidgasKaus speaking). I welcome everyone. Quite recently, a regular meeting of the Interstellar Union commission took place. A decision was made to implement Ashtar Sheran's proposal that with every specialist who flies to Earth from the Interstellar Union (IC), from the Galactic Federation of Light (GFL), from any civilization that is outside the Earth, wherever it is If she visits Earth, she should not have a biorobot nearby.

Maxim: Good news.

Irina: There is another piece of news. This rule now applies to absolutely all humanoids who visit Earth. It takes effect immediately after such a decision is made. This also applies to Irina's curator, Kirchiton. He will also have to take the robot with him. Usually MS provides robots for this. Since planet Earth is supervised mainly by representatives of the planets Burkhad and Disaru (this especially applies to the protection of the Earth), the biorobots will be humanoid. So now Kirchiton will not be alone, but together with a biorobot, which must be present during contact.

Maxim: After the contact, tell me what the biorobot looks like. Even try to talk to him about something. Even interesting.

Irina: This will now apply to everyone.

Maxim: I think this is good news. We have come to the point where all arriving civilizations will carry out their, so to speak, machinations under control.

Irina: Now this applies to representatives of the planet Tashig, and to those who take biomaterial from earthlings for various experiments: genetic, biological, biochemical. All this will happen in the presence of a biorobot. It cannot be turned off.

Maxim: Many people don't understand why they started giving biorobots.

Irina: We didn't tell many people about this.

Maxim: We had a broadcast when many people say that the Interstellar Union does not control what happens on Earth when visiting other civilizations. Therefore, the question was raised about how this could be controlled. Now we have achieved that any visit to the Earth on a flying saucer by any aliens will take place under the supervision of biorobots.

Irina: Back when we had a general meeting, when representatives of the Interstellar Union, as well as representatives of the Spiritual World, answered questions about our safety (this video is on our channel), Ashtar Sheran said that he was making such a proposal. Yes, robot inspector. And it won't be, as in the famous story "an auditor is coming to us," he will fly with him.

Maxim: By the way, I forgot one more piece of news. We have released an anthem. He came out just in time for an audience of one hundred thousand. I want to thank all our volunteers, all our helpers who helped us write the words to this anthem and our wonderful performer. She is a famous singer. It was shown on television. I saw her performances. You can listen to this hymn. Great anthem! Cool words! Just what you need! Reflects the inner core of "Cassiopeia" itself. They ask, should we do a five-minute Ashtar practice?

Irina: Ashtar practice?

Maxim: To cleanse our planet. Will do?

Irina: Representation of the planet and filling with Light.

Maxim: Let's do it. I believe this practice is necessary.

Irina: Okay. Let us first do the Ashtar practice.

(LiScioni speaking). We reported that the Cassiopeia project on Earth has its own anthem, which was created entirely by the employees of this team. Those people who are in the egregor “Cassiopeia”. Music, poetry, performance, and editing - all this was done by the participants of the Cassiopeia project themselves. We reported this to the Interstellar Union and translated it into other languages.

Maxim: I want to say that everything that is done in the Cassiopeia project is done at the expense of the people who are nearby. We call them volunteers. I can’t call them volunteers, they are more friends, soul mates and relatives. Because we already have a very large team. Since the last video release, it has expanded a lot.

Guys, those who have not yet been called back, those who have not yet been connected, please wait. More than 250 applications for volunteering were received. The guys didn't expect this.

Yes, Evgenia Pan is the performer of our anthem.

Guys, they will definitely connect with you and call you. We won't let anyone through. We'll call everyone back. We will give everyone who responded to the request to volunteer the opportunity to participate in our project. Thank you so much and bow to you! Very general public. A huge number of people, very different! From lawyers, economists, to tarot readers, regressologists. Guys, low bow!

I am sure that we will build a Center and gather there. Plus I will build a research institute there, everything related to psychology and esotericism. We will continue to grow and develop together with you.

16:43 Practice of cleansing the Earth's noosphere from Ashtar

Sheran.

Irina: So, dear friends. Let's do the practice of cleansing the Earth's noosphere through a short meditation.

Maxim: The cat controls the live broadcast. Biorobot. No, this is my cat, she is not a biorobot. She is alive. She even has a Soul - an animal Soul that is controlled by a plasmoid. Sorry, Irish, I interrupted you.

Irina: Let's do the practice of cleansing the Earth. To do this, you need to take a comfortable sitting position. Close your eyes. Let's calm down first. Let's concentrate on our breathing. Let's breathe in slowly and relax. This practice must be done in a calm state. Let's concentrate on the center of our breathing. It is located in your chest, next to your heart. Trace the path of the inhaled air. Now concentrate there in your consciousness.

Now imagine that there is a point of light in the center of your chest. It looks like a small glowing ball. This is your inner sun. This is your center of love, creativity and inspiration. It is called the Spiritual Heart. Concentrate on this point. Even from the usual direction of attention, you see that this point begins to grow, because you concentrate on it. I remind you that the manipulation of energies occurs through breathing and a simultaneous visualization called visualization. We continue to keep our attention on the point. Let's take a breath. We realize that together with the air we inhale divine energy. We direct it to our Spiritual Heart. Let's fill it up. Feel how this ball expands. You feel warm, calm and comfortable. Feel completely safe. Now, with each inhalation and exhalation, increase the diameter of this luminous ball until you find yourself in it.

Now imagine our planet in front of you. There is no need to strain yourself. Imagine it the way you saw it, for example, in the shape of a globe or in some video. Imagine how the Earth floats in space, how it flies through space. Imagine the Earth among the stars. You are nearby in your Spiritual Heart. The Spiritual Heart is the image of your spiritual body. Since the Spirit is infinite and has no boundaries, it can only be limited by the body. But now you are in the Spiritual World, and there are no boundaries, so you can easily imagine yourself larger

than planet Earth. Your spiritual body will instantly take on this form. Mentally stretch out your hands, just imagine yourself doing it. Do not physically strain or engage your physical body. Mentally reach out and take the Earth in your hands. Look at her carefully. Consider it.

Now we exhale, imagine how we fill the Earth with light. Send her light. Speak words from your heart. I will speak my words, you can speak yours, or you can repeat to yourself: “I am the creative Light. I am the creative Light. I am the loving Light. I send the Light of my absolute Love to planet Earth. To all its countries, all continents, all oceans. I cleanse the noosphere of planet Earth with my Light. I ask my Guardian Angel and Heavenly Father to strengthen my energy for a good cause.”

Fine. Now you see light coming from your hands. Direct it to planet Earth to the place where your heart tells you. If you see any dark spots or stripes, they are characteristic of the Earth. Direct to this place. Now watch how the Earth begins to shine. This happens because we are all in this together. In group meditation our power increases many hundreds of thousands of times. Because we do this with an open heart and in the energy of love. Great! Fill with light, wish love, happiness and enlightenment to all beings on Earth, at any level of density. All people, their Higher Self and all subtle-material plasmoid civilizations will be very happy about this.

Great. Now thank your Higher Self for helping you. You feel a response flow from the Earth. She senses your energy and sends you a flow of gratitude and harmony. Breathe it into yourself. Inhalation is the intention to receive. Say: “Thank you and accept. Love and blessings. I promise to use this energy to develop unconditional Love.” Remember this feeling. Remember this energy. Fine.

Now I will count from one to five. When I say five, you will return to your normal state of consciousness and fully connect with your bodies. One two three four five. Open your eyes. Look around. Move your arms slowly. We return to the material world.

So, dear friends, we have conducted with you a practice of cleansing the Earth’s noosphere. Look around and feel for yourself how the space has changed.

Great! Now you can write your questions or impressions. Whoever wishes. We continue the live broadcast.

27:52 Prebiotics from Cassiopeia.

Maxim: I'll answer a couple of questions for now. What is the cat's name? The cat's name is Yesya. Regarding drawing up a vibration map. If we find a specialist who will be in contact with our interstellar friends, we will definitely entrust him with this task. Drawing up a vibration map is not an easy task. It needs to be updated every day. It's not that simple.

Question about the prebiotics we have developed. We, like Cassiopeia, did not develop them ourselves. We contacted a research institute and laboratory. I won't say at what company we did this, because I think there's no need to talk about it live. This is a large enterprise that has been developing prebiotics since the thirties. We added technology, modernized it and came up with a strain that responds well to acidic and alkaline environments. It is very survivable in the body itself.

I want to tell you, dear spiteful critics, that all the money from the sale of these products will go to the construction of centers around the world. No matter how you tell me, and no matter how you try to shout, that someone somewhere is scamming someone out of money. When there was no center yet, they shouted that you were wasting money and wouldn't open the center. We opened the center. Now we are building a center - again we are scamming money. Guys, stop doing nonsense! We are trying with all our hearts for you, who writes all sorts of nonsense on the channel. You yourself, when you run out of money, will come to our center in order to receive spiritual knowledge there. Light to all, love to all, let's continue!

Irina: There are a lot of impressions from the practice. I thank you all. I felt all of you, how you sent light, how you worked. Maxim also felt everyone.

Maxim: In Moscow itself we already have a small health center. Ivan

Yonten has it. He has all the equipment so that he can watch you on Oberon, and on Crownoscope, and on Aurabook. Plus, Ivan already has a batch of prebiotics that we have developed. You can buy them there and try what they are. We will have a story about visiting the base on Lake Baikal next week. There's a whole video there. I don't know if it's split into two parts or one video. Probably divided into two parts, forty-five minutes each, as far as I understand. It will be very interesting. But the most interesting things will be received by those who come to Baikal. You will have the opportunity to personally communicate with representatives of this base, no matter how strange and scary it may sound now.

Irina: Will you bring prebiotics, they ask.

Maxim: No, we can't carry such a large quantity on planes. When the video comes out, you can order them online. We took care of this so that each of you can try it all. These prebiotics have very good indicators of working and fighting coronavirus. Very good results. I won't say much. You will see everything yourself, read everything yourself. There are a lot of interesting things in the complex that we developed together with our interstellar friends.

31:55 Approaching the level of God.

Irina: Can the Soul reach the level of God?

Maxim: Good question. Can the Soul reach the level of God?

Irina: First you need to understand what the level of God is? God is beyond all levels. It is not only possible to reach his level, but all the spiritual teachings of planet Earth, and not only that, call for this. Jesus Christ spoke about this very well, briefly and clearly two thousand years ago in these words: "Be perfect, as our heavenly Father is perfect." That is, it is possible to achieve his level of perfection. Moreover, this is not only possible, but it is also prescribed to us as a commandment. And Divine perfection is only in absolute Love. Only it is a great force that can create life. When you approach the level of God, all your fears disappear, all your doubts disappear. You completely trust this world, and this world trusts you. You understand it

as part of yourself. This does not happen in episodic states of enlightenment or divine ecstasy, it accompanies a person every day.

33:31 The connection between man and space. Bases Tumesouta, Shimora in the Caucasus.

Maxim: Can a person living on Earth have no connection with space?

Irina: No. The earth itself is part of the cosmos.

Maxim: Is there a base in Adygea? LiSioni, MidgasCaus.

Irina: What is Adygea? He doesn't know the names of the countries.

Maxim: You need a map, you need to show it.

Irina: Is there a base in the Caucasus? Yes, in the Caucasus there is a Tumesout base, a very large one. Just north of the Tumesout base there is a base for the planet Shimor. The Shimorians and representatives of Gihor are there now. I know the Caucasus, these are mountains. I know the name of the mountains.

34:20 Dishes for storing water.

Maxim: In which vessel is it better to store drinking water: copper, plastic or glass?

Irina: Of all the above, glass is better, but it is fragile. It is better to store water in vessels made of any metal that does not oxidize, such as stainless steel or enamelware. It is also possible in plastic, it is an inert material.

35:00 Sign of increased vibrations.

Maxim: Irina, why did tears flow during the meditation you were giving just now?

Irina: This is a sign of raising your vibrations. You felt a surge of love. This is fine.

35:15 Radomir. Svarog.

Maxim: Radomir is the Spirit of Jesus? I don't know who Radomir is.

Irina: I was asked about this. They sent me information about him. This was a man who lived on the territory of Russia when there were still Slavic tribes here, before the birth of Christ. I was told that Radomir was a contactee with Jesus. As we recently learned, a representative of the plasmoid civilization recently came to us and told us that the Slavic God Svarog was the name of Jesus Christ.

Maxim: Was the Slavic god Svarog called Jesus Christ?

Irina: We had a conference on Slavic gods. She'll be out soon.

Maxim: So this is even before the coming of Jesus Christ himself in the body of Christ? Or not?

Irina: Yes, the Slavs still had it. They existed before the birth of Christ. But they did not know him as Jesus Christ, because he had not yet come.

Maxim: We are now talking not about the personality of Jesus Christ, but about his Spirit?

Irina: About his Spirit. Many people had contact with this Spirit, even before the incarnation of Jesus Christ, not only on Earth, but also on other planets.

Maxim: Friends, I have a big request to ask of you. As I noticed, there is no point in putting likes on a live broadcast. Everyone who watches us not live, please like and subscribe to our channel so that you will receive notifications about the release of a new video in the future. Thank you for your help in promoting our channel! The more people know us, the more family we become, the more light and love we can bring to people, and the faster we can build centers around the world.

Irina: They write that I wanted to hold the Earth to my heart like a little child. Yes, such feelings arise.

37:35 Vanga.

Maxim: Irina, they ask. Vanga, who is she? Just briefly.

Irina: Contactor. She was a contactee with extraterrestrial civilizations. I contacted one of her curators, who is now in embodiment, he is alive. His name is Zaliatar. It is located in the Pleiades system. He is a Pleiadian. I visited him on his planet, it is called Raomli in the Pleiades system. He said that he was one of her curators. She also had very good contact with the Spiritual world, with those people who even recently came out of incarnation. She could talk to them and convey a message to people. And the fact that she saw the future - she saw one of the options. Archangel Michael showed her this, he was in contact with her. Archangel Gabriel (Mirah Count) was in contact with her. They showed her one of the options. And this was not always shown to her at her request, but only if it was useful to people and their spiritual development.

Maxim: We were just talking about spiritual development. Under this video there is a link to all Cassiopeia projects that are available to you under the same conditions. We now have Mentalhealing, we have Meditations, Women's practices, Cosmohealing, Cosmoenergetics, Interstellar Union Practices for visiting the Ashtar ship in the Astral. Under this video there is a general link to all the practices of our project. If you want to visit our practice, you can follow the link, subscribe in the Telegram chat, and complete this practice under the conditions that we have specified in the project.

39:40 Who is Kydyr ata?

Maksim: Kydir father, who is ten?

Irina: This is a Muslim saint. I've already been asked about him. He, too, was a contactee with plasmoid civilizations, with the Spiritual world, including the Islamic religious egregor, and not only. He was a healer. Plasmoid civilizations told me about him, that he contacted them and healed people through them, and he also had prophecies. He also practiced shamanism.

Maxim: Judging by the name, yes. Basically, all thin-material plasmoid civilizations work with Kazakhstan, Uzbekistan, and engage in shamanism.

Irina: He also went to the mosque, that is, he was an admirer of the Islamic egregor.

Maxim: That is, he was multi-religious, like me. I belong to the Christian religious egregor, but I like to read Islam (religious aspects), Buddhism, and Krishnaism.

Irina: And Orthodox books.

Maxim: Yes. I see one hand in everything - the hand of God.

40:58 Levels of technical development of civilizations.

Maxim: During what period of time was there the most technologically advanced civilization on Earth?

Irina: In the Interstellar Union, since this is an interstellar union (its very name suggests that it exists between planets that physically go into space), the absolute criterion for the transition of a civilization to an average level of technical development is considered to be a physical flight into space. If a civilization accomplished this on its own,

without the help of any alien representatives, completely independently developed the engine, maintenance of the ship, its shell, fillers, and did all this without prompting, then from that moment the civilization is considered to have passed from preschool age (from kindergarten) to first grade. Your civilization, as you know, achieved this in 1957 from the moment the artificial satellite was launched, because if a device, even without a person, flew into space, then this is already considered a breakthrough to a new level. And when a person flies, this is the consolidation of this result.

The next stage is when civilization finishes schooling, as you say. What will be the sign that civilization has finished school? This is settlement throughout the star system. This means building permanent bases, firstly, on the planet's satellites, if there are any, and on the nearest terrestrial planets. For you, these are stationary bases on the Moon and Mars. Not just visiting these planets and satellites, but creating a base there. Study, flights to other planets of your system, giant planets, to their satellites, and their study. From the moment when stationary objects of terrestrial nature with permanent residents of at least ten people appear on the Moon and Mars, from that moment it will be considered that the terrestrial civilization has already finished school and is moving on to institute education.

45:00 Keshe plasma generator.

Maxim: Please tell me, does the plasma that was developed from viruses help people or not? Guys, we even made a video with one of the people who talks about this plasma. We explained to him that this is a Keshe plasma generator and how it works. But he asked not to post this video because he thought that we had told him some kind of fairy tale. We cannot post a video if the person himself is against this video. The video talked about the generator: what it works with, who it attracts, who it calls.

Indeed, this is a Keshe plasma generator, but everything is not so simple there. There the Soul of the plasmoid is created. This is a very interesting process. Plasmoid civilizations work there, which further help you work with your immunity and cope with the coronavirus. Yes, plasma generators work. The main thing is to approach this correctly, and you need to be careful with it, there is a possibility of getting chemical burns. Therefore, be very, very careful with plasma

generators.

46:20 Petr Garyaev - contactee.

Maxim: Does the Faraday room help against Covid? I don't know. Mead, do you know what a Faraday room is, or do you need to explain?

Irina: We recently studied Garyaev's chamber. It is the same?

Maxim: I don't know.

Irina: I know the name Faraday. This is a scientist physicist, mathematician. What room did he invent?

Maxim: By the way, we will have a video coming out soon. Garyaev's wife and I talked. Very cool video! You'll see everything. I won't get ahead of myself. The conference was very cool! She asked great questions. In general, I think they are great! Here you can work with them, build a design together. The only thing is that it is very difficult to explain our donation structure. I will try to harmonize with the Garyaevs.

Body temperature? Peruvian contact?

Garyaev was a contactee. Interestingly, Garyaev's curators came to the conference with his wife and answered questions. We did not bother Garyaev himself. Because it's too early to bother him, he's just adapting to the Spiritual World.

47:55 Development of civilization on the planet Esler.

Maxim: Mead, how did the first alien civilizations come to spirituality? Is it possible to answer this question?

Irina: What is spirituality? Does this mean our life without God, or what?

Maxim: Most likely, yes. How did you get to the point where wars stopped on your planet? And were there any wars on your planet?

Irina: Our civilization originated from animals that are somewhat reminiscent of your cats, but only in appearance. These were animals that lived in forests, lived in trees, and, unlike cats, they were herbivores. They ate plants and could feed their young with milk and plants. Then they evolved into intelligent beings. Research shows that our first civilization occurred in the area about just over two hundred million years ago. This was the dawn of our civilization. There have been different rulers in history. There were wars between them, but they stopped long before joining the Interstellar Union.

The planet was divided into regions of influence of certain groups that pursued different policies. There were seventy-eight of them. One day, the leaders of these regions got together and signed a general law to end all wars, all conflicts. This law was adopted because such Spirits, such humanoids, who were able to feel like-minded people in each other, came to power on our planet at the same time in order to unite.

Maxim: So at one point the planet signed a pact on unification and ending all wars?

Irina: From that moment, one hundred and twenty-five earthly years later, an attempt was made to unite the military of fifteen countries to attack other countries. They had heavier-than-air craft, much like your airships, only they were controlled by small propellers. The remaining countries landed on the borders of these states and, using violent methods to resolve this situation, disarmed these armies. Part of Esler's military landing of the remaining states landed in the capitals of the countries that violated the treaty and changed power there.

Maxim: I understand, it's a long story. We can tell it the whole broadcast.

Irina: They acted quite harshly there.

Maxim: We will write about this in the book. By the way, we signed an agreement with the Eksmo publishing house. One more news. We have a wonderful book coming out soon. It's called "Diary of a Contactee". It will be available for everyone to purchase.

We have a good video about Pentecostals. You can look and find out who the Pentecostals are. Come to our channel, subscribe to the channel, type a word in the search, and using this word you can get to the video. We already have more than three hundred videos. Almost everything has already been filmed. We are now thinking about changing the position of the channel a little. Give more practices, more different conferences, more different cultural moments.

Irina: More different conversations. Mead and LiSioni suggested that I take, for example, some book, spiritual literature, read and discuss on air.

Maxim: Guys, we invite scientists for a dialogue. Do not be afraid! We are ready to give you feedback. Many have already realized that this is not a joke. Dear scientists, from any field of knowledge, even from psychology, from the technical field, we are ready to make contact with you, we are ready to enter into dialogue with you. We are ready to cooperate because we are doing the same thing.

Our science is technocratic and material. But we are ready to at least try to change this and give information that we can and have the right to convey from representatives of the Interstellar Union. We are waiting for you all. All the coordinates are there. Find me personally. Call me. We are ready to attend a conference with absolutely any scientists, doctors, scientific figures, and so on.

54:30 Time of reincarnation of the Soul.

Maxim: At what time can the Soul reincarnate? Only to the future or maybe to the past?

Irina: Sometimes she can reincarnate in her past, because time does not exist in the Spiritual World. She can go back along the Time Tape and be embodied in her past. This happens rarely. Only in special cases provided for by her personal reincarnation program.

Maxim: Actually, a very difficult question. There is no time in the Spiritual world. Time is a flow of energy that is directed both forward and backward. Plus there is a Time Tape. There are variations of events along the Timeline. They can be either forward or backward. Many contactees dive into the Time Tape and end up not in what really happened, but in one of the realities of these events and describe it. That is why there is so much incomprehensible and awkward information about the past, the future and much more.

We will come to Baku and Ukraine with pleasure, but for this you will need to call me. And at least so that 100-150 people can get there. This should be some kind of health center or hotel. Call, write. We are ready to come to your city and plan this event. We don't have time to do it all ourselves. There is so much work that I already forgot when I was resting.

We already answered about Ho'oponopono, the working method. And about Reiki. We do not yet have a Reiki master in the Center whom we would take into the structure. We are waiting for a good Reiki master who is ready to transfer this knowledge to all people and his students on an additional basis.

56:40 The most ancient civilization in the Universe.

Irina: What is the most ancient civilization in the Universe? It is not known what is the most ancient civilization in the Universe. But in our Milky Way Galaxy, the most ancient civilization in terms of time of origin is the planet Burkhad, insectoid civilizations, and the planet Tumesout. They are not far apart from each other. Almost simultaneously, with a difference of a couple of hundred million years.

Maxim: Let me try to explain. There are Universes, Galaxies. Galaxies are compressed, decompressed from thin-material to dense-material, densified, then decompressed back, disappear again, new ones

appear. The most ancient civilizations are civilizations that are located on subtle material planes. These are the most ancient civilizations. And among the dense material ones in our Galaxy these are the Burkhadians, Tumesoutians, Lyrans, and insectoids.

Irina: ISirius is also a very ancient civilization.

57:53 Contacts with aliens in South America.

Maxim: Tell us about the Peruvian contact of the seventies.

Irina: (Mead, LiShioni say). We heard that in the region of Peru, in South America, there were very developed contacts in these years. There was more than one contact. There was contact with the Pleiadian races, with Futissa, with Raomli, with Lashderon. I don't know such a planet. There were several Pleiadian races there. Also with the planets Pikran, Tumesout. This happened not only in Peru, but throughout South America. Brazil.

Maxim: This should be a separate conference. Once upon a time we had a conference with the guys on Peruvian contact. A long time ago we talked with one of the guys. We don't know where this conference is. We will be happy to attend it again in a more informed format and with more intelligent questions. If anyone is involved in Peruvian contacts, has questions, call me, write. You can find me on VKontakte. I don’t hide my phone numbers, I don’t hide my coordinates. There is an email you can write to for cooperation. I personally read all this mail myself. Write, call, find. We will communicate with you and give feedback.

59:37 Who created God?

Irina: A very difficult question. Do you know or not who created God?

Maxim: We've talked so many times already. God is everything. God is eternal. Nobody created it. He has always been there.

Irina: You cannot create an eternal being. He is the beginningless beginning. A source that did not come from anywhere.

Maxim: For our brain this is the understanding. We cannot explain it any other way. Maybe when we get to the Spiritual world, it will be more clear who God is. But now we can only explain it this way for our understanding and consciousness.

Irina: Those who say that the Spirit also has no beginning, that it is not created and not born, this comes from the feeling that the Spirit is born in the Spiritual world, and there is no time for the material world there. Therefore, there is an understanding that the Spirit has always been. This just means that he exists outside the material world.

01:00:41 Settlers.

Maxim: Good question, but the answer will not be quick. A person's resident, who or what is that?

Irina: Resident.

Maxim: What kind of word is this - settler? And what can be called a "settler"?

Irina: "Settler" is contact with some entity. It could be anyone - plasmoids, disembodied Spirits. Humanoids are not settlers because they have their own bodies. They return to them. The settler regularly stays with the person in his field. If these are plasmoids, then they make a communication channel, which we call bindings. It is like a thread that stretches from the human field to the world of the plasmoid. Although he is not around all the time, he is in contact all the time. It can also sometimes be called a subversive, especially if it greatly influences a person.

Maxim: That is, the sub-settler can be a spiritual entity, a subtle-material entity, and a subtle-material entity with an embodied low-vibration Spirit. It is imperative to understand each situation.

01:02:02 Mitya and Captain Bill.

Maxim: They ask where Mitya went? Why did Mitya disappear somewhere?

Irina: We don't communicate with Mitya.

Maxim: We are not following his contactee. We do not communicate with Mitya, because they did not make any contact with us, did not contact us. The guys have a large amount of ego that has not yet been developed. They have their own commercial structure there. They probably don't want to give the opportunity to be a contactee to anyone else on this planet other than Captain Bill. As far as I understood them.

Irina: I expressed my desire, and still express it, to talk with Captain Bill, with any of his representatives, with any administrator. I say this in front of everyone. I can with a translator. I can in the presence of the administrator. I can do it alone.

Maxim: Please tell anyone who has the opportunity to tell Captain Bill that we are ready to make contact with him. Its administrators do not allow us to do this. If you have direct contact with Captain Bill, we are ready to communicate with him. Its administrators convey some false information, invent some unnecessary circumstances so that we do not communicate with Captain Bill. Captain Bill, we are waiting for you to chat!

01:03:30 Water on Esler.

Maxim: Mid, please tell me, do you use water, and what kind of water is on your planet?

Irina: Yes, of course. We use water. It is necessary for our metabolism because we have blood. We have a liquid environment of the body. It must be updated, it must be cleaned. For example, on planet Esler we take water from natural sources, practically untreated. But it is not polluted by any industrial waste, because all of our industry is taken outside the planet into outer space or to the planets of our

system, where there are no habitable zones of our civilization. Therefore, we still have natural areas where we can safely get water. It is believed that such natural water (he is now showing me an open source), on which the sun shone, on which the stars shone, is considered by us to be beneficial for the health of the body and for raising our vibrations, because we drink it with the knowledge that it contains The Light was shining.

Maxim: Tell me, please, does your water have the same composition and properties as our water on Earth?

Irina: Yes, of course, H2O. There may be various impurities, but they are not harmful to us.

Maxim: Okay. Thanks a lot! Let's have one more question. Help the people of the Earth! Guys, we will help in any way we can. I don't know what else needs to be done. All that remains is to dance something. And practices, and information, and all kinds of healing moments. We give everything we can. There is nothing that we do not give and that we may have squeezed. Irisha, choose one of the last questions.

01:05:54 Weddings on Esler.

Maxim: Oh! Are there weddings on planet Esler?

Irina: We don’t have such a solemn event, but on the day when the destinies of our two people, a man and a woman, are united, we invite close relatives and friends, but not to celebrate the holiday, but to get to know each other, to consult how live together as families.

01:06:34 Contacts with God the Father.

Maxim: And the final question is, are there many contactees with God the Father?

Irina: Yes. This means with the Higher Self. Part of God is the Higher Self. And we are part of God, but the Higher Self is a greater part of

God, because you remember that you are thirty percent, and the Higher Self is seventy percent. Therefore, with a greater part of God the Father than the incarnate part, there are many contactees. This means with the Higher Self.

Maxim: Guys, if we are talking about contact, then there are a lot of contactees! If you would like to join the Cassiopeia project and get to know us all personally, call or write. We are always glad to see new members of our team who will try to bring the same Light that we bring to this planet. Bye everyone! Once again thank you all so much! Everything that our project has, all the merit, is only thanks to you. Thanks to your support, thanks to your enthusiasm, thanks to the fact that you are with us. We are very pleased to keep up with you. Bye everyone, see you soon, see you on new broadcasts!

Irina: Bye everyone!

#328 Live broadcast. Answers on questions. Opening of two new centers in Samara and Novosibirsk.

Broadcast August 23, 2021.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the CASSIOPEA project and the Center for Spiritual and Physical Development;

LiShioni - representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

Video in text

May 15, 2023

#332 Live broadcast. Baikal retreat Cassiopeia. Answers to questions from viewers.

https://blog.cassiopeia.center/bajkalskij-retrit-kassiopeya-otvety-na-voprosy-zri
https://www.youtube.com/watch?v=pUA2auU1IzE

0:07 Welcome to the participants.

Irina: Hello, dear friends! Hi all!

Maxim: Hello everyone! The most important and most interesting question for us is how can we be heard?

Irina: How can you hear us?

Maxim: Hello everyone! How can you hear us? Today we have a simulated chat. Novokuznetsk, Donetsk looks and hears, ok. So I don't understand, can you hear us well? Okay, everything is great!

Irina: Great!

Maxim: Hello everyone! We have another broadcast. This broadcast is dedicated to our upcoming Baikal retreat. This will be a very interesting, grandiose event. This will be a very interesting retreat for us, because what will happen there will never happen again. There we will communicate with Hambo Lama Itigelov. We are planning a conference with him there. You will be able to ask him questions personally. We have a meeting planned with representatives of two bases of alien civilizations located on Lake Baikal. You will be able to ask them questions personally. These are the Tikhtian and Pleiadian

bases.

Irina: Only in the Astral.

Maxim: Yes. For now, according to the rules of the Interstellar Union (IC), direct contacts of this kind are prohibited. We can only give feedback while not in the physical body.

Irina: Question for Maxim. Are you ready to become and be the head of planet Earth?

Maxim: I think that it is now very early for me to be some kind of head of the planet. I should at least remain the head of the structure that we created - this is the Autonomous Non-Profit Organization “Health Center for Spiritual and Physical Development “Cassiopeia”. At this point in time, I am completely satisfied with being the leader of this project; I will definitely not talk about any head of state or planet for now. I believe that every specialist should be attuned to the energy in which he can develop and grow. At this point in time, I am growing and developing as a project manager.

Irina: Will there be a “Purple Heart” practice on Friday?

Maxim: This Friday there will be no “Purple Heart” practice, because this Friday Irina will be on the plane. You will have meditation. With whom?

Irina: With Larisa.

Maxim: No, the meditation will not be with Larisa.

Irina: With Svetlana.

Maxim: No, not with Svetlana. We will have a master.

Irina: What's her name?

Maxim: I'll tell you now. Martha!

Irina: I don't know Marta.

Maxim: Master Marta will be there. She also has very interesting meditations.

Irina: We know her, but how she leads meditation...

Maxim: Our interstellar friends approved Martha, so I'm sure. Yes, Martha, the guys wrote everything correctly. Martha has very interesting energy and very interesting meditations, like all the specialists in our Center.

When is your next conversation with Jesus? Oh, you asked a good question. Until the thirty-first, right?

Irina: We will communicate at the conference, and when will the recording be?

Maxim: Yes, we have a conference planned on the thirty-first. And it will go on air, I think, within a month. We have records there for about five months already. Quietly the moderators expose. But we will put up the fourth conference with Jesus within a month. Maybe I'll continue talking about the Baikal retreat then?

04:24 Baikal retreat program.

Irina: Yes. Let's. Hello, dear friends! Now Maxim will tell you about the Baikal retreat. Very interesting. I know that many of those who decided to go there are waiting for a detailed story about this, and I also think it will be interesting for you. Maxim, please tell me.

Maxim: Yes. Regarding the Baikal retreat. If you want to know more details without waiting for me to tell you, there is a link below this video. By following this link, you can even get to this retreat. At the Baikal retreat there will be a huge number of masters, a huge number of different practices. Those who come to the Baikal retreat will receive the maximum range of all possible energy sensations. Cosmoenergetics will be with cosmoenergetics together with Ivan Yonten. Morning cosmoenergetics classes will be held at Donation. Evening classes and cosmohealing practices with our beloved Guzel, you can do live.

Irina: They ask you to sit down.

Maxim: Hello everyone! I'm wearing this home jersey. I'm always somewhere on the move. I just want to tell you approximately the program of this Baikal retreat. Cosmoenergetics in the morning with Ivan Yonten and the masters of cosmoenergetics. In the evening you will undergo cosmohealing sessions with our wonderful Guzel. The most interesting thing is that in addition to the fact that they will conduct practices, Ivan Yonten and Gulya will conduct personal receptions. You will be taken to mental healing classes. This is also our most interesting project. Highly qualified psychologists, esotericists, and energy practitioners will conduct mental healing classes.

Along with energy practitioners, specialists in physiology, visceral massage, and bioenergy-informational massage will come. They will be able to accept you and give you feedback. There will be doctors with Oberons. You will be able to get tested by doctors on Oberons. There will be psychologists and esotericists with “Crownoscopes”. You will be able to not only look at your physical body, but also your energy bodies.

We have two threads. There is a first thread, and there is a second thread. They are almost identical. Your whole day will be spent in constant practice, in constant training, in constant movement. You will not have free time during training moments. We have amazing excursions planned for you to choose from. You and I will decide which excursions we will go on in the flow that will come.

Energy practices, physiotherapy, testing, excursions, training with Irina, training with Ivan Yonten, training with Ilya. Everything in this retreat will be very structured, and all the people who go there will receive not only training, not only feedback, but also the opportunity to communicate with representatives of extraterrestrial civilizations and with Hambo Lama Itigelov, who is now in the Spiritual World.

Guys, I read all your messages. I understand everything perfectly. Now we will begin.

Irina: (Question from the chat) “ There will be no excursions to the Tikhtian base?”

The most interesting thing is that it says: “Good evening, Bucharest!” Hello! Here it is written: "Bucharest". And I read: “Good evening, Burkhad is here.”

Maxim: There is Burkhad, right? Guys, I leave Irina to you. There is a link below this video. You can follow this link and get acquainted with the retreat and the events that will take place. If I'm not mistaken, I spoke with Evgeniy yesterday, in my opinion, there are still places for the second stream. You can fill out the form. Fill out the form. A specialist will contact you on the same day or the next day and give feedback. Guys, I'm not saying goodbye. I'm nearby. I will help Irina broadcast this broadcast.

Irina: Hello, dear friends! So, we are on the air. Today is the last live broadcast before the retreat to Baikal. We will try to broadcast live from there, if possible. If there is an Internet connection, we will try to broadcast live from there and tell what is happening there.

Maxim: Yes, by the way. We promise you that if there is Wi-Fi there, we will conduct some classes from there and broadcast live from our retreat on our YouTube channel, so that you can see live what we are doing and how we are doing it. I think we will try to do a live broadcast when we have a conference either with the Tikhtians or with Lama Itigelov. Let's try to do this. I don't know how it will work out.

“Adjust the sharpness.” We're fine with sharpness. There's something wrong with your sharpness. So. Well, galactic news.

10:33 Introduction of participants.

Maxim: Who is present with us today, Irina?

Irina: LiShioni and MidgasCaus are with us today, as always. MidgasCaus has already told me that while we are on Baikal, he will still fly on his plate to the base of the Tikhtians and Pleiadians, although he has never been there.

Maxim: Will MidgasCaus arrive?

Irina: To the base where I was. (Mead speaks) And I’ll also fly to the Pleiadian base, where Kirchiton didn’t take you, and I’ll also talk to them. I was not there either physically or in the Astral. It is on this basis. There will be news, yes.

Maxim: So, intergalactic news. Mid, what's our intergalactic news this week?

11:21 Civilization of the planet Tuniroix. Construction of a Tuniroish base on the Pallas asteroid.

Irina: Intergalactic news. LiShioni from the planet Shimor, MidgasKaus from the planet Esler, greet you! (MidgasKaus speaking) I heard from galactic news reports that representatives of the planet Tuniroish, on which creatures similar to insectoids live, but more similar to (he shows me a spider), I will now describe, okay. These are not mantises, as with Sho-Hariki, but like spiders, only their legs consist of twelve segments. They move and can roll.

Maxim: God, so many different passions! Is this in our Galaxy?

Irina: This is in our Galaxy. It is located in the constellation Cepheus.

This civilization entered the MC about four hundred years ago.

Maxim: Are these spiders in MS?

Irina: Yes. But they did not have their own perfect space technology. The planet Sho-Hariki is in close contact with them, because they have a mind similar to theirs, only it is not a group mind, like Sho-Hariki's, but a solitary one. They are not insectoids, but like arthropods.

Maxim: Arachnoid?

Irina: He shows me that they are not predators, but feed on tree sap.

Maxim: And what is going on there?

Irina: They acquired spaceships suitable for their race and equipment for creating bases from representatives of the planet Sho-Hariki. Now they are going to build a base in the solar system. In your solar system. The first representatives have already arrived. Yes, I'll tell you where now. It's in the asteroid belt. On an asteroid called Pallas.

Maxim: Great! So we will have spiders on the Pallas asteroid?

Irina: Their goal is to study the solar system. Exploring Mars. Exploring the Earth. Astral contacts. They cannot make physical contacts with earthlings, because their physical characteristics of your planets are too different. They can only get there in protective suits, not just suits, but in some kind of capsules.

Maxim: Do they even know that people may not be very friendly towards arthropods, large, intelligent ones?

Irina: Everyone is discussing this news now. I haven't contacted them yet. I myself have not been to this planet. I only found out about it a few days ago. I just saw its name in the directory, but I was not familiar with its representatives. Now this is news.

Maxim: Interesting news. I don’t even understand whether she makes me happy or not.

Irina: The Pallada asteroid is now almost two and a half times farther from Earth than the Sun.

Maxim: Further than the Sun, right?

Irina: He is still changing his orbit. It revolves around the Sun along with the Asteroid Belt and its distance changes. Pallas is a celestial body, an asteroid. This is a fragment from the planet Phaeton.

Maxim: Listen, Mid. I just have a question.

Irina: Maxim, I’m shocked too! (comments from viewers).

Maxim: I’ll ask the right question now to make it clear. Many contactees said that some arachnid insectoids were heading here to us and wanted to take over our planet.

Irina: I'll tell you now. It has a round body, about five and a half meters in diameter. This is the average size of a representative of this Tunirois civilization. And the length of its limbs is about twelve meters.

Maxim: What if they get it into their heads that they need to capture us, and what will we do? Could this even occur to them?

Irina: Their permanent presence on Pallas will be in the form of biorobots and their specialists. They are planning a small, permanent base on Pallas, no more than seventy specialists.

Maxim: So the guys ask: “Why didn’t they find any other place other than to build in our solar system? What do they want to do with us?

Irina: I want to talk about Earth. Since we are actively in contact with earthlings, the Cassiopeia project has appeared, and information about the Interstellar Union is spreading.

Maxim: Tell me now that they will be in contact with Cassiopeia. Half the people will now be scared and say: “Cassiopeia is now friends with spiders.”

Irina: He takes me there in the Astral. This is what he loves.

Maxim: Now they will say that “Cassiopeia” has now given itself to the spiders.

Irina: They write that Penny Bradley is good at taking selfies. I do not know what is this.

Maxim: Well, guys.

Irina: They are from the constellation Cepheus.

Maxim: Two options: “We are them or they are us, yum-yum.” You hear what they say, what they think already.

Irina: No, they can’t even eat insects, they just drink the sap from local trees. These trees are similar to your banana trees.

Maxim: Oh, guys, congratulations to everyone! Soon large, five-meter wide spiders will appear in our Galaxy.

Irina: They first submitted a request to Burkhad for construction within the Earth or the Moon, but since there are already enough bases here at the moment.

Maxim: Did you want to build on Earth?

Irina: Yes. They were given space now because they had not yet explored the entire solar system. Yes, I'll tell you now. They were given a place. Why did they know about Earth? Because Earth began to appear frequently in galactic news reports. From there the process of disseminating information about MS begins.

I want to tell you, dear friends, the more people wake up, as you say, that is, not wake up, but change their beliefs, mental attitudes, turn to a conscious life, to the understanding that you are not alone in the Universe, the more your planet becomes more noticeable in the noosphere of the entire Galaxy. There is a noosphere in the Galaxy. The noosphere of the Earth is an astral atmosphere; it is not an independent part, separated from space. It is part of the noosphere of the entire Galaxy. The more people appear who understand that your Earth is not the only intelligent race in the Universe, in the Galaxy, the more it attracts attention, because for other intelligent races it begins to glow with a bright light, because the understanding that you are not alone in the Universe is it is truth. And she glows.

Other races will also be interested in you. These Tuniro people are just one of many. We have a lot of civilizations that have heard little about you, and now they receive information about you, and not only from galactic news reports, but also from astral travel. The Tuniroish people are also good at traveling to the Astral.

Maxim: Yes, Volodya, they know about Cassiopeia.

Irina: They are informed.

Maxim: The Interstellar Union knows about Cassiopeia, so our spider friends know too.

Irina: He already wants to meet them.

Maxim: Actually, I'm just creating intrigue. I am in no way a xenophobe or a Russophobe.

Irina: Not a spider-phobe.

Maxim: I will gladly accept any representatives of any races. You could say that for starters, I communicate in such a tone so that you understand that in fact there is nothing terrible. This is fine.

Irina: (LiScioni speaks) Now you have been given this information, and through the contactee the reaction of the audience is read, what will be the attitude towards these creatures that are not like you. How much love, trust, acceptance there will be for them. This is all taken into account when deciding whether to prepare for mass contact.

(Write in chat) “Shake their paws, and God help them!” Right.

Maxim: Guys, before going to these asteroids, they made astral contacts with us one hundred percent, because they simply wouldn’t talk about placing their bases here. They considered us intelligent beings so that they could be nearby and study us. Well, let's move on, Irish?

Irina: Yes, we are all children of God. They write about meditation. Maybe we can answer the questions, and maybe there will be meditation at another time? I don't know.

Maxim: Guys, come to the meditations that we conduct.

Irina: They mean for the Earth.

Maxim: Yes. Come to the meditations on the Meditations channel. Plus, we conduct practices on the Interstellar Union (IU) channel. Come join us. There are no links under the video, but these links are under other videos. You can find all links to our projects. We already spend very little time, they swear that we spend a lot of time on my chatter. Therefore, we will answer your questions.

22:24 Creation by the Soul of other Souls.

Maxim: Irina, this is an interesting question. Can a Soul create Souls?

Irina: Soul Animals, yes, maybe.

Maxim: If this Soul is embodied in a thin-material plasmoid creature?

Irina: If this Soul is embodied in a fine-material plasmoid creature, then with its thoughts it creates a fine-material structure that repeats the outline of the animal, and puts into it those thoughts that then turn into the qualities of this animal.

Maxim: Can we say that the Soul can create Souls?

Irina: Yes, an intelligent Spirit can create animal Souls. In addition, any intelligent Spirit can create phantoms, that is, separate parts of its energy structure from itself and endow them with temporary tasks and characteristics. The Phantom, one might say, bears the imprint of this Soul. He flies wherever his owner, the Spirit who created him, orders him.

23:34 Contact Anastasia.

Maxim: Good question. Who is the taiga Anastasia that Vladimir Megre wrote about? Anastasia is a contactee with subtle-material civilizations, with the Spiritual world and with humanoid races.

Irina: With Ticht and Esler.

Maxim: Yes. We know about her. We will be happy to get in touch with her and will be happy to communicate with her if she has such an opportunity. We ourselves do not ask for contacts or dialogues. If she is interested in communicating with us and finding out our point of view and feedback, then we are always ready to communicate.

Irina: No, no one has stopped the meditation, I'm ready to do it, but after the live broadcast, we'll probably do it.

Maxim: Come on, in the last ten minutes of the broadcast we will conduct a meditation with you. We promise.

Irina: Yes, I personally promised Ashtar Sheran that we would carry it out.

24:33 Soul of a gorilla.

Maxim: If a gorilla was taught sign language, does it have an intelligent Soul?

Irina: The gorilla has an unreasonable Soul. Sign language can be taught. These gestures are remembered by the animal Soul. She also has a memory based on instincts, but she has no creativity, she has no imagination, she does not have the immortality of the Spirit. She does not have the characteristics that humans and other intelligent Spirits have.

Maxim: Mid, LiShioni, do you know information about the Kola well? This is the deepest well on our planet. Have you ever heard of her?

Irina: What exactly?

Maxim: Why was it closed?

Irina: You need to find out in the Earth database. You need to look at what year it was and find out in the archives. What year was this?

Maxim: Okay, I understand. This is not a question to your liking.

Irina: This is probably more needed for historians.

25:43 How to determine whether a person is a contactee?

Maxim: Question: how do you understand that you are a contactee?

Irina: Ask your Higher Self. When I lead a person to the Higher Self, we always ask the question: “Higher Self, am I a contactee?” The answer will be “yes” or “no”. If the answer is “no”, it is still necessary to clarify whether I am an unconscious contactee? It happens that the Higher Self answers only about conscious contact. I've seen this before. And it happens that he immediately answers: “No, you are not.” Or: “You are.” If the answer is “yes,” then it is necessary to clarify with whom the contact is made and for what purpose.

Maxim: The main thing is that the vocabulary of the specialist who leads you to the Higher Self should have an idea of what types of contacts generally exist in order to clearly define this contact. Therefore, you should always hire a specialist who has such information.

26:47 Spiritual name.

Maxim: How to find out a name in the Spiritual world?

Irina: The same thing, ask the Higher Self. I will explain first. (LiSioni says)

What is a name in the Spiritual world? A name is a definition by the spiritual essence of itself, as it calls itself. Moreover, the name of a spiritual essence can be the same as that of a person (the entire Spirit). The 70% (non-incarnate part), the Spiritual Self, may have the same name as the incarnate part. It happens. Sometimes a name that was in a previous incarnation remains with the Spirit. There is a name of the most significant incarnation, somewhere, on some planet. And there is a name that is specifically for the Spiritual world. He is always called by him, no matter what he is called in incarnations.

To find out this name, you also need to ask the Higher Self: “What is your name? What is my spiritual name? It will answer.

Maxim: Here we need to figure out what specific name we are talking

about, right? This may be one of the names of your great incarnation (relatively speaking), or this is what you called your Spiritual Self in some of the incarnations. We need to figure it out, I understand.

28:18 Phobias and past incarnations.

Maxim: Mid, a question for you. Is it true that phobias are somehow connected with past incarnations?

Irina: It happens, but not always. Phobias associated with past incarnations are hidden in the subconscious memory of the Soul, in the subconscious memory of the disembodied part of the Spirit and the embodied part - the Soul, until something happens in the current incarnation that reminds the Spirit of the past situation of this person. And then she wakes up.

28:56 Spiritual name of Irina Podzorova.

Maxim: Irina, they ask, what is your Spiritual name?

Irina: Spiritual name of my Higher Self? Alkiria.

Maxim: Alkyria. Everyone, now everyone knows. Alkyrie will now be attacked by Valkyries.

29:15 Evdokia Luchezarnova (Radasteya).

Maxim: Guys, you are asking about Anastasia Luchezarnova - this is “Radasteya”. Let me tell you this: we are ready to communicate with this person. She is cool! I know that a lot of nasty and negative things were written about her on the Internet. Guys, they also write a lot about us, but we don’t consider ourselves disgusting. If she wants, we will be happy to talk, give feedback, say who the curators are, who supervises. If she herself wants this video to be exhibited, we will exhibit it. We will not take any action without her consent. The Cassiopeia project operates only with the consent of each person. We are pleased to welcome Anastasia Luchezarnova to our broadcast.

She can find me personally, she can find Irina. There are all telephones. If she wants to communicate, she will communicate. If he doesn't want to, then, accordingly, we won't be able to give you any information.

30:26 Appearance of representatives of the planet Tuniroix.

Irina: They write: " More details."

Maxim: Color, how many limbs? Guys, we are currently preparing an almanac of races. With all the races with which Irina came into contact - in the Astral Plane, or in real time. We will prepare an almanac, which will be published in the future. All the races that exist in the Interstellar Union, there are a lot of them there, we will try to describe someday. This is impossible to do now.

Irina: The color (he shows me) is some kind of silver, some kind of metallic. This color (he tells me) is white, a little with something not purple, I don't know this color. Here's how to eat some kind of foil, a little with purple.

Maxim: Yes, guys, I'm sorry, Luchezarnova Evdokia, not Anastasia, everything is correct.

Irina: And they have eight limbs, which are twelve meters long. But under them there are six more additional ones, which are about twenty meters in length.

Maxim: Yes.

Irina: If anyone is interested, they have twenty-six eyes of different structures.

Maxim: Twenty-six eyes of different structures?!

Irina: Yes, they receive different spectra of electromagnetic waves.

32:08 “Inhabitation of demons” on Esler.

Maxim: Good question. Mead, do you use exorcism techniques?

Irina: No, why do we need it?

Maxim: What, no one inhabits your Higher Selves there?

Irina: To the Higher Self?

Maxim: Mid, I was joking. Can aliens, low-vibration entities move into your structure?

Irina: We don’t call it getting addicted, but coming into contact with the spiritual channel so that it will replace the Higher Self, as if replacing the Spirit itself in the body. They begin to control the body through the spiritual channel.

Maxim: Yes. Is this possible for you?

Irina: This is possible on any planet with the consent of this Spirit that lives in the body. If he allows, if he allows to enter his body, then it does not depend on the type of body. It depends only on the coincidence of the personal vibrations of the Spirit, which is embodied, and the Spirit, which is inhabited. Do you now mean plasmoids or disembodied Spirits? As I understand it, non-incarnated demons?

Maxim: Yes. Because exorcism is aimed at driving out demons.

Irina: As much as I saw through contactees on video recordings of exorcism sessions, it was clear from the energy that in almost 80% of cases it was all about plasmoids.

Maxim: Mid, do you understand what’s the matter?

Irina: So low vibration.

Maxim: I absolutely agree with you, in terms of the fact that our church does not distinguish whether a plasmoid is destructive with an incarnate demon, or just a demon. For them these are all demons. And even you, aliens, are also demons.

Irina: Are you Angels? Your civilization doesn't consider itself Angels?

Maxim: How does it not count? We only have Angels here. We don't have demons, what are you talking about? Do we have demons here? Not a single demon. Now you ask anyone - they are all Angels. There are no demons. Yes.

Irina: (Question from chat) " Why doesn't Irina write?"

Maxim: He writes. Books coming soon. We entered into an agreement with the Eksmo publishing house. The first book, "The Diary of a Contactee," will be released soon. Vladimir Goldstein is helping us publish this book. He is here in this chat. Volodya, write to everyone how we are there, has the book been finally prepared, based on Irina's materials or not yet?

35:04 Is it dark at night in the center of the Galaxy?

Irina: (Chat question) "Is it dark at night in the center of the Galaxy?"

Maxim: I wonder, is it dark at night in the center of the Galaxy?

Irina: (They both laughed and said) In the center of the Galaxy there is neither day, nor night, nor evening, nor morning. The Sun does not rise there as it does on Earth. If we are talking about the center of the Galaxy, then it is always very, very bright there, because there are millions of stars that are close to each other. Several light years away, practically. Their light intersects with each other. These are like globular clusters of stars. And all this will shine millions of times

brighter than the Sun.

35:55 Books for children from Cassiopeia.

Maxim: Yes, guys, there are books for children, but in the near future, we will not be publishing books for children. Because we clearly understand what a state is and how we need to position ourselves correctly in this state. We are still a very young movement, and we should take a closer look. Understand how constructive we are or how destructive we are for the state. After we pass some checks, then we can talk about releasing books for children. For now we will not publish books for children, because children are the flowers of life. They are under state protection. In no case would I want to violate the foundations of our state. And join harmoniously into our political system. Therefore, there are already books, but we definitely won't publish them yet. Oh, by the way, Irina's book "Diary of a Contactee" will be published before the New Year. This is most likely done so that you can purchase copies and give them to each other.

Maxim: Why do different curators give lengthy answers to questions, but do not give specific answers?

Irina: The more specific the question, the more specific the answer will be. You need to ask a specific question.

Maxim: Yes. For as long as I've been around, you've been asking questions very vaguely. It seems to you, perhaps, that he is specific. In general, the more specific the question, the more specific the answer.

37:34 Creator of space. Universe.

Irina: For example. "Irina, the children ask who created the entire cosmos?" Specific question? Specific.

Maxim: Yes.

Irina: Quite specific. Space is a small part of the larger Universe.

Space is a dense material world, the physical Universe. In addition to space, there are many more worlds at different density levels. And the huge Spiritual world, which is at the same time huge, but is located in a small space, it is outside of time and space. That is, it is huge and fits into one point at the same time. All these worlds were created and supported by the Creator of the Universe, our Heavenly Father, the Supreme Mind, who is called God, the Absolute. He is the creator of the Universe. The entire Universe, all these Worlds are a small part of His energy. And we are the children of God, for whom he created it.

38:53 Races of the Ursa Major constellation. Race with 42 genotypes. A race of underwater creatures.

Maxim: Quite a detailed answer. Mead, are there any races in our Galaxy (do you have data) in which the genes of more than five species of creatures have been introduced? Let's say there are four of us: a primate and three alien races. Are there any races in which over five different creatures have been introduced?

Irina: Yes, of course.

Maxim: Yes, yes?

Irina: I know a race into which forty-two different genotypes were introduced.

Maxim: Forty-two different genotypes were introduced?!

Irina: Yes, we implemented it little by little.

Maxim: What kind of race is this?

Irina: You don’t know her. It is located in the constellation Ursa Major. He shows me a creature, all covered in fur, similar to the Yeti. This is not a Yeti. These creatures are also more than eight meters tall. (He's showing me now). They have white fur, but short.

Maxim: Who do they look like, at least externally?

Irina: Some kind of bear. They have a slightly elongated face. This race is still in its formation stage. They haven't gone into space yet.

Maxim: Primitive communal system, like ours?

Irina: What equipment do they have? I'll pick you up now. Almost like your Middle Ages. There are animal carts. There are some houses there.

Maxim: How interesting, in general!

Irina: This race even contains the genes of those intelligent underwater creatures that are also located in the constellation Ursa Major, but on a planet near another star that is intelligent and similar to your dolphins. These are intelligent Spirits, this underwater civilization.

Maxim: So, Mid, wait. From now on, in more detail. Is what Michael Newton wrote about an intelligent civilization similar to our dolphins an existing civilization?

Irina: Yes.

Maxim: Not Michael Newton, sorry. Melchizedek.

Irina: I haven’t read Melchizedek, but I know that such a race exists, and it is not alone. The closest one to you in our Galaxy is in the constellation Ursa Major. The entire planet, with the exception of small islands, is covered with water. In liquid form. Life evolved into animals, crustaceans, molluscs, etc. Fish, predatory fish, by the way, could evolve there to such a state that an intelligent Spirit moved into them. This mutation occurred thanks to the work of plasmoid civilizations, which were able to arrange such a body structure for them. The intelligent Spirit was able to inhabit them. So they continued their evolution. But they can't build their own spaceships. They cannot build their own equipment. They live in the depths of the ocean. Most likely,

due to this, they quickly joined the Interstellar Union, since due to the lack of technology they did not have wars. Because without any weapons, the powers of the two beings are equal, and there are no such large-scale movements.

Maxim: Very interesting.

Irina: Their genes were also taken to create this creature, which has forty-two genes.

Maxim: What is the purpose of creating such a creature with forty-two genes?

Irina: It was a biological, social and in some ways even a spiritual experiment, mainly by representatives of Tumesout. They wanted to create a being that would have forty-two characteristics, so that the Spirit that would incarnate through them in this race could reveal the qualities of all races. For example, the genes of dolphins allow them to stay under water for a long time, like your Ichthyander. Only they have no gills. They simply stop breathing and let oxygen pass through the vessels that come close to their skin.

Maxim: I understand.

Irina: It was a request from the Spiritual world. First, a request appears from the Spiritual World about what hybrids to create, in which the Spirits want to incarnate, and then the Spirits themselves, incarnating in those races, engage in the work of scientists, take the places of these scientists and create bodies for them. This is an agreement from the Spiritual world.

Maxim: Wow! It turns out like a computer game. In the Spiritual World they consulted and decided to create a creature. They sent the Tumesoutians, Burkhadians and everyone else there. They created a creature, and then the Spirits embodied in this creature. So?

Irina: Yes, you are absolutely right, if you look from the point of view of the Spiritual world, the material world does not seem like a computer

game, it seems like a place for embodying not only yourself as a Spirit, but also a place for realizing your plans.

45:18 Division of water molecules. The idea of a hydrogen engine.

Maxim: I understand. Irina, Mead, question: what kind of energy must be directed to the water in order for atoms to begin to divide? This is such a stupid question. A person must somehow answer it.

Irina: Just about water, what kind of energy needs to be directed in order for atoms to start dividing? Oh, not to divide, but so that the molecule probably begins to separate.

Maxim: Finally, yes.

Irina: Dissociate (he just said). It is enough to direct an electromagnetic field with a frequency of about twenty-nine (I transmit the background information as I remember), well, about twenty-nine gigahertz with a power of maybe a couple of megawatts. (He says that it is necessary to clarify).

Maxim: In principle, there is a possibility.

Irina: More pressure needs to be created.

Maxim: We have generators that produce hydrogen from water. There is enough electrical energy and some plates.

Irina: You can direct the energy of electromagnetic waves of a certain spectrum so that these molecules begin to disintegrate into atoms. When they disintegrate into individual atoms, the binding energy, which we call microgravity, will be released into the external environment for a short time. And if you manage to capture it and convert it into another type of energy, then much more energy will be released from the water than will be spent on it in the form of electromagnetic waves. This is how a hydrogen engine is created.

Maxim: We are now telling the secrets of the hydrogen engine, right?

Irina: They are, for example, at the Tikhtian base. They get energy from water there.

47:33 Can a Soul reincarnate in 40 days?

Maxim: I understand. Irina, a specific question. Can a Soul go into a new incarnation within forty days? Don't wait fifty years, thirty years, but within our forty days. Is it possible?

Irina: Theoretically, this is possible, but I have not seen such cases.

Maxim: Is this Mead answering?

Irina: Yes. (LiScioni says) I haven't seen such cases either, but theoretically nothing prevents one from incarnating.

The Spirit must incarnate after all the vital energy that it had at the time of parting with the body leaves it. The fact is that when the Spirit parts with the body, its life thread is cut off. Part of the etheric body, part of the vital energy remains in the organs. It gradually leaves them, dissolving into the surrounding ether, and the Spirit takes part of the vital energy with it. It will take about 40 days for this vital energy to dissipate. Only then can the Soul fully connect with its Higher Self when the energy dissipates. We say that the Soul becomes Spirit.

48:50 Natural antibiotics of the Earth.

Maxim: Got it. Thanks a lot. Mead, a question for you as a biologist. What is the best antibiotic on planet Earth?

Irina: Natural?

Maxim: Yes, is there a natural antibiotic?

Irina: Turmeric, ginger. Suppresses a lot of bacteria and fungi. Antifungal antibiotic. The fact is that antibiotics are called not only substances that suppress the activity of bacteria, but also those that suppress the activity of fungal forms. They are called antifungal antibiotics. Turmeric works against viruses, and so does ginger. And against protozoa, against helminths, against bacteria and against fungi.

Maxim: What can you say about black cumin?

Irina: Black cumin is also a very good antifungal agent against protozoa. More ginger (he says).

Maxim: Ginger root or ginger flowers, what do you need?

Irina: Ginger root. Moreover, in its fresh form its effect is twenty times stronger than from the dried powder.

Maxim: What if it’s just chopped and preserved ginger? Here we are eating sushi, and they give us pickled ginger. Is he the same?

Irina: You need to know what was added there.

Maxim: What kind of marinade was made, right?

Irina: Yes, what substance is there.

50:24 Cleaning water bodies from cyanobacteria.

Maxim: I understand. Okay, okay. We literally have nothing left. Last question, and let's go into meditation. Mead, how do you think the green algae can be cleared from the river?

Irina: Do you mean from cyanobacteria?

Maxim: Our reservoir, for example, in Voronezh blooms green...

Irina: These are cyanobacteria.

Maxim: Are green algae cyanobacteria?

Irina: Yes.

Maxim: How can you clean it? Or how can I clean it?

Irina: Many types of mollusks feed on them. (He shows me). You need a place where there is a lot of this algae, you must first clean it. Clear the river bed upstream of anything that interferes with the flow. The water stagnates, and they reproduce there, in such quiet places (if it is in a river). Perhaps make a current. In the place where there is a lot of these algae, it is necessary to bring in in the spring (as soon as the ice has melted, in about two weeks, as soon as the water warms up enough) (he shows me) ordinary shells and the pond snail that I showed you. They feed on them. And after a couple of months, when the number of cyanobacteria decreases, you need to bring in small fish or their eggs from carp species that feed on grass and algae. Small fish and their small children feed on them. (So Mead says).

Maxim: Yes, guys, many people refuse to communicate with us. I do not know why. But we have no fear of communicating with anyone. Not with any contactees, not with any regressologists. We are absolutely open to everyone. If anyone wants to chat, please, we are open. For our part, we are ready to give feedback on the structure of the Interstellar Union. By the way, we promised Ruslan Romanov long ago that we would dock with him.

Irina: We need to call.

Maxim: We need to call. We need to connect with him and find out if he has free time to broadcast. Ruslan, hello to you! We see you traveling. I'm watching you. Sometimes I see you on VKontakte, sometimes I see you on Instagram. A huge hello to you! I hope that

someday we will connect and broadcast live. So. Well, Irina, meditation?

Irina: Give me a little drink.

Maxim: Now I'll bring you some water. By the way, I forgot to tell you. A little man called today. He offered us a meeting with Uri Geller.

Irina: Oh, I see. Thank you.

Maxim: Uri Geller is a magician, a showman.

Irina: We need a translator, I don't know English.

Maxim: With a translator. They said that we would be tormented by very serious questions, and asked you to think very seriously about whether you are ready to date him.

Irina: Yes, I'm ready, why not.

Maxim: So, I'm ready.

Irina: He needs to watch at least some of the videos we have in English. At least something.

Maxim: They said that I watched it, I don't know.

Irina: I watched it, then it's good.

Maxim: Although, I think Uri Geller has no time for us.

Irina: Simply, these very serious issues could have already been considered. Here, too, people ask very serious questions.

Maxim: Yes, we will bend spoons on air. I can even show the trick once again how spoons stick to me.

Irina: Yes, we will show him too.

Maxim: We'll show him our tricks. How spoons stick to the grafting site.

Irina: Irina, we love you. Thanks a lot! I love you very much too!

Maxim: An anecdote about a mamba. You know? Kolya loves mamba, Olya loves mamba, and mamba hates everyone. Haven't you heard the joke?

Irina: Does Kolya love mamba?

Maxim: Olya loves mamba, but mamba hates everyone.

Irina: (Mead speaks) There is not enough love, which means they are sending. We need more.

Maxim: Not enough love is sent to the mamba?

Irina: Otherwise he wouldn't hate them.

Maxim: Irish, there is literally little time left.

Irina: (Question from the chat) " Is vacuum present in the entire Universe?"

Maxim: Irishka, meditation. Guys, please write, are you ready to spend the last ten minutes of the broadcast on meditation? If we see now yes, yes, yes, yes.

Irina: If you want, I will continue to answer questions. If you want, I'll do a meditation.

Maxim: Whatever you decide, that's what we'll do. If you also give us a like, that would be really cool. Yes Yes Yes. That's it, meditation, Irish. People are ready to meditate.

Irina: Wow! I see it already.

Maxim: Everything, everything, everything, I agree!

Irina: Lord, there are so many of you!

56:57 Meditation "Cleansing the Earth's noosphere."

Maxim: So, Irish, let's go.

Irina: Okay, okay. Fine. We have so many people, in fact. Okay, let's do the meditation. I'll tell you how it goes. We just close our eyes. First we focus on our breathing. Then we imagine the image of the Earth in front of us. We mentally extend our hands to her and fill her with Light, while we say our brightest wishes. You can repeat after me, you can say your personal wishes. The main thing is that they are positive, filled with Light and Love. Just mentally hold the globe in your hands, you can stroke it, you can direct the Light. If we do this collectively, the Earth feels it very strongly. Her noosphere is cleared around each of us who does meditation, and for many kilometers around. LiShioni and MidgasKaus in the Astral Plane have already taken a meditative pose. They will also do this meditation with us in the Astral Plane.

Maxim: We have a great meditation today. One representative of the Esler civilization and another representative of the Shimor civilization will meditate with us today. Then I will also meditate.

Irina: Maxim is also joining.

Maxim: I'm joining you guys. I sit in a meditative pose.

Irina: (They speak) We are joining too. We love this planet as if it were our own, even though we were not born here. We, too, will be happy to invest part of the Light of our Soul into the cleansing of the noosphere.

Maxim: I'm ready.

Irina: Okay. So, dear friends, I ask you to sit comfortably, lean on something and relax, like this. We do not cross our arms and legs. We arrange them so that you are comfortable, so that your body does not distract you.

Dear friends, I ask you to close your eyes. It's easy to cover your eyes. Let's concentrate on our breathing. We take a slow breath. Let's relax. Watch the air leave your body. All the worries and problems of this day leave you with the air. Breathe the Light into yourself. Inhale Divine Love into yourself and fill with it the space occupied by problems. Great!

Now mentally imagine the Earth in front of you. Right before your eyes, imagine it hanging in front of you. Imagine it the way you saw it in the pictures, or in the form of a globe. There's no need to strain yourself too much. If you don't see it, you simply don't have sufficient imaginative thinking yet. Just know that it's there. Over time, the vision will appear. Imagine it in a relaxed way. This is the main secret of the success of this technique. Fine!

Now mentally, do not strain your physical arms, do not raise them, relax completely. Raise your hands mentally. Just imagine that you are extending them towards the Earth. Take another breath and as you exhale, imagine how a stream of pure white Divine energy flows from your Spiritual Heart through your hands. He goes straight to the Earth, cleansing all its shells, its entire atmosphere, all living beings. Divine Light passes through your shoulders, through your elbows, through your hands. It flows from your fingertips. With every inhalation and exhalation you increase the flow of Divine Light. Now we all feel each other. We feel each other by the kind of Light that comes from us. It is increasing.

Channel the Light and speak. You can speak your own words, you can repeat after me mentally: “I am Light created from Light. I am the creative Light. I am the creative Light. I am the loving Light. I am the stream of Divine consciousness. With the power of my Spirit, I cleanse all the shells of planet Earth from everything incompatible with Divine Love. I ask my Heavenly Father to conduct a stream of Light through me and direct it to my beloved planet, to my Homeland. Divine Light cleanses the entire lithosphere of the Earth, the hydrosphere of the Earth, the atmosphere of the Earth, the biosphere of the Earth, the noosphere of the Earth. I send the Light of my Love to all people living on Earth. I send the Light of my harmony to all Spirits embodied at all levels of density within the terrestrial space, all plasmoid civilizations, Spirits of nature, all disembodied Spirits from any spiritual levels that are next to the embodied Spirits in this space at all levels of density.”

You can speak your own words.

Now let's take another breath and fill the Earth. If you see a dark spot somewhere, direct the Light there. If your Light is not white, but purple or blue, this is also normal, this is the Light of your strongest chakra. Simply fill it with Light. Great!

Now thank your Higher Self, thank your mentors and curators, and each other for this group meditation to cleanse the Earth. Now you feel the response energy from her. Breathe it into yourself. Inhale with the intention of receiving it, spreading it throughout your entire body, throughout your entire aura. Say: “Thank you and I accept!” Love and blessings! I promise to use this energy to develop unconditional Love.” Fine.

Now I will count from one to five. When I say five, you will return to your normal state of consciousness and fully connect with your bodies. One two three four five. Open your eyes.

I congratulate you, dear friends! We had a very good meditation. I felt the flow from all of you. I felt the flows from you, Maxim, from you, LiShioni, from Mead, and I directed them myself. And from all of you. I saw such a huge Earth in your common space.

Maxim: Someone filled it with hearts. I'll even show you.

Irina: Thank you very much! How many hearts do you have, thank you!

Maxim: Thank you, Irina, LiShioni, MidgasKausa! Cool meditation!

Irina: Yes, I see your reviews.

Maxim: Guys, thank you very much for being with us on the live broadcast. Thank you very much for supporting the project. We are now leaving for a Baikal retreat. And I hope that now I will find a team that can pour the foundations for our center. There are two foundations for two buildings. Yes, we will have two buildings next year.

Irina: Sending messages. Look what they write there.

Maxim: Guys, I thank everyone! All our craftsmen, all the people who support our project. And I promise that all your support will go towards the construction and education of centers around the world. Where you and your children will come, study, relax, get healthy and receive all the benefits of the project in which you invest everything when you help us.

Under this video there is a link to the Baikal retreat. You can see what will happen at the Baikal retreat. I look forward to seeing everyone at this wonderful, grandiose event that will never happen again. It will be held once on Lake Baikal. It will be completely filmed on video cameras, will be broadcast live and much more.

Irina: Traditional question after practice. What shape is the Earth?

Maxim: For us, for humanoids, it’s round, for plasmoids, it’s flat, and for those who have elephants in their ears, it stands on elephants.

Irina: Thank you for the meditation, for your Light, for supporting our

project on all levels - spiritual, social and material! I send you the Light of my Love and wish us all a successful retreat!

Maxim: That's it. See you at the retreat! Hugs to you all tightly!

August 30, 2021.

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni - representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

May 20, 2023

#345 Extraterrestrial intelligence about the consciousness of earthlings. How does human thinking work? Spirit Structure

https://blog.cassiopeia.center/vnezemnoj-razum-o-soznanii-zemlyan-kak-rabotaet-my
https://www.youtube.com/watch?v=2Xqk6QoEjDY

00:21 Introduction of participants.

David: My name is David, last name is Schmidt. Doctor of Psychology, Professor at the University of Geneva. I am a pensioner, I am still 80 years old. Former military. In general they say he is a good person.

Maxim: Hello! My name is Max.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Next to me is our curator - Raom Tiyan from the planet Burhad, a specialist in energy interactions.

And we were joined by LiSioni from the planet Shimor, a specialist in astral interactions.

They consider everything in the world: all substances, all fields to be forms of energy, therefore they are based on energy interactions. It's like our physicist-chemist at the same time.

Maxim: We have a video where they clearly talk about the structure of the universe. How everything is made of energy, what energies are, and how they are formed.

David: If this is an appeal to me, then I imagine it a little. Because in the world, except for energies that differ in wavelength and density, there is and cannot be anything. Everything is created in the image and likeness. This is my long-standing belief.

Maxim: Do you believe in the existence of the Spiritual world?

David: Do I believe it? I am convinced of this.

Maxim: This can also be called energy from which other types of energy are obtained, reducing its frequency.

David: Absolutely. We live in an ocean of energies. Task: our dense world is controlled by those who own the energy carrier. Who owns: oil, gas, nuclear energy, electricity. They rule the world. More precisely, they think that they rule the world.

As soon as these energy carriers are moved to the side, then new energies must somehow enter into the management of the dense world. This probably would have been done a long time ago. Because I think so, I suspect that there is a technology for obtaining energies. Transformation of energy not by solar panels, but by other converters.

The question is: why is this not being implemented, is it lying under the carpet? Because reverse control of this energy is needed. There are no problems now. I got the oil, refined it into gasoline, and sold it. That is, I control all energy consumers. Today this is all well worked out.

As soon as the reverse control process is worked out, then a new energy structure should be launched.

Is there such a plan? And isn't that what chipping, management, etc. are planned for? by all people? When, if I put a chip in people, I can control one hundred percent, then develop new types of energy. Not me, of course, but those who think they rule the world.

Maxim: I walked away, I feel they are approaching chipping.

Irina: Yes. David was now talking about who holds the energy in his hands.

Maxim: I understand.

Irina: That now they will make some other generator that receives energy differently, because control will be lost. I understand correctly?

David: A kind of converter, and a generator is what generates energy.

04:45 Transformation of energies.

Irina: (Raom Tiyan) In the Interstellar Union, there are converters of different types of energies one into another, different designs from different materials, there are more than one hundred different technological solutions. Specifically, the Interstellar Union uses different converters for its different needs.

Some earthlings, as far as I noticed, also call converters generators, or even batteries. People who are far from physical concepts have a very difficult time understanding the difference between different types of devices. But you also know converters, for example, of heat into electricity.

Maxim: David, I was away a little, but I caught your thought. I agree with you.

David: Let's keep it simple. Specific question: How do they control this energy? So we took solar energy from space without a battery. We transformed it, and every person can do this when we gave the technology. How do we control it?

You see, as soon as this technology is developed on the planet, the types of energy that we use will disappear, because this is the murder of the Earth. We are extracting oil and gas.

Maxim: We pull metals out of the Earth, heavy, light, and radioactive - we pull everything out of the Earth.

Irina: (Raom Tiyan) For some converters there are types of alloys and metals, one might say they also exist on Earth. They are just less common. There are planets and asteroids in outer space, for example, consisting of almost pure iridium. It is a very useful metal for some alloys, which converts one type of energy into another.

How are they controlled? Indeed, if every person or every member of society has access to energy that can be obtained, I would not say unlimited, of course, the amount is limited by the converter itself, which

can be set at the level of legislation, etc.

The point is, as you said, these types of energies that you have now will actually fall away. Why? And not only because these technologies that are now killing the Earth, but for another reason. Those species that exist in the Interstellar Union are simply more efficient.

David: Many times.

Irina: (Raom Tiyan) They have tens of times more efficiency and the device is even simpler than that of a conventional electric motor.

In addition to the converter itself, electronic control of the converters themselves is required. We do this with the help of nanotechnology, that is, the same nanochips, only these are technical nanochips that are embedded in this device and themselves, without human intervention, without the participation of the mind, convert this energy and direct it, for example, to light and heat.

David: What if I have no control? How much can those thinkers who rule the world control me? You see, I become independent from the world around me.

Irina: (Raom Tiyan) The thing is that not every power structure needs control over energy. Most often, control is needed over ideology.

David: Most living people don't care what ideology there is. He is a simple man, he needs bread, circuses and a roof over his head.

Maxim: (addressing David) I'll tell you now: we, earthlings, have two hemispheres. And they have one single brain, and it does not feel the subtext in your question. Please ask the question correctly, without subtext. The question is not specific. Ask a direct question, because he is not an earthling. He is not interested in how to control. He can explain the processes.

Irina: Why does he need control? He does not understand…

David: I understand. He went through a long time ago, many thousands of years ago, the process that we are going through.

Maxim: Millions of years.

David: Yes, millions of years.

10:34 Deception in the Light of Truth.

David: There is a good question: which person is the easiest to deceive?

Irina: (Raom Tiyan) What is deception?

David: Deception is untruth, unreliable information. So you can say.

Irina: (Raom Tiyan) The easiest way to deceive someone is to create a desire to accept this image as truthful.

David: And I would say this: the easiest way is to deceive a saint. A person sees only what is in him. A policeman sees a policeman in every person, a thief sees a thief. A scoundrel, outwardly he does not seem to be a scoundrel, but if he sees a scoundrel, it means that he has his own meanness.

A radio receiver only receives the wavelength at which its local oscillator is tuned. Therefore, when I watched your conference with reptilians, I was very interested: are we or our robots checking spaceships? They don't think that they might be deceived. They have already gone ahead spiritually for thousands of years. They have no idea: how can they kill their own kind? Or steal from someone like yourself?

Irina: (Raom Tiyan) Deception, if it is a conscious deception, in any case is generated by some kind of fear. The being that you called a

saint simply lives in a different paradigm of reality, and is inaccessible to this fear. Therefore, even if he is deceived, if he believes it, in the Light of Truth he will feel that they want to exploit him. There must be some purpose for deception in any case.

He will feel it. Because in the Light of truth, deception does not exist. He will see true intentions through his intuitive channel.

David: He will see it. But since he is a saint, he will perceive this as: “So people need it that way! Because I love people."

Maxim: No, I’ll tell you how he takes it. He will say: “God has a different lesson for this man. And I, as a person who understands this, will accept this with goodness and send him the Light of my Love in order to speed up his lesson of interaction with space.”

David: Absolutely right! It seemed exactly the same to me. Your supervisor's response is that they perceive the actions of lower vibrational reptilians, etc., without questioning their words. They have no idea that they can be deceived.

Maxim: David, you need to pause for the dialogue to take place. Sometimes dialogue occurs in interaction. We need to wait for the answer, because it is not always monolithic.

15:32 The work of the human brain.

David: Got it. Here's what else I'd like to know. The human brain works at 15-17% capacity and is the main consumer of oxygen. A muscle can work under anaerobic conditions, but the brain cannot.

For what reason? Due to the decrease in oxygen on the planet, or for some other reason, our brain works only at this percentage. It’s not me who thinks so, but Academician Bekhterev. I have a weak relationship with the brain.

Maxim: More question for Mid.

Irina: (Raom Tiyan) They studied the same thing at Burkhad. We are considered your creator race. And I can say that the brain, due to its metabolic characteristics, cannot work under anaerobic conditions, because it does not secrete those substances that will help to be effectively broken down under these conditions by the same ATP, ADP, etc.

David: I agree! Why only 15-17%?

Irina: (Raom Tiyan) If you look at the neural network, then to one degree or another all neurons are included in the work. But not all of it is noticeable to consciousness.

David: He claims that not 15%, but 100% of our brain cells are working?

Irina: (Raom Tiyan) Many brain cells are busy regulating, for example, the autonomic nervous system. They are involved in the regulation of the transmission of neurohumoral signals from internal organs to the brain. And then through him to the incarnate Spirit, which is connected with him by consciousness, and in the opposite direction.

Many neurons of the brain are busy, for example, comparing the sound picture of the world, which arises in the auditory cortex of the brain, and the visual picture of the world, which arises in the visual cortex of the brain. And this still needs to be compared with each other.

To this are added the receptors of the olfactory cortex of the brain, gustatory, gravitational, etc. There are several of them, and all this needs to be compared into a single picture of the world in which the Spirit can receive information, develop and make some decisions. This is not as simple a job as it seems at first glance.

David: As a result, our brain works almost 100%.

Maxim: Yes. It’s just that the potential of this work is underestimated by the level of awareness of the person’s perception.

Irina: (Raom Tiyan) Different groups of neurons work with different intensities. Those that you named, 10-15%, are that part of the brain's neural network, which also includes axons and the intermediate substance of the brain that feeds them.

This 10-15% is the part of the brain's neural network that is involved in conscious activity. Everything else is involved in the reactions of the body and internal organs.

David: The service part.

Irina: (Raom Tiyan) The brain affects the immune system. In 80% of sleeping neurons, those 10-15% that are more activated in their beta rhythm during wakefulness will not work.

19:10 Melanin and its functions.

David: Great! The next question is: does he know such an element of our cell - melanin?

Irina: (Raom Tiyan) You call it a hormone. He does not exist alone. There are many types of them. It is mainly produced by the pineal gland and pineal gland. But according to the knowledge of the Interstellar Union, there are 6 types of them.

David: The main function of melanin?

Irina: (Raom Tiyan) The main function of melanin is to desynchronize the astral and physical bodies so that they can disconnect and connect back.

Regulation of emotional processes. When the Spirit experiences any emotions, certain hormones are produced in it. And in order to metabolize these hormones so that they are excreted from the cells, it is necessary to release dopamine, melanin and other substances.

David: This is very pleasing. Because this is one of our statements, that this hormone is the conductor, like in a large orchestra. It is involved in synchronizing the biorhythms of all processes in the body. It connects the cell with the cosmos. There are a lot of discussions, and few people support my vision of this.

Irina: (Raom Tiyan) MidgasKaus told me that earthly doctors use huge dosages of melanin to treat sleep deficiency syndrome.

David: Yes. We are categorically against this.

Irina: (Raom Tiyan) I want to say that not only that in an acidic gastric environment, naturally, melanin, like any protein, will be decomposed into amino acids. And, naturally, it can be administered through the lining of the oral cavity, in injections.

But I want to say that the melanin that is artificially created in your factories penetrates the blood-brain barrier by several percent. And it does not have the same effect as natural, naturally produced melanin by the brain itself. Because melanin, in its molecular structure and the architectonics of its molecular connections with other hormones, is completely unique to the body of the person where it is created.

David: Thank you! This is 100% backing up my statements. This, as they say, is a balm for the Soul.

22:32 Genetically modified products.

David: Next: we have a genetically modified product. Do they know what it is?

Irina: (Raom Tiyan) Yes, of course. Your bodies are also a genetically modified product.

David: By using genetically modified foods, do we change the density of cellular fluid or cellular electrolyte?

Irina: (Raom Tiyan) Everything very much depends on the type of gene that was changed, and on the group of proteins that can be released during mitosis of the resulting cells.

I have studied the creation of your genetically modified organisms. Your scientists do it. But due to a lack of knowledge, due to the lack of advanced technologies for more precise capture of individual genes, it turns out that one gene is introduced to change one property of the organism. But unbeknownst to them, it turns out that a neighboring gene can be changed. There may be a completely different property of the body that was not planned at all.

David: I see. They wanted a cow, they got a pig. The next question is global: why was a genetically modified product imposed on humanity? What's the point of this?

Irina: (Raom Tiyan) It depends on what they are used for. For example, in medicine.

David: No, we take food.

Irina: (Raom Tiyan) For example, most often this is used to minimize efforts in some process. If this is a plant, then plant growing. If this is the production of insulin, then, accordingly, since the number of diseases with diabetes mellitus is growing, then the insulin that was previously extracted from the pancreas of animals is naturally not enough. You can't raise that many pigs.

Therefore, they were forced to change the genes of E. coli in order to genetically modify it. So that it secretes insulin instead of its metabolic substance. And some other drugs are made this way to minimize any effort. For example, to induce some property that was missing, but which may be beneficial for this plant, so that it produces more fruit. More yield, less damage from producers, etc.

But I want to say that, unfortunately, these properties are not always predictable by you at the moment.

David: Why is this being introduced to humanity?

Irina: (Raom Tiyan) With the growth of the population on Earth, there will inevitably be a process such as urbanization. It will happen even faster in the future. Because in large cities the population is growing much faster than in rural areas.

Firstly, the infrastructure there is developed. Secondly, there are more people there who want to engage in procreation for many social reasons, we will not touch on them now. It follows from this that we have two groups in your society.

One that grows the fastest and lives in apartment buildings. What is different about an apartment building? Because many people can fit on a small piece of land. In any case, according to their instinct of self-preservation, they must eat something.

Those people who remain in the villages do not have time to grow products for the urban population in the usual, non-genetically modified way. Therefore, the more the world's population grows, the more actively these technologies will be introduced. Such seeds will be used in the future, when people will learn to use them more perfectly, so that they do not lose their taste and aroma. Now genetically modified products are inferior to their natural counterparts in these organoleptic properties, as well as in the content of vitamins and microelements. Not always, but in many cases this is true.

In the future, when your scientists improve this technology, genetically modified seeds, due to higher yields and lower costs for the same pesticides, herbicides and other substances, which also cost financial resources, and their processing also costs financial resources, will become increasingly cheaper. And natural ones are becoming more and more expensive and due to this, the amount of consumption is decreasing. And this will happen the faster the faster the population grows. This is a natural process, it is connected with each other.

To stop genetic modification, it may soon affect many other dozens of organisms that are not yet genetically modified, including not only plants, but also animals. Since the human body is omnivorous, it

consumes not only plants, but also meat...

Maxim: To stop this, you need to stop population growth?

Irina: (Raom Tiyan) One of two things: either stop population growth, or distribute the population more evenly across parts of the Earth. Evict most of the cities, distribute the land around them and resettle them. Or create biologically active robots that can grow natural products in the fields for everyone.

David: Isn't it easier to change human values?

Maxim: This is what we are trying to do in the project.

Irina: (Raom Tiyan) About the nutrition and reproduction of people. In any case, a person has a need to give birth to children and feed them. If one box of natural baby food costs about two thousand rubles, and one box of genetically modified baby food is ten times cheaper, then 80% of the population will take the simple route.

30:12 The rational spirit of man. Mortal Soul of an animal. Instincts.

David: Irina, the question is for your curator: isn't it easier and more correct to activate humanity's mind? In humanity, 4% of brain cells are responsible for it. The mind is the analytical part of the brain. Today the intelligence of humanity is lower than that of animals, lower than that of a tree. Not a single tree will plant its own kind, which will destroy it. Humanity is sitting on a branch and this branch is sawing.

His mind is so low that wouldn't it be easier to help humanity and activate his mind?

Irina: (Raom Tiyan) Do you call the part of it that is responsible for the spiritual mind the mind?

David: No, not only that. This is the analytical department of the brain, which analyzes any information received by a person - sound, taste, verbal, etc. For example, what is intelligence?

Irina: (Raom Tiyan) How it differs from an animal, we will now see. Man is the incarnate immortal rational Spirit, and the animal is the incarnate mortal Soul.

Man is similar to animals in that both creatures have an instinctive form of behavior. Instinct is a self-reproducing program of behavior of a living creature, aimed at its survival, reproduction and dominance over other creatures. Both humans and animals have instinct. In terrestrial animals and in terrestrial people they are very similar, because 45% of your genes came from primates, which evolved from other life forms and absorbed all these instincts.

You are distinguished from animals by the presence of the Spirit. There is intelligence in the Spirit. Unlike an animal, a person can temporarily or permanently turn off any of his instincts. An animal is not capable of this.

An animal is capable of sacrificing its life for another instinct. For example, the instinct to protect the owner. But an animal is not capable of giving its life for an abstract idea. Only a person is capable of this. Let me give you an example. Let's take a cat and a girl. If a cat sees through the window that her beloved cat has gone for a walk with another cat, she will not throw herself out of the window of a high-rise building because of this. A girl can do it easily. Although both have the instinct of self-preservation. A person understands, analyzes, has ideas, faith, humor, etc. - what the rational Spirit has.

Let's see what gives a person such an ability as opposed to an animal.

There is the ability to freely choose behavior. The animal is determined by instincts and controlled by them. The Human Spirit consists of the mind, spiritual heart and energy. The mind has three faculties: thinking, imagination and memory. We will focus more specifically on thinking.

Thinking is the ability of the mind to process information and make decisions. Let's take the instinctive mind of an animal: it has an analogue of thinking, it is much simpler. And what is animal thinking? This is the ability to fixate attention on the perception that is happening around the animal at the moment, and the direction of its behavior depending on instinct. There is no decision-making function. It is thinking that processes information.

How does the Spirit itself receive information? The human body has receptors that are connected to the brain by special nerve pathways. And in every cell of the brain there is the energy of the Spirit. I just called the mind. Now I will name what energies there are in the Spirit: the energy of consciousness, the energy of will and the energy of emotions.

The energy of consciousness is the energy of the Spirit, aimed at perceiving the world around us and oneself in it. This is perception for building your individual subjective world.

Consciousness as the energy of the Spirit permeates the entire brain; through it, information about the world around us is transmitted from receptors further to that structure called thinking. Thinking requests information from memory. This is approximately one twentieth of a second in a person - this is the possibility of neural pathways.

Memory is the mind's ability to store and recall information. Imagination is the mind's ability to create new information in the form of images or ideas. The information that is perceived by consciousness through the brain in the form of spiritual images and thoughts enters the thinking of the Spirit. And thinking compares this picture, which it received from the world, with the image that is in memory, and processes this information.

There are different types of processing. For example, logic is the process of processing itself, arranging information in order and connecting it. Synthesis is a thinking process that combines heterogeneous information into one system. Analysis, on the contrary, disassembles.

All Spirits, all people, aliens, plasmoids have all these thinking functions. This is a function of the Spirit, not the brain. Further, when the information has already been processed, the Spirit makes a decision with its thinking. This decision contains the possibility of free choice; he makes decisions based on his spiritual heart. Remember that each Spirit is guided only by its spiritual heart. And the mind is only a tool for executing the programs that are embedded in it.

Spiritual heart. What is this? The very name “heart” speaks of the core. This is the very essence of the core of the Spirit. It has nothing to do with the physical heart, it is a spiritual structure. And it also consists of three components: feelings, desires and instincts of embodied Spirits.

The instincts of the body are so important for the incarnating Spirit that he takes them into his heart, places them next to his feelings and desires. What are feelings? They are different from emotions. Emotions are an instant reaction to what is happening, a certain energy. And feelings are more than just energy. This is the attitude of the Spirit to a certain phenomenon, to a person or to oneself, expressed in a wordless form.

The verbal form is already a level of thinking. This is a feeling that has already surfaced.

David: This is all very cool!

Irina: Yes! I tell my students the same thing. The structure of the Spirit.

Maxim: I imagine that they do not understand anything that you are telling them.

Irina: Nothing is clear?

David: I understand very much! If only all this were stated in writing!

Maxim: There is an article! And books on all of this are coming soon! This video that will be posted on our channel will be transcribed and

posted in written form.

David: Thank you! This particular section is all very cool and wonderful! This means that those who are weak in Spirit cannot be distinguished by their minds. The conclusion is this.

Maxim: Now he will talk about the spiritual heart, and then we will draw conclusions.

42:43 Spiritual heart. Reference frequency.

Irina: (Raom Tiyan) The state of the mind very much depends on the state of the spiritual heart. I told you what feelings are. There are a lot of them. People call them differently in different languages.

There are still desires. What are desires? This is a conscious need of the Spirit. The need that he is aware of is his desire.

Instinct is a program that operates independently of the mind to preserve life, reproduction, etc. It is more connected with the body, but he feels it as his desire or his feeling.

In the Interstellar Union, when we start teaching children at school, we have a subject called “Psychology of the Spirit.” This is what we tell our children. There is a whole section where children learn to distinguish instincts from their feelings and desires and correctly guide them through the body into the material world. That is, when the Spirit confuses this, it begins to follow its instinct, believing that these are its feelings, or that this is its desire. First, we teach to distinguish feelings from desires, and then from instinct. This helps to be more aware and, for example, to distinguish love from attraction. This is the first example.

Next are desires, the conscious need of the Spirit. Since a person is both a biological being, that is, a body and an immortal Spirit, he has physical and spiritual needs. Since a person lives in society, he has social needs. This division is greater on the planet Esler. On the planet Burkhad, everything is simply divided into physical and spiritual.

In fact, when a person sets goals for himself, he sets them with his mind, but at the same time he is guided by his desires, instincts and feelings. That is why such a very important concept in spirituality as vibration depends on the state of the spiritual heart. There is such a thing as “vibration frequency”.

Spiritual vibrations are different from material ones. Material vibrations are vibrations of a certain environment. There is nothing to waver in the Spirit, there are simply qualities there. And these qualities are compared with the standard. The closer they are to the standard, the higher the vibrations. The standard vibration that created everything is unconditional Divine love, not expecting anything in return. She is pure, gives birth to life, truth, etc.

All other spiritual qualities are compared with this vibration. The frequency of vibration of his energy, his emotions, the work of his mind, the purity of his thoughts depend on the state of the spiritual heart, on the frequency of its vibrations. Jesus Christ, who was the Firstborn Son of God, lived and lives on the planet Burkhad, said these words: “Blessed are the pure in heart, for they will see God.”

If we take the word "purity" and change the letter "i" to "a", we get the word "frequency". Blessed are those who have the highest reference frequency.

David: Close to the standard.

Irina: (Raom Tiyan) Yes. He said that God will be seen because those who cleanse their spiritual heart of all frequencies incompatible with Divine love, their energy merges with Divine energy, their will becomes one with Divine will, and their love becomes infinite, as it is God himself is infinite.

That is why Jesus Christ came to Earth, to tell people about this path of cleansing his heart from everything that prevents him from merging with this Divine presence. And if more than 70% of the planet’s population begins to cleanse their spiritual heart and raise their vibrations, bringing them closer to God and conducting his energies to

the Earth, then the entire noosphere of the Earth, the sphere of its mind, the sphere of egregors will begin to be cleansed. High-vibration Spirits will come to Earth, who will stand at the head of your governments and lead you to the Light, including the Interstellar Union.

David: Thank you very much! This is a complete, wonderful conversation. The only thing is that in my head I can roughly imagine everything, the entire structure...

Maxim: I want to tell you a little secret: you will have a video on Skype that you can watch an unlimited number of times.

David: You see, I simply won't be able to convey it to my listeners, my cadets, students so beautifully.

Maxim: You will need to save this video and that's it.

David: Because great for today. Thanks a lot! Everything is clear, on the shelves, everything is clear and close!

Irina: Goodbye!

David: Thanks guys! Have a good night and big greetings to Russia!

Maxim: Okay, we'll pass it on!

September 25, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

David Schmidt – professor from Switzerland, Doctor of Psychology;

Raom Tiyan - representative of the planet Burhad, a specialist in energy interactions in the environment of the material world;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

Video in text
May 22, 2023

#349 Live broadcast. Baikal retreat. Real contact.

https://blog.cassiopeia.center/bajkalskij-retrit-realnyj-kontakt
https://www.youtube.com/watch?v=n0H_IyNh5k8

00:14 Baikal retreat. Bifid drugs.

Maxim: Dear friends, hello everyone!

Irina : Hello everyone! Good evening!

Maxim : Our broadcast today is very interesting, the two of us will start it. We had a great trip to Baikal - the Baikal Retreat took place there. We received two streams of people there. In general, guys, we have a lot of news, a lot of different information. I don't even know where to start.

Irina : Probably from the Baikal retreat.

Maxim : Firstly, I want to say hello to everyone who went through this retreat, and who really left as a conscious person, who received a huge amount of information. There were a lot of contactees, healers, energy practitioners who received a lot of feedback both from the retreat itself, and from receptions with Irina, and from receptions with specialists on the Higher Self.

A team of 30 people went to this retreat. There has never been a retreat like this before! 30 people were involved in the development of the entire team that arrived there. Even this time we had tarot readers, runologists, there was cosmohealing and cosmoenergetics, we had the Galactic Federation of Light, there were a lot of meditations. Overall, the retreat was simply, simply, simply a masterpiece. And Baikal itself, we even communicated with the Spirit of Baikal, which was very

interesting. We talked with Lama Itigelov.

Irina : Yes, 2 times, 2 conferences.

Maxim : Yes, there were 2 conferences with the Spirit of Baikal. We talked with Lama Itigelov.

Irina : With Sai Baba.

Maxim: By the way, one contactee with Sai Baba arrived, and we held a second conference together with Lama Itigelov and Sai Baba. I have everything recorded, I haven't processed the video yet. I am sure you will be very interested in watching them, because the information is simply colossal!

Now we are almost launching it on sale, setting up all payments so that you can pay online - these are bifidobacteria.

We gave our interstellar friends ampoules with our bifidobacteria, they did a complete physical and energetic study. In general, Irina will now tell you everything further.

Irina: Yes, I just need to say that I still gave.

Maxim: Yes, how can I say this correctly so that we don't get blocked.

Irina: Or maybe write it on a piece of paper?

Maxim: On a piece of paper?

Irina: Come on, bring me a piece of paper.

Maxim : Let us write on a piece of paper what we will talk about today, because they will simply block us if we say it out loud. Now I'll take a

piece of paper and write.

Irina : Yes, indeed, the retreat on Lake Baikal was very interesting. We went to one datsan, and to the second. We talked with lamas there, they gave us excursions and told us stories. Shamans came to us.

Maxim : Guys, we have this “Sputnik V”, if it’s clear what it is.

Irina : We passed on these that were written.

Maxim : Yes, we passed them on. There were two ampoules, as you know, they were given to us so that we could submit it all for research. We passed it on, and Irina has information. Irina, who is with us today? MidgasCaus?

Irina : They write: “Say “Substance.”

Maxim : Oh, “substance”, great!

Irina : Great!

Maxim : Yes, yes. That is, we transferred this substance to our interstellar friends, and, accordingly, received feedback.

Irina : Correctly says: “Substance C1” and “Substance C2”.

Maxim : Mid, thank you! Yes, by the way, MidgasCaus from the planet Esler is with us today.

Irina : And LiShioni is here. They are both laughing now.

Maxim : Yes, and LiShioni from the planet Shimor is with us today, so we will call it “substance-1”, “substance-2”. There are two substances: one substance is made immediately, and the other substance is made

after twenty days, I think? It takes twenty-one days to complete, right?

Irina : “Maxim, you look great. Fresh barguzin gave you a blush.”

Maxim : Yes. So today we will talk about the Baikal retreat. You can ask different questions.

Irina : Compared to him, it turns out that I’m still small.

Maxim : Small? No, well, what? I'm 191, how tall are you?

Irina : How much do you have?

Maxim : 191.

Irina : This can’t be.

Maxim : Maybe. I'll get up now and won't fit into the cell. How much do you have?

Irina : Each scale shows me differently.

Maxim : Not a kilogram, but a height?

Irina : Ah, height.

Maxim : Come on, a kilogram. What are you doing?

Irina : 170.

Maxim : You have 170, right?

Irina : Yes.

Maxim : Great.

Irina : And the scales show differently every time.

Maxim : Yes.

Irina : My gravity is changing.

Maxim : By the way, about substances and bifidobacteria. Irina went to direct real contact immediately before leaving for Baikal, so now MidgasCaus will help Irina talk about them. And I'm leaving you, I was very pleased to see you all here, because I see both our retreatants and those who have been trained by us.

The most important information, I forgot: guys, we have moved to a new Center. It is located outside the city, not far from people, but far enough from those people who do not understand what we do. Plus, in this Center we are building both a Wellness Center and a Contact Center, and the Autonomous non-profit organization "Health Center for Spiritual and Physical Development" will be located there in the future. So we spent four days in a row sweating and moving. Now we have a whole group there working on the arrangement so that you can come and study.

By the way, we now have two training courses: the first course is "Healing through the Higher Self," where you will learn to contact your Higher Self, you will be able to undergo research on the latest equipment, some equipment is not even in the world yet. These are the latest developments that were recommended to us by our interstellar friends, and, accordingly, you can improve your health both in body and soul there.

And the second course is the contactee stream, where we build contact through the Higher Self with those civilizations with which a particular contactee is in contact. Everyone is different, so it's different every time. Irisha receives them personally, they go through everything

through her, learn, Irina teaches classes with them, Ilya Alexandrov also teaches classes - he is a psychologist, a very well-developed contactee.

Therefore, we are waiting for you all at the new Center, we will provide information on the sale of bifid drugs a little later, we will even post a video. We will tell you what it is, what it is for, how it is. And today you will be able to hear feedback from our interstellar friends who have fully studied both substance-1 and substance-2, and our bifid preparations using the technology that was given to us for their cultivation.

Therefore, guys, I say goodbye to everyone, but I'm here next to you, literally watching the broadcast, helping Irina conduct it, no longer interfering and will not distract her. Guys, see you all!

09:09 Phantom of the Virgin Mary about the quantum transition on Earth. Advice of the Mother of God.

Irina : So, hello again, dear friends! Before I forget, I'll tell you, MidgasKaus and LiShioni reminded me of this, they were with me, about what happened at our Ashtar session today. Very important information.

Maxim : Yes, today there was practice. We have a chat on telegram called "Practices of the Interstellar Union". And Irina uses these practices to make astral trips to the ship to Ashtar Sheran, and in general to ships that are engaged in the healing and harmonization of your energy bodies. Many people just don't know, so I'll explain.

Irina : Many people don't know, yes. I'm just talking to you as if you are aware of everything, perhaps everything is still ahead. However, what we have been doing for a long time is that I do a Light Body practice every Sunday. We all go out in our astral or mental bodies to fly to Ashtar Sheran's ship for recovery. So, today was such an interesting flight, even for me personally, and what I saw and learned there is not just galactic news, but probably intergalactic. Because it relates directly to the Earth.

Spirits from all Galaxies are embodied on Earth. On the ship of Ashtar Sheran, I went there today in the Astral Plane and met the phantom of the Virgin Mary there. Yes, we have already talked with her, you may have seen our meetings with her on our channel. She was already there in the form in which she came to me to answer questions from our subscribers. And she asked me to tell all the people that, starting from October 14, that is, from the feast of the Intercession of the Most Holy Theotokos - from her feast, she told me that on this day the Intercession means special protection, that special energy that it extends to Earth in order for a certain important stage of the quantum transition to begin, when the vibrations of the Earth and all layers of the globe increase, which allows us to better feel our Spirit and follow the path of Light.

She said that on October 14, the next major stage of the quantum transition will begin, which will last until the New Year, and not until the civil New Year, but until the old New Year, that is, until January 14. This stage is very important for us, and further events on Earth will depend on its passage, according to which scenario they will follow: a brighter one or a less bright one.

She said that for anyone who wants to go through this period consciously, more easily and harmoniously, she recommends following the following rules: it is necessary to read the prayer to the Mother of God several times a day during the period from October 14 to January 14, but this must be done not automatically, but with feeling of Love, tuning into its energy. She will help such a person and cover her with her cover from all kinds of negativity, including his own, and from some other circumstances. What prayer should I say? There is such a famous prayer “Rejoice to the Virgin Mary.” I'll read it now, it's very short:

“Virgin Mother of God, rejoice,

Blessed Mary, the Lord is with you;

Blessed are You among women and blessed is the Fruit of Your womb,

for you gave birth to the Savior of our Souls.”

She recommended that anyone who wants to go through this period with her read this text consciously immediately after waking up in the morning. How many times is the desire of your heart, but at least once. And she said that it doesn’t matter whether it’s mentally or out loud, as long as it comes from your heart filled with Love.

(Response to statements in the chat) Thank you, dear friends, for your kind words and bright thoughts that I feel.

So, she recommended reading the prayer “Rejoice to the Virgin Mary” in the morning, also reading it in the evening, before going to bed, and also reading it before every meal: food, water, medicine - no matter what you take into your body. Reading this prayer will cleanse and charge with high energies this matter that you will accept. And she also recommended not only during this period of quantum transition, but in general always, if possible, after eating food, water or any substance that you have taken, including, for example, medications, to say the following words: “Thank you and I accept!” Love and blessings!”

And at the same time mentally turn these words to God, to the Heavenly Father, to whom all matter belongs here.

“Thank you and I accept! Love and blessings! I promise to use this energy to develop Unconditional Love.”

And she said that if we do this every time we remember this, we will include awareness that any food we have taken or any substance is a material embodiment of Divine Energy. Divine Energy embodied in matter. And when we say that we promise to direct this energy to the development of Unconditional Love, we will set ourselves up to ensure that this energy goes towards positive goals and not negative ones.

This prayer text can be found everywhere on the Internet. This prayer is called “Rejoice, Virgin Mary.” It is necessary to read in order to go through this quantum transition harmoniously, from October 14 in the morning until January 14 until the evening inclusive. The main thing is

to do this with a feeling of Love, joy and, naturally, accompanied by the spiritual practice of forgiving all enemies, forgiving yourself, developing Love in yourself, and so on. Prayer itself, without spiritually filling oneself with Light, Love, forgiveness, faith, and so on, is practically meaningless.

So, I told you about what the phantom of the Virgin Mary asked me to convey. Now we move on to the main part - galactic news. Indeed, there has been no galactic news for a long time.

Maxim : Yes? One piece of galactic news: all possible passwords in all possible resources are being hacked.

Irina : Who?

Maxim : I don't know. Guys, don't try, don't hack, everything is protected!

Irina : What are you talking about?

Maxim : Yes. They started the live broadcast right at the beginning.

Irina : In my opinion, we have already begun the quantum transition.

Maxim : Yes. Guys, this is all punishable, so don't worry, don't worry, do your job, in any case, no one has canceled karma. So everything is fine.

19:00 Children and prayer to the Mother of God.

Irina: A question related to prayer. You know, from any age, as long as he himself wanted it and felt it, did it consciously. Usually this is around seven years old, although it can happen earlier. It depends on the child. If he wants, let him read with you. But only he himself wants this. Yes everything is correct. So, what are we going to do: voice galactic news or meditation?

Maxim : Let's get some galactic news, and then do a meditation.

19:42 Earth base of the Lyrans, created 8 thousand years ago.

Irina : Okay. Galactic News: LiScioni says he hasn't posted news in a while. (LiShioni) But there is news directly related to your planet, from the Lyran civilization, from the planet Tuluari, which has already made contact with Irina. The thing is that this civilization was present here in the area from 9500 to 8200 thousand years ago. At this time there was their main presence on your planet, studying your civilization, contacts and so on. And they also built bases here, and information about their bases is stored in their archives. And just recently, one of their scientists, who studied the ancient space flights of their ancient ancestors (this happened thousands of years ago), found in the archives a record of a base on Earth that was closed, mothballed for all these 8 thousand years, it is located off the coast Greenland.

About a week ago, I personally saw via video link how representatives of the planet Shimor, Burkhad, Tikht and others visited this base. It was discovered for the first time in 8 thousand years. There they found devices from Lyran civilizations that were still working. This base is very large.

Why did this news surprise me? The fact that information about this base was preserved only in the Lyran archive. And there were even robots in a non-working state, but they could be turned on. A little more than 8 thousand years have passed!

Maxim : Wow!

Irina : Such news.

Maxim : Well, what? Meditation? We promised you that in every live broadcast we will conduct a meditation on saturating the harmonization of planet Earth.

Irina : Look what she writes: “You probably have a lot of donations.

They probably want to get to your donations so they can transfer them to themselves."

Maxim : No, it's not the donations they're getting at, but our chats, websites and, in general, they're trying to hack it all through my phone, and the calls are coming. Well, nothing, nothing. Write, break, let's do it! I'm fine there, I'm not even worried.

Well? Meditation?

23:03 Meditation on cleansing the Earth.

Irina: So, we perform a meditation of filling all the shells of the Earth with the Light of our Soul. I ask you all to sit down more comfortably, take a comfortable position, do not cross your arms and legs, close your eyes. Of course, meditation is done by whoever wants it, dear friends, because there are a lot of requests for it, especially during the live broadcast. If you don't want to, it's voluntary.

I ask everyone who wants to do this meditation with us, with our curators, who will also present this, to close your eyes, relax, do not cross your arms and legs, as always, pay attention to your breathing. We take a slow deep breath. We direct the air first into the stomach, then fill the lungs and completely relax. Let all the tension come out of you with the exhaled air. Take another slow breath. Become an observer of your breathing. Let the body breathe on its own, and you watch it.

You are now in a state of peace and harmony because introspection of your breath calms your mind. Mentally imagine the globe in front of you, you can imagine it in the form of a globe or the image that you saw on the TV screen. Let this image be only yours, your own. Imagine what color the Earth is. Imagine how it rotates. You don't need to try too hard, just work with the image that you have.

Now look closely at the Earth. Don't tense up physically, mentally reach out to her, let your physical hands remain in place, feel her energy. Ask yourself the question: "Is the earth alive or not?" What

energy do you feel? You now see an image with which the energy of the Earth is associated. Now take another slow, deep breath and as you exhale, direct the energy of the Light of your Soul through your hands. It is very easy. Imagine that there is a ball in your chest that looks like the Sun, and the energy from it goes through your hands in the form of rays. As we exhale, we direct it towards the Earth.

Yes, everything is correct, the Earth reacts, it begins to glow, rotate faster, differently for everyone. This is an individual image.

Now we do this every inhalation and exhalation. As you inhale, imagine a ball in the area of the heart, filled with the spiritual Light of Divine Love. You can imagine any color, usually white, gold or purple, and as you exhale, direct it to the Earth. Now we mentally, not necessarily out loud, say: “I am an immortal, free, rational Spirit. I am the Light of Divine Love. With the power of my Spirit, I direct the energy of my Love to our planet Earth to harmonize, cleanse and restore the integrity of all its energetic and physical shells: lithosphere, hydrosphere, atmosphere, biosphere and noosphere.”

Now mentally intensify your flow. You can say to yourself any words that you want to wish the Earth, you can repeat after me: “I wish all beings incarnated on Earth at any level of density, love, spiritual happiness and true enlightenment. May all beings in this space be light and Divine beings. Accept my Light of Love."

If you see any spots or something dark on the Earth, just direct the Light there, do not judge it in any way. Now say: “I am the Creative Light. I am the Creative Light. I am the Loving Light." Imagine your Light completely enveloping the Earth.

Thank your Higher Self for your help. Now take a breath, you will now feel that the Earth is also sending energy to you. Accept it into your body, mentally say: “I thank and accept. Love and blessings. I promise to use this energy to develop unconditional Love.” Thank your Higher Self for your help.

Now I will count from 1 to 5. When I say 5, you will return to your normal state of consciousness and fully connect with your bodies. One

two three four five. Open your eyes, inhale and exhale.

Thank you everyone! I felt all of you, I felt your flow of energies, the Love with which you filled the Earth. This really helps to go through all the stages of the quantum transition, and the purity of our Souls and pure thoughts affect both the physical and subtle material planes. It even helps reduce the aggression of all microorganisms, including humans and so on. That is, it contributes to the physical, mental and spiritual health of the entire population of the Earth. And I thank you!

Maxim : I think the cat thanks you too. She completely switched off.

Irina : What are you talking about? I didn't feel it.

Maxim : Oh, it’s turned on.

Irina : What did she do?

Maxim : She generally fell asleep.

Irina : I went to the Astral.

Maxim : Yes, cat. Yes! Have you been in meditation too?

Irina : She also sent Love to the Earth. Yes, and I thank you.

34:55 Causes of various states of the physical body.

Maxim: Irina, I watched your videos two years ago. Physical fullness is an accumulation of energies. The following information came: you work through the mental, the energy is astral. You need to ground yourself. And you will feel better, and the diseases will not progress.

Irina : Ground yourself?

Maxim : Yes. Dear friends, we went specifically (we have a clinic nearby), we passed absolutely all the tests: for all hormones, for all possible circumstances. And I'll tell you honestly: Irina is healthier than me. If you think that someone has illnesses, then it is clearly not Irina.

Irina : Yes, I went specifically and passed all the tests. MidgasCaus told me which ones, there were more than twenty of them.

Maxim : More than twenty? So, guys, don't even think about the fact that someone is sick, or overweight, overweight. Look at Buddha, in my opinion, he did not suffer, although he died from meat poisoning, right?

Irina : By the way, at 80 years old.

Maxim : At 80 years old, yes. Therefore, guys, don't do nonsense, don't write us any advice about Irina's weight loss, and Irina herself, when she wants, if it bothers her, will remove this weight. As long as he doesn't bother her, she is absolutely healthy, she's even, I say, healthier than me, according to tests.

Irina : You know, as much as I've seen, there are people who are thin like you.

Maxim : Yes, remember yourself in childhood, when you were thin and all sick.

Irina : Yes, if people (on TV) are too thin, they can also write that they are too thin, sick, and so on. I saw this, they write. Although they can also be healthy. I communicate with many people, and many have already undergone diagnostic tests and conversations with me.

Maxim : We have equipment at the Center that shows Irina's health. Contactees, energy practitioners, and healers come to us. And the equipment shows how sick people can be. Irina may be overweight to perceive, but she is absolutely healthy.

Irina : I just saw (I talked a lot with people, and you, too, I think, saw) that there are fat people - both sick and healthy, and there are thin people - both sick and healthy. This, in general, depends more on the state of the Soul. When the Spirit is filled with energy and the desire to share this energy with all humanity, then a body of any weight will be filled with energy. If he doesn't even have the energy to love himself and those around him, then no matter what weight he is - 150 kg or 50 kg, he can get sick from this, simply because of the lack of energy of Love.

Maxim : Yes, therefore, if someone thinks that we are sick, then these are just your illnesses that you are trying to project onto us. So guys, everything is fine.

Irina : Now MidgasCaus reminds us that there really are physical causes of illness associated with poisoning, injury, and infection. But any physical illness still has some hidden spiritual reason, for example, in the form of some belief, or that safety precautions must be followed.

Maxim : There must be a lot of good people.

Irina : We have already heard this. Thank you. And even some purely physical reason, for example, a burn, injury, some kind of infection, a cold, there are still some spiritual reasons, for example, a person caught a cold because he walked around without a hat in the cold, and his ears hurt . It seems to be a purely physical reason, but still it also has its own spiritual reason, because he has the conviction that it is possible to do this, and this is already a mental plane - that means the Spirit.

Maxim : Here they write how to get to you for a consultation. Guys, Tamara is making an appointment with us for a consultation. We have a website with a phone number for making an appointment. But Irina now only accepts in person; she conducts online appointments only in exceptional cases, for example, contactees from abroad who really cannot get there during the pandemic. And Irina gladly receives those who are on the territory of the Russian Federation personally, and you can sign up with Tamara. The site has all the information, you will find everything there and figure it out.

So, Irina, maybe we can talk about bifida?

Irina : Come on, now.

Maxim : What will we call it?

Irina : Substance C1 and C2.

40:28 Boundaries of the Universe.

Maxim : Can aliens see the boundaries of the Universe? Is this a hidden question? The Universe has no boundaries. She is limitless just like God.

Irina : What is called the boundary of the Universe? Some call the border between the material and Spiritual worlds.

Maxim : In principle, you can ask questions on C1, on C2.

40:55 Communication between “Cassiopeia” and contactee Mitya.

Irina : Will there be another meeting between Irina and Mitya? Well, we've already met.

Maxim : We don’t want to dragon Mitya’s contactee along with his team. They don't make contact. They don’t go to harmonization or a joint conference. They don't want to communicate. They protect their brand, and, as I understand it, the brand is registered with them. They don’t want to share it with anyone or interfere with it. Therefore, until they have a request (from Mitya’s contactee, from Captain Bill), we will not meet with Mitya again, so as not to create an unnecessary, inadequate situation of pitting the contactee against us.

41:38 Bifidobacteria «Cassiopei».

Irina : So, on bifidobacteria. MidgasKaus says that I also got acquainted with the results directly, although Irina gave this to representatives of the planet Burkhad. I flew to this planet, and was in the laboratory myself, and took part in the study of all the drugs that Irina transferred to representatives of the planet Burkhad through physical contact. These substances were tested with special equipment at the biological, chemical and energy levels.

Maxim : We are talking about bifidobacteria now, right?

Irina : Both were checked.

Maxim : C1, C2 and bifidobacteria?

Irina : Yes.

Maxim : But are we talking about bifidobacteria now? Begin?

Irina : Yes, we are now talking about bifidobacteria. It wasn't just bifidobacteria.

Maxim : They are called “probiotics” in another way.

Irina : (MidgasKaus) There were three kinds of different bacteria that make up a symbiotic group of bacteria in the human body, not only in the intestines, but also in many other organs where bacteria exist. Taking this opportunity, I would like to tell you that approximately 2.5-3 kg in the body of each person is made up of bacterial flora. Can you imagine 3 kg of bacteria?

Irina donated three vials with various bacteria belonging to three different genera for research. And these were bifidobacteria, these were, in your opinion, lactobacilli, and this was a special type of bacteria, which is approximately similar to streptococcus, but on the bottle it was written “Bulgarian bacterium”, in our opinion, Bulgarian bacillus. This is more of a popular name.

We cannot have 10 kg of bacteria. Irina donated these bottles for research. They have been tested on a biological, chemical and energy level. Their chemical composition was tested. There is lactose (like sugar, a type of glucose that they are fed with), and (according to the chemical composition) there were chains of amino acids characteristic of living organisms. They included all 20 amino acids known to people that make up the proteins of these bacterial organisms. There were proteins, carbohydrates, lipid complexes that were included in these cells.

Biological research has shown that they are alive, but in suspended animation. These are not exactly bacterial spores. They are in a dormant state. Inactive, but alive. When they enter the human body, they begin to multiply and occupy the microbiota of the human body. Moreover, as I already said, this happens not only in the digestive organs, but also, for example, in the mouth, in other cavities of the human body, where their presence is necessary. So, biological research has shown that the vast majority, more than 90% of these bacteria are in a living state.

It was also revealed that each of these bottles contains not one type of bacteria of a certain genus, but three types of bacteria of this genus. Moreover, one of these three species in each bottle was quite common, the one that is sold through your pharmacy chains, but the other two species of this genus in bottles were quite rare. They are found in the vast majority of cases only in laboratories. But these two types are assistants to the third type; they complement each other in their work, for example, in synthesizing beneficial vitamins for the body and suppressing destructive microflora. These bacteria, being beneficial symbionts in the human body, occupy the niche that can usually be occupied by destructive microorganisms in humans. Simply put, they produce vitamins from those substances that bacteria that destroy the human body simply feed on and produce toxins from them. This is, to put it very simply.

Maxim : Yes, Mead is absolutely correct, because these two groups of bacteria were specially bred under certain conditions that were recommended to us. Therefore, there are no such bifidobacteria anymore.

Irina : Not yet.

Maxim : And, indeed, you write correctly: in order to build centers around the world, we must give you a very good quality product. At the same time, it must be affordable in price and quality. This is a product that really works. We have already received a huge amount of feedback. We had laboratory tests and a lot of other things, there are simply no analogues. They really help with heartburn, acidity, you can drip on wounds - the wounds heal quickly, you can restore the intestinal flora and mucous membranes. Plus, we have the “bacterium bulgarium” - “Bulgarian bacillus”, which is also grown in certain conditions, it fights cancer.

Irina : There are three of them: in each bottle there is a Bulgarian bacillus, bifidobacterium and lactobacilli. There are three types of them, and, moreover, they are quite rare. For example, bifidobacteria is one species that is quite common, while the other two are rare. And they are in a fairly stable form and in large quantities.

Maxim : Yes, dear friends, due to the fact that we have not been on air for a long time, do not worry, do not worry, we will soon begin to read your questions and answer them. This broadcast will not be an hour long. It will be longer than one hour. We will see by your activity, by your likes, whether you like our broadcasts. We will definitely extend this broadcast. Like and subscribe to our channel.

Irina: Where can you buy bifidobacteria?

Maxim : Until we set up real online payments, we cannot give you drugs. We comply with our Russian legislation and make sure to pay taxes on the sale of these drugs. Literally another 5-7 days, and we will show you a video, and under it we will definitely give a link to the site where you can order them. For now only on the territory of the Russian Federation. But later we will attract Wildberries to other various organizations so that we can deliver to other countries.

51:26 Energy bifidobacterium "Cassiopei".

Irina : (MidgasKaus) I told you about the chemical composition, which contained carbohydrates, proteins and lipoproteins, characteristic of

these organisms and their nutrient substrate. I told you about biology, that is, that they are alive, that they contain lipids. We also tested the energy of these bacteria on our equipment - the subtle components of the aura.

We have equipment that shows the aura of bacteria. Their Soul is a group Soul. In bacteria of this type, usually one group Soul incarnates somewhere around 1500-2000 individuals. One group Soul is embodied in such small bacteria of this type. These group Souls were in vials (there are hundreds, several millions of bacterial cells in each vial, but they were not counted to one). Souls were embodied, visible by radiation.

Maxim : Are there millions or billions?

Irina : Now he’s just showing me zeros. (MidgasCaus) Nobody counted them there, one might say hundreds of millions, a billion. In any case, these are large numbers, several orders of magnitude higher, as I already said, than what is sold, what I was able to research even earlier, through the planet Tashig, along with other medicines, those bifidobacteria that were distributed in the pharmacy chain. And there were more of them due to those two additional species. There are perhaps several million of them: the main 100 million and additional ones. This all together constituted a mixed population.

Maxim : Mid, can you speed up the explanation process a little?

Irina : (MidgasKaus) And the energy was such that those plasmoids that created group Souls, when these bifidobacteria entered the body, they filled them with energy. This harmonizes the entire energy of a person, but this is not a fight, as antibiotics do, but rather the harmonization of the microflora. Even plasmoid civilizations help this. It's a symbiosis.

Maxim : Yes, this is the setting of the biogeocenosis of the whole organism.

Irina : (MidgasKaus) Yes, this concerns energy, and as for substance,

if you have questions, ask.

Maxim: Do bifidobacteria need to be prepared somehow? Guys, we have a separate video.

Irina : Everything is already there.

Maxim : In this separate video, we have already recorded everything, told everything: how, what, why, how to take it, what kind of substance it is, how it is prepared. All this will be in a separate video. Today we are simply talking live, figuratively, about what we submitted for research. Therefore, MidgasCaus, let's probably move on to this - what we wrote on the piece of paper. These are substance-1 and substance-2. This is the substance that Irina and I, and not only Irina, but the entire Cassiopeia Center, introduced into ourselves.

Irina : Yes.

Maxim : We will call it: substance C1 and C2.

Irina : Before I answer the question, I will immediately say that those who were with us at the Baikal retreat...

Maxim : Yes, they all tried bifida.

Irina : I repeat that they came to us from almost all over the world, different people, very different things happened at this retreat, but Maxim and I are vaccinated.

Maxim : We cannot say this word, Irin.

Irina : Maxim and I took these substances. Despite the different circumstances, everything is fine with us, which is proven, among other things, by the words of MidgasKaus, which he has long spoken about these substances in terms of their effectiveness in protecting against a new infection. His words have already been confirmed by our

practice.

57:41 Vaccine radiation.

Maxim: Mead, please tell us about the studies on the physical, energetic level of substance C1 and substance C2. What has our interstellar friends discovered?

Irina : (MidgasKaus) At the chemical level, again, an amino acid-protein complex was identified, characteristic of terrestrial organisms of the viral type, but it was a combination of two types of viruses, and one of the viruses was without its genetic part, it was replaced by the genetic part of another virus, like two in one. And neither this virus nor part of the other could reproduce in the human body, because they were deprived of reproductive organs.

Even at the chemical level, it contained substances of alkali metals, for example, magnesium and sodium. There was also a substance - an organic preservative, the same one that is used in other vaccines that were studied even earlier, for example, against hepatitis B. This is a preservative. Ethyl alcohol was also added as a preservative.

What was noteworthy was that, despite reports from earthlings that this substance may contain an aluminum compound, no traces of this substance were found in the substance that was provided. There were other preservatives. Although in other vaccines, not against this infection, but, for example, in some vaccines against whooping cough, etc., it is present.

Maxim : The word “vaccine” cannot be mentioned on a YouTube channel.

Irina : I speak as he speaks. Maybe then we won’t mention this topic at all? I don't know any other words. Let people at least listen.

(MidgasKaus) So, at the biological level there is no living viral or any other microorganism, there was no living Soul there. She was not embodied there. There were simply remains of a body nested one

inside the other. At the chemical level, I have already spoken about the composition. At the energetic level it was shown that the Soul is not embodied.

What is it on a biological level? This is a drug for the production of antibodies in the human body. Those Burkhad scientists who studied (there are also those studying human immunology and biology) came to the conclusion (I am passing it on to you) that this substance can be approximately 72-75% effective in producing antibodies against a specific infection, provided that the immune system is functioning normally and healthy eating, healthy lifestyle. If this is not observed, there will be fewer antibodies and nothing to produce from. There must be a substrate for the production of these antibodies, a healthy organism.

Substance safety. Since there are no harmful, toxic, chemical or biological substances present, there are no living microorganisms, none at all: neither beneficial nor harmful, that can multiply in the human body, their assessment is in any case 72-75%.

Maxim : Guys, you get all the information directly from direct hands. The substances were specially given, substances C1 and C2 were brought here to us, and, accordingly, we gave this substance, in whatever form it is, in that way.

01:03:32 Presence of mercury in the vaccine.

Maxim : They ask about mercury. Is there a mercury compound there?

Irina : (MidgasKaus) There is no mercury, arsenic, potassium cyanide, radiation, graphene, nanochips, there is nothing there. Everything was carefully checked on a microscope; specialists from the Interstellar Union, who have been working on this topic for 15 million years, could not find any nanochips. They are very good at testing all kinds of nanomolecules; nanotubes are their specialty. They can make it so that the molecule itself, a pair of molecules, two molecules will be linked by some special metal, and some kind of nanochip will be made from them. But they found nothing, neither this nor a more primitive level. These are just proteins, one might say, the corpses of viruses,

nested one inside the other.

We carried out a series of experiments on a model of human cells, which one of the contactees voluntarily provided to us out of his kindness. He donated his biomaterial: blood, lymphocytes. We all looked together on the screen of our huge computer what happens when these substances, first and second, come into contact with a person's blood, with his tissues.

The following happened there: this substance (the remnant of the virus) ended up next to the cell, and the cell itself accepted it into itself due to the fact that it accepted one of the substances as its own. She opened her doors to this substance. When this substance (the corpse of this virus, which contained part of the virus that caused the new infection) got inside the cell and was integrated into the ribosomal RNA, the ribosomal RNA began to produce the type of protein characteristic of the new infection. Naturally, the cell, by its nature, exposed this manufactured protein behind its membrane and other monocytes, macrophages, lymphocytes, neutrophils, and so on surrounded this cell, signaling this to different types of lymphocytes. Thus, in a simple and accessible way, the lymphocytes gave a signal to produce an antidote or antibodies to remove this infected cell from contact with other cells and deactivate the virus itself that got there.

We did not detect any difference, that is, the lymphocytes themselves do not distinguish whether the cell is actually infected or by this product.

01:07:22 Vaccine and oncology.

Maxim: Then the fact that those who received the substance have many times more oncology (this is indicated by the pathologist) is this fiction?

Volodya, look, this is not fiction, because pathologists are already examining corpses, and these corpses died of oncology. The fact that they made this substance for themselves does not mean that they died from the substance. They died from cancer, which is formed on a spiritual level, initially it is pain, resentment, anger at themselves, at

the people around them, at everything else. Therefore, this is not fiction, there are actually a lot of corpses that are being opened, of cancer patients who also received this substance. This is fine.

01:08:11 Immunity stability. Antibodies.

Irina: Now about the resistance of immunity to this substance.

(MidgasCaus) It's more complicated here, and I'll actually say what we were able to identify. The whole point is that this type of viral organism, like the one from which we made this substance, produces certain changes in its genetic component - RNA, so that it does not die, but adapts to the human body and continues to reproduce. This is its evolutionary mechanism, associated with a large number of divisions and a great ability to change, RNA mutations, which do not lead to its death, but to which it quickly adapts. It is a very flexible adaptation mechanism associated with the ingenuity and inventors of this new infectious agent itself, both among people and among subtle civilizations. Both are very inventive.

This concerns the stability of the immune system. Both after the administration of this substance and after a natural disease, the stable level of antibodies in the human blood is almost the same. These antibodies can be eliminated within 3 weeks after the administration of these substances or the disease, or after 9 months. It is impossible to predict how long they will last in the body of a particular person.

It depends on so many factors. First of all, from lymphocytic memory - the ability of lymphocytes to retain information. This ability is individual for each person. This is why antibodies not only to this infection, but also to all others, do not last the same amount of time. It’s just that some last longer due to the nature of the microbe or virus itself, while others are eliminated faster.

The conclusion of the biological scientists of Burkhad and my personal one is that your scientists could create another substance in addition to this one. It would help create local immunity. It is possible to spray similar proteins of the viruses themselves directly in the form of an aerosol onto the mucous membrane of the nose and nasopharynx so

that those macrophages that are located directly on the mucous membranes can very quickly produce their own antibodies. And infectious agents that entered the body through these gates could be immediately neutralized, rather than waiting for the moment when this virus enters the blood and is recognized by cellular immunity in the lymph nodes and so on.

01:12:42 Bifidobacteria against viruses.

Maxim: Mead, we once talked with scientists about our bifidobacteria. There we have a biofidum, it is the basis. We tried dripping into the nose for a runny nose, for ARVI. Can this be done with our bifidobacteria? To enhance the effect so that the virus does not enter?

Irina : (MidgasCaus) Yes, of course you can. These are living organisms that replace all harmful microflora, including leaving no food for those cells into which viruses have entered. A virus does not reproduce like bacteria. Not directly in any environment, but directly inside the cells.

And as for mutations, dear friends, it is not the substance that is injected that changes the DNA, but many viruses change the DNA. Many viruses cannot survive without changing the DNA of the cells into which they enter. This is the basis for their reproduction.

01:14:02 Vaccine and mutated virus cells.

Maxim: Will this substance protect against mutated virus cells?

Irina : (MidgasKaus) It depends on which gene mutates in them, but if many genes mutate at once, the antibody protection of both those who have been ill and those who have been injected decreases, but it does not disappear completely, something still remains . It’s just that it can drop to 60%, even to 50%, but still the mutated virus is similar in its protein composition of its virion, in its structure that surrounds the RNA, to the original one. And they will still recognize him, it will just take longer.

Maxim : That's it, thank you, Mid, I heard.

01:15:01 Number of virus mutations.

Maxim: Mid, please tell me how many mutations a virus can have in principle? What quantity?

Irina : (MidgasKaus) Which one? This one? Or another?

Maxim : This one.

Irina : (MidgasKaus) How many mutations? In general, throughout its entire existence?

Maxim : What are your assumptions about how many mutations this virus will have?

Irina : (MidgasKaus) There can be an unlimited number of them, but everything can be limited to a few dozen. It all depends on how people's bodies will react to the viruses that are circulating now. If people produce antibodies either from a disease or from a substance, then even mutated viruses will have a very difficult time reproducing in that person, and he will interrupt both his existence and the possibility of further mutation. This means that the matter will be limited to a few dozen mutations. But if you leave everything to chance, do nothing, and just wait until the human population itself develops some kind of immunity, it may take several more years, and there may be high mutations.

Maxim : Yes, Google will give you the information that it needs to give. It still won't reflect reality.

01:16:42 The effect of the vaccine on genes. Manifestation of human awareness.

Maxim: Mead, please tell me, they say that these substances turn off

some kind of God gene in the human body, that is, they deprive him of the possibility of clairaudience, clairvoyance, claircognizance, the disclosure of his esoteric abilities, the disclosure of his internal abilities. Is this really true? Does this substance affect a person, those genes that make it possible to reveal human superpowers?

Irina : (MidgasKaus) If a person believes in this, then yes.

Maxim : If a person believes in this, then yes?

Irina : (MidgasKaus) I even know for what purpose such an image is being spread specifically about substance. So that the one who accepted it out of necessity could convince himself that he is deprived of God, and thereby lower his vibrations. The goal is clear.

Maxim : This is a planned action of low-vibration civilizations, which make their own food from this, relatively speaking.

Irina : (MidgasKaus) Yes, there will be a feeling of guilt and fear. But I told you about the science of imagery. This is the simplest way to create an image.

Maxim : I see, now everything is clear. And here's the most interesting thing: I know that a huge number of contactees around the world were all negative, inadequately disposed towards this substance, in general, in principle.

Irina : (MidgasKaus) This interests me too. The reason why exactly all contactees, although contactees of the Interstellar Union and the Galactic Federation of Light have repeatedly asked the curators these questions, and the biological and spiritual position that I have expressed for a long time was repeatedly given. Therefore, it is surprising that contactees agreed to say such words and construct such images, knowing full well that your government structures may introduce a law on compulsory vaccination for certain groups of the population. Because there have already been such precedents, and they are known to many: in the case of any dangerous diseases that threaten, for example, the shutdown of factories, factories, the

economy, and so on. To prevent this from happening, it happens that mandatory things are introduced.

Maxim : Irin, we don't know (this is Irina who writes there) which is better or worse, we will not give any characteristics to the substances, but we simply promised those who brought us this substance - C1 and C2 - to give feedback, and they given to our interstellar friends for study.

Irina : Through Irina and other contactees, I became familiar with the position of some people (now Mead is speaking) who claim that "Cassiopeia" insists on the introduction of this substance, which I personally insist, or Irina insists, or Maxim, or someone else . I have met such opinions, and now I want to take this opportunity to appeal to everyone.

My dear friends, the whole point is that you, you are the masters of your body! You, as Divine Spirits, must take responsibility! What does it mean to "take responsibility"? This means deciding which substances to allow into your body and which not to allow should be decided only by you alone with your Soul, with your Higher Self, with your Spirit.

If you have heard from your acquaintances, from friends, from parents, children, somewhere in your video on the YouTube channel, calls or images that urge you to refuse to take this substance into yourself or, on the contrary, calls to do this - both calls should not influence you in any way.

If you believe the information provided by other people (even those closest and dearest to you), on Internet channels (contactees, clairvoyants, virologists, anyone, a person can pretend to be anyone). If you refuse to administer this substance, following not your Higher Self, but some person who is authoritative for you, you will place all responsibility for your decision on this person.

It's the same with calls to do this. If you do this not because you feel so, the Higher Self told you so, but relying on authority, then you also place responsibility on the person who told you this. The Interstellar

Union always calls you to awareness.

Mindfulness is impossible without taking responsibility for yourself. Yes, and responsibility begins with such simple issues as food, drinks, medicines, various kinds of substances that you are offered to either take or not take. You see that everyone's opinions are different. You cannot take responsibility for your life, for your development, until you have taken responsibility for at least the substances that you take. This is your moment of awareness.

I also want to say this, taking this opportunity. I would like to appeal to those contactees, to those doctors, virologists who constitute precisely the negative image of this substance. I want to address those who do this publicly. I want to turn to you, my dear friends, my Divine Souls, with one request. Before you build a negative image of any substance or substance, look into your spiritual heart. Put yourself in the place of that person who, due to the special circumstances of his life, allowed himself to be injected with this substance, suddenly saw your performance, heard what you say about it. Put yourself in his shoes. How will he feel, what images will he create for himself?

And, if you claim that people die from this substance, are deprived of communication with God, become under the control of corporations, become infertile, inject themselves with radiation, you are no longer using scientific arguments, but arguments that arouse the instinct of self-preservation in a person. Arousing the instinct of self-preservation is causing fear.

Even if you really think so, remind yourself that what you say in a public speech can be heard by millions of people. Anyone who has already made a choice in favor of the substance can also hear this. He may be attracted by the coherence of your theory, and he may rely on you as an authority and believe you.

If this substance is already in him, he will believe you, your words that it will definitely harm him, it will definitely kill him (there are many such materials). It is you who will place these thoughts in him. It is these thoughts that will begin to kill him instead of this substance. Responsibility for each such Soul that has allowed these fears into itself falls on the one who deliberately released these fears into

society. And, naturally, this responsibility is not removed from those representatives of thin-material plasmoid civilizations who induced the emergence of these fears in society, taking advantage of the political, biological and epidemiological situation in the country. They've done this before. They will continue to do this in the future if you do not complete this lesson.

This responsibility is not removed from them either. These representatives also lower their vibrations and do not complete their lessons. But you, as the conductors of these ideas of plasmoid civilizations, if you help them feed on human fears and strengthen their negative impact on the noosphere of the Earth, you also bear responsibility before your Higher Self, before the Angel Mentors, before the Heavenly Father for this assistance on an equal basis with them.

Maxim : Good comment. I don't really care who says what, I do what I think is necessary and I'm not afraid of anything. The most important thing here is not to be afraid of anything. I myself am also not afraid of anything and I leave everything to the will of fate, to the will of God, so I don't worry. I know that every new day is a completely new creation. These are new emotions, new impressions. Only I paint them myself in different colors. Either positive or negative.

01:28:48 Bell ringing and viruses.

Maxim: Mid, can bell ringing kill viruses, and is it possible to do some kind of mass bell ringing practice?

Irina : Look at the messages, in my opinion, the people did not understand anything.

Maxim : The people didn't understand anything. Guys, if you don't understand something, you'd better ask again.

Irina : The motto of a normal doctor is: "Do no harm." There is little information, no statistics on morbidity, mortality and mortality. These are different concepts. What should a doctor do?

Maxim : And the bell ringing?

Irina : Yes, the bell is ringing.

Maxim : Yes, Irish, you ignored my question and started...

Irina : Read it again.

Maxim : The question was asked: can ringing a bell kill viruses?

Irina : (MidgasKaus) Don't kill. Its vibrations create sounds in space, waves that act on negatively charged, destructive, parasitic plasmoids, like unpleasant vibrations (like incense). And they scatter. This strengthens, among other things, human immunity.

Maxim : Natalya Tsvetkova writes: “Maxim, you are not surrendering to the will of God because you have accepted the substance.” Guys, look: each of you here yourself is this will of God. By his choice he decides what to do. I decided to strengthen my immune system and introduce this substance into myself. For what? In order for my body to be adapted to the artificially created substance.

Irina : (Mead responds to Natalya) When you wrote: “Maxim, you do not surrender to the will of God because you have been grafted,” you put him in the position of a being justifying himself to you, although you are not the God who gave birth to him. If he has not completely surrendered to the will of God, then only God, who fills everything, including his and your heart, sees this. By putting him in the position of a being justifying himself to you, you thereby rise as a being one step above him. And you do this with the goal (consciously or not) for him to experience a small feeling of guilt in front of you, and inferiority in the fact that you just trusted God.

No, if you think that he is mistaken, if you sincerely believe and want to show Love to him, then this is your message: “You have already done it, and now you are guilty before God.” Not before you, but before God. Although, if this is so, then God himself will reveal it to him. You decided to take the position of God in front of him. By this elevation

you showed a sense of pride, which in turn is a low vibration. It is no less low than lack of trust in God.

Now about trust. After all, you, as an adult woman who was taught to obey the laws of the material world, also do not always trust God to protect you. For example, you do not trust God; when you approach a road where the red light is on, you do not trust God and do not order him to protect you, but humbly wait for the cars to pass. You can try to trust God and go whenever you want.

Maxim : Yes. Meade is a handsome guy in general. I've been communicating with you for so long, and every day you surprise me more and more, especially with the more humanized humor that you acquire. Yes, you can trust God and run a red light, indeed.

Irina : (MidgasKaus) I can tell you even more definitely, as a biologist, you, as a woman, have undoubtedly met a man. If suddenly a man tells you in a conversation that he once had some kind of specific infection, you can trust God and not ask him to get checked again. He's a biologist. They've already fallen in love with you, Mead.

Maxim : Guys, we are discussing the substance that Irina and I took into ourselves, which many people inject into themselves with the help of doctors. The substance consists of two components, we call them C1 and C2. A substance that helps develop immunity from that virus that cannot be spoken out loud now because the channel is blocked. I hope you understand what we're talking about, I'm just reminding whoever asked.

"I don't put myself above, I just saw a lie."

Irina : Now. Mead, she doesn't put herself above, she saw a lie. (MidgasKaus) The fact that you saw a lie, Natalya, is your personal perception, which depends on your idea of what is true and what is not true. But you will agree that not all people have the same idea as you? This means that what is not true for you may be quite true for Maxim or Irina, or for anyone. If you saw a lie and said that he is guilty before God, then you must be prepared for the fact that any person will tell you this, with an understanding of the truth that does not coincide with

yours.

Maxim : But she won't be ready for this. Because she will also see lies there.

Irina : I conveyed what he said.

Maxim : Guys, now we will start asking questions directly. Irina will start reading questions from the chat itself. You can ask them because we haven't seen each other on live broadcasts for a long time.

Irina : Yes, we haven't seen each other for a long time.

Maxim : Yes. We will definitely stay with you for another half hour.

"I have four substances, 0.7 left. What to do?"

Divide by three. What should you do? The substance must be divided into 0.7 by three.

Irina : Invite curators, they will help you.

Maxim : Yes, it is advisable to invite earthly curators who supervise your Fridays.

"It's no use explaining to trolls." Yes, indeed, it is useless to explain to trolls, but in any case they exist. We also accept them as they are.

01:36:58 The smell of plasmoids.

Question from chat: Do plasmoids have a smell?

Irina : (MidgasKaus) Smell is a characteristic of a dense material body, which depends on the presence of certain molecules. Therefore, they

have no physical odor. They have a special energy, which may well be perceived as something similar to smell, taste and color, by analogy with earthly senses.

Maxim : I'll tell you what we saw here from our contactees. In principle, energy can have color, taste, and smell, so I wouldn't be surprised if some plasmoid starts to smell. I think so, a foul-smelling plasmoid will not suit you in vibration, just like a foul-smelling person who is next to you. It doesn't suit you vibrationally either.

01:38:00 Muslim prayer from October 14.

Irina : A very interesting question: what prayer should Muslims recite on October 14?

Maxim : Yes, by the way, a very interesting question. What should Muslims do? Okay, Christians, this is: "Virgin Mother of God, rejoice," but for Muslims, really, what should they do?

Irina : Good question. This must, of course, be asked to the phantom of the Virgin Mary. (LiShioni answers) I, being in the same flow with my Higher Self, with the Divine Light of Love, feel her heart. I say that this prayer must be read with a feeling of Love for it. If you have a different faith, if you treat her as an ordinary person, not the mother of God (I know the specifics of your faith, your religion), then read prayers to her without certain feelings towards her (precisely as the mother of God - in Christianity, Jesus Christ recognized as God), if these feelings do not exist, then this will, of course, be hypocrisy. This will lower your vibration.

Therefore, if you do not experience these feelings for her, then, of course, you need to read namaz 5 times a day instead of prayer. You are already reading all this. Additionally, what should you read? Simply turn to Allah in your own words, with a request to illuminate your path with the Light of His wisdom and fill your heart with love. Something like these words, every morning in your own words, every evening and before every meal. And after eating, say to every Muslim (this does not contradict his faith): "I thank and accept (you can add "Allah"), I love and bless. I promise to use this energy to develop Unconditional Love."

Maxim : Thank you very much, Mid.

Irina : LiSioni answered.

Maxim : Eh, LiShioni? LiShioni, thank you very much.

01:40:41 Increased volcanic eruptions.

Maxim : Mid, haven't you heard the information that volcanic eruptions have now begun everywhere?

Irina : (MidgasKaus) This is a consequence of the approaching new phase of the quantum transition, which the Mother of God spoke about. The first to begin to react are the quanta contained in the earth's crust. They raise their vibrations, and if these vibrations do not correspond to the noosphere, an outburst occurs. This is like a cleansing initiated by earthly plasmoids, the so-called gnomes, they control volcanic activity there.

For this to happen harmoniously, all people must strive for reconciliation. First of all, each person with himself, with loved ones, with God and, naturally, with the entire world around him. If everyone is in harmony, then this phase of transition will take place softly, smoothly and safely, without any dangerous situations.

01:41:51 Faith and Love against the virus.

Maxim: Is it possible to destroy this fashionable infection in your body with your faith and love?

Irina : (MidgasKaus) Well, of course, if you believe in all this. That your immune cells can handle it. At the same time, have physical health, full immunity, the absence of any chronic infections, parasitoses, a proper, varied diet, and a sufficient amount of exercise. And also night sleep, the absence of fears, anxieties, anything that reduces vibrations (which means it depresses the immune system), then, of course, you, as the

Spirit, will order your cells to remove this virus from the body. Quickly develop antibodies to it.

Not everyone can do this, which is why they came up with medicines and all sorts of substances. And also all methods of treatment: physical, energetic, and everything that exists in your world.

Maxim : Dear friends, everyone who has been with us for almost 1 hour 43 minutes, I will answer the questions you ask.

This means, regarding the recording of the conference with Lama Itigelov, with Sai Baba: we will not have a recording with Sai Baba, there will be a recording with Lama Itigelov and, accordingly, with the Tikhtians and Pleiadians, whose base is located on Lake Baikal. We also held a conference with them. There were many interesting questions.

This means that we are still considering the next retreat, we have not yet decided on the exact location, but it will definitely be in Abkhazia, that is, we will celebrate the New Year in Abkhazia. Somewhere from approximately the 27th to the 07th. But this will not be an ordinary retreat, it will be a New Year's, esoteric corporate event. There will definitely be training. Irina and Ilya Alexandrov will lecture you. Contactees, healers, energy practitioners, and esotericists will be present. But we will focus on trips, to places of power, to various holy places, historical places, to dolmens, to castles, to the mountains. We will conduct a huge number of meditations and energy practices there. This will be such an away tour. It will relate specifically to the New Year.

We will now decide which group we will do all this with. We will inform you about a month and a half before the start of the retreat. This turns out to be probably mid-November. In mid-November we will definitely decide on the location. We have two options. I'll tell you a secret, in Abkhazia there is a luxurious hotel on the seashore, next to the dolphinarium. We even look forward to spending time with dolphins. Swim with them. This is only our idea for now, at the same time to communicate with the civilization that supervises them, creates Souls for them. This New Year will be simply bomb. This will include light training, practices, field trips, and energy practices.

So guys, I want to say a huge thank you for your support. I feel it, all the gifts that you send to me and to the specialists will go towards the construction and development of Centers around the world. We already have 4 Centers open, but they are still small and developing. You can go to our website and see in which cities these Centers are located and what they do.

We will open centers all over the world.

"Release the dolphins." I probably agree that, indeed, the lack of freedom deprives the possibility of development, but so far human civilization is at the level of development at which we are.

Irina : You still need to ask them, maybe they like to be loved.

Maxim : But, by the way, yes. Therefore, we will definitely talk to the dolphins.

Irina : With their plasmoids.

Maxim : With their plasmoids. And we will pass on all the information in full. And you will see recordings with Lama Itigelov from the conference, with the Tikhtians and with the Pleiadians, whose base is located on Lake Baikal, in the next two weeks. I promise that I will quickly transmit these recordings, they will be processed, made, structured, and you will definitely watch these conferences.

Guys, thank you so much again! We are waiting for you in our new Center, which we have already moved to. We are now broadcasting from home. I hope that we will broadcast our next broadcasts from the new Center.

There was another question: “I want to become a contactee.” No questions, come for training, we have two courses. “Healing through the Higher Self” is a course where Irina also teaches, but you go through more wellness procedures on our latest equipment, which is not found in the world (some points). And there is a second course -

this is the “Contactors” course.

All tuition payments (I can’t even call it payments, I can call it your gratitude when you come to study) are done from the heart. There will be no prices for training in the Cassiopeia project in any Center. All spiritual knowledge will be transferred to your level of awareness.

Your level of awareness is the means by which you help us develop, help us build and open these Centers, run this channel, buy equipment for it. Therefore, thank you very much for having us. I am sure that we will carry this information to you for a long time for the benefit of all humanity, for the benefit of development, increasing the level of awareness and perception of all earthlings. And once again I want to tell you that I love you all. That's it guys, bye to everyone.

Irina : And I love you all. And our curators also convey to you the Light of their Love. See you again!

October 03, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

Video in text

#361 Live broadcast. The new project “CASSANDRA” is a prediction of the future.

https://blog.cassiopeia.center/novyj-proekt-kassandra-predskazanie-budushchego
https://www.youtube.com/watch?v=Uz4ivuryHhg

00:05 Conflict resolution.

Maxim: Dear friends, hello everyone!

Irina: Hello!

Maxim: Dear friends, you can ask all questions for this live broadcast in the chat. The link is below, under this video. In order to ask any question, you need to go to the Telegram chat. The chat is called “Q&A.” Live".

We have a very interesting live broadcast today. Today the next graduation of contactees has ended. Everyone left happy. No one signed the apartment.

In the chats of the project they write about some girl whom we captured and are holding. Blatant lie. We have not captured anyone and are not holding anyone. Julia came to help Alexey, our visceral therapist. Julia is his girlfriend. Her ex-husband and his relatives are pouring dirt on Yulia. They tried to write a statement to the police about her disappearance. When the policeman called Yulia, he scolded his ex-husband for terrorizing her and the child, but he himself did not answer the phone.

01:49 Introduction of participants.

Irina: Dear friends, good evening! Now all questions can be asked in

the Telegram chat. As always, we start with an introduction. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today the topic of the live broadcast is answers to your questions. We decided to dedicate this live broadcast to any topics that interest you.

After two live broadcasts with the disembodied Spirits of Vanga and Dolores Cannon, our curators answer: LiShioni from the planet Shimor and MidgasKaus from the planet Esler. Perhaps you have questions for them.

02:49 Project "Cassandra".

Maxim: You forgot to say about our new project.

Irina: We have news today - a new project. A new project has appeared in the Cassiopeia project, called Cassandra. The creator of the project studied at our school "Cassiopeia". She will now tell about herself.

Maxim: Hello everyone, this is our Ladushka.

Ladushka: I greet everyone. My name is Lyubov Demchenko. I live in Voronezh and am the head of a new project based on Cassiopeia. The project is called "Cassandra".

Maxim: Ladushka, please tell us what you will do in this project?

Ladushka: The project began miraculously, just like what led to the project, how I got to Cassiopeia, to school, and completed my studies. It was a miracle that accompanied me all my life.

Previously, I worked on the Transfiguration website with energies through sound. They know me under the nickname "Ladushka". Sound manifestations are not surprising to me.

One Monday I finished drinking tea. I put the cup down and hear a loud

voice: “Ladushka, get up, get ready and go to Podkletnoye. They are waiting for you". That's it, nothing more! Because I trust life, I’ve been studying esotericism for 20 years, I’m used to trusting. I calmly put down the cup, got on the bus near my house and went. With an unmanifested sound I ask my Self: “Where should I go? Get off at the bus stop?”

“No, further.”

“Where to get off?”

"At the end."

I went out and stood at the intersection. Where to go?

“Straight, further, straight, then down, then up, then left. Do you see the fence? Do you see the gate?"

“I see.”

“Come in, they are waiting for you there.”

I walked in and saw a woman in the yard. I ask: “What is here?”

She replies: “What are you looking for?”

I say: “Isn’t Cassiopeia here by any chance?”

"Cassiopeia".

I say: “Are they waiting for me here?”

“Come on, I’ll take you.”

I enter the room and see Ira talking and a group of people whom I have never seen or known. I approach the man and say: “They are waiting for me here.”

Maxim: Ladushka, we only have an hour of live broadcast. Tell us about your project. How you got here is an amazing miracle.

Irina: Yes, the man didn’t know our address, he was just watching Cassiopeia.

Maxim: Ladushka, how long have you been predicting the future with your curators?

Ladushka: I haven’t been training that long. The discovery happened in about a week, but very sharply and clearly. When the predictions came, I was surprised at first. These predictions were not only about physics, that is, health, family, what prospects someone has, who wants what. The group asked me questions.

Maxim: Will they answer about business?

Ladushka: About business, they answer about everything. The most amazing thing is that questions about business, health, family, and so on, overlapped with spiritual issues.

I realized that this project was of great value and importance, because the answers to ordinary, everyday, simple life questions turned into spiritual ones. I realized that it helps people think and get specific information on their issues.

Maxim: Ladushka, the future has many options. You will predict the future for people with your curators. By the way, who is your supervisor?

Ladushka: Can I ask a question and they will answer, or can I say it myself?

Maxim: Say it yourself.

Ladushka: I have the same curators as Ira, and there are new curators, and MidgasCaus.

Maxim: That is, from the planet Esler, Burkhad.

Ladushka: The Burkhadians, the Eslerists, tell me several at once. I don't know who to choose. Divine beings of different levels, from different planets and civilizations come to answer questions. Under the control of curators, of course, because those who ask have their teachers, the Higher Self. The work of not only my curators is going on, but also the work of questioners from higher aspects, their curators and their guides, managers.

Maxim: Tell me, please, is the future multivariate?

La **darushka:** Yes, the future has many options. Mirah Count told me that all predictions, chosen from the appropriate chain of the Multivariance Tape, will be closest to the option of the person asking the questions. That is, the most optimal answers from the entire Tape.

Maxim: Vladimir asks to talk about the science of imagery. I think we've already told everyone about it. Vladimir Goldstein conducts the science of imagery and is supervised by MidgasCaus. He passed on this knowledge to him.

We're live. Fifteen thousand people are watching us.

Ladushka: There may be questions that the curators will answer by voice.

Maxim: Thank you very much! When we open our project next week, we will provide all the links in full. People will be able to ask you three questions. Right?

Ladushka: Yes, three questions each. That's what my supervisors said.

Maxim: Thank you very much, Ladushka. It's very nice to have you with us.

Ladushka: Thank you. All the best to everyone!

11:06 Project "Science of Imagery".

Irina: Dear friends, I will answer in a nutshell what the science of imagery is about. About how to correctly build images of your reality. How to make wishes and dreams come true in the future. What images to build, how they influence the future, how they influence other people.

MidgasKaus, LiShioni passed it on to me, now they pass it on to Vladimir Goldstein. He teaches "The Science of Imagery." MidgasCaus tells me that this is one of the subjects they study at their school. At school they talk about the meaning of mental images, thought forms and the laws of their manifestation in the material world.

Maxim: Vladimir, I hope you are pleased that we talked about the “Science of Imagery” wherever possible and impossible.

Guys, I want to remind you that the answers you receive will depend on your question.

Question: what will happen in 2032, non-specific.

Irina : Will it be where?

12:50 Ladushka’s prophecy for 2032.

Maxim: Ladushka, answer me, what will happen on Earth in 2032?

Ladushka: In 2032 everything will be the same as now, but the vibrations will only be increased. You can contribute to this. In order for the Earth to raise its vibrations by 2032, you must strain all your strength, all your Love and tenderness for Mother Earth, for the Soul of the Earth - Gaia and raise your vibrations. If the vibrations of all the inhabitants of the planet are increased, then the vibrations of the planet Earth will be increased. From here, all the results are positive, or those that you yourself create.

Irina: I know why they asked the question about 2032. I know the reasons.

Maxim: Will there be contact with our extraterrestrial brothers in 2032?

Ladushka: In 2032 there will be mass contacts if you raise your vibrations and the vibrations of the Earth.

Irina: Correct.

Maxim: Thank you very much, Ladushka.

Irina: I heard the same thing she conveys. She is a contactee of the planet Burkhad. Its curator is Mirakh Count. She talked about how she was brought here, she didn't know the address, didn't call us, didn't find out where we lived. Mirah Count brought her.

When I sat and talked with the students, they told me that a woman had arrived who had gotten her address from somewhere. I met her and talked to Mirah Count. He brought her so that she could create a project and answer your questions.

Maxim: I want to remind you that Mirakh Count is a representative of the planet Burkhad. Their lifespan is up to 25 thousand years. In the Christian religious egregor he is represented as the Archangel Gabriel. Our curators brought Ladushka with a new project.

We didn't want to be involved in predicting the future before. Why? Because I, as a project manager, clearly understand that these are anchors. But since the curators brought a person, gave him the opportunity, and focused on identifying probable events using the Time Tape, then we will predict and implement the project through Cassiopeia. There are three questions you can ask in a project.

Dear Vladimir, I ask you, please, not to forward messages that are displayed live on our screen. If it's not difficult for you, please be patient and ask your questions later. Thank you very much, Volodya.

Irina: The more specific the question about the future, past or present, the more specific the answer will be.

16:22 War in Ukraine.

Maxim: They ask: "When will the war in Ukraine end?"

Is there a war going on in Ukraine?

Irina: Those who live in Ukraine believe that they are being fought, it's clear who. When will the war in Ukraine end? They tell me that this depends on the energy content of the egregor of this country.

Physical war is a manifestation on the physical level of the energy of aggression, anger, non-acceptance of each other, which has accumulated in the Souls of people, in the noosphere of the Earth, in the political egregor for many years. Sometimes it accumulates for many decades. Then it reaches the physical level through birth on the territory of the country of Souls, which unleash and continue the war.

So that they cannot act in the country, so that there is no war, it is necessary to change the egregor through cleansing and forgiveness. Forgiveness is a manifestation of Love, without it the conflict will intensify. This does not depend on the government, but on the people as a whole. If the government or people act without support, it will be ineffective. Because the egregor has already been formed.

18:17 “Blat” in the Interstellar Union.

Maxim : Is there such a thing as “blat” or “by cronyism” in the Interstellar Union?

Irina: We need to explain to him first. MidgasKaus says that the Russian language dictionary has not yet spread so widely.

Maxim: “Blat” is the advantage of one individual over another individual in solving an issue or paying attention to it.

Irina: What is the advantage?

Maxim: Advantage over others. Who also wants to either ask a question or get an answer.

Irina: It's hard to explain. When an issue needs to be resolved, for some reason it is resolved faster for one than for another who does not have this advantage. So approximately?

Maxim: Yes.

Irina: No, this is not exactly friendship. This is more likely in law enforcement agencies.

Maxim: This is the protection of someone.

Irina: He says that he understood what was being said. In our political system and in the system of executive legislation, in the system of application of laws, this is impossible, because our laws automatically imply contacting any authorities. No personal contact. Residents submit a request, and automatically, on a first-come, first-served basis, social service workers respond to these requests. Advantage is impossible.

Maxim: I see.

20:37 The meaning of predicting the future.

Maxim: Mikhail Gulyaev writes: “What is the meaning of predicting the future? Isn’t it easier to create it based on a specific task?”

Irina: This is the answer from curator LiShioni from the planet Shimor, a specialist in astral interactions. Predicting the future in our understanding is, rather, not its dogmatization, that it should be this way and nothing else. This is a description of options for the future with the goal of changing it. You have the science of futurology. They do not predict the future like fortune telling. They have a miscalculation of options.

Maxim: One of the options, which is more manifested.

Irina: Zaliatar, who is a futurologist, a specialist in viewing the Time Tape, not only looks at the most likely option for the materialization of these events in the future on the physical plane. He analyzes how to increase or decrease this probability, how to influence it.

21:56 Channelings of Seklitova and Strelnikova.

Maxim: This is the question. How true is the information in the books by Seklitova and Strelnikova? What can the Interstellar Union say about this? Moreover, say more than a dozen times. Repeat one more time.

Irina: I read one of the books by Seklitova and Strelnikova. They are universal contactees, but (I asked MidgasKaus) their main curators were representatives of the plasmoid civilization from the Sirius system. Sometimes they contacted humanoid civilizations and the Spiritual World.

How true the information is is up to you to decide. This information is their personal interpretation of what they received from contacts with

all of their supervisors. I will explain. The information is similar to the Interstellar Union, but there are differences. For example, in the description of the fate of the Souls of people who departed from God.

It is assumed that there will be a division into two systems: positive and negative. It is stated that Souls trapped in a negative system cannot return to God; they are dismantled into pieces.

From the point of view of the Interstellar Union, any Spirit is immortal. MidgasCaus explains to me that the worldview in the book is the view of some civilizations that travel to the Spiritual World and watch the Time Tape.

They look, for example, at the fate of some Soul and they see that version of the future when it does not emerge from low levels for many incarnations. They consider such a Soul to belong to the negative system.

Time does not exist in the Spiritual World; they feel it as an eternal stay there. But when the Spirit incarnates, it has the opportunity to exit this negative system. There are many examples of Spirits rising from lower levels, such as Dolores Cannon.

Maxim: Dear friends, our information does not contradict Seklitova and Strelnikova. It needs to be studied in more depth and understand what it says.

Irina: As for the death of the Soul, that it will be taken apart. MidgasCaus says they were trying to describe their contact information. They understood this as the death of the Soul, its dismantling into parts, its destruction. But they were told that the energies that negative Spirits had accumulated in the Soul would be transformed into positive ones in the next incarnation. They interpreted a change in the Soul in a positive direction as death.

25:37 Disappearance of an alien geological expedition on the planet Laagnus.

Maxim: Irina, they are asking for galactic news.

Irina: LiSioni wants to talk about galactic news.

(Says LiShioni) Hello, dear friends! I have read the galactic news report quite recently and I want to tell you that those things that may be common on your planet Earth, due to certain circumstances, are very rarely found in the Interstellar Union. Therefore, they become news for the entire Galaxy.

Typical galactic news that I learned about and decided to report as an example: if viewed from Earth, there is a planet Laagnus in the constellation Pisces. On this planet, for 90 years according to Earth's calendar, there has been the base of two planets of the Interstellar Union - Gihor and Sami. This is just a base, there is no civilization, they are doing geological research there. Specialists change, extract minerals for their planet.

The planet's mantle consists of very rare compounds of magnesium, tellurium and other elements. The planet's climate is very harsh; it is located far from its star.

The galactic news is that for the fourth day now, the biorobots that are there have reported via an automatic communication system that four inhabitants of the base: two representatives of Gihor and two representatives of the Sami have gone on a geological expedition to the mountains and are not in contact with the biorobots. And the weather got worse there. From Gihor and Sami they send a ship on a search, which will be complicated by the fact that, by law, biochips for searching are not installed on their planets at birth.

Maxim: Dear friends, you can ask your question - below this video there is a link to a chat telegram, called “Question and answer. Live". You can join this chat and ask all your questions that you need.

Irina: He says that this situation, which may be common on Earth, is amazing news for the Galaxy and a great rarity when this happens. Moreover, almost all civilizations have biochips installed, which we can

use to find those who are lost.

29:02 Differences in information from different contactees.

Maxim: Great. Irina, please tell me why your information contradicts the information of other contactees?

Irina: What?

Maxim: In some ways it contradicts. Why?

Irina: We have now dealt with Seklitova and Strelnikova. They said that the information contradicted. When you start to take it apart, you can see that we are talking about the same thing, but we are looking at one subject from different points of view.

When you read, for example, about two worldview systems - paganism and Christianity, one says: “There is one God,” and the other says, “There are many gods.” This contradicts each other. If we start to look, we will see that where it is stated that there are many gods, there is still one supreme God who created everyone. And where it is stated that God is one, he has assistants - Angels, light Spirits, who can be called his parts, his children and gods, in fact. That is, they are talking about the same thing.

Maxim: Irina, will you have flights to other galaxies? It is very interesting to know whether there is exactly the same planet as our Earth?

Irina: There is no exactly the same planet in any Galaxy. Fly for at least two thousand years to the farthest star. As the group “Earthlings” sang, we will not find such a planet, it is unique, like any other planet. Our Earth is unique.

As for flights to other galaxies, I asked Kirchiton, who is my supervisor for physical contacts. He said that for now we will study our Galaxy, at least those civilizations that are part of the Interstellar Union.

According to the rules, you need to write questions that I need to learn on flights. To other galaxies, an intergalactic liner with a different energy engine system is needed. You need compelling reasons to physically visit them.

31:22 "Hamiliya" civilization.

Maxim: Is there a civilization called “Hamilia”, which provides information through contactees?

Irina: There is. Hamilia is not one civilization, but a collection of civilizations. Currently from 9th to 16th density level.

Maxim: Guys, we warn you that we are providing information based on data from the Interstellar Union. You can read about density levels: 1st to 59th.

Irina: What we call “from the 9th to the 16th level of density” can be called one level by them. Or be called 20th.

We use the terminology of the Interstellar Union. These are plasmoid civilizations. Contactees with Khamilia came to me. I communicated with them through contactors.

There is a collection of civilizations there, but they have a civilization that very roughly resembles our capital. If this can be said about the fine-material structure. This is the most important civilization that united all of Hamilia. Civilization of the 11th density level. It is located in the star system Deneb, Alpha Cygni.

Their goal, as far as we can understand, is to increase the vibrations of the Earth. They consider their worlds to be highly vibrational, very light and divine. Therefore, they want Souls from the third level of density, after disembodiment, to incarnate with them. I was told about this.

Maxim: They inform people so that they strive to incarnate with them?

Irina: They sincerely believe that their worlds are brighter, more highly vibrational. They recognize our world as their school, their lesson. They invite you to come to their incarnation so that you can create stars and galaxies. They are stellar plasmoids of the density level that creates stars, the cores of stars.

Maxim: I see. For us they can be gods, in a sense.

Irina: We deified a lot of plasmoids.

34:06 Robot bases.

Maxim: Are there planets completely populated by robots?

Irina: Not planets. There are separate asteroids on which robot bases are located. There are also spaceships, like Ashtar Sheran's - a round ship, several tens of kilometers in diameter, controlled by robots. Like a base in space.

34:32 Parallel worlds.

Maxim: Are there parallel worlds with people like us?

Irina: Physical?

Maxim: “Parallel worlds.” I don't know what she meant.

Irina: The parallel is nearby. Nearby - in what sense? By vibrations or what?

Maxim: Irina, the question is posed the way it is posed.

Irina: (MidgasKaus speaks) When I asked contactees questions about parallel worlds, how they understand them, they gave their

characteristics. Characteristics of plasmoid worlds, which are located next to the physical world, but at a different density level. Yes, they exist.

On Earth, according to rough calculations, from those plasmoid worlds that we have discovered, for every Spirit embodied in a third-density body, there are approximately 16-17 plasmoids. They are called Nature Spirits.

The world of nature spirits, the world of elements is one of the parallel worlds of creatures that live next to you. You don't see them, but you feel them. Not all plasmoids feel people, not everyone knows about your existence, just as not all people know about the existence of plasmoids.

Some are busy with their own affairs and do not study the world of third density. There are those who study and contact you. They adapt the organs of perception of their subtle body in order to perceive your physical world through the astral world.

Maxim: Where did yoga come from, and who brought it to Earth? You can watch our videos on the yoga channel. Do we have such a video?

Irina: We filmed it? We definitely have about qigong. There was a question about yoga, I remember.

37:05 Levashov is a contactee.

Maxim: Was Levashov a contactee?

Irina: I don’t have a photo of Levashov. I can't show it to you. Now, I will introduce him. Their names don't mean anything to them. I don't know what his energy field frequency is. This is a writer.

(MidgasCaus speaks) I remember you gave me information about him, showed me a video. Yes, he was a contactee, but I didn’t know him. By vibrations, I felt, when Irina was watching the video, that humanoid

that a representative of the planet Tashig was in contact with him.

He could have curators: plasmoids, humanoids, from the Spiritual World. At that moment he was in contact with the planet Tashig, judging by the vibrations. LiSioni and I don't know him.

38:17 Healing a contactee.

Maxim: Can curators come for physical contact to heal from a serious physical illness?

Irina: We can help energetically. We can come in energy bodies. On physical contacts, healing by our technologies will be regarded as evidence of contact, which, if this fact is made public, can cause more harm than the disease itself. (So he said). Will attract the attention of contactees. Depends on the disease, that's the first thing.

Secondly, we always tell the contactee to understand the cause of a serious physical illness on a spiritual level. We help him energetically when he does this.

39:20 Children of God. Children of Satan.

Maxim: Katerina asked a very interesting question, I don't even know how to ask it correctly. Which twin brothers were conceived on March 5th and are due to be born on December 25th, 2021? One is the son of God, the other is the son of Satan. Does the Interstellar Union know nothing about being born from God and Satan?

Irina: We are all sons of God.

Maxim: And all the sons of Satan?

Irina: The sons of Satan are Spirits who serve him as God. They are also called "children of the Devil." They refuse God as a Father, do not recognize his power, do not recognize his Love, do not recognize his

right to rule the life of all worlds, despite the fact that he provides energy for life.

When the Spirit rejects God, the Devil comes to him (shows demonic creatures). They take the Spirit to themselves. It's like serving them. He is called the "Devil's child."

Just as a child of God recognizes God as his Father and authority, so the Spirit, who does evil and abandons God, abandons Love, considers the Devil to be God. That's why he becomes his child. Adopted by the Devil.

And who will be born on Earth, the son of God or the son of the Devil - these are very abstract things, you need to specifically ask the one who thinks so (to whom it will be born). You need to ask your Higher Self for it.

41:32 Exchange of energies in meditation.

Maxim: An interesting question came into the Q&A chat. Live": "On the last video of the channel of the Contact UFO Center there was a contact with a voice who did not want to say who he belonged to. He said that the Dark Ones are very good at connecting to people during meditation and practices, that they really like it. A lot people began to practice meditation. This simplified the task of replenishing energy. Is this really true?

Irina: We will first clarify the question a little.

Maxim: In one of the broadcasts of the Ufological Center there was contact with some voice who did not want to say who he was. He said that during meditation they connect to people and "feed" on them.

Irina: With them?

Maxim: The energy of people. The easiest way is to connect during meditation practices.

Irina: During meditative practices aimed at what? There are a lot of meditations. What image are these meditations aimed at?

Maxim: Irina, Tatyana doesn't write what kind of meditations. She says that during any meditation and practice.

Irina: Any thought process associated with emotions, with an emotional response, with the arousal of feelings in the heart, like meditation, reflection, any spiritual practice, is associated with energy exchange with any entities that are nearby.

When a person begins to raise his vibrations, he is visible in the Astral very far away, for many kilometers (although a kilometer is a relative concept). It glows very brightly. Non-embodied Spirits, humanoids, plasmoids (subtle-material entities) who are nearby see him. They see him with spiritual vision, as if a light bulb has turned on (shows).

Those entities that correspond to this Light begin to be attracted to it. They strive to exchange energies with him. They are charged with this Light, absorb this energy if it suits them. They also charge a person. They have energy exchange.

(MidgasKaus speaks) Do you remember, Irina, when there are contacts with plasmoids, and your students will say the same. When a person says to the plasmoid: "I thank you and send you the Light of my Love" (we had such an activity) - to the one who is in contact with him, he sends the energy of Love.

When I ask, does the plasmoid accept this energy? If it accepts, it means it is highly vibrational. This is confirmed by the fact that the same energy comes back. It is necessary to accept it. It (this energy) can pass by when a person has charged the plasmoid, but has not charged himself.

To receive energy, you need to take a breath, with the intention of distributing it in the body and saying: "I thank and accept, love and bless. I promise to use this energy to develop unconditional Love." Promise that this energy will not be used destructively.

Maxim: Guys, choose your meditation teacher carefully. Because now everyone who is not too lazy is doing meditation, and you need to look for normal, adequate, bright teachers.

Irina: It matters if a person meditates alone. There are people who practice alone. When you are physically alone, it does not mean that you are really alone. There may be dozens of entities around you at different density levels.

You begin to meditate or think about light things. We understand meditation as an expansion of our spiritual heart, as an increase in vibrations, as thoughts about the Light. Not about darkness. When these thoughts about Light, about Love, about protection, about trust begin to prevail in you over other thoughts, your life energy, which is in the etheric body, is charged by them. Therefore, the etheric body exudes Light and begins to glow with white light (shows).

Who will come to it? The one to whom the Light matches the vibrations. Does the creature feed on you? It is impossible to feed on you according to the laws of energy exchange: when the plasmoid takes on some energy, its energy will automatically leave it, from its energy structure.

Maxim: Will there be an exchange?

Irina: Yes. Plasmoids are different. Low vibration plasmoids will only be able to take the energy of low vibrations from you. If during meditation you think not about the Light, but about your fears, anxieties, remember who you are offended by, irritated, and go through the negative, low-vibration plasmoids may come. You feed them with the energy of your irritation and fear. They can internalize it. In response, they will send energy that will enter you, of the same quality as it is.

48:26 Searching for information in the Cassiopeia project.

Maxim: Dear friends, you ask a lot of questions that already have answers. Please open our YouTube channel and type questions using

keywords. I'm sure you'll find a video with the answers. Plus, we have groups on VKontakte, Odnoklassniki, Facebook, and there are articles on Yandex Zen.

Everything you ask for, 90% of the answers are in the published materials. Please study. The broadcasts are short, one hour each, and we don't have time to answer really interesting questions. Then they start accusing me of asking uninteresting questions.

Irina: We have a table of time codes where you can ask a question; The dictionary of "Cassiopeia" can be read in Telegram, in all chats. There are answers there. In the Time Code Table you type a word, there will be a number, video and minutes where it was said. Our dear volunteers were in charge of the table. They are still collecting the table.

49:34 Black hole.

Maxim: What happens if you fall into a black hole?

Irina: I remembered that I answered this question. Any physical body, be it a ship, a star, a person, will first disintegrate into individual atoms under the influence of very strong gravitational waves that exist inside a black hole. A black hole is a collection of concentrated gravitational energy.

Then the energies of the first and second levels will begin to emerge from the atoms, until only pure gravitational energy remains, which will become part of this black hole.

Maxim: Thank you. Dear Oleg Gaydamak, just under this video, which you are now watching live, there is a link to the "Question-Answer" chat. Live". Maybe not under others, but under this video it definitely is. I posted it myself so that you could join and ask your questions.

50:55 Climate on the Moon before the war 12 thousand years ago. Bases on the Moon.

Maxim: What was the climate on the Moon like before the galactic war 12 thousand years ago?

Irina: The Moon was located between the Earth and Mars. There was no atmosphere or vegetation on it. Rotation around an axis was different. Now one side of it is turned towards the Earth, but then it rotated around its axis.

The climate was not too different from what it is now. There were the same sharp changes. Temperatures during the day could reach (MidgasKaus says) about 80-90°C degrees due to the lack of an atmosphere that protects from the sun's rays. At night the temperature dropped to about -80°C, since there was no atmosphere to retain heat. Sudden changes.

The bases were under a dome (showing a large transparent dome like a city).

Maxim: Are there bases on the other side of the Moon that we cannot see?

Irina: Now?

Maxim: Yes.

Irina: There is a base of 18 civilizations that are part of the Interstellar Union, under the surface. There is a base of the Galactic Federation of Light, in another place, also on the far side of the Moon.

53:00 Transition of the Soul to the Spiritual World.

Maxim: By moving into the Spiritual world, do we fully connect with the Higher Self?

Irina: Yes, of course, but not right away. In about 40 days for

earthlings. Until the Soul, that part that was embodied in the body, is freed from the remnants of the vital energy that it had during incarnation.

According to your esoteric teachings, this is the period when the etheric body disintegrates. But it doesn't fall apart. This is just a word, for lack of analogues, the name of this process in your language.

When the life force leaves the Soul, a merger occurs. Until it leaves, the Soul can communicate with its Higher Self in much the same way as in the body, only more clearly. They will have a wide channel.

Maxim: Dear friends, you can ask your questions in the “Q&A” chat. Live broadcast”, the link is below, in the descriptive part of this video.

Irina: There is no time in the Spiritual world, I’m talking about 40 days according to earthly chronology. So many days will pass on Earth, but there is no time for the Spirit.

54:28 Time in the Spiritual World.

Maxim: There was a question: “What does it mean “there is no time in the Spiritual world”? What is there then?”

Irina: In the Spiritual world there is personal subjective time, that is, the speed of passing internal processes. The speed is different for everyone. For some, the same time on Earth may pass, for example, one hour. And for Spirits this hour is subjectively different. For some it will be like a day, and for others it will be like a second. That is, on Earth it is like the same hour. Interesting.

55:11 Quantum transition for Souls.

Maxim: Regarding the “division” of the Earth and the departure to the old low vibrations, we have already said more than once: no one will leave the body.

Irina: They understand this: when we go through the next stage of the quantum transition, some Souls who are ready for this transition will incarnate. And those who are not ready will be taken by mentors to other worlds through disembodiment. They believe that they will “take it away” - this means that no one will have the bodies. Such understanding also happens.

55:55 Galactic wars at present.

Maxim: Vladimir asks: “Are there many wars going on in our Galaxy now? Who is fighting? Can galaxies fight with each other?”

Irina: We have no data that entire galaxies, which consist of hundreds of billions of stars, can fight with each other. There are different civilizations there. Currently, there are no wars between civilizations in the Milky Way Galaxy. There are no wars between different civilizations.

Wars are being waged in one star system, locally. They have entered space around their star, but are isolated in their star system and are being monitored. The peacekeeping forces of the Interstellar Union are sent there. But if they refuse to accept them, then they do not show violence.

57:00 How to find out the spiritual cause of a physical illness? Memory of the Higher Self.

Maxim: Since I was 11 years old, I have suffered from inflammation of the skin. How to help yourself? What to start working with?

Irina: I understand you. Inflammation on the skin has physical, energetic and spiritual causes. Even if you suffer from this disease for a long time, it is still necessary to find out the spiritual cause of the disease. Go to your Higher Self. You can ask him yourself: “My Higher Self, what is the spiritual cause of this disease, and how to eliminate it?”

If you cannot perceive the answers, this happens, you should contact

the masters of the Cassiopeia Center. They studied with us, there are many of them. They take by appointment and will help you connect with your Higher Self.

Before the session, be sure to clarify your question: “I am interested in the spiritual cause of skin disease.” Before the session, turn on the audio or video recording.

The Higher Self will give the answer (they will explain to you how to talk to it, how to perceive thoughts), be sure to ask how to eliminate the illness on a spiritual level, what is required to restore the physical body. You can continue to work with the answer of the Higher Self.

Maxim: To the same question. How do I know if I have had contact with aliens? I have some vague memories.

Irina: Only the Higher Self knows exactly with whom you had contact. The Higher Self is you yourself in the Spiritual world. We call it the Supreme because it makes up 70% of the energy of your Spirit. 70% of you.

The Higher Self knows what happened to you; its memory is not blocked. It is impossible for him to block his memory with chips and technologies. It stores the memory of what happened to you and will answer the question of who you had contact with, what was the purpose of the contact, and why the memory was erased.

59:28 The embodiment of MidgasKaus on Earth. The science of Vastu.

Maxim: Who was MidgasKaus when he lived on Earth?

Irina: (Says that he answered this question). I remember that I lived on Earth, but I have not examined my incarnations to say for sure. He's not interested in this.

Maxim: Why isn’t he interested in this? We would all be interested.

Why is no one interested in them?

Irina: Because I am focused on life on Esler.

I have memories of life on Earth from my Higher Self. I drew, wrote something (shows books and paintings). He was a scientist. Shows that he draws flowers and describes their properties.

Maxim: Some biologist.

Irina: Yes. But that was a long time ago on Earth.

Maxim: What can you say about the science of Vastu? What material should residential buildings and walls be built from? In a nutshell, what can we say?

Wonderful science, read the books, everything is written there. I read before I started building the centers. I have read both Vastu and Vastu Shastra and many more. Class! Everything they say is correct. Homes should be light, breathable, and made from natural materials. Do it according to Vastu and everything will be fine.

We will not say anything about other contactees or their systems. We do not force anyone to believe us or other contactees. It's better not to ask such questions.

1:01:30 Incarnation of the Soul in a cloned body.

Maxim: Can a person's Soul incarnate into a cloned body with its DNA?

Irina: What does it mean to be incarnate?

Maxim: Let's say they took your DNA and cloned you. Irin became two. Only Irina died. Can a Soul incarnate into another Irina?

Irina: Theoretically, it can only if the goal of the embodiment is written in its program. If the Consulting Angels allow her. Theoretically, if the body is grown, there will be an analogue of birth. This will not be called "cloning". This would be raising children. To do this, she must go through the queue for incarnation and determine the purpose of incarnation. Theoretically possible.

But in my practice I have not met such Souls who would want this when they found themselves in the Spiritual World. Their task is to go to another world, to incarnate through other parents.

Maxim: I ask the last question. I scroll down the chat “Question-Answer. Live". I will read out the question I come across.

1:02:59 Information from the Soul data bank.

Maxim: Where did the Soul of Nefertiti incarnate? Who is her family, her tasks on Earth? Where is it embodied now?

Irina: You need to talk to her. Let me explain again. My curators do not look into the data bank about each Soul. They are scientists who are on Earth and are in contact, transmitting information to the Interstellar Union.

Everything that concerns other Souls, their programs and places of incarnation, they can give information only, firstly, with the permission of these Souls with whom they are not familiar. Secondly, to the extent that this Soul itself allows.

01:03:49 Souls of destructive entities.

Maxim: Do Souls inhabit destructive entities?

Irina: In plasmoids?

Maxim: The man asked “in essence.” Maybe it is necessary to explain that there are “spiritual entities”, there are subtle-material entities.

Irina: Whether the Spirit inhabits spiritual entities is interesting. If you mean parasitic plasmoid civilizations, of course, they do. The same Spirits are born to them and go to incarnation at one or another level of density.

Where exactly the Spirit will incarnate is decided by the Spirit itself together with its Consulting Angels. If he has to take a lesson in some civilization, he is given the task of incarnating there. If he had a tendency to parasitism at the expense of other people, then the Consulting Angels after disembodiment see this program in his, as you call, karmic body. We call it modified mental.

Seeing the program, they can recommend that the Spirit incarnate in that plasmoid civilization that is undergoing a lesson in abandoning parasitic programs. When he incarnates there, he may not follow the path of Light, he may abandon his life task. Every Spirit is free. He may take a destructive path.

Maxim: How not to miss our next issue online?

Irina: If you have a mobile phone, download a program called “Notepad-Reminder”. It has a feature: each day is divided into hours. Find next Sunday, 20:00 Moscow time and write “remind event.” There will be a beep.

Maxim: Guys, thank you all. Until the next broadcasts. Thank you so much for your support! Many thanks to all the people who write thanks. Many thanks to all contactees with whom we harmonize.

If you think that our information contradicts information from other contactees, then it is better to ask other contactees why their information contradicts ours. Listen to their answer.

We can explain. We try to explain any information based on our point of view. Many people say: “They are talking nonsense.” The

information seems to be contradictory, but it is presented consciously. There are so many contactees, so many conscious people who will present you with information.

The Cassiopeia project is ready to harmonize with any contactees. Only contactees are not ready to harmonize with the Cassiopeia project, so as not to lose their individuality.

Guys, bye everyone. Until the next broadcast, happy everyone!

October 31, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Lyubov Demchenko – head of the “Cassandra” project;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

#368 Evening Chicago. Interview about extraterrestrials, aliens

and contacts with UFOs. Cassiopeia

https://blog.cassiopeia.center/vechernij-chikago-intervyu-ob-inoplanetyanah-prish
https://www.youtube.com/watch?v=CkEIq1vpAW4

00:01 Introduction of participants.

Evgeniy: We continue our broadcast. Evening Chicago, dear friends, in Chicago with Evgeniy Kolkevich on ReklamaRadio. As I already announced, at this time, at 5 hours 32 minutes, we begin our conversation with Vladimir Goldstein. I greet you, good evening, Volodya!

Vladimir: Hello, dear friends! Thank you to Evgeny for today we have the opportunity to talk about a very exotic and very important topic at the same time.

Evgeniy: But it is generally considered mystical.

Vladimir: Not anymore, I think. Nowadays, so much mysticism has happened in the real world that it is no longer mystical.

Evgeniy: You're intriguing. Let's try to voice what we are going to talk about today?

Vladimir: Friends, today I decided to illustrate with myself, in some way, what we will talk about. Whoever watches us, see the video sequence. It says here (points to the name on the blue T-shirt) “Cassiopeia.” This is a difficult, unusual T-shirt, it’s not for nothing that I’m wearing it. This is the logo of the project “Cassiopeia” Irina Podzorova,” which (the entire project) is dedicated to the fact that Irina Podzorova is in contact with aliens. This is a contactee.

Evgeniy: Here! About this, dear friends! Today we are talking about

aliens.

Vladimir: Yes. Aliens or aliens, someone says.

Evgeniy: Yes, aliens. What do you think, Volodya, what percentage of our viewers and listeners believe in what you are going to talk about? Your guess.

Vladimir: I think 30 percent, to be honest, at least somehow believe. But I want to say that the resources of the Cassiopeia project have gained more than 100 thousand subscribers in less than two years. This is a YouTube channel, all social networks. This project receives close attention from the Russian media, not because it is a project of Russian security forces, as someone would immediately think. No, not because of this, but because, indeed, it is no longer possible to hide, everything has come to the surface. That's why there was Malakhov's program, which you can watch, dedicated to Irina Podzorova, it's called "Vanga's Predictions Come True." Because Vanga predicted imminent contact with aliens.

Now in the Eksmo publishing house, the largest Russian one, a book of which I am the literary editor is due to be published by the New Year. It's called "Irina Podzorova. Diary of a contactee."

I won't say all these details. I'll also say that the film was shot by the Rossiya TV channel, directed by Roman Koshchienko. You can watch a three-hour film on YouTube about Irina, the Cassiopeia project, drone footage, and so on. It is called "Voronezh-Cassiopeia". Remember, there was the film "Moscow-Cassiopeia", Soviet children's fiction, but now it's true - "Voronezh-Cassiopeia", you can easily find it on YouTube, on the channel "Cassiopeia" Irina Podzorova. You just type "Voronezh-Cassiopeia" in your browser, and a lot will become clear to you.

Evgeniy: I would like to say that the topic you are raising now is very interesting. I believe that, in principle, we know practically nothing. We don't know about the world in which we live. We still don't understand how we even appeared on this Earth.

Vladimir: We already understand.

Evgeniy: No, I know. I mean in society. I know that such advanced people as Vladimir, of course, already understand, or contactees like Irina Podzorova. Because I watched not only Malakhov's program. I watched this three-hour film, read a lot of information, just an article that was written not only in the newspaper "Advertising", but also in "Proza".

Vladimir: Yes, in the newspaper "Advertising", please read the article if you are interested (I hope you are already interested). Interview with an alien for the Advertising newspaper through Irina Podzorova.

Evgeniy: Personally?

Vladimir: Yes, personally. Directly sends greetings to the readers of the Advertising newspaper. This interview took place about a year ago. You will find it easily on the Advertising newspaper website. It is called something like this: "Soon those who deny the existence of aliens will be considered..." And who will be considered is up to you.

Just type "Irina Podzorova" in the search engine on the Advertising newspaper website, and you will find the article. This is an interview with MidgasCaus, with Irina's curator, from the planet Esler.

Evgeniy: I want to ask: didn't you ask Irina to convey greetings through her curator to the listeners of the Chicago Evening program?

And, can you imagine, you come: "Friends, he says hello to you, how is it... MidgasKaus?

Vladimir: MidgasCaus. This is not a Lithuanian name. This is simply an interpretation of the name from the planet Esler, it is written together, but there the second part is written with a capital letter. It is written together, that's the whole point, it's a long story, there is a certain system on the planet.

Evgeniy: Well, interesting.

Vladimir: Let’s, now, if possible, just play the anthem of the “Cassiopeia” project. This is an absolutely original anthem, sung by a professional singer, one of the Russian pop stars.

Evgeniy: Well, if you even have an anthem, it’s generally serious. Let's try. Wait a second, let's repeat.

Vladimir: This is not without reason! In such a program, you know, when aliens are present here in the astral body, this has never happened to us, I’m not joking. The equipment failed.

Evgeniy: Thank God, our equipment does not fail. It’s just that now, at the moment, I want to make a video as well. It’s not just for everyone to hear.

Vladimir: This is actually a video clip.

Evgeniy: I just want to say right away, dear friends, everyone who is now watching us on the Facebook page “ReklamaRadio” will now play a video during this anthem. Please have a look. (Hymn and video of the project “Cassiopeia”)

Hymn text.

You came into this life like a fairy tale hero,

And when it’s not easy, I ask you to remain yourself.

It seems to you that happiness and the sun are so far away,

But, having returned to yourself, you will easily see the Spiritual world!

Here is my hand, and I am next to you,

Star family – “Cassiopeia”!

Together we will explore the worlds and constellations,

We are one family – “Cassiopeia”!

You came into this world to lead your loved ones,

Trust and love and remember who you are.

Give bright light and warmth to everyone around you,

And in the sky you will shine as a guiding star!

Here is my hand, and I am next to you,

Star family – “Cassiopeia”!

Together we will explore the worlds and constellations,

We are one family – “Cassiopeia”!

Here is my hand - “Cassiopeia”!

Evgeniy: Interesting, this is “Cassiopeia”. I guess I would like to hear an explanation from Volodya.

Vladimir: It wasn’t just a hymn for the sake of a hymn, it’s a video clip in which you saw footage, a video sequence from one of the retreats of the Cassiopeia project. These are people who are in the know and came to communicate with Irina. There is not just communication, not

just conferences with aliens who are in astral bodies, and Irina speaks. There is a long story there, she has chips through which she transmits information very cleanly.

But there, training is serious training, school, classes, where they talk about a variety of aspects related to the structure of the world. So, there is a video of one of our retreats, where I, among other things, was. You see real people, a huge number of them.

Evgeniy: This is in Voronezh, in my opinion?

Vladimir: Irina herself is in Voronezh. Video series from several retreats. One of them was in Belarus, and the other was on the seashore in Sochi. And now we had a retreat where I was on Lake Baikal, where the alien bases are located, and it was also very interesting there.

Let me tell you first, because I already feel that our listeners really want to know: what kind of contacts does she have? And she has physical contacts, including!

Evgeniy: Facts, more facts!

When I watched Malakhov, I heard a woman talk about how she had not only physical, but also sexual contact with aliens.

Vladimir: Yes, but it was not Irina. They just invited people into the studio who were supposed to act out. They played their role and, so to speak, diluted the situation.

Evgeniy: What do you mean “acting out”? So it's not true, right? So they are playing?

Vladimir: Those who came to the studio acted out on the instructions of the editors. You, if you just watch the program, it’s a talk show, there should be a downside.

Evgeniy: Are you saying that a woman who had a sexual relationship with aliens is not true? I'm just asking a question.

Vladimir: I want to say that this woman did not and does not have anything to do with the Cassiopeia project, and I cannot comment on whether she had or did not have. I just do not know.

Evgeniy: I think that a lot of people were invited. You are already jealous of the fact that there is “Cassiopeia”, but there is someone else, somewhere out there, they are up to something, right?

Vladimir: I’m just used to being responsible for my words and what I know I can comment on, but what I don’t know I can’t comment on, that’s all. I have been talking with Irina for a very long time.

11:27 Communication with the Higher Self.

Vladimir: Since I myself am a radio host and journalist, I write articles, I have extensive journalistic experience in the newspaper “Reklama”, I am often able to quickly distinguish the truth from the not quite. I tried to expose Irina for two years. And what kind of questions did I ask her (not only me, but also scientists). More than 300 video conferences have been posted on the YouTube channel, where scientists, doctors, and certified specialists ask questions. And believe me, oncologists and physicists learn a lot there. You can watch all this on the channel.

Evgeniy: Volodya, please tell me, what about you personally? Did Irina teach you or pass on that experience or skill that she uses?

Vladimir: Yes, I did. I'll tell you now. Besides the fact that the aliens told us in detail about how not everything is simple.

Evgeniy: Who is this for us?

Vladimir: For us – for all of us.

Evgeniy: To humanity.

Vladimir: Yes, all of us. Through Irina and other contactees. Irina is not alone. They talked about the structure of our world, the Universe, who, how and why created us, and the real history of humanity. You can read all this in the article I wrote. You will find it easily. Type “The Real History of Humanity from Aliens” on the same browser; it is posted on “Prose.ru” and on our website.

Besides this, they said this: you don’t have to believe us, that’s not the point. You simply connect with yourself, with your spiritual part, which is immortal in each of you. It is implemented to a small percentage. Some call it the “Spiritual Self,” others the “Higher Self.” They gave the practice of connecting with her. Everyone can connect. We have very simple practices, either with the help of the Cassiopeia project master, or by yourself. This is the point, connect with yourself.

Evgeniy: Okay, why wasn’t there information available before?

Vladimir: Good question. The answer is quite simple. Anyone who is more or less interested in topics around UFOs, ufology, esotericism, I know very well that a huge amount of facts have been accumulated. It is absolutely clear that all this happened; it can be found in the scriptures. Lately, ufology has become a very developed thing, but the question is different.

13:35 Reasons for the lack of evidence about the presence of aliens.

Vladimir: Why don’t they give us evidence that they exist? Simply put, why don’t they come at all?

Evgeniy: Why don’t they come, don’t appear?

Vladimir: Why not sit down on a plate? This movie, what was it called? "Wish, Ford." A plate near Bely, on Red Square.

Evgeniy: This is not necessary. Here you and I are talking about them. And suddenly an alien has now materialized here, and I look at him and say: “Yes! Here he is! Near!"

Vladimir: About – it materialized. They say that this is not very possible. In fact, materialization is a fairy tale. There are astral contacts. People confuse astral holograms with materialization. Teleportation is a thing that, if possible, requires a huge amount of energy. Nobody needs this. Therefore, there are indeed fairy tales here. But aliens are here at the bases and do not give us massive, publicly available physical evidence for two reasons. Here I name these reasons.

The first reason is that if this is done through a contactee (they tried), then the fate of the contactees is very sad. The secret services are interested in them and use them. Then for some reason they (how to put it mildly) disappear somewhere. And this happened more than once.

Evgeniy: I just want to say that, in my opinion, the special services have been doing this for a long time.

Vladimir: Naturally, the special services are aware. By the way, please watch Dmitry Medvedev’s speech at the beginning of the 2000s. You can easily find it by typing “Medvedev about aliens” in your browser. A unique situation. They interview him, and a journalist approaches him. This is all posted, please, video on YouTube.

After some recording on television, a Russian television journalist, a woman, giggling, tells him: “Dmitry Anatolyevich...” He answers her absolutely seriously: “Before each presidency, the President of Russia is given a secret folder in which...” She looks at him, doesn’t know , what to say next. He answers something else, and then with an absolutely straight face (and this was not the first of April) says: “And you can find the details in the film “Men in Black.”

And it’s still not clear, everything is absolutely serious!

We just know what happened - it was a test of public opinion to see if people were ready.

Evgeny: Through Dmitry Medvedev?

Vladimir: At that moment, yes. Are people ready? No one disavowed anything or said it was a joke. This was sometime in November. Look, this is a very interesting video. He told, in fact, much of the truth. Our alien friends tell us that the governments of all major countries are well aware of aliens, of the Interstellar Union, which includes 117 civilizations, of which 4 are our creators. Moreover, they have artifacts, alien ships, and even had captive aliens. Everything is well known to them, it is not a secret. But they hide it and have the opportunity to hide it, because otherwise they will lose their power.

16:29 Creation of man.

Evgeniy: Can I ask a question? Everything that happens, as I understand it, on our planet, is all the work of our alien friends?

Vladimir: No, not at all like that. And it’s not even like that at all. Here's why: they created us, we are hybrids of several alien civilizations and earthly primates, indeed, we are from monkeys, but not completely. We have 45 percent primate genes, and the rest are a mixture of genes from several civilizations.

Evgeniy: Lizards, they say, are still present?

Vladimir: Reptilians. Only 5 percent are reptilians. And they created us as their assistants. When we were created as hybrids 3 million years ago, we were supposed to eventually become their full-fledged assistants (in a good sense), with full rights to enter the Interstellar Union. But we have free will. We used it the way we use it. Collective consciousness. They are only present and intervene if things are very bad.

17:27 Prevention of nuclear wars on Earth by aliens.

Vladimir: They clearly told us that several times they broke the chain of nuclear missiles - this was in the 50s. Several times - they didn't say how many times they stopped. Both the governments of the United States and the USSR knew about this. Then they were told: "Don't start, we won't allow it anyway."

Evgeniy: It's clear, dear friends, if you want to tell Vladimir everything you think about him - 847-596-12-40. Please, 847-596-12-40.

Believe it or not. Maybe there are contactees in our city, and you didn't know that Vladimir is in our studio, and he is a representative of "Cassiopeia", not the planet, of course, but the "Cassiopeia" community.

18:21 Possible consequences of open mass contact.

Evgeniy: Tell me, can they help us? Why don't they help with Covid?

Vladimir: I'm not finished. The second reason is why they do not engage in open mass contact (we have the OMK terminology - open mass contact). Everyone would like it, right?

They see certain options for the development of the future in the so-called Time Tape (not exactly, but they see multiple options). So, a very high percentage, if they come to us, it will not help us in any way.

Let's imagine: that's it, the aliens have landed. What do you think will happen? They say that the softest thing is that there will be confrontation. Not even to them, but between us. Society will be divided, some will like it, some will not. And then in the future, perhaps, there will be a war in our divided society, and not a cold war. Why? Because some people will like it, some won't, and some people's interests will be harmed by it. And here is an illustration of my answer. A year ago, we conducted a survey at their request, a video was posted on YouTube, a survey asking whether we, earthlings, want evidence of physical science. contacts?

This video was watched by 100,000 people, and more are now on

YouTube. It was a vote on whether we wanted to get physical. evidence (just physical evidence) or not. Only 10 percent voted. Everyone else doesn't need it at all.

19:47 Advantages of joining the Interstellar Union. Conditions for the Earth's entry into the Interstellar Union.

Vladimir: Let me read it to you. Through Irina they told us what we will receive if there really are open contacts and the Earth enters the Interstellar Union. On what terms - I will tell you later. I will only read part of what will happen, listen to what will happen, what we will get: "We would like to inform you that if your planet joins the Interstellar Union, all legislative acts of your states will be brought to the norms of our community, which were set out to you earlier through contactors. Attention! Every citizen of the Earth will have access to the technical, scientific, medical, cultural and spiritual achievements of the Milky Way Galaxy." The acts are presented immediately. Next, what are the achievements?

"In particular, these are: interstellar flights on ships with the possibility of gravitational jumps. Possibility of relocation to permanent residence on the planets of the Interstellar Union" (here I am shortening). "Widespread replacement of heavy physical labor (the work of specialized robots), the introduction of high-tech medical care, disease prevention, the introduction of teaching standards (their standards) in your educational institutions, mandatory contact between law enforcement agencies with their structures in order to create a unified system that serves to control and crime prevention." There's a lot I'm missing. "Help in cleansing the Earth's nature and space from all pollution, in building a new type of planetary infrastructure." And so on and so forth. Here are their signatures. Specific signatures, who it is: Artis is a specialist in contacts with young races, a biophysicist, the planet Tuluari, the Lyra civilization, and so on, the main curator, several aliens from different planets.

In order for this to happen, so that all these achievements are not buried, so that they do not use them for military purposes and do not kill each other (as we usually do when we get access to technology), there are conditions on which we can only join.

These conditions, there are not many of them, I will read. Conditions when they can not only get in touch with us - we also need to try harder, but so that we can join this community.

So, “a complete rejection of the death penalty for a crime, since it only causes harm to all participants in such a situation on a spiritual level and is, in fact, simply revenge with a lack of understanding that the entire society as a whole is responsible for what was done.”

The next thing is “the rejection of abortions performed without valid medical reasons, primarily because they do not take into account the plans of the evolution of Spirits coming to incarnation from various spiritual levels and who have been waiting for a long time for their turn to incarnate.” And three more conditions.

“Active concern for the ecology of the planet on which we live, rejection of technology and other global actions that destroy the Earth’s ecosystems.”

“Introduction into the education system of knowledge about the true meaning of spirituality, about the Spiritual world and the development of the Spirit, as part of a single loving Creator, and about the true structure of the Universe as a whole, going far beyond the framework of our vulgar materialism.”

They know about the Creator, there is no doubt about it, we are talking about God.

And, finally, “the will to join the Interstellar Union, expressed by a clear majority of the capable population of the planet, at least 70 percent, in a universal open vote.” Like this.

Evgeniy: Yes, we are definitely not ready yet.

22:50 Covid. Collective vibrations. Quantum transition.

Vladimir: Definitely! Covid and this whole story. If you want to know,

it's not a secret, they told where the virus comes from and why it is spreading. The reason lies in the collective vibrations in the noosphere of the planet (I know, Zhenya loves this word - vibrations, I love it too).

Evgeniy: One hundred percent. We all vibrate.

Vladimir: Collective vibrations, spiritual (a certain quantum transition, a quantum leap is still taking place now), these collective vibrations are so low that something like this could happen.

They made it very clear that the virus was developed in Chinese military laboratories. But literally a few military bosses knew about this (I don't know how it is now, they were talking about it a year ago). It really is a weapon. But this was not a combat use of it, but a test on a human scale. Then there are a number of details.

Evgeniy: Okay. Then, Volodya, we will pause for literally three minutes and continue our interesting conversation. Friends, get ready, 847-596-12-40.

Dear friends, we continue our program. Before we meet with Vladimir Goldstein again, I want to once again remind you of our phone number 847-596-12-40. Now, dear friends, we will return the station ID and continue the conversation with Vladimir Goldstein.

We continue our program and we have a call. Let's try to accept it. Yes, we are listening to you, hello!

25:03 Alien social systems.

Radio listener: You know, I turned on the radio late and didn't hear everything. Most of all, what is the system on the planet where these aliens who created us live? What system do they have? Do they rule money the same way as we do? Do they have capitalism or maybe communism, no money at all? You can say it briefly.

Evgeniy: Thank you! Listen to us on the radio.

Vladimir: Thank you for your question! Of course we asked these questions. Moreover, these questions were asked not by amateurs, but by financiers, political scientists, scientists, including Russian ones. We have (you can watch recordings of these conferences on YouTube), including about this. Believe me, it was about both socialism and communism. There was a whole group of political scientists, scientists, philosophers who asked at one of the conferences.

First of all, I need to say something important. The fact is that we are not dealing with any one planet or civilization. We are talking about the Interstellar Union, in which there are 117 humanoid civilizations out of 727 humanoid civilizations located in our Milky Way Galaxy. And there are also thin-material ones - plasmoid ones, we are not talking about them now - this is a separate topic.

Evgeniy: Do they still have socialism or communism? We still have a call, so hurry up.

Vladimir: They have neither socialism nor communism in those exact terms as we understand it, and there is no capitalism. There is rather, if we already talk about it, convergence; the best is taken from all systems. You know, the best was taken from Sakharov. Therefore, you really need to work there.

Evgeniy: Do you have money?

Vladimir: There is electronic money. You have to work.

Evgeniy: Dear radio listeners, you still have to work.

We are listening to you, hello!

26:49 Souls of animals and insects. The influence of collective vibrations.

Radio 2 listener: Hello! I don't really believe what you're saying, but I have a question. Did they also create elephants, tigers, worms, fleas, or is that how it happened?

In order for them to arrive in some kind of devices (with knowledge of even the school curriculum), please tell me, even if you can accelerate to the speed of light, then you need to slow it down somehow, not with the atmosphere? How much fuel will you need? I'll listen to your opinion.

Evgeniy: Yes, listen to us on the radio, thanks for the question.

Vladimir: Thank you for the interesting questions, and I will try to give interesting answers to them too.

In relation to animals, in general about animals, plants, insects, viruses and so on. We are all immortal, intelligent Spirits. There is another terminology - Spirit. Because the Soul is already something with the help of which the Spirit enters the next body, this is reincarnation.

So, we are immortal intelligent Spirits. But there are also the souls of animals - this is a completely different category of Spirits, they can also sometimes leave and come, but they are not immortal, unlike us. And they are created by thin-material plasmoid civilizations, but also aliens, only they create these Souls in the subtle world, a special type of Souls - the Souls of animals. Including the variety of insects you are talking about. These thin-material plasmoid civilizations create collective Souls of insects and others. Then they incarnate, physical bodies are formed, including insects and viruses.

These civilizations create insects based on their vibrations. If the insects are not very pleasant, they are low vibration. And our collective vibrations, of intelligent Spirits on Earth, are such that we allow and attract to ourselves the possibility of similar creatures on Earth: mosquitoes, fleas and others.

In the Universe there is complete freedom of choice for everyone. Our freedom of choice could be at high vibrations, then not only would

there not be any vampiric creatures, but also vampiric people. Spirits from low levels incarnate here, those who later become criminals.

The collective level of vibration is such that like attracts like, this era is called “Kali Yuga”. It ends after a while and how quickly it ends also depends on our collective vibrations.

29:50 Kali Yuga. Estimated time of possible open contact.

Evgeniy: Kali Yuga is still more like Vedic knowledge?

Vladimir: It doesn’t matter. It's just terminology.

Evgeniy: I understand.

Vladimir: This is indeed an objective process to a certain extent. But it can take place in completely different ways: more harshly, less harshly, softly - it depends on our collective vibrations.

The end of Kali Yuga will be when we enter the Interstellar Union. And in the best case, of course, (this is not a one-time event), if we raise our vibrations by going through the quantum transition, viruses, 80 years awaits us. In 80 years, we have a prospect (this is not one hundred percent, but there is a prospect in the Timeline) that there will be open mass contact, we will fulfill some of these conditions, at least some. And at least we will know for sure. They will show themselves openly, and not like now: someone was shot down by accident, someone fell, was captured, everything was hidden. In 80 years, perhaps everything will happen.

Evgeniy: But Vanga also predicted. In my opinion, she did not say in 80, but that around 2050 humanity will learn about its origin.

Vladimir: It’s all multi-variant, it changes all the time.

Evgeniy: The second question was: how to accelerate?

Vladimir: Look, of course, I won't tell you everything in a minute. You need to watch our videos. I'll try to be very concise.

31:10 Engines of alien ships. Teleportation.

Vladimir: They have three types of engines. One engine is planetary. It is used inside the planet, it is quite simple, in some ways close to ours, but it has its own specifics.

The second engine is an interplanetary engine, which can be used to fly between planets at high speed.

And the third one, which you are asking about, is called gravitational. They described everything in great detail, as far as we can understand - graviton and so on. There is no breaking the laws that we know, because there is no exceeding the speed of light. There is what science fiction writers call a puncture of space.

Everything is described in detail. Very little fuel is needed. As you say, this is not a nuclear engine, a completely different principle. These particles - gravitons - accelerate and instantly transport the ship to some given point in space.

You're right, we really need to slow down. The technology is already there, and braking takes time. Therefore, to get to the other end of the Galaxy, it takes about 15 minutes. The jump itself is instantaneous, but to get to where the engine can be turned on, and then approach the planet - this takes time. And the jump itself is instantaneous.

Evgeniy: I see. But even in the same program by Malakhov, where a young man moved somewhere, without understanding, seven kilometers, that is, some things are happening that we cannot understand today.

Vladimir: We are now talking, essentially, about teleportation. They tell us that teleportation—moving a physical body somewhere, over some distance—is theoretically possible. You can decompose the

body into elements: into light, energy, transfer it and collect it there. But this requires such energy expenditure that it is comparable to the energy released by a star.

Evgeniy: Oh, you!

Vladimir: And that's why, in fact, no one does that - it's easier to fly than to teleport.

33:13 Jesus Christ.

Vladimir: Now I'll tell you a sensational thing. If we talk about such spiritual personalities as Jesus Christ, who is really alive, and he is in a physical body - this was the Resurrection, lives on one of the planets in the capital of the Interstellar Union, in the Cygnus Constellation on Burkhad, then he could do this! But this is the Firstborn Son of the Creator.

I want you to hear me. Why did I know this was true? There, everything is connected into a single puzzle: it is clear where religions came from, who gave them, why this is so, there is no denial of the Almighty. Everything is explained from a scientific point of view, and not on the basis of some clouded faith. Although, all spiritual traditions, all religions, without exception, were given by them for different peoples, at different times. Everything is different.

Evgeniy: This is logical. Everything was to improve, let's say, people's lives.

Vladimir: As people could understand it, they gave it in that form.

34:06 Is Gagarin alive?

Evgeniy: You said that Gagarin is also alive?

Vladimir: Not exactly. Gagarin is still alive. Vanga said that he did not

die, he was taken. By the way, we recently had a meeting from the Spiritual World - Irina talked with Vanga. This is all possible too, please look at the channel.

So, there really was physical death. This “took” meant that he immediately found himself in the subtle world, a certain transformation took place, he had curators. Now he is embodied in the body of an alien on one of the planets outside the Galaxy, and this is not a completely humanoid body, but there are already details there. Our spirit is immortal! And he is already embodied in the physical body.

34:49 Reincarnation.

Evgeniy: Okay, tell me this thing: reincarnation, what is it?

Vladimir: Reincarnation. We don't have much time, we need to talk for a long time.

We have little time to learn in one life the lessons that we have accumulated over many past incarnations. Once again, together with our mentors and curators in the Spiritual world, we form a dense body, we come here with some goals and objectives. We go through the lesson that we have outlined for ourselves, then we go there, there is some work on mistakes. Moreover, we find ourselves at that level of the Spiritual world, the vibrations of which we most often emitted here, for example, it was love or hatred. We are attracted to that level of the Spiritual world - like attracted like, cumulatively those energies, those vibrations that we emitted. Then we come next time, because in the Spiritual world there is neither time nor opportunity to develop. There is stagnation there.

There is an opportunity to develop only when incarnated into the material world on any planet. Moreover, we can incarnate, just like on any other planet - to become aliens, and on Earth. Doesn't matter. In that world there are no boundaries: in the Spiritual, in the astral - all of this is us, immortal, rational Spirits. They come to us, we come to them. You could have been incarnated on another planet, next time we can also be incarnated on another planet. This is a single field of immortal intelligent Spirits.

36:06 Wars on Earth.

Evgeniy: Okay. The fact that religions are at enmity with each other, and there have been wars, and there have been problems - is this also precisely human?

Vladimir: The human factor, of course. If you look at the root, exactly at the root, at least read it on Wikipedia, but deeper. Here I am multi-religious, I am in all faiths, I know all the main faiths from the inside. It didn't break me, nothing happens, I can come to the synagogue, to the Christian temple and I can come to the mosque. Converted to Islam, among other things. There are no conflicts at a deep level.

And then it started, all these are ours: if you don't eat the soup that I like, I'll put it on your head or I'll kill you. That's all. And these are different views on one Creator, just a little differently, if you look at the root. And they all gave this for different purposes at different times for different peoples. Then refraction occurred for all of us for a number of reasons.

37:03 Reptilians in governments. Disaru. Saint Germain.

Evgeniy: There is a lot of talk about the fact that in many governments there are reptilians who have taken on human form.

Vladimir: The situation is as follows. The story is about reptilians. You see, if we are talking about the fact that the Spirit, which was a reptilian in a past life, the immortal Spirit, incarnated into the human body, then, of course. In this sense, we can say that, yes!

The reptilian planet Selbet is one of the planets of our creators. They were also in the Garden of Eden - Paradise, and everything was then passed on to Moses by them. Now I won't go into details. So, if so, then yes.

But, if you want to say that it was some reptilians who physically arrived now...

Evgeniy: They turned into people and became presidents.

Vladimir: These are fairy tales! But they can really be reptilian contactees and convey their information. But reptilians are not bad.

There's a whole story there. There was a war with them 12 thousand years ago, confirmation can be found in the geology and archeology of the planet, this is known. 12 thousand years ago and we did not have the Moon as a satellite before that. This is all described in the article in which I told our real story.

The reptilians are not bad at all, now they are completely good. They all came to their senses. There was a situation where they were taken back to the Interstellar Union. They expelled me, they took me, it was a terrible war. These are the very series of floods that are described. It was terrible there: they moved the Earth out of orbit, then the climate changed, about half of the animal and plant world disappeared. Noah is a collective image. It was the earthlings who were taken away on ships. There were many such Noahs.

Indeed, they rescued us and took us to the planet Disara. Friends, there is a planet where there is still a civilization of earthlings who did not want to return to Earth when everything settled down. This civilization is part of the Interstellar Union. That's where we essentially live. They are very developed because they constantly had contact with the Interstellar Union, unlike us, they did not lose it. They are coming to us. These are the same people who walk among us.

Specifically, I will say the name of the most famous historical character who is still alive on the planet Disaru, because they live for a very long time. This is a person, essentially, with our DNA, and his name is... Attention! Search Wikipedia and you will easily find it. His name is Saint Germain. Count Saint-Germain, the same one. There was contact with him, you will find everything.

39:33 The science of imagery from aliens.

Evgeniy: Okay, what benefit does it give us if we know this information

today?

Vladimir: What's the use? I'm saying very specific things. Personally, through Irina Podzorova, the alien, the same MidgasCaus from the planet Esler, gave me an entire course, the so-called Science of Imagery, which is taught to all children at school on the planet Esler. And there are analogues on other planets of the Interstellar Union.

With the help of this science you can change your reality. It seems that everything is known, but there are keys there that are unknown. Simply, with the help of visualization and proper work with images, materialize in your life what you strive for. Science of imagery, please. You can take my course.

Evgeniy: This is the film "The Secret".

Vladimir: This is the film "The Secret", but the thing is that in the film "The Secret" you were not given some important secrets.

Evgeniy: They didn't give you the keys?

Vladimir: Yes, they didn't give me the keys. And now the time has come, they gave it. And there is this in transurfing. Now given, please come to my course.

Evgeniy: Many people said that the film "The Secret" was also not made for a long time.

Vladimir: It's true, gradually.

Evgeniy: Gradually, yes. And Kabbalah was also given over time.

40:35 Practice connecting with the Higher Self. Attitudes.

Vladimir: That's not all. The second thing is very important, or rather

even the first. I have already mentioned that these are practices of connecting with oneself, with the Almighty, who is inside each of us. With the disembodied part of our Spirit, which makes up 70 percent. We are only 30% embodied on Earth (we are aware of ourselves). You can connect with yourself.

Simple practices. I can help. You can do it with me, you can do it yourself. I'll say right away that all spiritual services in the Cassiopeia project are carried out according to the principle of "gift according to the heart" - donation." There are no price lists, no prices - "a gift from the heart", this is a clear rule.

Evgeniy: A gift or a blow to the heart?

Vladimir: Who cares. "A gift from the heart", "donation" – everything is from the heart.

And one last thing. They gave a whole range of ideas. In particular, morning moods that connect you to light egregors (as they say now) have been specially adapted and translated into Russian, and they will help you.

I will now give an example of a very short mood. This is the attitude from planet Esler. The curator of MidgasCaus gave it to Irina. Listen here. What vibrations does this reflect in you, do you want to use this every morning?

Attention!

"I am the Universe. The Universe is I. The Power of the Universe is my power, and my Spirit is part of the flow of existence of the Creator of all worlds. His power will be directed to the benefit of all beings living in all worlds and planes of existence. Reality in Truth will arrive, and lies in the illusion of perception will disappear forever."

Evgeniy: I think that on such a positive, kind, warm and benevolent note, we will say a huge thank you to Vladimir for the information.

I'll tell you honestly, my attitude is that it sounds interesting, first of all. The main thing: it seems to me that there is something in this. There is a greater reality to this. Why? Because we have to figure it out, because there are people who believe, and there are people who don't believe.

Vladimir: Absolutely exactly. Everyone has the right to their own point of view.

Evgeniy: 100 percent. But it seems to me that there is no need to reject it. If there is even one percent that this is reality, you must definitely pay attention to it and put it in your consciousness. And then how it will work.

Vladimir: Absolutely exactly. I would like to add one last thing regarding materials about the Cassiopeia project. Please find my interview on the Gazeta Advertising website with Katya Lel in two parts, where she talks in detail about her physical contact with aliens. About how, as a child, several teeth were painlessly taken from her for experiments, and clones were made from them. You will find out all the details on the resources of the project, where she gave an interview; we had a conference.

Evgeniy: This is a singer, right?

Vladimir: Famous singer Katya Lel. She doesn't hide it. There was physical contact, everything became clear. Irina said: her curators came and explained everything why this happened. There was her agreement in the Spiritual world.

Evgeniy: In my opinion, it was when you were young, at 18 years old or younger, at 16 years old?

Vladimir: And she has x-rays. Confirmed at this level. The implants are in place. Three teeth were taken.

Evgeniy: Yes, Irina Podzorova actually received contact at the age of 13.

Vladimir: At the age of thirteen there was first physical contact near Voronezh, the village of Peski. In the film “Voronezh-Cassiopeia” everything is shown in great detail. Her story, of course, is not how it happened.

On the street in the evening there was a triangular object from the planet Daraal. The very impressive alien Kirchiton with 3 eyes invited her to fly. As it turned out later, there was also a contract in the Spiritual World. They took her away for a short time. Then there were installations of physical chips, with the help of which she has such a unique pure contact, but they mimicked body tissue. Then there are a lot of physical contacts.

Evgeniy: You are now talking about the fact that you have a course that was given to you. Do you do this often enough?

Vladimir: Four streams have already passed; literally yesterday (even today) this fourth stream ended. Three seminars in zoom. The 5th stream starts on Monday. You can get there. There are more than a hundred participants, but there are still places available. To do this, you need to find me, write to me in a personal message on Telegram (Vladimir Goldstein), or find me on Facebook or through the editorial office of ReklamaRadio, or something else. I’ll tell you how to get into the Telegram chat, then get to the next stream of the Science of Imagery course, where there are a huge number of people. There we are talking about thousands who are taking the course and want to sign up in order to positively change their reality and the reality of the world around them, which is basically the same thing.

Evgeniy: This is remote, right?

Vladimir: This happens in Zoom, online.

Evgeniy: Friends, I want to tell you that at the moment, if you are now watching us on the Facebook page “ReklamaRadio”, then there I posted a photo of MidgasCaus.

Vladimir: But not a photograph, probably.

Evgeniy: Drawing, of course!

Vladimir: Evidence is prohibited!

Evgeniy: A picture that someone drew from Irina's words. Planet Esler, constellation Boötes.

Vladimir: About 30 light years from the Sun. It's very close. There are 200 and 500, but here it is side by side.

Evgeniy: Connect or open, or, if you listened to us now, at the moment on your phone or on the radio, please come home, open Facebook "ReklamaRadio" and see the MidgasKaus drawing.

Interesting! Very interesting, I am grateful, Volodya, for what you conveyed to us. If there is anything interesting, if there is any news...

It seems to me that this topic is generally bottomless.

47:18 An opportunity to improve the world. Possible timing for reducing the "danger of covid".

Vladimir: Every Sunday Irina broadcasts live on YouTube. There, aliens report galactic news through her. There is a complete exchange of information. You can go to YouTube, the channel "Cassiopeia" Irina Podzorova," where there are more than 100 thousand subscribers. Of course, I can convey this here, but I need to understand whether this is interesting to the readers of the newspaper and the listeners of Radio Chicago. Maybe it's not interesting, but it's not necessary. If you're interested, I'm ready to do this regularly.

Evgeniy: Let's agree this way. This is interesting to me, and if it's interesting to me, let's try to broadcast it to our radio listeners through me. Tell me, why did you come here and try to convey this information?

Vladimir: For a very simple reason, friends. I came here because I want to live in a world that is pleasant to me. I came from selfishness. I want to live in a world where there is more goodness. Love.

Evgeniy: Selfish goal.

Vladimir: Yes, a selfish goal. More goodness, more Light, Love, everyone loves each other, no one steals, steals, kills, rapes. It's more pleasant for me to live in such a world. Thanks to this information, I can begin to gradually live in a more pleasant world with you.

I urge you to help me and yourself. This is the Science of imagery - go inside yourself, connect with your Divine Light. Let's make life more pleasant for each of us in this world.

Evgeniy: And you ask why come, what information? The fact is that those who listen to us, having learned about this, having received this information, will already think about it. Some people believe, some don't believe, it doesn't matter. The time will come, I'm sure the time will come.

Vladimir: Undoubtedly, it is already coming!

Evgeniy: It's already coming! I absolutely agree with you! Because a lot is changing now. I wanted to express my point of view regarding this particular disease, coronavirus. Today people suffer and worry, but the time will come when people will be happy. They will begin to understand why and why all this has come, why the world has changed today.

Vladimir: I can tell you when it starts to end, if you want.

Evgeniy: Come on.

Vladimir: There is information from the Time Tape. If we at least do not further lower our collective vibrations, then the activity of the virus (of course, vaccination and all these things have not been canceled

today) will decrease over the next approximately two years. By the age of twenty-five, all this should become common, one of the usual diseases that no longer cause such destruction.

Evgeniy: Like the flu used to be.

Vladimir: This is not a guarantee. Everything changes and depends on our collective vibrations, everything is polymorphic.

Evgeniy: If we, Volodya, conduct such programs with you more often, then we will bring our bright future closer.

Vladimir: Of course, definitely! I'm not kidding now. This is not pathos. This is our mission. With those who will listen and heed this (I'm an adequate person, I wouldn't do this if it were some kind of nonsense, I checked it many times), undoubtedly, you and I will be able to change ourselves a little bit, and the world consists of us. If you want to change the world, change yourself, because we are all parts of it.

Evgeniy: How often do people who listen to you turn their heads?

Vladimir: Lately, practically none. I'll explain why. When a person comes to the YouTube channel of the Cassiopeia project (and there are 105 thousand subscribers), he understands that he is probably in the minority. Too many crazy people. He sees all these programs and programs. A book in the largest publishing house "Eksmo" is now preparing for release (in hardcover, with all the nuances) about the "Cassiopeia" project. Time changes, changes.

Evgeniy: Indeed, it is changing. Dear friends, let me remind you that we had Vladimir Goldstein on air, I call him "Journalist" - a person who writes and works in this direction, and I think that such a person can be trusted. Thank you!

Vladimir: All the best! Thank you to all listeners for your attention! Hope to see you again!

Evgeniy: I have no doubt that we will talk about this topic again, there will definitely be a reason. Thank you, Volodya!

Vladimir: Thank you!

November 18, 2021

Conference participants:

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Evgeniy Kolkevich – radio host of “ReklamaRadio”;

"ReklamaRadio" listeners.

CASSIOPEIA 21 - Irina Podzorova -

Information transmitted by our space friends through Irina Podzorova, a contactee with extraterrestrial civilizations.

https://www.youtube.com/watch?v=Iu0H2sq98uE

00:17 Background.

Voice-over: In the summer of 1999, a 13-year-old girl Irina Podzorova from the village of Peski near Voronezh agreed to take a short trip on a triangular-shaped ship with aliens from the constellation Cassiopeia.

Since then, for more than 20 years, representatives of the civilizations of the Interstellar Union of our Galaxy, which includes 116 of the 727 intelligent races present in it, have regularly come into contact with it.

01:14 Project “Cassiopeia”. Physical contacts of Irina Podzorova.

Evgeniy: Well, dear friends, this is such interesting information. Now in our studio is Vladimir Goldstein. I will probably try to test him a little today for you, or to doubt what he is talking about. If you, friends, have the same thoughts or others, please call our studio 847-596-12-40 and ask questions to Vladimir Goldstein, who will tell us what he encountered, what he saw, what he heard and what knows. I welcome. Volodya, hello!

Vladimir: Hello, dear friends! I’m also glad to see and hear you all. I hope you see and hear me. I thank Evgeniy for inviting me to the program with this interesting topic for the second time.

First I’ll say: you see, it’s not for nothing that “Cassiopeia” is written on my T-shirt, the logo is beautiful. And the beginning of the film that you saw is a film shot by the Rossiya TV channel, a professionally made wonderful film about Irina Podzorova, a contactee from Voronezh. And I am one of the administrators of a project that is already quite famous in the world, namely in the world - I’m not afraid of this word - the project “Cassiopeia. Irina Podzorova”, which is dedicated to her and her many years of contact with alien interstellar civilizations, our extraterrestrial friends, who are her curators. You can watch the whole film, it’s called “Voronezh-Cassiopeia”. You can easily find it on the Internet on YouTube on the channel of the “Cassiopeia” project, similar to the film “Moscow-Cassiopeia”, only this is not fiction, but reality.

I want to say that I cannot boast that, just like Irina Podzorova, I physically fly on alien ships. By the way, just yesterday she returned from one of the physical contacts. I talked to her at night and in my Chicago evening. This recording will soon be processed and posted on the Cassiopeia project channel on YouTube.

There is another sensational flight, you will find out where she flew and why. Let me just say this: it was a planet, a civilization that we call dragons or Draco. And they told us about their plans. They are not part of the Interstellar Union; Irina was accompanied by curators from the Interstellar Union. For some, my story probably doesn't sound like anything at all! You know, what's interesting is that the time has passed when you immediately twirled your finger at your temple. And it turns out that many are ready, everything is fine.

So, they told us about their plans, about the fact that the story with chemtrails, nanochips and all this - we don't have all this, but with our collective fears, maybe we can help them implement these plans and it's all for us bring. Although they are unlikely to succeed, there is also the Interstellar Union, which takes care of us.

04:35 Society on the Draco planets.

Evgeniy: Draco – are they negative, bad?

Vladimir: The Almighty loves everyone. They simply have their own goals and their own understanding. The understanding is that our free will only hinders us. Better is a totalitarian system without free will, through chemical influence, the same nanochips that they have. The entire population, no dissenters.

Evgeniy: Microchipped, right?

Vladimir: Yes, there are no dissenters. And everyone seems to live calmly and in order. But only…

Evgeniy: Stable.

Vladimir: Yes, stable. If someone does not agree, he is already considered a mutant and he is sent to a special planet - it's not far from there, Irina was also taken there, and with the help of the same chemistry, among the biorobots they try to remove this desire to dissent. And everything is fine, everything is fine.

Evgeniy: Well, actually, you told me that. It's clear.

Vladimir: It breaks right away, right? Today, friends, Zhenya and I spoke in advance, he asked me to give some more specific information.

Evgeniy: Can I ask you a question?

Vladimir: Yes.

Evgeniy: Because you are now telling all this crap. You're leading there, to some planet somewhere, Draco...

Vladimir: I'm telling you this on purpose to cause a scandal so that people will call.

05:49 Retreats.

Evgeniy: Great, great! 847-596-12-40 calling fire on ourselves.

Wait, I know you can talk for hours, especially about aliens. Please tell me, you said that you have been an administrator for many years.

Vladimir: No, I am not a long-term student, but only two-something years. But Irina has been in contact for many years.

Evgeniy: It doesn't matter, you're an administrator there, you're doing something there.

Vladimir: Your own, on topic, yes. I am a volunteer.

Evgeniy: I understand that you are not paid money for this, of course. And you have already been to retreats conducted by Irina several times, right?

Vladimir: Absolutely right.

Evgeniy: What kind of retreats are these?

Vladimir: One retreat was in the spring in Belarus. And the retreat I attended relatively recently was on Lake Baikal in Ulan-Ude in a tourist complex on the shore of Lake Baikal. All kinds of courses are held there, a school where Irina teaches. All the information that is transmitted to her is already structured and systematized. We are learning how our world works, how to interact with it from the point of view of our creators.

These alien civilizations - three of them created us, this is a separate topic about the structure of the Spiritual world. It is said that it would be nice if we had all this in the education system from childhood, like on these planets. And then, friends, if we knew how the Spiritual world actually works, what happens to our immortal Spirit (with each of us) after physical death, how everything works - believe me, for this reason alone, without any chemtrails , nanochips and changes in free will, we would behave differently.

Evgeniy: What makes you think that we need this at all? You are now telling us how we were created. The spiritual world is understandable, it is necessary. But where did you get the idea

that what is said through Irina is the ultimate truth?

Vladimir: I asked myself this question. And when I literally two years ago did a program on one of the radio stations with Irina, I also had all these doubts. I tortured her for two years, tried to find some inconsistencies, conflicts, tried to catch something. Didn't catch it. And it turned out that there was a complete picture of the world that explained everything. I wrote on this topic.

Evgeniy: Wait. I understand that I didn't catch it. Maybe you saw it?

Vladimir: Did you see anyone?

Evgeniy: Bad.

Vladimir: Didn’t you see well? But I heard it well. You see, friends, a very logical picture of the world that explains everything: the spiritual knowledge that came to us, and where all religions come from, and why they are like this, and our entire history, and how we were created. To do this you need to read this article. You can easily find it, it is called “Our Real History from Alien Civilizations”, and perhaps you will share my point of view.

08:40 Science of Imagery.

Vladimir: Now they have conveyed what happens at retreats - answering Zhenya’s question - a course called “The Science of Imagery”. This is a course with the help of which (the principles of the science of imagery) you can change your reality correctly.

We already know all the visualization techniques, transurfing, etc. But some important keys were not given there. Now they have given these keys, and with the help of visualization, the correct construction of an image according to certain principles, you can change your reality. You can take the course with me. Soon there will be a seventh stream. Now it's the sixth, it's sold out, please, on Telegram.

Evgeniy: I just wanted to ask you a question: does Irina teach this course, where you were, simply as students or as teachers?

Vladimir: I see. There she teaches like students. If you want to become a master who will lead a person to his Spiritual Self, to the Higher Self, to become a teacher, you need to come to Voronezh. I do this. I simply connect, help a person connect with his immortal part, the Spirit. Inside you is the Kingdom of God, everything can be found there, not somewhere outside, but inside. There are such practices. You need to study in person with Irina. There is a school in Voronezh, in the Center.

Evgeniy: Did you go?

Vladimir: I didn't go because we met in other places, at retreats. And, besides, I am an administrator, almost at the origins. That's why my situation is special.

Evgeniy: Are you close to His Majesty?

Vladimir: You can say so. To the aliens.

Evgeniy: I see. Close.

Vladimir: Relatively. Therefore, you can take this course from me, it was given to me by an alien named MidgasKaus, planet Esler, approximately 30 light years from the Sun.

Evgeniy: Is this Irina's curator?

Vladimir: Yes, Irina's curator. He goes to the Astral with her, and he passed this course on to me, we know him through her. A systematic, completely clear course where all this can be studied, please come to the Telegram chat "Science of Imagery". Or write to me in a personal message - you will find it. And you can pass it - hundreds of people pass.

Evgeniy: Yes. It's also possible, friends, if you are now watching our "Chicago Evening" program, a visual program that is broadcast live on the Facebook page "ReklamaRadio" - there you can see the phone number, Vladimir Goldstein, 847-877-17- 65. You can call, contact Vladimir and sign up for this course.

Vladimir: You can also easily find me on Facebook under my real name and surname, you can find me on Telegram, on WhatsApp.

Evgeniy: You're not hiding, right?

Vladimir: I'm so open that I couldn't be more open. You will find me wherever you want.

Can I say one more thing? The question immediately arises: a commercial organization, a business. Friends, with us all spiritual knowledge is transmitted according to the principle of "gift according to the heart", donation. You can pay as much as you feel. That's it.

Evgeniy: In short, friends, hit your heart and be sure to come. By the way, Irina also gets hit in the heart, right?

Vladimir: Of course, everything is donated. Spiritual knowledge only according to the

principle of donation. At the retreats, you just had to pay for accommodation and food - that's not for us, that's understandable, but not the spiritual knowledge itself.

Evgeniy: Flight, arrival, of course.

Vladimir: Naturally. I would love to fly on planes for donation, but for some reason I can't.

Evgeniy: Wait, are the aliens not helping, or what?

Vladimir: For some reason there is no money. Knowledge of how to make money - that's it. There are courses on finance, but they are not directly related to the Science of Imagery. There is a management course there.

Evgeniy: Are they also present in your courses?

Vladimir: Yes. This part will be there too. This is a more advanced course, you need to take the basic one first. Basic seminars of the Science of Imagery are 4 seminars of 2.5 hours each on Zoom.

Evgeniy: Is it all online?

Vladimir: Yes. And then there are advanced courses, for example, the Time Management course for the day from Zaliathar, from the planet Raom-Li, in the Pleiades - another alien.

Friends, I understand that for some this sounds very unusual and fantastic, but do you understand what the trouble is? This is true.

Evgeniy: I can tell you that live, when I watch, when Vladimir looks into the camera and says: "It's true, friends, it's true!" - I want to somehow believe.

Vladimir: You will come to the courses and at least watch videos of 360 recordings on the YouTube channel, conferences with Irina, in which serious doctors, oncologists, physicists, chemists participate, and then you will draw your own conclusions.

Evgeniy: Do you know what bribed me? I watched this before working on this story and inviting you to the studio, I, of course, understood. I think aliens who don't speak today, you know? Flying saucers – you're right when you say it, they've been playing around with it, few people believe in it.

Vladimir: They are spinning less now.

Evgeniy: Less, because there is more awareness. Today there is information available online that we can get very quickly. Of course, there is still mistrust, there are people who are distrustful and skeptical about this.

But I looked and listened, by the way, it was really interesting. I was captivated by the fact that Irina, in principle, does not have much basic knowledge...

Vladimir: 10th grade education.

Evgeniy: As I say, great basic knowledge, she tells scientists and academicians things that she, in principle, cannot know!

Vladimir: Situations constantly arise there when she says a word and has difficulty pronouncing it - this is astral contact through chips. She says: “I don’t understand,” she says to them, to her curators: “I don’t understand, you can say it in some other words,” she said with difficulty, and the interlocutor says: “No need, I understand everything, let’s continue.” .

Evgeniy: You see. Why am I just saying this - it, of course, captivates and says - yes, maybe there really is something in this.

14:53 Blavatsky.

Evgeniy: The only thing I want to say is a very interesting point, the fact is that there is already information, for example, have you heard about Blavatsky, about the Roerichs?

Vladimir: Of course, I actively heard it.

Evgeniy: Naturally. But Blavatsky tells completely different information. She conveys what was conveyed to her, and she was told to convey to humanity, and she then conveyed to the Roerichs, what also happened today - is it a little different?

Vladimir: I will answer if the question is exactly why Blavatsky and the Roerichs have some differences in their information from the one conveyed by Irina.

Evgeniy: Yes.

Vladimir: Of course, this question has been asked more than once. And this is the answer. It was clearly formulated for us. Blavatsky was also a contactee of many civilizations. Both humanoid and thin-material, as we call them, plasmoid. This is what is happening, this is all, and plus she also took it from dances, from ancient knowledge, from the Vedas - she transformed it all in a certain way, collected it, somehow changed it all and added some of her

creativity.

These views really (the contactee has the right to do so) differ. There is one important nuance. If we start to understand not just how they “got crazy” in Ukraine, but let’s say specifically - Blavatsky said this, this specifically, and here is this. And then it turns out that there is no conflict. This is simply said about the same thing, from a slightly different point of view, but in basically different words. Here's the story. Therefore, we need to discuss this specifically.

16:27 Creation of the human race.

Evgeniy: No. In the last program you said that man emerged from animals. Blavatsky has a completely different approach to our appearance.

Vladimir: We need to make things clear. First of all, I wasn't really talking about animals. Now I’ll quickly repeat: we were created three million years ago by three alien civilizations, specifically: Tumesout, Burkhad and the Selbet civilization - reptilians who gave us their genes. But, in addition, we have 45% of the genes of terrestrial primates, we are hybrids. But the rest of their percentage.

So, when Blavatsky spoke about something else, she was talking about slightly different forms of life, these thin-material, plasmoid ones - and this in no way contradicts one another. And we in our current humanoid form are what I am telling you about now.

Evgeniy: I see. Wider vision.

Vladimir: And there it was all mixed up.

17:22 The role of the spiritual component of a person.

Evgeniy: Okay, I think that you have somehow answered this question. Let's move on to what you wanted to start with. It is our spiritual component.

Vladimir: Friends, I wanted to tell you some background, some basis. This is exactly what it would be nice to start our education with, to give this system of information at school. This is where I wanted to start.

If we had known from the very beginning how the Spiritual world works, then you and I definitely would not have started doing what we are doing. That's it for sure.

Evgeniy: What do you mean?

Vladimir: If we knew that you and I are intelligent Spirits, immortal, and after leaving incarnation some things happen to us, that we then incarnate again (and we can incarnate both in our civilization and in others), then absolutely we would behave more adequately in this world.

Evgeniy: Do you want to say that if we believed **,** sincerely believed, because we were told about this from childhood, then it would be inside us, and this would be the style and meaning of our life?

Vladimir: Absolutely right, exactly that.

18:33 Spiritual foundations of "Self-love." Percentage ratio of the incarnated part of the Spirit and the Higher Self.

Evgeniy: I see, good. Then please tell me what's going on. Let's figure it out: I can tell you, the 10 commandments are also taught in church schools, but for some reason this does not stop people from doing some bad things?

Vladimir: The fact is that the teaching that they give us today – it in no way contradicts any spiritual traditions. They gave us all these spiritual teachings. What they convey to us does not contradict anything. But there are more detailed things. We are told that our Spirit is immortal, that when we leave incarnation, we pass into the Spiritual world. It all depends on how (not news, right?) the person behaved. Perhaps he alienated himself from the Almighty by not transmitting Self-Love, first of all, because only "love your neighbor as yourself," and for some reason we are taught not to love ourselves. For what?

Evgeniy: Yes. Think about your Motherland first, and then about yourself.

Vladimir: It turns out that you can only share what you have, you know? Only if you have love, it flows, yours towards yourself, it pours out, you love yourself, as a part of the Almighty, you can love others. You can't help but love yourself, but love others – you have nothing to share.

So that's where it starts. They teach us self-love. But Love for yourself, as a particle of the whole, not egoistic love, but as a particle of the whole, the one. Then you begin to love other parts of the whole. There is a whole practice there, Self-love through connecting with your Spiritual Self.

Evgeniy: Is this also taught at retreats?

Vladimir: They teach exactly how to connect with your Spiritual Self. Because they say that on Earth we are present, aware of ourselves only 30%. And 70% of us are in the Spiritual world, this is our spiritual part, the Higher Self. They teach us to practice how to connect, to become more aware of our Divine, immortal part, which is only 30% embodied on Earth.

It's different on other planets. There are even fewer reptilians on the planet - by 10-20%, by 15%. And on the planets of our more advanced creators Burkhad, Tumesout - there, on the contrary, there is a 50-70% degree of embodiment.

20:51 Enlightenment. Meaning of life.

Evgeniy: What does it give them there?

Vladimir: This means a greater degree of awareness of merging with the Almighty.

Evgeniy: A happier life?

Vladimir: We call it enlightenment. What is enlightenment? We are more connected with our Divine part. And we perceive this as a connection with the Almighty - this is true.

Eugene: When you teach and give the opportunity to connect with your Divine Self, what happens at this moment? What does this give?

Vladimir: At this moment you receive answers to questions that have tormented you all your life. Moreover, you simply understand how to live. You begin to love yourself more, which means you begin to love the world around you. You act completely differently, you react differently to all situations and circumstances of the material world. And most importantly, they tell us what our specific goal is.

What is the purpose of life? Meaning of life? It turns out there is an answer, and you understand this meaning very well on a deep level. Attention! And it lies in this, friends, in the material world, in all events, circumstances, in everything that happens to us, to learn to realize, to see in this the Love of the Almighty towards us.

Evgeniy: This is somehow very banal, to be honest. That's what you said: "Attention!" And this is natural...

Vladimir: Does anyone do this?

Evgeniy: Everyone does. All faiths talk about this.

Vladimir: Does it work?

Evgeniy: In different ways.

Vladimir: It doesn't work out very well. Why do they say it doesn't work out very well? Because we are very shifted by a certain refraction of these teachings. Shifted outward. We all strive to get there somewhere, to get from above.

What is the fairy tale "The Adventures of Pinocchio or the Golden Key" about? What is P. Coelho's bestseller "The Alchemist" about? After all, they walked and walked, and the treasure was nearby. Do you understand what the point is? The same phrase of Jesus, "The Kingdom of God is within you," speaks about this briefly and succinctly: within you. But the keys and walking are correct. We go in order to acquire some qualities and realize that this was in Papa Carlo's closet.

Evgeniy: I don't understand, are you against various houses, temples, churches?

Vladimir: No way!

Evgeniy: How? People go there, it's easier for them.

Vladimir: People are walking, everything is correct. And this is good, and for many people it is necessary to go, and I myself am multi-religious, a member of all faiths. Absolutely everything – it happened that way, I didn't do it on purpose, it happened.

23:20 Religions. Egregors.

Evgeniy: Are you a Baha'i?

Vladimir: Not only. Eh, Baha'i? Yes. But I am not just a Baha'i who is part of the Baha'i Tembola. I didn't do it on purpose, it happened naturally. I have discovered that it really all comes down to one higher truth. There are no conflicts in depth, in the foundation, because they passed on this knowledge to us for different peoples with different goals.

What's most important? In all spiritual denominations, no matter how you turn to them, ultimately, at some point it turns out that you are united with the Almighty, if you have discovered this Divine spark in yourself, if you have realized at some level what is in you within is the Kingdom of God.

Evgeniy: It doesn't matter where you are, right? In a synagogue, or in a temple, or in a mosque, or just one on one, or at your retreats, or at Irina's retreats - it doesn't matter?

Vladimir: It doesn't matter, absolutely! You discover this Divine spark within yourself. Jesus directly said: "The kingdom of God is within you," he did not say outside.

Evgeniy: Maybe, maybe. Jesus said, and the Jews say what Jesus said – I'm not interested.

But what Vladimir Goldstein says is most likely true.

Vladimir: This exists, you can find it in absolutely any confession, if you look deeply. Let's tell the truth: in many spiritual denominations, of course, there are ministers who find it more beneficial that through them, as through intermediaries, it is actually better for someone. You use this egregor.

What is an egregor? An energy structure, powerful, that helps you connect too. This is all normal. I myself go and feel great at church services, great, praying and feeling connected. But I more deeply realize that a piece of God is in me, precisely in me.

The aliens told us: “You use the term Higher Self less, because when you say “Higher,” you mean that you are “inferior.” This is not entirely true. You better say "Spiritual Self" because you are as much a part of the Supreme, including your physical body. You are also the Highest, God also loves you immensely, it’s not that someone is worse or better.”

And everyone is trying to make it “worse” for us, somewhere out there, and creating this illusion.

Evgeniy: When do they say that God is everywhere or God is around us?

Vladimir: Absolutely right.

Evgeniy: In space?

Vladimir: Absolutely. Its offices are located absolutely everywhere. But what's the point? His closest and most important representation to us is within us. This 30% is the spiritual particle we are aware of, immortal. That's the problem.

26:07 Levels of the Spiritual World. Fire Gehenna.

Evgeniy: Please say rebirth. Reincarnation happens all the time, always?

Vladimir: This is what is happening. We find ourselves in the Spiritual world. Moreover, we are naturally attracted to that level of the Spiritual world that corresponds to our cumulative spiritual vibrations accumulated during this current life. If for most of our lives we are in a state close to the Divine, in a state of Love, then we will naturally find ourselves at high Divine levels. In Paradise.

There is a certain clear gradation: from level 1 to level 24, we are somewhere there. Above the 24th we simply cannot discern, there is complete Divinity. If we already talk about this, Jesus is on the 24th.

And the first levels, on the sixth level is Lucifer. The first three levels are just fiery Gehenna.

And now, the most interesting thing is, what is “fiery Gehenna”? The answer will be interesting. It turns out that this is a place where there is the same Divine Light that is at the highest levels. The sun shines equally on everyone. Those Souls who in our world - rational Spirits - denied, for example, the existence of the Almighty, not because we simply said: “He does not exist.” Not in this case. And in actions, instead of Love, they pulled away.

Evgeniy: Atheists won’t go there?

Vladimir: If an atheist says: “I don’t believe in the Almighty,” but in essence he leads...

Evgeniy: But he leads righteously, yes.

Vladimir: It doesn’t matter at all. He can do the best deeds. He just doesn't believe it mentally, and it doesn't matter. What matters is how it is in practice.

Evgeniy: How are you behaving...

Vladimir: If you alienated yourself from the Almighty, in fact you alienated yourself from yourself. You tried to deny this Light inside yourself.

So what's going on? You are entering the Spiritual World. It contains your decision to distance yourself as much as possible from the Light of the Creator - you denied it, you wanted to be in hatred, in evil, in something bad, in fear - it will be realized. Your choice according to the Supreme Love of the Creator will simply be satisfied and realized. You will get to those levels of the Spiritual World not because you were punished, but through the natural path of your choice.

Where will the least Light of the Creator be? These are just the lower levels. But the most interesting thing is that this same Light is inside you. And what will happen at these lower levels, precisely at the first three, in fiery Gehenna?

Why fiery Gehenna? Because this Light, which you denied, will not go anywhere, but will burn you from the inside. You pushed him away, and now it has become suffering for you. At the highest levels, this same Light is Good, because it was accepted by the Spirits, it is joy and happiness for them. This same Light at lower levels will burn from within.

Due to beliefs, this is perceived in any way (for example, like devils with cauldrons), and they will come to the Spiritual world, it will be there. In fact, your Light will become fire for you, because you declared that this is bad for me, this is fire, you pulled away, and it will burn you from the inside.

Evgeniy: I'm shortening it a little, because there's only a little left, and I want you to tell as many interesting things as possible. Friends, I just want to say: don't deny, please believe! So I see how passionate Vladimir is now.

Vladimir: To make it easier for you, I will say that our project has well over 100 thousand subscribers on all resources: these are channels, and all social network groups - we are represented everywhere.

Very soon a book will be published in the largest Russian publishing house "Eksmo", there was a program with Andrei Malakhov "Vanga's Predictions Come True", where Irina was present, she was the main contributor there - you will also find this easily. On the Internet, if you want, watch a film from the Russia channel. Close attention to the project.

If you start to understand more deeply, don't just brush it off, that's also your right, no problem. But if you go watch videos on the YouTube channel "Cassiopeia. Irina Podzorova," that is, there is a high probability that you, like Zhenya, will understand that: "Wait, in general, maybe there is after all?"

Eugene: I never deny anything, when I first learned what energy is, how it works, how important it is, and the Love and Goodness present around us and in ourselves - today I relate to what you say, of course, with great understanding. But still, let's say according to Vysotsky: "That we, having given up our ends, do not die for good."

Vladimir: Reincarnation.

30:59 The purpose of the incarnation of the Spirit. The process of incarnation of the Spirit. Abortion. The concept of "metanoia".

Evgeniy: Yes. So, it means that we have reached our level from 1 to 24, and then what?

Vladimir: And then this is what. This is also interesting. There is no time in the Spiritual world. Nothing changes there. We cannot change our vibrations there, somehow raise our intellectual level, or learn anything. We can rethink our lives, but in order to somehow change... What does it mean to change?

Evgeniy: Take it to the next level.

Vladimir: Yes, to become happier. Why rise - more joy. Still, they live only for one thing - more joy, pleasure - this is normal.

Evgeniy: Happiness.

Vladimir: Yes, that's normal. Happiness is a connection with the one Creator. To get more joy, that is, to raise your vibrations, there is only one way - to incarnate in the material world, where there is time, where there is no stagnation. Nothing happens there, there is stagnation, eternity.

And then the Spirit decides that it is ready to incarnate. His spiritual mentors select the conditions for his incarnation. Together with his Higher Self, which is always connected to the Creator in the monad (this is always a connection with the Creator, even at the first level of vibration). They put him in line. It's not that simple.

Evgeniy: I saw them standing in line in the movies.

Vladimir: Watch the Portuguese film “Nosso Lar” - “Our House”. Everything is described there, it's a good film.

Evgeniy: And, in my opinion, there is a Russian film. They are standing in line.

Vladimir: The film is called “The Supreme Court”. You see, every joke has a grain of humor in it. Indeed, there is a queue, and the Spirits are waiting for the appropriate conditions.

Dad and mom must be born and meet on one of the planets (not only on Earth). You can still be born in a subtle material world, in a plasmoid world, if such conditions for incarnation are connected with past karma, with past lives, with goals for a new one.

And now, the most important thing. This Spirit, friends, comes to planet Earth - the conditions have developed, he has been waiting for a long time, perhaps it was not so good for him at these low levels of the Spiritual world. And then he comes.

And dear parents on planet Earth, when the plan had already taken shape, for some reason they decided to have an abortion.

Here (they say) the story is that one of the conditions for joining the Interstellar Union is precisely the complete refusal of artificial termination of pregnancy on Earth, except for medical indications. Because there is a plan of the intelligent Spirit behind it, there is so much behind it. And then - a turn-around. And again again.

Evgeniy: I see. And how can a mother or woman make amends for this guilt?

Vladimir: This is a good question, and we have answered it more than once. If this has already happened, then the best thing a mother can do, no matter how many artificial interruptions she has, is to take responsibility, understand this responsibility (together with dad).

Evgeniy: That they did something bad, right?

Vladimir: And only if you take responsibility, you understand that you can change in the future. If you say: “It’s not me, it’s someone else, I have nothing to do with it,” then you won’t be able to do anything in the future, that’s all. This is called sincere repentance, metanoia - there is such a word.

What is this for? That Spirit is an immortal Spirit, nothing happened to him, his plans were just disrupted, he has to wait again. But if you have something to do with it, then the best thing you can do (if it’s a woman, but the man is no less responsible, the same responsibility, no less), and so, repentance is not an end in itself. Repentance in order to change by sending Light there.

Firstly, you can bring (again the same process), and the same intelligent Spirit or another one can come. Because there is a common good. Sprinkling ashes on your head, reproaching yourself, becoming despondent and leading to a situation close to suicide - no one needs this. We need to move on. By the way, there is a well-known saying in Christianity: “If you don’t sin, you won’t repent.” There is, but we need to go further. Yes, there will be some kind of responsibility, but maybe not - it all depends on how the person behaves. But very often (this is described many times in the Bible) the most terrible, greatest sinners, who killed thousands of people, later became saints.

Evgeniy: This is understandable, of course.

Vladimir: They repented (prodigal son). Parable of the Prodigal Son.

Evgeniy: I found the Light within myself, and that, of course, is all.

Vladimir: And a very interesting thing happens. If this happens, then this unborn child (it turns out) sacrificed himself so that his parent would raise his vibrations thanks to this awareness, move to a higher level. It will be for the common good. This whole situation will be for the common universal good.

35:36 10 commandments. Reasons for the “absence” of reincarnation in Christianity.

Evgeniy: Okay. Then the next question: 10 commandments. There are more of them in Judaism, but these are the basic prohibitions.

Vladimir: 10 commandments. You should read the article I wrote based on the project’s materials, “Our Real History.” Everything is described there, the whole puzzle is assembled. To whom it was transmitted, why, and how it was. The Torah, then this whole story with Jesus, and all of this is interconnected from our creation.

What about the commandments? Tell me, isn't it obvious to most people that there is no need to kill, rape, steal, or sleep with someone else's wife? Is not it so?

Evgeniy: Of course, yes. Honor your parents.

Vladimir: It's obvious. But, when a person is in an unconscious state of consciousness, when he is not at all aware of his spiritual part, he, you know, like a bull rushing into an abyss, needs to stretch the barbed wire and run another current through it. And these commandments are simply telling you directly (since you yourself don't understand) what you shouldn't do. What's the solution?

It's the same story with reincarnation. After all, the question is often asked: "Why doesn't reincarnation exist in Christianity?"

Evgeniy: It existed until the 4th century.

Vladimir: Why? There was an objective reason. At that time, and even now, there are a lot of people (in India for example) who think: "Next time, I'll make it in time." And so the church hierarchs decided: "Let us say that you live only once." That's better. It's better not to know everything.

Now another time has come. It's time to find out.

Evgeniy: I think that the decision was actually made at the 4th Ecumenical Council.

Vladimir: About the pre-existence of Souls there.

Evgeniy: Yes, absolutely, right. We all know, but unfortunately, we don't do everything. Okay, one more question.

37:21 Spiritual contracts.

Evgeniy: Very often they say that when you come next time, you reincarnate, you meet people or Souls that you met before.

Vladimir: Absolutely right. At the spiritual level, spiritual contracts are concluded between these higher spiritual parts of us, with the participation of our own spiritual mentors. Our spiritual mentors are Spirits who are at the highest levels of this conditionally (bad word) hierarchy, above the 20th level.

Evgeniy: Hierarchy is bad when on higher planets.

Vladimir: This is just Vedic terminology, nothing more. Everything is fine with this. With their help, spiritual contracts, as we call them, are truly concluded.

Why is this done? For the same thing - for development. If in your past life you have some problem that you did not solve. Someone didn't like someone or even killed someone, you need to figure it out somehow. And it turns out that someone killed someone, and now he fell in love with him. Or a child was born, the mother got rid of him, and now everything has changed places for them. Like a performance.

Evgeniy: Drama.

Vladimir: In fact, these are games of immortal intelligent Spirits. Here is a quatrain, listen:

When cast into dust or caressed

Changeable coquette Fate,

Don't forget that you are only God's mask,

And He plays with himself in it.

Evgeniy: I see. In principle, you are probably right that everything that exists around us is not accidental. We have always said that there are no random accidents. This is, of course, very interesting and great.

Fine! I would like this to be the conclusion of today's meeting. I think that we will meet again, because I understand that you have a lot of information.

Vladimir: 360 videos, a bunch of posts, a book is coming out.

Evgeniy: I mean you have a lot of information.

Vladimir: I have a lot too. Yes.

Evgeniy: The questions that I have accumulated are too many to count. I think we will meet again. Now I would like to ask: tell me again, where can I find the article?

Vladimir: Friends, the easiest option is to contact me. On any social network, WhatsApp,

anywhere. My phone number, please (you can use it) is 847-877-17-65, and I will send you a link. You can easily find me on Telegram through Zhenya. You can type “Our real history from alien civilizations” in your browser, and this article is posted on the Proza.ru website. Even easier: type “Project Cassiopeia. Irina Podzorova”, and you will be taken to the YouTube channel, to the social network group. We are represented everywhere because a huge number of volunteers around the world help the project. And there you can easily find all this information.

40:54 The uniqueness of Irina Podzorova. The probability of the Earth joining the Interstellar Union.

Evgeniy: Okay, please tell me, a question has arisen: how many contactees like Irina are there on Earth? And is there?

Vladimir: There are a lot of contactees, but the rumored one, for example, is Dolores Cannon, who was a well-known spiritual leader in the United States. We know Lee Caroll - a guide, a Kryon contact in the United States.

Kryon is a plasmoid civilization that is located in the Solar System and deals with the Earth. A large number of.

Evgeniy: Excuse me, please, I understand that we are being dealt with a lot here from different levels.

Vladimir: From different levels too. 117 civilizations are part of the Interstellar Union out of 727 humanoid civilizations that exist in our Galaxy. There are also fine-material, plasmoid ones, of which there are a huge number. There is already a certain structure of permission - not allowing someone to have contact with earthlings if these are physical contacts.

I want to say the main thing. What makes Irina unique? The fact is that it has physical chips. These are the microdevices that were installed on her. You need to read all this, it’s in the materials.

Evgeniy: Was this the first time as a child?

Vladimir: In adolescence, then on the lunar base. They mimicked body tissue and could not be detected by any instruments. With their help, the purest astral and other contacts are carried out.

Pure. Listen to how this happens, all your doubts will go away, about astral headphones, a hoax or something else. What we talked about will become clear to you. It is through these devices that two-way transmission of information occurs. This doesn't happen very often. There is also, but not very often. These are not astral chips, but physical ones.

Evgeniy: This has been happening for many years.

Vladimir: For many years, yes.

Evgeniy: Over the years, you can understand whether it's true or not, true or not true.

Vladimir: Plus - she has physical contacts, they fly for her and take her around. And the question immediately arises: where are the police looking?

Friends, we were told that the governments of the largest countries are well aware of everything about this, but cannot do anything. The technologies are there - you know what they are. The ship is not visible, she is walking, he is descending into the clearing. Through her chip you can see if there is something there, someone – they just don't arrive.

They say that if they wanted to make any contact with us, open mass contact (OMK - we have such terminology), or anything else, then no structures would interfere. They just don't interfere with our free will.

Evgeniy: You said in the last program that you are not ready yet.

Vladimir: Yes, we are not ready. Watch the recording of the previous program.

Evgeniy: I think that we are probably not ready. The right question is, if we gave you something, how would you use it?

Vladimir: For military purposes, they would even fight among themselves.

Evgeniy: 100%.

Vladimir: Definitely.

Evgeniy: Of course. But you said that somewhere in the year 50, how would everything return to normal?

Vladimir: This is the situation. In the 32nd year, friends, we will have a high probability of choice. They directly said: in 2032, the world will face a global choice - serious peace or serious war. We now have every chance to get through this without war. Now there are much more of these chances.

By the way, here is the story with Covid (there is a separate topic there), but this is also not an accidental part of the process when we go through some tests, although we ourselves created this virus. I won't talk about that now. If we manage to get through this situation without war, then within the next 80 years there is a very high probability that open mass contact will occur. And further - the prospects for our entry into the Interstellar Union, if we fulfill a number of conditions.

Evgeniy: Well, friends, we literally have 30 seconds left. I thank Vladimir Goldstein for telling me and providing information. And you are left with this information yourself. Volodya, thank you!

Vladimir: Thank you, friends, see you again!

December 16, 2021

Conference participants:

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Evgeniy Kolkevich – radio host of “ReklamaRadio”;

"ReklamaRadio" listeners.

#372 Video report Baikal retreat of the Cassiopeia project - September 2021. Part 2

https://blog.cassiopeia.center/videootchet-bajkalskij-retrit-proekta-quot-kassiop
https://www.youtube.com/watch?v=pYFNHSiPERs

09:38 Communication with the Spirits of the area. Khatarulya.

Maxim Rusan: What kind of place is this?

Irina: My name is Katar Ul. 26th density level. He is the Spirit of this place. He is now showing me an area of 55 square meters. km.

What kind of place is it? Here activities are carried out that you call “rites” aimed at happiness.

Retreat participant: Wedding ceremonies.

Irina: Now he shows me the rise of energy in people. And this gives rise to the energy of absolute happiness, which increases from conscious actions for the benefit of the world and oneself.

Maxim: How do we need to consolidate the ritual that we just performed?

Irina: He is now showing me that mentally stand in silence and communicate with them.

Let's welcome them. We welcome you, Spirits of the area, curators of this place. We send you the Light of our Love. And we are ready to accept the information you want to convey to us.

Irina to the group: Now physically relax and tune your mind to the reception. Just make him look like he's waiting for an appointment. And you can mentally ask a question. A sign of contact with them is an increase in flow into the seventh chakra.

Retreat participant: What if your feet are warm?

Irina: If your feet are warm, redirect this heat upward. Take a breath and redirect it up to the second chakra, to the third chakra, so that it comes out of the seventh. That is, you direct your life energy into your spiritual channel, strengthening it.

These are not just pillars. These are charged ("charged" is an imprecise word), these are material objects inspired by the Spirits of this place, each line on which is a symbol of energy. And a certain color too (he's showing me now).

Maxim: This is a reflection of the body of subtle-material civilizations, do I understand correctly?

Irina: Yes, a reflection of the energy fluctuations that they generate upon contact with "shamans," as you call them. But the Soul of a shaman is the Soul of a complex person, and one that previously itself was embodied in these plasmoid worlds. And she came here to Earth with the goal of continuing this communication, already being in the physical body of a person.

Maxim: I have a question for the Spirit of the area. What's up there? Is someone buried there? What kind of place is it? Why does he have such energy?

Irina: Where the stones are?

Maxim: No, higher. Higher. The highest point.

Retreat participant: Cross at the top.

Irina: What's up there? What cross? This is not a grave. This is the place where he lived, he shows me a monk, but not an Orthodox one. He lived there for a long time.

Maxim: Monk or lama?

Irina: (He says) Monk. He shows me an image, but it is not an Orthodox monk. This is an old man, like a Buddhist.

Retreat participant: Hermit.

Irina: Why did they put up the cross? Because it is believed that this is a Holy place.

And he also shows what his hatarulya, subtle-material body, looks like. Above us is such a white ball - a sphere. And it itself is white, but the outer surface still has a layer like a mirror. And it reflects everything. Its diameter is about two and a half kilometers. He is here, above us.

Here, every ribbon that is tied is a gift to the Spirits. It is charged with human energy. But it is not the fabric itself that is the gift, but the energy that is invested in it. Why is this gift necessary? Because in the Universe everything obeys the law of inverse action. If you put energy into something, you can get it back in another form. If you haven't invested, but only want to take, then you become a parasitic structure that resembles a black hole.

Retreat participant: Besides the ribbon, can you, for example, throw in a penny?

Irina: Something material?

Retreat Participant: Yes.

Irina: You can take any thing that belongs to you personally, that is in your possession. It could be a stone, a coin. Apply this to your heart, send Light, energy of gratitude and love there. If you put in different energy, you will get different energy.

Retreat participant: I don't have another one. I only have Light.

Irina: And these should not just be words coming from the mind, but precisely as feelings. Don't think that we feed on this feeling. We simply become stronger because we know that you need us. And that means we need you.

Maxim: Listen, I really want to go upstairs!

Retreat participant: To the cross?

16:20 Communication with the Spirits of the elements.

Irina: So, dear friends, here we have a forest. Do you like his energy?

Group: Yes, very much.

Irina: Who feels what here?

Group: Calmness, tranquility, goodness, dissolution with the world.

Irina: Do you think you are alone here?

Group: No.

Irina: Who else is here?

Group: Plasmoids, Forest Spirits.
Irina: What are they doing?

Group: Watching, guarding.
Irina: Are they interested?

Group: They are glad that so many people came.

Irina: Yes. Do they feel what we came for?

Group: Yes.

Irina: Okay. So, who knows who the plasmoids, the Spirits of Nature, are? These are energetic entities that are the same embodied Spirits as we are, but in more subtle bodies. They may look different. Their bodies can be shaped like a ball, a crystal, or a pillar. But to make contact, they often take on images that are familiar to people.

17:27 Practice communicating with trees.

Irina: Pay attention to your feet. Pay attention to how the lower stream enters the tree through the ground. You need to integrate into it, become one with the tree. Imagine that energy is rising up your legs in the form of a spiral. Do you see how they greet us? Hi all! Say: “May I speak to the Nature Spirits?”

Retreat Participant: Yes, speak.

Irina: Thank you.

Retreat participant: Thank you.

Irina: What is your name?

Retreat Participant: Alice.

Irina: Alice? What density level are you from?

Retreat participant: Fifth.

Irina: Are you the Spirit of the Earth or the Space?
Retreat participant: Earth.

Irina: Elements or places of nature?

Retreat participant: Elements.

Irina: Which one?

Retreat participant: Elements of water.

Irina: The Spirit of Water came to us. Spirit of water, where do you live?

Participant retreat: Baikal.

Irina: It's not far from here. We welcome the Spirit of Water. There are a lot of you living there - Water Spirits?

Retreat participant: Yes, a lot. We are responsible for different things. There are those who are responsible for the fish.

Irina: What are you doing?

Retreat participant: He is responsible for the water.

Irina : What are you doing?

Retreat participant: Not for purity, but for its color, shades.

Irina: Shades? Plasmoid can only explain at the level... What is the color of water? It is responsible, one might say, for the filling of certain layers with molecules, mixing them. This is just one of those that connects atoms into molecules. Interesting job?

Group: Yes, an unusual job for earthlings.

Irina: They are also earthlings, the same inhabitants of the Earth as we are. This is the kind of work that happens here, right?

19:26 Communication with Lake Baikal.

Irina: So, today our Baikal is calm, more or less, such gentle waves. Let's welcome him! What do you feel? What energy?

Group: Soft, enveloping.

Irina: Now let's close our eyes and do the same with our hands. And we will feel with our whole body, with each wave, what energy? The sound of a wave and you take a breath. You see, he is trying to charge you. What do you feel?

Every wave is a wave of energy. To communicate with the Spirits of nature, including the Spirit of Baikal itself, we do the same, we integrate. How we were built into a tree, only by sound.

21:10 Session "Matrix of Fire".

Host: The Matrix of Fire is the egregor of all the sacred fires of our planet. And this egregor allows us to fulfill our desires.

23:39 Shamanic ritual. Communication with plasmoids.

Shaman: We talk to the rosary: "How? What? Are they free? Has everyone arrived? You never know that it won't hurt anyone here. We protect everyone. God forbid that it hurts anyone. Don't hurt everyone."

Group: Have many come now? Is everyone here?

Shaman: We have ancestors. I called my ancestors. And thirteen deities were called. And there are a lot of Spirits. We called the deities, and around us there were Spirits of the area, mountains, trees. There are a lot of them.

We first said: "Spirits of the area, the mountains, please do not be angry if you hear a sharp sound. Or you think that we didn't see you, or ignored you, or offended you in some way. People have come, please close, protect us."

Then we started the ritual.

Irina: Hello everyone! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Indeed, we have an interesting event or meeting today. Meeting not only with people, but also with the deities of the Buryat-Mongol pantheon. And not only with them, as it just became clear, because these sounds, the energy of these masters, our common energy, attract a wide variety of energetic entities. We call them “plasmoids”, “subtle material entities”. They are from different density levels.

I want to say right away that the names that they called me and the images that they mentally showed me are at my level of perception. That is, not like you, for example. Naturally, I immediately asked you to tell me how they are in your language. I was immediately told that I don’t know your language. This is true. Therefore, they will find the corresponding concepts in my memory. For example, one plasmoid, it looks like...

Shaman: Who?

Irina: Plasmoid is Spirit. Here we are embodied in a dense body - physical. And they are embodied in the body from energy, from energy fields.

Simply put, it is something like intelligent ball lightning. Only they are invisible to the physical eye, because their vibration level is higher than the human eye can detect. We call them “plasmoids”. In general, there are many types of them. There are many more of them on Earth than people. Because they create with their thoughts, with their vibrations, all nature around.

Naturally, as you correctly said, in the Stone Age, in the Bronze Age, people communicated with them, created certain movements, rituals, which later, in the 21st century, are known as shamanism, magic and more.

I want to say that one of them, I asked his name, he introduced himself at my level of perception - Ramses. From my memory, he believed that this was Pharaoh. That this is the head, one might say, of a community of these Spirits who are at the 15th level of density and control the electromagnetic field of the Earth, like Kryon. Yes, there were some.

Then came, indeed, there was a Spirit here, many communicated with him, whom we call the “Spirit of Baikal”. He is directly responsible for this lake and for all the Spirits that are here.

And at the very end I felt a completely different energy, a completely different level of density. The Spirit came and said that he was of the 57th density level, that he created our solar system, the Sun, the planets. He called himself Tendri. Again, this is at my level of perception. I began to ask him: “Is he familiar with the Spirit of the Earth?” That is, with our planet, with which we also communicated. She appears in a female form.

He said he knew him. We talked to him. Naturally, I mentally asked them the meaning of everything you do, these words, movements. What do they mean? I don't understand your

language. They said it was like a petition. There are requests not only for us, but also for the clan, that is, for some family. We call this “Ancestral egregor”.

They said that they consider a person as a part of his family. And we will take the energies that you asked them to invest in us (each of you) to your city, to your family. I say: “What is it for?” In order to help all bright aspirations that strive for Light (in our understanding), but not for darkness. I even specifically asked them: “If someone wants something dark, will you help with that too?” They said: “No, we will leave such a person with us if we do not see the harm of his desires for others. If we see harm, that it will bring harm to others, then we will interfere.”

Conversations like this. I was invited to go to the Astral with him. We call this “leaving the body.” I say: “But it’s not entirely convenient to go out with you here.” I said that I was ready to talk with them at any moment when I was in more suitable conditions, that is, ask them questions, answer their questions, if any, like such a dialogue.

I would also like to additionally say that this is your method. Our method of communicating with the Spirits of the area, with the Spirits of nature, even with star plasmoids happens differently, without ritual. We communicate through trees, for example, through the elements - water, through the earth. We touch the earth, that’s what my curators taught, those who come from other planets in astral bodies. They tell me how to teach people. I can show everyone how to get answers. Our goal is not to enter into communication with them for the sake of worship, request, gratitude or anything else. We simply thank you with words, but our goal to learn is “question and answer.” Learning to feel energies, feel their presence, ask questions correctly and silence your mind in order to receive answers, that is, our goal is different. And your goal is more aimed at achieving some goals and plus gratitude to them. Because they said that in addition to requests, you also said gratitude for the fact that they support us all, help us and create everything with their energies. Again, this is at my level of perception. But, nevertheless, such a dialogue took place.

I repeat that at first there were fifteen of them, and then more came. It was twenty-eight. Now I don’t know, it’s me who needs to concentrate and count them again. I asked (one of them): “How many are present here?” He said, “The 28 are just the ones that are here. And those who are there, there are even more of them.” Indeed, when they approached, they did not immediately enter this space. At first, one might say, they sent their eyes here and looked closely. Moreover, they show this to me in images. Like a ball, two smaller balls come out of it, but in the form of human eyes, and they begin to look around. I welcome them. I ask: “What is your name?” He will be silent for a while, reading from my memory what he can be called, since they told me that I don’t know the language. I didn't ask everyone their name. But those whom I asked or who introduced themselves, I said.

I guess that's all. If anyone has questions, I can answer. Or I can ask them.

32:24 UFO in Voronezh, 1989. Communication with shamans.

Retreat participant: Are the Nature Spirits ready to communicate with us about the weather?

Retreat participant: It’s clear on the 27th, especially.

Participant Retreat: Until the 29th.

Irina: So today they actually promised rain.

Maria Sokalskaya: Yes, they asked that there be good weather for all these days while we were having excursions.

Vladimir Goldstein: Ira, please ask if the plasmoids themselves know those who helped in setting up the bases - Pleiadian and Tikhtian?

Irina: Under the bottom of Lake Baikal there are two bases from another planet. Maybe you've heard about flying saucers? These flying saucers are camouflaged with a special field so that they are not shot down by our military. They set up bases under the bottom of Lake Baikal. There are two bases here - the planet Tikht (I communicated with them), and we call them “Pleiadian”, the main planet Futissa. Why are they here? Firstly, they study the ecology of Lake Baikal.

Shaman: Did you come up with these planets yourself?

Irina: No, they themselves told me the name of the planet. Now I'll tell you. People just don’t know me, so I’ll have to tell you briefly.

I have been in contact with aliens since I was 13 years old. My first alien is from the planet Daraal. And all the names of the planets are spoken to me in his language, because there are thousands of languages and dialects in the Galaxy, you will get confused there. Therefore, I was tuned to the same wavelength. Tikht, Futissa, Daraal - this is all in the language of my first alien mentor.

Shaman: What kind of language is this?

Irina: Daraalsky. The planet Daraal itself is located in the constellation Cassiopeia, 150 light years from Earth. He flew to me from the age of 13, we communicated.

Maria Sokalskaya: You know, in 1987, in all Soviet newspapers there was a huge article about aliens in a Voronezh park - this is reality. This news spread throughout the world, in all languages. If you just type “Voronezh aliens 1987” on the Internet, you will see what her curators who came to her later look like.

Shaman: Voronezh aliens?

Retreat participants: It was in 1989. Just score "Cassiopeia".

Maria Sokalskaya: Yes, in 1989.

Irina: But it wasn't Kirchiton himself there.

Maria Sokalskaya: Yes, not myself, I'm just saying what it looks like. There is a report there - it was written in Soviet newspapers.

Shaman: Of course, this is all there. But everyone explains it differently. You are in your language, we are in ours.

Retreat participant: Everything is correct. Have you seen flying saucers over Lake Baikal? Locals say they saw it.

November 28, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Vladimir Goldshtein - journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Maria Sokalskaya **-** moderator of the VKontakte group, project manager for online learning and other projects;

Retreat participants.

#379 Aliens about chemtrails: traces from airplanes from the

point of view of science. Conspiracy theory or physics?

https://blog.cassiopeia.center/inoplanetyane-o-himtrejlah-sledy-ot-samoletov-s-to

00:18 Chemtrails and the laws of physics.

Yuri: Fog with wind, it was quite strange to see. Fog with the wind, and somehow shimmers.

Irina: Fogs, we have them too. There was fog recently. He is the fog, really.

Yuri: Okay, this question is clear. You mentioned probes. It would be very interesting if we could ask our alien friends, including the Tikhtians, to take samples from the traces that planes leave in our skies, if this is possible. Still, people ask a lot and worry a lot about this when they see long trails behind airplanes, what they call “chemtrails.” Is it possible to ask our friends to take samples directly from this cloud and have them study them?

Irina: (NowMid is speaking) I, of course, am not a physicist, but I also fly aircraft. And I know a little about aerodynamics. We can, of course, take samples. But anyone who is interested in these traces can now answer:

The first is at what altitude those planes fly, after which they leave long trails for many hours.

Secondly, what is the temperature outside, where they fly. Maybe people think it's like on the surface. There are people who think so. In fact, there are many such people.

And thirdly, what temperature and what composition of fuel does the aircraft have? This is known information. What do you mean, most likely, a jet plane?

Yuri: Yes.

Irina: At what speed, at what temperature do substances already burned in it escape from a jet engine. How do they behave at this temperature and at this density, when they are at this altitude. These are all known facts. They can be checked, they can be counted. You don’t even need any special equipment here, just a regular calculator and knowledge of the properties of substances.

I know that certain substances at this temperature gather into particles from which light is reflected, like from clouds, like water vapor. Only there is still an admixture of its combustion products. For example, the same nitrogen oxides. They can also give a certain coloring. The

temperature of the exhaust and the surrounding space are different. Therefore, all this can gather (condensation), like a cloud, get lost. And it can hang in place for several hours. Especially at the height where, for example, ice crystals can form. This happens for the same reason as fog. A certain temperature difference, for example, strong cooling of water, causing fog or dew. There is an even greater difference there than on the surface of the Earth in the morning, night and day.

You need to look at the laws of physics, they are all known to you. You, if you want, do this research. Study the composition of jet aircraft fuel. You can do this, especially since you have the appropriate education. You can do a little research on this topic.

First, what is the composition of jet fuel?

Second, at what altitude do they usually fly?

Third, at what speed and at what temperature do gases escape from a jet engine when it moves at this altitude? Naturally, what is the density of the atmosphere there, and what is the temperature? She is there, by the way, as a rule, permanent.

Further, through simple calculations you will be able to find out for yourself what happens to the stream of this gas at this height. Will it be invisible if, for example, it contains 90% water, water vapor? Because due to combustion reactions, various oxides are formed, including water vapor. Will it be invisible at this temperature? Or will it be visible? Will it diverge to the sides? Or will it gather into some specific figure?

I saw myself that some of your planes, even non-jet ones, take with them special devices that you call “colored smoke” and draw different letters. They only hang at a certain height. If you go lower, they dissipate. These letters written in the sky were back in the 30s. And they could be colored. They could hang for hours after the planes flew over and the words were written. I've seen these. There was a certain chemical composition. This is the first.

About chemtrails. I remember a question about this. I ask you to explain to people that if people from airplanes decided to spray some kind of poisonous or controlling substances, then the pilots of these airplanes would spray them, first, on the inhabitants of the country where they live, without even expecting where the wind would take them. Maybe even to their hometown, where many of their relatives live. After all, no one can guess the strength of the wind. Nobody can predict this. It can change at any second. Even cyclones change. Secondly, if someone gives him an order to do this under threat of death or for a large reward, then the one who gives the order (and at the same time lives on the territory of the Russian Federation) also does it absolutely unpredictably. Risking that this cloud will fly right to him, and he will inhale it. He cannot guarantee that this will not happen, no one can. It's just how the wind blows.

Yuri: What if they don’t know?

Irina: What?

Yuri: What do they have on the plane?

Irina: So, the one who gives it to them on the plane knows about it. Even if they live in another country, at high altitudes, in any case, these air masses can travel very long distances. As you know, there are no boundaries for clouds and wind. A gust of wind and clouds cross any border without asking border guards for permission. And everyone should understand this. (He is smiling now). That's what I imagined: the cloud at the border was stopped. Yes, funny.

Yuri: The answer is clear, thank you very much for this concept. I thank you.

Irina: (MidgasKaus) You can explain on your channel if you are asked such a question. Or, if you want, you can go there with Irina, to your channel, and explain. I can explain. Your curators can explain, that is, they know it too. And to say that if these are some kind of harmful substances deliberately released by someone, it doesn't matter by pilots or some governments, or terrorists, then any chemical wars should be waged close to the ground. Because this results in less consumption of the toxic substance (if we are talking about chemical effects now), and a greater likelihood of hitting the intended enemy. And there is less chance of the gas dispersing onto its own territory. These are the commandments of all chemical warfare. You can read a toxicology textbook, where it should be written about poisoning by chemical warfare agents in gaseous form. It will be written there that, on the contrary, it is prohibited to spray them at height. It's dangerous for those who do it. For his country. This cloud may fly in a completely different direction, as I already said.

If these were sprays for the purpose of poisoning, control, or something else, they would be carried out not from airplanes, but from tanks, from cars, under the guise, for example, of watering trees, watering sidewalks, etc. It would be close to Earth. It would be safe for them. And again, in chemical protective suits for the one who does this. Naturally, he can poison himself. Well, you, as a scientist, understand this? So, as a scientist, what do you think?

Yuri: That's logical.

Irina: If it's logical, then you understand it?

Yuri: Yes. I ask this question because people ask. This is a question for people. I already know the answer for myself.

Irina: If you understand this, you can explain the same thing to people.

Yuri: Yes, when they ask me this question, I explain it at home. Yes of course.

Irina: Yes, and you know very well about adrenochrome, if you are a biochemist, how it acts on the body. Because it is a product of metabolism, it must be excreted. Its effect compared to adrenaline is almost the same as the effect of alcohol compared to an aldehyde, if you know what that is. You know both of these, right?

Yuri: Of course.

Irina: You know what is more toxic?

Yuri: That's understandable, yes.

Irina: If pure acetaldehyde was bottled with alcohol, I wonder who would agree to drink it?

Yuri: I think there would be someone.

Irina: Maybe once to try. You know very well what effect it has on the body, for example, when people drink alcohol or take drugs (it doesn't matter anymore). They drink alcohol not because of its taste, not because they want to taste this particular taste. They drink alcohol precisely because of the sensations it gives them. So, if they drink alcohol because of sensations, buy it, then they spend their monetary (financial) energy on this, that is, on these sensations. What if they feel what they feel in the morning? Will they buy it?

Yuri: Of course.

Irina: So, dear friends, we talked about interesting biochemistry. I think that our curators answered many of your questions that interested you. Maybe it will be even more interesting - the features of biochemical metabolism on other planets. I think these were very interesting and important questions. What do you think, Yuri?

Yuri: Yes, that's why I chose them. In fact, why did I choose these particular questions? Because they bother people. And people's anxiety is always energy of a certain type.

Irina: Now Mead will say in conclusion, this is about the first question.

14:35 Types of biological exchanges in the Universe and on Earth.

Irina: What are the similarities and differences?

(MidgasCaus) You know, I will say that there are very many types of biological exchanges in the Universe, even in our Galaxy. Most humanoids, of course, are carbon-containing organisms, but there are also organosilicon ones. And in any case, almost all races in one way or another breathe oxygen and related gases, of course. This means that similar energy exchange exists in cells. The differences concern blood cells, the structure of organs, and there can also be serious differences in hormonal metabolism.

As for people. Your biology, your biochemistry is based on ATP, on energy metabolism, on glucose energy metabolism, on the so-called “aerobic glycolysis”. It's clear. For your body to be healthy, a constant exchange of energies with the external environment is necessary. The entry of certain substances and energies into it. And the removal of certain substances and energies from it. As you know, on a physical level, any food is also energy. For example, oxygen is energy. This is energy in dense form. You know, for example, that the same apple is solar energy, created by it. You know this. Even if you eat meat, this is also solar energy, but already conducted through the Soul and body of the animal.

I want to tell you that in addition to proteins, fats, carbohydrates, microelements and vitamins (which you absorb), oxygen (which you inhale) and water, in addition to these substances, it is very important to introduce microflora into yourself. Without microflora, your body will get sick. You constantly ingest certain viruses, fungi and bacteria to train your immune system and tune your gut microbiota. Living in a sterile environment is actually much more dangerous than living in a normal environment with germs. This is also important.

Yuri: Thank you, thank you for your answer.

Irina: I thank you, dear friends! Yes, indeed, it's time for us to go. I hope you find it interesting. See you again!

Yuri: See you again! Goodbye everyone!

December 07, 2021.

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Yuri Fidrya - contactee with the Galactic Federation of Light, the Spiritual World, biochemist;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#392 Live broadcast. Happy New

Year from interstellar friends and retreat participants.

https://blog.cassiopeia.center/pozdravleniya-s-novym-godom-ot-mezhzvezdnyh-druzej
https://www.youtube.com/watch?v=EqrPuY7ps8U

00:01 Presentations and congratulations to the participants.

Maxim: I want to start with one of our projects. This is the Gikhor project.

Ivan: Hello, dear friends! My name is Ivan Yonten. I am the head of the Gikhor school of cosmoenergy, which works in alliance with the Cassiopeia project.

On behalf of our cosmoenergetics, on behalf of my colleagues, Cassiopeia teachers and on behalf of everyone present here, I am glad to congratulate you, our subscribers, on the upcoming New Year! And, of course, to wish that each of you has not only aspirations in your spiritual growth, not only your true desires, and not just to be, but to be realized. So that none of you stops on the path to realizing your goals and true desires. Let them be daring, let them be ambitious. And you will definitely implement them. Happy New Year!

Maxim: Thank you. Our dear friends very often join us in the project. They have a wonderful project. What is it called?

“Atma”: School of health practices using sound and psychology “Atma”.

Maxim: The guys are giving us some unreal concerts. They brought a huge number of different bowls, barnabas and much more. We will also require congratulations from you for all our and your subscribers.

“Atma”: We are very glad and welcome you all. We have been with Cassiopeia for several years now and are very grateful. The development of people, how much more people there are, how much higher the vibrations are. Everything is changing so much. And every time it’s just admiration. Huge gratitude.

Maxim: We have already started to vibrate normally, right?

"Atma": Yes already. We deal with esotericism, so you can feel it all. And now there is so much purity, so much Light, it’s simply amazing. We do meditations.

Maxim: Dear friends, I want to move on to another of our projects. This is the Mental Healing

project. Introduce yourself guys.

Ilya Alexandrov: Good afternoon, friends! My name is Ilya Alexandrov. I am a psychologist, one of the leaders and founders of the Mental Healing project.

Larisa Astashevskaya : Larisa Astashevskaya, I am also a psychologist. Ilya and I are leading this project. We are happy that we are already five months old and we are developing.

Maksym: Psychologists and schizophrenics?

Ilya Alexandrov: Friends, on behalf of our project, on behalf of the entire retreat, I want to congratulate you on the New Year. I send you the light of my Love, I hug everyone. This year I would like to wish you to find spiritual harmony in every second, in every day. Invest in yourself Love, a piece of yourself. Carry the Light that Cassiopeia carries without hesitation. Give it away. This year everyone needs it, believe me. Happy New Year! I congratulate you with all my heart.

Larisa Astashevskaya: I will add. Be generous, friends. I would like to wish you to attend at least one retreat. This year we will have some amazing retreats. I have already filmed news from Maxim Rusan, where we will have retreats in the twenty-second year.

Maxim: Don't tell all your secrets.

Larisa: Look at our channel "Mental Healing" and you will understand what I'm talking about.

Maxim: I would like to introduce you to a universal master. She is leading more than one project at Cassiopeia. Please introduce yourself.

Alleya: Hello everyone. My name is Alleya. On the basis of "Cassiopeia" the school "In the Flow" was created. I want to wish you that this New Year 2022 will be like fireworks. Filled with bright, joyful events that would bring you only admiration and happiness. Live in the flow, be in the flow. With love, your Alleya. Happy New Year!

Maxim: Great, thank you very much. And now our most mysterious project is the "Cassandra" project. Please introduce yourself.

Lyubov Davydovna: I present a new project "Cassandra". My name is Lyubov Davydovna or Ladushka, everyone here calls me that. And I want to say, my dears: we are all creators, we are all co-creators. So let's create, create our lives here and now, so that our future will be wonderful. Happy New Year, dears!

Maxim: Thank you very much. We also have masters of the Higher Self, Tatyana and Yulia -

guides to the Higher Self of the Cassiopeia project. Let's introduce ourselves.

Tatyana: Tatyana Karelina, master, guide to the Higher Self.

Yulia: Yulia Zinnurova, I am a guide to the Higher Self of the Cassiopeia project.

Maxim: Not all conductors are present here. Our wonderful Guzel Malyarova. Gulechka, hello.

Guzel: Good evening everyone. With all my heart, with all my heart, I want to congratulate you on the upcoming New Year. I would like to wish you health, both physical and mental. I am waiting for you at the cosmohealing sessions, which will give you these states, reveal all your abilities, your capabilities, placed in you by the Creator.

Maxim: Yes, Gulechka. I will now give the floor to representatives of the Interstellar Union, and we will continue the online cosmohealing session. And all our subscribers will be able to go through this wonderful session on our channel (not on the Cosmohealing channel). I would even say not a session, but a session.

Guzel: I will give instructions on how to do it, what to do, and we will fly.

Maxim: Thank you, Gulechka. And now I will introduce the most unfamiliar person in the project.

Irina Podzorova: Hello, dear friends. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today I want to congratulate you on the upcoming 2022 and wish you all that this year you find contact with the Higher Self, with your inner Spiritual Light, so that you always develop Love in yourself, always develop high vibrations in yourself. And all other material acquisitions and your health will certainly follow, because our God and his son Jesus Christ said so.

Our curators are with us today.

Maxim: Who is present today?

Irina: LiShioni from the planet Shimor is watching our retreat, helping our masters, our specialists. He already has many contacts here. Also present here is MidgasKaus from the planet Esler. He is a biologist and psychologist. He is mainly present during testing through instruments, helps specialists recognize information and makes recommendations through the mental channel.

Maxim: Now he is with Nadezhda during testing on Oberon equipment, right?

Irina: Yes, she is his contactee. There are also contactees for both LiShioni and MidgasKausa. Even those who came to me on the Higher Self were their contactees before I met them. The curators brought them to this project. They asked: “What year?” - and they answered them. I set up these contacts with them. There are a lot of contactees with the Spiritual world. I see that the flow of people who have stable contact, a channel with the Spiritual world, is increasing in our Cassiopeia.

In fact, this is not at all accidental, because contact with plasmoids, with humanoids, is, of course, very interesting. But from the Spiritual world that perspective of the disembodied Spirit is visible, which can hardly be discerned from density. It is the disembodied Spirit that is not divided into consciousness in the brain or body (if it is a plasmoid) and the Higher Self (what we call the disembodied Spirit). He is one Spirit. Let me remind you that he is in the Spiritual World, from where all the probabilities on the Time Tape are visible at the same time. They already have a different consciousness, a completely different awareness. Their view of the world and current phenomena is very interesting to all of us.

10:19 A wish from the Interstellar Union.

Maxim: What do our Interstellar friends want to convey to us?

Irina: (LiShioni speaks) Dear friends, I convey to you greetings from all the inhabitants of the planet Shimor on planet Earth and congratulations on the holiday on your planet, which is a symbol of the advent of a new time and changes for many people. All people put hopes for a better future into the New Year's egregor. It is on New Year's Eve that people unite in common expectation of a brighter future.

You have a custom of making wishes. Why on New Year's Eve? It is believed that on this night light forces come to Earth. They hear this desire and help to quickly fulfill it. This is truly the formation of an egregor. I wish that all your bright desires materialize and help you believe in yourself and in your ability to create reality.

Maxim: Thank you, Irish. LiSioni, thank you. And what does MidgasKaus want to say from the planet Esler?

Irina: (MidgasKaus speaks) I also greet you, dear friends. And, like LiSioni, I want to convey greetings from the inhabitants of the planet Esler, where I was most recently in a physical body. I have been on my planet for more than an earthly month. Was on vacation with my family.

He only came here sometimes.

Maxim: It’s just that “Cassiopeia” often torments him.

Irina: He spent time with his wife. (MidgasCaus speaks) I told the residents of my city about

the Earth, about my work, about Irina and Maxim, about other contactees, about the Cassiopeia project, which is expanding. I was asked many questions about the Earth, about how the inhabitants of the Earth generally receive information.

Maxim: We also get asked a lot of questions about how you convey.

Irina: In particular, do they want to join the Interstellar Union? Many people on my planet want to see you with us.

What is desire? A desire is a conscious need. What do I want to wish you? What is my need for you? I want to wish you that your body, Soul and Spirit, that is, the Higher Self, will always be in complete harmony with each other. So that you always strive for the Light of knowledge, always strive for the Light of Love and always strive for the Light of real physical actions in the material world. So that it is not disharmonious for you. So that you don't have, for example, a lot of wisdom, but at the same time you don't have the opportunity to embody it. Or, conversely, there was a healthy body, but there would be no opportunity to properly use one's health. So that everything is harmonious for you.

14:37 Feedback from participants about the retreat.

Maxim: Thank you very much, MidgasCaus. You saw, we have a lot of people, I won't show them yet. I would like to ask if anyone has anything to tell about the retreat? Who wants to speak?

Retreat participant Irena: Good afternoon or evening everyone. I'm a little worried. My name is Irena Zvereva, I am from Samara. It was my first time at a retreat, I had been striving for it for a whole year, and my fairy tale came true. I started the New Year with a real retreat.

I want to thank all the organizers, participants from different schools, I am participating in various practices here. Something incredible is happening to me. I thought one thing, but there's much more going on here. Indeed, there is a unification of the Soul, body, mind, and the heart opens. I don't know what else will happen next.

Maxim: This is just the beginning.

Retreat participant: I would like to wish everyone a Happy New Year, health, love, and happiness. And wish to attend such a retreat at least once. You will see what will happen to you later, in the good sense of the word.

Maxim: Thank you very much. Is there some more? I literally still need one person. I'm afraid to show the whole audience. In no case does Cassiopeia show anyone without people's consent.

Retreat participant: My name is Valentina, I am from the Chelyabinsk region, the place of power Arkaim. This is my first retreat here. I've been at Cassiopeia literally recently, since September. When I came here, I had a feeling that this retreat would change my whole life. And I was not mistaken in my feelings, because I feel like I'm in a fairy tale. Here the body, Soul, and Spirit awaken. You feel this merging, how layer by layer all the blocks are removed, all the negativity leaves, filling it with the energy of Light and Love. I am very grateful to everyone for this retreat. Happy New Year to everyone. May it bring us all more Light, more Love, self-disclosure, self-knowledge in the true Light of God.

Maxim: No one forces you to sign an apartment here?

Valentina: No.

Maxim: I know that the people who came here were asked by their relatives to see a psychiatrist, just in case. I'll just ask, probably, everyone who signed what in order to get to this retreat.

Valentina: You know, I went through many different esoteric schools. I came across different things. But this is where there is openness and cordiality. And there is no such thing that you need to invest a lot of money and sell apartments. This is not a sect, as many say. Here is true, real knowledge about Light, about Love, about who we really are.

Maxim: No one hypnotized you, forced you to do anything, or threatened you with anything?

Valentina: No. I wish everyone to come to this school in order to unlock their divine potential. To come to your Primary Source, Creator, Creator, to your Higher Self, which will connect with us and will manifest itself in this world.

Maxim: Thank you very much!

19:20 Cosmohealing session.

Maxim: The Cassiopeia project decided to hold a cosmohealing session on its channel so that you all could join our retreat and feel the energies of our Intergalactic Health Service of the Pleiades. Yes, Gulechka?

Guzel: Dear friends, I welcome you to our channel "Cassiopeia". I usually say "on our Cosmohealing channel." But today we will conduct a session on the Cassiopeia channel. Here you and I, with representatives of the Intergalactic Health Service of the Pleiades, will conduct a meditative and healing session, which is aimed at improving internal balance, activating your capabilities, resources and abilities.

Your consent will be required. It can be expressed in your own words, those that resonate with

your Soul. This will be your personal key to the session. The session takes place lying down, so you will need to prepare a comfortable place, a bed. We lie down comfortably, comfortably and calmly. Someone, if he doesn't know how to relax, can put on an aroma lamp, candles, and close the curtains. If you know how to relax, then you don't need any attributes.

Various things can happen in a session. Each session is individual, inimitable and unique, because miracles happen every time. Your blocks, your traumas are removed, layer by layer. And the body gets rid of blocks through movement, emotions and awareness. So all these things can happen. We allow all this to happen and observe everything without judgment.

If you want to cry, let yourself do it; if you want to move, let's move. Initially, the movements may be chaotic: the arm twitched, the leg twitched - this is all normal. Then very active yoga movements may appear, the type of breathing may change, and you will begin to breathe like pranayama. Qigong elements may appear. We allow and follow whatever our body wants.

If some thoughts appear in our heads, we observe them in the same way as from the outside. We don't drive them away, we just let them be. They may lead you to some conclusion. We're just watching.

We lie down, relax, close our eyes, but open our hearts. And with an open heart and love we begin our session.

(Cosmohealing session)

1:04:55 Completion of the cosmohealing session.

Maxim: Dear friends, your session, like ours, has ended. Now I'll turn on Guzel.

Guzel: Our session is over. Slowly you can get out of the flow. You can open your eyes, you can continue to lie down. Be aware of yourself in this room, be aware of yourself in this body. Follow your breath and direct all your energy of Love towards yourself, your Soul and your body. Thank yourself, your mentors, your curators for the session. And we thank you and look forward to your next sessions.

Maxim: Thank you, Gulechka.

1:06:11 Life on the planets of the Pleiades Cluster. Meeting with Ganesha. Cosmohealing sessions on the subtle plane.

Maxim: Now I'll show you a trick that no one has ever seen before. Irishka, are you here with us? Or are you still in the Astral Plane? I would like to hear your impressions. Are you ready? Tell us about your impressions of the session.

Irina: Hello, dear friends. Yes, it was very interesting. I left and came back several times. First they showed me several planets from the Pleiades constellation.

Maxim: Have you been to the Astral Plane?

Irina: Yes. I left immediately. I wanted to leave, but the Pleiadians told me that they wanted to take me to the Astral, and I stayed. What was interesting? I was shown several planets from the Pleiades cluster. They showed how they live in their families, what kind of houses they have, and even showed their children. And they showed me one planet, near which there are five suns. They hardly have any nights there.

The Pleiades cluster itself contains more than a thousand stars, and it is always light there. Then I moved to space closer to the center of the Galaxy. They told me that they would introduce me to an interesting creature. I want to tell you that the Intergalactic Health Service works with both humanoid and plasmoid civilizations.

They took me a little closer to the center of the Galaxy. It was between her core and, one might say, the first sleeve. It was a plasmoid world of level thirty-six density. And suddenly a man with the head of an elephant came out. The same Ganesha.

I was introduced as one of the leaders of esoteric projects. We talked. He asked what I was going to do, what practices to do. I told you that we have meditations. And he offered to conduct several meditations with me. To the question: “Which one do you recommend?” - described the “Cup of Abundance” meditation on balancing the third and seventh chakras. It gives an increase in financial flow and an understanding of where it can be directed so that it increases itself.

Maxim: Will we then conduct this practice on the meditation channel?

Irina: Yes. I asked him what this gives. He said that spiritual people have such a problem; their sixth, seventh and third chakras work inharmoniously with each other. One may be more developed and the other less, but they must be in harmony. And he showed what to say, what to imagine, so that spiritual and material development occurs simultaneously.

Maxim: I see.

Irina: I asked how it works. He said that, of course, nothing will come on its own, but ideas will come later. We discussed this.

Maxim: When did you get healthy?

Irina: Then I returned. They told me: “If you want, we will show you how to work with the body.” I agreed. We returned to the body. At first I looked at him from the side. Then I entered it to feel it from the inside. Near me there were four men in astral bodies, humanoid representatives of the Pleiades Cluster. They sent me different energies, passed them through me like waves. I asked them: “What are you doing?” I was told that in this way they work with those places in the body where inflammatory processes may appear in the future.

They took something like an astral tube and a luminous liquid. It is similar to fire, like plasma, but cooler. They brought it to my nose and told me to inhale. This improves the respiratory system. I say, “What is this?” They say: “You know Erwin, who is the guardian of the Order of Ice Fire Mages? We are part of it too.” There is a humanoid civilization, it cooperates with plasmoids. Ice fire is a special energy that makes cell membranes absolutely immune to harmful microbes. When I inhaled, it felt as if water had gotten inside.

Then I left my body again, and we moved to the Pleiades. There they gave me something to drink from cups containing something similar to jelly. There were seven of them, they were all the colors of the rainbow.

Maxim: Interesting. Gulechka, please tell me, is everything the same at these sessions or does it happen differently for everyone?

Guzel: It’s different for everyone. Each session is individual, unique, unique. Even for one person there are never repetitions in sessions; the whole body is cleansed layer by layer, both physical and all subtle bodies, and all blocks. There are no repetitions in sessions. Not in sensations, not in vision, not in anything.

Maxim: Does a person feel the session every time as he can

imagine? The liquid that, say, Irina saw?

Guzel: Irina is a very sensitive person. Therefore, she sees, feels, understands, and realizes a lot. An ordinary person can simply feel, as I said at the beginning: “A hand twitched, a leg twitched, the head moved a little, or emotions began to flow.”

Now at the session here, many in the hall were crying. Someone said that I'm not crying, the tears are just flowing. This is a cleansing, our emotional body is cleansing. When it’s mental, there are mental images and an understanding of some kind of karmic connection. The awareness of what was there, somewhere far away. Karmic knots are being unraveled.

1:14:50 Feedback about the cosmohealing session.

Maxim: How interesting. Does anyone want to give feedback about the session?

Retreat participant: I was lying quite far away and, unfortunately, I didn’t hear what Gulya said or what Irina said. But what was happening to me? It's my first time. And I know for sure that they were here. Why? Because I didn’t fly anywhere, I don’t know how to do it yet. I was completely conscious. Many times there were bright flashes in the eyes, then in the forehead, chaotically, and after some time. This happened several times. It was extraordinary!

I lay there and thought that maybe this is how they play. We are lying here on the floor, and they are playing with us. But then, where does such a feeling of gratitude, Love, come from? I thank you, I love you! They tried to heal me.

Guzel: Yes, the heart opens, a feeling of Love appears.

Retreat participant: Usually I don’t feel anything. I just lie there and think, I have a lot of my own everyday thoughts. This is my first time at such a session. I just had tears flowing. There were no emotions, no crying, nothing. They just flowed on their own. It was so interesting and

unusual for me.

Irina: By the way, they are still here. They are walking now, continuing their work, and bending over to some. They are here now, LiSioni will tell you. Meade was present here, but then left with the Pleiadians. Only humanoid civilizations from the Pleiades are present. There are now fifteen representatives in astral bodies. There are also plasmoids in the form of balls under the ceiling, about thirty. The Angels are here too.

1:17:33 Daughter of Ashtar Sheran. Cosmic zoopsychology.

Maxim: Irin, today you had a session with Ashtar and met Ashtar's daughter. Can you briefly tell us what happened? I think everyone will be interested. The information I received made my mouth drop open.

Irina: She introduced herself to me. She looks like him. She has long hair, the color is closer to yellow, like straw. Slightly yellowish face, rather elongated. Tall, medium build, dressed in a green suit (let me remind you that this is Astral). She met me on Ashtar Sheran's ship. I saw people there. Then she called me to her room and said that she was the daughter of Ashtar Sheran, adding: "Let's move to my ship."

We have moved. Her ship was nearby. I asked her about her profession. It turned out that she is an animal psychologist. I asked: "Who is this?" She said that she was a biologist, only studying the psychology of animal Souls and their adaptation to the material world. How to tame them, how to communicate with them. You can also communicate with animal Souls at the level of images. It is possible to exchange information with them in a special language via a telepathic channel.

Maxim: Here we can try to communicate with both the Spirits of nature and the Spirits of animals?

Irina: Yes. But it will not be like communication, for example, with a curator. You need to understand the images they send. It will not be a conscious flow, but thoughts consciously directed by the will.

Maxim: Eat, drink and bite, right?

Irina: As she explained, animals can be trained, taught something. And you can communicate with them mentally. They teach this. She told me that she studies animals from different planets, not just an animal psychologist, but a cosmic animal psychologist. He studies animals on other planets in Space, including on Earth.

She has a ship and showed its image. Inside the ship there was an egg-shaped capsule, transparent, with a shell around it that changed its shape. If you look at the ship from the outside, it could become either a ball or a square. Changed my form. I asked: “What is this for?” She replied that on planets with an unstable magnetic field or gravitational field, this change in shape allows gravitational energy to be used more efficiently to eliminate inertia during turns and improve the ship's maneuverability.

Maxim: We are now receiving new information that some ships of the Galactic Federation of Light and the Interstellar Union have the ability to adapt to any shape.

Irina: Yes. The shell itself around the ship can. I asked: “How is this possible?” She explained that this is a special flexible material. There are microorganisms that grow special molecules. Already from them, with the inclusion of special metals, a similar material is built. It, in turn, reacts to point changes in the electromagnetic field, which are already carried out by the ship’s computer, and as a result it changes its shape.

I asked where such a ship was made, and found out that it was in the Tashiga colony. This is where these ships are made. Literally in several places in the Galaxy. That is, they are not yet widespread.

Then she said that on one of Ashtar Sheran’s ships, his employees decided to create a colony on a planet located in the constellation Sagittarius. And several more people from the Ashtar civilization decided to set up a base on Mars, under its soil. She helps do this: set up this base and colony.

1:23:00 Energy channels to help earthlings.

Irina: Then we moved to Earth in the Astral. She took me by the hand and said: “I’ll show you something now.” We have moved in Space. I saw the Earth, we flew around it. I saw the Earth from orbit, then we went down below, and I saw in the Astral, in the Earth’s atmosphere on the subtle plane, many, many pillars of light. Some were big, some were thinner. There were many of them.

Maxim: Did you see from the astral plane, from a certain height? Approximately what is the width and height of these pillars?

Irina: If you look at a two-kilometer mountain, which is up to the clouds, about the same height. We flew through them. There were especially many of them over cities. I asked: “What is this?” She replied that these are special energy channels that were created by the civilizations of Disaru, Burkhada and the Ashtar civilization.

There are specialists there who create these energy channels both in the Astral and at all levels of density of earthly space where there are plasmoids. In order to send energy through these energy channels that will cleanse the Earth’s noosphere and help us in the quantum transition.

She told me that this would affect the very virus that caused the known disease. In addition to the disease, it causes a decrease in people’s vibrations due to fears, irritation, and anger that it causes in people against each other. Because of him, there are conflicts all over the Earth, to prevent this from happening, they decided to intervene in the situation. Since it is forbidden to interfere through any technology (our scientists can recognize it and, naturally, transfer it to the military) that can be used for harm (until we entered the Interstellar Union), it was decided to simply influence it on a subtle level.

I asked: “What does it mean on a subtle level?” I was told that energy is sent to those density levels where the Souls of all viruses are created, so that the Soul that is created for this virus contains frequencies that will pass into its genetic material. This will prevent it from producing substances that destroy our cells. They will become

less and less dangerous.

I'm just explaining now. She told me that there are certain frequencies that turn off specific sections of the RNA molecule. This virus, even if it gets inside the cell, no longer consumes as many energy resources. The cell remains alive. The danger is reduced.

Maxim: I understand. Dear friends! Thank you all very much for supporting our project last year. With your help, the project was able to grow to such a large scale. I want to thank all of our volunteers who help with this project. There are more than eighty of them around the world. You guys are just awesome. And everything that will depend on me, as a leader, call or write. I'm always happy to help and organize. Low bow to you. Not all specialists are represented here at the retreat. We also have women's practices and meditation practices. Elvira, hello to you!

You can see all the links to our projects under this video below. You can follow the links and see all the Cassiopeia projects that were made for you with love. They are on “donation” terms. The Cassiopeia project will never set prices and become a purely commercial project, as many people think. We try to do everything for you: for our viewers, for those who support us, for those who come to us for retreats.

Guys, thank you all so much! Hugged everyone, bowed to everyone. Bow to the admins. I know that you are also watching and waiting for this live broadcast. See you again!

January 2, 2022

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni - representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

Retreat participants.

#416 Live broadcast / Drawing of prizes and gifts / Answers to questions / Meditation.

https://blog.cassiopeia.center/pryamoj-ehfir-rozygrysh-prizov-i-podarkov-otvety
https://www.youtube.com/watch?v=EdpsHBJcyIM

00:03 Introduction of participants.

Maxim: Dear friends, hello everyone! Hello everyone! Tell me, please, how can you hear us?

Today we will have the promised broadcast. We started our draw even before the start of those actions that you all know about, and I ask you to respect this broadcast and not to get emotional. We promised people to meet Irina and receive our unique products - probiotics from the Cassiopeia project. Many rallied to take part in the raffle. But before we broadcast this prank, I, as the head of the Cassiopeia project, want to say that the Cassiopeia project does not support any of the parties involved in the military conflict. The project will take a neutral position. As a leader, I try to ensure that our project does not interfere with politics, but for some reason we are very much attracted to it by the people who are in our chats. People write a lot of negative information, and, honestly, I understand them. I can’t imagine what I

would do if I were in the place of my fellow Ukrainians. I come from the city of Kyiv, I am Ukrainian deep down in my soul, so I want to say only one thing, that we are for peace in the whole world. We are against any war.

Our entire project will support any person on this planet if the person needs it. We do this morally, individually, and intellectually. I want to tell everyone, if someone is experiencing very strong moral difficulties, you can contact any specialist in our project and connect with your Higher Self; undergo psychological consultation, because in our project there are a lot of people with higher psychological education. If you have any difficulties thanking the project, I will let all specialists know about it. And in this difficult time for every person, they will be very lenient towards everyone, without demanding any gratitude in return. Gratitude is just your desire to help and participate in the project. I understand that in this difficult time, many people need help, and our project will fully provide it from both the psychological and esoteric sides.

At this moment, while we are talking, events are taking place near Minsk that could stop the war. I don't even know what to say. Indeed, this situation must be resolved in peace on the basis of Love and harmony. We are grateful to the people who support us and participate in the giveaway.

The timing is unfortunate, but life goes on. We promised to hold a draw and we will carry it out because we cannot deceive people, because they were preparing. Now Irina will begin a short meditation, and after the meditation we will continue to communicate with you. And I, as the project manager, will personally fulfill the promises that I made to the people in our chat. There are more than five hundred of them. They helped the project move forward, made posts, and wrote comments. Irina, I invite you now, they will be very glad to see you.

Irina: Hello, dear friends, good evening! I thank everyone who is with us in this difficult, difficult hour. You and I have gathered precisely at a time when, perhaps, the fate of two countries, and perhaps the entire Earth, is being decided. Negotiations between the leaders of Russia and Ukraine are currently taking place. Our curators are here with us. Ashtar Sheran - in the astral body, a representative of the Galactic Federation of Light, commander of one of the fleets of our Galaxy. And

I also asked this morning to come for meditative and spiritual support of the disembodied Spirit of the Higher Hierarch of Light, Archangel Michael. This is practically the first time he is participating in a live broadcast. Usually he answered questions at conferences, but since this is a special time, he decided to be present with us. Let's start this broadcast with meditation. Firstly, we need to harmonize emotionally in order to then ask questions and receive answers in the Light of Divine Love in order to perceive them correctly. This meditation took place on February 22, but I have information that, thanks to it, some of the negativity from the earth's noosphere disappeared, and the consequences of the actions of Russia and Ukraine turned out to be less large-scale than they could have been. We changed the reality branch a little, it went a different way. Let us do a meditation to send the Light of Love to the Earth and to all our rulers who are directly or indirectly involved or not involved in this conflict. We will send them the Light of Love because they need it to make the right decisions that will lead our entire Earth to development, peace and love. It is important that something like the last 4 days never happens again in any country in the world, that an agreement is drawn up that will be valid and that will make it possible to save the lives of all embodied Spirits on planet Earth.

Archangel Michael, Ashtar Sheran, as well as our curators LiShioni from the planet Shimor and MidgasKaus from the planet Esler are present here. They are watching us and will also direct the Light.

Maxim: Guys, I am with you, I also participate in meditation, it is very important for me.

Irina: Meditation will be especially strong, because Maxim is from that egregor, which is the second side of the conflict. I am a representative of a country that is considered, as the whole world sees, to be an attacker, and he is a representative of a country that is considered to have suffered in this conflict. But he and I, like spiritual brother and sister, love and accept each other for who we are. This will help us harmonize our energies and direct them towards the reconciliation of the two egregors and those egregors that provoked the rupture of the two countries between themselves.

12:42 Meditation "Filling the Earth with Light."

Irina: I ask you to dim the bright light if it bothers you, eliminate the sources of sounds, or wear headphones so that you are not distracted by the sounds of the outside world. Be sure to put your phones on silent mode. This meditation can be done either sitting or lying down so that you are not distracted by the tension in your own body. We do not cross our arms and legs. We close our eyes and do not open them until the end of practice.

First, we will take time to relax through breathing. Let's take a slow, deep breath. We imagine that we inhale the Divine Light dissolved in the air and fill our body with it. We relax, the air itself will slowly leave your body along with tension, along with doubt, fear, anger.

Now we return to the idea that we are immortal intelligent Spirits who incarnated on this planet to learn the lessons of Light and Love. We observe our breathing, concentrate on breathing.

Let’s imagine mentally that we, forming a circle, are standing on a huge field. How many people participate in this broadcast, such is the circle. Our curators are next to us. Naturally, there is a Guardian Angel next to each of you, he is always nearby, with any of your mental images that you are now sending to the Spiritual world.

Concentrate on this huge field. We are standing, but despite the fact that it is large, each of us sees everyone. We look straight to the center. Let's imagine that in the center of the circle of us all, the Earth appears. It hangs in the air and rotates slowly. We look, imagine that it is in the shape of a globe or in the shape of the Earth, as if it were visible from a porthole. Let's just remember what the Earth looks like. We look at it, imagine what the continents look like. Imagine the Earth being big enough to see them. We do this together, so this image is very realistic, very dense and filled with the energy of mental images.

Now let's return to the sensations of our body. Let us imagine ourselves in our chest, in the center of the spiritual heart, in the form of a white ball, a bright luminous ball. Again we take a slow deep breath, inhale the Divine Light and imagine how it enters this ball, it begins to expand. The feeling of warmth is absolutely normal - this is the body’s reaction to the increased vibration of your etheric structures.

And now, charging the ball with the energy of Light, we take several inhalations and exhalations. We mentally return to the field where we all stand and look at the Earth. Mentally, physically, without moving, extend your hands to this ball. Take a slow deep breath and as you exhale, imagine how the Light that is in this ball comes out of your chest, through your hands, through your palms, and you direct it to the Earth, cleansing it and making it brighter. Do this and mentally say: “My dear planet Earth, I thank you for incarnating in your space. With love and gratitude, I direct the Light of Divine Love to cleanse and harmonize all your energy structures with the power of my Spirit. I transform all negative energies in your fields into the Divine Light of Reason, Love and endless happiness. I transform energies in the lithosphere, hydrosphere, atmosphere, biosphere, noosphere, magnetosphere. I ask you to accept the Light of my Love and transform all negative energies into infinite purity and Love. I am the Divine Spirit."

We direct the energies and see what is happening to the Earth. This works out differently for everyone, but the image will be filled out. Our curators, our Angels do this with us. Archangel Michael does this too. I feel your energies, I feel our field.

And now we imagine how the politicians-presidents of leading states who came from your memory stand between us and the Earth. You can represent everyone at once or someone specific. You see those you didn't imagine appearing because they were introduced by our staff who are meditating with us. We are in the same field, and you see each other’s thought forms. Filling these Souls with Light is not a limitation of their freedom of choice, it is a desire to accept the Light. Therefore, we send it completely freely, without any doubt. We look at these people, at these images completely openly, freely. With Love we say: “Greetings, Divine Souls, thank you for your work on planet Earth. We understand that you do it to the extent of your awareness and spiritual enlightenment. We forgive you for all the negativity towards us and towards the Earth. We ask your forgiveness for mistrust, suspicion, selfishness and all evil thoughts, words and deeds towards you. You and I are united in the Light of God, we send you the Light of our Divine Love, so that you are truly happy, so that you know God in yourself and the world, see him in each other and in us, so that we find peace, tranquility and harmony.”

We send Light to everyone. If he doesn’t accept, just say: “Don’t be

afraid, accept my Light, it is absolutely safe. We ask you to develop our society in peace and harmony. We are ready to do this together with you." Direct Light to both the Earth and them. Watch how they merge into a single Light, and from it comes out to each of you a phantom representative of a plasmoid civilization who is responsible for the Earth. Her name is Demeter. She can create so many phantoms, she came out to thank us and now she is sending us energy. Everyone will see it differently. Inhale, imagining this energy entering you. We express our intention to accept. Say: “I thank and accept, I love and bless. I consciously direct the received energy towards the development and growth of Divine Love in the Light.” You can tell her something yourself, or ask her for something, she will hear everyone. Her territory is the whole Earth, she feels everyone who is on it. Her thin body is larger than the Earth. It is responsible for natural phenomena occurring as a result of the work of all plasmoids in this territory, at all levels of density. And, as you remember, even the construction of elements and many, many other things depends on them.

Now say: “I thank my Higher Self for this meditation, I thank for this practice, I thank each participant in this meditation, our curators, Guardian Angels, Archangel Michael, I thank the Soul guide for his help. I send everyone the Light of my Love.”

Now I will count from one to five, when I say five, you will return to your normal state of consciousness and fully connect with your bodies. One, two, three, four, five, open our eyes.

Maxim: Thank you, Irina, Archangel Michael, Ashtar, for this meditation. I felt that all my Love was directed in the direction where the trouble was now.

Irina: Have you seen everyone?

Maxim: Yes. Guys, thank you very much for accepting this meditation and going through it. I really need it, as a person born in Kyiv. I think not only for me, but for everyone who is now involved in this conflict. And I hope for a speedy resolution of the military conflict through peaceful, favorable means.

Irina: Many cried because we directed the energies of Love, this happens. I thank everyone for the meditation, we really all together created a spiritual field in which we charged the Earth and received a flow of Love from Demeter, charged all our rulers. I saw they accepted the Light.

31:29 Prank.

Maxim: So, dear friends, let's continue the broadcast. I would like to remind everyone that we held a draw in the VK group. Our prizes and gifts: a set of biocomplex of our development, an hour of personal communication with Irina on absolutely any topic. We may show this hour in one of our broadcasts in the future. Bifidum, biolactum and bulgarium are a unique complex, developed together with our friends, which helps to completely cleanse your physical body of various destructive structures. It also cleanses lymph, blood, restores the gastrointestinal tract, metabolism and much more.

Due to the fact that we have five hundred people in the chat, I decided to add prizes today: a Cassiopeia T-shirt along with a Cassiopeia badge and a Cassiopeia bracelet. I also decided to add a Cassiopeia rubber bracelet.

I thought for a long time about how to do the prank correctly. I open the "Cassiopeia prank" chat, there are five hundred and twenty-eight people there. No one else is being added to this chat. I have a request to the viewers: everyone who participated in this drawing (maximum counted 21 people in the chat), write numbers from 1 to 21. Everyone wrote it.

If you see the number 17, count up. If you see the number 11, count down. If you see the number 7, count up. If you see the number 8, we count. If I see the number 5, we count, 1, we count, etc. I saw the number 5...

Irina: Stop.

Maxim: Elena Mikheeva, Rostov-on-Don. We're calling. Let's play a

bracelet. Elena, hello!

Elena: Hello!

Maxim: Elena, congratulations, you won one of the prizes, a bracelet. You met all the conditions when you entered this chat.

Elena: Honestly, I came in, but I don’t understand whether I came in correctly or incorrectly.

Maxim: What conditions did you fulfill?

Elena: I don’t remember, I went somewhere and clicked. Can not say.

Maxim: Do I understand you correctly, you don’t know what conditions you fulfilled?

Elena: I don’t know where I went, went in, went out.

Maxim: The first damn thing is lumpy. I'll sign you up, I won't judge you strictly. Have you fulfilled all the conditions that needed to be done for the project? That’s why I’m writing: “Elena Mikheeva – your prize is a bracelet. As a keepsake from Cassiopeia.

Elena: Thank you very much.

Maxim: You are now live. What would you like to say to the project or people live?

Elena: I want to thank Irina and you for starting this project. People really need it so that they know that there are aliens, that they exist, and that all this is true. You opened my eyes to everything, I am very grateful to you, thank you.

Maxim: Thank you very much, Elena. Thank you for supporting our project. I will ask our specialists to send you this bracelet.

The conditions were not met. It's good that we started with a bracelet, it's not so offensive for not fulfilling the conditions. But from the next participant, I will definitely demand that all conditions be fulfilled. We are now raffling off a Cassiopeia project T-shirt along with a badge. I'll just scroll the chat up and down for now. Irina will close her eyes and say the word "stop" to me. I'll stop.

Irina: Stop.

Maxim: What number is on top?

Irina: Five.

Maxim: Valentina Sukhareva. We're calling. Hello Valentina!

Valentina: Hello, Maxim!

Maxim: You are live, I hope you are watching us.

Valentina: Thank you, Maxim, I'm watching you, my heart is about to stop. I'm so excited that I'm about to die on the couch.

Maxim: Under no circumstances necessary. We are for peace and health. Congratulations, you won a T-shirt. I'll call you later, ask for your address, and we'll send you this T-shirt with the badge.

Valentina: Maxim, thank you very much. I'm waiting for you in St. Petersburg, I signed up for the retreat, which will take place on March 7-8-9, you can bring a T-shirt there.

Maxim: Great! Valentina, then I'll take you a bracelet too, since you'll be at our retreat. You are now live. What would you like to say to

people, the project, or about the current situation in the country?

Valentina: I wish you to continue your work. I'm overwhelmed with emotions now, I can't even say anything. I love you. I'm so excited that I just can't express it.

Maxim: Valentina, we are also worried about you, because you worry too much about us.

Valentina: My heartbeat now is not 60, but 360 heart revolutions.

Maxim: This is good, it shows that there is a lot of Love in the heart. Valentina, we will meet in St. Petersburg at our retreat. I would like to tell all viewers that the retreat will be held from March 7 to 9, there are still three available places. Below, under this video, there is a link. It so happened by chance that Valentina would participate in our retreat. Valentina, we hug you tightly, we love you. We are waiting for you in St. Petersburg at the retreat. I'll bring the T-shirt and everything else to you for the retreat. See you!

Valentina: Thank you, I'm looking forward to seeing you. Light and Love to you.

Maxim: I forgot to ask if all the conditions were met. OK. Now we will play the biocomplex of probiotics "Cassiopeia", and you must send me screenshots of the fulfilled conditions. Irina, close your eyes. I'll scroll up and down in the chat now. And you say: "Stop."

Irina: Stop.

Maxim: What number is on top?

Irina: 6.

Maxim: Tatyana Saunina. I'm calling. Her photo is very interesting.

Tatyana, please pick up the phone! Hello, Tatyana, hello!

Tatyana: Hello!

Maxim: Congratulations! Have you fulfilled all the conditions of our giveaway?

Tatyana: I have completed it, now I will send them all to you. I prepared them. Did not expect.

Maxim: If I cooked it, it means I definitely expected it.

Tatyana: Thank you very much, Maxim.

Maxim: Tatyana, you are live. What would you like to say? You can say whatever you want.

Tatyana: I am very glad that I found you. I watch you every day. And what you broadcast is priceless and people really need it. Many thanks to Irina and you, Maxim, and the entire Cassiopeia team.

Maxim: Tatyana, thank you very much and thank you very much for supporting us, this is very important to us. We try to pass on knowledge that was previously inaccessible to people. Now we try to do it with love.

Tatyana: Thank you very much, this is very unexpected for me.

Maxim: Tatyana, I'm waiting for screenshots from you on Telegram. I will contact you in feedback.

I write: "For Tatyana Saunina - a biocomplex." Let's continue. I promised an hour of meeting with Irina, a conversation on any topic. You can connect with your Higher Self, communicate with our interstellar friends, with those who will be present nearby. You can

simply ask questions. You will devote this hour to yourself the way you want. It will be on Irina's day off, we agreed with her. She has one day off, and she will give you this hour of time, because you devoted time to us and our project. And I thank you for that. Irina, are you ready? I'm already scrolling, then you'll tell me when to say "stop."

Irina: Stop.

Maxim: What number is on top?

Irina: 11.

Maxim: Fania is written. Even interesting. Who is this?

Fania, please pick up the phone, this is the most expensive prize. Will it really fail? The curators probably know what they are doing. Irina, let's do it again, Fania didn't pick up the phone. Close your eyes, tell me when it says "stop", I scroll down and up.

Irina: Stop. First number on top.

Maxim: Look, I have Olga written on it.

Olga, pick up the phone.

Irina: Passions are heating up.

Maxim: Olga, hello! You are participating in a drawing.

Olga: I hear you, Maxim. Looking at you.

Maxim: Great, you are live. Please tell me, have you fulfilled all the conditions of the draw? Did you take screenshots? Will you send it to me later?

Olga: I haven’t done it yet, but now I’ll do it and send it, of course.

Maxim: Tell me, what did you do in order to participate in the draw?

Olga: I’ve been subscribed to “Cassiopeia” on VK for more than a year. As soon as the conditions for the draw appeared, I wrote a post there. And on my Telegram page you are in pinned messages.

Maxim: Olga, I congratulate you! An hour with Irina will be allocated to you.

Olga: Oh, I'm so glad!

Maxim: Where are you from, Olga?

Olga: Orenburg.

Maxim: Olga, you are now live, you can say whatever you want, 1649 people are listening to you. Did you want to say anything?

Olga: First of all, thank you, Maxim, Irina, all representatives of civilizations. And greetings to all our earthlings. I love everyone very much. Thanks to Cassiopeia, I understood a lot for myself and discovered what I always knew in my subconscious. But I couldn’t find where to get answers. Thank you, I love you all very much. Peace, love and light to everyone!

Maxim: Thank you very much, Olga. Thank you for supporting our project, we love you too. I'll call you later. I'm waiting for screenshots from you.

Olga: Yes, of course, I’ll send everything now.

Maxim: We are in no way taking away the time you will spend with our

interstellar friends, our curators. I will now ask Irina, Archangel Michael and Ashtar Sheran, who are here, to answer your questions that you will ask live. I thank everyone who participated in the meditation, I thank everyone who participated in this drawing, because this drawing will be held not only in the group on VK, but also on other social networks: Facebook, Odnoklassniki, Telegram, Instagram. Whenever possible, we will give prizes and gifts to all participants in the Cassiopeia project. This is our little bonus for your support. Our specialists will also accept you to establish a connection with your Higher Self. We have various projects of psychological assistance and mental assistance. There are many projects that teach using the Donation system (this is your gratitude to the specialist who will work with you).

I give the floor to Irina, the curators. You can continue chatting, I'm leaving the live broadcast.

Irina: Our curators enjoyed watching the drawing and were worried about the participants.

Maxim: Dear winners, I will organize everything, there will be delivery. See you all again!

Irina: Ashtar Sheran said that the prank is a very good idea, we need to adopt it. He says: “Good creativity.” Archangel Michael smiles. Mead and LiScioni knew about it, we told them. All curators and the Cassiopeia team congratulate the winners.

So, you can ask questions, just clarify who they are addressed to. If you don't specify, then anyone can answer.

56:15 MidgasKaus about climate change on Earth.

Maxim: What is causing active warming on Earth? This is a question for MidgasCaus.

Irina: (MidgasKaus) Active warming on Earth is associated with three main factors:

- firstly, this is the greenhouse effect from the accumulation of carbon dioxide and sulfur dioxide in the atmosphere, which are released as a result of the combustion of solid hydrocarbon fuels and the reduction of green vegetation;

- secondly, this is an increase in solar activity. Temperatures in the solar system are rising. The increase in solar activity is cyclical (maybe less, maybe more). Now is just the phase (by the way, this is associated with a quantum transition) of increasing solar radiation activity;

- thirdly, this is the expansion of the earth's core, the approach of its outer shells to the earth's mantle, which leads to the activation of volcanoes.

All this is provoked by earthly plasmoid civilizations in response to their desire to cleanse the Earth of negative vibrations. It also involves the extraction and development of mineral resources in large quantities in different countries, including near faults in the earth’s crust. They disrupt the architectonics of the earth's crust, which disrupts the stability of the core and causes the outer layers of the hot core to approach the surface. The temperature is rising.

These are three factors.

58:31 Gaia and Demeter.

Maxim: Are Gaia and Demeter the same thing? Some call it Gaia, and others call it Demeter.

Irina: This is an entity of the 48th density level. Around 7 thousand years ago, one entity replaced another. Previously, she was called Gaia. She was incarnated, this is a plasmoid. And recently (about 7.5 thousand years) Demeter has been incarnated.

Maxim: What does this have to do with?

Irina: Plasmoid Gaia completed the tasks of its incarnation and transferred its powers to another. They also have an age, so for the last 7.5 thousand years she has been called Demeter.

59:28 Archangel Michael about the likelihood of ending the war in Ukraine in March 2022.

Maxim: I will probably turn to Archangel Michael (they didn't write to whom). Archangel Michael, please tell me when will this war that began on planet Earth end?

Irina: Here we can talk about probability percentages. The future has many options. There is a seventy percent chance that next week we will not only forget, but also understand that these events are already losing relevance for us. This means that within a week, 70% of the probability (69%) exists, 25% - on March 1-2, it will all end.

Maxim: Even such forecasts: March 1-2.

Irina: Yes, there is a 25% chance that it will be completed on the 1st or 2nd. And every day the probability increases, until the end of the week it is 70%.

Archangel Michael says that it is advisable to meditate every evening. This will increase the probability percentage.

1:00:59 Ashtar about the spiritual essence of participation in hostilities.

Maxim: Ashtar, I have a question for you, and it's quite provocative. Why did you begin to defend the Earth 12,000 years ago and go on the warpath? I will not read a person's personal opinion, but will ask the question as it should be asked.

Irina: I remember that there was already a similar question (it was a conference with Ashtar and a representative of Selbet).

(Ashtar) Thank you for the question. I was actually asked this question, and I will answer in exactly the same way.

The first factor is the attack of the Selbetites on a young promising civilization, which could potentially become our equal partner in the Galaxy. And the second factor is defenseless creatures in which a rational Spirit is embodied, the same as in me. When I found out, I had an impulse, a desire to protect them from cruel death. It was my duty. Debt is not an accurate definition for you: the power of my Love could not manifest itself otherwise, including to those Selbetites whom I brought out of incarnation. By allowing them to lower their vibration by killing many living beings and unchecked the destruction of many planets, I would participate in lowering their vibration. And this would not be Love for their Souls, but hatred. It turns out that all this is because of Love.

Even when my ship was involved in battle, if possible, I always offered to lay down arms and go to the planet Burkhad to analyze the reasons for such an action. If I was refused, then I attacked. I truly respected all my opponents who did not run from the battlefield or attack from behind, but met honestly, like warriors, face to face.

Maxim: Thank you.

1:04:02 Time on the Ashtar ship.

Maxim: Ashtar, please tell me how many hours in a day do you have on the ship?

Irina: It can be rotated in different ways. We don't have a day as such.

Maxim: How do you count time? How do you relax?

Irina: Your Sun is visible from our ship like a star. The ship is now at a distance of 36 astronomical units from the Sun. This is 36 times further than Earth. One astronomical unit is the distance from the Earth to the Sun 150 million kilometers. This number must be multiplied by 36.

150 million multiplied by 36 - that's how many million kilometers is the distance to my ship. But it is changing.

We have a room where there is always lighting. There are rooms for personal relaxation. You mean what is our personal cycle?

Maxim: Yes.

Irina: Sleeping and waking?

Maxim: Yes.

Irina: If you look at the earth's clock, then about 3-4 hours of sleep per day is enough for us. We spend the remaining hours on work, communication, relaxation, research, giving birth and raising children, and family activities. If you take an hour on earth, 3-4 hours are for sleep, and the rest is for other things.

Maxim: Thank you.

1:06:07 Probability of nuclear war on Earth.

Maxim: Tell me, please, what is the probability of a nuclear war on our planet? This is a question for Archangel Michael.

Irina: Yes, I looked at the probabilities, taking into account the fact that the MS and GFS bases are now activated (as MidgasCaus has already told you, and I have told my contactees more than once) and are in full readiness to repel an attack.

Weapons can be used by any country in covert mode, or can be transported under the guise of something else. In the event of a massive nuclear strike, which would be dangerous for the orbit of planet Earth and its stability, the MS and GFS bases are ready to repel an attack created by hidden resources. Your governments know about the presence of MS forces. They always keep this in mind when they

disguise nuclear weapons under the guise of bombs or missiles.

1:07:52 Alien bases on the Moon in March 2022.

Irina: Galactic news from LiSioni: bases under the surface of the Moon and the surface of Mars, which were built to save earthlings in the event of a military or environmental disaster, have been completely reactivated and are ready to evacuate and receive people. To Mars, the Moon. In total, more than five thousand ships arrived on Venus and the satellites of Neptune. All of them are located in the solar system either stationary or traveling between Earth and Mars.

Maxim: You are telling a terrible situation.

Irina: They take into account the whole situation.

Maxim: Is there such a possibility?

Irina: We must take into account even if the probability is less than 1%. We cannot lose you as a civilization. But in the coming year, the probability of the situation developing at least one nuclear strike or a series of nuclear strikes is currently about 14%.

Maxim: About 14%, yes?

Irina: Yes. But we already have to take into account even 1%.

Maxim: Dear friends, you write: “Let’s do meditations for donation.” I'll tell you that we have a separate meditation chat. There are links below this video you can go to.

1:09:38 Participation of aliens in stabilizing the situation on Earth.

Maxim: Ashtar, please tell me how you are now helping people, contactees on this planet? Are you currently helping to somehow

regulate the situation on Earth?

Irina: Yes. We come into contact with our contactees. These people match our vibrations, they are open, willing to listen to us, and do not push away our help.

I want to tell you right away that in the governments, military and scientific circles of almost all countries there are contactees of both the MS and the State Fiscal Service. But they don't talk about it at work, it's a secret contact. Curators are working with them to stabilize the situation in their departments. For ethical reasons, we cannot name specific names without their permission. But they exist.

The work is progressing successfully. Some decisions that could have significantly complicated the situation in Russia, Ukraine and other countries have already been cancelled. But this is not related to nuclear weapons, this is different.

Maxim: Thank you very much.

1:11:04 Contact with the subtle world through alcohol.

Maxim: Question from a viewer: "My wife is a contactee with the Spiritual world. Through her I talk to the Spiritual world. For some reason, contact only occurs when she drinks alcohol. Why through alcohol? Question to Archangel Michael. Thank you".

Irina: (Mikhail smiles) Thank you for the question.

(Archangel Michael) Your wife is a contactee. Who does she have contact with? If you say that with the help of substances that make her brain susceptible to some signals from the Spiritual world, from the subtle world, then this could be not only the Spiritual world, but for example, there could be representatives of plasmoid civilizations.

Why does she feel them in this particular state? What prevents her from feeling the answers without this substance? Perhaps this

substance brings her a change in mood in the form of relaxation, elimination of some fears, blocks. What prevents her from feeling fades into the background. She needs to establish a more conscious contact through her Higher Self so that she does not need an alcoholic stimulant. Then her contact will be cleaner, more accurate and independent of external conditions. This contact can be with anyone, you need to tune in through the Higher Self.

Maxim: Got it. I thought he was about to tell me something about demons.

Irina: It could be anyone, for example, plasmoids. You never know who she hears.

1:13:17 Movement of oil in the bowels of the Earth.

Maxim: The question is most likely for MidgasCaus, as a biologist. How does oil appear in “mothballed” wells? It seemed like they took her out of there, and then she appeared again.

Irina: The earth's crust consists of layers of soil that can shift. The cavity where the oil was forms a void in the ground. Oil can move from an adjacent cavity into an empty one. Therefore, oil can be added to a “mothballed” well because all layers are connected. Oil can also rise from below due to pressure differences.

Maxim: You just need to look at the well itself. I understand. Thanks a lot.

1:14:38 Aliens about the resolution of military conflicts.

Maxim: Irina, a question for you personally. Attention! I quote: “Irina Podzorova in chats called for an attack on the Government of Ukraine. Be careful with her broadcasting." Tell me, when did you broadcast in chats to attack the Government of Ukraine? And to whom?

Irina: I didn’t say attack the Government of Ukraine. If you have

already asked a question, I will answer. I was asked to ask my supervisors about Donbass (this was a few months or a year ago). Our conversation began with the question: “What prevents the Earth from joining the MC?” One of the conditions, as you know, is 5 years of absence of any military action. They began to write to me that there is military action on Earth now. They gave an example of military operations in Donbass. I said: “So the Earth is not ready to join the MC.” And here the question arises: “There is a war in Donbass, but the whole planet does not want this war. The Earth wants to join the MS. What should all countries do? Because of the war, we won’t be able to be in the MC?” I became interested myself. I asked my curators, I don’t remember exactly who gave the answer.

They told me: “There is a community of countries on Earth. For example, the UN. All countries are members of it. If a war, hostilities, or civil war breaks out in some country, this leads to the killing of people and withdrawal from incarnation. The vibrations of the entire Earth decrease due to fear, pain, hatred, because war is not accompanied by bright emotions. If this happens, and the Earth is preparing to enter the MS, then the remaining states must tell the warring countries about their numerical superiority and the end of the war. It is necessary to remind countries in military conflict that there is an international law according to which they become criminals when they start a war.” That's what I answered. They asked me about Ukraine and began to give a specific example. They wrote that Donbass wants to secede, is at war with Ukraine, and what will the international community do in this case. Good question. I asked that too.

The curators responded as follows: “If some want to secede, and others do not want to let them go, and murders occur, which reduces the vibrations of the Earth, the entire community, which includes large countries (Russia, the European Union, the USA) unites to stop the war in the conflict zone." I asked again: “How can countries unite?” They answered me: “Countries must create an alliance to restore peace.”

Maxim: Explain briefly, Irina, did you call on anyone to attack the Government of Ukraine?

Irina: Now I’ll tell you how it was. They asked me: “What if the warring

countries do not listen to the world community and continue the military conflict?” I answered as the information was given to me by the curators.

The curators said: “It is necessary to warn the warring countries so that they sit down at the negotiating table and within 24 hours (they don’t need much time) establish a truce, after which no more shots will be fired. The conflicting parties must agree on peace on any terms acceptable to them, taking into account the interests of each party.”

They began to ask me: “What if the warring countries do not listen and stop hostilities? What to do then?" The curators answered me: “If the agreements are not fulfilled, there will be a continuation of hostilities and a decrease in the vibrations of the Earth, then it is necessary for the largest countries to unite in order to land troops in the capitals of the conflicting parties, arrest the political leadership of the warring countries as criminals, and send them to an international prison for starting a civil war on Earth.

They asked me: “What should we do with the people?” The curators replied: “The people, under the supervision of peacekeepers, must choose new, more loyal rulers.” This is all.

Maxim: Thank you, Irina. A very long, well-written explanation.

Irina: I explain what the conversation was like and what answer I received from my curators.

Maxim: I understand that the person who asked the question about the conflict is very negatively opposed to Russia and our leader.

Irina: Maybe they conveyed it wrong?

1:21:45 Archangel Michael about the appearance of the Antichrist on Earth.

Maxim: The elders (broadcasters, contactees) are now saying that

the Antichrist will soon come to Earth. Archangel Michael, how would you comment on this?

Irina: (Archangel Michael) The coming of the Antichrist is an image of where the anti-Christian way of life will prevail over the Christian. Antichrist is not a separate person. If you look at the message of John the Theologian, who, by the way, wrote about the Apocalypse, then you will see that he called many individuals the Antichrist. He said: “Many Antichrists have appeared.”

Antichrist is someone who is the opposite of Christ. What? He may be outwardly similar to him in some kind of good deeds and deeds, but his heart will be filled not with Love, but with hatred. He will do good deeds only to attract attention to himself. And having received power, he will do the opposite of destruction, suppression, and so on. It can be a political ruler, or a religious one, as well as any person who is opposite to the vibrations of Christ. To put it simply, this is a person from the demonic level who did not incarnate as a demon, but simply became a demon in this life and carries out destructive policies and harmful actions on Earth, for example, unleashing wars, revolutions, etc. You remember that we invited the Spirits of those rulers who reached the demonic level. That's pretty much what they are.

Maxim: I understand.

Irina: They came.

Maxim: Is there such a possibility that the Antichrist will come to our planet? Or has he already arrived?

Irina: When rulers came who, for example, unleashed the First and Second World Wars (if they did not come before their disincarnation and went to the demonic level), they were these Antichrists. At the moment, there are practically no such Spirits who, in all countries of the world, because of their anger and passion for ruin, enter into destructive conflicts. Everyone is guided by one or another understanding of goodness, justice, Light. The Antichrist is the one who goes against all the laws of God, human, and moral.

To prevent the Antichrist from coming to power, it is necessary, as I have already said, to increase the vibrations of planet Earth. To do this, each of you must feel your spiritual heart and teach this to your children. The more little antichrists appear among the people, the more likely it is that they will attract a big one.

Maxim : I understand.

An interesting question: “Does Vladimir Vladimirovich know about the Cassiopeia project?” I’ll try to answer it, as I think, and ask our curators.

Guys, I assure you that he has no time for us. Maybe some services know that we exist. If I myself were in the service, I would definitely follow all sorts of schizoterics who broadcast on the Internet, because esotericism is an unrecognized science in our country, it is considered at some points a pseudoscience. Therefore, I think that Vladimir Vladimirovich does not know about us for sure, but the services that keep order in the country, I am sure, are looking after us.

Ashtar, do you think Vladimir Vladimirovich Putin knows about us?

Irina: I don’t know about you, but I’m sure that he, like any ruler, knows about the existence of aliens, the Interstellar Union from his intelligence services, from the former president. But by agreement with the rulers of other countries, in order to avoid the loss of power and the desire of people to interact with space structures, the truth is hidden from the people. Has anyone told the president about contactees, does he know about them? It’s better to ask him.

Maxim: We have people who can ask this question. Guys, can you ask the president this question personally?

Irina: You have a direct line with Putin. Call and ask this question. He will answer you.

1:27:53 Probability of alliance between Russia and Ukraine in 2022.

Maxim: Archangel Michael, the question is probably for you: “What is the likelihood that Russia and Ukraine will finally unite?”

Irina: How long?

Maxim: During the year.

Irina: Will they unite within a year? How? Allies or one country?

Maxim: Probably as allies. We don't know what we don't know. I’m even afraid to imagine what will happen if we make any assumptions.

Irina: How are allies at the level of Russia-Belarus or Russia-Kazakhstan relations?

Maxim: Yes. Is there such a possibility at all? And what is the probability?

Irina: Over the course of a year, this probability is 23-24%.

Maxim: So little?

Irina: Yes. Over the past 30 years, a lot of aggression has been sown in the hearts of the inhabitants of Russia and Ukraine. Anger, mistrust, negative information have already led to the existence of the egregor. It needs to be dissolved, especially since recent events have only strengthened this egregor. It needs to be dissolved through the joint efforts of the Ukrainian and Russian peoples. The likelihood of a relationship as an ally can be increased by working at it.

1:29:32 Archangel Michael about Putin.

Maxim: They say that our president is in contact with the “grays” and reptilians. Many contactees write about this. They even say that the

president intends to destroy the country. Ashtar, Archangel Michael, please tell me, what do you think? Are our president being influenced by aliens?

Irina: I have already said that the issue of contacts cannot be discussed without the consent of the contactee. It is impossible to answer who his curator is. You know very well that every person has curators, even at least in the form of the Higher Self. Who exactly is in contact with the person, the Higher Self or someone else, at what level of awareness of the contactee, we can only say with his consent. The same as about any of you, if asked. Without your consent, it is impossible to find out about your curators and where they are leading you.

Maxim: Let's ask a question to Archangel Michael.

Irina: Let’s formulate it so that you can answer.

Maxim: Does our president worry about his country and his people?

Irina: Yes, of course, the president is worried about his country and his people. We will not perform scans or diagnostics, but will express an opinion about a public figure. Our president is a warrior. He boldly defends his interests. His general field: a fairly tough, but not cruel patriot who loves his country, as well as his family. He is quite decisive and very fast. Possessing the swift mind of a strategist, the president makes plans for the country's development. He can allow anger and hatred into his Soul, but he is able to forgive and not hold evil in his heart, apologizing to those whom he has offended. The President is courageous, not subject to fear, and shows through his actions that he is ready to improve and move towards the Light.

Maxim: Thank you very much. I am sincerely glad that our country has such a president. This is without flattery. Indeed, he is a very interesting person.

1:33:54 The influence of the environment on the behavior of living creatures on Earth.

Maxim: Mid, please tell me why whales wash ashore and die?

Irina: Most often this happens from the leakage of petroleum products and toxic chemicals that are transported by sea. Underwater earthquakes and volcanic eruptions may also be the cause. Whales and dolphins, as mammals, are very sensitive to sounds, including infrasounds. This may scare them. People may not feel these sounds, which arise somewhere in the depths of the ocean due to the movement of the earth's crust. At the bottom this source of sound will be hidden from people, and will cause panic among whales and dolphins. Fleeing from fear, they can swim from this environment to the shore. This also happens.

Maxim: They don't understand that they are washing ashore?

Irina: The environment scares them, and they begin to swim away. It's instinct. They are very sensitive to sounds. Even if an intelligent person who is, for example, on a ship on the open sea, is exposed to infrasound of a certain frequency for a sufficiently long time, he will not hear the sound with his ears. Man is not as sensitive as these animals. It is much less sensitive and, moreover, is not in the water, but above it. Water conducts any sounds much better than air. A person will only feel the fear that the ship is about to capsize, or something is just about to happen.

But if a person does not have special training in controlling his instinct, he can throw himself from a ship into the sea and swim so far away from it that he then does not find his way back and drowns, despite the instinct of self-preservation. We are talking about reasonable people. And animals do not have any understanding of abstract ideas in order to save their lives in the sea. They feel like they have to run for their lives, that's all.

The same thing happens with birds. A migratory bird may lose its way. When the Earth's magnetic field is disrupted due to solar exposure, birds can lose direction and fly to another place. For this reason, there are cases of bird deaths.

1:37:16 Climate weapons on Earth.

Maxim: Is there really a HAARP project that is implementing climate change on the planet?

Irina: (Ashtar) I know for sure that experiments on the use of climate weapons were carried out quite a long time ago on Earth. They are now officially “mothballed,” but unofficially, according to Interstellar Union intelligence, something similar to a climate weapon may be used. You do not yet have the technology to somehow influence the magnetosphere, the Earth’s core, or a certain state of the atmosphere, for example, to cause huge lightning bolts for a long time, which can be directed at some objects. You don’t yet have technologies for controlling atmospheric electricity at this level. Although experiments were carried out, they did not lead to the creation of anything dangerous.

You have attempts to control the atmosphere, create certain weather, for example, create rain or, conversely, stop it. But, I remember, when large areas were engulfed in forest fires in Russia, the USA and Canada, the countries spent enormous amounts of money to extinguish them. But there was no impact on the weather. This suggests that nothing has been invented yet.

Maxim: Thank you very much.

I see attacks on presidents again. When it's all over and the media really starts working, we'll all look together at what happened. Ukrainians have one information, we have different information, we will not hold on to any information. I think and feel with my heart. I speak from my heart. If my heart says so, I will not deceive anyone and say otherwise. Therefore, I suggest everyone wait for a peaceful resolution of the conflict and then see in the media what will happen.

Irina: Dear friends, I want to tell you that for any person the energies of anger, condemnation, resentment will help this war, destroying the meditative, spiritual environment that we are creating with you. Let's not do this.

Maxim: We will now conduct meditations and meditative practices

more often while we are in such a difficult situation.

1:40:32 Aliens about the Russia-Ukraine conflict in March 2022.

Maxim: Probably a question for Archangel Michael. It interests me and many people very much. Archangel Michael, please tell me, now we have such a concept of “sanctions”. Russia is separated from Europe by economic parameters, by different payments, and by trade interactions. Please tell me your forecast for the coming year. What will happen in Russia?

Irina: I would like to answer a question about economic, technological and other sanctions. In fact, this lowers the vibrations of the Earth and takes it away from the path of a brighter, higher development, because if some kind of misfortune happens in one or two countries, the task of all other countries is to help them, and not to drive them even further into negativity. If any two countries quarrel with each other, then the task of all other countries is to make every effort to resolve issues between these countries diplomatically. Only such a decision will be in the Light of God. The actions of countries that impose sanctions as restrictions and punishments are not constructive.

These actions do not achieve their goal of resolving the conflict. The one who started the conflict already knew about them. This leads to a decrease in the vibrations of people from the common people, to hindrances in the development of everyone who does not want this war and conflicts. And a decrease in vibrations will cause a decrease in the standard of living, despondency, anger, resentment, which will clearly affect the authorities. Due to the accumulation of negative energy in the Earth's egregor, wars may occur in the future.

If two countries have disagreements and it comes to war between them, then a constructive solution for them will be to turn to each other with Love and offer several diplomatic solutions, and not to search for right and wrong. Several diplomats must propose solutions to both sides of the conflict and mediate between the conflicting parties in order to meet and discuss everything. There is no need to bring many Souls out of incarnation, who are all beloved children of God. Countries need to talk about this and not act with strict restrictions. This will only cause more aggression.

The first thing all other countries had to do in the event of a conflict was to immediately stop supplying weapons to kill. It is a political crime to supply weapons to a country in which there is a war. They feel bad enough. They are already in a state of suppression of their minds. And those who sell weapons or give them for free to pay for future loans are profiting from people's blood. They are full-fledged participants in the war and will certainly acquire karmic responsibility for themselves.

Maxim: Thank you, I understand why you are talking. I understand everything. I give a translation that those who give weapons to a country that is on the brink of this war have no desire to stop the war. These allies have other desires.

Irina: (Ashtar) I can't even imagine that a war will start between two planets or on some planet in the MS, for example, between Esler and Burkhad because of their quarrel. It is impossible to imagine how Tumesout or I will begin to supply one of them with weapons to bring their brothers out of incarnation.

Maxim: I'll tell you a secret, the Russian Federation, according to our military, bombs only military bases in Ukraine, which had a lot of weapons supplied by the allies. Draw your own conclusions. The allies recommended that the Ukrainians place various equipment in the center of residential cities. Nobody is interested in not having war in the cities themselves.

Irina: They write: "If the forces are not equal?"

If the forces are not equal, and one of the parties to the conflict asks to balance these forces with the help of weapons, then there is no need to follow her lead. It is necessary to explain that it is necessary to sit down at the negotiating table.

If they say that they need it for self-defense, then they need to turn to the other side of the conflict and demand a ceasefire from it. If the demands are not met, then all the forces of the world must be united in order to land temporary peacekeeping troops on the conflict territory and arrest political criminals who shoot at unarmed people and give

orders.

Maxim: And they distribute weapons to unprepared people.

If YOUTUBE is suddenly turned off, we also have the VIMEO platform. We have many broadcasts on this platform.

Irina: Archangel Michael spoke about the attitude towards sanctions. What are the consequences?

Maxim: Yes, what are the consequences of these sanctions?

Irina: As I already said, if your country, which was subject to sanctions, agreed with them, knowing for sure that they would act, it is ready for this. If they were ready to accept sanctions by violating the advice and words of the countries that imposed these sanctions, it means that they were preparing for more than one month, and perhaps even longer. Decisions to violate international laws are believed by some to have been made by people in government who knew full well what the consequences would be.

There will be no serious consequences for the sanctioned country. But there is a possibility of some decline in the quality of life of the people. This will lead to high prices, unavailability of some goods and services, inability to travel around the world, etc. There may be problems with the functioning or termination of organizations. But there will be no serious consequences for the sovereignty of the affected country. There is no such possibility.

Maxim: We have information that some groups will never give you. I don't know if it's information or misinformation, but I will speak from my heart because that's how I feel. I will say that you have internal groups that make special explosions, launch special missiles at peaceful houses.

Irina: Yes, we do too.

(Archangel Michael) I looked through the egregors of Russia and Ukraine. In the egregor of Ukraine, fears of defeat, disintegration, and loss of independence can be traced, since it is weaker in military-political power compared to Russia. Because of fear, there is a tendency not for special explosions, but for the presentation of one video after another, specially filmed at a certain time, in a certain place.

Maxim: I'll explain to everyone once again: the Cassiopeia project considers Ukrainians to be brothers and sisters and wants a speedy resolution of the military conflict. We help with everything we can: mentally, morally, individually. We are for world peace. Our interstellar friends cannot intervene in this situation. People always have and should have a choice. And what will happen in the future depends on the choice of each of us.

The Cassiopeia project asks not to show aggression towards people and rulers. First of all, the Cassiopeia project asks you to adjust peace and Love within yourself. And convey this world to everyone, regardless of the information that the media and other means provide you. The Cassiopeia project wishes everyone Love and awareness. We love you no matter where you are, what race you are, what you do. Project Cassiopeia is not involved in any military or other activities.

Irina: I read: "The broadcast is strange. Crimea and Donbass were taken from us, they are fighting. And you say: "Putin is good." I'll try to explain the meaning of the word "taken away."

Maxim: Irina, let's not get involved in politics.

Irina: There is a spiritual answer.

Who is the ruler? If we consider the people as a single family, then the ruler will be figuratively perceived by us as a father. The ruler is the father of the family, the senior mentor, the giver of the law. Every family has a mentor.

Maxim: Victor writes: "Brothers don't bomb brothers." Indeed, no one

bombed anyone in Donbass. In Lugansk, too, no one bombed anyone. They don't bomb brothers there.

Irina: How do we understand that Crimea and Donbass were “taken away”? You know, there's a spiritual aspect to it. If we consider a people as a family, then the ruler of any country performs the function of a father, mentor, teacher. If some children want to leave their father somewhere, then the reason lies in the father’s attitude towards his children. Why do they want to leave? Any wise ruler, faced with this situation, lives in the Light of God. He will first turn to his Higher Self and ask, “What is the spiritual reason that these territories want to separate from my country for which I am responsible?” He will act in accordance with the answer, but always in the Light of God, without violence, without killing, through diplomacy, negotiation and compromise.

Maxim: It’s a very difficult situation, I urge everyone to be restrained. Once again I would like to remind you that Cassiopeia is not involved in any bombings or strife. We exist to give people faith and awareness. We are for peace. We look forward to a speedy resolution of the conflict between the two fraternal peoples.

Thank you very much for being there. I apologize again for this prank, but I couldn’t help but pull it off because I promised. I always keep my word. Thank you so much that each of you is concerned about the country, for yourself, for your neighbor and for those around you. See you soon, thank you for this broadcast.

Irina: Thank you, we hope that in the next broadcast we will talk about a lighter topic that will bring us all joy.

Maxim: Please write who you would like to meet on the next broadcast. It could be an alien race, a spiritual entity, a former figure. Reading: Pushkin, Blavatsky. Spiridonov, Shiva. With the Shimorians? Interesting. Airl, Levashov, Gagarin. Levashov recently came out of incarnation?

Irina: Contactor?

Maxim: Yes.

Irina: It seems, yes, recently.

Maxim: He said great things.

Irina: Do you have any questions for him?

Maxim: Yes. Leonardo da Vinci. It would be nice. Alexander the Great. Zadornov. No, it's too early for Zadornov. Lev Tolstoy. Caesar. General Ratnikov. It just came out recently. With Hitler.

Irina: Who most often?

Maxim: Goryaev. We spoke with his curators.

Irina: They repeated Pushkin three times.

Maxim: Pushkin?

Irina: Dostoevsky.

Maxim: Matrona. Osho. Levashov. Levashov should be tried. I heard you, dear friends. Thanks a lot. I'll look again at who you wrote about. We will definitely invite someone who will be more relevant. Thank you!

Irina: Thank you!

Maxim: Goodbye everyone! Until next time. Thank you for being with us.

Irina: Thank you all!

27/02/2022

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Ashtar Sheran - head of the space fleet of the Galactic Federation of Light (GFS);

Archangel Michael is the guardian of the Christian egregor, patron and curator of the Earth in the Spiritual world;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

#431 Visceral massage. An effective way to heal and maintain human health. (Part 1)

https://blog.cassiopeia.center/visceralnyj-massazh-chast-1
https://www.youtube.com/watch?v=8QE3HtfbFb8

00:21 Introduction of participants.

Alexey: Hello, my name is Alexey, in the project I do visceral massage. I have many questions regarding this particular topic. I'd really like to hear MidgasCaus's opinion. I really like the way he answers questions. Detailed, detailed and very deep. There is no such knowledge that he gives us on Earth, and you can feel it right away.

First question: Mead, how is massage of internal organs useful, what does it give to a person? How does it affect the physical, energetic and mental bodies?

Irina: Hello, dear friends! I'll introduce myself for those who don't know me. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today with us is my curator in the astral body MidgasKaus from the planet Esler, a biologist, psychologist and specialist in alien civilizations.

01:25 Visceral massage, its effect on the body.

Irina: (MidgasKaus) Hello, Alexey! I've actually studied this issue. We will first explain what visceral massage is. This is a method of healing from various diseases (as well as their prevention). The massage is performed by influencing various biologically active points of the internal organs through the front wall of the abdomen. But there is visceral massage of different parts of the body. This is exactly what we are talking about now. The most common massage associated with

the abdominal organs is the impact on various points of the intestine, on biological points that are located in the muscles, and on the lymph nodes. There is an influence of vibration pressure and the energy of the person himself.

A lot of effects on the physical body are produced by massage. Its main purposes are to increase blood circulation, remove toxins, increase immunity, restore or regenerate tissue, and through these points the entire body is activated, for example, removing excess fluid from the body. There is even an effect of energy on the microbiota, that is, dysbacteriosis is eliminated and peristalsis is improved. There are a lot of indications for each organ, for each disease. The enzymatic activity of the liver and pancreas increases, not the symptoms, but the causes of pancreatitis, liver dysfunction, cholangitis, and so on are relieved.

Only this should be done by someone who has been trained using special methods, and by someone who has a pure Soul. This, by the way, is not only a form of massage, but also a form of energy healing. This involves not only hands or the warmth of hands, but also human bioenergy. Therefore, if a massage therapist, while doing a massage, is in a state of merger with his Higher Self and sends Light at this time, then he also dissolves energy blocks. And, by the way, it dissolves blocks in the second, third and fourth chakras, as well as in all the others due to the etheric flow of energy. It does not remain in place, but disperses throughout the entire etheric field, gradually onto the mental body. If you complete a course of these sessions, the light energy of the massage therapist is considered healing. We consider this to be healing.

The healer’s energy will constantly flow throughout the course into the human biofield. Gradually this will affect his mental body, he charges his bioenergy with his emotions and thoughts, and these thoughts will influence him, eliminate negative mental attitudes.

Alexey: Great.

06:05 Contraindications to visceral massage.

Alexey: What contraindications and restrictions may there be?

Irina: (MidgasKaus) I would call acute infectious processes in the abdominal area a contraindication - this can cause their aggravation, when tissues cannot be injured. Oncological diseases, when sudden energetic and physical stress is contraindicated, as well as high temperature, any processes associated with pain, and conditions after abdominal surgery, until all tissues are completely healed. It is also necessary to be very careful with the condition of the hernia so as not to cause any harm, since with increased peristalsis, the hernia can increase in size and become irreducible. This is not a contraindication, but must be done with great caution.

Alexey: Limitation?

Irina: Yes.

Alexey: What about pregnancy?

Irina: Pregnancy is not a contraindication, but it needs to be done gently.

Alexey: Also with restrictions?

Irina: Yes, also with restrictions. Depending on the period, it can be different. If you are already pregnant and it is impossible to find a place where to do this massage, then it is better not to do it, because it will not spread to the intestines, and you can cause uterine tone.

Alexey: I see.

08:05 Preparing for the massage.

Alexey: What is the best way to prepare for a massage of internal organs? Maybe it’s better to do something before the massage, some kind of procedure or take something?

Irina: (MidgasCaus) I would not recommend eating food 3-4 hours in advance. It depends on what you ate. This is not a direct contraindication, but a person may experience increased peristalsis, and then this food will be unpleasant for him, it will cause bloating, rumbling and dysbiosis. And in general, the massage itself will be unpleasant for him, he will feel pressured upward.

It is advisable to relax before this. Take a warm bath or shower with essential oils. It is very good to use oil of oregano, lemon balm, lavender, mint, that is, in order to relax. And if you are prone to spasms of internal organs, you often have constipation or have cholecystitis, then half an hour before the massage you can take an antispasmodic tablet, for example, Drotaverine, so as not to provoke a reactive spasm.

What is important is a psychological attitude, trust in this specialist and a willingness to relax. You need to imagine that you are not at a classic massage session, but at a spiritual healing session. Completely relax, be in a state of mental peace. While you are receiving a massage, concentrate on internal sensations, thoughts and images. Send Light, since it sends energy into your physical and etheric bodies, then from this energy you can activate your own blocks, energy processes, some hidden memories. You have to follow this up. This will prevent you from stressing and will relax you.

Trust and relaxation are important here. By the way, this is like preparing for the Higher Self.

Alexey: So you can also lead to the Higher Self through massage of the internal organs?

Irina: If someone can do it under such physical influences, then of course. In general, the Higher Self concentrates more on the Spirit. And here a person will have a feeling in his body this way and that way. But if someone can not pay much attention to the body, and ask the Higher Self, then yes, it is possible.

Alexey: I see. What if you do some procedures, for example,

cleansing, laxatives or an enema?

Irina: In general, I am not a big supporter of laxatives and enemas. A person who does not have abnormal liver function, dysbiosis, does not have any fears, energy problems, cleanses from toxins, waste, and intestinal contents naturally. The body can cleanse itself.

I do not recommend using laxatives or enemas. Only as a last resort, for example, if there is a delay in bowel movements for more than two days, and you experience discomfort from this, because there is a physiological delay. Maybe you haven't eaten enough food, haven't exercised enough, or haven't been drinking enough water. By the way, if you don’t drink enough fluid for your body weight, then even a laxative won’t completely cleanse you, it will just cause pain. I do not recommend resorting to these remedies.

Alexey: Only out of necessity, when there is a reason for this?

Irina: Yes.

13:29 How to save the results of a massage?

Alexey: What means can be used to maintain a positive result from a massage of internal organs? Diet, a complex of some herbs, vitamins, minerals.

Irina: It depends on the specific problem that the person came with. There will be more individual recommendations here. It is necessary to continue to work on it with the help of a complex of herbs. In some cases, medications or only herbs are required, and, of course, energy work with various healing sessions and energy practices is always recommended. Independent practice, for example, breathing exercises, meditation, yoga. Naturally, recognizing and eliminating the spiritual cause of the disease. This should always be present.

And specific recommendations, diets, drugs or herbs - it depends on the person.

Alexey: Everything is individual, right?

Irina: Yes.

Alexey: Are there any general ones that will work for every person?

Irina: (MidgasKaus) If I say general, for example, vitamin D, maybe someone, on the contrary, has it in excess. The general thing is, of course, strengthening the immune system, good nutrition, which is considered varied, hardening, that is, the effect on the body of heat and cold, and various weather factors. Only it should be gradual, measured. This develops the habit of the immune system to work in different conditions. This is useful.

And also useful, naturally, is movement and exercise. But they are only useful if performed regularly for 40-60 minutes a day. And if they are carried out from time to time for 3 hours a day, this is no longer useful. If, for example, once a week you exercise for 3 hours, you can injure yourself or exhaust your strength, it will not be beneficial.

For these 3 hours of classes you will not compensate for a week of physical inactivity. You will simply weaken your body even more. Therefore, the benefits of physical exercise lie in its regularity and dosage. Also useful, especially before bed, are walking in the fresh air, reading and meditation. When you are alone with the Creator of the Universe before going to bed, thank Him for everything and analyze your life that day (what you did, what you didn't do, what you planned). This will be beneficial if you do it not from time to time, but regularly.

Alexey: Okay.

17:30 Human emotions and chakras. Connection between internal organs and chakras.

Alexey: What psycho-emotional states can cause complications in which organs? For example, liver problems or pancreas problems. A person is in one long-term psycho-emotional state, for example, anger - liver, or intestines - resentment, kidneys - fear.

Irina: (MidgasKaus) Resentment can cause complications in the heart.

Alexey: What psycho-emotional states can cause internal organs to malfunction?

Irina: How do blocks accumulate? The thing is that every person has stronger chakras and weaker chakras. If blocks accumulate in a person, then first they accumulate in the weaker chakras, where there is the least vital energy, because it circulates weakly there anyway. With negative emotions that a person does not process and transform into Light (hides from himself, does not want to think about it, throws it out of his consciousness), the first thing is that the chakra that works weakest stops working, closes, and is blocked. That is, the energy center in which there was the least vital energy.

He already had little energy, and with negativity it is easily blocked. And the stronger one is blocked more slowly due to the circulatory movement of vital energy (if we are talking about the chakras, the etheric body). So, which chakra is blocked in the area where it is projected onto the physical body, problems are possible.

If we are talking about organs, then, for example, organs associated with the first chakra: legs, rectum, musculoskeletal system as a whole, then most often this is blocked by fear for life, not only your own, but also for the lives of your loved ones, for your well-being. Most often, this blocks the first chakra, which means problems begin with the energy filling of the corresponding organs and a decrease in immunity, which can be a parasitic, infectious, autoimmune process, or allergic reactions.

The second chakra is everything connected with the reproductive system in women and men. Most often it is blocked by grievances against the partner. For men it is for women, for women it is for men. I have encountered cases where the second chakra was blocked by grievances towards one's body and its lack of acceptance. Some part of the body or the whole body is not accepted. They begin to criticize, they begin to remake their body with irritation towards it. And this can also block the second chakra.

I have also seen, although less often, when the second chakra was blocked by grievances against children and even parents, that is, it is responsible for the family and for its body. You see, this is a little different.

The third chakra is responsible for the gastrointestinal tract, as well as the liver and pancreas. It begins with the solar plexus and is responsible for many organs. It is blocked by fear, for example, associated with financial instability. It is also blocked by the fear of social activities - being noticeable, saying something, carrying something, and so on. It is also blocked by the fear of losing a job or not finding one. Career-related fear. She is also blocked by anger at the same things, for example, at the lack of money, at her debtor. Everything related to work and money. All the negative feelings associated with financial security and career.

Often this chakra can also be blocked, for example, by anger at subordinates. Either on the boss or on the subordinates. That is, it is no longer connected with the family, but, as we see, with society.

The fourth chakra is responsible for the cardiovascular system. The condition of the heart and blood vessels throughout the body, as well as the condition of the lungs, depends on it. This chakra is responsible for our center of the physical body, breathing and blood circulation, on which life in general throughout the body depends. Very often it is blocked by grievances against parents, and against life, and against one’s relatives, and, naturally, against oneself.

It is also blocked by feelings of guilt, anger, rage, irritation, most often towards someone in the family. I noticed that if a person is offended by his parents, if his second and fourth chakras are in approximately equal energetic positions, then the fourth will be blocked first. But if it was initially stronger than the second, then in this case the second will be blocked. See what a nuance.

By the way, the work of the thymus gland, the thymus gland, which is responsible for immunity, depends on the fourth chakra. You see, there are the centers of respiration and circulation, and even the center of immunity.

The fifth chakra is responsible for the upper respiratory organs, speech, the thyroid gland and cervical spine, the oral cavity, and so on. She is responsible for the organs in this area. Most often, it is blocked by fears, but they are no longer associated with the fear of death, but, for example, there is a fear of loneliness, or you are not like everyone else, the fear of condemnation. Some social fears can also be blocked by anxiety and self-doubt. Because a lot of fears are related to the fact that I am not confident in myself, because I am afraid to be confident, this imposes some kind of responsibility. Fear, uncertainty, doubt about something can block you. Everything that is associated with a violation of self-image, with a violation of self-confidence.

If a person is offended by someone, angry with someone and wanted to express it, but did not express it, then the fifth chakra can be blocked by this too. That is, some kind of unexpressed aggression, resentment, anger, and so on.

The sixth chakra, which is located between the eyebrows, is responsible for physical vision, physical hearing, spiritual vision and spiritual hearing, as well as for the work of three very important endocrine glands: the pineal gland, the pituitary gland and the hypothalamus, which are generally the three conductors of all cells of the body. They control with the help of hormones, including the work of the nervous system, and the work of all internal organs to one degree or another. These, one might say, are the three pillars of the throne where the human Soul sits, like three pillars.

What can block this chakra? Most often it is blocked by the fear of learning something new, the fear of the future. It happens that it is blocked by the fear of something otherworldly, when a person is afraid to look at something, see something, open his eyes to something, when he is afraid to see the truth about himself or about another. This block is also caused by fear of something supernatural. For example, before external influence, before magic, damage, before contacts with demons. There are people who believe that this can have a negative impact on them. They are afraid of this and do not work with this fear, do not work on developing trust, and their sixth chakra is gradually blocked.

Also, a block associated with doubts may appear there, including the

existence of the Spiritual world, the existence of God, any disbelief, doubts can also block this chakra.

The seventh chakra is located at the top of the head. It is responsible both for the work of the cerebral cortex and for the connection of the Spirit, the embodied part of the Soul with the Higher Self through the spiritual channel. It is also responsible for the blood supply to the brain, for the proper functioning of neurotransmitters, which affect the speed of thinking of the embodied part of the Spirit, and the amount of RAM that the Soul can use through the brain, and much more, that is, it is responsible for mental functions. Its energy content is responsible for mental functions such as memory, speech, thinking, perception and others.

How can it be blocked? Disbelief in the existence of God can be blocked by resentment towards God, resentment towards fate, non-acceptance of some event, pride, selfishness, when a person is selfish, thinks only about himself and does not think about others, and can also be blocked by strong hatred of someone.

Alexey: Great. Of course, good detailed answers, thank you.

31:57 Self-massage of internal organs.

Alexey: Mid, how can you massage your internal organs yourself so that it is high quality and safe?

Irina: A person can learn to massage himself, but then it will be devoid of the bioenergetic component. Because if a person does something for himself, he has the same energy, his own. It will simply be an impact on the physical level. And even more so, there are effects through visceral massage on the internal organs that cannot be done with your own hand, because there is no such angle, this is the first thing. And second: since a person has reflexes and an instinct of self-preservation, which gives rise to reflexes, having felt some kind of discomfort or pain, he will subconsciously ease the pressure, and this will not bring such an effect. But the person who massages him does not feel this.

Alexey: In any case, as prevention or the same exercise. Will this be good for human development?

Irina: It is necessary first to study the structure of the internal organs, where the digestive organs, large vessels, large lymph nodes are located, to study this technique of pressure and vibration, it is also necessary to apply pressure to biologically active points (shows an anatomical diagram, and that there are points throughout the intestine). It's all in your literature. In general, people have been doing this since ancient times.

You can learn this from Alexey Shuvalov. He is a very good contactee, he has contact with the Spiritual world, he studied this technique in great detail. He has dozens of grateful patients who have passed through his hands and through his energies.

Alexey: Thank you, Mid.

35:00 Maintaining a healthy gut.

Alexey: What else can you recommend to people so that they can put their organs in order on their own? How to brush your teeth, for example. Is it possible to give something like this to absolutely everyone, every person, regardless of their individual characteristics? Let's say charging and hardening. Something that will help the digestive system and the functioning of internal organs.

Irina: Everything is already set up there from birth. Enzymes that work on the orders of special nerve signals do all this in a coordinated manner, the main thing is to maintain this system in a healthy state. And for this, as I already said, it is necessary, firstly, to monitor your immunity in order to be exposed to infectious diseases as little as possible, which necessitate the use of antibiotics. After antibiotics, the intestinal wall often becomes like scorched earth, like after a war.

Alexey: Burns of the mucous membrane.

Irina: There is nothing alive left there. I remind you that your intestines

should normally contain up to 2.5-3 kilograms of microorganisms. They help your immunity, digestion of food and even aid circulation by releasing special substances that stimulate blood circulation in the intestinal wall. Therefore, in order to restore them after taking a course of antibiotics and antimicrobial substances, in many cases it is necessary to consume probiotics, certain microorganisms.

It will also be useful for anyone who has problems with the liver, intestines, or pancreas to undergo a course of antiparasitic treatment and prevention by taking special antiparasitic drugs. There are specific drugs, but this needs to be looked at individually. You need to be tested for parasites. Many people have them and also interfere with the functioning of the intestines and the whole body.

There is abdominal massage, and there are also special physical exercises that improve intestinal activity. There are also special yoga poses that increase the circulation of energy in the Manipura chakra and in the surrounding etheric field, which means they help these organs function better on the physical level. This is something I could recommend for anyone that doesn't involve chemicals or herbs.

39:42 Herbs are antiparasitic and antiviral.

Alexey: And specifically regarding herbal preparations, that is, herbs that could have an antiparasitic effect? What herbs can be used to protect against viruses?

Irina: Garlic, ginger, cinnamon, clove seeds – these are the things to add to food. It is also useful to drink a mixture from different parts of tansy and calendula flowers an hour after meals for ten days.

Alexey: Equal parts?

Irina: For example, take a tablespoon of tansy and calendula per 250 milliliters of cold water and bring to a boil. Boil for 10 minutes, then cool and strain. This must be drunk for 10 days, 3 times a day, an hour after meals, two tablespoons for an adult, for a person who weighs less than 50 kilograms - one tablespoon.

This very well suppresses and destroys different types of helminths, worms, roundworms, toxocara, hookworms, and even kills larvae in the blood. I would recommend this cleansing decoction to everyone. Tansy is an antiparasitic agent, calendula is an anti-inflammatory agent that regenerates and softens the mucous membrane. Because after tansy removes one or another helminth, there remain wounds on the mucous membrane where it was attached. And it is necessary to heal them, so calendula will help.

Alexey: Cool. Is there any antiviral mixture?

Irina: Antiviral, what is it?

Alexey: Something common to all viruses. For example, some kind of herb that affects all viruses.

Irina: A very good remedy for viruses is eucalyptus leaves, as well as eucalyptus essential oil. It comes from all viruses, namely from intestinal viruses, there are rotaviruses, St. John's wort works well for them, blueberries, wormwood also works well. And, naturally, the same ginger root.

Alexey: Do antiparasitic herbs also affect microflora? After them, do you need to help the body recover?

Irina: In general, they do not act as well as antibiotics, for example, but still, after 10 days, it is advisable to also take a course of probiotics, because the death of beneficial microorganisms is also possible. Although not on such a scale. This is not necessary, but it is possible.

Alexey: What about staphylococcus, streptococcus?

Irina: Calendula and tansy are also from staphylococcus and streptococcus. From a wide spectrum of microbes and helminths.

Alexey: That is, if it’s the nasopharynx, then you can add rinsing?

Irina: If it’s the nasopharynx, then you can use any products related to eucalyptus, Chlorophyllipt, for example, or Iodinol. And, naturally, work on spiritual reasons, find out from the Higher Self what caused the decrease in immunity in this area, what the spiritual reason is, what the block is, and dissolve it.

45:46 Cleansing the lymphatic system.

Alexey: And regarding the lymphatic system, to activate or cleanse the lymphatic system, what herbal preparations can be used?

Irina: An infusion or decoction of burdock roots, tincture of violet tricolor and string are good for cleansing both the circulatory and lymphatic systems.

Alexey: Should we each take it separately or together?

Irina: It is better to take a decoction of burdock roots separately. And string and violet can be used together.

Alexey: Is this a course?

Irina: Yes. There is also a good collection that activates the lymphatic system, strengthens the immune system and cleanses the blood, this is when you take the herbs St. John's wort, chamomile and immortelle, add a teaspoon of birch buds to them, as a cleanser, you don't need much.

There is also a collection that cleanses the genitourinary system from sand and stones. This is the herb of knotweed and yarrow, a tablespoon each. But it needs to be boiled. Bring to a boil and cook for at least 15 minutes over low heat. For prevention, use 200 milliliters per day before meals in small sips, that is, take a few sips from time to time.

Alexey: Half a liter?

Irina: If this is just prevention, then it will be 200 milliliters. And if this treatment, for example, dissolves very well, even turns oxalate stones into sand, does not move them from their place so that they cause an aggravation, but acts on them in such a way that they decrease in place. Here you need about half a liter per day for a month, up to two months - depending on the size.

48:54 Stones in the gall bladder and kidneys.

Alexey: And regarding the stones in the gallbladder, what can you recommend to a person?

Irina: This is more complicated, since, unlike the kidneys, where the stones are located, blood in such a volume does not pass through the gallbladder. It also depends on the composition and cause of the stone. You can try sunflower root, but you need to watch the dosage. In this case, as a side effect, calcium will come out of the bones. And the same rosehip root.

Alexey: Can I have rosehip syrup?

Irina: Root.

Alexey: Root tincture?

Irina: Yes. You can also try making a garlic tincture, but it does more to cleanse blood vessels from blood clots.

Alexey: Thins the blood?

Irina: Yes.

Alexey: Yes, Mead, of course, I would come to you every day for advice. Because a lot of people come, and I want to help everyone. But knowledge is not always enough.

Irina: The whole point is that when it comes to gallstones, you need to look at the reasons for their formation, because they are not like kidney stones. There may be, for example, some parasites in the liver, there may be stagnation of bile, and no matter how many herbs you drink, until you remove it, it will continue there. Stagnation in the liver occurs for various reasons: intoxication and previous hepatitis, for example, in youth. There are various intoxications, maybe there is something in the food, or the person is consuming something. It happens due to negative blocks. Different reasons.

Alexey: Most often, all together.

Irina: Yes.

51:28 The spiritual reason for the formation of sand and kidney stones.

Alexey: What could be a spiritual reason for the formation of sand in the kidneys?

Irina: Most often, formations are still provoked by inflammatory processes associated with sluggish pyelonephritis and so on. The same thing, a decrease in local immunity. Often provoked by fears, as well as diseases of the genitourinary system in general, and anger at a partner.

By the way, I want to tell you that such stones occur even in children, in whom this can be provoked by the energy of their parents. There are some blocks, and this is how it affects the child. Here, too, it is imperative to work with a spiritual reason.

Alexey: Thank you, Mid. I'm very glad to talk with you. I would like to meet you in person and hug you.

Irina: (MidgasKaus) Thank you for the interesting questions. It was very interesting for me to answer them. I would also like to meet.

Dear friends, indeed, Alexey is a very good visceral massage therapist, bioenergeticist and simply a bright, pure Angel on Earth. I attended a session with him. It really changes not only your physical body, but also your mood, and therefore your life.

Alexey: Thank you!

Irina: Dear friends, I thank you for watching this video. Thank you for being with us. See you again!

April 5, 2022

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Alexey Shuvalov – visceral massage therapist;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#432 Lymphatic system. Stagnation and cleansing. Lymph nodes. Clean lymph is the key to human health!

---

https://blog.cassiopeia.center/limfaticheskaya-sistema-zastoj-i-ochishchenie-limf

00:21 Introduction of participants.

Irina: Hello, dear friends. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Present with us is my curator and our entire Cassiopeia project, biologist, psychologist, specialist in alien civilizations MidgasKaus from the planet Esler. He studied the biology and psychology of earthlings. Today we have an interesting topic. Alexey is with us. Hi Aleksey!

Alexey: Hello! I work as a massage therapist for internal organs in the project. And I want to ask a number of questions that will be very interesting to people who are not associated with this specialty, or who know little about it. But this can be very useful in everyday life.

I really like the way Mead explains very complex and lengthy things in a detailed and clear way, so I will be very glad when he answers these questions.

Irina: (MidgasKaus) Thank you! Greetings! I am happy to help you understand yourself and understand the world around you.

Alexey: Thank you! I happened to attend one of Irina's evening lectures and realized that it was you who explained it. For me it's just perfection. You explained so clearly how information is read in the genetic apparatus, in every cell that synthesizes proteins and enzymes. This is a masterpiece, it's just chic. I realized that even a person who does not know these topics deeply is able to understand and see the principles and work of a rather complex and incomprehensible world for us, the microworld of cells.

Irina: Yes, indeed, the microcosm of each cell of the body serves as a link between the etheric body of the Soul that has come to incarnate and physical matter.

02:58 Lymph.

Alexey: Great! Mead, I want to ask you to explain in your own manner, clearly and clearly, to tell us what our lymphatic system is.

Because in our literature, in our medicine, this subject or this system is covered with quite a few incomprehensible islands.

How can you simply and clearly explain to any person who, one might say, does not even know what it is? The lymphatic system, its purpose, what features does it have?

Irina: Greetings, dear friends! Simply put, lymph can be called the second blood of the body. All people have blood. It is red in color due to the maintenance of a red pigment or coloring substance - hemoglobin. Lymph is a fluid similar to blood, but without hemoglobin. That's why it's transparent. It's like water (shows like mucus).

Lymph is also called intercellular fluid. The cells of the body do not fit tightly to each other, there are microcracks between them. This is necessary for the passage of capillaries between cells to supply them with oxygen and nutrients. And so the cells are in such a humid environment. This moisture is also called “lymph”. We usually call it intercellular fluid. There is intracellular fluid that is found in cells, and this is intercellular fluid.

05:17 Lymphatic system, its functions.

Irina: As you remember, the human body consists of 65-70% water. Lymph consists of 97-98% water, that is, it contains even more water than blood. Lymph has its own vessels, clusters of special organs called lymph nodes (or lymph nodes), in which blood elements, the so-called lymphocytes, accumulate. These are blood cells that are responsible for immunity. The purpose of lymph is to cleanse cells of toxins and turn on and off immune reactions.

An immune response is the body’s defense response to damaging factors. Lymphatic vessels permeate the entire human body. They begin first with small ones, somewhere between individual cells, then they branch and merge into larger ones. Lymphatic vessels run next to the blood vessels of arteries and veins. Their purpose is to collect lymph throughout the body, transfer it to the lymph nodes, from the lymph nodes it again enters the lymphatic vessels, but of a larger diameter (shows like a tree).

07:18 Lymph nodes in the human body.

Irina: The purpose of the lymph nodes is precisely to cleanse, filter the blood, sort substances and destroy pathogenic flora that got there from the organs. There are a lot of lymph nodes throughout the body. They are small and large. There are especially many lymph nodes around the so-called hollow organs, which communicate with the external environment. This is understandable, because microorganisms easily enter from the external environment. For example, there are many lymph nodes in the chest cavity around the lungs. There are a lot of lymph nodes around the intestines. And, moreover, they even lie between the intestinal loops. There are also a lot of lymph nodes on the neck, both back and front, like a circle. A lot in the nasal cavity and throat. There are clusters of them there. There are still many large lymph nodes in the place where the limbs enter the body. So that when a limb is injured, microorganisms that enter from the external environment do not immediately pass into the heart, into the blood and stop in these lymph nodes. Accordingly speaking, where the legs connect to the body.

Shows a diagram: first a man without clothes, and then he mentally began to twist him and, as it were, removed his skin. This is how I imagine images. Moreover, the blood vessels, as in the anatomical atlas, are blue and red tubes. He shows me the lymph nodes with white balls. They are located throughout the body. Now he shows his head. Inside the head, where the brain is, they are not there, they are not required, this function is performed by the cerebrospinal fluid - protective, immunological, supportive, and so on.

Thus, lymph serves as a link between the cells of the body and the blood.

Lymphatic vessels collect into larger vessels.

Shows: they go from above, where the neck is, and from below, where the esophagus is, and flow into the circulatory system at the level of the collarbone, into a vein. The lymphatic system connects to the circulatory system.

I have already spoken about the meaning. This is immune protection, cleansing of toxins, maintaining tissue turgor (tissue elasticity). Accordingly, without a healthy lymphatic system it is impossible to adjust and maintain the health of any organ. This includes immunity, absorption of nutrients, and cleansing of non-nutrients.

Alexey: It turns out that our circulatory system has branches into venous and arterial. And there is only one lymphatic one. It delivers all products from the cells to the venous system and others. Right?

Irina: Yes. And it also delivers cells, lymphocytes and antibodies that are produced in these lymphocytes.

13:07 Movement of lymph.

Alexey: Our blood is transfused with our hearts. What moves lymph?

Irina: Yes, dear friends, there is no lymphatic heart in humans that would pump like a heart. Lymph moves mainly due to gravity. Also in the lymphatic vessels there is also a kind of valve. Such an area that can narrow, contract and push. Also, the movement of lymph is facilitated by the movement of the body (shows how muscles, moving and contracting, compress the lymphatic vessels). Due to this, it begins to circulate better. For example, a person is lying down, it flows in one direction, he stands up - it flows in another. This is what we call “due to gravity.”

This is how lymph moves. This is also facilitated by changes in pressure in the circulatory system. That is, large lymphatic vessels flow into veins and thus communicate with the circulatory system. A change in pressure in them leads to a change in pressure in the lymphatics.

And, naturally, the speed of lymph movement also depends on the amount of fluid in the body, on the normal functioning of the lymph nodes, and on general metabolism. Because some hormones, for example, stress hormones, and some substances that come from outside, can cause the lymphatic system to leak when it is not in the vessels, but in the surrounding tissues, that is, it is not collected. And if

she doesn't gather well, it means there is low pressure, and she doesn't move around the body well.

Alexey: In general, the most important organ that moves lymph is our muscles.

Irina: Yes, these are muscles. Because without their contraction, a person who is in one position, even standing, sitting or lying, will in any case be slower.

Alexey: We are beginning to understand that physical exercise is beneficial for our body and for our immunity. This is the mechanism: when we move, when we tense our muscles, we improve the functioning of the lymphatic system as the main immune organ. Right?

Irina: Yes. There are movements that are best for the lymphatic system, speeding up its movement (shows how a person jumps).

Alexey: Is jumping rope best?

Irina: Yes, walking and jumping rope, when a person is in a vertical position and makes movements that, in addition to muscle contraction, give a jolt, a change in gravity. Just as a man jumped and seemed to fly upward, when he landed, what was below him, according to the law of inertia, rose upward.

Alexey: Does this help the lymph move?

Irina: Yes.

17:28 Do aliens have a lymphatic system?

Alexey: Okay. Midushka, do the Burkhadians, the Tumesoutians, you on Esler, or the reptilians have similar systems?

Irina: The Eslerites do not have such a system. We have a circulatory system, but no lymphatic system. In our country, these functions are performed by one system, that is, simply blood. We also breathe oxygen, like earthlings, but we do not have a similar structure. We work differently. We are also mammals, we also breathe oxygen, but all the functions of the lymphatic system are performed by the circulatory system.

As for the representatives of Burkhad and Tumesout, they have an analogue of the lymphatic system, but it is structured somewhat differently.

We talked about the lymphatic heart. In Tumesoutians, for example, due to their high growth, at the level of the upper half of the chest, almost above the heart of the circulatory system, there is a triangular organ (shows a sac, which is pointing downwards). It contracts and regulates the movement of lymphatic fluid. They call it “tissue fluid”. They have a slightly different structure of blood vessels.

For the representatives of the planet Burkhad, everything is also different. They have an analogue of such vessels. But they pass next to blood vessels and more often flow into them. They have more connection with the blood vessels.

Reptilian civilizations, if we take Selbet specifically, have intercellular fluid, but it collects directly in the blood vessels, without lymphatic vessels. This resembles our structure, they do not have pronounced lymphatic vessels, and therefore all functions are performed by the blood.

20:05 Maintaining lymph in normal condition. Fluid intake.

Alexey: Interesting, unique. How to keep our lymphatic system clean? What do we need to do? What foods can clog it?

Irina: Does littering cause intoxication?

Alexey: Yes.

Irina: Any substance that causes intoxication of the blood also causes intoxication of the lymph. It is the lymph that is most affected by large amounts of sodium chloride.

Alexey: Salt.

Irina: A large amount - this means for 50 kilograms of a person's weight, about 5 grams per day. Exceeding this amount will already have an effect, the lymph will become viscous.

Alexey: Thick.

Irina: Yes. Because it penetrates the lymphatic system and pushes out water from there.

Alexey: So, salt-free food or food without salt can improve the flow of lymph?

Irina: If you have signs of lymphatic congestion, then the first thing you should look at is how much salt you consume. The second is how much fluid you drink. And third is whether you have enough movement. At least walking, better, of course, running over rough terrain, so that there are shakes, higher and lower, when a person falls. At least for one and a half to two hours a day. I'm not even talking about special physical exercises. This is the required minimum for an adult.

If you consume approximately one gram of salt for every kilogram of body weight, that is, for 50 kilograms it would be 5 grams of salt, naturally, salt should be taken into account in all products. If, for example, you ate chips or sausages, into which, of course, salt is added, then the rest of the food should be without it. Or, if you ate salted fish or a pickled cucumber, you, accordingly, ate it with some product that does not contain salt, which you add at the time of preparation.

Alexey: That is, there should be unsalted foods.

Irina: Yes. Because it contributes to lymph pollution. Second: adequate fluid intake. In winter, this will be around 7-8 milliliters per kilogram of body weight. See how many kilograms you have. But there is still liquid that is in the food. So in any case, around 1.5-2 liters should be consumed by a person of average body weight. If he has more body weight, the fluid rate increases. Because the accumulation of some tissues, even if it is adipose tissue, needs fluid. If we do not give adipose tissue fluid, it begins to take it from the lymph, in which its content decreases, and therefore the filtration capacity of the lymph nodes, and, accordingly, immunity, and everything else.

The first sign of lack of fluid may not be thirst. Because the body quickly gets used to the lack of fluid. The first sign of fluid deficiency may be fatigue, drowsiness, and the desire to rest frequently during work. If you get tired from physical movements or from mental work very quickly, this may be the first sign of a lack of fluid. You don't have enough energy.

Water is a universal conductor of energy, including the etheric plane. In addition, it is a good solvent for the nutrients you consume through food. If you don’t consume enough of it, even a well-balanced diet in calories, vitamins and microelements, which consists of very high-quality products, will not give you this benefit without enough liquid. You won't get energy without water.

Alexey: Such small nuances that can greatly benefit your health.

Irina: I want to tell you that the prevention of various diseases is the basis of medicine both on Esler and in the Interstellar Union. We teach children how to properly handle their physical body at school. And for earthlings, I want to say that following these simple rules, which do not require any financial investments, but require a little of your time and care for your body, will allow you to save money on treatment in expensive clinics with numerous side effects.

Spend the time of your incarnation more effectively and use your body to realize the purpose of this incarnation.

Alexey: I would add for people whose thinking is based on materialism. By following this path, they will be able not only to save, but also to earn a little money.

Irina: I heard from contactees that there is a lot of private medicine on Earth. Very expensive medicine, treatment of various diseases or their symptoms is possible only for rich people. To avoid big problems, work not only with your consciousness - this is also an obligatory part, with your Spirit, but also with your body. If you simply work with your Spirit and do not work with your body, it will, of course, be better than if you work neither with the Spirit nor with the body. But in any case, this will restrain the energy potential of your Spirit, and therefore your spiritual development.

Your body is that precious vessel made of divine materials that was given to you for this incarnation. If you love him, protect him and take care of him, he will bring you maximum benefit.

28:38 The connection between the state of the body and the level of human vibrations.

Alexey: Mid, what herbs or products can be used, for example, vegetables or fruits?

Irina: I also wanted to say about salt. There is a substance that pollutes the lymph the most. This is monosodium glutamate. Such substances, when they enter the lymph, remain in it for a very long time. Then, when they get into the lymph nodes, they disrupt the purity of the lymph because they do not allow them to perform their functions. Simply put, lymphocytes begin to produce less antibodies, and the filtration capacity of lymph decreases. Therefore, I would recommend eliminating MSG entirely as much as possible. On products it is marked with code E651.

Alexey: Even Meade knows this.

Irina: Yes, I studied your supplements (the table shows) from your scientific sources through contactees, because I was interested in how

your food is produced, what is added to it, how it can affect the health of the physical body, and ultimately on vibrations . Because the deterioration of the health of the physical body causes irritation, despondency and sadness of the Spirit. And this already reduces spiritual vibration.

After all, you will be annoyed if something hurts? Will you be annoyed or sad if your physical body cannot move as actively as you want? And this irritation will already be non-acceptance of the body and will reduce your vibrations. To prevent this from happening, you need to practice prevention. It is much simpler, cheaper and safer than treating an existing disease.

31:21 Cleansing the lymphatic system.

Irina: Regarding cleansing. Cleansing of the lymphatic system normally occurs on its own, if all these conditions are met, through evolution, including the evolution that continues to occur in human bodies. It has not stopped, man adapts, adapts, evolves. It even adapts to those artificial additives in food that would have been poisonous to ancient man. Gradually, the body begins to produce new enzymes, but in different quantities, in order to neutralize them. But this body mechanism is far behind the capabilities of your chemical industry.

If there is a need to cleanse the lymphatic system. This can happen if you have low immunity, a tendency to edema, weakness, heaviness, if you slept for 7-8 hours and in the morning you feel that you would have slept the same amount - this indicates that you lack energy. This energy can be conducted from the Spiritual and physical worlds into the muscles and brain only thanks to the etheric body. And the conductor from the etheric body to the physical is just blood, plus lymph and the nervous system. There are three components.

In order for them all to work harmoniously, it may be necessary to improve the functioning of the lymphatic system. Without its healthy state, it will not be possible to heal any organ. If you have frequent colds, a tendency to edema, a tendency to accumulate fluid, if you have indigestion, a tendency to constipation, and so on, then this indicates that you need to pay attention to the lymphatic system.

As I already said, you must first follow three mandatory rules: movement, liquid, amount of salt. Wait 2-3 days in this mode. If the situation does not improve or improves slightly, you can use special herbal preparations. For example, to cleanse the lymphatic system of all types of toxins: for an adult, you need to take one tablespoon of tenacious bedstraw. If you don't find a tenacious one, yellow bedstraw replaces it. And two tablespoons of red clover. Dry. All this must be put in a clean thermos and pour 600 milliliters of hot water 2-3 minutes after boiling, approximately 95 degrees, and leave in the thermos for 3 hours. There is no need to strain afterwards. You can strain it before using so that no blade of grass gets in there. Depending on body weight, take this infusion 50-70 milliliters 3-4 times a day. This has individual differences. Because, for example, women need a little more, men - a little less, children under 14 years old - half the dose. Can be used for 14 days. This decoction stimulates the functioning of the lymph nodes at the cellular level, they begin to cleanse themselves of toxins.

You can also use, especially for children, diluted licorice root syrup and add it to tea. If this is an adult, 2-3 tablespoons will be enough for him. It can be added to tea instead of sugar. It also helps cleanse the lymphatic system.

If, despite this, you still have a problem with the lymphatic system, you need to be diagnosed and checked for chronic infectious processes. For example, stagnation of lymph can cause chronic tonsillitis, chronic periodontitis (teeth), chronic sinusitis. That is, the constant presence of an infectious focus in any organ that you don't even notice. It may be asymptomatic. It's just that there are a certain number of microbes there, they constantly enter the lymphatic system. Sometimes the body does not react to this, but sometimes it reacts quite strongly to such things. Especially if the type of microbe is quite aggressive.

If, despite all these measures, it was not possible to completely eliminate the symptoms of lymphatic stagnation, then we are checked for the presence of microorganisms, helminths and parasites in the body. They can also cause a hyperreaction of the immune system, respectively, a reaction of the lymphatic system in the form of its stagnation. That is, the lymph nodes begin to become not a help in promoting lymph, but an obstacle.

They begin to work with these microbes for too long, leaving new portions of lymph in themselves and not letting it through. Of course, they do this for security reasons, but the result is obvious. And in this case, liquid, lack of salt and movement will not completely relieve these symptoms. Although they will still make them easier.

If lymphadenitis is observed, that is, inflammation of the lymph nodes and tracts, this already indicates an infection in the blood. That is, some microbe has begun to multiply in the blood, but it is mild, and the lymph nodes are trying to hold it back. To cleanse the lymph nodes of microorganisms and their breakdown products, you can use an infusion of echinacea in the area of 1 tablespoon per 250 milliliters of boiling water, like tea.

41:07 Nutrition beneficial for lymph.

Irina: As for healthy nutrition for the lymphatic system, remember one rule. All vegetables and fruits, herbs that are green to you, contain chlorophyll, it is an essential component for cellular respiration, as well as for maintaining a healthy lymphatic system.

Eating cabbage, zucchini, and seaweed promotes the health of the lymphatic system. The lymphatic system especially loves the use of spices such as ginger, turmeric, black pepper.

Perhaps you like salty foods. Some people like the taste because they provoke appetite and make food tastier. By the way, a love of salt may be a sign of insufficient production of hydrochloric acid in the stomach. Then it is necessary to check the pancreas. Perhaps it does not sufficiently stimulate the production of hydrochloric acid in the stomach. And also, naturally, dissolve energy blocks that may be in the area of the 3rd and 4th chakras. The love for salty foods may be because the body is trying to compensate for the lack of sodium and chlorine in this way.

Also, a love of salty food can be a sign of helminth infection, when the body tries, by reducing the sensitivity of the tongue to salty food, to provoke eating it to destroy helminths. If you feel that food with a normal salt content for your weight seems tasteless and bland to you,

there is no need to force your body to eat it, because you need to help it, and not break the mechanism. This means that it is necessary to carry out antiparasitic cleaning with some broad-spectrum anthelmintic.

Naturally, pay attention to the stomach, the pancreas, talk to these organs (they love to talk to organs). And also a love of salty foods may already be a sign of low immunity. Movement, water procedures, massage, and physical movements are useful. Dousing is also useful when there is a change of hot and cold water.

Alexey: Contrast.

Irina: Yes. This also helps to increase immunity, and better blood flow and lymph flow, that is, the leaching of toxic substances and increased immunity. But this needs to be done carefully if you are not used to having a small temperature range. The main thing is gradualism and consistency. If you go out once a month and douse yourself with cold water, and then sit warm all the time, it will not give you anything. Apart from stress, this will not give you any health. This requires caution, gradualism and consistency. Only then can you achieve the effects that are claimed during hardening. At the same time, this will not give anything except stress and harm to the body.

And, naturally, why is it customary on Earth to do physical exercises in the morning, why is it even called exercise? This helps to activate the muscles, blood and lymphatic vessels that were relaxed when your body was resting, in a state of sleep. You were absent, come to it, it does not wake up immediately, not all its cells.

Special exercises, even if they are short-term, several exercises, but for all muscle groups, head, neck, and so on (massage shows). You can do it from top to bottom or vice versa, but for all muscle groups. This will increase the amount of energy that came with you from the Spiritual world, its flow through the etheric body to the physical. This means that the condition of all body systems will be significantly improved and your energy level will increase throughout the day. Some simple exercises. But if you wake up and go straight to breakfast without exercising, you'll reduce your nutrient absorption by about 30%. All this will simply go where you send natural needs.

I think, of course, they tell you about this at school. At least that's what they tell us.

Alexey: We also need such subjects for school.

Irina: We have biology. But they don't talk about it there, there are no such details. They say you need to drink water and do exercise.

Alexey: Unfortunately, for knowledge systems as accessible as you explain, we still have to look for them on our planet.

Irina: Then in families, explain this to children and show them by your own example. For example, when he woke up, explain how his stomach wants to eat and his body wants to move. And when it becomes a habit, the child or adult will do it himself. And he will feel discomfort when he does not do this.

There is hunger not only for food, there is hunger for movement. Because movement is the same physical need. Of course, without it a person will not die, as, for example, without food, but it will significantly reduce the quality of life and create an obstacle for himself to fulfill, including spiritual tasks.

Caring for the spiritual and material must be combined in a person's life, because he is both a spiritual and a material being.

49:34 Why do women need more fluids?

Alexey: Mid, we were just talking about lymph. Tell me, why do women need more fluid?

Irina: They have a slightly different body structure and a different metabolism. Therefore, they need more of these herbs that you spoke about due to their slightly different blood composition and their hormones. The substances contained in these herbs are needed in higher dosages for women. They have a slightly different ratio of

lymphoid tissue, fat and muscle, it is somewhat larger, and the lymph has a slightly different composition. Therefore, a little more is needed not in the ratio of these herbs, but in the infusion, the liquid that will be obtained. And the ratio should be the same.

50:46 Greens and seasonings in the human diet. Amaranth oil.

Irina: If you feel like you like salty foods, perhaps this is also a sign that you lack any vitamins and minerals. Your body tells you, but without realizing it, you simply increase the amount of salt. And to prevent this from happening, take your daily salt allowance depending on your weight, and add about the same amount of turmeric and ginger to it. You can also consume coriander, basil and other small dried herbs.

Of course, it will be healthier to consume basil, coriander, and parsley fresh. Even in winter, you can grow them yourself on a windowsill in a box; they are quite easy to care for. If you take care of this in the fall, even in an apartment building you will have the opportunity to eat these greens, not treated with various pesticides, as can be the case in those stores where they are brought from special farms that use fertilizers that you do not know by composition, and how they will affect you.

Greens, unlike vegetables and fruits, enter the body fresh. It is undesirable to boil it, just when you cook something, add it to something boiling, this will not only destroy the vitamins, but it will release the vital force that is contained in these cells. This is also an important component so that the substances contained in these plants: chlorophyll, various complexes, phytoncides, and so on, can be properly absorbed by your system.

Plants also have their own enzymes, they are called glycosides, which also enter your body and are absorbed by it depending on the vital energy of the leaves themselves. What you call greens is designed for this purpose, so that you add it to ready-made food. And to do this, you must be sure that it is absolutely pure and can be consumed.

This is merely a recommendation. But I also want to say that replacing,

for example, sunflower, olive and any other oil that you use for salads and ready-made cereal dishes, if you introduce a small amount of amaranth oil, will solve many problems with your lymphatic and circulatory systems. systems. Amaranth is a grain that was considered sacred by the ancient Incas.

55:18 Psychosomatics and lymph.

Alexey: What psycho-emotional states can reduce lymph activity?

Irina: Sadness, sorrow, fear, resentment, that is, provoking the release of stress hormones. They cause spasm of small vessels, which means that lymph flow is also disrupted.

Alexey: I see. Thank you, Mid. We need to learn to answer the way you answer. It is very accessible, it simply and immediately shows the interconnection of different areas of our existence. And I am sure that this will help us maintain health and develop spiritually, among other things. Thank you

56:16 Human filtration organs.

Irina: Thank you for the interesting questions. Dear friends, there is no uniquely harmful or uniquely healthy food. It's all about the condition of your body, the amount of this food and the cleanliness of your filters, which can process possibly harmful substances that have reached you and remove them.

Keep your filtration organs: liver, kidneys, skin, lungs, intestines in a healthy state. For example, for the liver, this will be facilitated by using painkillers as rarely as possible, if necessary, possibly in smaller doses. That is, the less drug load on the liver, the more it performs its functions.

The same applies to alcohol. This substance should be ingested, if you choose to use it, in small quantities and fairly rarely. Medicine, alcohol, stress affect the liver in a negative way.

The intestinal microflora is responsible for the condition of the intestines. By supporting the intestinal microflora with special preparations, so-called probiotics, you contribute to the cleanliness of this organ. And the difficulties of adaptation in it of various pathological flora, including helminths, microbes, protozoa and fungi. And the cleanliness of the intestinal canal contributes to the purity of the blood.

The kidneys are, one might say, the most patient organ. Kidney cells can be damaged by various substances. For example, tobacco smoke contains more than 40 substances that directly affect nephrocytes, which inhibit their metabolism and cause their death. The same fluid intake also contributes to kidney health.

Naturally, purity of sexual relations. Indeed, the health of the genitourinary system, including the kidneys as filtration organs, is influenced by how purely morally and morally you behave in relationships with sexual partners. If you say or think that there is no connection here, there is a very direct one. Any new partner is a potential carrier of microorganisms that can destroy your kidneys.

Alexey, perhaps I am saying well-known things, but some people should hear them.

Alexey: Yes, sometimes we need to hear it a thousand times to accept it.

Irina: Skin is also a filtration organ. Her condition is more influenced by her psycho-emotional state. Skin is a mirror of the body that shows how you relate to the world around you.

As for the health of the lymphatic system, there are “three pillars”: fluid intake, normal salt content, a completely salt-free diet also depresses the body, and sufficient physical movement.

These three simple rules help prevent many serious diseases, which will then need to be treated with serious medications.

Dear friends, I thank you for being with us. Thank you, MidgasKaus!

Thank you, Alexey! I hope you found it interesting and useful. See you again!

Alexey: Thank you, see you again!

#468 How should a contactee with extraterrestrial civilizations respond to criticism? CASSIOPEIA Irina Podzorova.

---

https://blog.cassiopeia.center/kak-kontakteru-c-vnezemnymi-civilizaciyami-reagiro
https://www.youtube.com/watch?v=2wGn72RYKcQ

00:20 Goals of esotericists on Earth.

Question: The purpose of ufological and esoteric communities on planet Earth?

Irina: This is educating the population. This is a message to the population about facts such as contacts with other life forms. The goal of esoteric communities is spiritual development. This is the development in oneself (if we are talking about the global goal) of Unconditional Love. This is the goal of any spiritual teaching.

As for contactees, their role in society is to convey information from their spiritual curators, from their spiritual mentors, from those beings with whom they contact - to society in order to change the direction of development of this society.

Which way? Towards greater awareness, perception of the space where you live, and yourself in it. This is knowledge of the world, spiritual development and, naturally, the development of the entire society. Practically, indeed, it coincides.

01:43 Signs and features of contacting.

Question: How do you determine that a person is a real contactee? What signs can people use to figure this out?

Irina: If he is a real contactee, I can talk with his curators (that's what we call them), that is, with the beings with whom he is in contact. I can talk to them, and I usually determine this during a communication session with the Higher Self, that is, with the disembodied part of the Spirit. There we ask the person's Higher Self if he is a contactee. The Higher Self of a person is 70% of his Spirit, which remained disembodied in the Spiritual world. That is why it is called the "Higher Self": it has more energy, more information, it knows exactly the answer to this question.

But there is one nuance here. Contacting someone from another world is a very subtle, complex topic. So subtle and complex that the person who enters into it may not even suspect what he will encounter. In what sense? For example, if a person thinks that he is a contactee, although he himself is not one. He will invent messages from supposedly his curators, he will fantasize them for the sake of some of his own goals. There are people who even themselves do not believe

in the existence of Spirits, aliens, but, nevertheless, they pretend to be in contact with something.

But, dear friends, I want to tell you that regardless of his faith, these worlds exist. The fact is that for the Spiritual world, for subtle civilizations and for alien civilizations, this pretense is a form of consent to contact. Do you understand? Even if a person does not believe in this, especially if he is not fantasizing to himself, but said it in front of people, this is a form of consent to contact.

There are a lot of life forms around us that really want to contact people because of special energy, special purposes for influencing a person or society. Every creature wants to convey their ideas. Many people want to communicate with us. Therefore, the one who came up with the idea that he is a contactee very often (almost always) enters a state of real contact.

But with whom? Since he came up with this and agreed to contact, then those entities to which he most corresponds in vibration, in his internal qualities of the Soul, come into contact.

04:30 Contactee's reaction to misunderstanding.

Question: How should a contactee with extraterrestrial civilizations respond to criticism?

Irina: It is very important to look at the situation and yourself with humor. Humor is not evil. This is a view from the outside, which allows you to see yourself through the eyes of another, let's say so.

We look different in other people's eyes than we do in our own. It is important to treat this with understanding. Not all people are ready to accept this information. Of course, you can ask or say: "If he is not ready, then why is he listening, what is he watching then? Let him go and watch some TV series or cartoons! And he looks at me - the great contactee! – and there's something else he doesn't like! And he's laughing at me too! No one is forcing him to watch."

Yes, dear friends, you are right. Nobody forces you. But there is one big “but”. If he watches it and laughs at it, but doesn’t leave. If he said: “Ha ha ha, what nonsense!” And turned it off. That's it - he doesn't need it, he's not interested in this topic. And there is: he continues to watch, continues to laugh, even writes some offensive comments or something else. But he still continues to watch. Why does he keep watching? We ask ourselves a simple question: “What motivates him to look further if it is unpleasant for him?”

The answer is very simple. In the depths of his Soul, in that same “Higher Self,” he has an impulse. He has an impulse to look at this information, he has an internal, deep request (possibly from a past life) to study this information or to awaken his own contact. But the attitudes in his mind or “in the mental body” that this does not happen, that everyone who talks about this are a little crazy – these attitudes prevent him from seeing this Light. And therefore, resisting the Light, he speaks aggressively. He begins to aggressively ridicule and even insult this person, because this is how his attitude resists.

And if he also has negative blocks associated with previous experience of turning to some esotericists, which ended for him, for example, in deception or disappointment with his own (it happens that a person is disappointed even without deception - he didn’t like something). So, this will also cause his past pain from the existing block. Will cause the release of this energy. Because a person will project his past experience, his past esotericists whom he met, onto the one he listens to.

It is necessary to treat this with understanding. Don't be rude back to him. You can answer with humor, with the same. But don’t be rude, don’t label him, don’t drive him away, treat him with understanding. And at the same time, do not shame him: “Shame on you!” Or something else. If he behaves like this, it means he is no longer ashamed. You still won't re-educate him. You can simply joke in response: “Yes, these are my contacts.” This will reduce his aggression and, on the contrary, will arouse respect for you and interest in your information.

08:10 Chorus of the Hymn “Cassiopeia”.

Here is my hand and I am next to you,

Star family Cassiopeia,

Together we will explore the worlds and constellations,

We are one Cassiopeia family!

Here is my hand, Cassiopeia!

The energetic mood of the planets BURHAD and ESLER to increase vibrations

https://blog.cassiopeia.center/ehnergeticheskij-nastroj-planet-burhad-i-ehsler-dl

Representatives of the planet BURKHAD (one of our creators) and ESLER (one of Irina's direct curators) welcome our readers and give a conscious attitude that will help you raise your vibrations to the level possible for you now.

Don't try to get maximum energy now - your energy structure may not be ready for large flows, it takes time, your desire and absolute Faith. These moods can be read along with prayers that your Faith allows. All religions were brought to earth by a group of our creators and curators of planet Earth. The mood to increase vibrations does not contradict your religion (you will understand this yourself as you read).

Each person, raising his vibrations at all energy levels, then has the opportunity to interact with civilization of the level that suits him in vibration. He can simply read them, harmonize and fill his auric structures and energy-information fields. They can get rid of destructive and dark (low vibration) energies nearby (larvae , demons, destructive plasmoid civilizations and much more)

When interacting with extraterrestrial civilizations, you must clearly understand that it is impossible to set everyone up for contact and communication with one civilization. Everyone will have their own special contact at the level of thought images, thought packages - telepathic, astral, mental and others... Everyone has their own experience of incarnation, life experience and curators who guide you and help you grow and develop. Your mentors (curators) can be from a spiritual level (they are given during incarnation), from a subtle material level (plasmoid civilizations), from an anthropomorphic, reptilian, insectoid, philinoid or from other civilizations with which you have similar vibrations (most likely, it's there where you incarnated the most times, but not a fact).

You can always read the moods, but for a better increase in vibrations, you can do this in the morning and evening. And many people will want to harmonize it into your life before a serious event. So, if you are ready to move to a new level of perception, raise your vibrations so much that you are always present in the flow of LOVE energy , then we invite you to join the LIGHT team of the true energy of LOVE

of our creators!

ESLER attitude

I am the universe, the universe is I. The power of the universe is my power, and my Spirit is part of the flow of Existence of the Creator of all worlds. His power will be directed to the benefit of all beings living in all worlds and planes of existence. Reality in truth will remain, and lies in the illusion of perception will disappear forever. (3 times)

BURKHADSKY setup

In the name of Almighty God, in the name of the Energy of Light, in the name of the Power of Love, which creates all the worlds and plans of the universe, I (Name) ask the bright spirits-consultants and Arhats of the Earth of the Solar System and Galaxy to help me in my spiritual development, in strengthening my physical body and in material support, which I promise to use for the benefit of myself and my loved ones.

Help me to be in good and harmonious relationships with the visible and invisible entities of planet Earth, help me to love everyone and accept love correctly.

I turn to my Higher Essence and ask it to raise the vibrations of all my physical, energetic and spiritual structures to the level that is allowed to me at this stage of my spiritual development.

I ask my Higher Essence to raise my vibrations to a level that will benefit the development of my consciousness and my body, for the benefit of the development of all spiritual beings that surround me, embodied and non-incarnate, for the benefit of all Space and for the benefit of the evolution of planet Earth. I thank my Higher Essence and all the Light Higher Powers for their help.

I ask that all my physical, energetic and spiritual structures be healed and filled with Light.

With an open Heart, I accept the help provided and thank all the Light Intelligent Forces of the universe for the permission given to my Higher Essence to help me, and I thank all the entities following the path of spiritual evolution for the benefit of all worlds and plans of the Universe.

I give permission for my healing with the energies of Light and Love and for raising my vibrations to the extent that it is harmonious for me.

Forces of Light and Love, be with me always, in time and outside of time.

Thank you for your help and love! I accept the changes happening to me and consciously direct the Light of God coming through me into the material world.

Let it be so (or) It is so and Am (selected by perception).

Space cleansing practice

https://blog.cassiopeia.center/rw24jF2o5tl

When you get up in the morning and open your eyes, go to the window and look at the sky where the sun is. Realize how wonderful it is to wake up to a new day. Realize that there are many people who didn't see it. You stayed here to continue learning your lessons and tasks in this world. Realize that you are responsible for the space

where you live. This does not mean that you monitor its contamination. The answer is that the way you create it is the way you will live. You are responsible to yourself, to your children and descendants.

So, as soon as you think about it in the morning, imagine that a ball of sunlight, the same color as the Sun, is in your chest. Tell:

“I am the Light of Divine Love! I send the rays of my Love to the entire space where I am. I cleanse this space of all low vibrational thoughts, states, energies and destructive influences. I send the Light of my Divine Love to all low-vibration Spirits who are in this space, and I wish them to know God and realize themselves as His children.”

You can speak in a whisper, you can talk to yourself, but with full awareness, with a full desire for this space to truly be cleared, with a full understanding that this is a mission, with faith in what you are doing. When you believe, you put energy into it. If ten conscious people out of a hundred do this in your city or district, then the situation will very quickly harmonize. This has already been tested on many planets.

It will look like a shield in the Astral or like a dome. It will consist of bright thoughts and feelings of your own people. Those plasmoids that live in your area and are high vibrational will feel your energies located in space. They will be happy to support them with their energies, from which the shield will be further strengthened by subtle energies.

Low vibration plasmoids and low vibration non-embodied Spirits, the so-called demons, will feel uncomfortable in this space filled with your Love as high vibration energy, will move to another place and will not be able to influence those people who live next to you.

Breaking the energetic sexual connection between partners

https://blog.cassiopeia.center/Fc2U-VmTcfh

Many people, breaking up and realizing that they are not suitable for each other, remain dependent on sexual intimacy. This dependence on the exchange and replenishment of each other's energies, which they received from such a connection, can be very strong.

Due to the fact that many people live mainly on the energies of the first three chakras, separation becomes a huge problem - since the energy body stops receiving this additional energy without pumping its own.

Sexual energy is one of those energies that can create new life, and therefore it is a very powerful tool. An energetic sexual connection is formed between partners even after a single intercourse. And the more intense the exchange (the pleasure you experienced), the longer this connection works in the human energy field. It's not for nothing that they say: "Where thought goes, energy comes."

By engaging in "pleasures" with different partners, you scatter yourself energetically, and you constantly have to spend your life force on maintaining these connections - even if they no longer exist on the physical level. The energetic connection can last up to 7 years, because in 7 years a complete cycle of cell renewal of the entire body occurs...

Or maybe it's just time to realize that you need to stop leading a dissolute lifestyle, which personally takes away a huge amount of all your vital energy? That energy that you could direct in a completely different direction, but you don't know how to do it correctly at the energy level?!

In this regard, MidGaskaus from the planet Esler has selected a practice for those who have a well-developed imagination (mental

images) and a desire to stop these unnecessary exchanges and outflows.

To achieve maximum effect, before performing this exercise, it is recommended to refrain from consciously achieving orgasm in any way familiar to you for at least 7 days - so that sexual energy sufficiently charges your astral body with its vibration. Then you will clearly feel everything while performing this technique and will do everything correctly, which is why the energy connection between partners is guaranteed to be terminated.

It is recommended to perform this technique separately for each sexual partner with whom you were intimate and remember this, even if it was only once and a long time ago.

If this connection was in the astral plane, without the participation of the physical body, then there is no need to perform this exercise, no matter how well you remember what happened.

Before starting work, make a list of all the partners with whom you remember connections, so as not to accidentally forget anyone. After breaking energy ties with one of your partners, cross it off the list and move on to the next one.

Start performing this technique with the partner with whom you remember sexual intercourse best, and then move on to the rest.

A good memory of sexual intercourse indicates a strong energetic connection between partners, through which emotional energy is exchanged between them even at a great distance.

Here is the exercise itself - as conveyed by MidGaskaus:

You need to be alone in a room, in darkness and silence. If you want to use certain sounds that will set you up for relaxation and concentration of consciousness, you can use them. Make sure that the sounds of the outside world and the messages of other people do not distract you for an hour and a half.

Sit on a chair with your spine completely straight. Close your eyes and recall sexual contact with the partner with whom you want to break

energetic ties. Imagine yourself again in that situation and examine your energy field. You will see the energetic connection between you and him in the form of a cord, rope, ray or any other image close to you. This cord will connect you at the level of certain energy centers, which depends on your feelings and thoughts towards each other.

When you see with your inner vision the energetic connection between you, take a slow breath through your nose, turning your head to the left and imagining how your energy returns to you in the form of golden light, entering your body through a point that is two centimeters below your navel. Then slowly exhale air through your slightly open mouth, while simultaneously turning your head to the right and imagining how the energy of this person in the form of light of any color that you intuitively feel leaves your body and returns to him/her.

Then hold your breath a little, shaking your head slightly from side to side and imagining how the energetic connection between you becomes thinner and more imperceptible. Repeat this cycle again and again until you feel that the connection has disappeared. This usually takes about an hour, but this period is individual and very much depends on your personal vibrations, the type of energy structures and the strength of feelings between you.

After the energetic connection is broken, slowly and in a chant say seven times: TOHI MOHI MOHI TOHI ANTAR KEYSA.

Then get up from the chair, without opening your eyes, spread your legs a little, raise your arms up, pointing your open palms towards the ceiling, throw your head back, imagine that you are looking at the Sun and also slowly and in a chant say 16 times: OM RAVAYE NAMAHA.

Then take a shower and you can go about your normal activities.

It is most effective to perform this exercise on the waning Moon, if possible.

The result of this practice will be noticeable very quickly, because you will stop sharing your high vibrational energy with everyone with whom you were close, and you will no longer be influenced by their negative emotions and thoughts, which may now be hindering your

spiritual development.

Later I will tell you about an exercise that allows you to quickly transfer sexual energy to higher energy centers, which will reduce sexual arousal and sharply intensify their work.

And I want to remind you that the exchange of energies with one sexual partner for whom you have mutual feelings greatly increases the growth and development of all energies of the couple. This will allow you to give birth to a new, full-fledged physical life that will attract a highly vibrational spirit.

A flow of true Love to you, which will be aimed at achieving any life goals and desires.

MidGaskous, planet Esler

Digital codes from Kalachakra, representative of the "Antiverse"

https://blog.cassiopeia.center/zrKXTOzv-yC

Recently, a representative of a parallel universe came into astral contact with me. In his world there are also planets and stars, but the matter from which all this consists is manifested from energies that have qualities opposite to those that are characteristic of energies, the dense phase of existence of which is the substances that make up all the objects of our universe.

According to the concepts of modern science, matter that emits the opposite energy charge that we are accustomed to is called antimatter.

The anti-universe, inhabited by intelligent beings, is very close to us, it is several kilohertz of fluctuations above the spatial energies that

hold the space-time familiar to us in the flow of the Existence of the Divine Mind.

My guest called himself Kalachakra and his world Shambhala. He said that his planet is very similar to Earth, but in terms of the frequency of vibrations and the purity of energies manifested in its space, it is the complete opposite of our world.

There are no wars, crimes and injustice. Even small children there have telepathy, so there are no lies. There, the Divine Light is diffused in the astral atmosphere, like the light of the sun in the physical air, and is just as obvious to everyone, so there is no resentment, envy or suspicion there.

We will incarnate in that world only when we have completed the lessons in our universe, in the entirety of its dense and subtle material worlds.

Kalachakra brought from his universe the knowledge of numbers as special energy waves in space. He assures that any energy process in the material universe can be written down by a series of numbers - the numerical code of the energy process.

By reproducing this code on paper or out loud. A person can influence the amount of energy in a particular energy process, and the amount of energy in it.

He gave me several examples:

24 42 48 60 60 06 - a numerical code that increases material well-being by increasing energy in the flow of personal connections with financial egregors of all types.

Write in yellow on a blank sheet of paper (without lines or cells), keeping spaces, and put it among the largest money, but do not give it to other people.

Read before an important transaction, agreement, deposit, loan, major purchase, etc. Say the numbers out loud, one at a time, leave spaces with a two- to three-second pause, and separate the new cycle with a longer pause of five to six seconds. One reading per day is enough.

303 823 243 636 - increases the percentage of energy in the process of synthesis of new substances in cells and in the process of removing toxins from cells. Increases metabolic rate.

Write in red on a blank sheet of paper, observing the spaces, and place a glass of water on this sheet for 20 minutes to structure the water molecules according to the numerical code. Drink water as needed.

8888 0000 8888 - to increase the flow of conscious energy aimed at the harmony of all energy centers, and at realizing the reality of existence in conjunction with the energy of God in oneself (the Higher Self, Superconsciousness).

Write in purple on a blank piece of rectangular paper. It is recommended to read 3 times three times a day with an interval of 8 hours.

97 88 22 76 11 00 - to increase the flow of energy passing from various types of food products into the human body and increase the rate of its conversion into vital force. Increases the amount of energy in the human immune system and the percentage of its transfer into the human etheric field.

Write in green on a blank sheet of paper and place water on it, as in the previous case. Drink after meals. You can also say the code before eating, observing the spaces.

33 40 69 54 56 33 is the numeric code of the heart, which configures its cells to work at the frequency that they had at birth.

40 25 01 04 80 88 - increases the amount of energy in plant seeds, aimed at growth and development.

0908 1212 0077 - increases the amount of energy in adult plants, aimed at the synthesis of carbohydrates and vitamins from water, minerals and sunlight. Increases the growth rate of green mass and fruit weight. Strengthens the plant's protection from adverse factors.

7324 0028 8260 - enhances the manifestation of the Mind of the Spirit through brain tissue. It enhances memory, the amount of information

remembered, reduces the time it takes to search for what you need in memory and accelerates thinking processes due to the fact that the flow of electrochemical reactions of neurons approaches the speed of the flow of consciousness itself in the Spirit.

For best effect, repeat 12 times. Keep gaps with a three-second pause, and separate the new cycle with a longer pause of six seconds. Speak no more than once a day, it is recommended in the morning.

You can write it down using light shades of colors (not dark tones) on a long white strip of paper. You can carry this code with you so that it is in your field.

These codes are used to enhance or reduce the energy process. To control the speed and intensity of energy processes in any material body or action.

It is necessary to use codes in a state of consciousness when it has no distortions. When you pronounce the code, the energy process intensifies. If there is negativity in the mind, then the code will work through distortion.

Codes need to be pronounced when a person's perception is completely harmonious, for example in the morning. It is recommended to do this after practicing connecting with the inner light (with your Higher Self).

Any energy process can be written in the form of a digital series. If you pronounce the numbers in the sequence that I gave with those spaces, you will activate this process. At the same time, direct thought forms to the light so that, along with strengthening the energy of the process, you do not introduce destruction. Kalachakra, February 2022

Kalachakra also added that each embodied spirit has individual numerical codes of internal spiritual energy processes, using which it is possible to significantly enhance the positive qualities of the individual and successfully combat negative manifestations.

This is possible by increasing the amount of energy in positive psychological processes and reducing it in negative ones.

He also asked me to say hello to all the inhabitants of our world in general and the readers of the group in particular. His desire and goal is for us to feel the Light of Love shining everywhere, which manifests itself in various spiritual aspects of reality and in different material forms, but essentially remains the same Light, dissolving in itself all those who have realized the truth.

02/22/2022 - what is best to do on this date

https://blog.cassiopeia.center/Lj1xRY0OUCo

This date has two numbers repeated. Each number is an energy wave, it is not just a recording on paper and not just a sound in the air. The numbers “2” and “0” indicate the “energetic value of contact with the Absolute.”

“2” - means connection, contact, association with someone.

“0” means the Absolute, the Absolute Mind, the Absolute Light, the Source of everything, infinity, the endless Absolute. This is a symbol of His energy.

On this day you can read the code:

8888 0000 8888 - to increase the flow of conscious energy aimed at the harmony of all energy centers, and at realizing the reality of existence in conjunction with the energy of God in oneself (the Higher Self, Superconsciousness).

Write in purple on a blank piece of rectangular paper. It is recommended to read 3 times three times a day with an interval of 8 hours. Keep gaps with a three-second pause, and separate the new

cycle with a longer pause of six seconds.

"8" - indicates energy metabolism.

On this date, each person will activate his spiritual channel for communication with his part of the Absolute (Higher Self).

Practice from Ashtar Sheran of filling the Earth with Light

https://blog.cassiopeia.center/Oij8hZ6nV41

I ask you to close your eyes, relax and focus on your heart. Concentrate your attention on the center of your chest. When you do this, you will first energetically and then physically feel your heartbeat.

Energetically, this means that you will feel it intuitively. Concentrate on this feeling. It will intensify.

What is now contracting rhythmically within you is your Spiritual Heart, which sends energy to your physical body and all your chakras in the energy body.

Imagine that there is Light in your chest. Whoever finds it more convenient to imagine the Sun, let him imagine the Sun. Whoever feels comfortable imagining fire, let him imagine fire. It depends on which image is closer to you. The main thing is that it is an image of Light.

Now you concentrate on it and say to yourself, mentally:

“I am the creative Light.

I am the creative Light.

I am the loving Light.

I am the Light of the absolute energy of Divine Love.”

Now, right in front of you, imagine the Earth, as it is closer to you. Either in the shape of a globe, or like in the movie. Imagine a blue ball with continents, oceans, surrounded by clouds.

Imagine that you are nearby and that it is the size of a football. Mentally, without physically straining, take this ball into your astral hands. This is an image of the Earth. Now, as you exhale, direct the Light from your heart through your hands into this ball and simultaneously say to yourself:

“I send my Light of love to all the people of the Earth, to all the plasmoid civilizations of the Earth. I fill the lithosphere, hydrosphere, atmosphere, biosphere and noosphere with the Light of love and healing. All spheres of the Earth become spheres of the Divine Mind. I ask Heavenly Father to cleanse all the shells of the Earth from all energies incompatible with the Light of his eternal Love.”

While you were saying this, you continued to fill the Earth with Light. Concentrate on this feeling for a few seconds. Great!

Thank your Higher Self:

“I thank my Higher Self for helping me harmonize the energy of the Earth.”

Now you feel the backflow because the Earth feels it. All people feel on a spiritual level, all plasmoid civilizations and residents of those shells that we have listed. Breathe this backflow into yourself.

When you inhale with the intention of receiving energy, it does not

dissipate. Tell:

“Thank you and I accept. Love and blessings. I promise to use this energy to develop unconditional love.”

Count inside yourself from one to five, on the count of “five” - you will return to your normal state of consciousness and completely connect with your body.

Open your eyes. You have done this practice. You sent Light to the Earth.

Bedtime Words to Heavenly Father

https://blog.cassiopeia.center/CUYlw2bzcVA

I thank you, my Heavenly Father, for the life experience I received today and for supporting my life force with the Power of His Love. I ask you to cleanse me of everything that prevents me from consciously living in You and feeling You and my Mentors.

Open for me a free path to the spiritual world this night, so that my body gains strength to cooperate with You, if You decide to give me the opportunity to see the sunlight tomorrow, as a faint reflection of Your shining Face.

I send the Light of my love to all living beings in the universe and wish them to consciously accept it and keep it within themselves.

Practical recommendations for merging with the Higher Self

https://blog.cassiopeia.center/GvM3g6sqM1v

In the modern information space, it is easy to get lost in the numerous practices to raise vibrations, open the heart and expand perception. Current speeds require universal methods to restore internal balance and harmonious development.

Where to go after the next round of teachers, gurus and spiritual schools?

The hackneyed “All the answers are inside you” comes to mind. The practice of connecting with the Higher Self is a connection with your subconscious, direct access to knowledge, conscious use of intuition as a tool, the ability to understand your purpose and current tasks without outside help.

Having mastered contact with the Higher Self, you will open yourself to access to your unlimited resource and the opportunity to unlock your potential. In this article we will look at a couple of options for connecting with your Higher aspect.

What is the Higher Self and how does contact with it occur?

Each of us is an immortal Intelligent Spirit, a part of the God in whom he believes and whom he calls by different names. The spirit is not completely embodied in a dense material body.

The Higher Self is the disembodied part of the Spirit that remains in

the spiritual world. This is our Higher Essence, which directly receives the flow of energy from the Creator.

The frequencies of vibrations of the spiritual and material worlds differ so much that when incarnated into a body, the Spirit does not completely unite with it, leaving its highest manifestation, its particle of eternal, loving Light in the spiritual world.

It is a drop of a single ocean of Divine energy and cannot be fully embodied in matter, because it generates and continuously supports its existence from the spiritual world.

In ordinary life, a person is in constant contact with the higher self. The question is to make this contact conscious. The main thing is to believe that the spiritual world, the spiritual light exist, otherwise you can block yourself and not feel anything.

There are many techniques for merging with divine light, this could be meditation, prayer or an appropriate attitude.

For beginners, there is a simple version of the practice of getting in touch with your higher self. The technique consists of the following steps:

Self-observation
Disidentification with the body
State change
Merging with the Higher Self

Let's consider these points in more detail.

1. The first stage is detached introspection

When performing the practice, it is important to relax physically and psychologically, try to push aside all thoughts that do not relate to your spirit, life, Higher Self. Take a comfortable position so that you can completely forget about the existence of the body. Start observing your thoughts, ask yourself why I am thinking about this. Answers will come to you, don't focus on them.

2. The second stage - disidentification with your body

Ask questions further. Who am I? Am I the body? Where am I in the body? When you begin to concentrate on being somewhere in the head area, continue asking questions. Where am I in my head? Until you understand that you are not the head or some part of it. If you focus on sensations, you can clearly feel the state of consciousness that you are not the body.

3. The third stage - changing the internal state

Start studying, looking at yourself from the outside. Then what am I? The thought that I think is who I am? You may feel like your thoughts are not you. Keep asking questions - what am I then?

Feel your spiritual nature, that you are the source from which everything comes. If any changes in your state appear - expansion, increased vibrations, a feeling of light, love, then you are on the right path. You can say a few simple words in any form, for example:

“I ask to connect me now with my original source, my Higher Self, my superconsciousness. I ask my Higher Self to cleanse me of all my negative blocks, emotions, delusions, illusions and other forms of ignorance in this material world. I ask you to let me feel, see, understand your light.”

4. The fourth stage - merging with your Higher Self

When you come into contact with your higher self, a vibration will appear that you will not confuse with anything else. The feeling that captures the attention of the Spirit is joy and inspiration, combined with a feeling of inner Light, peace and boundless, absolute love for the whole world and for all beings.

There is often a feeling of merging with the cosmos, nature, dissolving in them, but without losing the sense of existence of oneself as an individual. Your own experience is important here. When the sensation of this light is more or less clear, you will be able to mentally ask any questions.

Answers can come in thought forms, words, images, in the form of visual visions on the inner screen, it will be different for everyone. It will not be a voice in your ears, it may be a very familiar feeling of an inner voice. Each person is individual, unique, it is impossible to derive a single formula.

There is another technique: “Entering your spiritual channel”

It is advisable to enter a state of inner silence, similar to the state of primordial peace that occurs in children who are not burdened by the worries of the material world, who perceive everything without the prism of negative emotions and preconceived opinions, who look around purely, clearly and openly, in accepting everything that happens as absolute truth.

This state allows you to raise your vibrations to those in which the higher self resides, which will allow you to begin to see and hear it, and understand its answers. You can, through an effort of will, remove from your field of consciousness all thoughts that bother you or cause negative emotions.

You need to sit down, close your eyes and concentrate on the top of your head. Mentally imagine that you are looking at yourself from the outside. Above the top of your head you will see some glow, rays of varying thickness, possibly light energy in a spiral form. This will be your spiritual channel. Lower the flow to the bottom of your body. As you enter the flow, feel the rise to your higher self.

If the merger has occurred, you can start a dialogue. You can mentally ask questions about your life, for example: why did I incarnate here, am I fulfilling my tasks? In any case, the answers will come from that source that is eternal. This is where the practice ends.

Believers can replace turning to the higher self with prayer in the form in which they are accustomed to turning to God. Words of gratitude should be included in your prayer. Prayer is a dialogue with God; contact will occur in the form for which the soul is ready.

If you direct your desire and at least a little faith that this is possible, you will definitely feel it. After the first experience of merging, personal exploration begins, diving into depth, you will be more willing to make contact. By increasing your awareness and directing your energy to connect with your Source, you will be able to feel the Light that will guide you and give you strength.

Even if you don't feel anything and nothing changes, you shouldn't give up the practice, because sometimes it takes time to adjust your sensitivity. It depends on a person's vibrations, his trust in God, the Universe, himself, and the world around him.

If something gets in the way, or you don't want to do the practice, perhaps you have fears and mistrust. If you do the practice for at least 10 minutes for 21 days, and sincerely believe in the success and feasibility of the contact, you will feel the inner light within yourself.

The Higher Self is the best teacher, since its memory of incarnation, life path and tasks is not blocked. The Higher Self guides a person in such a way that he can use his potential for maximum effective development and spiritual evolution.

When merging with the higher Self, the heart is filled with bliss, bringing high vibrations of love into earthly life. You become an inexhaustible source of love and Divine wisdom, and then it becomes possible to directly receive the high-frequency energy of the Creator.

In conclusion, for reflection, an excerpt from the dialogue between Irina Podzorova and Kafira from the planet Futissa:

…"– Why exactly the Higher Self? - he said. – Why the Highest, what is the highest in it? This is what we ourselves are – only in the spiritual world. Do you think that the spiritual world is higher than the material world? We have a single continuous stream of consciousness. If we divide it into two, then we will inevitably end up with one life - social, in the so-called lower consciousness, and the second - spiritual, and they will have little contact...

In our country, for example, our spiritual part is simply called the spiritual self - without division into higher and lower, that is, without a hint that there are supposedly some high and low parts of our consciousness. Yes, it’s interesting... - he began to reason, as if to himself, - maybe they call their spiritual part the Higher Self because they bow to it as to the divine and religiously venerate it...

Well, it's not like that with us - we don't need to bow down, because we simply understand our purpose as bringing the ideas of this spiritual self into the material world. We have incarnated here in order to take with us into the material world the ideas that are in the memory of this spiritual self, and to manifest them in the material world through the brain, through the body, through the nervous system, and subsequently through each of our organs.

Because the material world is a continuation of the spiritual world... Now, when you leave, I will think about all this... The separation of the spiritual self from the single stream of consciousness”...

Words upon awakening to Heavenly Father

https://blog.cassiopeia.center/v3EgO0yAX42

Every morning after waking up, say the following words mentally or out loud:

Greetings to you my Heavenly Father. Thank you for the day given to me for good deeds and knowledge of Your Love for me. I ask you to fill me with Your Light and give me the strength and wisdom to carry it to others, so that all intelligent beings of the Universe that I meet on my way today will see You in me and realize themselves in Unity with us.

Instructions for using the energy information matrix of the planet Burkhad

https://blog.cassiopeia.center/RA_xqx-X8fS

Properties of the Burkhad matrix

The possibility of contact with the noosphere of Burkhad, to obtain answers to questions important to a person: about his life and spiritual path, distinguishing between good and evil, strengthening contact with the Higher Self, ways to eliminate one's own negative programs.

The possibility of harmonization with the energies of positive plasmoid worlds that follow the path of symbiosis with people, and cleansing from attachments to parasitic plasmoid worlds and from attachments to plasmoids, harmonization with which is impossible due to individual incompatibility with the human energy structure.

Cleansing from negative emotions, by transferring negative energy from the astral field back into the vitality of the etheric field, with the loss of the negative coloring of the emotion and its neutralization at the astral-mental levels of the aura.

Strengthening intuition and natural moral sense, as well as strengthening and increasing the frequency of states of merging with the inner Light, by creating a channel between a person's consciousness and his Higher Self in the spiritual world.

The possibility of greater awareness and sensitivity during the performance of rituals and appeals to the Higher Powers, within the framework of any religious egregor on Earth built on the laws of Light.

The ability to enhance the influence of one’s own energy on other people and one’s own thought forms on space, in order to form the events and states desired for oneself, subject to awareness of responsibility for one’s actions, words, feelings and thoughts.

The ability to receive Burkhad's energy to replenish the etheric field, harmonize energy centers and cleanse from external and internal negative programs.

Safety precautions for interacting with the Burkhad matrix

Remember the need for daily internal work to find and eliminate negative programs in the mental field that cause the emergence and retention of negative emotions.

If this work does not happen, the matrix will become a cleansing component in the person’s aura, which, by creating critical situations for a given person, will gradually transform these negative programs into positive ones.

Remember to take responsibility for your own negative actions, feelings and thoughts. After connecting to the Burkhad matrix, your influence on the world will be strengthened by activating the entire energy structure. If you bring negativity into the world, it will be strengthened and returned back to your aura. The same applies to the positive energies you emit into space.

Do not connect to the Burhad Matrix until its purpose is clear to you. Do not connect to it if you do not fully understand or agree with the language that must be spoken before connecting, and also if you do not have

confidence in the personality of the contactee, the Burkhad civilization, or the interstellar alliance as a whole.

Be sure to follow the energy safety rules: for 72 Earth hours before connecting to it and 72 hours after connecting, alcohol, drugs and sexual contact are prohibited.

Before connecting to the matrix, be sure to check the person's energy structure for integrity and density. Connection with links to positive plasmoid worlds is allowed if the energy exchange across them is balanced by at least 70%.

Before connecting to the matrix, be sure to bring the person into contact with his Higher Self and ask him for permission for this procedure, explaining to the person himself what this matrix will give him. If contact with the Higher Self has not been achieved, first increase the person's sensitivity and awareness using individual programs developed specifically for him.

Before connecting, a person needs to study the materials of the Cassiopeia group, especially those related to the history of the Earth, the interstellar union, the Burkhad civilization and materials about the Higher Self, the properties of the matrix and the structure of the intelligent spirit. In addition, before connecting, you must read the Sermon on the Mount of Jesus Christ, set out in chapters 5-7 of the Gospel of Matthew and undergo interviews with specialists from the Cassiopeia group.

Methods for interacting with the matrix

Every morning after waking up, say mentally or out loud the following words:

" I greet you, my Heavenly Father. Thank you for the

day given to me for good deeds and knowledge of Your Love for me. I ask you to fill me with Your Light and give me the strength and wisdom to carry it to others, so that all intelligent beings of the universe that I meet on my way today will see You in me and realize themselves in Unity with us ."

You need to learn to greet and thank any element with which you interact. The habit of paying attention to nature will allow you to be more conscious of its Creator.

Here are some tips on this: When you see the sun for the first time that day, greet it and thank it for the light. Do it in your own words in the way that suits you best.

Do the same with the moon, and with the first star, and with the river in which you go to bathe, and with the land that you cultivate, with the wind, with the rain and with the first snow. Learn to notice natural phenomena around you and treat the activities of terrestrial and cosmic plasmoids with gratitude and understanding.

When entering the forest, picking a flower or grass, taking the life of an animal in order to consume its body for food, address them in any form with words of greeting, apology and gratitude. So you will learn to see everywhere the One Who, being the One, manifests itself in different forms.

If you suddenly experience a negative emotion, such as fear, anger or sadness, then when you come out of this state, analyze why it arose, write down the emotion and the reason for its occurrence in your personal diary, and to increase your astral vibrations, read the following words three times out loud:

" I am the universe, the universe is me. The power of the universe is my strength, and my spirit is part of the flow of existence of the Creator of all worlds. His power will be directed to the benefit of all beings living in all worlds and planes of existence. Reality in truth will remain, and lies in the illusion of perception will

disappear forever .”

If you want to send a request to Burkhad’s noosphere, then formulate it, mentally turn your thought into a stream of light and imagine that it comes out of the top of your head and hits the base of the pyramid matrix.

You will see in your mind’s eye how the matrix will light up and a ray of light will emerge from its top and go into the sky. After some time, you will receive an answer to your question, in the form in which you are able to perceive it.

If you feel the need to replenish energy or energy protection, then mentally imagine a white pyramid above your head, spin it clockwise and say:

“ I activate the Burkhad energy matrix to receive energy and protection at all levels of the physical, subtle and spiritual worlds .”

Imagine how a stream of energy coming from the base of the matrix permeates your body and envelops it in a white cloud, impenetrable to any negative programs and entities.

Before performing any religious or magical ritual, healing session or treating people with words, energies or touching the body, imagine a pyramid above your head, white, spin it clockwise and say:

“ I activate the energy matrix of Burkhad for greater awareness and efficiency in my future actions, words and thoughts, for my spiritual development and growth in the conscious control of the flows of all types of material and spiritual energies manifested in a given space and present time .”

Try to come into conscious contact with your Higher Self at least once every three days in order to thank him for the experience of incarnation, consult about current affairs and be filled with the Light of Divine Love.

To do this, use an individual way of communicating with the Higher Self, which it itself will tell you during a session with the appropriate specialist.

Before going to bed, remember the past day and ask yourself what you did today for your own spiritual development and awakening of Light in others. Don't judge yourself for anything, just mentally make peace with everyone with whom you are in a quarrel.

After this, say the following words:

" I thank you, my Heavenly Father, for the experience of life received today and for supporting my life force with the Power of His Love. I ask you to cleanse me of everything that prevents me from consciously living in You and feeling You and my Mentors. Open for me a free path to the spiritual world this night, so that my body can gain strength to cooperate with You, if You decide to give me the opportunity to see the sunlight tomorrow, as a faint reflection of Your radiant Face ."

Lie down for a while, listening to your feelings, and after a few minutes say: "I send the Light of my love to all living beings in the universe and wish them to consciously accept it and keep it within themselves.

Practice from Zaliathar. Viewing the timeline

https://blog.cassiopeia.center/0-EqJMS_UyX

Before you move on to viewing the timeline, you need to learn simple things.

No one can read novels without first learning the alphabet.
But your school teaches you to read, and spiritual knowledge, which is much more important for fulfilling the mission of incarnation, unfortunately remains outside the scope of activity of your educational institutions.

The first step on this difficult but very interesting path will be the exercise given below. Do it every day, choosing a time from noon to sunset.

It is advisable to start a cycle of exercises on the 7th lunar day and continue without interruption for 14 days.

You should stay in the room alone, or with a person who understands what you are doing and why and is friendly.

The room should be quiet and dark. You can smoke your favorite incense, but in such a concentration that it does not irritate you or distract you from your inner feelings.

Set a timer or alarm for 30 minutes.
Stand in the middle of the room with your back straight, close your eyes and spread your arms to the sides, palms forward.

Slowly and deeply inhale the air and freely release it from yourself, repeating mentally or in a whisper:

“ I am the Immortal spirit, located in my body at a point in space and in an instant of time .”

Do this until you feel like an observer of what is happening and feel lightness in your body.
As soon as this happens, slowly take a deep breath while smoothly moving your palms towards your chest until they touch the area of the fourth energy center.

Mentally concentrate on the sensation of your hands and feel your heart beating.

Gather your attention in your chest, imagine yourself as a point in space from where the light comes.

With each inhalation, allow this point to expand.
Do this until you feel a wave of warmth and relaxation throughout your body, and then sit, without opening your eyes, on a chair prepared in advance.

After this, relax, take a comfortable position and lower your head, allowing your chin to touch the area of the fifth energy center.

While in this pose, continue to breathe slowly and radiate light from the point in space where you are.

Mentally or in a whisper say:

“ I am the light of God, changing the material world according to the laws of love and creation .”

Concentrate completely on your feelings and remember the state you will have at this moment.

This is a state of peace and harmony that will need to be entered before starting any spiritual practices.
Continue this practice until the timer or alarm goes off.

When you hear it, do not immediately open your eyes, but take a deep, slow breath in and out and concentrate on feeling your body. Turn off the device and mentally thank God and all the forces of light for life on Earth and supporting you on the path of spiritual development.

Don't rush back to your daily activities right away.

Be sure to write down everything you felt and thought in a special personal diary of spiritual practices.

When you record everything that happened to you on paper with your own hand, you will enhance the effect of the exercises and make your path to spiritual enlightenment easier.

Zaliathar, futurologist, specialist in healing practices, the study of the spiritual world and timeline studies.

What needs to be done on Earth for the common good?

https://blog.cassiopeia.center/ol17tTqu1cX

We all try to make the World a better place and become better ourselves.

But initially you need to figure out what the concepts of “better - worse” mean to you: these concepts will differ for every adult.

We cannot change the world around us in any other way except through changing ourselves.

It's a slow path. It is very difficult for a selfish person who is used to loving only himself. For such a person it is extremely difficult to radiate Light and act selflessly. The surest way is to be an example for other people.

Then, these people will raise their children in Love and Light: in this way, we can bring forward the time period of humanity, which is called the “Golden Era,” and will also allow earthlings to join the Interstellar Union .

We all try to make the World a better place and become better ourselves.

Spiritual advice from St. George the Victorious

https://blog.cassiopeia.center/D-5Qpw7kDhP

At the conference with the Spirit of St. George the Victorious, the question was asked how the end of the conflict between Russia and Ukraine can be brought closer.

The following advice was given:

1. It is necessary to forgive each other and shine the light of your love.

To do this, you need to remember that you are connected by common ancestors, common roots of language, common history and culture, common religion.

2. Remember that you pray to the same Saints and the same God, who looks at you with compassion. The patron of both sides is the Christian egregor. The conflict that exists now is intra-egregorial.

Religious egregors in the astral world are always on a higher floor than political ones.

For example, the egregor of Ukraine and the egregor of Russia are two different political egregors, but they are both located in the Christian religious egregor, as if under a “dome”. Despite all these events, angels and patrons in the Spiritual world are friends with each other and communicate with love.

3. It is necessary to sit down at the negotiating table, stop blaming each other, and forgive from the heart.

Two political egregors collided with different IDEAS. In order to replace one idea with another, there is no need to perform physical actions. This can be agreed upon. Then all that remains is to clean the egregors . This is what needs to be done now.

Today begins a new phase of the Quantum Transition

https://blog.cassiopeia.center/oZZQl78tEv2

Sergius of Radonezh said live that on March 21, 2022, a new phase of the Quantum Transition begins. It will last 96 days and its curator is Sergius (his spiritual name is Bartholomew).

Sergius of Radonezh asked us all to read two famous Psalms of David - the 22nd and the 50th - during this period. They can harmonize both individual passage through this stage and on a planetary scale. Moreover, the 50th Psalm must be read precisely on March 21, the day of the beginning of this stage of the Transition.

It should be read in the morning after sleep, then before lunch and before bed. That is - 3 times. Then, all the rest of these days (the

remaining 95), you need to read the 22nd Psalm.

It should be read 2 times a day - in the morning and in the evening before bed. Please help yourself and the planet. and, of course, civilization. We are all part of it.

Here are the texts of these Psalms - you can read them both in Old Church Slavonic and in Russian:

Psalm 50

Have mercy on me, O God, according to your great mercy, and according to the multitude of your mercies, cleanse my iniquity. Above all, wash me from my iniquity and cleanse me from my sin; for I know my iniquity, and I will bear my sin before me. You alone have sinned and done evil before you; for you may be justified in all your words and overcome, never judge you. Behold, I was conceived in iniquity, and my mother gave birth to me in sins. Behold, you loved the truth, you showed me your unknown and secret wisdom. Sprinkle me with hyssop, and I will be cleansed; Wash me, and I will be whiter than snow. My hearing brings joy and joy; The humble bones will rejoice. Turn away your face from my sins and cleanse all my iniquities. Create in me a pure heart, O God, and renew a right spirit in my womb. Do not cast me away from your presence and do not take your Holy Spirit from me. Reward me with the joy of your salvation and strengthen me with the sovereign spirit. I will teach the wicked your way, and the wicked will turn to you. Deliver me from bloodshed, O God, God of my salvation; my tongue will rejoice in your righteousness. Lord, open my mouth, and my mouth will declare your praise. As if you had wanted this sacrifice, you would have given it; You do not favor burnt offerings. The sacrifice to God is a broken spirit; God will not despise a broken and humble heart. Bless Zion, O Lord, with your favor, and may the walls of Jerusalem be built; then be pleased with the sacrifice of righteousness, the offering and the burnt offering; Then they will lay the bullocks on your altar.

Psalm 22

The Lord is my Shepherd; I won't need anything:

He makes me lie down in green pastures and leads me beside still waters,

strengthens my soul, guides me on the paths of righteousness for His name's sake.

Though I walk through the valley of the shadow of death, I will fear no evil, for You are with me; Your rod and Your staff - they calm me.

Thou hast prepared a table before me in the sight of my enemies; anointed my head with oil; my cup is overflowing.

So may [Thy] goodness and mercy follow me all the days of my life, and I will abide in the house of the Lord many days.

Energy information matrix of the planet Burkhad

https://blog.cassiopeia.center/ERGWWABHEwK

At the next real physical contact with Kirchiton on August 15, 2019, we flew to the planet BURKHAD. This is the homeland of some of our creators and the capital of the Interstellar Union. There he introduced me to LAOM STREET, who is the representative of BURKHAD in the Interstellar Union and the main coordinator for contacts with civilizations of the Galaxy that are not included in the Interstellar Union.

He suggested that I install an Energy Information Matrix to support my energy structure, with the ability to install its projection to any person on planet EARTH. I promised him that I would do it absolutely free, understanding the significance of this matrix for every person on our planet. You can read about similar matrices from contactees of

other civilizations; there is a lot of information about this on the Internet.

LAOM STREET, of course, explained to me why it was needed and what the principle of its operation was. In order to explain and describe to you in sufficient detail what kind of matrix this is , I made a request via a telepathic channel to the coordination group of the planet ESLER and they gave me this answer:

“An energy-information matrix is an object that exists simultaneously on a spiritual and a subtle-material level. It can be created both by the power of thought and by special equipment that can produce and structure the corresponding types of energies.

The purpose of the energy-informational matrix of the planet BURKHAD is the contact of the Spirit, embodied in the earthly body, with the energy-informational field of this planet. Contact occurs at all energy levels of the human aura, starting from the etheric and ending with the Atman.

The exchange of energy between BURKHAD and each of these levels produces corresponding consequences, for the sake of which the connection to the BURKHAD matrix was initiated for all earthlings who sincerely want to join the planet of their older brothers and mentors, who are energetically and psychologically ready for cardinal changes in bioenergetic indicators, worldview, and relationships to the world and the life changes they cause.

At the etheric level, BURHADA energies expand the channels of the etheric field through which vital energy flows, which makes possible faster and more complete energy exchange with the environment, and ultimately increases the effectiveness of all types of energetic and psychological practices aimed at strengthening and expanding the etheric field and increasing tone of the physical body.

At the astral level, the BURKHADA matrix clears all previously accumulated negative thought forms and transfers the life force spent on their creation back into the etheric field. In addition, it slows down the formation of new negative thought forms by influencing more subtle levels of the aura.

At the mental level, it exchanges mental images, ideas and ideals between a specific person and the entire noosphere of the planet Burkhad. Of course, the mental field that is closest in vibration to the inhabitants of BURKHAD enters the mental field, but the possibility of intellectual and aesthetic development for each person connected to the matrix will no longer be limited only to earthly egregorial structures.

The influence of the BURKHADA matrix at the Causal level occurs by including those areas of memory that are responsible for the formation of events in a specific embodiment. This causes a gradual understanding of oneself, one's place in the world and one's tasks, for the sake of which this incarnation took place. This property of the matrix is manifested more strongly, the less negative energies are generated in the denser astral-mental fields of the aura.

Contact with the energies of BURKHADA influences the plane of Buddhi by enhancing intuition and the ability to distinguish between the light and dark sides of material and spiritual reality. This helps you navigate your very often cynical and tough image and choose the right path leading to the light of true love among very similar ones, but gradually and imperceptibly leading in the opposite direction.

Atman is the level of the aura with which the matrix directly connects approximately on the fourth day in Earth time after its installation. The contact between the human Atman and the BURKHADA matrix makes it possible to eliminate the very cause of a person's negative thoughts, emotions and actions, by creating in him states of dissolution and merging with that part of the spirit that is always located in the spiritual world and the manifestation of which is the Atmic level in the human aura.

This ability is inherent in the matrix potentially and manifests itself depending on the own spiritual work of each connected person.

All this together makes it possible to significantly increase the vibrations of your energy field, helps you communicate with the inner Light in yourself, which you call the Higher Self, and protects you at all levels of the astral and material worlds from negative entities and third-party destructive magical programs.

In addition to the capabilities listed above, the matrix is capable of

increasing vibrations, cleansing all people who are energetically connected to the person connected to it from negativity. These are children, parents and loved ones. This manifests itself the more strongly the more the listed relatives work on developing spiritual qualities in themselves: love of life, faith, gratitude, empathy, peace, humility, wisdom and love.

Each person connected to the BURKHADA matrix, in turn, influences the noosphere of this planet by exchanging with it their feelings, dreams, hopes and desires. They fully open the Light of their souls to every earthling who has decided to give himself into the hands of God, who created everything that exists, existed or will ever exist, and they do this in full understanding and awareness of themselves as yours and our brothers in a single Light, the reality of which is always abides in truth and LOVE, before the vibrations of which any lie and rejection disappears like darkness in the rays of the rising sun."

The information was conveyed by THIUS-RIONGI, a specialist in energy interactions of anthropomorphic humanoids with the environment, biophysicist and psychophysiologist, planet ESLER.

November 2019

PS Of course, you could have found out everything from LAOM STREET himself, but as always, I decided to experiment a little and did not see any difference in the explanation. Well, if only THIUS-RYONGI explained it in a little more detail.

Contact with the Higher Self. Exercise “Blank Sheet of Paper”

https://blog.cassiopeia.center/praktiki-duhovnogo-rosta

If you understand that you don’t feel anything, don’t believe in the

Spiritual world, don’t rush to be disappointed and give it up. Just give yourself time, be calm with your unbelief, calm with your not feeling, calm with your ignorance.

Start doing good deeds. Temporarily, for a couple of months, stop all spiritual exercises, attempts to reach the Higher Self, meditation, if they do not bring you anything, but only bring disappointment from what you do not feel.

Just start doing good deeds and be sure to do them every day, at least a little, but spend 30-40 minutes reading some spiritual literature. These can be books of traditional religions - the Bible, Koran, Bhagavad Gita, or esoteric literature. The main thing is that it is filled with Light, so that there are no calls for any kind of hatred, for example. So that this is a story about the bright qualities of the Soul. For now, let you interpret all this as psychology, as personality traits. Nothing wrong with that. Don't be afraid to make mistakes.

Just do good deeds, find yourself a person or people whom you will help unselfishly. You don't have to help financially. Sometimes it is easier to help financially, for example, give money and forget about this person, than to help him morally and spiritually. Give him some good advice on how to get out of a difficult situation, for example. Sometimes it is much easier to give money than to understand his life.

In addition to this external work - helping other people, which will already raise your vibrations due to the fact that your compassion, understanding, love will grow - be sure to work on your inner content.

If you remember, an offense against someone comes to your mind, then you need to forgive these people. You just need to imagine his image in your own words and say:

"I forgive you. I send you my Love. I want you to always be happy, so that you know Good and Light.”

There is absolutely no need to even say “ knew God .” If you don't believe in Him, it won't be sincere. Simply Good and Light are common words that are dear to you.

With these actions and thoughts, you will increase your vibrations,

and therefore your sensitivity to the Higher Self. After two or three months, you yourself will feel drawn to spiritual pursuits again. It will happen naturally. And this will be just a sign that you are ready. When you start doing them again, you will feel a completely different state. The same spiritual experience will come to you that you previously thought did not exist.

The main condition for pure contact with your disembodied part is trust in yourself and acceptance of the answers that will come. In order not to be deceived by the play of your own imagination, you must accept.

When a person asks a question, he should speak specifically to the Higher Self, and not to the void. And he must do this in a state of relaxation, not just sitting. Just sitting and asking the Higher Self is also possible, but only when you learn, when you enter your flow.

Irina can just sit, talk and immediately ask the Higher Self. Thoughts will come to her. She communicates with us, with the curators. And even now, in order to convey thoughts from me, she completely cleared her mind of her ideas, of her attitude to the world, so as not to distort my words.

This is called mental relaxation, that is, accepting the answer that will be without criticism.

Criticism is a wary attitude towards answers with a desire to check and weigh them. You can already do this after communicating with the Higher Self.

At the moment of contact, the mind should be relaxed, that is, you should let go of your thinking. We call this state a “ blank sheet of paper .”

There is a very good exercise. Take an absolutely white blank sheet of paper, look at it and imagine how in your head, in your consciousness, the same pure white emptiness becomes, which turns into pure white light. This is one of the exercises for clearing the mind.

If the mind gets in the way, what does it mean? This means that when you asked the Higher Self, asked your question, some answer came to

you, but you did not accept it or rejected it, and began to invent it yourself. Don't say this word, but say another word. Perhaps you didn't like the answer, or you didn't believe it, or for some other reason. This is called " playing with your mind, with your imagination ."

Of course, the Higher Self influences this process. It still gives the thoughts that come. Your imagination cannot get thoughts out of nowhere. In any case, they come from the Source. However, although it influences this process, the contact itself will be, but it will be distorted. Then it will still be necessary to decipher it.

Violet Flame. Practice for beginners from Saint Germain

https://blog.cassiopeia.center/fioletovoe-plamya-praktika-dlya-nachinayushchih

This is a system developed by me and my students. To describe this energy, I used images understandable to esotericists. I called it " flame ". This is an image of fire, as in Agni Yoga. That is, fire and the fiery world are a symbol of divine energies. As in Agni Yoga and Theosophy in general, and as in the Bible, of course. You remember that God is called "fire" there, so that's nothing new.

Why purple?

Because here I used the symbolism of the color of your chakras or energy centers. That is, the color violet, as the highest-frequency color of the spectrum perceived by the human eye, symbolized the highest-frequency energy available for human perception. That is, the 7th energy center, which was responsible for communication with God. So the Violet Flame is the divine energy that activates the 7th energy center. In simple terms, this is a moment of enlightenment.

Enlightenment is the awareness not just of being part of God, but of being part of the Light. That is, the one who has realized is no longer capable of doing any evil, any evil deeds. Because they will be unnatural for him. But not because God forbade him to create them, but because man himself does not want it, just as God himself does not want it. Although, of course, no one forbade God.

Practice

To realize yourself in the Light of God, that is, to turn on your violet flame (everyone has it - this is the flame of the 7th energy center of divine energy), you need to reflect (what you call meditation) on the question “ Who am I?” "

What is needed is the simplest meditation, when a person, sitting alone and in silence with his eyes closed (so as not to be distracted by external objects), begins to ask himself: “ Who am I?” ”, begins to focus his attention on what he is not. That is, first he asks himself:

“Am I a hand? Am I a leg? Am I the belly?

That is, he names parts of the body. Then the understanding comes to him that this is not him, that this is his instrument. Then he asks himself:

“Where am I then?”

And his consciousness naturally concentrates on the fact that he is in the head, in the head area. Well, then he asks:

“So I’m the head?”

Then he will move it (on a physical level) and ask:

“Is it me who is moving now or am I moving my head?”

These are the simplest questions to ask yourself until he realizes that he is not a head, that he is not a physical body at all. Then he will begin to ask himself:

“What am I then? Am I a thought? What kind of thought am I? The thought that I think is who I am?”

And then he will understand that he is not a thought, that he is the core from which thought comes. Let him concentrate on this core, and then all thoughts will go away, and perhaps there will be an experience of Light. This is the simplest practice.

Communication with the Higher Self is one of the forms. Access to the Higher Self is more likely for those who “continue,” for those who have been doing this for some time and feel the Higher Self within themselves. When independent communication with it occurs. And the practice I described is more likely for those who do not yet know what it is.

Exercises to develop sensitivity

https://blog.cassiopeia.center/uprazhneniya-na-razvitie-chuvstvitelnosti

Sensitivity at the level of intuition and at the level of listening to the voice of your inner Higher Self, the Highest form of consciousness, is useful for everyone to develop, because it will allow a greater flow of light to penetrate into your consciousness, which manifests through your brain.

To learn this, you need, firstly, to believe that it is possible, that the spiritual world really exists, and it is not a product of matter, but vice versa. Admit it.

Secondly, admit that these sensations do not yet exist, but they can be learned, that is, you need to work on it. The first stage, as Saint Germain already told you, is usually sensations. The very first stage of any spiritual work is to determine that you are a spirit, not a body. That is, perform special, very simple meditative practices that are aimed at feeling not the spiritual world, but oneself as a spiritual being. Everything else will follow.

An exercise to experience yourself as a spiritual being

With your eyes closed, relax, try to feel yourself, where you are, at what point in the body. Try to feel separated from your thoughts, from your feelings, from your body, that is, some such source of everything. And when there is a clear feeling that I am not a body, but that I am an eternal and infinite spirit, then you can move on.

Imagine leaving your body, for example. Astral travel is very good at developing inner vision even when you are in the body.

And, of course, communicate with your Higher Self using the methods that were already given earlier. First read the mood “I am the Universe...”, imagine yourself in a stream of light that comes from above, and mentally or out loud, it is better, of course, first out loud, using the speech apparatus, ask:

“Can I talk to the Higher Self, can you answer my question?”

Be sure to say hello. And here will be the correct answer, the true one,

from the Higher Self, which will come first in the light, because the Higher Self hears your call after your conscious manifested desire.

It is always with you and your task is to make this contact conscious. And ask him to increase sensitivity and so on.

But you must clearly understand the consequences of such increased sensitivity. Because if you increase your sensitivity to the level of perception of the spiritual world, without leaving the body or leaving it, your aura vibrations will change, and you will already be noticeable to subtle beings, plasmoids and to disembodied spirits that may be near you, but in another dimension. And people who can hear them, see them, who are interesting to them, can begin to get in touch.

In any case, you need to be prepared for this and think about whether you need this goal in this life? Will it distract you from some other goals? This is really not such a simple question and it is advisable to solve it before raising your vibrations. Because the outcomes of contact situations are different and, naturally, do this only in positive vibrations. If someone offends, forgive. No evil should be sent in response, it will lower your vibrations. The fact that you respond with evil to evil, the fact that you respond with an evil word to an evil word, will in no way correct this person, you will simply lower your vibrations to him. That is, to react in light to any situation. This is the only guarantee of the safe discovery of your abilities to perceive the spiritual world.

Why safe? Because then no negative entity will be attracted to you, and if by chance some negative entity comes to check you, then it will not be able to cause you any psychological discomfort.

Is it possible to communicate with the Higher Self through a pendulum?

https://blog.cassiopeia.center/mozhno-li-obshchatsya-s-vysshim-ya-cherez-mayatnik

MidkasKaus and LiSioni say that they have seen a lot of people who use materialistic forms of communication with the Spiritual World through bodily practices or material objects. These are spiritual forms of contact.

MidgasKaus says that planet Esler studied spiritualism, pendulums, frames, various turning saucers, etc. in some detail. That is, spiritualistic sessions, in which a connection with the Spiritual World is also established. And they came to the conclusion that this was not a full-fledged contact. In any case, full contact is a mental, mental connection. But at first, if you don't feel anything at all, you can use a pendulum, but just to make sure that it exists. There is no need to get used to contacting the Higher Self through material media. Otherwise, it will be difficult to learn how to enter into a direct dialogue.

Several people contacted me (Irina) who communicated with the Higher Self using a pendulum. And when we tried to enter into a direct dialogue, this group of people without pendulums received answers only in the form of sensations in the body. It is very difficult to get detailed answers in this case. When we asked detailed questions, such a person did not feel anything at the initial stages except sensations in the body. We could not receive any thoughts or images until the person himself began to practice at least the practice of increasing sensitivity that MidgasKaus gave (reading the Esler mood for 21 days).

General disbelief in the Higher Self can interfere. If a person decides simply out of curiosity to try, but he himself doubts, thinks that there is nothing like this, that is, he has such a prejudice before contact. This can also interfere. He will hear the answers, but will believe that he is not talking to the Higher Self, but to his own thoughts, and will not believe it.

MidgasCaus - biologist, psychologist, specialist in alien civilizations, planet Esler.

Condemnation, anger, irritation. Self-analysis technique in stressful situations

https://blog.cassiopeia.center/osuzhdenie-gnev-razdrazhenie

Judgment is the simplest action for the reason that it is based, firstly, on low vibrational states, which, in turn, are based on instinctive principles.

In man, in his current vibrational state, including in the quantum levels of his body, there are two types of perception, which are called the “instinctive mind” and the “spiritual mind.” In fact, these are states of the same mind, which either follows its instincts voluntarily, including instinctive desires, emotions caused by violation of these desires, reactions, etc., or the spiritual mind, i.e. the same mind, which voluntarily follows the spiritual aspiration of its Higher Self, conscience, intuition, etc. Usually a person is somewhere in the middle, i.e. keeps balance. But in a normal, calm state.

If a situation arises that somehow infringes on his interests, desires, i.e. any stressful situation that is aimed at causing negative emotions in him, then the true nature of a person at the moment is revealed. His adherence to the instinctive mind, or the spiritual. This adherence cannot be maintained artificially for any time, because the true nature will still manifest itself.

This, of course, can be changed depending on the change in vibrations, and correctly overcome blocks of negative emotions. It is important here to monitor your reactions to stressful situations, which can be very different. If these reactions indicate defense, anger, etc., then here you need to ask yourself:

"What are you not taking?"

And direct this energy of rejection into the heart. The universal way is:

“My anger, which burns like fire, burns like fire in my heart. I recognize it as Divine Light, and I direct it only towards Love and towards revealing the spiritual potential of the person at whom I am angry.”

This is all mental, with the obligatory consolidation of this practice in the physical world, i.e. an attempt at reconciliation in this case, if it is anger. If it's a quiet condemnation, the same thing.

Condemnation is also anger, but in a hidden, irritable form. For example, I criticize my neighbor for listening to loud music. Let me give you a simple example. Not abstract philosophical reasoning, of which there are many on other channels, and which our employees give through other contactees and other spiritual people. For Cassiopeia, specific, simple examples from everyone’s life are important so that they know how to manifest these abstract philosophical constructs in their practical life.

So, if there is hidden condemnation, for example, towards a neighbor who listens to music loudly at night, then you need to ask yourself:

“Why am I given this situation with this neighbor? Is she really doing this on purpose to irritate me? This is a negative emotion that lowers my vibrations.”

The answer will come first from the instinctive mind:

“She disturbs my peace. No matter how lovingly I treat her, I am no worse than her and should not tolerate it.”

This is approximately the answer, understandable to everyone. Next question to yourself:

“Can I really make a difference?”

For example, so that she doesn’t do this anymore, tell her about it, that she’s really bothering me. Show it, but in such a tone that she doesn’t perceive it as an attack. And, of course, the second question:

“What exactly irritates me in her behavior? Can I accept this situation as it is? Don't react. What annoys me? The fact that loud music or something that disturbs my peace?

That is, a little introspection, that it is the very fact that music disturbs my peace, and you can abstract yourself from the loudest music, which means asking yourself:

“And for what reason do I think that people have no right to violate it? Did I myself disturb the peace of others?”

Roughly the same reasoning. And then answer further.

Everyone will have their own individual work to do. And here it is very important not just to scroll through it in your thoughts, but to write it all down. Keep a personal emotional diary. This will allow us to analyze situations that irritate us in other people. Understand what exactly irritates you and why. And then, depending on what irritates, mental attitudes will be revealed, you say mental, to increase stable vibrations. They need to be changed. To understand how to change them, you must first recognize them. They are usually in the subconscious, in the unconscious part of memory.

The practice of communicating with the Spirit of the child in the womb

https://blog.cassiopeia.center/praktika-obshcheniya-s-duhom-rebyonka

If a pregnant mother wants to communicate with the Soul of the child, she must sit down, relax, close her eyes, and come to a calm state. It is better to inhale the aromas of jasmine or rose, which tune you into contact with the Spiritual world from the position of maternal energy, that is, they help you tune in to the Soul of the child.

The scents of lily of the valley, jasmine and rose will help you express your feminine energy and get in touch with your child. You need to believe in the existence of the Spirit of the child. This is the first condition.

The second condition: you need to be able to concentrate, so that nothing distracts you, concentrate your thoughts. You can light an aroma lamp with these scents in semi-darkness in a relaxed state. Nothing should worry you.

You need to focus on the lower part of your abdomen and mentally see what is happening there, imagine that she is a little person who is examining her organs from the inside.

Just imagine that you are there, what will happen, and what images will come - this is all correct, you need to trust these images. And then ask yourself:

“Where is the child? I want to see his body"

- and you will see it, not necessarily in a physical image, you will see the image that your awareness, your Soul will give you, and then,

when you look at the body, say:

“I give instructions to see the energy thread,”

- and you will see where it leads. Mentally reach out your hand, touch this thread, it will be the thread that connects his body with the astral body, with his Spirit.

Touch this thread and send a request:

“Come to me the Spirit of my child, I want to talk to you.”

And wherever he is in the Astral, he will come, you will feel his presence, you will definitely see his image. He can be anyone, not only as a child, he can be in the form of an adult, you can simply feel the Light - this is his presence. It will be different for everyone.

Be sure to greet him. If you know how, first connect with your Higher Self and then say:

“I invite the Spirit of my child to contact”

- and he will call him to you. This is Esler's technique, it works.

You can just put your hand and call his Spirit. The main thing is that you are relaxed, trust your body and your intuition. Your mother's body will tell you what to do for this. And when you feel it and see its image, be sure to say:

"Greetings! What is your spiritual name?

- and he will name the name that he has in the Spiritual World. The answer will come mentally. To distinguish it from your thoughts, you need to learn to stop your mind and catch the first thought that arises.

In order to train yourself to stop your mind, spend 10 minutes a day doing an exercise, for example, looking at one point. Try not to think about anything and focus all your attention on her. Don’t fixate on the thoughts that come, but let them float across the surface of your consciousness, like ripples on the surface of the sea.

Two exercises are given: on concentrating the state outside of logical patterns that can interfere with the process, and an exercise on talking with the Spirit of the child.

When you greet, the first response that you will feel is not just your thought, but your heart, but it will not be a voice, because it does not have a vocal apparatus, since it has not yet been born, it will be a thought.

If he has not introduced himself, call him as you feel, for example, my Angel, my son, my child or some other affectionate names.

Then you can ask him, greet him, ask him any questions so that he will be embodied, what are his goals and objectives, you can tell him about the world where he will come, you can tell him about yourself, dad, convey to him the Light of your love, that is, you can talk to him as if he were a real child who was born. He feels everything at the level of his Higher Self. And when he is born, you will find contact with him more easily.

There are even studies by your scientists, I know about them, and this is confirmed by our information about the Spiritual world, that the music that the mother listened to during pregnancy unconsciously becomes one of the most favorite among the children born, even when they become adults.

Neptune, Water Spirits, how to cooperate and

interact with them

https://blog.cassiopeia.center/neptun-duhi-vody

Neptune is another name for Poseidon. This word was used to describe the main plasmoid of water. On Earth, which consists of almost three-quarters of water in various forms, plasmoid civilizations that are responsible for the elements of water, the so-called undines, mermaids, and so on, are very important. This name is because among them there are not only those who take on the image of a woman, but also the image of men, you call them mermen, these are actually real-life plasmoid entities of various density levels. On Earth these are from the 5th to the 11th average levels. Among them there is a main ruler who is responsible for the element of water, namely on Earth. By the way, this may not necessarily be an earthly plasmoid; it can be embodied in space, on the Sun, and in the center of the Galaxy, they change. That is, Neptune and Poseidon are rather not names, but rather job titles of the very manager of water plasmoids, the element of water on Earth.

When interacting with the elements, I advise you to be sure to thank the representatives of this element, to thank God who created this thing or this phenomenon in material form. You can consciously talk to them, that is, when you begin to thank them, you will gradually increase your sensitivity and will feel them. You will tune your spiritual heart to see these worlds.

For example, interaction with water plasmoids may look like this: when approaching a natural body of water, be it a small river, a pond, or a huge ocean, remember that each body of water necessarily has its own patron, one or more among the elements of water, Plasmoid Spirits water, and they are also helped by the plasmoids of this place.

What are they needed for? They monitor the ecosystem in the water, the energy balance of the creatures living in this body of water. Together with the plasmoids of this place and the plasmoids of earth, fire, and so on, which are nearby, they help create the souls of animals, plants, reincarnate them, monitor them, etc.

When you approach a body of water, know that it is its own world. Before you plunge into it, stand on the shore, close your eyes and

address them something like this:

“I greet you, Spirits of this area, I give you the Light of my Love. Let me enjoy swimming in this beautiful place."

This way or in your own words.

And then listen. You will hear their energy in the singing of a bird, in the shine of the sun's rays, you will see their smile in the clouds that will run above you, perhaps you will feel a presence nearby. Do not be afraid of anything, they hear you, after you send them the Light of Love, they will protect you from accidents on the water, they will monitor your children who are nearby, they will drive away from them those plasmoid entities that may want to cause harm . They will even somehow instill and control insects and small animals so that they do not annoy you when you are relaxing in nature.

And when you leave, also say:

“Thank you for the happiness, pleasure, joy that I received while in this place. I feel your energies, I will definitely come here again. I give you the Light of my Love and wish you to develop in the Light of Love of our common God, Creator, our Father!”

Such words can be said.

Holy water and boiling. How to charge water yourself

https://blog.cassiopeia.center/svyataya-voda-i-kipyachenie-kak-zaryadit-vodu

If holy water is boiled, it will lose all its healing properties, since the embedded energies will come out of it.

Boiling neutralizes any water charged with any spiritual entities, any plasmoids and any energies. But if you add this (charged) water simply to hot water that is not boiling, then on the contrary it will charge it.

If we are talking about colors, then any color carries the energy of a certain chakra, vibration. If you place water in a transparent glass vessel on a sheet of paper of a uniform color for 120 minutes, for two of your hours, and this must be done under the rays of the Sun, which enhances any energetic effect, then you can charge it with a certain vibration, which will activate the corresponding chakra.

If you have problems with astral entities, with aggressive actions on their part, or you have anxiety, inexplicable fears, a feeling of the presence of someone evil, then you can charge the water with moonlight. It will help your aura gain protection from various kinds of entities that are trying to cause fear in you with their presence and aggressive energy.

Why is this happening? Because moonlight activates the energy of calm, relaxation and brings the nervous system into a state of rest, falling asleep, and rest. If on the night of the full moon (14-15 lunar days) you place an open glass vessel with water on the windowsill under the rays of moonlight for about three hours, then by drinking this water before bed, you can enter a state of relaxation, relaxation and remove fears. That is, water charged from moonlight induces calm, harmony and removes anxiety. And water charged from sunlight sets up the activity and activation of the entire energy system, so it’s good to additionally charge it with a certain color. This is called color therapy combined with the charge of liquid crystalline water forms.

Mirakh Kaunt (Archangel Gabriel) about filling with Light and increasing the vibrations of planet Earth

https://blog.cassiopeia.center/mirah-kaunt-o-napolnenii-svetom-zemli

We close our eyes and mentally imagine the planet. You can do it. Imagine that we are holding a globe in our hands. We take a slow, deep breath, and direct the Light that is now in us through our palms into the globe.

Let's see how it becomes brightly shining. We say:

"Dear planet Earth,

I thank you for incarnating in your space.

I send the Light of my love to all your spheres,

to all your spaces:

atmosphere, lithosphere, hydrosphere, biosphere, noosphere.

With the light of my Divine love I cleanse and transform

all negative energies

in Love, confidence and well-being.

I wish all Spirits

embodied in the space of the Earth

at all density levels,

happiness, love, enlightenment.

I wish everyone to come to God,

and always be in unity with Him.

I love you".

Feel the response flow, inhale it into yourself and distribute it throughout your body. Tell:

“I thank and accept, I love and bless. I promise to direct this energy to the development of unconditional Love for myself, for my loved ones and for the entire space where all my spiritual and material energies are located.”

Exhalation. We open our eyes.

Timecode: 26:15, #417 Where to start on the Spiritual path? Practice of increasing the vibrations of planet Earth from Archangel Gabriel (part 3).

Where to start on the spiritual path?

https://blog.cassiopeia.center/s-chego-nachat-duhovnyj-put

First you need to decide on your goals for embodiment through the Higher Self . If you have already come to Cassiopeia, your first natural desire is to find out something about yourself, to find out something about your purpose. For the vast majority of you, this is of much more importance than learning about distant stars.

In fact, such a desire arises because subconsciously you know that your life here is not accidental, not in vain. Therefore, strive to manifest yourself as best and fully as possible through your destiny. This desire comes from your subconscious, from the Higher Self , that is, in the form of intuition. We call it intuitive knowledge of reality. Therefore, having got into the “Cassiopeia” project, the natural desire is to first go to any sub-project of “Cassiopeia”, there is the school “Sakral” , and “Gikhor” , and the School of Contactees , and the school “Mental Healing” , and the project “Higher Self.Practice” " and many others that will undoubtedly develop in this project.

One of the vectors for the development of Cassiopeia is the expansion of the structure through the involvement of multidirectional thematic projects. The more projects and directions, the more energy of life in the egregors.

Before plunging into projects, you need to “go” to your Higher Self with questions about the purpose of incarnation, what tasks to perform, how much to complete, what is stopping you, and what qualities need to be developed in incarnation. The next recommended question for the Higher Self is: In what direction should I move specifically in Cassiopeia? But this question should be asked after a person has studied the directions on the Cassiopeia website . Information about many of them is posted in our Telegram channel " Info Cassiopeia ".

At the same time, you should study the materials of “Cassiopeia” and not only for interest, but also for internal work on yourself, with your environment.

Your most important, important spiritual teachers are next to you: this is your mother, your son, your maybe drinking husband or annoying wife. These are the teachers whose interaction with you helps you learn to stay at high vibrations in different situations. Unfortunately, not everyone knows how to do this when they are in negative situations. Many of you are kind and loving only when the environment around you is the same, but it may not always be so. It is very important to be able to thank God for any circumstances, for any people who are nearby.

Because God works like this: if you ask God for happiness, God gives you the opportunity to achieve this happiness; if you ask God for patience, He will give you circumstances in which you can develop patience. You understand how it develops, and this is by no means by eating buns with honey every day.

If you ask God for patience and humility, then God, fulfilling your request, will send you circumstances where you will need to learn to be patient and humble. If you ask God to teach forgiveness, then you will be sent people whom you will need to learn to forgive. If you ask God for love, to fill you with love, and you ask this very often, then God will send you people whom you will need to learn to love - this is the only way love develops. This is how God answers all your requests.

The desire for Light in the material world is valuable because we gain the experience of bringing this Light into the material world and the experience of its transformation. Transformation in order to increase the level of happiness, grace, joy, creation, in the material conditions where we live. This is the value of the material world. Without it, everything will be static, there will be no development and no further increase in level. Without the material world, there will be no meaning to the existence of spiritual entities in themselves, because they will not be able to show their love and their Light in any of their creations.

Method of orientation in the forest from MidgasKaus

https://blog.cassiopeia.center/metod-orientacii-v-lesu-ot-midgaskausa

In our school curriculum there is a subject - “Interaction with the Spirits of Nature”, it contains a very useful method that I want to tell you about. If you go into the forest and lose your direction, you can ask the Spirits to lead you out. To do this you need to have sensitivity.

If you didn’t take a compass with you, I recommend you a very simple way to navigate - it’s called “Interacting with the Spirit of the Sun.”

Remember the main rule: when approaching a forest, be sure to stop for two minutes before entering it. While still on the road, send the Light of your Love to the forest, the entire surrounding space and those Spirits who are there. You came to visit. Send the Light of your Love to the owners, greet them. Tell:

“I came to your forest to rest, to collect the gifts of your forest. I ask the Spirits of this space to send me a blessing, I send you the Light of my Love.”

This is the first. As soon as you say this, you will feel at peace.

And second, be sure to look at the Sun. When you are standing on the threshold of a forest, look at the Sun and be sure to remember where it is relative to you. If it's behind you, remember that. If it's in front, left or right, remember that too. Now, when you enter the forest, even if you forget where you turned and where the road is from where you entered, look at the sky from behind the tops of the trees, and it will be clear where the Sun is. And then you will remember where it was when you entered. To get out of the forest, you need to go in the opposite direction.

For example, when you set, the Sun was behind you, which means you need to go facing the Sun. If when you set, the Sun was on the left, make allowances for this. And you will come out to the place from where you entered the forest.

If you don't do this, you will wander through the forest for a long time without a guide. Even if there are two hundred meters before leaving the forest, you may not see him through the trees. You will walk through the forest parallel to the road for five, ten kilometers, not finding the exit, because you have forgotten the entry point. Guided by the position of the Sun in this way, you can easily find a way out of the forest.

Practice “Journey to the place of transition to the world of disembodied Spirits”

https://blog.cassiopeia.center/puteshestvie-k-mestu-perekhoda-v-mir

This meditation is absolutely safe. Since we are not only bodies, we are Spirits, it is quite natural for us to be in a state of expansion from the influx of Light.

So, you need to lie down or sit comfortably and dim the bright light. Be sure to put phones on silent mode. It is very unpleasant when you are taken out of the state of spiritual flight by a sharp sound.

First, before plunging into this state, think about whether you will call one of your dear people who remained behind the veil of time, or whether you will wait until someone appears in front of you. You can do this or that - both are normal. Also in this meditation we will feel that we are not just bodies that live, work, rest, reproduce and die. We will feel like eternal immortal Spirits who solve their own problems in every life. These tasks seem difficult only here and only because we made them so for ourselves in order to be closer to the perfect mind, Love and will of God.

You need to close your eyes and relax. Do not cross your arms and legs. Position yourself so that your body is comfortable. Pay attention to your breathing. Let your breathing be slow and deep.

Imagine how atoms of air gases penetrate your body. Each atom is the smallest point of light, consisting of divine energy. You are breathing in divine energy. It is distributed throughout your entire body as your blood streams become streams of Light. With every breath you take, you become more and more empowered and confident. With each exhalation, you leave all your worries and worries about the temporary in this material world. This is the entrance to the territory of eternity. Where we always are, were and will be. Then pay attention to yourself, to the feeling of yourself in your head.

Say in your mind:

"I am Spirit."

Remember your very first memory that you had in this world, in this body. Remember where you were, what you saw, what was the first image you remember in this body? Now, from this first image,

mentally look back to when there were no memories. You will clearly feel that you were. Feel what happened before your first memory. There was a bright light there. You were the Light.

Imagine how that Light transforms into a huge pillar of light, like a white elevator, round inside. You can fit in it alone. Imagine that this pipe goes very, very high, beyond the earth's atmosphere, beyond the solar system, beyond space. Get on this elevator. Imagine yourself slowly rising into the Light, leaving your material body and the material world behind. You will rise to the gate to the world of disembodied Spirits.

Let go of your body, let go of your breath.

Get ready to meet the Spirits of your loved ones. They are as real as you are.

They also feel, think and exist. Feel how gravity disappears, the attraction of the Earth disappears.

You are being pulled upward uncontrollably.

Then look ahead, there you can see a door or gate. This is a passage or boundary of transition from the Astral to the world of disembodied Spirits. If you want to summon someone, simply address them by name and imagine an image. Tell:

“Come to me for a serious conversation and exchange of energies.”

The exchange of energies of Love is also an important exchange. If you want to see someone who wants to see you, mentally say:

“I am ready to see the Spirit who wants to meet me.”

It can be absolutely any Spirit. He will definitely come to you in the form in which you remember him. As soon as you see who has come out to you, greet him. Call him by name. Thank him for coming, say:

“I send you the Light of my Love.”

After this, you can talk to him mentally. After completing the conversation, you need to thank those Spirits with whom you spoke. Mentally say:

“I wish you a bright, favorable incarnation in any of the divine worlds! My Love is always with you. I love you and accept you for who you are!”

At the end of the practice, thank your Higher Self and your Guardian Angel, who has always been with you in this world. Thank yourself for participating in this practice. Thank Archangel Raphael for this practice. You will feel the influx of energies of Love. Tell:

“Thank you and I accept! Love and blessings!”

Then mentally connect with your body, feel it and open your eyes. You will find yourself back in the material world. Here, too, there is that divine Light that you saw, but in the form of objects and phenomena.

What needs to be done to make your wish come true?

https://blog.cassiopeia.center/chto-nuzhno-sdelat-chtoby-zhelanie-sbylos

To make your wish come true you must:

> Know exactly what exactly you want.
>
> Know exactly what you need it for. What need does this desire of yours fulfill?
>
> You need to find out in the world around you or ask your Higher Self what needs to be done in the physical world in order to materialize your desire.

—— · ❄ · ——

It depends on what you want. If you want to acquire something material, then a certain amount of material energy must be spent on acquiring material things. Here it would be a mistake to think that if you wished for something material and, for example, it was given to you, or you found it and took it for yourself, then your wish came true, and you did not spend your material energy on it. They gave it to you in advance.

If you do not exchange energy with the Universe in a similar way, without giving something of approximately the same value to someone close to you or without providing help to poorer people, then your energy will simply leave some other area of your life. There must be constant energy exchange.

A method of achieving harmony with yourself and others. Practice "Inner Light"

https://blog.cassiopeia.center/vnutrennij-svet

INNER LIGHT

Humanity in this period of history is experiencing the heyday of the cult of consumption. From early childhood, every person realizes the importance of work and social contacts for achieving success in one or another type of activity. People and events are rapidly rushing around you, and the information flow passing through your consciousness every day makes you want to do all the necessary things, visit a thousand places at the same time and get as many impressions as possible in a unit of time.

This is neither bad nor good. This is a given in which each of you lives. And many people, in one way or another, adapt to the passage of time, planning work, leisure and entertainment within a strictly allotted time frame.

It often happens that in the external bustle and pursuit of success, you forget about the need to talk with yourself, listen to the Spiritual Heart and determine the goals and objectives of your life, as well as the degree of their implementation.

The lack of conscious contact with the True Self, with the Inner Spiritual Light, leads to a decrease in the intensity of the energy flow of the Divine Potential, which is given to you for Incarnation. In this case, your Higher Self leaves a minimal degree of opening of the Spiritual Channel connecting your Mind with the Divine Wisdom, which contains the experience of hundreds of incarnations in many worlds and spaces.

If the conductivity of the Spiritual Channel is minimal, you have trouble hearing your intuition and begin to doubt your goals. You are increasingly visited by thoughts of your inability to achieve something and are overcome by the fear of making mistakes and being imperfect in the eyes of others, and especially in your own.

If a person ignores this condition, he provokes the emergence of anxiety, fears, self-doubt and other types of chronic suppressed stress, which seriously reduce the quality of life and can potentially lead to serious depression, addictive behavior, conflicts in personal life and even mental health problems. and physical diseases against which modern medicine will be powerless.

The method outlined in this article is not a panacea for the above problems. Rather, it is the prevention of negative thoughts and emotions that destroy the body, psyche, health and have a detrimental effect on human civilization.

All you need is a personal desire to establish contact with your True Self, openness to new experiences, trust in yourself and thirty minutes of personal time.

THIS METHOD IS NOT CONNECTED WITH THE RITUALS OF ANY RELIGIOUS CONFESSIONS. IT IS SUITABLE FOR PEOPLE OF ALL BELIEFS WITH A UNITED DESIRE FOR PERSONAL DEVELOPMENT AND INCREASED LEVEL OF HAPPINESS, LOVE AND AWARENESS OF SELF-PERCEPTION AND REALITY

!!□ THIS METHOD IS MAXIMUM EFFECTIVE WHEN USED DAILY

Before starting this exercise, decide on a TIME and PLACE for yourself. You can practice this method at any time, but it is important that you have the opportunity to be alone with yourself in a quiet and peaceful place for thirty minutes.

Research by neurophysiologists shows that any new action is 30% better remembered and reproduced if performed at the same time of day.

The location can be anything. The main thing is that it is quiet and evokes positive associations in you and contributes to a peaceful mood. It is very important that you can be alone in this place and position yourself in such a way that you are as comfortable as possible. If there is no possibility of solitude during the day, it is better to perform this practice in the evening, before going to bed, or in the morning, immediately after waking up.

!! Please remember to put your electronic communication devices on silent or turn off your electronic communication devices before practice! A sudden sound heard by you in an altered state of consciousness can cause quite unpleasant sensations!

Stage 1. Introspection

Take any position that is comfortable for you. Close your eyes and begin to observe the breathing process without trying to control it. Mentally imagine that with each inhalation your body is filled with new light energy, and with each exhalation your muscles leave tension.

Remember that your internal energy is controlled by your thoughts. Count to yourself the number of inhalations and exhalations. After 7 full cycles of inhalation and exhalation, switch your attention to the inner world, observe thoughts, feelings and emotions without judging in any way, just record their presence.

Stop at the thought that interests you the most and ask yourself:

“Why am I thinking about this?”

You will receive answers, do not focus on them. Imagine that your thoughts are flowing through your brain like a river, and you are looking at it from the outside.

As soon as you feel peaceful and unwilling to physically move, move on to the next stage.

Stage 2. Disidentification with the physical body

Mentally ask yourself questions:

“Who am I? Am I the body? Where am I in the body?

When you feel like you are in some area of the body, continue asking questions.

“What shape am I? What color am I?

A sign of an incipient meditative state is a clear feeling that you are not a physical body, but an object of any shape and color that is in the body and at the same time observes its state. When you feel this state, move on to the third stage.

Stage 3. Raising Spiritual Vibrations

Mentally say:

“I ask my Higher Self to cleanse me of negative emotions, thoughts and spiritual illusions. I ask my Eternal Source to let me feel and understand its light.”

 Learn words to increase spiritual vibrations by heart before meditation. If during practice you cannot remember them, mentally turn to the Higher Self in your own words with a request for cleansing of negativity and increasing spiritual vibrations.

Repeat these words to yourself, trying not to be distracted by extraneous thoughts. Believe that your Higher Self hears you, but do not expect an instant effect in the form of “thunder from Heaven.” Release mental tension and physically relax. Accept any thoughts and sensations, pass them through yourself. Continue to mentally call for contact with your Higher Self for as long as you deem necessary. People who have never practiced meditation before are advised to recite the text above at least 20 times. For more experienced practitioners, to set up contact, it is enough to concentrate on saying these phrases to yourself 10-12 times.

If you feel that meditation on this day should be completed, thank the Higher Self in your own words for the help and support on the path to the Light. Then take five slow, deep breaths, open your eyes, and stand carefully.

Immediately write down your feelings during practice in a special diary. This may come in handy later.

Stage 4. Merging with the Higher Self

The transition from the third stage of the exercise to the fourth will

happen automatically when you raise your vibrations to the desired level. A sign of merging with the Higher Self is a bright inner light, reminiscent of sunshine, in the chest or upper part of the head.

This light is not physical, but is felt quite clearly and is accompanied by a surge of feelings of happiness and love. When you first experience this state, you will never confuse it with something else.

Once in contact with your Higher Self, mentally ask it any questions that concern you. The first thought that comes to mind after the question is the true, spiritual message coming from your inner Sun of Spirit. If you still have additional questions for your Higher Self, mentally ask them.

Having received the answers, give yourself the mindset to remember them.

When you consider it necessary to end the contact, mentally say:

Thank you and accept! Love and Blessings! I promise to use this energy to develop unconditional love!

If after this you feel a powerful wave of light energy passing through your body, take a slow, deep breath and imagine how it is evenly and calmly distributed in every cell of your body.

This is how the exchange of energies takes place between you and the Higher Self. The energy received from the spiritual world will allow you to live more consciously and happily on Earth and go towards your goals bypassing obstacles.

Take five slow, deep breaths and open your eyes. Smoothly and carefully stand up, and immediately write down in a special diary all your feelings from meditation and be sure to write down the answers that you received from your Higher Self.

If you don’t feel anything and nothing changes in your life, you shouldn’t leave this meditative practice, because sometimes it takes time to adjust your sensitivity to the spiritual world. Continue to do this every day for twenty-one days and the likelihood of successful contact with the Higher Self will increase every day.

The purer your Spiritual Heart is from negative thoughts and emotions, the sooner you will connect with your Higher Self and feel better contact with Him.

Meditation "Inner Light" will help you achieve the following goals:

Strengthening Intuition.

Getting rid of fears, anxieties and self-doubt.

Healing from depression.

Receiving answers to the most important questions for you from the Eternal Source of Divine Wisdom - the Higher Self.

What does it mean to love yourself? Self-deprecation as a form of pride

https://blog.cassiopeia.center/chto-znachit-polyubit-sebya

To love yourself means to recognize your perfection as the perfection of others, without putting yourself first or last. There is pride and arrogance, and there is self-abasement, despondency, self-criticism. There is also excessive self-criticism, which leads not to self-improvement, but to sadness, when you do not consider yourself above everyone, but bow to everyone, try to serve everyone. In fact, this is also a form of pride:

“ But I’m still not like everyone else, I’m no longer higher, but lower. Let me be given the same pain in the form of pity .” These are also fears.

You need to know that you are neither superior nor inferior, but equal. You are perfection, you are divine perfection. You are the Light. What you have in you is Light.

If we speak close to social norms, you have the right to any choice you want to make: who to live with, what to read.

I am the same person, equal to you. And I am also Light, and I am also perfection. God loves me too, just like you. And I have the right to my beliefs, to my life, to what I want to do. Same as you.

We live with equal rights, but everyone has different opportunities. This is where self-love lies. That is, to respect oneself as an individual who has his own rights, while respecting the rights and personalities of other people.

And if you see that these rights are being infringed upon by another person, even for his own sake, do not allow him to do this, but not rudely, but tactfully and with love. That is, do not allow yourself to be humiliated, do not allow yourself to be put under pressure, offend, but not rudely: “ Leave me alone, everyone ,” without swearing at him, but making it clear that, in the end, I also have the right to my opinion, for your life. And this is in a mild form, at least try to do so. Of course, a lot depends on upbringing and on a person’s emotionality.

For example, two people live - husband and wife. Let’s say the husband doesn’t like how and what his wife eats. And she’s happy with everything. So she shouldn’t follow his lead if she doesn’t want to. Otherwise, it will already be dislike for yourself. But if she answers her husband rudely, this will already be dislike for him. We need to find a middle ground. How to do it?

- Thank you, my dear, for your advice, for your love, but I am a free person and I choose what I eat. You have the right to eat what you like, right?

- Yes I have.

- And I have the same right, I am a free person like you.

He can say that he is worried about you so that you don’t get offended, he can say it gently.

- Thank you, of course, for your concern, for your concern, but this is my choice.

- It can be harmful to your health.

- Yes, it can harm my health. But this is my lesson, which I will take myself. And thank you for your love.

And so it is in everything. If someone doesn't like something, you don't have to live up to someone else's standards. But the other person doesn't have to live up to your standards either. It's important to remember this.

Patience with yourself and others is the main sign of love.

Patience is also needed in everyday affairs, when you don’t want to, but you have to. For example, I don’t want to get up in the morning, but I have to get up for school. Then still sit in class. You have to endure this. If you don't tolerate it, you won't learn anything. If you treat studying as torture, then you will experience torture. If you treat the learning process as a necessary, albeit difficult, experience, because it is necessary for your development, then you will no longer experience this suffering to the same extent.

Even physical pain is felt more strongly when you are afraid of it, afraid of this torment, when you deny the pain. And when you accept it, you tolerate it much easier.

Why is patience needed for love? Because we are all so different, and it can be difficult to adapt to each other. You can't do this without patience. Otherwise, we will all swear at each other and not love each other. But the main thing is that everyone wants others to accept them with all their characteristics, to accept them without scandals, not to “wrack their nerves” and not to alter them.

How to better remember voluminous information when studying

https://blog.cassiopeia.center/kak-luchshe-zapominat-obyomnuyu-informaciyu

To make it easier to remember a large amount of information, you need to break it down into semantic parts. If you read, watch or listen to something (when you first become acquainted with this information), you need to understand what it says and try to break the total amount of information into meaningful parts. You can give a name to each of these parts.

For example, if it's a chapter, you don't have to memorize it word for word because your memory is selective. She may remember some words better than others, depending on your past experience. Don't focus on memorizing individual sentences and phrases. First ask yourself the question: “What is being said here?”

If this is a large amount of information, break it into several parts. For example, you might call these parts “introduction,” “explanation,” and “conclusion.”

Read the "introduction" first. Pay attention to how the author leads to the main idea and justifies the need to accept this idea. It is advisable to understand the meaning of all the words used there. If you do not understand some words, this disrupts the formation of neural connections associated with memory. If you find that the meaning of some terms is not familiar to you, then you need to find them out in the dictionary. After that, read the “introduction” again. Then what you read will be integrated into your picture of the world, into your

worldview. This understanding will already be a part of you, and you will not forget it.

Also read the “main part”, which explains, tells something new. For example, you are reading an article about the Sun. We read the “introduction”, where general words are written about what will be further told about the Sun by a certain scientist. He gained this knowledge through research using some instruments. In the "introduction" you receive information about who owns this research and how he obtained it. It is not necessary to memorize this information. Just understand that this is the author's own explanation of where this information came from.

Next comes the “main part”, which describes what the author wanted to say. For example, what is the Sun, what does it consist of, what are its functions, how different parts interact with each other, and so on. Usually, the part of thinking called “analysis” is turned on first. Information is broken down into its component parts, for example:

- What does the Sun consist of?

- From the core, chromosphere...

- From what substances?

- Hydrogen, oxygen...

You know what “hydrogen” and “oxygen” are, and you already have some kind of image. Then “synthesis” is activated - the ability of thinking to combine this information into one whole. You understand, if the Sun consists of this, then the stars, which are also Suns for their solar system, can often consist of these substances. There may be some other substances there, but the base will be similar. So you synthesize this information and it becomes integrated into your personal experience. You won’t forget it if you analyze it and then synthesize it.

When you read information, be able to talk internally with the author, ask him questions, sometimes you want to argue with him, if you disagree, object to him mentally. Don't avoid this, this is a completely natural learning process. You can even write down in a separate notebook some question that is unclear to you or, conversely, write

down an idea you like, then memorization will happen faster and stronger. This way, you will fill your learning not just with rote memorization, but with emotions as if a close friend told you about it.

Memorizing information is inextricably linked to understanding this information. If you do not understand what you are reading, it will be very difficult to remember it, because your mind filters the information, putting it through “control”. Control is such a function of consciousness. Ask yourself how important this information is to you. If it is not important to you or you do not understand why you need it at all, then it will be dismissed as noise that disturbs you. If you find it difficult to remember some information, ask yourself how important this subject is to you.

How to Recognize Low Vibration Entities in Yourself and Others

---

https://blog.cassiopeia.center/kak-raspoznat-nizkovibracionnyh-sushchnostej

You can ask your Higher Self by getting in touch with him:

“Are there entities in me? Do they influence me?

If you do not yet know how to communicate with the Higher Self, then pay your attention to whether there is a low-vibration disembodied Spirit in your field, or whether you are attached to low-

vibration plasmoids (demons), that is, this will be a different level of density.

You can notice this by indirect signs. For example, if your relatives and friends say that over the past year, six months have changed dramatically for the worse. You have become more aggressive, more irritable, if your sleep is disturbed, you often have nightmares. You yourself notice that close people have begun to irritate you for no reason, which was not the case before - these are indirect signs.

Also, if you notice that you have no desire to read about the Spiritual world and generally read Spiritual literature, for example, the Bible, the Koran or esoteric literature, that is, books that write about the human soul, because these topics irritate you. Perhaps you are more attracted to conversations and discussions about low vibrational states: anger, envy, gossip, etc. This may be an indirect sign that you are being affected by these entities.

But even if you notice this in yourself, you can always refuse. This is a form of contact. As a contactee, you can always refuse this contact, but on the condition that you understand why you attracted this entity. If you are sensitive enough, you can talk to her mentally, you can get in touch with her. Close your eyes and ask: what is your name, what is the contact for, what energy do you expect from me? And fill it with the opposite energy.

If you notice a similar condition in your loved one, this is also a pressing question. You can help him by recognizing in him the main character trait, the main emotion or feeling that could attract these entities to him. You can show him the opposite behavior by example, so that he can see how a person needs to behave in order to raise his vibrations. You can explain to him what is happening to him so that he is not afraid of it. Namely, that this is an absolutely safe situation for him in the sense that a person is stronger than any entity. Since there is nothing stronger than God, and no one can harm the person who is in contact with him.

Any form of fear of entities immediately weakens us. It makes us powerless because fear is a lack of trust in God. And distrust of God is disbelief that He will protect us, He loves us. Mistrust fences us off from Divine energy and leaves us alone with these entities. If we completely trust God, we will abide in the Light of absolute Love, and

no entities will be able to do anything to us.

Timecode: 30:54, #165 Demons, low vibration entities and plasmoids.

Practice communicating with the Guardian Angel

https://blog.cassiopeia.center/praktika-obshcheniya-s-angelom-hranitelem

First you need to believe in him, that he exists nearby. The second thing is to thank him, that is, close your eyes, turn to him, maybe with prayer. Prayer is a conversation between a person and a being in the Spiritual world. She can be in her own words. It will just be communication.

We must understand that any prayer, no matter who it is addressed to, is always not a monologue, but a dialogue. Now you are asking a question to the Angel; in essence, you are praying. Each of you can receive answers. You can tune in through your spiritual channel to subtle perception. To do this, you need to bring your consciousness to the state of Divine presence.

The state of Divine presence is when you look at the world around you as a manifestation of your energy. That is, to be in a state of an open spiritual heart, feeling the flows of Light, which gradually, lowering in vibration, create the material world. This is called the state of Divine

presence.

Thanks to this state, all spiritual entities that are nearby can freely “speak” through your brain, using your vocabulary.

Irina: Archangel Michael answered, now he wants to add Mirakh Count. The vibration is a little different. When I talk to an entity, I feel its state. I begin to feel myself as her, and he as me, our minds merge a little. This is considered the norm during telepathic-astral contacts. If Archangel Michael speaks to me now, I begin to feel a little like an angel with wings, to see that I am standing next to me. When I start talking with Mira Count, I begin to feel like a man who has flown from a distant planet to another planet, and I begin to think about the Interstellar Union. Mirakh Count says: “At the moment of contact, our consciousnesses with the contactee become for some time akin to a single whole and our sensations merge.”

Mirah Count: “So that you can also talk to your Guardian Angel, as Irina talks to us, you must believe in his presence, you must thank him. Must say:

“I open my spiritual heart towards the flow of Divine Light. Guardian Angel, I want to talk to you."

Close your eyes and feel the space around you. Ask yourself where it is. You will definitely feel it. If you don’t feel it the first time, start training and talking to him in mental images, imagine him. Over time, the mental image will become real to you as you increase your sensitivity.

In order for the Guardian Angel to be able to transmit information through you also purely, without distortion, he must merge with your consciousness. To do this, your consciousness in everyday life must emit predominantly high vibrations, otherwise the Guardian Angel will not be able to merge with you with its vibrations. He will move away from you a little, since he does not match your vibrations. No matter how he wants to convey it, he will have the feeling that he has found himself in some kind of aggressive environment for himself. If he pulls away, then pure and clear contact will not work for you.

Therefore, in order to properly build contact, even in everyday life you must monitor the purity of your spiritual heart. Everyone now

take a sheet of paper and write down in any color the words that Jesus Christ said: “ The pure in heart will see God .” Hang this above where you eat and above where you sleep. So that after waking up your gaze falls on these words."

Christ said this in the Sermon on the Mount. A pure heart is a necessary element of contact with high vibrational entities. If you want to become not just a contactee, but a contactee who brings Light, not destruction, not darkness, but Light and creation, then follow the purity of your spiritual heart. This is the most valuable treasure you have in real life. Neither tons of gold, nor entire garages of cars, planes, yachts, nor entire harems of girls and boys can compare with it. This is the most valuable treasure you can accumulate for yourself in this life.

Timecode: 39:45, #169 Live. Angels and Archangels. Purity of the spiritual heart.

Archangel Michael is the guardian of the Christian egregor.

Archangel Gabriel (Mirah Count) is the guardian of the Christian egregor.

Practice of transferring sexual energy to higher aspects in other chakras

https://blog.cassiopeia.center/praktika-po-perevodu-seksualnoj-ehnergii

This practice will allow you to quickly transfer kundalini energy from the first and second energy centers to the sixth and seventh, to sharply intensify their work and thicken the buddhic and atmic fields of the

aura.

This exercise helps to reduce the intensity of sexual desire and direct its energy to awaken the latent abilities of the brain, heal its etheric matrices, enhance energetic vision and cleanse the spiritual channel for a clearer and faster connection with the higher self and all of its curators and mentors.

This practice can be done from the moment of puberty (in girls this is the appearance of the first menstruation, and in boys the appearance of the first wet dream) until old age.

It is not advisable to carry it out more than once every two lunar months.

Kundalini is the etheric force of the element of fire, which is found in all chakras and etheric matrices of internal organs. The manifestation of the reproductive instinct in the form of sexual desire directs most of the kundalini supply to the first and second chakras to energetically support the reproductive cells and activate hormonal processes.

As sexual arousal increases, initiated by sexual fantasies and/or impact on the erogenous receptors of the physical body, kundalini energy accumulates in Muladhara and Svadhisthana until it is quickly and consciously uncontrolled through all the chakras located along the spinal column, accompanied by a feeling of orgasm.

Based on this feature of kundalini, for its successful ascent to the higher chakras, the following conditions must be met:

1. It is recommended to carry out this practice on the waxing Moon, no less than seven days after the last orgasm, including the one that was in a dream, if you remember it.

2. If you have had more than three sexual partners in your life, it is very advisable to break etheric connections with them before this exercise (except for the partner with whom you are currently in a relationship) and regain your sexual energy.

3. The last drink of alcohol must be at least seven days before this practice. And 12 hours before it starts, you must refrain from taking

nicotine, caffeine and theobromine.

4. The most effective time of day for this exercise is the first 2 hours after sunrise in your area.

5. You should wear light clothing made from natural fabrics, of any light color.

6. There should be no metal jewelry or accessories on the body.

7. It is best to do this exercise on an empty stomach, but it is advisable to drink 200 ml of warm water with 1 drop of natural 100% peppermint essential oil before doing this.

Practice

You must be alone in the room. Remove all disturbing and irritating factors (bright light, noise, animals, flying insects, etc.).

Sit on a chair or on the floor in any comfortable position, with your back straight, without crossing your arms and legs, facing east. Light a white or yellow candle in front of you, anointed with 100% basil essential oil. It is better to hold your hands with your palms up.

Close your eyes and relax mentally and physically.

Take seven slow, deep breaths in and out, each time mentally imagining that you are inhaling a stream of white light and directing it to each chakra, from the first to the seventh. While exhaling, imagine this chakra in the form of a ball of the corresponding color, brightly shining, rotating clockwise.

Then it is necessary to cause the activation of kundalini in the first and second chakras by mentally imagining sexually significant objects. Fantasize about the most pleasant moments of sexual intercourse until you feel an increase in sexual arousal. Turn your attention to this sensation and mentally imagine that the energy of excitement turns into fire, burning in the perineum and lower abdomen. Do this until your sexual arousal subsides, replaced by a clear sensation of warmth

in the area of the first and second chakras.

After this, mentally imagine how the burning fire rises to the navel area and when you feel it there, mentally say

"BLACK"

Imagine that the fire in the third chakra is growing stronger with each inhalation and exhalation until you feel warmth in the navel area on a physical level.
Continue to raise the fire higher, into the fourth chakra, and when it appears there, say mentally

"RAM DAS"

and light the fire in the heart area until you feel warmth in the chest area.

Then mentally move the kundalini fire to the fifth chakra and say to yourself

"ALL"

Visualize the fire in the fifth chakra increasing until you feel warmth at the base of your neck.

Then focus your attention on the point in the center of your forehead and imagine that a white funnel has appeared there, drawing fire from the fifth chakra into itself.

With each inhalation, imagine a new surge of fire into the sixth chakra, until the white funnel turns into a fiery one. After this, mentally say:

"SAM"

and imagine how the fiery funnel flares up more and more until you feel warmth in the forehead.

Then move your attention to the top of your head and imagine that a huge cone-shaped funnel is spinning above it, going far up beyond your field of inner vision.

Create an image of how the rotation of this funnel absorbs fiery energy from the sixth chakra. As soon as the upper funnel begins to take on the color of the lower one, mentally say:

"HA THA"

Mentally increase the flow of fiery energy into the rotating funnel above your head until you feel warmth at the top of your head.

After raising the kundalini energy to the seventh energy center, there should be no trace of your sexual arousal. If you still feel it, it means that you were not focused enough on imagining the flow of energy. In this case, repeat this practice again, with greater concentration.

If sexual arousal has subsided and you feel warmth and lightness throughout your body, and joy in your soul, this indicates that you have consciously transferred the energy of the etheric force of the element of fire into the energy of Ojas, which is fourteen levels of density closer to the spiritual world than kundalini.
In this case, take three long breaths in and out, open your eyes and look at the candle in front of you.

Extend your hands towards the flame and, holding your palms over the candle, say the fire mantra out loud seven times:

"OM SHRI AGNI SURYA JAYA RAM"

After this, you can carefully get up and go about your business.

There is no need to extinguish the candle; it should burn to the end and go out on its own.

For more complete absorption of Ojas energy by your body, it is advisable after practice to lie on your back or side for at least 30 minutes, being completely relaxed. If the body wishes to make any movements, there is no need to restrain them; if a sound flow opens, it

must be allowed to manifest itself as it is.

If the urge arises to leave the physical body, you must do so without fear or doubt.

The process of rising and harmonizing kundalini occurs differently for all people. Remember that this is completely safe if you do not block the flow of etheric energy with fears, doubts and distrust of yourself and God.

Options for healing human body organs

https://blog.cassiopeia.center/varianty-isceleniya-organov-tela-cheloveka

On the planet Esler, contact with the Higher Self is used for spiritual perfection. This is taught to children from childhood and is called “conversation with your inner spiritual Light.” Each child is taught to find out the goals of incarnation, to communicate with the Higher Self every day, to find out to what extent he has completed his task. This is a spiritual practice.

There is a similar physical practice - filling yourself with the energy of space. There are various ways of self-healing through energy channels: contacts with plasmoid worlds; there is work with your etheric body, for example, representing the matrix of the organ, its restoration

through gratitude; There is healing with the energy of man by man, such as the practice of qigong.

Qigong healers fill their curator who comes to him with Light and energy. Most often these are plasmoid representatives; it is easier for them to transfer energy. Any cosmic Pleiadian or representative from the Reiki system who works outside of it. There are representatives of the Spiritual world, Angels, who fill them with their spiritual energy of Love.

To transfer energy correctly to a person, you need to approach him, direct the energy to his aura, placing your hands along the chakras or over the diseased organ. To maximize the effect of this influence, you need to not think about your problems at the moment of energy transfer, but you need to concentrate as much as possible on this organ where the energy is supplied. To do this, you need to know, at least elementary, human anatomy. The healer needs to imagine the organ and direct Light into it, smoothing out all the unevenness and roughness with the words:

I fill you with Light, I thank you for serving this person faithfully, I extend the life of all your cells.

Say everything in the flow in a positive form, without using the particle “not”. Time for such a session: fifteen to twenty minutes. This is enough to fill the etheric matrix of the organ. This will enhance cell metabolism and cleanse it of toxins.

What Jesus Teleportation Looks Like

https://blog.cassiopeia.center/kak-vyglyadit-teleportaciya-iisusa

Before I appear in a specific place on Earth, before dissolution, before transitioning into the form of radiation of my physical body, I must clearly imagine the place and time where I must move.

If I only imagine a place, but do it at the wrong time, then my body may be damaged there, for example, if a car is driving there, or I can simply merge with a person, and he will be thrown aside, because a certain energy is released.

You need to clearly know the place and space, imagine it, and only after imagining this place can I transfer my body into radiation and with a mental order move it to this place.

From the outside it will look like a flash of yellow-white color in the air, and then the appearance of a person in this place. What does this flash consist of? It was the surrounding atoms that released photons from that energy when they collided with the energy of my body, which was scattered in the form of radiation.

If necessary, I can stop the vital processes in my body for a really long period of time, but not for infinity, and this will require a waste of my energy.

How does the exorcism ritual take place?

https://blog.cassiopeia.center/kak-proiskhodit-obryad-ehkzorcizma

At the very rite of exorcism, which can last several hours, a prayer is read that calls on the Angel and calls on the special action of the Holy

Spirit. Very often, Archangel Michael is present in the form of many of his phantoms. At the spiritual level, the Guardian Angel of the possessed person, and Michael the Archangel, his phantoms, as well as other Angels (usually the 18th, 19th, 20th level of the Spiritual World according to the terminology of the Interstellar Union) and, in general, everyone who is in In the spiritual world, an Angel can come to these sessions and address the entities that are in a person (embodied in subtle bodies or not at all), they just address them with different messages.

If this demon is not incarnate, they make a call to come out, go to the Spiritual world and ask for incarnation, into their own body. If this is a low-vibration plasmoid, then the Angels turn to it during an exorcism session with a call to come out and take its place at its density level, and carry out its task of incarnation. Any plasmoid, no matter what level of density it is at, also has its own embodiment tasks, and they, too, may fail to fulfill them, becoming destructive. He is, of course, warned that if he does not complete his task, he will lower his level. For example, he himself will become an unincarnated demon, without a subtle body. He is warned of the consequences.

If it is a disembodied Spirit, it is also warned of the consequences. They say that while in this person, he loses the possibility of his incarnation in some body for this time and loses his turn for incarnation, they can go there without him. And he can remain for many hundreds, or even thousands of earthly years, without incarnation and the possibility of development. And this person in which he is located will still leave the incarnation when his term ends. They explain to him, tell him, offer him to leave. But they do this without violence against him. Violence is not used, because the demon or plasmoid that is there usually responds:

“I am here with the consent of the man himself. He gave his consent with such and such a feeling, with such passion. He knew perfectly well, or should have known, what this would lead to.”

These are the conversations that happen.

And due to the fact that this person does not want to change, which even the demons themselves can point out, this is how the Angels respond, because of this, not all exorcism sessions are as successful as they would like.

Recommendations and techniques on the path to Enlightenment

https://blog.cassiopeia.center/rekomendacii-i-tekhniki-na-puti-k-prosvetleniyu

First, you need to believe that achieving this state is quite simple. If a person doubts this and thinks that it is difficult, then he will push this state away from himself. Secondly, you need to relax your mind, trust, removing expectations of it. If you expect enlightenment, then miss it.

Third, here I would not recommend to anyone any long-term practices of contemplating something. More often than not, this is ineffective in your constantly moving and changing world. This only drives you into even greater conditioning by the manifestations of your mind - emotional outbursts that will take you away from this state.

Your state of perception of the material world, as shown to you by the senses, does not deceive your mind at all. They only show what they can show for the purpose of this mind. And the spiritual goal of the mind is multiple - not only spiritual, but also material. This is the goal, including that of the body in which the Soul (Spirit) settles. When the Spirit settles in the body, a mind is born that fulfills the desire of both.

Enlightenment is understanding the true power of the body and mind. From this, a person becomes more harmonious, happy, bright and gets rid of fears, condemnation, anger, slander. But not because they seem bad and a person fights with them, but because in the state of Light they are simply impossible. How impossible it is to go, for example, into the state of a small child and need the behavior that was necessary for him. We do not condemn a child for not being independent - he asks for food, may require hygienic care, because he is not able to do it, but a reasonable adult would not think of this, because he has already grown out of it. So is the state of the enlightened one.

"Meditation" is too general a name. There are many types of meditations. You know, for everyone, in fact, the method is individual. I will now make some general recommendations. But if you want to achieve success, then you must match these recommendations with your inner Self (Higher Self) with all the attitude, feeling and belief that you have. Because maybe this won't suit you, but something of yours will.

First, turn any of your actions in the material world into meditation. How to do it? When you do something, do not think about something extraneous, about what is not related to this action. This prevents you from doing that activity effectively and from thinking effectively about what you are thinking about. You simply dissipate your strength. Enlightenment requires quite a lot of energy. And you need to concentrate this energy in your mind so that the thousand-petalled lotus called "sahasrara" opens completely.

Of course, there are special practices. By the way, they are not at all mandatory, but only help this process. But I recommend performing any of your actions as if it were the first and last time in your life. Be it what you do at your job or what you do at home. Concentrate your energy completely on this action. And you will see that this is not so easy to do. Your mind, like a naughty child, will try to escape to the images you have created in your mental world. No need to get annoyed with him. Just calmly return your mind, your mind to this subject. Gradually this will become a habit for you, and you will not be able to work differently. Don't start this with all the activities at once. This will be difficult for a person accustomed to absent-minded thinking. Do it with something you love first. Then gradually extend this habit to other activities.

This is truly the art of staying here and now . And the last stage of this skill is to remain here and now not during the action, but during, for example, a certain period of time, replacing these actions. That is, if you are just walking down the street, concentrating on your steps, the feeling of breathing, etc.

A sign of success in this practice is that you gradually begin to feel that there is a living space around you. A little further you will begin to feel that you are part of this space. That you are not just walking on the ground, but that your consciousness is moving among space filled with different forms. And these forms are part of the energy that

comes out of your consciousness.

As soon as you feel this, it is already a sign that you are a very small step away from Buddhahood. And don't rush to be happy about it or be upset if it doesn't happen. Your emotions should be even.

Practice for calming emotions from MidgasCaus

https://blog.cassiopeia.center/praktika-po-uspokoeniyu-ehmocij-ot-midgaskausa

In parallel with the fact that you will be aware of yourself at every moment of time, it is still very good, not so much to calm down, but more to observe your emotions. Calming and harmonizing emotions is impossible without observation.

Keep yourself an emotional diary and write down any emotion there - "positive" and "negative", as you call them. There is no need to fight them. There is no need to reject them in any way. Just imagine that any emotion is energy that passes through your body and fills the space. This way you will prevent the creation of blocks in your aura. Write down the emotion so as not to forget it, and always the reason

that caused it.

For example, today, the 22nd of such and such a month at 15:00, I was outraged that my wife told me such and such. This annoyed me. I became angry. Why? Because I don't think she should have told me that. Because she shouldn't be like that. And write: “Why?” And do this for at least 21 days every day. Keep all these records and not show them to anyone. This should be a diary in which you will be very frank - you will not hide anything, otherwise there will be no effect. But after 21 days, take it and read it (it is not recommended to read it for 21 days). And you will see - it will be quite interesting. And you will learn a lot about yourself.

First, you will see situations repeating themselves. And your emotions are also repeated. You will see the reasons behind these emotions. And the very practice of observation and analysis will reduce the so-called “emotional involvement of the mind” or “mental involvement in emotion” - this is one and the same phenomenon. Hooking on a certain emotion with the goal of allowing this energy to completely exhaust itself. And if you don’t specifically work with this, then these clues then create such a quality of thinking as “rigidity” - that’s what we call it in psychology. It is a certain quality of mind that clings to one pattern. Then, accepting this completely as the truth, when encountering another person or another idea that does not correspond to this truth, a defensive reaction will be triggered. This happens even in very spiritual people, close to enlightenment, but who have not worked with emotions in this way.

Turn everyday action into meditation, develop a feeling of unconditional love - it raises your vibration. Love develops through forgiveness of insults, compassion, sympathy for the weak, helping these weak people, through the development of Self-Love (that is, accepting oneself and filling with Light) and, in general, doing good deeds.

All the practices that are given by “Cassiopeia” will contribute to a state of harmony with oneself. Based on these high vibrations, the concentration practice given by Ptaah will produce results. You will achieve enlightenment at a moment when you do not expect it. You just won't wait for him. But when you reach it, you will immediately understand that it has happened. The more you wait for it, the further you will push it away.

It cannot be confused with anything, because the first thing that appears is a feeling of boundless joy, as you call it - “Ananda” (ed. Ananda literally means bliss or happiness. In the Hindu Vedas, Upanishads and Bhagavad Gita - eternal bliss that accompanies the end of the cycle of rebirth).

And the second is a feeling of such unconditional Love, without which (you understand that the whole Universe is filled with it) not a single person, not a single animal, not a single blade of grass can live a single moment. This is a feeling, sensation, thought – at the same time, a state of Consciousness. What is written here are just words. It is like a pale reflection of the truth that will be. But it will be directly in your consciousness. And understanding this will bring you a sense of immortality and the importance of your existence in the Universe, which will give you confidence in your life, in your goals. And at the same time, no negative emotion, no manifestation and condemnation of these manifestations in others will be possible.

Water cleansing practice

https://blog.cassiopeia.center/praktika-ochishcheniya-vodoj

Water is the source of life. In addition, it is a source of purification, because water washes away physical, chemical, and energy pollution from a person.

If you feel that you are overwhelmed with negative energy, you are in a bad mood, then you can stand under the pressure of water so that it

flows down your head, along the back of your head and along the spine where the chakras are located. Stay like this for a couple of minutes. The water should be at a comfortable temperature for your body, this is individual. There should be a fairly strong pressure of water, which hits a point just above the back of the head, flowing down.

If you stand for 2-3 minutes, you will feel renewed because the “pollution” has been washed away from your etheric field. Even without detergents. If you read a prayer or mantra at the same time, the effect will intensify.

The practice of shifting the “assemblage point”

https://blog.cassiopeia.center/praktika-smeshcheniya-tochki-sborki

The “assemblage point” is perception. Some plasmoids see the world differently than humanoids. Plasmoids see a person and his biofield in the shape of a ball or an elongated oval, depending on the strength of the energy. They see the most active chakra, where the Spirit’s attention is directed, as a brighter point on this ball, which moves along the surface.

It usually comes in a darker color for them. The more attention is focused, the larger the stain may be. Why is it called the "assemblage point"? Because the word “assembly” means the assembly of attention. In this case, this is where the energy of the mind is concentrated. This is how plasmoids are seen, it is just a ball for them, without distinguishing from the back or the front.

Shifting the “assembly point” helped the plasmoids come into contact. If they raised it higher, pulled it to the area of the sixth and seventh

chakras, they could send, so to speak, a ray to this point and then begin to transmit information, without even removing the human Spirit from the body. It happened that from a very rapid shift of this point, that is, if energies were applied to the cocoon, then from the point of view of plasmoids, this attention, this point, moved, and from the point of view of humanoids, human vibrations increased. Different words describe the same process.

They saw that the point moved upward, to about the top of the head, and they were able to make contact. But if it moved very quickly, the person felt such a flow of energy that he was carried upward, he simply flew out of the body and found himself in the astral world. Very often with those plasmoids in their world that brought him out.

There is such a method of inference, but it is only good for trained people in the sense that they themselves must be astral travelers. And if this is done to someone who does not know how to do it himself, his astral body can be very seriously damaged, and he can then get sick. He may acquire mental abnormalities and forms of contact such as hallucinations. Or in general, a person under some kind of stress, under some kind of physical exertion may lose consciousness, his astral body will simply fly out. This can damage the astral body, but if you bring out a person who already knows how to do this, nothing will happen to him.

Practice

You need to direct attention, create an image. Remember that energy always follows thought. To control any energies, it is necessary to direct this thought so that the energy can follow it. The easiest way to do this is with the help of mental images.

In this way, for example, you can receive a message from the Higher Self.

Imagine that you are walking, clenching your right hand into a fist as if you were holding a torch.

What does the torch feel like? Is it burning with a bright flame?

By answering these questions, you are already moving your assemblage point. You begin to switch your attention to the Spiritual world. Because when you create an image with your eyes closed, you are distracted from the perception of the material world that comes through your eyes.

Further, in order to strengthen this deviation of the “assemblage point” from the midline in which it is used to being on the leading chakra, you imagine that you are not just holding it, and other images appear, but that you, for example, are walking with this torch through the cave. Imagine what the walls are like, what color they are.

Imagine that you are shining a torch on the walls. Notice how uneven they are. And now imagine that you are inhaling air. What does it smell like there?

Next, slowly, with your eyes closed, mentally - there is no need to physically strain - together with this torch, turn to the right, to the left, if you are holding it in your left hand, turn to the left and dedicate the torch to the nearest wall. There you will see an inscription - a message from the Higher Self. Read it.

What you read, you did not create yourself. This Higher Self answered you.

Tell:

“I'm glad to see a message from you!” and “Thank you!”

It is important to thank and love yourself.

Practice for the summer solstice “Communication with the Sun”

https://blog.cassiopeia.center/praktika-na-letnee-solncestoyanie-obshchenie-s-sol

The summer solstice (June 21, 2023) is more favorable for this practice than other days of the year. You can do it in the morning. The energy of sunlight and the presence of solar plasmoids in the space of the Earth on this day are maximum. Their collective name is Ra, of many civilizations of different density levels.

No later than two hours after sunrise according to your calendar, the time of your time zone, you must wake up and take a standing position so that the Sun is visible. You can go outside, or near the window if it faces east.

If you are near a window, open it, at least a window, so that fresh air and with it the energy of sunlight can come in. Not through glass, but directly to you.

You need to stand in front of the Sun and close your eyes. Place your hands so that they are at right angles. Palms to the sky. This is a sign of greeting to the Sun, all its plasmoid civilizations, and a sign of request for the exchange of energies.

Then close your eyes and say it mentally or out loud, depending on the situation and your desire. You can speak in your own words, you don’t need to repeat it exactly, but the meaning should be like this:

"I salute you, Sun."

Treat yourself as if you were a living creature, because it will hear you over the beam, all its civilizations.

“I, you can say your name, thank you, Sun, the great star, the luminary of the entire solar system, for the fact that you give light, life to the Earth and all the planets. For giving us the opportunity to incarnate on Earth and learn our lessons. I send you the Light of my Love in response to your light that you give for my life.”

Just stand and focus on the sensations in the center of your palms, where mini-chakras are located. You will feel an influx of energy. Be sure to take a breath with the intention of accepting this energy into yourself. This inhalation with the intention of accepting the energy of the Sun will be your consent to the exchange.

Breathe this energy into yourself. Watch how it spreads throughout the body, watch how it goes down. Let it go to the soles of your feet, go into the ground or into the surface on which you are standing.

Do this three or four times. Each time this exchange will be felt more. With each wave of energy say:

“I thank and accept, I love and bless.”

You can speak in a whisper, or mentally. You can do it out loud. It does not matter.

“I promise to use this energy to develop unconditional Love. Dear sun, I give you the Light of my Soul in return.”

Mentally imagine how a stream flows from your heart towards the Sun.

If you do everything correctly, you will feel like a part of this Light, one of the rays. Stay in this state for as long as you feel comfortable.

Even if you forget about the time, it's okay, it's normal.

This was a practice for those living outside the Arctic Circle.

Polar day. What should those for whom the

Sun does not rise, but is always in the sky, do?

If the sun is always in the sky, you can do this at any time. But it's better when you wake up.

So you woke up, filled with energy on an astral journey, your body was renewed during this time with its physical energy, cleansed of toxins.

If you are in a place where the Sun is constantly shining, then come up as people do in the morning and do it at the time you wake up.

It is advisable to do this without eating anything or taking water procedures. That is, first of all, and then mind your own business.

At the end of this exchange, when you feel it is complete, thank your Higher Self. Say:

“Higher Self, I thank you for helping me in this contact with the Sun. Sun, I thank you for this contact, for the exchange of energies. I love you".

Open your eyes and go about your business. You will see that Light emanates from your actions, from your hands, on an invisible spiritual level. And everything turns out faster, more correctly and more harmoniously than before.

Technique for protection against negativity

https://blog.cassiopeia.center/tekhnika-zashchity-ot-negativa

The main condition for a successful defense is trust in God. Trusting yourself as a part of God, believing in yourself. The reason you are defending yourself is to improve the quality of your incarnation, so that you can spend less energy in the future. In general, the word defense itself is not entirely appropriate here. We usually use the word “prevention”. You, for example, take some measures in the cold when you put on warm clothes before going out into the cold, but you do this not so much out of fear of frost, but so that you feel comfortable. These are the preventive measures that we use in order to pass this incarnation efficiently. So what can we do?

There are people who do not feel any danger, they do not have dangerous images in their heads, especially those who have strong self-confidence, they do not feel any attacks, this turns on an automatic “defense”. If you feel that you need protection, that you are weakened, if self-confidence is weak, then you need to pay attention to this and create a special image that will help you.

Sit in a meditation pose, preferably after you wake up, and read the mood of the planet Burhad. If you have the ability to create mental images, this will help raise your vibrations.

Imagine a white ball - the image of your spiritual heart. And then you begin to direct the energies with inhalation and exhalation. Imagine that as you inhale, the ball expands, and as you exhale, it begins to shine brighter, as you do when forming a light body . Only your goal will not be further flight when the light goes beyond the physical, but imagine that the ball is perfectly round, like a sphere, shining with bright white light. This sphere covers your entire body from all sides. Its outer edge is below the legs, above the head and at a distance of about two meters from the surface of your body on all sides. And

imagine that this ball is rotating in any direction convenient for you. Not important.

Then pay attention to its top and imagine that a stream of energy flows into this ball, like a waterfall falling from above, that flows down it, not like drops, but strengthens it, that this stream comes from the Spiritual world. It will probably be easier for you to feel this than is now explained. But in any case, you will feel how this flow flows through the ball and strengthens it with every inhalation and exhalation. Then tell yourself that this protection will remain with you , for example, for a day. And thank your Higher Self for the energies. This ball will actually be created. And nothing will pass through it that is contrary to your vibrations. Why is such protection needed if it doesn't work? Precisely in order to believe in it and not miss anything.

Sergius of Radonezh about communicating with fish. Harmonious fishing

https://blog.cassiopeia.center/sergij-radonezhskij-ob-obshchenii-s-rybami-garmoni

All you need for this is your belief that there is a Soul in every living creation, and that you can communicate with this Soul at a distance. When I was incarnated 300 years after the creation of people, everyone knew it as two and two are four. You don't believe it, but you know it. But you don't know things that are more important for your survival. For example, how to communicate with the animal world. And then they didn't know the multiplication table, but they knew the things necessary in nature.

So, you need to believe at the level of knowledge that every living creature, and therefore a fish, has a Soul that will definitely hear you. This is the first condition. The second condition: you must be able to concentrate your thoughts in a stream of mental images, to imagine.

When you come to the shore of the reservoir, close your eyes and try to feel the space with your Soul, with your heart. That space that is hidden in the depths of water. Try scanning the surface of the water with your heart. Turn to your consciousness, to God, to your Higher Self with a request to give you spiritual energy for spiritual vision and concentration. It could be like a prayer. Be sure to mentally contact the subtle-material guardian of the reservoir so that he allows you, for example, to catch a fish, and immediately tell him for what purpose. If you don't do this, but simply send a mental order to your brother, which is more like a hypnotic suggestion, it will be like a flash in the Astral, and the keeper of this reservoir will also hear. If the keeper does not agree, he will simply cancel it, or he may even invent intrigues against you, depending on what his character is.

Therefore, first, we turn with prayer to God, with greetings to the Spirit of the reservoir. Thank him for observing and creating this space, filling it with his energies. Ask him to help you catch fish, tell him for what purposes: for food, for yourself or other people, for example. This goal is quite suitable. Your Soul must be pure, that is, you must not be a predator, you must be human. You should not take too many fish, which will harm the ecological system of this reservoir. And only in this case will you feel in your mind that the Spirit of the reservoir has heard you. After this, imagine the type of fish that you want to catch, and which is definitely found in this body of water. You can imagine several. With your eyes closed, imagine a certain place in this body of water where you will cast your net, that there is a lot of food there. It is advisable that they want to sail there because you speak their language. Don't just say "come here," but speak their language. They will perceive your signal and, under hypnotic suggestion, will swim there.

Stages of forgiving a criminal

https://blog.cassiopeia.center/ehtapy-proshcheniya-prestupnika

If you want to forgive another, you must first understand him. The first stage of forgiveness is acceptance. But acceptance is accompanied first by understanding the other person. Until you understand what motivated him when he did this, you will not be able to accept his right to do this. And if you cannot accept his right to kill and lower your vibration, you will not be able to forgive him. You will continue to say that he had no right to do this, he is bad, he is evil, he must be punished, he must be destroyed. You will have hatred, revenge, anger - all these negative qualities that will lower your vibrations.

First, it is necessary, of course, to send Light to the Soul of the murdered person. It works very well to talk to the Soul of the murdered person, sending him the Light of Love with the following words addressed to the Soul of the murdered person:

"I ask you to forgive your murderer"

- that is, ask the Soul first, it is in the Spiritual world, and it may also be perplexed as to why its incarnation was interrupted.

In the Spiritual world we still have emotions, we have feelings, they go away with us. And, once we have said this, we can talk to our Higher Self, ask:

“Why do we need to go through this experience? Why are we in this situation? What is the spiritual reason?

- and imagine this person, if you know him, of course, who killed your child or your friend, or relative, if you know his name. If you don’t know, just imagine the image of a person, addressing him “Divine Spirit.”

In fact, all Spirits are divine. Even those who have fallen in vibration

have committed some kind of crime - he does not lose his divine nature, he can always return to it, that is, return to the state of Light. And you must first put yourself in his place, ask yourself why he did it, what motives he was guided by.

It is very important to understand here that understanding the motives of the criminal is in no way a justification for his actions . Here it is necessary to distinguish two things: when you understand and when you justify killing him precisely because he had to do it.

No, he did this not because he directly needed to kill, but because simply in his paradigm of reality, this was the way out.

You understand this, and you accept his right to do such an act. Why do you accept the right? Because the right to go against the laws of life, the laws of God, was given by God himself.

If you do not accept this right from another person, it means that you do not love God, who endowed other Spirits with these rights. Once you have accepted this:

“Yes, he had the right, he acted badly, he is a criminal!”

It is imperative to call a spade a spade. It’s not that “he’s not guilty of anything, but his sacrifice brought him to this point” - that would also be wrong to say, because it introduces distortions in the understanding of God’s law “Thou shalt not kill.”

But he has already done it, this act cannot be done differently in time ago, he has already done it. Now this must be accepted as a fact.

Next, mentally imagine the killer and say the name or call him “Divine Spirit” if you don’t know the name -

“I forgive you for murder, for cruelty, for aggression. I understand that you did this (be sure to say that you understand) because of the lack of Love in your heart.”

As you understand, a person who is filled with Love will not kill because of some selfish motives, because of some kind of personal revenge.

“And I send you the Light of my Love, so that you will be truly happy, so that you will know God, and so that you will become a bright Divine being.”

Here we simply send him Light. We understand that he lacks this Light, and if he does not acquire it, he will remain at the same level of consciousness, this killer. That is, this will contribute to his further similar behavior.

But we send him Light. If he doesn't accept it, we simply send Light to him. And whether to accept it or not is his choice. But I want to say that this contact is real, that is, when we direct the Light to his image, it is directed to the Higher Self of this person who killed. And how he will already suggest the way out of the low vibrations of his embodied part - this is already the choice of this Spirit.

We have forgiven, let go, sent the Light of Love and have already dissolved this hatred, anger, anger. We directed our life force to creation, to Love.

For what reason is it necessary to dissolve hatred and anger?

If the murder has already happened, our hatred for the murderer - it will not help neither the Soul of the murdered, nor the Soul of the murderer to become different, nor you yourself - it is simply destructive, which will further spin this wheel of karma.

Features and effectiveness of breathing practices. Practice "Contemplation"

https://blog.cassiopeia.center/osobennosti-i-ehffektivnost-dyhatelnyh-praktik-pra

Very good Gutz breathing practice. It is based on the activation of energy centers, filling all energy fields of the aura with spiritual Light, plus concentration on your energy, on your body.

The optimal time to complete it is no more than 45 minutes, if possible, because this will be more accessible to the majority. For many people I have met, not everyone can afford to spend an hour and a half sitting in a certain position and breathing, in the world in which you live, in your reality.

For practitioners who are seriously engaged in development in this particular practice, in this ideology, this is already the optimal option for those who have just arrived; they can be reduced to definitely softer indicators.

Children can also do breathing practice from the age of seven or eight. But until the age of 14, their practice should not exceed 20-30 minutes, and then gradually, after 14 years, bring it into line with adults. Don't give him this watch right away. He will simply be disappointed; the nervous system of children is structured differently. Teenagers have a hormonal cocktail in their blood, which encourages them to move a lot, so it is necessary to take into account the psychophysiological characteristics of people’s age and, in accordance with this, give practice. It is indicated for both children and adults; there are absolutely no contraindications. Only everything should be as desired.

The person must be in a state of sober consciousness, without mind-altering substances that impair control and give unpredictable consequences, especially for a person who is not experienced in communicating with subtle entities. Also, at this moment, a person should not have any acute pain or fever, which also affects his consciousness. Breathing practice, especially long-term, at this moment can contribute to the deterioration of the condition, because

there will be an exacerbation. This is about practice.

As for its effectiveness. Yes, it is quite effective for clearing energy centers of blocks and for accessing the Higher Self. When you say that he has flown away to a certain state, to the Creator, we call this dissolution in the inner Light, there is a connection with the Higher Self. The Higher Self is and there is a part of the Creator. If everything is done correctly, then, when you come out, you can even ask questions to the Higher Self.

When you reach this state, you first need to greet your Higher Self. Say:

"Greetings, my Higher Self"

- you can mentally ask the most important question that worries a person. The answer will come mentally, through the spiritual channel. I definitely need to thank you for the answer.

The affirmations that you pronounce are tuning yourself to high vibrations, to pure high vibrations through words. A word is a certain sound plus a thought form.

Each person has an individual breathing rhythm, which is regulated by the medulla oblongata depending on the content of oxygen, carbon dioxide, blood acidity, and many indicators in the blood. It also depends on body weight, on such an indicator as blood hematocrit (blood thickness), for example, and the content of various substances in the blood. This is about physical indicators.

Breathing also depends on the state of the Soul, the state of the psyche, so for some it will be comfortable to hold their breath for a certain time, but for others it will not. This is an individual question. For some, 5 seconds will seem enough, for others, 15 seconds, for others, 7. Of course, as a teacher, as a lecturer, willy-nilly or not, adapting to the audience, you were guided by something in between, probably for adult earthlings around 7 seconds.

There may be a feeling of an increase in the etheric field and its merging with the surrounding etheric fields, and a feeling of being in the shape of a ball may appear. It's quite normal. A similar state can

be felt when standing, for example, on the bank of a river and looking at nature. You breathe normally, but you just concentrate, this is called contemplation. You contemplate nature and you have the feeling that you are one with it. Similar conditions. This is a completely normal feeling for people.

Only people are not used to concentrating their thoughts for a long time on the world around them, on its features, on their breathing. People are more busy with their own affairs, problems, certain miscalculations of their future, and planning.

Practice "Contemplation"

In order to feel all this, you need to relax, be alone with yourself, be alone with nature, try to listen to the rhythm of your natural breathing, let it go, listen from the outside just to the sounds of your own body breathing.

What does it mean? You just close your eyes, relax and just allow your body to breathe at its own rhythm, and notice to yourself when it inhales and when it exhales. Trying to dissolve in this breath means letting go of all thoughts and consciously concentrating on the sensations that change when the air enters and leaves you.

Every person can do this. If people didn't feel all this, it was only because you were concentrating on something else, on your thoughts. Some people live more in the past, remembering the past. It's good if these are happy moments from the past, thereby raising their vibrations, but it happens that they concentrate on negative moments, thereby lowering their vibrations. Someone lives in the future, building dreams, imagining themselves in fantasies.

Someone lives in dreams that we call impossible, they just came up with something and are in this state. After all, this is a certain thought form that requires constant maintenance. And you will return to the present at least for one hour a day, to the present moment. Feel the breath of space and synchronize the rhythm of your breathing with the rhythm of space, and you will feel like a particle of this huge Universe, among which the Earth is only a small ball, and you will feel your consciousness as a flow of the infinite Spirit, which manifests

itself in all people and in all aliens in a special way.

Method of forgiving an offender

https://blog.cassiopeia.center/metodika-proshcheniya-obidchika

If a person said: “I forgive, leave me, I have forgiven everything,” this is not forgiveness. The process must be conscious.

Firstly, in order to help a person forgive, he needs to explain all the consequences of his offense: that he will accumulate a block, that this block will destroy him. To destroy not the one with whom he is offended (he has his own physical body), but the person himself. So ask:

Are you ready, for the sake of this resentment, for the sake of anger, to slowly undermine the health of your body, to destroy it?

Do not scare him that this will definitely cause some kind of illness, but tell him that this may cause some kind of illness and waste of energy. This is just a warning. Resentment is also energy.

“If you get rid of grievances, then you can use this energy that is freed for creation, for building your life.”

After this, if he says: “Yes, I want to, but I can’t,” then say so:

“To forgive him, you must first accept him. Forgiveness is an action of Love. How can you love him if you are offended by him?”

First you need to accept. And in order to accept, you first need to understand the reasons why this person acts this way. Some people understand that you need to justify him in order to take his side. No, that's not an excuse. Just mentally put yourself in his place and try to understand why he did this. Don't justify it, but understand it.

How to do it? We did forgiveness techniques without direct contact with the Higher Self, it was unconscious. And it happens that a person simply works with resentment. For example, he will say:

“Yes, I want to forgive, but I just can’t accept it. He had no right to do this to me.”

We ask the person to relax, close his eyes, and imagine the person with whom he is offended. It is very important to know whether this person is still alive or not. If the person with whom you are offended has already left for the world of Spirits, then it is imperative to ask the Higher Self whether there is a necrotic attachment to the Spirit of this person.

Necrotic attachments very quickly drain a person’s energy and vitality. If there is an exchange with plasmoids (even destructive ones), they have life force, and the Spirit of the Dead loses life force after 40 days. He won't be able to share anything with you. This also delays its development. Because he, receiving energy from you, constantly remembers you, about your conflict situation. This prevents him from focusing on finding other tasks.

In addition to energy depletion and illness, there is also karmic responsibility for a delay in the development of the Spirit.

Therefore, it is necessary to ask the Higher Self if this person, the offender, has died:

“Is there a necrotic connection with this Spirit?”

If the answer is “yes,” then you need to work with the energy connection first. You need to call this Spirit, just call him in your own words and talk to him.

If he is alive, or there is no connection, then we simply present him. You definitely need to present it. Because if he is in embodiment, then this contact is real, and we will work on a spiritual level with the Higher Self of the offender.

If he died, accordingly, with himself. We ask him to come if he has died. If he is alive, we simply ask for your introduction. A phantom will immediately come to this performance, it will be sent by the Higher Self. We can work in this case without the consent and even without the person’s knowledge, because this is aimed at forgiveness, at untying these karmic knots.

This can be done without the person's consent and knowledge. Even if he is offended by you and has not forgiven you, this is his business, these are his lessons, his work. But, most importantly, you can do it yourself. You can ask the person to introduce him and call him by name. For example, if this is mom, dad, grandfather, grandmother, then you need to address them that way. If these are children, husband, wife or other people, we usually address them by name. Let the person say a name out loud (for example, Kolya) and have him repeat: “I forgive you!” And he specifically says for what: for cruelty, for aggression, betrayal, adultery, theft, etc. For some specific actions that he did.

At the end, when he feels that he has said everything, it is advisable for him to say on his own why he forgives him. This will bring greater effect. And for him to say:

“I understand that you did this because of the lack of Love in your heart.”

Here is the understanding that he did this because he did not have Love, and could not act differently at that moment. Without Love, we can all be very cruel, including you. Justice without Love makes a person cruel, faith without Love makes a person a fanatic, etc. Every good quality without Love turns into its opposite.

“I send you the Light of my Love (so that the offended person repeats

this) so that you are truly happy, so that you know God and become a bright divine being.”

And let him mentally send Light to him, like the sun, direct a ray to him. And ask: does the offender accept the Light? If he accepts, then everything is in order, let the offended one fill him with Light. If the offender closes down, runs away, or does not want to accept, then we ask the person to repeat:

“Don’t be afraid, accept my Light, it is absolutely safe for you, it will make you truly happy,”

- and we continue to fill it.

Then we ask the person how he feels. And when he talks about his feelings, let him say:

“I apologize to my body for creating this block. I forgive myself for this offense. I love and accept myself for who I am. I am the beloved daughter of God (or, if it is a man, then the beloved son of God).”

And then let him repeat this form of transformation:

“With the power of my Spirit, I transform the energies of this resentment into the energy of confidence, Love and inspiration!”

You can name any three energies: confidence, happiness and Love. But one of them must be Love . And the other two should be any positive qualities, any positive feelings. After this, you can ask him how he feels. He will feel the rush. This is an order for energy to transform when a person has already forgiven.

Some see the Light, some feel goosebumps, warmth or something else. It's all right. Everyone perceives it differently. You tell the person:

“Breathe this energy into yourself!”

When he inhales, he receives and distributes it throughout the body. Let him say out loud:

“I thank and accept, love and bless! I promise to use this energy to develop unconditional Love!”

This will complete the forgiveness process.

Elixir of Youth from Saint Germain

https://blog.cassiopeia.center/ehliksir-molodosti-ot-sen-zhermena

Youth is a state of the Soul. In fact, it is quite independent of the physical body. A person of any age can have this state of Soul. This is not a state of the physical body, because in youth it is, first of all, optimism, the desire to explore the world and create, and create the right divine wise things in it. This is the youth of the Soul.

When a person feels that he has already known everything in this world, he is not interested in anything - this is old age, aging. Such a person gives a signal to the Higher Self that he can leave the incarnation. On a subconscious level, a person who is despondent, depressed, gives a signal to his Higher Self: “I don’t like it here, take me to the Spiritual world.” This is aging.

Physical aging is a necessary physiological process in order for a person to review his entire life during the last years or decades of

incarnation on Earth, analyze, dissolve all blocks, make peace with all people, one might say, pay off all his moral, energetic and karmic debts and come to a state of high vibrations, and in this state he left the incarnation. A young, healthy, beautiful body can greatly distract the Spirit from performing its tasks.

A young, beautiful, physically healthy body often evokes the admiration of others. Admiration is a form of love. In this case, love will be shown for the body, not for actions, thoughts, but for the body, its structure, its beauty, its perfect forms. Often such admiration is calmed by love. She reassures a person that this is enough, and he strives to preserve this beauty for as long as possible, fearing to lose the love of the people around him.

Such a person often does not pay attention to the spiritual components in himself, because he is accustomed to the fact that in the world around him they pay attention only to his body, home, car, and financial component. And in order to earn and maintain all this, you need a healthy body.

Therefore, in old age, a person begins to get sick, his body weakens, and it is not his beauty that is lost, but his external attractiveness to others. Attractiveness and beauty are slightly different concepts. His sexual function gradually fades away so that he can direct his energy to the seventh chakra. It's not just a matter of energy loss. Sexual desire is always involved in some kind of relationship between a man and a woman. Relationships are always filled with emotions. Emotions require time, their living, analysis. Relationships themselves take time.

If there are several decades left before leaving the incarnation, then the body’s time cannot be wasted on this. The Divine law that creates these bodies provides for the aging of the physical body - this is the first point. The second point is that people often ask why the reproductive function stops or is weakened, because the laws of God, which are manifested in the laws of nature and the body, provide that the cessation of conception and birth protects children who could be born to elderly parents from being left alone at a young age. If an elderly parent, dad or mom, leaves incarnation, they may be left alone before they reach adulthood, which will reduce their ability to survive and adapt. This is the law of nature.

How to get on the spiritual path of development? Self love

The human spirit can be more attuned either to the wave of the physical world or to the wave of the Spiritual world. If a person is more attuned to the wave of the physical body, he feels like a body, is included in these events, he considers himself a physically person who lives according to the laws of the material world.

If a person is more attuned to the Spiritual world, feels his Soul and follows its advice, he follows the spiritual path of development. Each of you, dear reader, can follow the spiritual path, become loving, for this you just have to really want to do it.

Wanting is not that easy. You need to interrupt, stop the inertia of materialistic consciousness, which whispers to you that everything is in order and you shouldn't change your life for the sake of some philosophical unverifiable judgments. There is such a voice of doubt in almost all of you. It is not so easy for many people to overcome the inertia of their thinking and enter the spiritual path of development.

How to do it? Dedicate at least 20-30 minutes a day to yourself and your spiritual development. Just sit in silence, tune into your spiritual channel. Sit and talk to yourself. Ask yourself, what did I do on this high vibrational day? What high vibrations did I bring into the world, what low vibrations did I bring? Why? Do some simple self-analysis. Direct your attention to the top of your head, tune in to the feeling of the channel. Feel what you feel there, say: "I am!"

Listen, where are you essence? Who is speaking? And feel like a channel that goes up. Then look up and say:

"Divine Light, I want to communicate with you. Answer my questions: who am I? Where am I going? Am I doing the right thing? Am I fulfilling my purpose?

Do this every day. The main thing is not to dream about it, but to actually do it. If you don't feel anything, this does not mean that it does not exist. Give this at least 14 days. Dedicate two weeks of daily exercises, 30 minutes a day, to your Spirit, from those 24 hours that

are allotted to you for life on Earth, per day. Give at least 30 minutes to yourself in the Spiritual world.

I'm talking about the necessary free time that a person should devote to himself, including for the development of his success in this world, for the development and strengthening of health, efficiency, and optimism. I repeat to you that the optimistic attitude that you will have after communicating with the Light will greatly increase your energetic life potential, allow you to achieve your goals and greatly reduce the amount of your check from the pharmacy.

The incidence of illness will decrease, because the cause of any disease: inflammatory, heart, brain, gastrointestinal - is, first of all, a lack of love. And if you do not have, dear friends, love for yourself, then you are not able to either love another or feel the love of others. Everywhere you will feel only dullness, irritation, despondency and hopeless melancholy. Look for the Light only within yourself. It's not difficult at all. You just have to take a step towards God, and He will take 10 steps towards you.

When you find this Light within yourself, you will become a source for everyone.

Practice from Ganesha "Cup of abundance"

https://blog.cassiopeia.center/praktika-ot-ganeshi-chasha-izobiliya

Close your eyes, relax. Pay attention to your breathing. Ask the Higher Self to help you in this practice, ask the curators, the Angels to be near you. Just watch your body as it breathes. Make sure your body is relaxed and in a comfortable position.

Mentally imagine that you are standing in a clearing, field, or some open space. You see in front of you a house or other room in which you would like to live. Imagine the house of your Soul as it looks from the outside. For some it will be a small hut, for others it will be a huge palace. The main thing is that you feel comfortable there, so that your Soul occupies all the space there. So that she feels that every detail of this space is dear and close to her.

This house actually exists in the Spiritual World. You built it, and you lived in it while you were waiting for this incarnation.

Now we will go there. Can you imagine what the door to this house looks like? Mentally imagine yourself approaching the door. Slowly grab the handle and open it.

Look: the first thing you see inside the house is a large, bright space. Mentally imagine how you take a step there, and all the sounds and images of the material world are relegated to the background. You are in the house of your Soul. The situation there may be different. But you know for sure that when you look at an object, it is familiar to you. You've seen it thousands of times, but you don't remember where or when. Look around.

Now look at the middle of the room. All actions in the Spiritual world are performed with the help of visualization. Mentally imagine a table in the middle of the room. On which stands - in the middle of the table - a large bowl. It may look like the Holy Grail or a simple cup from which you eat your daily lunch. It doesn't matter. Imagine the vessel that will represent for you the Cup of Plenty. Picture it in your imagination. Imagine that there is only a Cup on this table.

Now mentally address Ganesha with these words:

“Ganesha, embodied Spirit in the subtle world of Light, which is

located at the core of our Galaxy, I turn to your Spirit. I thank you for this practice. I send you the Light of my Love. I ask you to strengthen the energy of my desires and help me realize them in my world. For my spiritual evolution and helping others."

Now that you have addressed it, look ahead. He may appear in different guises. Greet him. He is ready to help you. He can split into dozens of phantoms to be with every person who does this practice. Greet him in your own words. Mentally direct the Light of Love towards him. Look how he rejoices and sends Light back to you! As soon as he sent you the Light, you received a blessing to replenish the Cup of abundance with your desires.

Tell:

"Thank you and I accept. Love and blessings. I promise to direct the power given to me to materialize my bright desires."

Now mentally turn to the bowl. Imagine placing your right hand on your chest, on your spiritual heart. And imagine that you are taking out from your spiritual heart the image of your first desire. The most important thing for you. What you think, once you receive it, you will be happy and harmonious. Hold this image or this symbol in your palm. Look at it from all sides. Extend your left hand, take a slow deep breath and, as you exhale, direct the Light from your right and left hands through the center of your palm into this image.

Fill your desire with Light. Fill it with your strength. See how it grows and glows. Now mentally say:

"With gratitude and faith, I release this desire into God's hands, to the will of my Heavenly Father."

And put it in the bowl. Listen to your feelings. You have given your desire to the will of Heavenly Father, which means that you will accept any result because you know that it will be useful for you and your development.

It is very important to let go of your desires and be able to accept what is given from God. This is an expression of the prayer of Christ that he prayed before his crucifixion, so that the will was not his, but

his Father's. Yes, it was not easy for him to decide on this, because this was not his desire. He, like us, was also a man and experienced pain. We have now actually done the same thing as him. You experience his sense of trust in his Father to fulfill his desire.

Next, slowly pull your hand back and place it on your heart. Think about your second wish. Mentally imagine that we are taking it out of our hearts and examining it. This desire is also very important. You carried it in your heart for a long, long time. Look at it from all sides. Fill with your Light, also take a breath, it is easier to do this while exhaling. And as you exhale, direct a ray of Light through the center of your palm. Fill this desire. It increases in size. Tell:

“With gratitude and faith, I place this desire in the hands of God. Let His good and perfect will be done.”

Place this wish in the bowl. Realize that you are transferring through the cup into the hands of God. Listen to your feelings. You trusted God to fulfill your second wish. This does not mean that you have completely withdrawn from the effort of fulfilling it. But this means that you are ready for any changes, for any new ideas for making your desires come true. This is God's help.

Next, mentally imagine that you place your right palm on your heart and take out the third wish from there. Usually the most secret thing. Perhaps, which you hid from yourself. Maybe you didn’t even expect from yourself that you wanted this? Because during the exercise, by the way, desires may change.

Look, what is this? Consider all the details of this image or symbol. Does everything suit you in this desire? And ask yourself, is this what you really want? If you have any doubts, you can improve this image and add new features to it. Now you are God, king and master there - in this space, above this image. Create your reality. The reality of the Spiritual world in which you are now creates material reality.

Realize this, realize your responsibility for every thought. She truly changes worlds. Mentally say:

“With love, faith and gratitude, I place this desire in the hands of God. My beloved Heavenly Father."

Place it in the bowl and say:

“The Bright Field and the Love of my Heavenly Father are omnipotent. I am His part. I am the ray of His heart."

Feel like a ray of very bright Sun. This is the heart of God. Then you feel that you will fulfill these desires in union with Him. And He is in union with you. This is called “cooperation in the Light” .

Next, approach the bowl and look into it. You will see liquid there of different colors. It can be completely different. And there may be different quantities. But there is a power there - in the form of this liquid that you need to take into yourself. So that you have willpower, the power of consciousness and emotions, and the power of your spiritual heart to materialize these desires onto the physical plane.

Mentally imagine yourself reaching out with two hands and taking the cup. Feel how it feels to the touch. Pick it up. Look at this liquid. And while you are holding it in your hands, mentally say:

“My Heavenly Father, I thank You for this incarnation. I thank You for the ability to desire, feel and act in this world. I thank You for the opportunity to speak with You. With love and gratitude, I accept Your Light of Love in this bowl and direct it to the realization of my desires through all the energy centers of my body.”

Mentally drink the cup - imagine that you are drinking what is there. You have to drink everything in there. You may taste different. And put the bowl back on the table. Mentally imagine that you are giving thanks. Make a slight bow to Ganesha and Heavenly Father as a sign of Love and reverence. It's like recognizing yourself as a part before the whole. Feel that from this movement the energy of the Light that you have accepted spreads throughout your body.

You can ask something in your own words from the Higher Self, from Ganesha or from God, the Heavenly Father. You can tell them something that you want. Feel what has changed in you. Remember this state and remember what this cup and these desires looked like. Now remember that by your actions to achieve this desire you will manifest this Light.

Mentally say:

“I thank my Higher Self for this practice. I thank my supervisors and mentors for their help. I thank the Soul - the guide for the words of Light and goodness. I thank each participant for strengthening the energy potential in our space. I thank everyone, I send everyone the Light of my Love.”

Then return your attention to your body, slowly returning to your normal state of consciousness, open your eyes, inhale and exhale. This is where the practice ends.

Working with consciousness, purifying and managing thoughts. Bowl of savings

https://blog.cassiopeia.center/rabota-s-soznaniem-ochishchenie-i-upravlenie-mysly

Before purifying your thoughts, you need to carry out the first stage - analyze what exactly they are contaminated with. To do this, you need to have the skill of self-analysis - the ability to consider your actions from the outside. Thoughts, as the spiritual component of a person, are manifested through actions and deeds, i.e. through the material body.

When we begin to analyze our actions from the outside, this is the first stage in working with our consciousness. We ask ourselves why we did this or that way? What was behind this?

For example, Esler has this practice of working with your thoughts, with your consciousness. In the evening, before going to bed, he remembers the actions of the past day, analyzes why he acted that way? How could it have been done differently?

If you do this regularly, a person will notice that his actions and emotional reactions to them and to the actions of others are repeated. If you don't analyze, don't write down, but just live, then it seems that everything is going in a new way. In fact, thoughts and actions are repeated due to habituation to certain emotional states, beliefs and attitudes.

When you find repetitive thoughts and actions, you need to consider the reason within yourself - why am I doing this? How does this make me feel? Does this cause an increase in vibration? Do you feel joy, love, acceptance, forgiveness? Or vice versa negative: anger, irritation, resentment, fear, etc.?

If this is a positive feeling, then in order to dissolve in it, a person must cultivate these thoughts, that is, consciously strengthen them during the day, remember them, and perform these actions.

If these are negative aspects, then you need to understand that these actions interfere with the development of your own consciousness in the Light of God's love, which we call fire. Then you need to cleanse your mental body, your mental images, thought forms. How to clean? First, understand the reason why the negative emotion arose. This is already a job in which you need to keep an emotional diary, where to write down the emotion that arose and what caused it. You will see that they are repeated.

When the understanding has come that the same situations, the same people or the person himself in certain situations, cause the same negative emotional reactions, then the next stage of working with consciousness is finding out the reasons by asking yourself questions: why am I doing this? I react, is it possible differently, how can I change my emotional reaction so that it does not bring me discomfort and negativity? And then the beliefs that cause these reactions emerge.

You must clearly understand that the only real way to increase your vibrations is not to change the people around you or the

circumstances that cause negative emotions, but to change your attitude towards them .

For example, if something irritates a loved one, then the only way to raise your vibrations and get rid of irritation is not to fight with your loved one to stop such behavior, but to change those attitudes in your unconscious that cause irritation.

You reason: “ He behaves like this. He shouldn't do that because it's bad ." To raise your vibrations, you need to tell yourself and believe that this behavior of a person is the best at this stage of his development.

If such a person’s behavior causes irritation, and you are not ready to put up with it, then you need to make a choice: either continue to communicate with this person, or stop communicating, without anger and condemnation of him. Freedom of choice should be provided on the basis that we, as individuals, want to be free in our actions, even if someone does not like them, because our behavior may not correspond to the attitudes of the people around us.

The next work with consciousness is changing attitudes so that the wrong behavior of others does not cause negative emotions.

The third stage, and it is necessary, is contact with your Higher Self. It is advisable to get in touch with your Higher Self every day in the morning, ask for advice on what to do this day for the benefit of yourself and those around you. The benefit is spiritual development. This stage of working with one’s consciousness leads a person to the transmutation that you are talking about.

There is an etheric center, which is located in the area of the solar plexus of the physical body; there there is a “bowl” that accumulates vital energy for the life of the body and for volitional actions in the material world.

The fourth chakra also has a bowl where high vibrations accumulate, which then spread throughout a person’s entire aura and attract individuals similar in vibration to him, and attract situations that promote spiritual growth.

How does accumulation occur in anahata (4th chakra)? Anahata is a spiritual heart that has the ability, implanted in us by God, to absorb into itself all the images and all the energies that the Spirit experiences, and all the images and thought forms that the mind of this Spirit thinks about. Heart means the core, the middle of the Spirit. It collects thoughts, images, energies, relationships in a wordless form, in the form of feelings of love, jealousy, faith. These feelings accumulate in anahata.

How? The more we think about destroying what we ourselves or others have created, the more the energy accumulated earlier, including in past incarnations, is wasted. Instead of the development of the Spirit, its degradation begins, low-vibration personalities and situations that contribute to degradation are attracted. Degradation is a decrease in the vibrations of the Spirit, leading to the loss of the feeling of the Spiritual world and Light in oneself.

The more we dream of happiness for ourselves and for others, and think about ways to achieve it, the more positive feelings accumulate in the cup.

In-depth practice of communicating with your Spiritual (Higher) Self

https://blog.cassiopeia.center/uglublyonnaya-praktika-obshcheniya-so-svoim-vya

This practice is for people who want to connect with their highest

spiritual essence. To make this contact, a person must first believe that this higher spiritual entity actually exists. The practice is suitable for people who have at least already accepted in their minds the possibility of the existence of something other than matter.

Even admitting such a hypothesis is an impossible task for some earthlings, because many have incarnated on this planet to go through the path of material existence. And this is another argument in favor of rejecting physical evidence. Physical evidence of the existence of the Interstellar Union would show that the Interstellar Union not only exists, but also claims that spirit is the primary cause of the existence of matter. Many spirits incarnated on Earth came here to gain knowledge of material experience; such evidence would cause irritation, rejection in them and would increase the likelihood of their degradation due to negative emotions.

Practice for everyone who has accepted the existence of the Spiritual world and the possibility that you are not only creatures of flesh and blood, but you are also spiritual beings. Spirit is an eternal substance consisting of divine energy, which cannot be destroyed, which is unchangeable without union with matter. If you have accepted the existence of eternity of this substance, there is a very simple practice for you.

To perform the practice, 20–30 minutes during the day are enough. It is very important to do it every day - at least for 10 days. After 10-14 days, almost everyone has a successful connection and contact with the Higher (Spiritual) Self - provided they have the desire and faith in the existence of the Self.

The practice consists of the following:

It is advisable to be alone, in a dark room, so that the light does not interfere or sounds irritate you. Turn off the computer, TV, electronic equipment that distracts you from yourself.

It is better to take a sitting position so as not to fall asleep. If you can control yourself and do not feel tired, you can do this in a lying position. But the optimal position is sitting, this makes it easier to concentrate

your consciousness on the spiritual channel. At the same time, do not cross your arms and legs. It is better to take a position where your hands are on your knees, palms up. Close your eyes and tilt your head forward slightly.

Pay attention to your breathing. As you inhale, trace the path of air through your airways to the center of your chest. And mentally imagine that a beam, a stream of white light enters you along with the air. You may not be able to imagine it visually - then just thinking about it will be enough. It already includes focusing on your etheric body.

After taking a few breaths in and out in this manner, notice the energy that will be in your chest. Mentally give it the shape of a ball. It is usually white in color. Then begin to imagine that when you exhale, this ball expands, comes out through you along with the air and spreads into the space around you, illuminating it. This is how you send light. When you repeat this several times, you will feel calm and harmony.

After this, mentally or whisperingly ask yourself the question “Who am I?” , "Where I am?" You should not answer, for example, that you are a person, or give your name. Instead, find the center of your Consciousness and describe it. What form is your Consciousness? What color is it? Where is it located? Find the Center of your Consciousness.

If you do this in a state of calm and harmony, which is achieved through breathing with energy visualization, then you will feel a sense of your Spirit. You will switch your perception from the external world to the perception of your Spiritual world - your Universe, which is hidden in each of you. Everyone will have different feelings. The general thing will be that you will feel the Light, you may also feel that you are not the body, etc.

When these sensations arise, you can send a request: “I want to talk to my Higher Self.” Or - with your Super

Self, with your Divine Self, with your Spiritual Self, use any term that is closer to you. Next, you can ask him several questions, including: “Is it possible to get an answer now?”

How to distinguish answers from the thoughts of your mind? When making a request in this state, the first thought form that comes into your consciousness is a response from the Higher (Spiritual) Self. The main thing is to catch it and not analyze it. If you start to turn on the analysis and start to figure out where this thought came from, from the Higher Self or not, you will eliminate the possibility of contact and block it. As soon as you receive an answer, you can ask questions in a flow, that is, after receiving a mental answer, immediately ask the next question. This way you can communicate on an intuitive level with your Higher Self. Through mental communication you can receive any images and answers.

For you to succeed, faith in the existence of the Spiritual world and your trust in yourself are important. If these two components are present and provided that this simple 20-30 minute practice is performed daily, 96% of people will be successful in 10-14 days. For many, even much earlier.

As soon as you have received an answer, you can ask questions in the flow, that is, you have received a mental answer and immediately asked the next question. This way you can communicate on an intuitive level with your Higher Self.

This practice is very simple, it is taught to students at the “School of Contactees” “Cassiopeia”. This will be one of the main methods, as it is very simple.

If you feel difficulties with this exercise, you can contact a specialist who will take you to the Higher Self, such as those available at the Cassiopeia Center . Our task is not only to introduce you to your curators and your Higher Self, but to teach each of you to independently connect with the Higher Self.

A manual for practical work with negative blocks, negative attitudes and for harmonizing natural instincts

https://blog.cassiopeia.center/metodichka-dlya-prakticheskoj-raboty-s-negativnymi

Working with Energy Blocks

Negative energy blocks are clots of etheric energy charged with negative thoughts, feelings, emotions and desires. They interfere with the harmonious energy exchange of a person with the environment, which leads to physical and mental illness, addictions and destructive behavior, which in the right environment causes crime, war, suicide and other forms of personal, family and social violence.

In addition, negative blocks block the Light of unconditional love coming to every soul through the spiritual channel through the Higher Self from the Creator of all worlds and spaces. This leads to disorientation of the embodied spirit in the material world and ultimately to failure to fulfill its tasks of incarnation.

Negative blocks are located in the human etheric field and are distributed among energy centers (chakras).

How to work with the technique

When you identify a corresponding block in a chakra, dissolve it through contact with your higher self, and then develop the qualities indicated in the paragraph “Dissolving Blocks and Restoring Chakras.”

To fully restore the chakra, engage in the practices indicated in this column for at least 21 days.

Pay special attention to those organs for which the chakras are responsible, where the blocks were located: undergo an examination of these organs, undergo a course of supportive therapy and energetically support them.

Muladhara

BLOCKS: Fear of death. Fear of illness. Fear of loneliness. Dejection. Laziness.

CONSEQUENCES OF BLOCKS: Diseases of the spine and joints. Dental diseases. Weakness. Lack of energy. Low immunity.

DISSOLVING BLOCKS AND RESTORING CHAKRAS: Trust in God. Physical activity. Massage. Standing on nails. Walk outdoors.

Swadhisthana

BLOCKS: Resentment towards sexual partners. Fear of intimacy. Aversion to intimate contacts. Jealousy. Not accepting your body.

CONSEQUENCES OF BLOCKS: Diseases of the genitourinary system. Family quarrels. Divorces. Impotence. Frigidity. Anorgasmia. Infertility.

DISSOLVING BLOCKS AND RESTORING CHAKRAS: Forgiveness of sexual partners. Acceptance of sexuality. Body acceptance. Trust in your partner. Severing etheric connections with previous sexual partners. Water procedures.

Manipura

BLOCKS: Fear of poverty. Fear of unemployment. Dislike of money. Judging rich or poor people. Envy. Greed.

CONSEQUENCES OF BLOCKS: Diseases of the digestive system. Financial losses. Conflicts at work. Frequent layoffs. Apathy.

DISSOLVING BLOCKS AND RESTORING CHAKRAS: Gratitude to God for everything that exists. Trust in God. Accepting finance as Divine energy. Charity. Meditations with fire.

Anahata

BLOCKS: Resentment and hatred towards parents, children and other loved ones. Feelings of guilt and shame. Judging people. Judging yourself. Selfishness.

CONSEQUENCES OF BLOCKS: Diseases of the heart and blood vessels. Blood diseases. Lung diseases. Depression. Quarrels with loved ones. Loneliness.

DISSOLVING BLOCKS AND RESTORING CHAKRAS: Forgiveness of parents, children and all loved ones. Forgiving yourself. Love for yourself, people and God. Breathing practices. Listening to mantras, spiritual songs and sermons about God.

Vishuddhi

BLOCKS: Self-doubt. Fear of judgment. Fear of expressing yourself. Self doubt. Irritation and anger.

CONSEQUENCES OF BLOCKS: Throat diseases. Thyroid diseases. Speech problems. Memory problems.

DISSOLVING BLOCKS AND RESTORING CHAKRAS: Self-acceptance. Trust yourself. Forgiveness of all who condemned and did not accept in the past. Breathing practices. Singing. Composing music. Drawing.

Ajna

BLOCKS: Fear of the other world. Fear of magic and witchcraft. Fear of madness. Anxiety about the future. Anxiety about other people.

CONSEQUENCES OF BLOCKS: Eye diseases. Ear diseases. Diseases of the nose. Skin diseases. Weak hair and nails. Weak intuition. Undeveloped imaginative thinking.

DISSOLVING BLOCKS AND RESTORING CHAKRAS: Trust in God. Trust yourself. Literary creativity. Solving mental problems (chess, crosswords, riddles). Developing a sense of humor.

Sahasrara

BLOCKS: Resentment towards fate, towards life. Murmuring against God. Resentment towards the government. Fear of the unknown. Lack of faith in God and the spiritual world. Arrogance. Pride.

CONSEQUENCES OF BLOCKS: Brain diseases. Neurosis. Psychopathy. Schizophrenia. Epilepsy. Dependencies.

DISSOLVING BLOCKS AND RESTORING CHAKRAS: Forgiveness of fate and life. Forgiving yourself. Trust in God. Thanks to God. Love for God. Self-love. Love for the world. Forgiveness of political figures. Humility. Prayer. Meditation.

Restoration of energy centers

Working with negative attitudes

Negative mental attitudes are illusory ideas and statements that a person accepts as truth. They are found in both the conscious and subconscious parts of memory.

The influence of negative attitudes is destructive: they shape a person's perception, his mood and influence his thinking, making him unfree at the moment of choosing a goal from desires and at the moment of forming the optimal path to the goal.

As a result, desire ceases to manifest a person's actual need and turns into a negative passion, which depletes him energetically and causes

destructive behavior.

Below are the fifty main negative attitudes of the modern person's mind. All other negative attitudes can be reduced to them.

How to work with a table

If, when reading a negative attitude, you feel that this is your past or present belief, then repeat the opposite positive attitude 10-15 times a day, for 21 days.

It will also be useful to write down the positive attitudes that are relevant to you and place them in the form of text in the place where you sleep, work and eat.

Negative MindsetsPositive Mindsets

1People should behave as I expect. Every person has the right to behave as he sees fit.

2I must be good and convenient for everyone. I am a unique person and freely express myself in front of people.

3Love is the desire to do something nice. Love is help on the path to the Light.

4 Suffering and pain are evil. Suffering and pain are signals about the need to restore harmony and health.

5Physical death is evil.Physical death is a transition to the spiritual world and the opportunity to be born again.

6It's my fault. I have no forgiveness. Any mistake can be corrected and a lesson can be learned from it for the future.

7I expect attention and love from others. I am the Source of Love and Light for all people.

8I avoid responsibility for my words and actions. I love freedom and

take responsibility for my life.

9Money is evil and dirt. Money is the material energy of God given to people for joy and development.

10I suffer for the sins of my parents (family, my past lives). I am the master (mistress) of my life and I myself build the reality I need.

11I do not believe in God (spiritual world) without evidence. Evidence of the reality of God (spiritual world) exists within myself and every day I learn to see it.

12I wait for a happy occasion, without doing anything to fulfill my dreams. I am the creator of my own happiness.

13I expect confirmation from other people that my choice is correct. I have the right to make any choice and accept responsibility for its consequences.

14My body is ugly (ugly, ugly).My body is a beautiful Temple of the Spirit.

15Receiving pleasure through the body takes me away from God and spiritual development. My body was given to me by God for joy, I thank God for the pleasures it gives me.

16Meat lowers spiritual vibrations. I thank the souls of animals for the flesh given to people for food and send them and their creators the light of my Love.

17 Sex is low and dirty, it equates people to animals. Sexual energy is the manifestation of Divine Love through the body.

18Power and wealth are dangerous for spiritual development.Power and wealth are opportunities given by God for spiritual development.

19Work should be pleasant. Any work for my own development and the benefit of other people makes me happy.

20Rest is a waste of time. Rest is a need of the body to work more

efficiently.

21I cannot hear my higher self. I am always in contact with my higher self through the spiritual channel.

22I do not trust answers from the higher self. It is safe to trust the higher self, because it is the higher part of me that has the answers to all my questions.

23I am unworthy (unworthy) of love. I am God's beloved child.

24I must (must) start a family and have children. I myself decide what is most important to me in life.

25 I need to be silent when I am hurt, sad or scared. I freely express any feelings and emotions and transform them into the pure Light of Love.

26We need to suppress anger and irritation. When I feel anger, I direct its energy to change myself and my life.

27I am incapable of anything. I can learn anything with the mind and body God gave me.

28People don’t understand me, they condemn me, they wish me harm. I forgive all people who are negatively opposed to me and send them the Light of my Love.

29Trusting people is dangerous. I trust God and the people He sends to meet me.

30I live in a dangerous world. I completely trust my life to God, any place in His world is safe for me.

31Doubts are a sign of a strong mind. I thank my doubts for protecting me from mistakes and trust only myself when I make a choice.

32I am better (higher, more spiritual) than all people or than some person. All people are equal before God in the Light of His Love.

33Opening your heart to people is dangerous because they can hurt you. Condemnation and criticism are safe for me because they help me grow and develop.

34It is dangerous to share your energy. The more I radiate Light into the world, the more I receive it from God.

35I am easily angered, offended, and unbalanced. I myself manage my feelings and emotions.

36I must (must) prove my love to people. Each person accepts the Light of Love according to his readiness.

37I must live like other people live and have everything they have. I am a free and unique person and I choose how I live and what I have.

38Material well-being brings happiness. Any matter is a tool for the development of the spirit, and the Source of happiness is in my heart.

39 Any changes scare me, my future is anxious and uncertain. Any changes are an opportunity for growth and development, my future is filled with Light and Love.

40Loved people should always be close to me. Love allows you to be close regardless of time and distance.

41Loneliness scares me. Loneliness is the time God gave me to get to know myself and talk with Him.

42I cannot control my habits, they are stronger than me. Any of my habits are created by me and can be changed at any time when I want.

43 Instead of the Higher Self, someone else can answer me. The Higher Self is my spiritual part, it is always in contact with me and is the first to answer any questions to it.

44I don’t trust myself. I give myself the right to make mistakes; my mistakes will allow me to gain invaluable experience.

45I have little strength and energy. I have enough strength and energy

for any goals and desires, consistent with the Will of the God who loves me.

46I can be influenced by magic, witchcraft, hypnosis without my knowledge. I trust the Divine protection around me, as long as I am in a state of love, I am completely safe.

47I condemn the government, laws, officials. I thank the people who are in power in my country and on planet Earth for their hard work, send the Light of my Love to their souls and wish them good luck in fulfilling the tasks of life.

48I condemn criminals (murderers, thieves, rapists, maniacs, tyrants, dictators, etc.). I forgive all criminals for their evil deeds that they committed without love, I send their souls the Light of my Love and wish them to return to the path of the Divine Sveta.

49I condemn people of another nationality or another religion. I look at all people through the eyes of Divine Love and accept them as they are.

50I judge myself for past mistakes. I forgive myself for all my mistakes and love myself the way God loves me.

Instinct Map

Instinct is an innate behavior program recorded at the DNA level. During incarnation, the soul places these programs in the fourth chakra (ANAHATA), and sends the energies for their implementation to the first chakra (MULADHARA).

Humans have five instincts inherited from their animal ancestors. These are very powerful energies that need to be harmonized and their power directed towards fulfilling the goals and objectives of incarnation.

If a person has negative blocks and mental attitudes, the energies of instincts go out of harmony, and their programs are distorted, which leads to many destructive consequences for both the individual and society.

The instinct of self-preservation

Harmony: Love of physical life. Taking care of the body. Courage.

Disharmony: Dejection. Guilt. Fear of death.

Distortion: Depression. Apathy. Thoughts about suicide.

Eliminating disharmony and distortion: Forgiving yourself for all mistakes. Thank God for life. Achievable physical labor.

Instinct to reproduce

Harmony: Love for children. Sympathy for weak and sick people. Sexual attraction to the opposite sex.

Disharmony: Promiscuous sexual intercourse. Excessive control over children. Jealousy towards a partner.

Distortion: Homosexuality. Pedophilia. Bestiality. Necrophilia. Cruelty to children and weak, sick people.

Eliminating Disharmony and Distortion: Forgiving Mother and Father. Forgiveness of the first sexual partner and children (if any). Keeping a Diary of Emotions.

Leadership instinct

Harmony: Self-confidence. Organized. Responsibility.

Disharmony: Obsessiveness. Arrogance. Pride.

Distortion: Sadism. The desire to humiliate people and mock their feelings. Hatred of the world.

Eliminating disharmony and distortion: Forgiving offenders. Forgiving yourself. Autogenic training.

Herd instinct

Harmony: Friendliness. Sociability. Altruism.

Disharmony: Lack of self-confidence. Closedness. Fear of loneliness.

Distortion: Suggestibility. Racism. Nationalism. Religious fanaticism.

Eliminating Disharmony and Distortion: Developing Self-Belief. Studying languages and cultures of different peoples. Study and comparative analysis of different religious teachings.

Hedonic instinct (pleasure/pleasure)

Harmony: Joy from receiving sensory pleasures (food, sleep, physical comfort). The desire to please other people. Optimism.

Disharmony: Aversion to sensual pleasures. Pessimism. Envy.

Distortion: Selfishness. Greed. Dependence on pleasures (gluttony, smoking, drunkenness, drug addiction).

Eliminating disharmony and distortion: Forgiving yourself for wrong lifestyle. Restoring relationships with the physical body (the ability to understand its needs). Developing love for people.

Practice communicating with Demeter

https://blog.cassiopeia.center/praktika-obshcheniya-s-demetroj

It's best to do this outdoors. It is very good to do this at the time of sunrise or sunset, in the warm season. Not at the very moment of sunrise or sunset, but when it is already warm, but at the same time not hot, before noon and after noon. It is very good to do this in a sunny clearing, among the trees. In a harmonious place so that your Soul likes it. You can do it on the shore of a reservoir, or in the mountains. The main thing is that you are either alone or in the company of people who know what kind of practice this is and will not ask you unnecessary questions, much less subject your experience to any skepticism. Because it can create your doubt and ruin your connection. The energy of doubt immediately closes the threshold.

You can sit down, you can stand up without shoes, barefoot. It's better to stand on soft grass, close your eyes, relax and just listen to the sensations of your feet, focus on how pleasant it is for them to stand on the grass. Note that this carpet was grown for you by the Earth itself. Either squat down - sit down, or on your knees, whichever is more comfortable, or take a position so that you can sit down, kneel down or squat down, or sit down in such a way that you can relax. At the same time, place both palms on the ground. Close your eyes and listen to the feeling of your palms.

Ask yourself:

"I am now touching the Earth. Do I feel like she is a living being? What is it like?

You will feel that it is like an animal. You touch him, you want to stroke him. Your deep sense of communication will simply turn on. There is something, it is embedded in your Soul - communication with those natural plasmoids where you are. It is in every person. It's just that among ancient people it was more developed due to the fact that they lived in nature.

For it to awaken in you, just be alone with yourself or with people who know it. So touch it and you will feel that it is a living being. You can address her in your own words:

"Mother Earth, I greet you and send you the Light of my Love, to your very core, to your very heart."

She will definitely feel it. Even now you can energetically feel what

will happen there. Do you know where you get these feelings that this will happen? Because your Soul's memory of how to communicate with the world of plasmoids on your planet is already waking up.

You say thank you, then take a slow breath. At the same time, imagine how energy rises along with the air from below, filling you with fertility, happiness, strength, and purity. You will feel what the Earth is like. How an affectionate mother strokes you with her energy. Tell:

"I thank and accept, love and bless, Mother Earth! Can I ask my question?

You will communicate with her on a mental level. She will say:

"Yes, my child, ask."

And you can ask. It's better to say it out loud, in a whisper. Ask questions, get an answer in the form in which you are accustomed: figurative, verbal, but it will be the answer just for you.

You can contact her with any request. You can contact her with words of gratitude. You can communicate with her as with your mother. This will be exactly the plasmoid, whose name is Demeter. You can address her by name. You can say "Mother Earth." It is the same. She hears everyone, because her channels are tuned to the noosphere of the Earth, to all egregors, to each of you.

You can ask to fill you with energy, heal you, harmonize you. Thank her. Ask, ask, and at the end of the conversation, be sure to thank the Earth, thank your Higher Self for this contact. Tell:

"I thank and accept, I love and bless. I promise to direct this energy to good purposes, to the development of unconditional Love."

Then open your eyes, sit for a few minutes, take a few deep breaths. Look around and you will see this world differently. It will become more beautiful for you, because in every flower, every tree, every bush you will see the eyes and smile of the one with whom you recently communicated. Touch children's perceptions, they feel it.

MidgasKaus about attunement with the energy of the stone

https://blog.cassiopeia.center/midgaskaus-o-sonastrojke-s-ehnergiej-kamnya

Stone is most often created by the Spirits of the elements, the Spirits of the Earth, the Spirits of the mountains, and can be created by the Spirits of the area. But sometimes plasmoids of other elements can take part in this, putting their energy of water, fire, and air into them, if they wish. Although this is not their direct work, sometimes they want to help the Earth Spirits do this: to invest in them some of their elemental balancing energy.

Each stone is individual. On Earth they say:

“Every stone is a living being.”

We say it a little differently:

“Behind every stone there is a living being, and not just one, there is its creator.”

Like the author of the painting is behind the picture (you can also heal through paintings, there is picture therapy) or like the composer is

behind the melody.

So a stone, a mineral, is the melody of the Earth, it is the melody of the Spirits of the Earth, it is as if frozen in time and space. But, nevertheless, this is an expression of the beauty and Love of the Soul that created it. It’s not for nothing that they come in different colors and different shapes. Even stalactites in a cave are created by the spirits of this cave through certain processes: of course, not just with hands (they don’t have physical hands) - with energies.

What will balance some element or the ratio of all elements in a person, in his organs, in his etheric matrices, in his etheric energies, in the etheric body - this will depend on what energy the plasmoids and the person himself put in. He can completely change the stone's program and insert his own. Usually the stone is charged quite neutrally in relation to a person, so that he can take it and use it for his own purposes.

But only when you take a stone from nature or when you buy it in a store, be sure to thank the Spirits of the Earth. Go to nature, if you bought this stone in a store - go to a park where tall, large trees grow, squat down, hold this stone in your left hand, and place your other hand between the roots of a large tree on the ground, close your eyes, listen to to your feelings. Spirits of the Earth, gnomes, often live between the roots of a tree. Most likely, it will not be those who created this particular stone, but they feel this stone through you. And if you give them the energy of your Love, they will definitely pass it on to the creators of this stone. And say:

“Dear Spirits of the Earth, I greet you! I thank you and the entire element of the Earth for the mineral you created, which I hold in my hand, and I send you the Light of my Love. I also thank all the plasmoids who took part in this from all worlds and all density levels."

Because it’s not necessarily the Spirits of the Earth, maybe someone else was present there. And you will feel how energy first goes to them through your hand, and then you will feel the response, and they will also charge the stone.

Practice with stones to restore the blood formula. Thrombosis. LiShioni

https://blog.cassiopeia.center/praktika-s-kamnyami-dlya-vosstanovleniya-krovi

To cleanse the circulatory system, it is better to use ruby, hematite, garnet, but only red or dark red - such as drops of blood. A good pomegranate for restoring the blood formula will be shaped like a heart. In any case, something round, without sharp corners, or like a drop - it will resemble a drop of blood. And the color is like that of dry red wine that was poured into a glass (dark red). Hematite, ruby, red garnet, there are also red topazes - they can also be used, suitable energies are also invested in them.

To cleanse the etheric matrices of blood cells and to stimulate them, it is better to first hold them in your palms, thanks to the plasmoids that created this stone, send them the Light of your Love. Then you can call on the curators, and charge it together with them: mentally watch it so that it lights up in your hands. We call this “activate”. And then apply it to the heart chakra, since the heart is the central organ of blood circulation. And you will feel the waves in your body.

Such a session should not last longer than ten minutes to avoid depletion of the stone’s energy reserves and excessive stimulation of the etheric matrices of blood cells. And be sure to thank him after you use it.

Sit with your eyes closed for no more than ten minutes, feel these waves, relax and mentally help them pass, as if pushing them to the

tips of your fingers, to your feet, so that this energy spreads everywhere. Then open your eyes and be sure to thank your curator for your help, the creators of this stone. You can contact him directly, it will still go to the plasmoids. Imagine that a ray of Love comes from your heart, passes through this stone and becomes wider (the stone acts like a lens). Thus, thank them for their help.

To cleanse the stone from the negative ethereal energy that could enter it, it is advisable to hold it under running water for the same amount of time as you held it in the heart area. If you keep it not in running water, but simply in a glass, then it takes twice as long. Then, naturally, this water must be poured - it also takes on the charge of any energies - into a place where they cannot drink it, and say:

“I send this energy to the earth’s plasmoids for processing and increasing the fertility of the earth.”

Various causes of thrombosis

Blood clots in blood vessels - this could be a protective reaction to something. Maybe you don't have enough iron in your body, for example. Maybe there are some internal microbleeds (you don’t notice them) in the stomach, in the intestines. And blood clots begin to form: so that there is no blood loss. But they end up somewhere else.

There are different causes of thrombosis. Maybe you drink little fluid, and this makes your blood thick, because toxins come out through the kidneys and through the skin, and what remains is thick blood - the hematocrit. Maybe this is acidosis - acidification of the body from certain microbes, of which there are many from infections in the body, from parasites. And they inject acidic metabolic products into the blood, but the liver cannot cope, and this causes red blood cells to stick together. That is, when doctors say: “increased ESR.”

It is necessary to find out why it was formed and act on the cause. Stones can only be used to support and contribute to the maintenance of the etheric body. If the physical reason is serious, then something physical needs to be applied.

What is meditation? The meaning of visualization practice

https://blog.cassiopeia.center/chto-takoe-meditaciya-smysl-praktiki-vizualizacii

Meditation in a broad sense can be called any internal reflection, that is, internal work in your subjective personal spiritual world, which appears before the “eyes of consciousness” when you close the eyes of the physical body and immerse yourself. Any work on your mind, on your feelings, emotions in the broad sense of the word is already meditation - like the work of consciousness on itself, the work of the mind. We call the mind that part of the mind that is in charge of thinking and processes information.

As for visualization. The visualization process is entirely induced, initiated and controlled by the imagination. Imagination is that part of the mind that is the ability to be creative, to create images and ideas. And if a person imagines the desired future, he uses his imagination. If he believes that he will achieve the desired future, he fills these images with his life energy. About the same thing happens as during the creation of egregors, only not by many people, but by one person.

The visualized image remains in the Spiritual world, more specifically, it remains in the mental field of this person, and this image begins to influence the Timeline, bringing closer to materialization exactly the version of the future that he imagined. But of course, if he believes in

it. Moreover, this is how hidden desires and dreams of both a positive nature, which bring happiness, and a negative nature, which bring suffering, are realized.

This mechanism is fully revealed in the words of Jesus Christ:

“According to your faith it will be done for you.”

Why did He say that? Because faith is a feeling that something invisible, which does not exist in the physical world, already exists. And faith itself changes a person’s perception, changes a person’s will, and he begins to see the possibilities that are necessary to implement the plan he dreamed of. In addition, his dreams, his fantasies are visible to his Guardian Angels, Consulting Angels, and his curators. They are visible in the mental field as images. And if these dreams lead a person to the Light, to enlightenment, to awakening, to the realization of his tasks of embodiment, then his curators, Guardian Angels and Consulting Angels will create for him those events that will allow him to achieve this.

Visualization is such an open way to declare to the Universe that I want this future . But, as everyone understands perfectly well, wanting is very important for getting results, but not enough. In addition to desires, visualization and fantasy, there must be real actions . But daily visualization can be especially useful for those people who have not yet recognized their true desires.

There are many people who themselves do not know what kind of future they want and why. It’s useful for them to learn to dream, to ask themselves:

"What I want? How do I see this future?

This will allow them to mobilize willpower and the vitality of the etheric field to realize their desires. After all, every person has desires, only some are directed towards the Light, towards enlightenment, while others can be directed towards degradation. But this is only if there are blocks that distort the Divine Light coming from the Higher Self through the spiritual channel into the heart of the human Soul.

How to distinguish your desires. What does it mean to calm the mind

https://blog.cassiopeia.center/kak-razlichit-svoi-zhelaniya-chto-znachit-uspokoit

To distinguish, you must first know the purpose of your incarnation and compare desires with the purpose of incarnation: how much this or that desire contributes or hinders the achievement of the goal of incarnation.

Since a person is both a physical and spiritual being, he has physical and spiritual desires that reflect his existence in the physical and spiritual worlds at the same time. After all, you live in the world of things, in the world of your body, and at the same time - in the world of your thoughts, feelings and experiences. Both are real to you, and that's why you have desires.

Desire is a conscious need. A person is not aware of all his needs. Unconscious needs are located in his subconscious, or, as we say, in the causal body. These are those programs, including karmic, instinctive, etc., that are stored, perhaps, from past incarnations or from birth (if we are talking about instinctive programs, they are perceived during incarnation). But in needs there is a certain trigger that turns on and makes this need conscious, and we already call it desire. A conscious need as a desire includes the will as its energy in order to make a choice that corresponds to this desire.

As I already said, all desires can be divided into physical and spiritual. Of course, there is a gradation: physical and spiritual desires are different. Physical desires reflect physical needs, such as water, food, sleep, air, and so on. Naturally, they give rise to desires, for example, to satisfy hunger, thirst, and to enter into sleep.

These desires are positive, but only if they do not completely replace spiritual desires, if a person does not live only by them. If a person fulfills only the needs of the physical body, as well as instinctive needs, including the need for self-preservation, reproduction, power, herd life and pleasure, but does not go to the realization of spiritual needs, ignoring them, then he degrades, lowers his vibrations, because which does not fulfill the purpose of its incarnation. And once he lowers his vibrations, his mentors from the Spiritual world begin to create those conditions for his life or send him to meet those people who will encourage him to remember his spiritual task. This is called "learning the lessons of the material world."

By its structure, a person very easily forms habits at the brain level. We call this "creating neural circuits." And for every occasion in life, including the fulfillment of one's desires, a person already has a ready-made automatic form of behavior, which in terms of the speed and accuracy of its operation approaches instinctive programs. When a person realizes that he needs to change something, the instinct of self-preservation turns on in order to maintain the same way of life. That is why, when these lessons begin, it can be difficult to begin your spiritual path, that is, to begin to fulfill the tasks of embodiment, to realize your spiritual needs.

It manifests itself this way. For example, a person fulfilled only physical needs for a third of his life: he worked to feed his body, created a family to realize the possibility of reproduction, etc. And he also had a spiritual need, for example, knowledge of the world, or the development of Love, or the desire to enjoy life. Spiritual needs differ from physical needs in that they are not based on the achievement of something material. And when a person learns about this, he may not understand how to develop these spiritual qualities if he is already accustomed to working only in the physical world.

Take, for example, a person who has received a higher education. If he is accustomed to only counting numbers, adding them and doing this 8 hours a day, then coming home, then waiting for the day off, he cannot understand how the Spirit requires him to develop Love or joy

under these conditions. To understand this, he needs to look at himself with different eyes, the eyes of the Spirit. Meditation also helps with this. They help calm the mind - exactly the same thinking where various information is constantly processed, including from memory.

What does it mean to “calm the mind”? This means making it not a “stormy sea”, where “waves” of thoughts about completely extraneous things constantly arise, but a “smooth water mirror” in which a person will see a reflection of his needs, including his spiritual tasks. The answer from the Spiritual world, from the Higher Self, can come in mental silence, and this is facilitated by meditation, relaxation of the body, autogenic training, various physical and breathing exercises, if, of course, they are performed with concentration on them. These are all auxiliary methods for a person to get used to a state of self-contemplation.

How to stop the flow of thoughts

https://blog.cassiopeia.center/kak-ostanovit-potok-myslej

The mind consists of thinking, imagination and memory. Moreover, thinking is the center and source of energy of consciousness, which allows us to perceive the surrounding reality, in this case, through the senses of the physical body. Thinking is also the source of self-awareness, the feeling that you exist and are different from other people. This energy is formed in thinking, because the perception of the world and oneself in people, as intelligent beings, is carried out

with the help of thoughts. Do you think, for example:

“I am... I am different... What stands in front of me is a computer.”

These are all thoughts that arise due to consciousness. When people want to meditate, they redirect the energy of consciousness into the inner world. In simple terms, they collect a single energy, which is divided into two streams - consciousness and self-awareness - simply into a stream of self-awareness by abstracting from the material world. After all, it is consciousness that is directed towards the material world.

When a person closes his eyes and begins to listen to himself, he can concentrate so much that he will not hear sounds and will not even feel his body: the position of his arms, legs, etc. This happens quite often and is a good sign that a person is distracted from the body's receptors. Of course, if a person has already meditated long enough and has a lot of experience, then he can concentrate on himself, on his self-awareness, not only when his eyes are open, but even when he is doing something. For example, he can go somewhere or do some work and at the same time meditate.

But first it is necessary to go through a stage when a person understands what this condition is. For him to understand this, he needs to enter the stream of self-awareness. Self-consciousness, when it remains an object of contemplation of itself, begins to note the individual thoughts that arise. If a person himself no longer uses thinking, that is, does not consciously think about anything, then certain thoughts that will come to him may come from memory. For example, he can remember what happened this morning, or what he didn’t have time to do, or what he has to do tomorrow. That is, certain thoughts can come from that array of data, that information that is stored in memory.

Also, thoughts can come to him from the Spiritual Channel - from the Higher Self and from its curators. On Earth this is called intuition, intuitive thoughts. A person can feel the presence of the Higher Self, can feel the presence of Light, certain thoughts will come to him, for example: “You are the Light” or “Believe in yourself.” They usually reflect not memory settings, but higher spiritual states that can be clothed in thoughts or images. This happens differently for each person: some have more of a verbal type of thinking, while others

have a more figurative type of thinking, but nevertheless thoughts come.

When a person himself calms his “ocean,” at the initial stage he calms only his thinking. For example, he himself does not think:

"Where I am? What is happening to me? What I feel?"

Or something else. He simply observes himself, and thoughts begin to appear involuntarily. If some thought comes in order to “calm it down” (not drive it away, we don’t call it “drive it away”, we call it “calm it down so as to feel the silence of the mind, the silence of thinking”), we do not continue to follow it, not we think about why it came, and simply let it pass through us and go back. We become, as Esler calls it, “transparent” to thoughts, just as glass is transparent to the light of the Sun.

Individual meditation, individual spiritual practice differs from collective spiritual practice in its energy. And there are even differences when people gather, as you say now, in the online space and do some kind of meditation, or physically gather in the same room.

The fact is that when many people think simultaneously on the same topic or perform the same practice, they create a common spiritual space, which with its vibrations enhances the spiritual sensations (not physical, but spiritual!) and the feelings of each participant in the meditation , which means it enhances the effect according to the law of resonance of the energy shells of the aura.

Simply put, for a person who has just begun his spiritual path with meditation, with knowing himself, his Light inside, it will be easier to feel this Light, these energies in collective meditations, because there everyone will be tuned to the same “wave”, and the space itself will help his aura resonate with this state. Individual practices, of course, can be carried out, and they also help a person on the path of spiritual development. If he feels merging with his Higher Light, the inner Light in individual practice, then in collective practice this will be even easier, again, due to the resonance of energy vibrations transmitted from one aura to another.

The practice of transferring family jewels to other people

https://blog.cassiopeia.center/praktika-peredachi-familnyh-dragocennostej-drugim

Before you sell or give away a stone that has been passed down to you by inheritance, thank those plasmoids who may have supported its energies for several generations. It can also be passed down through the family - the so-called family jewel, that is, family treasure. And thank the plasmoid beings and those spiritual beings who created this stone and who for a long time supported the energy of your kind through this stone. Send them the Light of your Love. Hold it and send light in the form of a beam, and imagine that it enters the stone and expands behind the stone, like a lens. This is a universal way to thank plasmoids.

What is the energy of gratitude? It is very important because it is one of the forms of the energy of Love, one of the manifestations of the energy of Love, which is the nourishment and life force for light plasmoids, which then, in their gratitude, bring protection, healing, Love and their Light, the Light of their Souls. This is a favorable exchange of energies with plasmoids.

After you have thanked, mentally say:

“The circumstances of this life have led me to the fact that I need to

convey this creation of yours, your beautiful creation to other people. I ask you to accept these people with Light and Love and interact harmoniously with their energy.”

Usually, if you send Light and Love, they agree and then gratefully serve their Love to other owners.

Maybe you decide to keep it for your children or give it to someone, or something else, or maybe sell it. The owner of the stone, in any case, decides this himself.

https://blog.cassiopeia.center/midgaskaus-o-rastvorenii-detskoj-obidy

We are talking about accepting your energy from the energy block. We use a simpler method: appealing to the individual in the Spiritual world through the Higher Self of the person against whom we have a block of resentment, for example.

If, for example, your father beat you in childhood, then there will still be a block of irritation, rejection and, possibly, hatred for “betrayal.” There will be such a complex. Disgust and, very possibly, fear. Fear, plus resentment that he did this.

A small child (up to 5-6 years old) is perceived by his parents with almost religious reverence. It is not for nothing that the image of the father is reflected in archetypes, like the image of God - the father. What kind of relationship a child has with his father before the age of five is how he will then relate to the religious image of God. This is a well-known rule in psychology.

If there was no father, then any male figure. If there was no such figure, then a person (boy or girl) will have to work through the absence of a father, the absence of male energy next to him, the energy of confidence, and, either be unsure of himself, or become his own father, find support in himself.

Mom has feminine energies, and dad has masculine energies. They have different family roles, different behavior and different energies that they give to the child. For a small child, the image of a father is the image of a protector, a person who is “one of his own”, as a part of himself. And, at the same time, the child understands that this is part of him. He may leave home temporarily, be absent, but when he comes, the child perceives him organically, as part of the environment. When a child wants to communicate with his father, he perceives him with great love, and this love is so great that the child himself can recognize it as an attraction.

But if the father begins to cause pain, psychological or physical, the first time he does this, the child experiences a psychological shock because his picture of the world is broken. The one who was perceived as a protector, as the most reliable friend, almost a deity, hurt him. There may be disappointment in the world, fear of human aggression, fear of cruelty. Such a person may be afraid of some aggressive people, who later, in adulthood, will show aggression, not even towards him, but he will be afraid of this.

Processing comes through the father's forgiveness. A very important point: whether the father is alive at the time the girl or young man asks for help.

Working with necrotic bindings

It matters greatly whether the person who caused the offense is alive, be it father, mother or any other person. If he is not in the world of

the living, and a person had a grudge against him, when he leaves incarnation, he ends up at a low or medium level. From a living person who has a block in relation to the deceased, the formation of a necrotic attachment is possible.

Such bindings need to be removed through the Higher Self. There is a special session . If you dissolve the block, but do not remove the binding, it will continue to take away the person's vitality and send energy to the world of the dead. This leads to mental and physical illnesses and a decrease in spiritual vibrations.

If a person has a necrotic connection, then first he breaks it off with forgiveness. He calls the Spirit, mentally forgives him. First he forgives him, mentally sends him the Light of Love, speaks it out loud, and then with the power of his Spirit he breaks the binding and necessarily returns the vital energies that went through this binding into his etheric field. Then the person becomes free and can live without this block.

If the offender is alive, you can imagine his image. Through the presented image there will be a connection with his Higher Self. Then forgive him, that is, say out loud:

"I forgive you".

A word spoken out loud becomes reality for the person himself.

Timecode: 07:03, #499 Psychology of violence, childhood trauma. Guilt and responsibility - what's the difference? The Power of Forgiveness

Goals of the Interstellar Union on Planet Earth

https://blog.cassiopeia.center/BJEBFOsAhdE

In the group comments there was a really interesting question that was asked to Midgascaus from the planet Esler.

The question sounded like this:

> What GOALS do you (Meade) personally and the Interstellar Union want to realize in relation to humans on Earth? ……I also draw your attention, Mead, to the fact that I am sincere with you, and despite the fact that the further request sounds childish and naive at first glance, I hope for your sincere, as well as capacious, answer.

We couldn't miss it and asked Midgaskaus personally and received this answer:

Greetings.

You asked a very important question about the goals of the Interstellar Union mission on Earth. Thank you for your interest in this topic and for your sincere desire to understand.

My personal goal coincides with the goals of the interstellar union on your planet: to help your civilization reach a new level of perception of itself as an accomplice and collaborator of our interplanetary community.

To do this, your society needs the information that we provide through contactors. It is gradually changing your world towards an increasingly greater awareness of responsibility for each member of society and for your planet, as for the common home of humanity.

I flew to your world for the first time in 1983 and everything I saw here makes me want to help each of you learn to live in true harmony with yourself, with society, with the living world of the planet, with its subtle material worlds, with the cosmic civilizations of all types and forms and with God, our common Heavenly Father.

Only harmony and balance of all energy structures of the universe can lead to the merging of the rational spirit with the energy of Absolute

Love and perfect Light, which brings endless happiness, which is much more difficult to describe in your language than to show a blind person what light looks like.

I have no other goal than to show you the path to your inner Light, which will always teach and instruct you and drive away despondency, fears, irritation and other destructive feelings that destroy you and through you the entire material world.

Conditions for admitting Earth to the Interstellar Union

https://blog.cassiopeia.center/ShGijjZd-Da

1. The cessation of all military conflicts on Earth and the beginning of the destruction of especially dangerous types of weapons.

2. Stop the propaganda of violence and the creation of a negative image of aliens in the media.

3. Putting order in the ecology of the Earth: creating plants for processing solid waste, searching for alternative types of engines for transport, all possible measures to reduce emissions from chemical plants, combating the greenhouse effect caused by the accumulation of carbon dioxide in the atmosphere.

4. Changing the attitude of the authorities towards the common man, implementing the principle: “Power is for the people, not the people for the authorities.” Adopting laws that truly protect the weakest people in society.

5. Abolition of the death penalty in all states of the Earth. The introduction instead of long or life sentences, with mandatory physical labor.

6. Respect for human life from the moment of conception.

7. Abolition of all totalitarian regimes. Mandatory freedom of speech and freedom of conscience.

Mass contact with Earth is possible only with the permission of the Interstellar Union, which will give it no earlier than five years after the last military conflict on the planet.

A real trip to the archives of Burhad

https://blog.cassiopeia.center/+mezhzvyozdnyj-soyuz

After joining the Interstellar Union, earthlings will have access to all videos and documentaries about real history.

This video library - a collection of materials in video, audio and text

formats - is located in a special archive of the Interstellar Union, in the archive of historical materials on space civilizations.

This archive is located in one of the cities of the planet Burhad. After joining the Interstellar Union, any earthling will be able to buy a ticket on a starship to Burkhad, fly to this planet and study the archive.

Those who are not contactees and those who are not curators - they buy tickets for starships of the Interstellar Union. The government provides this opportunity to curators.

For those citizens who do not work with alien civilizations or do not work in space, but simply want to travel, they, like you, buy tickets in different transport communities of the Galaxy.

There are a lot of them: more than one and a half thousand transport communities offer their services, created by different planets. They are private, there are public and also related to some government of the planet. There, one might say, there is very tough competition in terms of prices and services.

As soon as the Earth joins the Interstellar Union, certain creatures, humanoids, will fly here and open “space stations” - spaceports. A flight schedule will be created there.

The entire monetary system will be brought into line with the Interstellar Union. In fact, it will remain the same, but exchange cards will be introduced.

Currently, there are 17 major galactic currencies that circulate throughout almost the entire Galaxy. You will most likely join the Burkhadian currency system, because... you have been their colony for a long time and you have the most of their genes. You will be able to exchange for this currency.

With Burkhadian currency you will be able to fly throughout the Galaxy and make the acquisitions and purchases that you need.

After joining the Interstellar Union, economists from Burkhad, from Esler, from Tumesout and others will fly here and negotiate with earthly economists, they will look at the price chart, the correspondence of these prices to the quality of the goods and many other nuances. In general, this will take no more than 2-3 Earth months.

When the currency is brought into line, it will be possible to buy a ticket and fly to the planet Burkhad on a gravity spaceship, which flies in just a few minutes.

In Burkhad, it will be possible to buy a small robotic translator that is easy to carry. He tunes into the earthly language and the language of the planet Burkhad.

At the Burhad spaceport, by boarding a flying airship (analogous to a local bus), it is possible to fly to the city where there is an archive, and they will give full access to the materials of interest. The translator will automatically translate everything into an accessible language by voice.

Political system of the planet Esler

https://blog.cassiopeia.center/qVcA2FHdqhr

One hundred and sixty of the largest cities on the planet Esler form special territorial units - districts.

Three representatives are elected from each district to the Esler Council: two go to the capital, and one remains in the district. Two capital employees replace each other at the workplace by personal agreement. Anyone who remains in the district has the right to invite employees to work together, acting on the principle of joint responsibility.

An employee of the Esler Council may belong to any profession and specialty, but if he agreed with his selection for this position, then he leaves his job and is completely involved in Esler's affairs.

In the Esler Metropolitan Council, the chairman is elected by its members.
The Council's term of office is 26 years, but if the district does not feel helped in its affairs, it has the right to remove its former nominee by holding a popular vote early.

The Esler Council has a Legislative Group, consisting of sixty inhabitants of this planet, which is engaged in developing new laws or improving old ones, as well as monitoring the impact of Council policies on society.

If a decision is made to issue a new law, it is planned and developed in the most detailed manner by the Legislative Group, which takes into account all the nuances of its application in practice.

After this, the draft of a new law or amendments to an old law are

considered by the Esler Council, and then the law is modified accordingly or completely rejected.

If, nevertheless, the innovation is recognized as useful, it is transmitted via electronic communication to every adult resident of Esler - no matter where in the Galaxy he is located.

The draft of the Legislative Group is transmitted to the population in a simple and accessible form, and only if at least 70% of Esler's population approves this bill, it will be adopted and gradually introduced into all spheres of society.

The system of universal voting for the approval of bills makes it possible to suppress possible abuse of power by Esler Council employees in their own interests.

Poem from Mirah Count

https://blog.cassiopeia.center/ZnY3nwifcvT

Once I gave a cosmoenergy session to one of my friends, and after the session he wanted to talk about his problems with one of our extraterrestrial friends. Representatives of other civilizations regularly come to me in astral bodies to convey a wide variety of information about their worlds and answer questions from interested people who contact them through me.

So this time my friend and I didn't have to wait long. While we were talking over a cup of tea, an inhabitant of the planet Burkhad, Mirrah

Kaunt, who is a representative of his planet in the Interstellar Union and a specialist in ideological work with young civilizations, a xenobiologist and psychoenergeticist, came to me in his astral body.

He quickly grasped the essence of the problem of my friend, who was sitting next to me, and addressed him through me with words of encouragement and support.

He began his speech with an unpublished poem by one of his Russian contactees from the early twentieth century. My friend and I liked it so much that I decided to share it with you:

> Why do you live, man?
>
> What is the meaning of your nature?
>
> What do you strive for all your life?
>
> What are you wasting your years on?
>
> How are you different from animals?
>
> After all, you are like them in everything:
>
> You suffer, you eat and you talk,
>
> They give birth and so do you.
>
> Sleep, drink and love,
>
> you build a home
>
> You get sick, you take revenge, you get nervous,

You forgive rarely and with difficulty,

You strive to be the first among equals.

For a juicy, tasty morsel

Day and night you risk yourself,

And whoever lives or dies,

As the king of beasts, you always judge...

So why are you alone?

Do you live with an immortal soul?

Is it possible that the race of beasts

Replenish yourself on Earth?

After reading this verse, Mirrah Count talked through me with my friend for about half an hour, explaining to him the reasons for his problems and showing him ways to overcome them. The man felt the presence of the alien next to us, understanding and accepting every word addressed to him.

At the end of the conversation, he could barely hold back tears of joy and shock from the feeling of friendly support and the light of love emanating from the invisible, but no less real, astral body of one of the representatives of the Interstellar Union, who once again showed concern for us as friends and younger brothers of their civilization.

Over many years of contact, I have been convinced many times that representatives of the Interstellar Union not only do not pose any

threat to the Earth, but also tirelessly and selflessly work for our well-being, spiritual enlightenment and Divine perfection, despite the considerable difficulties they encounter on our planet from -for the enormous skepticism of its inhabitants and almost universal suspicion.

Parting words to earthlings from Ashtar Sheran

https://blog.cassiopeia.center/naputstvie-zemlyanam-ot-ashtara-sherana

> I am now addressing every inhabitant of the Earth who is watching contactee Irina, and I want to convey through her that I have been in this incarnation for so long, because my mission to protect this planet is not over.
>
> I will leave this incarnation and go into the next one, when the Earth will be accepted into the Interstellar Union. I myself can decide to leave incarnation, but I have set a goal to protect the boundaries of the planet so that no aggressive civilizations attack, and to tell other representatives of my civilization who are born again about this war.

Ashtar Sheran - head of the space fleet of the Galactic Federation of Light (GFS)

Explanation of the global catastrophe 12 thousand years ago, known to us as the global flood

https://blog.cassiopeia.center/globalnaya-katastrofa-12000-let-nazad

After the creation of people, they were given the opportunity to live and develop on Earth independently. For approximately 2 million years, human civilization has actively developed with the support of our creators, who in many cases acted openly.

It was during this huge historical - more precisely, prehistoric - period that the legendary earthly super-civilizations arose and reached perfection, fragmentary information about which has reached us (first of all, Lemuria and Atlantis, which represented the late stage of the development of Lemuria).

This was the era of the heyday of earthly humanity, which was accompanied by grandiose achievements in all spheres, cyclopean structures on the planet (we know some of them as “Wonders of the World”), as well as an understanding of all the bright spiritual truths. This era is called in ancient Indian literature Satya Yuga - the era of Light.

The Vedic texts that have come down to us from the ancient Hindus also talk about vimanas flying ships (even their diagrams are given), about medicine, which we are far from, about the structure of the atom, the structure of the cosmos, and about many other things, later completely forgotten or rediscovered. About 200 thousand years ago, colonies of earthlings, with the help of alien technology, appeared on Venus and Mars, which at that time were suitable for protein life, being in different orbits relative to the Sun and having atmospheres comparable to the earth’s. A more detailed description of this long and

very eventful era represents, to put it mildly, a very large amount of information, which will certainly require completely different forms of presentation than this article. Therefore, here we will immediately move on to the event included in the title of this publication.

If you look at materials on the Internet, you will find information that, based on completely scientific data, there is a hypothesis about some kind of extraordinary catastrophe on the planet that occurred approximately 12 thousand years ago. This, in particular, is confirmed by the found mass graves of different species of animals dating back to just the indicated period.

At that time, on the reptilian planet Selbet, an extremist (as we would say) group came to power. Its representatives began to pursue a policy of aggressive denial of the values of the Interstellar Union, which still included their civilization. Obviously, the long history of people created contrary to the genetic wishes of Selbet scientists also haunted them.

In the end, Selbet started a war, which first took place in another part of the Galaxy, far from the Solar System. In our system, for a long time everything was still calm, people and aliens collaborated, communicated and, so to speak, carried out various joint projects.

Maire Pyyukko. The beginning of the war. Watercolor, 37 x 28 cm

The aliens' main base in the solar system was located on the planet we know today as Phaethon, it was located between the orbits of Mars and Jupiter at a distance of approximately 2.8 astronomical units from the Sun. Another, more correct (original) name for this planet is Nubiru, and we know it under the name Phaethon, since this name was taken from Greek mythology, where it was used to name a mythical character who disobeyed the gods.

There were also bases on other planets, including the Moon, which was in a separate planetary orbit, more distant from the Sun than Earth's. The center of earthly civilization and at the same time the central base of the Interstellar Union on Earth was a metropolis (let's call it that), located on a huge mountain in the place where the

Bermuda Triangle is now located. There was dry land there then.

12 thousand years ago the population of the Earth and its colonies reached approximately 55 million people. Our planet was still dominated by an essentially heavenly climate, summer temperatures all year round, and there was practically no snow or ice anywhere. Such a life did not in any way imply the presence of any serious military structures capable of repelling external aggression. Apparently, this was what the Selbetites, who had become aggressive, were counting on when their military fleet completely unexpectedly invaded the Solar System.

Movement on gravitational engines, which were already available then, makes it possible to almost instantly appear at a given point in space without preliminary physical signs of the ship moving to this point for an outside observer. Naturally, Selbet's fleet struck the first blow against Phaeton - in order to immediately destroy the main center of possible resistance.

We were talking about the massive use of geophysical and at the same time space weapons, of which we (fortunately) have no trace. Apparently, nuclear weapons are simply “resting” in comparison. Based on what we have been told, this weapon is based on the same gravity and causes fast-moving irreversible cataclysms on a relatively small planet of such power that they very quickly lead to the disintegration of the planet into fragments. This is exactly what happened to Phaeton. Now in the area of this destroyed planet, the existence of which was suspected by a number of terrestrial astronomers, there is a known belt of asteroids of various sizes. These are its remains. Everyone who was on Phaeton died.

Immediately after this terrible blow, representatives of the Interstellar Union, located on ships in space and at other bases, quickly calculated the entire situation with the attack on Phaeton and realized what was happening. It became clear that Selbet's next targets would be the Earth (as the cradle of humanity), as well as Mars, Venus and the Moon. At the same time, we must keep in mind that we are not talking about some long time here - everything happened in minutes and even seconds of earthly time.

Naturally, a call for urgent military assistance was immediately sent from the Solar System to the MS. For communication, aliens do not use low-speed radio waves, but completely different means (the so-called gluon communication), which actually convey information almost instantly. However, to send warships capable of stopping the aggressors to us, a certain time was still necessary.

Therefore, the unarmed ships of Burkhad and Tumesout, located in space close to us, essentially sacrificing themselves, tried to disrupt Selbet's plans or at least gain time until the battle fleet of the Interstellar Union appeared.

Many of those reading this article have already drawn an analogy with Star Wars. It is impossible to come up with anything from scratch, including Star Wars and any other "science fiction", "fairy tales", "myths" and "legends".

In parallel with the confrontation in space, the forces of light did everything possible to save earthlings - both on our planet, and on Mars, and on Venus. From Venus, almost all the colonists managed to be evacuated to lunar bases and alien ships before the Selbet weapons were used on it.

On Mars, unfortunately, almost everyone died. Since they could only destroy a small planet using the method described above, other types of weapons were used on Mars, Venus and Earth. So, on Mars, the Selbet weapons caused a collapse of the atmosphere; in fact, cities and bases on the surface were swept away from the planet along with the atmospheric shell. However, their traces can still be found in the region of one of the polar caps of Mars.

However, Selbet's initial plan to destroy everyone on all planets at once was thwarted, as far as we were able to understand, for two reasons - Selbet's people did not expect that unarmed ships would resist them, taking the blow themselves, and in addition, they underestimated Burkhad's capabilities and Tumesouta.

In the Solar System, already about 1 Earth hour after the strike on Phaeton, the first warship appeared, called for help, and this gave a

chance to save some of the people - although this ship itself was soon destroyed by the superior forces of Selbet.

Selbet still managed to deliver a massive blow to the Earth. These were geophysical weapons, which were bombs that were launched from space. They looked like huge white balls falling onto the planet, connecting with the earth's core and causing a number of global cataclysms - from unprecedented floods to massive volcanic eruptions.

The author of the drawing is Kirill Nikolaev. War 12,000 years ago

The power of this weapon was such that a split of the single earthly continent occurred. Tectonic plates diverged, Africa and South America were formed from a single continent, as well as other parts of the land, many islands, and so on. Other types of alien weapons were also used, which caused the effect of fiery rain and other phenomena on the surface that could destroy all living things.

One of the first terrible blows was deliberately struck against the mentioned capital of earthly civilization on the site of the current Bermuda Triangle. As a result, not only a deep depression was formed there, then filled with sea water, but also a serious interdimensional portal to plasmoid worlds, which is the cause of the massive anomalous phenomena observed in this area. This portal arose, in particular, due to the fact that a very large number of earthlings and aliens from different civilizations died here at the same time.

We hope that behind the dry lines of the article you realize the scale and tragedy of this entire planetary catastrophe... But everything was even more serious.

The Selbetites, with the help of the gravitational field of their ships, shifted the Earth's orbit, and it began to move away from the Sun. The climate on the planet began to change sharply, what we now call winter appeared, snow began to fall... And most importantly, the Earth’s orbit approached the orbit of the Moon, which, as already mentioned, was a separate planet at that time. This was the goal - to collide the Earth with the Moon, completely destroying both planets.

At some point, the Moon found itself at a distance from the Earth 4 times smaller than it is now. Naturally, giant tidal waves arose (before this there were no ebbs and flows at all), as well as other disturbances in the atmosphere and, in general, the same Great Flood or a whole series of floods occurred.

The Burkhadians and Tumesoutians tried to save as many earthlings as possible on their ships, taking them to extraterrestrial bases and other planets. The same thing happened with samples of the earth's flora and fauna. Representatives of earthlings themselves helped save people and the gene pool of the planet by organizing an emergency evacuation of the population and animals on alien ships. This is reflected in the story of Noah and his ark. Noah, obviously, was one of these earthlings, and at the same time, this is a collective image of all such rescuers.

At the same time, the spaceships of Burkhad and Tumesout, opposing Selbet, jointly managed to create a gravitational field that stopped the approach of the Earth and the Moon. They were able to install the Earth in a new – current – orbit, and the Earth captured the Moon with its gravity, “making” it a satellite.

After additional adjustments, our space situation became the current one. It is the artificial rapprochement of the Earth and the Moon with the subsequent “capture” of the Moon by our celestial body, and subsequent artificial adjustments of the orbits that explains why the Moon is always turned to us on the same side.

According to the information transmitted, after the use of weapons from space, there were also cases of armed Selbet troops landing on the surface of the Earth for the purpose of, so to speak, cleansing. These were not massive operations, but on the surface there were also open clashes between Selbet and our other creators.

Thus, a global war occurred in the Solar System and directly on Earth, which essentially changed the appearance of our part of the Solar System, not to mention the Earth. This was the “War of the Gods”, which has come down to us in various ancient legends and fairy tales. Ultimately, the forces of the Interstellar Union, at the cost of heavy losses, managed to cope with Selbet, who was aggressive at that time.

The civilization of this planet was isolated and excluded from the Interstellar Union, as it later turned out, for 250 Earth years. From the moment of the first strike on Phaeton until the complete cessation of hostilities, approximately 130 years passed. However, the most active phase of the war with attacks on planets from space lasted only a few Earth days.

On Earth and other planets, approximately 10 thousand earthlings out of the mentioned 55 million were saved. People died directly from the use of terrible weapons, and from the cataclysms they caused, and from the consequences of sudden climate change, for which they were completely unprepared. Together with earthlings, a total of approximately 20 thousand friendly aliens died on the planet and in the solar system.

Selbet's losses amounted to approximately 5 thousand - since the Selbet men were on well-protected warships and did not fall victim to an unexpected attack. Ancient civilizations with all their achievements were literally wiped off the face of the Earth. Among them is the legendary Atlantis, the approximate dating of the destruction of which exactly coincides with the time given by Plato in his famous dialogues.

After several decades - after the catastrophic processes on Earth had calmed down somewhat - the surviving earthlings were returned to the planet. Some of our ancestors were taken to the distant planet Disara, the location of which is also known. There now exists a highly developed civilization that has joined the Interstellar Union. Outwardly, its representatives are practically no different from us.

After several hundred years, the situation on Selbet changed. The extremists lost power, and the reptilian civilization, at their request, was readmitted to the Interstellar Union. The Selbetites admitted their war against other civilizations was a mistake. Currently, Selbet reptilians are active participants in many studies conducted by the Interstellar Union.

At the official level, they treat earthlings with respect and friendliness, including the astral contact of Irina Podzorova with the reptilian scientist Selbet. Among ordinary Selbet residents, as we understand,

the attitude may be ambiguous, but in any case, there has been no aggression towards the Earth on the part of Selbet for a long time. They currently do not have their own bases on our planet (unlike several other civilizations). Military actions with Selbet in our part of space received a special name in the Galaxy - in the Interstellar Union these events are called “The War of Selbet with the colonies of Burkhad in the Solar System.”

As for the Earth, here, several hundred years after the war, a group of people made an attempt to reach their creators on the Moon by building a spaceship using nuclear fuel, the secrets of which had been known since pre-war times and passed on from generation to generation . The ship they built was imperfect, dangerous for earthlings and for the ecology of the planet, so our older star brothers decided to intervene and explain to people that the time for flying into the sky had not yet come, and there was still a lot of unknown on their native Earth.

This is exactly what the myth of the Tower of Babel, transmitted to Moses, tells about. The aliens argued that people must first populate the Earth, learn to build cities, begin to make perfect ships themselves, and most importantly, live in peace and harmony among themselves, and only then will they acquire the right to explore the Universe on spaceships in cooperation with their creators.

People agreed with the fairness of these proposals and asked those whom they considered Gods to help them explore the greatly changed planet and arrange life on it. Leading psychologists and physiologists of the Interstellar Union decided to create several different ones from the previously single race of earthlings - with the goal, on the one hand, of adapting them to the climate that had become different in different parts of the globe, and on the other, to begin the fight against xenophobia as the main obstacle to joining the Interstellar Union. A union for many young races.

Thus, through small artificial genetic mutations, four main races were created from the formerly single race of earthlings, from the mixture of which, in turn, the modern peoples gradually emerged.

After all the described events on Earth, but somewhat later, our era

began, the history of which has partially reached us in a more or less distorted form. It was already a completely different era on, in fact, another planet - the planet that we know now.

We humans, on a subconscious level, no longer trusted aliens as before, having absorbed all the horror of what happened. Fear gradually became one of our main feelings, which largely eclipsed love. Not just specific fear, but fear as a general concept and general motivation for actions. All this was one of the reasons why open contacts with extraterrestrials gradually ceased, giving way to their communication with individual contactees who matched them in their vibrations - vibrations, first of all, that did not contain fear.

Origin of Shambhala

https://blog.cassiopeia.center/proiskhozhdenie-shambaly

The original origin of the word Shambhala is precisely from Esler's words. The fact is that on our planet there is a city - the capital of our entire planet, which in your language sounds something like " *Shamba* ". In the Eslerian language there is a word " *Loa* ", which means an alien who came from somewhere.

One of the alien bases was in the mountains of Tibet, then it became a little further north and was moved to the mountains of Southern Altai. At first it was Esler's base, and then passed on to many civilizations. Now there are representatives of many civilizations there.

During the contacts of Esler's representatives with the tribes that inhabited the territories of these mountains, with ancient contactees, even before Blavatsky and the Roerichs, even before your new era, people heard that these were aliens from Shamba, Shamba Loa, and they formed the word Shambhala. This was originally the name of the

base of aliens who monitor the development of earthlings.

Later, this word acquired another meaning in addition to the base. This is a certain area of the Spiritual world, from where those mentors from the 22nd - 23rd level , the Angels, who monitor the development of your planet, observe.

Those who come to the bases and follow the development of the Earth in physical bodies from other planets are very often incarnations of these highest Spirits from the 22nd - 23rd level, who, leaving their physical bodies, return to their spiritual Shambhala and observe from there development, and are making plans for further promotion of the ideas of light on Earth.

Alien children on vacation

https://blog.cassiopeia.center/inoplanetnye-deti-na-kanikulah

Children in Pikran (Burkhad) study at home until they are 12 years old. At this age, they resemble our children - at the same age or a little younger. Then they have the first level of school, there are four such levels in total. Each stage lasts two years. In one year there are 79 of our months, if you count 30 days.

Schools are often built in picturesque natural locations, usually students of the same grade from the same city study in the same building. The student comes to school for 96 days, 5 times a year. Between these periods there are home holidays of varying lengths, all lasting a total of 80 days.

Burkhadians live in houses with oval or round rooms, without corners. Each family member has his own room. Usually there are several

biorobots in the family that monitor the nutrition and health of the Burkhadians and the cleanliness of the house. Biorobots can be configured for different functions.

The morning for adults and children over 10 years old, or even earlier, begins with a mental appeal to God - with gratitude and a request for blessing.

The approximate meaning of the appeal is:

> “Creator of all worlds and my Father, I thank you for the new day of my incarnation in this beautiful world! Fill me with the light of Your Wisdom and the Energy of Love, for the full manifestation of me in this space and time - as Your Child and Collaborator, in doing my own deeds, in agreement with Your Almighty Will, which I trust completely, consciously and freely.”

Then everyone has breakfast with plant fruits, the juice of these fruits, various herbal soups, herbal purees and seaweed balls. They drink an infusion of flowers from the Zvarlash tree, which tastes like our tea, and snack on cheese made from the milk of Gomroshil animals. These animals are similar to our deer - but without antlers and with bright orange fur. Their milk is yellowish in color and their cheese is pale pink.

After a light breakfast, everyone bathes, receives massages and various treatments. Then someone flies to work in a craft that resembles a silver blimp. They have it instead of a bus and metro. The device is controlled by a special computer. Someone sits at home and communicates with other residents via the planetary information network. This is similar to our Internet - only with the ability to connect a galactic communications module.

During the day, Burkhadians go for walks and do physical exercise. They love to move to music and swim, including underwater in special suits. They generally love nature and are happy to fly in their personal disc-shaped aircraft outside the cities. They like to live on the outskirts of cities and between them - in one-story houses with domes,

characteristic of many worlds of the interstellar union. In the city centers there are high-rise buildings, 30-40 floors, but different institutions are located there - both Burkhadian and galactic.

During the holidays, children are assigned to perform practical activities, for example, observing animals, searching for spiritual qualities in themselves and others, recording astronomical events, communicating with plasmoids, etc. Children always try to do everything themselves, because they are not afraid to make mistakes and understand that all this will be useful to them in adulthood.

Their rooms are spacious, rarely less than 30 square meters. There is a place to sleep, a bed of various heights and shapes, cabinets, armchairs, paintings, a communication module (computer) and so on. There may also be antique things on the shelves: books, watches, figurines and gifts from friends and relatives. There is a pull-out table near the window where the robot brings food. There is also usually a large hall in the house where everyone gathers and talks. There is a soft, warm floor, and in the ceiling and walls there are light panels that can create three-dimensional pictures in the room. They have good sound insulation; if you close the door and window, you won't hear anything in the room. A special home bracelet warns about guests, which opens the door to the house. It contains electronic data about the owners of the house.

The spirit of the forest is called Aksiraami in Burkhadian. Aksi is the forest, Raam is the embodied spirit.

Burkhadian children are different in their upbringing. They are taller than us. Very confident, they love to explore the world and communicate with adults and each other. They are taught to help each other, rejecting violence and arrogance. They have white skin.

Their children develop at almost the same speed as ours. The lifespan can be up to 10-15 thousand years. But maybe 500-600 - if the spirit completes its task. They usually exit from incarnation not through illness or an accident, but through a meditative state with a voluntary disconnection of the vital thread of the astral body from the physical.

Pikran is translated from their language as “ *harmonious peace* ”. There are many poetic names. For example: “pearl of space”, “abode of constellations”, “homeland of the gods”, “father of the star family” and so on.

Editor's note : you and I live exactly on the planet that is best suited for realizing the spiritual goals of our current incarnation.

Raom Tiyan is a specialist in energy interactions in the universe, planet Burkhad.

Why does the Interstellar Union prohibit evidence?

https://blog.cassiopeia.center/pochemu-mezhzvyozdnyj-soyuz-zapreshchaet-dokazatel

I was given the answer to a question that had been bothering me for a long time through a telepathic channel:

> Why does the Interstellar Union prohibit its representatives from providing evidence of contacts with them to the entire terrestrial society or its individual representatives?

Here's the answer:

Contactors with the Interstellar Union have been on Earth at all times. At first, no one needed evidence of contacts, because they were open to everyone, but this interfered with your independent development, because you relied more on our knowledge and experience than on following your own path, which always needs to be done through your own trial and error.

In order not to grow a civilization of a parasitic type, but to get full-fledged employees, it was decided to switch to hidden contacts with individual representatives of the Earth.

Over many thousands of years, you have developed a certain type of civilization, in which people with a developed animal nature come to power. They create the environment on Earth that each of you sees.

For this reason, it has become dangerous to give real evidence of contact with us. It is dangerous for the contactees themselves, because your government and military structures can harm them, trying to find out from them things that are too early for them to know and fearing that the civilizations of the Interstellar Union can harm the Earth.

A contact policy was developed, which included laws on actions that are prohibited from being performed with contactees.

Among them are the following:

> Providing material evidence of contact of any kind (objects from other planets, photos, videos, etc.).
>
> Providing evidence of contact in the form of knowledge that the contactee, for objective reasons, cannot know and is not able to obtain in any way.

Odus is the main coordinator of the planet Esler for interaction with the civilization of Earth.

The Pascata civilization is about earthly cats. Why do cats purr?

https://blog.cassiopeia.center/pochemu-murlykayut-koshki

We've researched your felines. I can tell you why they purr when you pet them.

Cats have good contact with plasmoid civilizations. They can see entities that are near you. They have good spiritual vision. Their animal soul can be tuned to this channel.

With the sounds of purring, they call their patrons from plasmoid civilizations to contact them in order to transmit healing energies. When they lie down next to you, they try to take the place that their mentor from the plasmoid world indicated to them. He conveys this to them in images.

Cats may do this for their children or for you. They love you, but with the same love as they love their children or parents, depending on the age of the cat.

The structure of the Medical

Service using the example of the planet Esler. Obstetrics

https://blog.cassiopeia.center/struktura-medicinskoj-sluzhby

Our medical facilities are on planets, at bases on other planets, and in space at space bases. During an expedition, there is always a medical specialist on board the ship. Unlike you, we have many robots in our medical institutions. They participate in almost all medical processes, starting from birth. I can take, as an example, the planet Esler. On other planets it is practically the same, with slight variations that are characteristic of one or another race.

On Esler it is customary to give birth to children while at home. The husband, mother or anyone who will be nearby can help the woman in labor and the baby. Due to her physiology, due to the fact that every girl communicates with the Higher Self, with the Soul of the child, from childhood, this help is required very rarely. Our race is characterized by the fact that our women give birth to children quite easily.

On other planets where intelligent life evolved from creatures similar to your primates, there are times when help is needed. The child is born more helpless. There are special houses, just like you have a maternity hospital. It is large, and each woman who is admitted there is assigned a separate specialist. It could be a robot, a specialist from her planet, or an alien specialist.

In the Interstellar Union, in any medical institution (for example, on Esler), not only an Eslerite can work, but also a specialist from any other planet of the Interstellar Union and even the Galactic Federation of Light.

The Galaxy Medical Union is an association that does not bridge the boundaries of political unions. This is a supra-political structure, like all scientific associations. Our medicine is part of our science. Our science about the world around us, naturally, is not separated from

spiritual knowledge; we have it all together.

What kind of doctors do we have?

There are surgeons, traumatologists - in space you can get any kind of injury. There are specialist psychologists who help determine the spiritual cause of the disease - psychologists of the Spiritual world. It's like your Higher Self specialists , only they additionally have the ability to see this spiritual reason. They don't voice it, but help the humanoid they addressed to see it.

All medical institutions are directly subordinate to the Government. Private medical institutions exist only on some planets, but they are also under control. There is a government commission. Only those humanoids who pass special, more practical tests are hired there.

A student (what is your name) who has graduated from an educational institution to become a physician speaks before a commission of physicians (usually 5-7 physicians who already have at least 20 of your earthly years of experience). They offer him to examine the patient, make a diagnosis, and prescribe a certain set of treatment. Or even take you to the Higher Self . They will decide whether to accept him into their community or not. If they decide this (they do it by voting), if everyone agrees to accept it, then this student must work for three of them. They are responsible for it.

Some time passes, he practices, and becomes a specialist like them. First he is a beginner, then he gains qualifications. After acquiring qualifications (it depends on the percentage of successful, as you call it, medical histories, but ours is not a medical history, but a history of disruption of the energy-informational structure, including the physical body), doctors of the Interstellar Union participate in training others.

Who has the right to study to become a

doctor?

The one who was still a child (in his middle cycle of education) chose the science of man, the humanoid - anthropology. They study it more than the science of the Cosmos, technology, art, the Spiritual world, etc. This specialization begins in childhood.

Doctors, naturally, are constantly in contact with each other and with doctors from other planets. They can contact, fly in and discuss some cases together at any time. Doctors' assistants (in your country this is called nursing and junior medical personnel) have practically been replaced by robots.

This is how our healthcare system works. In terms of the availability of medical workers: according to our standards, there are 50-60 doctors per thousand population - this is on average. They mainly practice preventive medicine. It depends on the planet. If the situation on it is more unfavorable due to some disease, then this number increases, because they fly in from other planets to help solve this problem. Conversely, if there are medical workers who do not have jobs even in the field of preventive medicine and teaching, they fly to planets where their work is needed.

Our medical worker is a very respected and significant profession. It is associated with constant movements in Space. The ship's crew must also include a medical robot. For 15 crew members on average, according to the rules of the Interstellar Union, this is for anthropomorphs, there should be 1-2 medical robots and one doctor. He must have a specialization not just as a surgeon, a therapist for spiritual reasons, but also know all of medicine, like a general practitioner.

On the bases of other planets, including on Earth (for example, on our Esler bases on Earth), since it is considered a high-danger planet for some reasons, for every 50 humanoids there should be one medic and four robots with appropriate equipment. This is the rule.

The professions of doctors are very well paid by our Government.

Their prestige rises in society. The salary level depends on the qualifications of the doctor, which (as I said) in turn depends on the percentage of the ratio of successful and unsuccessful cases of maintaining a medical history, and necessarily patient reviews. All this affects his qualifications, which means his place in the hierarchy of doctors and, accordingly, earnings and respect in society.

Alien women. Contraception and infertility

https://blog.cassiopeia.center/inoplanetnye-zhenshchiny-kontracepciya-i-besplodie

Women's nature has a natural attraction to their native planet and home, attraction to their children, parents, nature, therefore there are much fewer women on alien bases than men. Women themselves want to remain the most beloved and beautiful stars for their men, husbands, brothers and fathers who fly to other planets.

With us, every woman and man can go into the Spiritual world, talk with their Higher Self and ask in advance, for example, a year in advance, two years in advance, whether the Soul is going to incarnate.

They ask their mentors if the Spirit is going to incarnate, they can ask which one and talk to him. There are such techniques. If a woman or man is not ready to embody it, then they agree with this Spirit so that it comes later or to other parents.

In case of a conflict between the Spirit of a child and the Spirits of mom or dad - this happens - when he says that I need to incarnate with you at this time, and she refuses, since she has her own plans for this period, then they turn to medicine. She has every right. This is not protection, but an impact on its energy with a special apparatus, in which the living Soul cannot join at a certain time. This is a bioenergetic effect on her aura, on her subtle bodies.

This happens quite rarely. Isolated cases. Usually it is possible to agree on when she will implement it and why, but first she will fulfill her plans. For example, Duhu explains: “ *I need to fly into space, and there will be no one to take care of you* .”

A compromise is usually found.

In order for earthlings to do the same, they need to communicate on a conscious level with their Higher Self, with their spiritual Mentors. 88% of the population cannot do this yet.

The safest on earth now are barrier methods of contraception, not chemical ones. At the same time, they should not be abortifacient. Abortion methods include the intrauterine device.

Causes of infertility

There may be physical reasons, for example illnesses: infections, infectious diseases, hormonal disorders, when the Spirit in the Spiritual World can choose a mother or father to incarnate, but cannot do this due to physical defects.

It is necessary to find out the causes of infertility at all levels: physical, energetic, spiritual. Start with a spiritual reason. It happens that everything is physically fine, but conception does not occur in a person: a man or a woman. The reason is spiritual: either this does not correspond to the life task of people, or they are simply not psychologically ready at the moment for such a responsible activity as raising a child.

This reflects the level of their desires. Desires can come from the Higher Self in the form of intuition, and from the instinctive part of the spiritual heart, from feelings, mental attitudes in society. You need to understand where the desire comes from.

If a woman does not become a mother, how does this affect her body and health?

It all depends on her psychological mood and spiritual purity. If she is in high vibrations and does not blame herself for her inability or unwillingness to have children, she will not succumb to the attitudes of society that say that having a child is normal and wanting a child is normal, and everything else is a deviation. If she does not succumb to these suggestions, but is in the Light of Love and fully accepts her fate as it is and thanks God for it, then she will not have spiritual causes of illness.

MidgasKaus is a biologist, psychologist and specialist in alien civilizations, a representative of the planet Esler.

Message from Kirkhitona

https://blog.cassiopeia.center/poslanie-ot-kirhitona

Kirchiton : Raise your face to the stars, we remember you. You are not alone.

Irina : And we usually say “ *eyes* ”.

Kirchiton : It's because you have a neck, and automatically when you throw your head back and lift your face, you lift your eyes. That’s why you don’t mention this, because you’re already used to doing this, but with us, in order to look at the stars, since we don’t have a neck, we have to bow with our whole body, and that’s why it turns out that we say “raise your face.”

Message from Ashtara Sherana

https://blog.cassiopeia.center/poslanie-ot-ashtara-sherana

If a person learns to live in the light of God, he will enter into a state of communication with the disembodied part of the Spirit at any moment in time, all doubts about his spiritual path will disappear, the reasons for aggression, anger and resentment will disappear, he will be completely harmonious with himself, God and the surrounding world.

July 14, 2022

About incarnation on earth from LiShioni

https://blog.cassiopeia.center/o-voploshchenii-na-zemle-ot-lishioni

Incarnation on Earth is a unique opportunity to experience all levels and spectrums of emotional and sensory states in the earthly body in a short number of years.

In fact, this embodiment is very valuable for any of you. Earth is a planet of free choice in the sense that here you independently choose whether to believe in God, follow the spiritual path or the path of a materialist, given that even in school they don't teach you about the Spiritual world and the fine-material plasmoid worlds.

Here you are completely free to choose the ideology in which you will believe and which will shape your life. And thanks to this freedom, you can build the reality that is close to your heart. Not because you were raised this way, but because these are exactly your feelings.

Your school curriculum, which I studied, only gives an idea of a small part of the physical material world and a very small part of the world of art. She practically does not talk about the Spiritual world, leaving you the opportunity to find out for yourself.

Here you need to look not for the negative, that your school program is so bad, but for the positive. Since I was not given this at school age when communicating with the Higher Self, with the astral world, with the Spiritual world, I can now go through it, I can pass it on to my children in understandable images.

You also have a large amount of animal and plant life on Earth. This is not the case on any planet in our Galaxy. You are not embodied here by chance, but to learn to love and thank God and everything around you. A lesson in love.

Whether you perceive it as a punishment or a reward depends on your perception. I really like what one of the spiritual teachers from the East said:

> “A fly and a bee fly across the same meadow, but they see completely different substances.”

Li Shioni is a specialist in astral interactions and the study of the relationships between the spiritual and material worlds, planet Shimor.

Accidents are not accidental. MidcasCaus

https://blog.cassiopeia.center/sluchajnosti-ne-sluchajny

Everything has its own meaning and its own purpose. The Spirit itself creates them before incarnation, but in alliance and advice with consultants of the Spiritual world, whom you call the Higher Teachers. They always create and send only those circumstances and conditions that will contribute to its development and the growth of spiritual vibrations in it, in comparison with the material.

July 17, 2022

The quote from Jesus Christ

https://blog.cassiopeia.center/citata-ot-iisusa-hrista

Light is always stronger than darkness, because darkness, by itself, does not exist. There is only Light in different manifestations. What you call darkness is an incompletely revealed or misunderstood or rejected Light.

Therefore, I want to turn to each of you, not just with parting words or advice or recommendations, but simply with the wish to look now inside your Soul and know that you have nothing but Light, but that you manifest it depending on understanding of this Light. If your Light turns into darkness, it is only because you do not consider this Light to be Love for yourself, for your neighbor and for God

July 21, 2022

Message from Zaliathar

https://blog.cassiopeia.center/poslanie-ot-zaliatara

Every person you speak to is Divine Light. You are also Divine Light, and your sense of the truth of what is happening depends on the degree of awareness of the energy of Love in you.

The more the energy of Love is developed in you, the higher your vibrations, the more true you feel the world around you, the more dense this substance of truth becomes for you. More real, real and impactful in your life.
Then you begin to feel happier from being in every moment of this truth, feeling yourself to be the eternal immortal shining Spirit of the Divine Mind.

July 24, 2022

Are there non-divine energies and where do they come from?

https://blog.cassiopeia.center/est-li-ne-bozhestvennye-ehnergii

By origin, all energies are Divine. But the structure, which depends on the choice of this or that Spirit, producing this or that energy, may contradict the Divine. In very simple words, Divine Energy itself can be directed against the Divine Light within oneself. That is, by the choice of the Spirit who chose Darkness, the Divine Energy turns into its opposite, just as the ax used to create houses in the hands of the executioner turns into its opposite - to kill July 30, 2022

Is there a concept of the Lower Self?

. https://blog.cassiopeia.center/est-li-ponyatie-nizshee-ya

There are various negative attitudes in the human mental body, which give projections onto the astral etheric fields in the form of negative blocks and larvae. They are not specifically called “I”, at least in our terminology, because, according to the ideas of the Interstellar Union, these temporary formations are not part of the “I” at all. We do not call this the lower or negative Self, so as not to emphasize its significance for a person, we consider these to be temporary formations in his Spiritual structure. Indeed, she may also begin to respond (some kind of larva or negative thought form in the human mind). But, as already said, it will be very easy to distinguish by the answer. You will receive answers to only one topic, and precisely the one on which this larva is charged.

How did the Interstellar Alliance come about?

https://blog.cassiopeia.center/kak-poyavilsya-mezhzvyozdnyj-soyuz

Our creators from two planets, Burhad and Tumesout, about 15 million years ago created the Interstellar Union along with four other space civilizations:

- Shimore from the constellation Andromeda,
- Lusdupar from the Pleiades cluster,
- Raomis from the constellation Lyra,
- Etes-Mior, located at that time in the Sirius star system, and about

10,000 years ago finally left our Galaxy, not counting nine small bases located in space on huge spherical ships of golden color.

These six planets formed the primary Interstellar Union of our Galaxy. Planet Burkhad (humanoid civilization, constellation Cygnus, 670 light years from the Sun) was and is the official capital of the Interstellar Union.
Now the Interstellar Galactic Union includes 117 (as of 2021) of the 727 intelligent civilizations of our Galaxy, which we call the Milky Way.

Through Irina Podzorova, MidgasCaus was transferred from the planet Esler.

How do burials occur on the planet Shimor?

https://blog.cassiopeia.center/kak-proiskhodyat-zahoroneniya-na-planete-shimor

We have special equipment that sprays it into its component parts, but it is not fire, but like a disintegrator. It is placed in a certain chamber and exposed to special radiation. It will disintegrate not into separate organs, but into separate elements. Then these elements are used for the needs of the planet's technology." This is what happens on the planet Shimor.

As a specialist in astral interaction, I will tell you that the preparation for death is not some momentary exercise or learned prayer, but the entire life of an embodied being.

What does it mean?

Let me clarify this point. All life from birth to death is preparation for death. Or rather, not even to death, but to what will happen after it. Correct preparation for the death of the physical body is impossible without absolute faith in the existence of the Spiritual world. It is only in the earthly world that faith is opposed to knowledge. In the Interstellar Union, faith not as an assumption, but as a feeling of the Spiritual world goes ahead of the logical constructions of the mind, and, thanks to this, it is faith that is able to penetrate behind the curtain of the material existence of that world of primordial Light from where we all came.
LiScioni says that we are fully aware and teach our children that without faith in a spiritual existence outside the physical world, true spiritual values and firm adherence to the path of Light are impossible. We tell children at school from primary school age that nature has a spiritual and physical beginning in all their relationships.

August 14, 2022

Arcturians

https://blog.cassiopeia.center/arkturiancy

The star Arcturus is the planet Humuret. A civilization of hybrids of Eslerians and reptilians from the planet Notesdon from the constellation Ursa Major. Hybrids were created 520 thousand Earth years ago.

Appearance: about a meter tall, greenish skin color, but no scales, three fingers and toes. They are members of the Interstellar Union, sometimes they visit Earth for tourism purposes, but they do not have contactees here, since their government is not yet ready to pay for this project.
Their pilots are really quite willing to communicate with eyewitnesses of their landings on our planet. They are friendly towards earthlings.

August 18, 2022

Vibration ranges of civilizations from 1 to 59 density levels

https://blog.cassiopeia.center/opisanie-urovnej-i-civilizacij-s-1-po-59-uroven

Levels of densities of dense material (humanoid) and thin material (plasmoid) civilizations and ranges of their vibrations in Terahertz

14 Hz to 300 MHz - Dense material level, solid state, inorganic solids

300 MHz to 3 GHz - Dense material level,
liquid state, liquid inorganic substances

From 3 GHz to 600 GHz - Dense material level (contains level 1 and 2), solid, liquid and gaseous states, living beings (humanoids, animals and plants and the entire physical world)

96.000 – 110.000 Plasmoids (spirits) of the elements of nature

111.000 – 128.000 Plasmoids (spirits) of the elements of nature

129.000 – 150.000 Plasmoids (spirits) of the elements of nature

151.000 – 176.000 Plasmoids (spirits) of the elements of nature

Group of 156 subtle-material civilizations Kryon, living in the earth, water, air, natural places and the sun

715.000 – 786.000 Plasmoids (spirits) of planetary places of nature.
Group of 156 subtle-material civilizations Kryon, living in the earth, water, air, natural places and the sun

787.000 – 862.000 Plasmoids (spirits) of the magnetospheres of planets and interplanetary space.
Group of 156 subtle-material civilizations Kryon, living in the earth, water, air, natural places and the sun

863.000 – 942.000 Plasmoids (spirits) of magnetospheres of planets and interplanetary space.
Group of 156 subtle-material civilizations Kryon, living in the earth, water, air, natural places and the sun

942.000 – 1.026.000 Plasmoids (spirits) of the magnetospheres of planets and interplanetary space. Group of 156 subtle-material civilizations Kryon, living in the earth, water, air, natural places and the sun

1,027,000 – 1,114,000 Plasmoids (spirits) of the magnetospheres of planets and interplanetary space

1,115,000 – 1,206,000 Plasmoids (spirits) of the magnetospheres of planets and interplanetary space

1,207,000 – 1,302,000 Plasmoids (spirits) of the magnetospheres of planets and interplanetary space

1,303,000 – 1,402,000 Plasmoids (spirits) of the magnetospheres of planets and interplanetary space

1,403,000 – 1,506,000 Plasmoids (spirits) of the magnetospheres of planets and interplanetary space

1,507,000 – 1,614,000 Plasmoids (spirits) of the magnetospheres of planets and interplanetary space

1.615.000 – 1.726.000 Plasmoids (spirits) of the outer chromosphere of stars

1.727.000 – 1.842.000 Plasmoids (spirits) of the outer chromosphere of stars

1.843.000 – 1.962.000 Plasmoids (spirits) of the outer chromosphere of stars

1.963.000 – 2.086.000 Plasmoids (spirits) of the outer chromosphere of stars

2.087.000 – 2.214.000 Plasmoids (spirits) of the outer chromosphere of stars

2.215.000 – 2.346.000 Plasmoids (spirits) of the outer chromosphere of stars

2.347.000 – 2.482.000 Plasmoids (spirits) of the outer chromosphere of stars

2.483.000 – 2.622.000 Plasmoids (spirits) of the outer chromosphere of stars

2.623.000 – 2.766.000 Plasmoids (spirits) of the inner cores of stars and interstellar space

2.767.000 – 2.914.000 Plasmoids (spirits) of the inner cores of stars and interstellar space

2.915.000 – 3.066.000 Plasmoids (spirits) of the inner cores of stars and interstellar space

3.067.000 – 3.222.000 Plasmoids (spirits) of the inner cores of stars and interstellar space

3.223.000 – 3.382.000 Plasmoids (spirits) of the inner cores of stars and interstellar space

3.383.000 – 3.546.000 Plasmoids (spirits) of the inner cores of stars and interstellar space

3.547.000 – 3.714.000 Plasmoids (spirits) of the inner cores of stars and interstellar space

3.715.000 – 3.886.000 Plasmoids (spirits) of the inner cores of stars and interstellar space

3.887.000 – 4.062.000 Plasmoids (spirits) of the inner cores of stars and interstellar space

4.063.000 – 4.242.000 Plasmoids (spirits) of star clusters and nebulae

4.243.000 – 4.426.000 Plasmoids (spirits) of star clusters and nebulae

4.427.000 – 4.614.000 Plasmoids (spirits) of star clusters and nebulae

4.615.000 – 4.806.000 Plasmoids (spirits) of star clusters and nebulae

4.807.000 – 5.002.000 Plasmoids (spirits) of star clusters and nebulae

5.003.000 – 5.202.000 Plasmoids (spirits) of star clusters and nebulae

5.203.000 – 5.406.000 Plasmoids (spirits) of star clusters and nebulae

5.407.000 – 5.614.000 Plasmoids (spirits) of star clusters and nebulae

5.615.000 – 5.826.000 Plasmoids (spirits) of star clusters and nebulae

5,827,000 – 6,042,000 Plasmoids (spirits) of galactic nuclei and intergalactic space

6,043,000 – 6,262,000 Plasmoids (spirits) of the nuclei of galaxies and intergalactic space

6,263,000 – 6,486,000 Plasmoids (spirits) of galactic nuclei and intergalactic space

6,487,000 – 6,718,000 Plasmoids (spirits) of galactic nuclei and intergalactic space

6,719,000 – 6,954,000 Plasmoids (spirits) of galactic nuclei and intergalactic space

Mythical names of Earth plasmoids:

Dwarves are Plasmoids (spirits) of the earth element.

Sylphs - Plasmoids (spirits) of the air element.

Salamanders - Plasmoids (spirits) of the element of fire.

Mermaids, mermaids - Plasmoids (spirits) of the elements of water.

Elves are Plasmoids (spirits), creating the souls of plants and insects.

Goblin - Plasmoids (spirits) of forests.

Vampires, ghouls, ghouls - Plasmoids (spirits) that create the souls of predatory animals.

Brownies - Plasmoids (spirits) of houses and other buildings where people live.

Satyrs are Plasmoids (spirits) that create the souls of herbivores and omnivores.

Goblins, kobolds - Plasmoids (spirits) of the mountains.

Chimeras - Plasmoids (spirits) of volcanoes.

Griffins are Plasmoids (spirits) that create the souls of birds and other flying animals.

Kikimoras - Destructive terrestrial plasmoids.

Naiads - Plasmoids (spirits) of fresh water bodies (lakes, ponds, rivers).

Nymphs - Plasmoids (spirits) of fields, hills, meadows, small villages (up to 1000 people).

Manu - Plasmoids (spirits) of large human settlements (over 1000 people).

Genetic modification of humanity

https://blog.cassiopeia.center/gennaya-modifikaciya-chelovechestva

For living on Earth, the Interstellar Union does not approve of the production of new hybrids and hybridization with any of the races. For the reason that, according to most geneticists and biogeneticists, the genetic potential that is inherent in you now has not yet been revealed even by 15%. It is revealed to approximately 15% of its possible potential. Therefore, adding new genes to your population, if these new hybrids live on Earth, will lead to the fact that these hybrids will interbreed with ordinary people, and a new people will appear that will destabilize your society.

We believe that first you must master some of the functions of the genes, the functions of your body that are now embedded in you. This applies to the functions of the brain and the whole body, control of one's organs, and so on. You can do this, that is, your Spirit can do many things through this body. But you haven't mastered this yet, so adding other genes specifically to your race will bring destabilization. Which one?

These hybrids will, for example, look different. They will have a different metabolism. And you haven't learned the lesson of xenophobia even towards those races that already exist on Earth. This could lead to wars, to the destruction of these hybrids and to even greater distrust and rejection, both from the Interstellar Union and from other extraterrestrial races. You call them aliens.

As for hybridization with earthlings in general, it is possible only if hybrids are grown outside the Earth and with the consent of female contactees who give their genetic material for crossing with other races. But this requires physical contact, not astral. This person (and it may not necessarily be a woman, it can also be a man) according to the rules of the Interstellar Union must be an adult. Not just for physical contact, but in order to give your genetic material.

Our research shows that children's genetic material, which previously could be used to grow hybrids, produced unstable hybrids, because children's cells do not yet have the necessary vital energy to give rise to the full development and infusion of a new Spirit. That is, it does not develop fully there.

Only from adult contactees, with their consent, can genetic material be taken for crossing, for experiments, but with the condition that these genetic hybrids, genetically modified, will not then live on planet Earth. There is a special law that with the consent of these genetic hybrids and with the consent of their source, that is, a person, they can meet in physical contact if they both agree.

This is mainly done by representatives of the planet Tashig and their colonies, but sometimes representatives of the planet Shimor also do this, representatives of the planet Selbet and other reptilian races try to

do such experiments, but they have too much incompatibility. Viable individuals are not obtained. The spirit does not inhabit them; they are incompatible there.

If mutations are directed at those cells that are passed on to another generation, that is, children with new properties will be born, then this is considered a type of genetic modification of the body and breeding with new properties. That is, it is considered interference with your race.

But if any genetic mutations that are positively directed in cells, for example, for the purpose of healing, can be caused in those cells that are not responsible for reproduction, and in those organs where there is a dysfunction of these organs, then these changes are possible. But not through biological or chemical influence, because this will already be evidence of physical contact, but through bioenergetic influence with special fields.

During various healing sessions, the directed influence of energy fields created by both the GFS and representatives of the Interstellar Union, the cells of the organ that is sick in a person begin to change their DNA. As you said, carry out gene editing in order to return to the state of purity of the cell that was before the disease.

Education and science on planet Burhad

https://blog.cassiopeia.center/obrazovanie-i-nauka-na-planete-burhad

We give our students in schools the most, one might say, superficial knowledge about the history of our science due to the fact that we try to give them knowledge about advanced technologies and theories of our science.

Unlike your schoolchildren, as far as I studied this, they are children, and not those in institutes. Our children are being prepared to study the latest achievements. And they go through the history of science in some abbreviated form. We have a specific subject - “history of science”. There, for example, it tells how certain discoveries of the laws of nature were made.

For example, we have a science - “Interaction of material elements”. In your opinion, it’s like physics and chemistry at the same time. But there we do not study the world through formulas. We have all the formulas already included in our automatic systems. We study the laws of interactions - how energy flows from the Spiritual world to the subtle worlds. And how it forms four ethereal forces , which you call “elemental forces” or “forces of the four elements.” It is from the relationship of these elements that your material atoms are made .

You see that, despite the diversity of elements, the structural parts of these elements are the same.

"History of Science" is such a subject. And separately we have science itself, which talks about the scientific achievements of the last, maybe a year or two. Moreover, our training is already adapted to ensure that those who complete their studies at school can go to study, in your opinion, at a higher educational institution.

Moreover, we take tests at the middle school level, that is, what

specialization the child will have in the future. It depends on both his desire and his task - we determine this. And then he goes to study in the middle and senior, as you say, “cycles.”

He goes to study precisely according to the facilitated, that is, preparatory programs of the higher institution where he will later study.

Our scientific workers are united in associations. That is, an association of workers studying biology, for example, of the planet Burhad. Or associations studying space civilizations, for example, yours or other civilizations. For example, I am a member of three associations (organizations) at the same time - this is “Interaction of Material Elements”, in your opinion, this is more like physics. Then we have the Association for the Study of Space Civilizations. And just recently (for the last 3 years) I have been a member of the “Association for the transfer of knowledge of the Interstellar Union to young civilizations not included in the Interstellar Union.”

That is, we have a special scientific department (association), which includes humanoids who have completed a special course on contacts with young races. There they work with us, tell us how to go into the astral plane, how to transmit images to the contactee, etc.

We also have associations of scientists, consisting of scientists from different planets, including associations of scientists, which include scientists from planets that are not included in the Interstellar Union. That is, these are non-political organizations that study certain things.

We have associations, for example, robotics. They study robots. There are associations “Study of Plasmoid Worlds”, where contacts with plasmoids are studied. There are associations, for example, for the study of geology.

This is a union of scientists. And everyone who joins this association receives a certain salary from the government of the Interstellar Union and has certain responsibilities. But we do not have such strictly defined working hours. Usually a task is defined, some cash advance is given in our currency for its completion, and a deadline is set for completion, for example, researching something.

After these deadlines, a report is made to those who are on the commission for interaction with science in the Interstellar Union.

Features of Mount Kailash

https://blog.cassiopeia.center/osobennosti-gory-kajlas

Before the war, there was a golden age of your civilization. The peoples living here on Earth have created portals for movement in cooperation with other civilizations. This was a transport system based on the possibility of the influence of certain electromagnetic waves in conjunction with energy called free vacuum, extracted from space.

The physical body of any dense material creature could be transferred into a wave form and sent to another portal and not only on Earth. It was movement in wave form, in the form of energies. In that portal, the physical body was structured from wave forms, and the Spirit remained in it.

Mount Kailash was one such place. Another such place was Arkaim, Stonehenge and others. There were 12 main portals and dozens of smaller ones. Kailash is one of the 12, but over time it became blocked

because your civilization does not know how to use it and does not have certain vibrational characteristics for this, and turning on the portal the way it turned on several tens of thousands of years ago can harm you. But the changed energies of space in that place remained and can cause a change in the energy structure of people nearby and lead to easier contact with plasmoid worlds. Above the top of the mountain there are portals to the worlds of thin-material and plasmoid civilizations.

By circumambulating Kailash, everyone receives the spiritual experience for which he is ready at the time of the circumambulation. He can walk and it will have no effect on his Spirit unless he believes it is possible. With his faith, trust, and openness, he opens the way to feeling that energy-informational element that is above Mount Kailash. He can receive spiritual experience of various visions, revelations in the form to which he is accustomed.

Simply put, whoever is tuned to the Buddhist egregor will meet Buddha on this path, who is tuned to the Hindu one will meet Krishna there. The experience he receives there is not so important as his subsequent attitude towards this experience.

By reference settings we mean the remnants of the energies of the portal that were there. You can call them the reference force of the Earth or the deep force of the planet’s core, but in our terminology these are energy-informational traces of the influence of the free energy of the vacuum. They remain for thousands of years.

Mount Kailash is a natural formation, it resembles a pyramid, but our technologies were not here. This is exactly how it was created by plasmoids. But underneath there is a man-made base, now there are about two thousand employees.

Initially, there was a base for the capital of the Interstellar Union, Burkhad (Pikran). And now there are representatives from Futissa and other civilizations of the Galactic Federation of Light. Now it has come under the Galactic Federation of Light, there are Burkhadians and representatives of the Ashtar civilization.

Crime and Punishment of the Interstellar Union

https://blog.cassiopeia.center/prestuplenie-i-nakazanie-mezhzvyozdnogo-soyuza

Our law is called “On security and restrictions on the rights of citizens in the event of a violation of this security.” This rule, about limiting the rights of intelligent humanoids in the event of a security breach, applies to everyone.

There are laws that define this or that area. We don’t have something like you - for murder they give a certain number of years, for theft - this number of years and this is the same for everyone. Our law is more individualized.

If a crime occurs, the main rule is always to figure out why it happened. Those bodies that deal with these issues can only remotely be called judicial bodies. It includes not only experts in these legal laws, because... We don’t even have such professions; for us, they are, rather, psychologists who study the criminal tendencies of individuals. They are the ones who talk with criminals and predict the danger of this humanoid influencing society if, for example, he is not given a restriction on his rights.

We do this not because of punishment, but on the contrary, to help him realize the wrong line of behavior.

It happens that space criminals from different civilizations act under the factor of possession by some demonic entities or plasmoids, but in any case, this humanoid allowed himself to reach this state: he may not succumb to them. But this still does not relieve him of responsibility. Although, in some cases, it may limit it somewhat, but it does not completely remove it.

On the planet of criminals there are services (psychologists, spiritual workers) that work with the human Spirit. There are specialists in connecting with the Higher Self, but they are guarded by other people so that they are not harmed.
They work as spiritual doctors, as spiritual healers. There are also ordinary doctors who deal with damage to physical bodies.

UFO investigation with the help of the Interstellar Union

https://blog.cassiopeia.center/ufologicheskoe-rassledovanie

In 1977, there were massive UFO attacks on people off the coast of Brazil. And we decided to find out from the Interstellar Union what it was and why such aggression occurred on the part of some extraterrestrial civilization.

Here is a brief description of those events:

“Almost a quarter of a century has passed since a “wave” of attacking UFOs terrorized residents of several villages on the coast of Marajó Bay (the mouth of the Amazon River flowing into the Atlantic) for 20 months. Brazilian military intelligence agents managed to film many episodes of “diving” in 1977 and aircraft flying over the waters of the gulf. Later, the filmed films ended up in secret archives, closed to the public, but they were first shown to officers at the nearby Brazilian Air Force base. The ill-fated year of 1977 remained unforgettable for many residents of the coastal areas. The investigation carried out during the events by the Air Force. , focused on hundreds of UFO sightings around the town of Colares and more than 20 other villages located about 60 miles from the large port of Belem (on the Gulf of Belem - the capital of the state of Para with a population of about 2 million people).

Thousands of inhabitants of coastal villages constantly lived in fear; several times it happened that the rays emitted by UFOs paralyzed and caused severe burns to dozens of people. At least two of the victims died. Six sergeants and one officer spent October, November and December 1977 (and January 1978) in Colares and other villages, taking testimonies from hundreds of people who had seen or been attacked by UFOs. During their investigation, agents themselves witnessed the appearance of “saucers” more than 200 times. In September 1999, three of them again visited Colares and its surroundings in an attempt to more accurately reconstruct the events of those years. They managed to find and interview more than 20 eyewitnesses of that time, some of whom helped the intelligence officers more than 20 years ago."

You can find complete information about this incident on the Internet, in particular by watching the documentary “Brazilian Roswell.”

Here is what representatives of the Interstellar Union responded:

“Near the mouth of the Amazon there is an underwater base of the planet Disnit . In 1977, there was an aggressive group of researchers from the planet Disnit, who used weapons, carried out aggressive experiments and committed other illegal actions, violating the rules of the Interstellar Union. After another inspection by representatives of the Interstellar Union, they were all removed from there forever, and some were even sent to the planet of criminals."

Proposals for improving the Legislation of the Russian Federation from Kirchiton, a representative of the planet Daraal

https://blog.cassiopeia.center/predlozheniya-po-uluchsheniyu-zakonodatelstva-rf

Many people ask us what is the point of all these contacts with different worlds, when they are already talking about what has already been written in many books. Let them propose specific, rather than vague, actions to make people’s lives better. And in connection with this request, KIRKHITON from the planet Daraal expressed his opinion that it is necessary to supplement and correct the Laws of Russia, first of all, so that people feel at least some serious changes in the level of their material life:

Creation of jobs with adequate wages in all regional centers and towns of Russia,

so that people do not disperse to big cities, but produce goods locally.

Serious penalties for those entrepreneurs who do not formally register their employees or pay part of their salaries in envelopes.

Allocation of free state housing with permanent registration to everyone who does not officially have it, without the right to sell, but with the right to exchange and transfer by inheritance.

A simple and understandable pension law for everyone, in which the size of the labor pension will depend on length of service and salary. He proposes the following formula: the amount of the old-age pension is equal to 4% of the salary at the longest place of work multiplied by half of the total length of service. If it turns out to be less than 15,000 rubles/month, then pay 15,000 rubles.

Introduce free education at all levels and free treatment for all citizens of the Russian Federation, even in cases of complex operations abroad.

Make the minimum salary 20,000 rubles/month for a 40-hour work week, the minimum pension - 15,000/month.

Cancel maternity capital. Pay 8-10 thousand rubles/month for each child under 18 years old.

Tough and decisive fight against corruption. Real terms of imprisonment of the guilty persons, with confiscation of all property in favor of the state treasury.

The fight against drunkenness and drug addiction. Placement of dependent people in rehabilitation centers at the request of relatives.

Stopping the promotion of criminal lifestyles in the media. Promoting intolerance towards crime, starting from school. Educating youth in the spirit of patriotism, responsibility and hard work.

Well, the rest is just little things: some changes in taxation, the criminal and penal codes, etc.

The article is advisory in nature and is not a call to change the existing system.

Alien tourism to Earth

https://blog.cassiopeia.center/inoplanetnyj-turizm-na-zemlyu

Your planet is under the protection and patronage of the planet Burhad. These are one of your creators. Burhad is the capital of the Interstellar Union. According to its rules, even those civilizations that are not members of the Interstellar Union, but representatives who want to visit Earth, even if only for tourism or research purposes, are required to take appropriate permission directly from the planet Burkhad, and even more so if it is not just tourist or research purposes, but contact with representatives of your planet.

According to the rules of the Interstellar Union, any representative of another planet or even another Galaxy that is not part of the Interstellar Union cannot arrive on your planet without the permission of Burkhad, since they are your creators and, in your earthly language, are your guardians.

Your planet is unique in your sector of the Galaxy in its diversity of animal species, plant species, all this was of great interest to galactic scientists and ordinary people from other worlds who wanted to live here as tourists. Therefore, naturally, they also built their bases here. But unlike those that exist now, they were not hidden. These were like your current villages.

Tourist bases pay 25-30% of the paid tour to the Interstellar Union if tourists belong to another civilization that is not part of the Interstellar Union.

Now those organizations that arrange flights for tourists to your planet are required to equip ships with protective equipment and complete shielding from the views of people and instruments with a special anti-photon field.

Other civilizations call the earth:

Esler - Arramiya-Tumr
Burkhad - Shed-saf
Tumesout - Atinat (blue world)
Selbet - Pihmirs
Daraal - Billena (blue diamond)
Shimor - Sunebyi
Hamiliya - Gaia

#22 Skype conference of contactee Irina Podzorova with ufologist Maxim Bronevsky (part 1)

An urgent message from Ashtar Sheran to the political elites of Earth

https://blog.cassiopeia.center/poslanie-ot-ashtar-sherana-politicheskim-ehlitam

Over the last earthly year, the energy vibrations of the Earth, both spiritual and material, decreased by 18%.

This causes a disruption in the natural course of quantum transition throughout the Milky Way Galaxy, which leads to a slowdown in spiritual, intellectual and social evolution in all worlds and at all density levels of the Milky Way.

Specialists in psychology, sociology and political science from the Galactic Federation of Light and the Interstellar Union conducted a joint study of the earth's astral noosphere and the material world of the Earth at all levels of density, including the physical.

In the process of jointly discussing the results of this study, we came to a number of conclusions:

The source of the decrease in the vibrations of the Earth is the physical plane of its existence, from where low-vibration energy states are projected onto the subtle material planes and into the astral world.

The reason for the decrease in vibrations on the physical plane of the Earth: multiple emotional mental energy fields of fear, anger, hatred, condemnation, despondency, as well as negatively charged images and ideas.
The origin of these energy fields: psycho-emotional states of intelligent spirits embodied on Earth, at the third level of density.

The immediate cause of this negative psycho-emotional state of physical earthly civilization is the struggle of different political groups in isolated earthly states for spheres of political influence and economic control. This struggle is being waged at all levels, including military confrontation between several terrestrial states, with significant destruction of infrastructure, multiple losses in combat armies and civilian casualties on all sides of the military conflict.

All this is accompanied by significant harm to the ecological state of planet Earth and a decrease in the vibrations of a large number of earthly subtle civilizations, with their transition to dependence on destructive energy radiation in the noosphere. Over the last earthly year, the percentage of earthly parasitic subtle-material civilizations has increased from 37% to 48%.

This can cause massive natural disasters: earthquakes, volcanic eruptions, fires, floods, hurricanes, epidemics and other manifestations of negatively charged etheric levels in material space, for many decades after the provoking events.

The immediate political cause of the military conflict between earthly states is the

disputed territories in Eastern Europe, for the right to own which there has been an information struggle between various states over the past three earthly decades. Currently, this conflict is of an open military nature and is accompanied by intense hostilities, in which thirty terrestrial states are directly or indirectly involved.

The immediate ideological cause of military conflict between earthly states is a different understanding of interstate relations and different interpretations of international treaties and legislative acts on the part of the political leaders of states. This is a natural consequence of the dual type of perception of earthly people, the general low level of their spiritual awareness, insufficient understanding of moral responsibility and the general tendency of earthly people to a materialistic type of thinking.

All this together creates a high degree of readiness for conflicts over differences in ideologies and worldviews, with an easy transition from verbal defense of one's ideas to a forceful method of pressure, with the manifestation of direct aggression.

The direct economic cause of the military conflict between earthly states is the predominance on Earth of the oligarchic type of political governance, in which real power is held by those political groupings that are directly or indirectly controlled by functionaries of the financial elite, whose task is to increase their wealth by any means, including production and sale weapons, a decrease in the income levels of financial competitors, the opportunity to increase the value of raw materials and energy resources due to the crisis caused by military operations and other circumstances that make it possible to increase financial well-being during military operations, including through information warfare in the media and the global Internet, which manifests itself in the form of a one-sided presentation of facts and direct manipulation of the emotions of the population.

The immediate spiritual cause of the military conflict between earthly states is the accumulation of negative energies of anger, fear, disgust, hatred and xenophobia in the egregors of all earthly states over the past thirty earthly years.

Based on the above analysis of the causes of the crisis on Earth, the joint meeting of the Galactic Federation of Light and the Interstellar Union proposed a plan for harmonizing the situation and overcoming the crisis, which consists of several points:

First: the political leaders of Russia, Ukraine, the United States and the leading countries of the European Union make a joint public statement on the right of the population of Crimea, Donetsk region, Luhansk region, Kherson region and Zaporozhye region to independently determine their territorial and state affiliation through universal suffrage.

Second: the political leaders of the UN and the European Union make a joint public statement about their readiness to change the internationally recognized borders of states based on the results of a general vote of the population of the disputed territories, if necessary.

Third: ensuring the possibility of free expression of will of all adult citizens registered in the disputed territories for at least three years, regardless of their gender, nationality, language, social and property status and attitude to religion. To do this, all parties to the military conflict must simultaneously stop hostilities and withdraw their armies outside the disputed territories, under the control of international observers from the UN.

Fourth: after the complete cessation of hostilities and the withdrawal of troops of all states from the territories of Crimea, Donetsk region, Lugansk region, Kherson region and Zaporozhye region, it is necessary to ensure an immediate universal vote to determine the territorial and state affiliation of these regions. In order to avoid falsification of votes by interested parties, it is necessary to create an international commission to monitor voting and vote counting, which will include representatives of Russia, Ukraine, the USA, EU countries and any other states wishing to participate in this.

Fifth: to ensure the legitimacy of universal suffrage, the participation of at least 70% of the adult population of the disputed territories is necessary. The management of political, economic and social processes in these territories until the results of the vote should be taken over by the UN international peacekeeping commission.

Sixth: after the votes are counted, representatives of the UN commission announce to the general world community the results of the general vote and, on their basis, the UN issues a verdict on the territorial and state affiliation of the disputed territories. The UN verdict must be binding on all states of the Earth.

Seventh: the restoration of infrastructure destroyed in hostilities should be the task of all states that are members of the UN, and not just the states directly involved in hostilities. Joint work to restore what was destroyed will promote mutual understanding between states and the positive experience of their joint work.

Eighth: after the cessation of hostilities, all economic and political sanctions and counter-sanctions of states against each other must be lifted in order to avoid the outbreak of conflict and to quickly establish interaction between states to overcome the consequences of the crisis.

Ashtar Sheran - fleet commander of the Galactic Federation of Light, military analyst and political scientist, Sirius-Pleiades civilization.

Olurg Pranshi - commander of the military security and prevention of military sabotage department of the Galaxy Security Service, military analyst and crisis psychologist, planet Burkhad.

Fikort Laursi - military sociologist, conflictologist, specialist in overcoming crisis situations on planets with anthropomorphic populations, the planet Futissa.

Ber Gastre is a leading specialist in the galactic security service in the 36th sector of the Milky Way, planet Burkhad.

Aliens among people

https://blog.cassiopeia.center/inoplanetyane-sredi-lyudej

Is it possible to meet aliens on the street?

MidgasKaus : Yes, if, for example, a representative of Disaru (these are your descendants and they are almost no different from you) flies to your planet, puts on your clothes, which also need to be made or bought on Earth, learns your manners and language. Maybe some tourist will want to do this for the sake of the feeling that he is an earthling. This may well be the case. But personally, I am not aware of such cases.

If anyone wants to walk around the Earth in the guise of an earthling, it certainly won't be researchers; we don't have time for that. Even if my physical body was similar to an earthling, I would not waste my time on this, because I already spend a lot of time among you in my astral body and I know everything.

I talked with the Burkhadians, communicated with Kirchiton from Daraal, and none of us even had the thought of walking among you to study you. We don't have time for this because we are busy with research. We are studying your planet through contactees.

Conditions for harmonious contact

https://blog.cassiopeia.center/usloviya-garmonichnogo-kontaktyorstva

It is necessary to match your internal vibrations to the inhabitants of other planets:

> Openness of mind to new things, i.e. lack of the habit of thinking according to a template. This is a sign of a new type of consciousness that characterizes the inhabitant of the Galaxy. Vibrations of a new type of consciousness help them to understand the Universe and new forms of life in it.

> Give within yourself the right to love any person, no matter what he is. Absence of the slightest need to take revenge and punish for bad deeds. A person who has committed even the most terrible acts, causing harm to himself or others, still has the right to love, forgiveness, understanding and help in correcting his shortcomings.

> Universal love should not be an obstacle to bringing Light to those who are still in darkness.

> The ability to listen to your heart and the ability to distinguish the call of the heart, the voice of the soul, intuition from the logical schemes of the mind.

Under what conditions can the Tikht civilization help restore the ecology of our planet?

https://blog.cassiopeia.center/pri-kakih-usloviyah-civilizaciya-tiht-mozhet-pomoc

Now, at the present time, the Tikhtians can only help humanity by telling plans on how to restore the ecology, without interfering directly.

They are trying to look for contactees who can really influence the political situation. Because your environmental situation depends on your political situation.

The Tikhtians are developing entire schemes on how to restore the ecology, at least partially. And they don’t just pass on this information to contactees, but they try to find those who can really influence the environmental situation.

Fashion on planet Esler

https://blog.cassiopeia.center/moda-na-planete-ehsler

Clothes and decorations are always individual. Robots make clothes. What one person likes may not necessarily please another. If someone appears in society wearing clothes that the whole society does not like, it will not occur to anyone to say anything, because that is his right.

Our clothes cover the whole body, fall down, similar to your robes, with badges, without buttons. Like capes, robes with wide sleeves, hoods, loose-fitting collars to make it comfortable to move.

There are shoes, but they are more monotonous than yours. We no longer have sudden climate changes. After we entered the Interstellar Union, with the help of its technologies, we moved our planet a little closer to the star and placed it in a stationary orbit. This allows us to have a mild and warm climate in almost all corners of our planet, except for the poles, where researchers or those interested look.

Most live in warm climates, so we don't have a variety of warm and lightweight shoes. The only variety is in shoes for men, women, children, and the elderly. In color and shape it resembles high boots without heels. Light boot.

Heels are uncomfortable and harmful because all the bones of the skeleton occupy an unnatural position, although the feet should be straight. Because they are raised constantly, and not for one or two hours, the spine begins to deform. The higher the heel, the longer a woman walks, the blood circulation and conduction of nerve channels are disrupted. We do not see the advisability of using this type of shoe.

We do not use animal skin. Shoes and clothing are made from synthetic materials and plant fibers, including those brought from other planets. We can exchange materials, clothing and shoes with other planets of the Interstellar Union. We can fly to neighboring planets and acquire all this there and bring it to Esler. We have an open area. This

is not prohibited.

We do not attach importance to the material from which the clothes are made. This is a matter for specialists and historians, since the manner of dressing can show the historical period in which people or Eslerites lived.

Cosmetics are mainly brought from other planets. Historically, such an area has not developed in our country. For centuries, while developing their spiritual qualities, the inhabitants of Esler's planet, for the most part, did not have such a consciousness as to direct attention to the physical body. This is a different level of vibration, a different level of awareness.

If an earthly person begins to devote more time to his spiritual development: love, patience, humility, spiritual and energetic feeling, the material world and the material body become less significant for him. His attention is focused on another world. This is a natural ability of consciousness wherever the Spirit is embodied. Everyone decorates themselves the way they want. Basically, all the products that Eslerites can use for their hair are brought from other planets.

One answer about the

Cassiopeia project

https://blog.cassiopeia.center/odin-otvet-o-proekte-kassiopeya

Question from Alexandra, Ruslan, Sergey, and 4 other people: what is your attitude to the Cassiopeia project?

Answer: The number of projects whose main goal is to disseminate information and methods for the development and self-development of spirituality is very large. Many project participants receive mental information that has the same essence but is expressed in different words.

The Cassiopeia project is the first of those that have the right and opportunity to publicly disclose real sources of information and introduce the public to numerous curators, as well as provide primary information on many resonant issues to the audience. The primacy of the project is recognized with due respect; this is very important in the new phase of development of the earthly community.

Expanded opportunities are provided to the highly developed consciousness of the embodied spirit of Irina Podzorova, support is provided in all currently possible ways. Opportunities and directed energy for the implementation of project tasks are used and distributed according to the will of Irina and the co-directors of the project.

Each such project has its own zone of influence on each layer of reality, an audience, and extends to specific territories. Information in the required volume and interpretation is provided accordingly for the main group of the target audience. Members of the audience go through their mindfulness lessons, sometimes without even realizing it, discover their hidden capabilities and gain the necessary experience. In the current reality, there is no possibility of creating a universal project that could work with a worldwide audience.

The Cassiopeia project is aimed at working with a target audience, the

core of which is people in the middle segment of everyday interests, an initial level of spiritual development, who have an established baggage of esoteric and spiritual knowledge, and have cultivated a sense of the world around them and their spiritual essence. Geographically it covers the zones of the central, western, southern and partly northern parts of the Russian Federation, segmented in Belarus, Ukraine, Poland, the Baltic states, a number of EU countries and the USA.

> Among the main tasks: transfer of knowledge, training people, answers and assistance in self-determination to those who resonate with the published information. Another very important function is to help “activate” the consciousnesses of people with tasks and roles in the processes that are supported by the Interstellar Union.

How the project will develop in the future largely depends on the managers. Most likely, the project will expand and strengthen work in occupied segments, gradually increasing the share of unique information if people are ready for this. It is important to note that along with the projects, the spiritual development of its leaders also occurs; they also go through their own lessons and experiences. Each such project has its place and time.

As noted earlier, the number of such projects for different segments of society and with different topics will increase over time, this is inevitable in the current conditions.

Hunting and fishing on other planets

Esler metabolism. Communication with animals on Esler

We evolved through natural evolution from those animals that ate exclusively dairy and plant foods and only occasionally found bird eggs. We do not have an enzymatic system that can digest animal proteins into the form of amino acids.

You, earthlings, also did not have this system initially. Changes were made after the war by the Tumesoutians and Burkhadians to adapt your body to the changed conditions on the planet. Representatives of Burhad have a metabolism similar to ours.

5% of the genes of the inhabitants of Tumesout were added to you so that you could digest animal protein and became omnivores. Before this, all people, except for the experimental groups, ate milk and plants. In the experimental groups, a gene was introduced that was responsible for enzymes.

Since we cannot digest animal protein, hunting, fishing, and animal husbandry are not developed in our country. Doing it for fun is a waste of time. We live in harmony with animals, domestic and wild, and can communicate with them at the level of thought forms. Many residents of Esler are very sensitive and respond well to such communication.

Animal Souls embodied in bodies are able to communicate at their own level. There is no need to catch animals. By approaching a pond and sending a mental impulse, you can attract fish. Children feed fish like you feed pigeons. Their genotype does not contain fear of representatives of an intelligent species.

Fishing on Shimora. Food of the Shimorians

There is an ocean in the southern hemisphere of the planet Shimor. We have fish, but we do not have the custom of catching them. Our type of diet is reminiscent of Esler's - lacto-vegetarianism. We can eat bird eggs, but we cannot eat fish and meat, since we do not have the proteins that these creatures have, we do not need them.

Only Eslerites cannot eat eggs, but both can eat milk. Now there are special genetic developments that will help change their bodies in such a way as to assimilate certain types of food, like lizards.

Planet Sequence

The inhabitants of the planet are neither anthropomorphs, nor reptilians, nor insectoids by origin. They are a separate race.

Humanoids are more than 2 meters tall, gray skin, the head smoothly merges with the shoulders. Three eyes: two yellow, the third (on the forehead) red. The third, central eye of the Daraalians was developed because it was dark and the night was very long on their home planet, and the animals from which they evolved had a special organ that detected infrared light.

They arose through natural evolution from animals similar to our predatory bears, but waterfowl and without hair. Their home planet was Shiitlo in the constellation Sagittarius, located far from its star. There was a disaster there.

5600 Earth years ago they moved to Daraal, where the conditions of existence were less suitable for them than the conditions of life and development on their home planet. Their scientists, after consulting with the scientists of the Interstellar Union and other scientists of the Galaxy, artificially introduced 23% of the genes of lizard-like reptilians (not Selbetians, but others) into their DNA. Hybridization was carried out in order to increase the stability of the race on a new planet, in new conditions of existence, when reproduction occurs through a device.

Some time ago, Daraal had a constant population of 150,000,000 inhabitants and strict birth control. It was possible to create a new child only in the event of the death of one of them. Men and women reproduced through hardware technology. The genetic material of the selected man and woman was used. The change in the reproduction system to a natural method occurred due to the colonization of a suitable planet.

The child is being brought up in a special institution, although he knows his parents. There are no families. They live alone. Daraal has one ruler, one country, one language. Daraal is now led by a ruler named Gliharaon. Capital, Kuuli. There is no division of the Daraal

civilization into states.

On Jupiter's satellite Callisto, 320 km southeast of the Burkhad base, which was on the territory of the Asgard crater, the ruler of Daraal ordered the opening of a base and the construction of the first plant in the solar system for the production of near-range aircraft, i.e. planetary action. This will be the first plant in our solar system.

They have a high-tech level of production and a moral approach. For flights, they use “saucers” with an invisibility effect and a green beam to lift passengers.

Representatives of Daraal have about 4,000 contactees on Earth.

There are no bases on Earth. The attitude towards earthlings is friendly. MS members. The Daraalian brain consists of two parts: the right is responsible for the perception of the outside world, and the left for memory and internal mental dialogue, therefore, during mental contact they do not need to disconnect from the outside world.

Constellation Cassiopeia. On the right is the designation Cassiopeia-ı (12216 Cassiopeia)

One revolution of Daraal around a star takes 10 Earth months. And one revolution of the planet around its axis takes 18 Earth hours.

The chair of Mr. Listen

The diameter is 22,100 km

The age of civilization on Daraal is 5,600 years

Cassiopeia-ı (12216 Cassiopeia)

They protect the environment.

The planet's distance from its star is 759,000,000 km

Colonies: Cassiopeia-γ, Cassiopeia-δ (they only have mineral mining bases and starship and instrument factories)

Interstellar Galactic "zoo". News from MidgasCause

https://blog.cassiopeia.center/mezhzvyozdnyj-galakticheskij-zoopark

I want to tell you news that just relates to my field of activity. Let me remind you that I am a biologist. Although I mainly work on the earth, I want to say something about biology related to the study of galactic life forms on other planets.

More recently, the long-discovered planet Elrist in the constellation Sagittarius has become a “galactic zoo” for different species of animals. A unique internal biosphere environment has been created there. In different areas of the planet live creatures from different planets belonging to completely different biospheres. Special conditions have been created for them. Some conditions are created in the atmosphere of the planet, some under a dome with their gravity.

Almost the entire planet has been turned into one big “petting zoo”. This is a collection of unique animal species. There are also species there that were specially brought from the earth, from our bases - there are several dozen of them (giraffes, elephants, etc.). There are no people and no intelligent life there, but it has its own animals, of which there is a very wide variety. For example, species like dinosaurs live there, a little smaller in size, brown in color, they can go underwater, they can live on the surface, semi-aquatic/semi-terrestrial, but not

intelligent. There are huge dark-colored birds there, about twice the size of an eagle. Their wingspan takes up a very large space, about half the room.

Recently, the official discovery of the planet Elrist took place as an Interstellar Galactic (that is, related to the Milky Way Galaxy) collection of animal forms that are represented from different planets. Previously, there were also attempts to create such a common fund, but they were hampered by certain difficulties associated with the varied living conditions on different planets. This planet was created over many decades. It is now officially open. Any humanoid who wishes can visit it, just as he can visit any other planet. All conditions have been created there for studying animal species, for interacting with them, for various experiments related to combinations of animal genes, i.e. for biological experiments.

Prometheus

https://blog.cassiopeia.center/prometej

Prometheus was a contactee. One of the Lyrian civilizations gave him some kind of biological weapon. It was in the form of a mirror, from which radiation emanates, changing the DNA of people and blocking reproduction. This biological weapon does not kill directly, but acts on their kind.

Being the military leader of one city, Prometheus entered into a military conflict with another city.

The transfer of these weapons and their use was a secret from the Interstellar Union and the rulers of the warring states. For you it was a weapon, but for representatives of the Lyrans it was a form of bioinformational intervention. Only information was transmitted in wave form, and thus influenced people, and unnoticed by them.

When a violation was discovered, the suppliers of these weapons were sent to the planet of criminals. And Prometheus, as a contactee, was judged by representatives of the Earth. He was sent by boat to a desert island.

The mythical image of an eagle that pecked his liver did not just arise. When Prometheus held the mirror, and he often used it, his own internal organs were damaged. He developed certain diseases of the internal organs, which caused severe pain. In the form of an eagle, this became part of the myth.

The story that Prometheus brought fire from the gods is your interpretation of receiving that weapon. Prometheus considered this useful. From his position, the hostile race, which he did not like, should have been interrupted and disappeared. It seemed fair to him that no

more children would be born in this family. Without directly killing these people, he seemed to “burn out” the family. Prometheus compared this weapon to fire, because fire gave life, and the use of this weapon gave life and prosperity to his clan.

Raom-Tiyan on socio-economic and social relations of highly developed civilizations

https://blog.cassiopeia.center/formirovanie-vysokih-duhovnyh-otnoshenij

The existence of our civilization is about 20 million of your years. Considering that your hybrid civilization has existed for 3 million years, we have existed much longer. And during this huge period of time in the material world, our ancestors, speaking in simple earthly language, tried all forms of social relations, social and economic structures. We had a lot of time to make mistakes and to realize them. Now you are following the same path that we followed, but the vector of development of your civilization is somewhat different.

How is it different? The most important thing is in technical equipment, in space exploration. For example, the civilization of Burhad did not physically go into outer space until all wars and all kinds of civil unrest were eliminated. As you know, on Earth everything happens the other way around, that is, technical development is ahead of your spiritual and moral development. This is what becomes the soil that feeds the materialism of your perception, and this is what poses a threat to the existence of your species. That is why the Interstellar Union decided not to transfer any ultra-high technologies to you until the adoption of laws prohibiting external and internal aggression.

You may be wondering how we lived and traveled around the Galaxy back then. Our civilization initially had the idea that so-called spiritual travel, in the spirit, which you call astral in modern language, had advantages in space exploration, until physical spaceships were created. And for a very long time we were in contact with the inhabitants of other planets on the astral plane, but we did not make physical contact, because we decided not to be distracted from the problems of our planet and not to go into space until we solved the problems on our planet.

Your development is going in the opposite direction, because you entered outer space (flights to the Moon, flight programs to other planets) without having yet solved the problems with wars. I even know that some of your countries have laws on the death penalty, which shows a very great disrespect for the life of a sentient being. And I believe, like many representatives of the Interstellar Union, that with such a consciousness the exploration of the Galaxy and even your own Solar System is futile.

We have come a long way, but it has been covered only thanks to the priority of spiritual improvement over material acquisitions. I won't say now that it was simple, but any experience enriches the development of either an individual or a civilization. Therefore, I urge you, everyone who is reading me now, to ensure that your society as a whole reconsiders its ideology.

It is ideology that becomes the leading driving force in the development of civilization. The ideology of any state and community of civilizations existing on any planet, for their successful development, including technological and materialistic, must contain the idea of a spiritual world. If this is not the case, then the creation of outwardly beautiful and useful things, exclusively for the material needs of the body, becomes meaningless at the highest spiritual level.

January 27, 2023

Control systems at Burhad and

Tumesout

https://blog.cassiopeia.center/upravlenie-planetami-na-burhade-i-tumesoute

About governance on the planet Burkhad from Raom Tiyan

Our system of government is very similar to yours, in the sense that we have a single leader who is also elected. But he is elected for a longer term by all representatives of the planet. I remind you that the current population of Burhad is about 25 billion. This is not counting the colonies, of which we currently have 367 in our Galaxy alone. The leader of Burkhad does not rule the colonies, each colony is independent.

Elections are held electronically, as on many planets, for example, on Esler, where the choice of every citizen of the planet is automatically recorded. This is vaguely reminiscent of your electronic voting systems. This is how a leader is chosen. But according to our law, it must still be approved by the Interstellar Union, namely, each planet that is part of the Interstellar Union, consisting of 117 civilizations. The government of each planet included in this union approves of each other. All such decisions are approved by us already in the Union.

Representative of Tumesout - Tiar

We are governed by the Council of the Planet. Very similar to Esler in this regard - there is no single leader. There are also about 28 billion inhabitants of Tumesout. The planet is a little larger in area, and there are underground floors (multi-story buildings go many floors underground). The Planetary Council consists of 28 representatives, who, simply put, are chosen from each region, and they are also

approved by the Interstellar Union. According to the general law of the Interstellar Union, if the policy of any ruler of a planet or the Council of the Planet is directed against the inhabitants of the planet itself, then the inhabitants report this to the Interstellar Union. From there, a special commission is sent, which has the right to remove power from management until new elections. Or a choice is offered: either remain in the Interstellar Union, or leave it if they do not want to remove such a ruler, thereby violating the laws of the Interstellar Union.

Despite all the apparent softness, in relation to crimes against the people, they are quite tough, because our ancestors, representatives of law-making structures, believed that indulgence in the base qualities of the spirit can only develop them, and therefore they adopted only such laws that contribute to the development of spirituality in society , tolerance, love, understanding. And these laws took precedence over laws, for example, on trade, on security, etc. and so on. That is, I think the general thrust of the laws is clear. Everything, as you correctly noted, begins with education, because education is the basis for the formation of society.

According to Raom Tiyan, in the Interstellar Union, in the vast majority of civilizations that he personally knows, education is based on spiritual knowledge. That is, every member of society who is a child (minor resident) and who comes to school (in the earthly sense) is immediately explained according to educational standards that he is an incarnate spirit from the spiritual world. And he has his own tasks here, failure to fulfill which will lead to his degradation. Degradation will lead to a decrease in his own vibrations - this does not mean physical, not material vibrations, but vibrations as qualities of the soul that allow him to be either in the energy of light or without it.

All this is explained by historical examples either of our own civilization, which raise their children, their future citizens, or by examples of civilizations that exist on other planets. In educational programs there is such a subject as the history of the Galactic Union, which examines an example when one or another group on one or another planet considered the acquisition of material goods a priority, sacrificing spiritual ones, and what could come of it. That is, history, as a subject for studying one’s civilization and the Galaxy, has not just informational significance, but also spiritual and moral significance. This explains why it is so important to have these spiritual guidelines, because increasing your vibrations, your qualities, is endless, just as

the Creator of the material world and the one who supports Him are endless. The Creator not only exists, but is also the root cause of this world, its original Source.

And the global task of all of us, the intelligent spirits who are here, whether we are embodied or not, is to endlessly approach this Source, this is exactly what was intended at our birth. This is what brings us true happiness, satisfaction in our lives and helps us fulfill our purpose. As for all material goods, material technology, science, economics, sociology - all this is only a means for more successful development of light energy. This is exactly how it is explained to every child who has incarnated in the worlds of the Interstellar Union.

Abstracts of the video "The intimate life of aliens. Extraterrestrial civilizations"

https://blog.cassiopeia.center/tezisy-video-intimnaya-zhizn-inoplanetyan

Abstracts of the video " #532 The intimate life of aliens. Extraterrestrial civilizations. Irina Podzorova ."

Women on the planets of the Interstellar Union direct their energy to contact and communication with their organs. And earthling women pay attention to cosmetics and external beauty .

In Esler schools there is a subject "Fundamentals of harmonious interaction with the physical body", where the influence of the astral-mental plane on the physical body is studied. Conduct "Internal dialogue", a visualization technique.

Women on Esler, just like earthlings, make love. The body is designed in such a

way that if an Eslerite is not spiritually close, then sexual attraction does not occur.

Esler is taught in schools about all the physical and spiritual nuances of the relationship between a man and a woman.

For women on Esler, when they become pregnant, she or her husband buys a biorobot in the shape of a woman, this robot helps with obstetrics and subsequent care for the baby. There are also hospitals where they provide assistance during obstetrics .

When engaged in physical exercise, Eslerites monitor sensations in the body, and not, like earthlings, distract their attention to the external (music in headphones, etc.).

On planets in different galaxies there are box-shaped devices - automatic translators. That's why they don't study foreign languages. Only specialists can study a specific language.

There is a possibility that earthlings, after joining the Interstellar Union, will visit other planets and galaxies on spacecraft .

Recently, Irina Podzorova flew to a planet where humanoids look like turtles , they have shells.

There are 42 civilizations that are in contact with contactees from planet Earth. 6 civilizations of them physically fly to planet Earth and physically contact people who are their physical contactees.

A gift is a certain enhanced ability given to a person. It should be used by him for good purposes. If a person is lazy and does not use his gift, then this gift is blocked, which leads to failure to fulfill his life task.

We thank Belajar Bahasa Rusia Channel dengan Orang Rusia, a subscriber of the YouTube channel, for compiling the video abstract!

Bermuda Triangle

https://blog.cassiopeia.center/bermudskij-treugolnik

In the area of the "Bermuda Triangle" there is a whole channel of portals that go to plasmoid worlds. In this place, where the Atlantic Ocean is now, before the war with the Selbetians there was a single continent on Earth. Almost in this place, with a slight deviation, there was a large city in which there were contactees and, among other things, there was an alien base. Representatives of your creators lived on one of the alien bases: the Tumesoutians and the Burkhadians.

Representatives from the entire Interstellar Union also flew to it. After the war, she unfortunately found herself under water. There was a crack at the bottom and it ended up under the ocean floor. And practically, in the same place, with a slight shift, a portal was formed, because there were contacts with various kinds of plasmoid civilizations. During the war, many people and aliens died. All this created such energy in this place that a channel of portals was created there, going to many plasmoid worlds.

Parting words to earthlings from Zaliathar

https://blog.cassiopeia.center/naputstvie-zemlyanam-ot-zaliatara

I thank each of you! It is no coincidence that you were able to hear (read) this particular channel at this time. You needed to perceive this information in order for you to harmoniously, safely, with dignity, and in full faith, go through this difficult period, which still has to go through

before the Earth joins the Interstellar Union.

I wish that the Light of each of you will ignite the same Light in the people around you. So that you all can witness this event as soon as possible. And so that this will help each of you fulfill your mission with which you incarnated on this planet.

Perhaps the next time you incarnate here, the Earth will already be in the Interstellar Union, and then the Higher Essence of each of you will communicate with you consciously. And you will know that in one of your past incarnations, being on this planet, you also brought this moment closer.

ZALIATAR, curator from the planet Raom-Li (Pleiades)

February 26, 2023

Message from the representative of the planet Selbet

https://blog.cassiopeia.center/razbor-bespokojstva-ob-ushedshih-blizkih-s-irinoj

I appeal to every person on Earth. On behalf of our entire race, I want to convey to you that you quickly enter the Interstellar Union and get through this period of your history that separates us.

And I want to convey to you that many members of my race regret the decision that was made. And in our schools they teach that it was Selbet's mistake that set your civilization spiritually and sociologically back thousands of years.

TRUART PIKUNUS, representative of the civilization of the planet Selbet

February 28, 2023

Briefly about ideology from a representative of the planet Selbet

https://blog.cassiopeia.center/korotko-ob-ideologii

Every society has an ideology. It can be explicit or implicit. Any ideology is formed by those who are currently at the top of the political and economic pyramid. In any society there is a social hierarchy.

If ideas are spread in this society that a representative of this political hierarchy belongs to another race or evil force, this is done deliberately so that people direct all their dissatisfaction with the state of life at this race, and not at those people who form public opinion and laws of your civilization.

Our goal is to explore your society. A science that we call spiritual genetics, which studies spiritual origins. Not physical, from what genes you came from, but from what spiritual levels you came and why. The spiritual geneticists of our civilization are interested in making contact mentally, mentally or astrally with representatives of your race who coincide in vibrations in order to convey their experience and their knowledge at the level of perception of the world at which this being is located. Our spiritual geneticists believe that different races, when coming into contact, enrich each other with information due to the difference in perception.

Timecode: 1:18:21, #176 Live. All about reptilians. Who creates

Raom Tiyan about nature on planet Burhad

https://blog.cassiopeia.center/raom-tijan-o-prirode-na-planete-burhad

Our planet is located in the habitable zone of a star, in the belt of life, but it is much warmer there than on Earth, so there is no Arctic belt. There is equatorial, tropical and temperate, and at the poles there is also moderate temperature, although it is denser, but not like the Arctic. The plane of the ecliptic is almost 40 degrees, the weather is quite harsh due to the fact that there is a sharp change of seasons. Climatic conditions change each other, precipitation changes, but there are no such frosts as on Earth.

There are hotter times in the northern and southern hemispheres of Burhad, and there are less hot times, and between them there are transitional periods, but there are not two of them, like yours, but four. According to your measurement in degrees Celsius, the highest temperature that has been recorded is about +75°C, the lowest is somewhere around +10°-12°. It doesn't snow. There are many known planets that have historically not experienced a cold period because they are located close to their star, or have a different rotation path around the star, or have a double star. For the inhabitants of these planets, life is interesting when it snows, when you can touch it. It is even possible that when the Earth joins the Interstellar Union, it will even attract tourists.

On Burkhad, the mountains are not as high as on Earth, they are more like hills - 2–2.5 kilometers. And due to the fact that the atmosphere warms up well, ice does not form at such a height.

Weather control. Help from plasmoid civilizations. Forests on Burkhad

We have three oceans. We use climate and weather control to distribute air masses evenly. There are such robots, in the form of your weather balloons. They control air masses, and in the right place, for example, it rains, while in another place a cooler microclimate is created.

We prevent tornadoes and other natural disasters through, among other things, negotiations with thin-material plasmoid civilizations. Such phenomena are possible only on planets where there is no agreement with subtle-material entities.

Our planet is divided not into climatic zones, but into zones: an urban zone, a natural zone, a zone for schoolchildren, for children, where they teach how to do something, take lessons in nature, introduce them to the ocean, space, there is a zone for meeting cosmic guests of the Galaxy .

We have forests that are practically untouched by civilization. They are artificially maintained in such a state, as if created by a landscape designer. This is all artificially supported by robots that watch them. It happens that even entry there is only with a special pass and according to special rules, so as not to violate the natural identity of these places.

In general, Burkhad (or Pikran) is a planet that has been remade many times, its appearance has repeatedly changed. In fact, there are no places left where a Burkhadian would never set foot. Rather, we can talk about the more untouched civilizations of the planet - these are our colonies, of which there are quite a lot in our Galaxy and beyond - extragalactic colonies.

As for our planet, satellites and planets that are in our system and are suitable for life, which were terraformed several hundred thousand years ago, the entire surface there is occupied by the activities of civilization. We do not have deserts, swamps, or uncultivated surfaces. This is very uneconomical and does not meet the needs of civilization.

We have unusual plants that are different from yours. They are similar to your trees with fruits like small nuts, but they grow on the ocean

floor, their leaves and trunk are dark brown. Not leaves, but long formations, on the edges of which edible fruits grow. This plant is called Shuriskiis in your language, which means “water tree.”

It happens that at the bottom of the ocean it occupies plantations, like your forest. The height of this tree in rare cases reaches 15 meters, but usually does not exceed 2–3 meters. Its unusualness lies in the fact that it does not require chlorophyll; it receives all useful, necessary minerals from sea water, from the ocean, from sediments at the bottom.

Unusual fauna and plants of Burkhad

We have a species of animal that looks like your elephants, but instead of tusks they have claws. There is no trunk, but two horns in front. In biology, he is now showing me that if you look closely, these are pinnipeds. In fact, they do not have claws, but rather like some kind of limbs with three fingers that come out of the head. It is a predator and feeds on insects and small mammals.

We have insects, there is a large order of scorpions, crustaceans of different colors and shapes, there are species that have a sting, they live among the trees. There are aquatic species, fish of various shapes.

There is a wide variety of analogues of your mushrooms in the forest, but they are larger in size and grow on trees. Shaped like your chaga. He is now showing me a tree trunk with a black trunk. They have a long one, it extends from the trunk, like our mushroom, only it bends, it reminds me of some kind of tentacle. It looks like our lichen, but feeds on tree sap. It is not edible either for you or for us.

Our food, due to the enzymatic characteristics of your species, is not suitable for you. Perhaps only the fruits of the gisli flower. He shows a flower similar to a lily of the valley, only probably 5 times larger, the plant reaches to a person’s waist, the flowers hang like bells. They produce fruits that look like flat nuts, like lentils. Ghizli are fruits that

contain essential microelements and vitamins for humans. Due to the high copper content, more than in your usual fruits and vegetables, humans cannot eat them for a long time.

Mostly dark brown and black trees. The leaves are yellow-green, not bright green, but closer to a greenish color. There are a lot of large flowers that grow directly on the trunks. It shows: at the top of the trunk there is a purple flower, and inside there is a yellow rod-organ, like your stamens and pistils, only purple. The purple one can have a yellow organ, meaning they can be different colors.

The leaf shape is more elongated, but there are plants, especially shrubs, with small leaves that are close to round or heart-shaped, closer to light green or yellowish in color. We learned that such a product as honey exists on Earth. In our country, pollination of plants that need it is also carried out by flying insects, but they do not collect anything. They remind me, he is showing me now, of a butterfly, it has transparent wings. They are larger, a specimen up to 20 cm in length and with a wingspan twice as large.

If an earthling without a protective suit finds himself in one of the forests in the temperate zone of our planet, in a place on the planet that is artificially kept wild, for the first 2-3 minutes he will be surprised by the sight of our sun, which has a white spectrum. It is slightly larger in size than the Sun you are used to, white, ray-shaped. The sky is not blue, but closer to white. On our planet, the atmosphere contains 45 percent oxygen. This is 2 times the percentage you are used to, so it will adjust to your breathing for the first few minutes.

If an earthling finds himself in a forest, he will have a sense of unfamiliar smells. I don’t even know what this can be compared to. Those contactees who ended up on Pikran physically, I personally took them there, there were 9 people, and I asked, they told me which of the earthly smells was most reminiscent of vanilla. When Irina was on Tumesout, the smell of the local plant also reminded her of vanilla. Maybe this is how your brain perceives an unfamiliar smell.

Many people said that the air smells of ozone, but this is due to the high oxygen content. After a few breaths, a person begins to feel as if the air itself is entering him without his effort.

When an earthling is in the forest, he will have a feeling from the oxygen that everything around him is floating, there will be such intoxication.

Irina : I remember how Mead brought me after the meeting of the Interstellar Union on Burkhad. By the way, for the first time in my life I was taken there in 2019. Kirchiton was promised a long time ago, but only delivered in 2019. When he brought me there, and I performed, I read it all, then Mead brought me back. I went to where Maxim was waiting for me with one of our friends. I had to go through the field and forest to the village. I come, and they looked at me and didn't recognize me at all.

Raom Tiyan about literature on planet Burkhad

https://blog.cassiopeia.center/raom-tijan-o-literature-na-planete-burhad

We have literary creativity: the directions of realism, fantasy, but it is more shifted towards the description of various Spiritual worlds, subtle ones. This is not fiction, but as a "product" of contact. Burkhadets, who is in contact with plasmoid civilizations, with the Spiritual world, describes this in the form of a monograph, i.e. description of your

experience, life path. This will be fantastic for you. Moreover, it can be without biographical details, but in the form of a description of his thoughts.

You also have modern writers who write in a similar way. I don't know specific names, I just know such contactees. There are books that are not just a biography or a novel, but the author writes about his feelings. Different times are described. There are also ancient works, but in our country they are not included in the rank of the Holy Scriptures, although religious experience may be described there. All this is in the rank of literature.

There is literature that describes the life of different planets, travelers with their thoughts. Literature about the colonies is in great demand, that is, about how they developed and what difficulties they encountered. There are plots of space science fiction that describe plots that did not actually exist in the real, material world. Those lines of probability of the Time Tapes that have not been embodied are described and played out. If this is a work that is intended to evoke some emotions in the reader, then the author shares the experience of his consciousness. Because when emotions are evoked in viewers or readers, the transmitted information is more easily absorbed by them and stored in their memory, if these are positive emotions, for example.

In our literature there is no struggle between good and evil in the earthly sense.

Plots of Burkhadian works. Tragic works

In our stories, for example, the Spirit of a Burkhadian can go to the astral world and look at the lines of probability as a spaceship flew and passed a certain planet. Burkhadetz returns to his body and begins to write what creatures lived on this planet, that they tried to capture the ship, and what came of it.

We have a famous novel that describes just such an incident when Burkhad's ship was flying, but this plot did not materialize in reality. In your opinion, this is fantastic. Very old, maybe about 10,000 years old,

but, nevertheless, this novel is “published”, and for each new generation it becomes modern again. Everyone knows him. It talks about how Burkhad's ship flew past a nebula in the constellation Orion, and in this nebula a planet was hidden that was not recognized by the ship's automatic locators; they were simply directed in the other direction. He is now showing me images: they are shot like films, only they are not played by actors, but as computer images.

On this planet lived creatures who hunted for perfect ships. They had their own ships that caught passing ships in energy networks, from which there was no protection, because the Burkhadians did not know this technology. The writer described which one.

It so happened that seven ships flew towards the Burkhad ship, and it was a small passenger ship on which there were 15 people: 2 pilots and 13 passengers, including children. He was captured in these energy networks and forced to land on this planet. They were not killed, but were taken captive in order to become perfect, like the Interstellar Union, so that they could teach them how to become like that, to learn from experience. They received death threats.

Humanoids lived there. They were described as dwarfs compared to the Burkhadians, with dark skin color. This, as always, is a game of contrasts. If the Burkhadians are white, with light skin, then their ideological opponents are dwarfs, with dark skin. This is to enhance the emotion of recognition. And it so happened that the “natives” of this planet threatened the Burkhadians that if they did not teach them what they themselves knew, then they would be killed one by one in front of each other. And for the Burkhadian who reads this work, this is the most terrible thing that he can imagine in his life, that because of him some close being will be killed. They may interpret it as a horror book for us. This is how the work begins.

The Burkhadians agreed not to fly away from them, and to conscientiously teach them what they themselves knew. The story goes on to tell how the Burkhadians separated and each went to his own tribe. The Burkhadians began to teach them and gradually won such respect and love that they became leaders and created fair laws. Their children who were on Burkhad have already grown up.

The Burkhadians studied these aborigines using the means that were on the ship. When a signal came to the ship that they were being looked for, the Burkhadians, obeying the orders of the locals, sent a message to the Interstellar Union that everything was fine with them and did not require help, but had simply discovered a new planet and remained of their own free will to explore it, and this was allowed Interstellar Union. Yes, and now it is allowed, anyone can stay on any planet.

Then it so happened that everyone lived in their own tribe, separated from each other, surrounded by aborigines. The Burkhadians gained respect, treated their sick, instructed the sages that when they were already released, they did not want to fly away from there in order to create a society there that would join the Interstellar Union. This is what happened in the book.

We also have a work with a tragic ending; it is based on real events that developed differently. He talks about how the Interstellar Union discovered a planet that already had intelligent life. When the Burkhadians arrived there, they found a contactee there who began to communicate with them almost the same way as we do on Earth, it was just that there was a different civilization there, not so technically developed. And the contactee who was there began to hide from his Burkhad curators that he was communicating with another civilization that was hostile to this civilization. But she was from the subtle world. When the Burkhadians found out about this, they became, as it were, competitors of these plasmoids in terms of influence on this contactee. The plasmoids had a serious plan; they pushed him to take negative, aggressive actions in order to sow negative emotions in this society through him. The civilization itself does not resemble Earth, rather it is similar to the reptilian civilization of Selbet.

The work ends with the contactee making a choice and committing an act that is contrary to the moral norms of that planet, commits the murder of his family and wants to commit suicide, because the punishment for this was like a suspended death penalty.

This planet was at a lower stage of development. For murder, it was supposed to first bring repentance to the gods, not repentance, but a sacrifice, only then the Soul was sent to the Spiritual world. What's tragic? The fact is that when these two Burkhadians who were his

curators found out about the contactee's plan, there were many pages of description of how they tried to convince him, what various arguments they gave, how he first obeyed, then retreated again. In the end, he promised them that he wouldn't do this, and then, secretly from them, he did it anyway.

This whole book ends with the fact that after the death penalty of his body, his Soul is taken to a lower level by demons, and the Burkhadians look on.

The book is called "Algis Rous Pamani", which roughly translates to "Adventures in the Orion Nebula" or "Event in the Nebula".

This book does not lower your vibrations. On Burkhad it is considered quite light, since it gives examples of how to talk with contactees at such levels of consciousness. Later, when the tragic scenario was realized, it was clear that this was the choice of that Spirit, but God still continues to love him. There they give hope for his promotion, the Burkhadians talk about it, that they did everything they could. Perhaps he will improve his level.

Folk tales about the Burkhad people. Space is a sacred place

Our Soul, if you look at it this way, is more like the Soul of the discoverers. We were one of the founders of the Interstellar Union 15 million years ago. We have many stories that were associated with the creation of the Interstellar Union, with the first flight into space.

We had a very long period in history when we were in contact with other civilizations, but had not yet gone into space ourselves. We did astral travel. We had a rule that space is a sacred place. We have a fairy tale that the sun that we see in the sky is the Light of God in the material world. There is the same little sun in everyone. And just as the sun has rising and setting, so the human soul has birth and death.

On Earth you also have the expression "my sunshine." What does it mean? This is a very common Pikran symbol, when it is called light, the sun. We believed that this is an expression of the Divine Light that

shines in the sky - in space. This means that space is a sacred place that, according to the concepts of our ancient ancestors, cannot be physically visited by those people who are unclean and immoral inside.

For example, wars, violence, any quarrels, hatred, and so on were considered immorality. This was considered internal dirt, which, like clouds, covers the sun. And it was considered wrong for us to even think about it... In our literature, in our stories, religious, philosophical literature, in novels, poems, the consciousness is reflected that it is immoral to fly into space, to have its own space technology for a civilization that has not coped with its internal "dirt".

I am now translating the word “dirt” into Russian very roughly. What was meant was not condemnation, but vibrations that covered the sun, just as dirt covering a body prevents one from seeing its outlines. A very precise word that conveyed this was desecration. Approximately, the acquisition of low vibrations, which made adequate perception of Light impossible.

Therefore, at some stage we had almost a legislative ban on engaging in space flights related to human and humanoid flights into space until all military conflicts on Burkhad ceased. It was unthinkable for us to even think about using some kind of rocket or ancient spaceship as a weapon. It will be for you, as a Christian, to think that you can kill a priest with a cross.

This analogy is very developed in our country, like dirt, for example, on a face, prevents us from seeing its natural beautiful features, its beauty. Dirt in the Soul, in its energetic shell, as you say (we did not express ourselves in such terms; in general, the word “energy” is understood differently) should not be brought into this sacred place, into space.

Raom Tiyan about the history of the development of his planet (Burkhad)

https://blog.cassiopeia.center/raom-tijan-ob-istorii-razvitiya-svoej-burhad

The very first intelligent civilization of our Galaxy arose on the planet Burkhad, in the constellation Cygnus, about three hundred million years ago. Intelligent creatures appeared through natural evolution from animals very similar to terrestrial primates, but with white skin and light long hair. After the emergence of intelligent civilization, it went through all the familiar stages of the formation of social relations.

There were periods of wars, redistribution of property, religious fanaticism and devastating materialism. It took about eleven million years to create a peaceful and harmonious society on Burkhad since the emergence of the first communities of intelligent beings who spoke a primitive language and basic knowledge of the world around them.

The first flight into space, made on a device, occurred 15 million years after the first clearly defined community. By this time, there had been no wars or divisions into different countries on Burkhad for a long time, so the first flight into space did not bring an arms race, but was an inspiration to explore other worlds and communicate with the intelligent forces of the Universe, which had long been in astral contact with representatives of Burkhad.

Since their worldview was completely devoid of aggression, passion

for hoarding and a penchant for revenge for evil, the civilizations in astral contact with them willingly revealed their location to the Burkhadians. The first planet with intelligent beings visited by the ship from Burkhad was Shimor. This happened five million years after the first spacewalk.

The flight took about two Earth months, although the distance between Burkhad and Shimor is 820 light years. The driving force of the ship was the powerful radiation of its native star, which accumulated in its shell and collected energy to be thrown through space. The first gravitational engines were discovered after the formation of the Interstellar Union, about eight million years ago.

After the inhabitants of one of the collaborating planets of the Interstellar Union, Tumesout, discovered Earth and invited Burkhad scientists there, they were shocked by the richness and diversity of organic life on this planet. The entire intelligent part of the Galaxy united in a single impulse to accelerate the natural evolution of one of the terrestrial species of animals most suitable for genetic experiments with the aim of creating an intelligent being.

Although genes from only three alien races were initially used, the rest of the Interstellar Union, then consisting of 15 worlds, supported scientists with material, energy and information resources.

The experiments were successful, but unfortunately, representatives of the reptilian civilization from Selbet almost negated the results of many years of experiments of the best scientists of the Galaxy, first by attempting to destroy the newly created hybrids by deception, and after many thousands of years they repeated the attempt to destroy the earthly civilization by attacking it in open armed conflict twelve thousand years ago.

Most of the intelligent races of the Galaxy united in the fight against the aggressors and soon blocked them on their home planet. Then began a long period of restoration of the Earth, stabilization of its orbit and the orbit of the Moon, after which about three thousand people saved from death were brought to Earth.

Due to changing climatic and energy conditions on Earth, another five percent of the Tumesout genome was added to the human genetic apparatus, with the goal of moving us from creatures that eat only plant foods to the category of omnivores. This was done by reducing the Burkhadian genome in the genetic apparatus by an appropriate percentage.

Thanks to a fairly long life expectancy and rapid reproduction, people quickly multiplied and created, with the help of extraterrestrial mentors, a fairly developed civilization. But, unfortunately, trust in the aliens from the sky was undermined after the war and the great catastrophe, which caused the reluctance of earthlings to follow the path of spiritual development. Many people at that time wanted to go their own way, without the prompting of their older galactic brothers.

Then the Interstellar Union decided to provide us with the opportunity for independent development by switching to secret meetings. But this did not satisfy the people. They built a fairly durable spaceship with a jet engine from scrap materials, which they planned to use to get to the Moon, which at that time was the main stronghold of many galactic civilizations in the Solar System. But the Interstellar Union considered this a dangerous and premature undertaking for the young earthly civilization and came into open contact with the ship's builders.

As a result of negotiations, it was decided to dismantle the spaceship, but to give people the opportunity to settle throughout the Earth and speak different languages, which made it possible for rapid social evolution, by creating in us the concept of a plurality of inhabited worlds that speak different languages.

At that time, people were taught six main languages, which became the ancestors of all the others:

Proto-Slavic is a simplified language of the planet Shimor,

Celtic is a simplified language of the planet Burhad,

Hebrew is the simplified language of the planet Tumesout,

African - simplified language of the planet Tashig,

Japanese-Chinese - simplified and adapted language of the planet Sho-hareki,

Australian Simplified and the language of the planet Fismore.

After teaching groups of people new languages and the concepts they expressed, they were taken to different continents of the globe, provided with the necessary resources and survival skills, and given the opportunity to live and develop independently.

From that time on, rules of the Interstellar Union appeared on secret contacts with earthlings, with the goal of forming new religious egregors that set moral guidelines for all people.

The Burkhadians took an active part in all this, making contacts and passing on information to their contactees, who sought to convey the Light of Truth, even despite universal distrust and rejection.

Divorces on Shimore and Esler. Features of alien physiology

https://blog.cassiopeia.center/razvody-na-shimore-i-ehslere-

On Shimora, the life together of a man and a woman can be terminated by mutual decision of these humanoids. I have never heard of such a reason as “falling out of love” on Shimora. Our children have a different upbringing and understanding of family life.

We teach our children how to distinguish true eternal love from falling in love. If the marriage is concluded at the stage of falling in love, then this feeling may disappear. If during this time a man and a woman have not developed a feeling of love, that eternal energy that will preserve their union and give them true happiness, then they may separate. That happens.

According to statistics, about two percent of Shimora marriages during the first 15 years end with couples separating and looking for another husband or wife. This figure is considered low in our Galaxy. On some MC planets the rates are higher. We do everything to give our children knowledge about true Love, so that they can develop love from falling in love. Our society cannot force people to live in a union when it is no longer necessary.

On Esler there is a different physiology, not the same as on Shimora or on Earth. They, without a feeling of true Love, do not have a period of falling in love. This Love cannot be replaced by anything. It appears in a much shorter time.

Before getting married, on Esler, a man and a woman meet with their Higher Self (they call it the Inner Light). Through the Higher Self, they talk with the Higher Self of their future spouse, see how compatible they are in vibration. If they first had mutual sympathy, then love, only then do they develop sexual attraction to each other.

Since it cannot arise for another being, for another humanoid, they cannot love another. If they have had sexual intercourse even once, this is an indication that their Spirit has loved them. They have practically no divorces, except for the case when one of the spouses died or died, and the second is still relatively young, but this is not a divorce. In this case, he can remarry. Everything is determined by their

physiology.

Irina Podzorova: why aliens do not provide evidence of contacts

https://blog.cassiopeia.center/irina-podzorova-pochemu-inoplanetyane-ne-dayut

This poses a danger for contactees, who will subsequently be questioned, trying to contact aliens through them, to suspect them of something. People are generally prone to suspicion.

If the contactees have evidence, then the authorities and military structures will have a suspicion that since the aliens do not make open contact with them, but have already given evidence to the contactees about their existence, it means that they have some kind of their own goals here.

Also, evidence is not yet given because of the people themselves. The

information that is provided through me is like tests for those people whose Souls subconsciously remember their existence and work in the Interstellar Union. They subconsciously remember the life task of their Higher Self when they incarnated here - to continue the work of the Interstellar Union on Earth, to carry this information, to carry Light, to connect with the Higher Self - what they did there.

I want to emphasize that not all earthlings have such a task here now. Every person is born with his own task. Some are born to experience earthly life - for such people it will simply not be interesting.

This information, without evidence, is given precisely so as not to interfere with the process of recognition by the Soul of the information that matches the vibrations. That is, if they don't give evidence, but just give information - here it is, as it is - then they will come to it and listen to it, and only those people to whom it suits the vibrations will live according to it. And if they provided evidence, it could interfere, because disputes would immediately begin around this information, about the true intentions of the aliens, why they talk about some kind of spirituality here, but do not give technology. All this together would prevent recognition by these people who are already ready for this particular mission.

Address from Saint Germain to earthlings

https://blog.cassiopeia.center/obrashchenie-ot-sen-zhermena-k-zemlyanam

I understand, my dear brothers and sisters, that in your difficult circumstances you expect help from representatives of heavenly worlds unknown to you. Without this help for your daily needs, you may become disillusioned with our existence or our intentions. But I

urge you to understand the position of the Interstellar Union that each civilization, before joining this community, must go through its own mistakes and search for ways to correct them.

My dear women and men! You are all spouses, wives, husbands, mothers, fathers. Look around you. Around you are the same aliens, but in human bodies. Each spirit had experience of incarnation on different planets. Recognize a Burkhadian or an Eslerite next to you and establish contact with him. This will be the first and most important step towards contacts with our worlds. Sometimes it is much more difficult to overcome the path to the human heart than to overcome interstellar distances. This work is the most important.

I have always been for a gradual evolutionary change in society. It is slower, but civilization is built on rocks, not sand. Yes, of course, when laying the foundation, you can not lay the stones so carefully and do not fill them with a fastening solution, you can do everything quickly, but this will cause the house to collapse and bury many people under it. If you put in work, effort, your own energy and love, you can build a strong foundation, slowly laying brick by brick, you can erect a huge bright building in which you can live, create and develop in common love and harmony. This house will withstand all the vicissitudes of fate.

Before you think about what help you will receive from the Interstellar Union, think about what you can bring to it, at least in terms of your thoughts and feelings. Will you bring doubts, fears, aggression into this society? Will the state of your noosphere cause dissonance among the worlds of the Interstellar Union, to which there will certainly be a reaction? Think about the response of earthly people to this reaction. It is not that simple. After all, when joining the Interstellar Union, not only representatives of the Interstellar Union will fly to Earth, but the entire Galaxy will open up to earthlings. Think about whether earthlings are ready to fly around the Galaxy and interact with its inhabitants?

What will most of you bring to the worlds of the Interstellar Union? Remember the people at work, in your life, on the street, who will all have access to flights to the Interstellar Union. According to our laws, it will not be possible to prohibit a person from visiting these worlds without compelling circumstances. Is every person ready to bring light, goodness, love, just like the representatives of the Interstellar Union? If not, then what will a person bring if he gets the opportunity to fly on a

starship to Esler, Burkhad, Disara? How will he be received there? How will he react to their appearance, to their customs? A number of questions arise. They only now seem unimportant and practical, but with regular flights of earthlings around the Galaxy, problems will arise very quickly.

I believe that the mission of my incarnation is to help reunite our people as one. This will be possible after you join the Interstellar Union, because we are your genetic brothers and sisters. The mission of my incarnation is to speak about this to every soul I meet, regardless of what body they live in.

The Disaru government is ready to help people when they are ready to join the Interstellar Union, to fly in and be the first to talk, for example, with your governments, so that these aliens will be more familiar to you. As you adapt to the idea of living on other worlds, you can be introduced to other civilizations that have a different look and view of the world than you.

The experience of the Interstellar Union shows that mass contact with civilizations that are not ready to join most often leads to two scenarios: either wars on a given planet, including popular unrest, revolutions, which pushes entry into the Interstellar Union even further, or a rapid When a planet joins the Interstellar Union, there is a complete loss of its self-identity, its plan for independent development, it becomes simply a satellite of the Interstellar Union, a consumer of its achievements, without bringing anything of its own. Of course, we can share with such a planet, but this puts obstacles on the path of spiritual development for the spirits who have incarnated in this world.

Imagine a detachment of Orthodox or Catholic priests who will land on Burkhad in search of the island of Jesus Christ. How can this end? If Christ tells them that reincarnation still exists, and he had brothers and sisters, what will the priests fly back to Earth with? With the desire to bring this teaching to your churches or with the desire to tell that this is not Christ? Let everyone answer this question for themselves. How, for example, will a representative of the Arab world who serves in a mosque react when he flies to Tumesout and talks there with someone who had contact with Mohammed? Will he teach him the Quran or will he learn from him?

This is a project to integrate the Earth into the Interstellar Community. I am one of the leaders of such projects in Disaru. I have several ideas that are already actively being developed about how the Earth can be integrated into the Interstellar Union in the event of mass contact. In the event of planned or forced open contact, we propose to the Interstellar Union that it is our specialists, together with the Pikrans, who can begin this mass contact. We really want to reunite with you, but at the same time we respect the freedom of choice of each representative of your world. I understand those earthlings who oppose extraterrestrial life and those who are wary of us. This happens due to the negative experiences of their own earthly life.

Self-identity is the ability to think creatively, the opportunity to make mistakes, the opportunity for independent scientific research. In the Interstellar Union, the self-identity of every civilization, every nationality, every religion is highly valued. We do not blur the lines between them, we emphasize the uniqueness of each person, each humanoid. There will be no bans on any languages on Earth, no unification of all countries into one, this is wrong because it leads to a loss of experience. The Interstellar Union only enriches, but does not take away.

In the modern earthly world, there are many creatively thinking scientists who, at their own peril and risk, develop new projects that allow them to conduct experiments to find a link between matter and spirit. I can only welcome the emergence of such scientific laboratories in which the main specialists will be spiritually minded people. I can suggest several directions for the development of these trends.

For example, forward-thinking psychologists can begin researching themselves and their clients about what thought, what feeling affects parts of the body, how the spirit is connected to the brain. It is possible to compile statistical studies of personality types in which certain physical diseases are more common. This will reflect the theory of how the spirit influences the body.

The Russian Academy of Sciences, together with your politicians, decides which direction is promising for science and which is not. Any initiatives from below will be ineffective if they are not supported by senior comrades. For them to do this, what is important is their awareness, personal spiritual light and courage, despite their

experience, authority among other scientists, to support this research without fear of losing their place, influence, etc. Many scientists know about the existence of the subtle world, but they do not talk about it in their dissertations, because it may be interpreted incorrectly.

Young specialists could write careful discussions in specialized scientific journals about metaphysics, philosophy, the human soul, and how the laws of society are reflected in physical laws. You have many such talented people on Earth, including contactees who draw information from their Higher Self.

I propose to create a special section on your website for applications from young specialists and scientists who will present their options for writing similar works together with our interstellar friends. I myself am ready to help young scientists in this direction. This will significantly advance your civilization in understanding the Spiritual World and your place in the world of other civilizations.

In physics, one can begin research that will reveal the real structure of matter. To do this, it is important for scientists to learn to communicate with their Spirit. And this is the only way they can consider matter. In a state of mental relaxation, they can imagine images and consider matter not from the side of the material world, but from the side of the spiritual, observing how spiritual light descends through vibrations, forming subtle worlds that form various elements that form elements. The entire interaction of the physical laws of the Universe is a continuous transition of various material elements and energies into each other. Progressively thinking physicists can consider the physical laws they know about electricity, thermal energy, and thermodynamics. They will see that the laws of electrical potentials, resistance, and gravity only reflect the action of spiritual energies, but in the movement of particles. It is in writing these dissertations that I see the future of your science.

News from Irina Podzorova about Griar Murati

https://blog.cassiopeia.center/novosti-ot-iriny-podzorovoj-o-griare-murati

I talked to him last night (April 24, 2023). I went to see him in the astral plane with Mid. He can also communicate through the astral plane. He is more or less fine now, he looks like a man from Burkhad. He explained his motives to me in detail.

Raom Tian initially said that he flew alone, and Grear confirmed that he was physically alone, but perhaps there were biorobots or plasmoids with him. They do not consider biorobots to be individuals, and plasmoids to be physical beings.

He thanks everyone very much for their mental support. He feels it very much. He also said that the attitude of the American military towards him changed after he informed them that the Cassiopeia project knew his fate, and this event was openly discussed on Internet platforms. He claims that they began to treat him more carefully and courteously.

To visit Earth, he used a reusable pass issued by the head of the science department of the State Fiscal Service. In the " Light Body " practice, on Sunday, Ashtar himself personally told me that he knew about this case and was closely monitoring the fate of this scientist. Ashtar even said that through Griar he spoke with representatives of the US intelligence service in the Astral Plane. Ashtar will not make physical contact with those who are not ready. But not everyone hears

it mentally.

Grear Murati flew from one of the ships of the Ashtar fleet, but not from the Ashtar ship itself. Nobody knew about his plans. There are rebels in any society, and this must always be remembered. Perhaps they discussed some plans, but no one knew that he was going to do just that.

He said that scientists are developing food for him that he can take normally and hopes to still return home, especially since, according to him, there is a high probability of this in his timeline, which he was looking through. He told me that his spirit is cheerful, despite some weakness of the flesh... He probably lacks not enough nutrition, but not enough oxygen. His body biochemistry is different from ours. He is given oxygen, but not in the amount that he really needs. The intergalactic health service works with him constantly.

Things don't go exactly according to his plan, but he expected it. He is 628 earth years old. This is quite a conscious age. He is almost the same age as Raom Tian. 10-15 thousand years is the maximum age. On average, they can live a thousand and two thousand years.

He can mentally communicate with any personalities who come to the astral plane. But during the interrogation it is really better not to distract him. Although, it is quite possible that he can send phantoms. Many people in the MS and State Fiscal Service can do this.

He has such a personality that he could not stand aside when he saw his earthly brothers suffering from political and economic manipulations on the blood and lives of people. He has contactees on Earth. Through them he learned a lot. And through our egregors, too, traveling here in the astral plane. I didn’t notice any energy of disappointment in him.

He said that he expected such a development of events, but decided to show himself to people first in Ukraine, as in the country that suffered the most from the manipulations of other countries. In any case, he says that all people on Earth are equal, regardless of nationality and language.

He had already talked to the military about his release, but they told him

> “You came to us to contact us, so get in touch, we are ready to listen to you and ask you a lot of things ourselves.”

He also told me that for the last two days some American psychologist or psychotherapist, who is already approaching 80 years old and who himself was actively interested in ufology, esotericism and the existence of extraterrestrial civilizations, has been talking to him.

He said his room was full of cameras and listening devices. They arranged a whole medical examination for him there: they took his blood for tests, examined him on X-rays and MRIs, and so on. He doesn’t see anything special in this, because he himself once studied biology and understands scientists who want to study his body. For now, he is an object for their research.

He said he has a wife and two children.
On Sunday I hope to broadcast live with him, I can tune in to him, as I remember his energy. We have already agreed on this with Maxim. Griar Murati has already said that he is ready to broadcast live at this time, but I don’t know yet either myself or through a phantom.

I know that many people in Futiss sympathize with him, regardless of his motives.

Information for April 25 at 21:56 Moscow time

I have now tuned in to him in the Astral Plane. It feels like there is a man next to him, to whom he is explaining something, but he does not hear him. Greear is a little upset about this. And he also misses his wife and children, he wants to go home.

On the part of the man, one feels sincere interest in him and in what he is telling, but also some mistrust.

His goal now is to establish cooperation with those scientists who work with him. The probability that he will be released is more than 70% at the moment.

Physical death is not as terrible as spiritual death, that is, separation from the Light of God as the Source of life.

They are very sensitive to energies and really enjoy the light of love and support. We all hope for the best and build positive images of his release🙏

Very urgent news from Griar (captured alien)

https://blog.cassiopeia.center/ochen-srochnaya-novost-ot-griara-zahvachennogo

Today I went to Astral to see Griar Murati. This is what he told me:

Yesterday a man named Landay came to see me, who introduced

himself as one of the leaders of the main US military headquarters. He showed me graphs and lists of victims of the military conflict between Ukraine and Russia and called it the most terrible event since the Second World War. I explained to him the spiritual reasons for this event, just as I explained to other earthlings.

Landey listened to me, hiding his impatience, and then said that I and other representatives of the Galactic Federation of Light and the Interstellar Union are responsible for the continuation of the aggression of a huge and heavily armed country against a neighboring state, which defends its independence and sovereignty at the cost of the lives of many of its representatives, with the help of flows of finance, weapons, medicine, uniforms and food sent from dozens of countries around the world that condemned the aggression against a small and virtually defenseless state.

In response to my bewilderment about this, Landey explained that if these galactic communities were truly fair and wise, they would undoubtedly take the side of progressive humanity against the dictatorship, violence and military aggression of individual countries, whose government imagined itself to be unpunished due to the presence in their armies of a large number of nuclear and other modern weapons.

I explained that intervention of this kind is prohibited on Earth, since the consciousness of the majority of representatives of this planet is not ready to perceive the existence of galactic races and work with them, and the transfer of any technologies to a world that is not ready for them can most likely lead to civilization to catastrophic consequences.

My interlocutor stated categorically that in this case there should be no alien bases on Earth and no physical contacts with earthlings, because the physical presence on Earth of representatives of galactic communities and their meetings with people is also interference in the affairs of your world.

I explained to this man that the presence of alien bases on Earth is a guarantee of protecting your civilization from destruction during a possible global war, to which he replied that the democratically elected

governments of the leading countries of the earthly world are against protection from those civilizations that do not stop the aggression of some states against others, hiding behind arguments about spiritual values.

Further conversation showed that Landey and I hold opposing beliefs on many issues. In the end, he said that the American Congress adopted a secret resolution to exchange me and other representatives of other planets contained in American bases for the curtailment of all physical contacts with earthlings by the Interstellar Union and the Galactic Federation of Light and the complete closure of all alien bases on Earth in the shortest possible time.

I told him that I would naturally convey this decision to the representatives of my world, but explained that I myself do not deal with such issues.

Then Landey said that in order to stimulate the mental activity of my command, my access to food and oxygen would be blocked until this issue was resolved positively. He also said that communication with people at the base would also be closed to me, except in special cases.
After this conversation, the guards took me to my room and locked me.

I was last given food and oxygen yesterday morning, but I still have access to water thanks to the water tap in my room.

From that moment on, no one came to me, but on the table there are instructions on what to do if the leaders of the Interstellar Union and the Galactic Federation of Light agree to the conditions voiced by Landay: I will need to call the guard by pressing a special button and inform him about this, after which he will meet with me representatives of the American government for the detailed implementation of this plan.

News from Irina Podzorova about Griar Murati. May 7

https://blog.cassiopeia.center/novosti-ot-iriny-podzorovoj-o-griare-murati-6-maya

On Ashtar Sheran's ship, I asked for the latest news about the alien, about Griar Murati. When I asked Ashtar about him, he took me to him. Griar's astral body was on the ship. I talked to him and found out the latest news from him.

He said that since his body was experiencing a lack of nutrients and oxygen, he decided, with the help of special psychotechniques, to put his body into a state similar to suspended animation and lethargic sleep, when all processes in the body slow down.

He, as a representative of Futissa, has greater capabilities and knowledge in this direction to control his brain, his nervous system for this purpose. He said that his body is now in a state of sleep.

This is a type of sleep in which it is impossible to awaken the humanoid by any means. That is, he has gradually slowed down all his life processes and is in a state of “lethargy,” speaking in earthly terms, although this is a complex process. He can return to his body only on a signal from it, when, for example, changes in the external environment occur.

I asked him how he was going to communicate with the people who are at this base if they suddenly have any changes in their decisions,

etc. He said that in this case, the Higher Self of this person, who wants to convey significant information to him, will itself contact his spirit, his soul, and he will return to the body. In the meantime, he will remain in this state.

He may be in a severe slowdown in his life processes, as he told me, for many months. This is to save your vitality and not to waste it, being in an aggressive environment for yourself without a sufficient amount of oxygen and nutrients. He said that every time he returned to his body, he would waste these resources.

Next to his body is his guardian angel, and with any changes in the external situation, the guardian angel instantly tells him that someone has or has not entered his room. His guardian angel informed him that over the last almost 24 hours no living people had entered his room, but were simply watching him via video surveillance. That is, the guardian angel and his curators, including those from plasmoid civilizations, they also monitor the state of his physical body.

So he is now in the astral plane, and he is now also actively in contact with his contactees and with his planet, and you can talk to him, he is quite open to contact. His body condition no longer affects him. That is, he now has more energy because he has slowed down the processes going on in him.

Grear Murati and his feat before humanity

https://blog.cassiopeia.center/griar-murati-podvig-pered-chelovechestvom

Today, early in the morning, May 12, after a 23-day stay in difficult conditions of confinement in the basements of US military bases and prolonged intoxication with hormones and stimulants, the vital thread supporting the physical body of Griar Murati was severed.

Griar Murati was a representative of the planet Futissa (Galactic Federation of Light), a sociologist, a crisis psychologist who studied the psychology of society, and was one of the leading biologists.

In the evening, April 19, his spaceship was shot down over the territory of Ukraine, in the Kyiv region. The shell hit the skin. Despite the lack of protection, the plate did not fall apart, but some ship systems were damaged. Significant repairs were required to get the ship's engines running again.

The name Griar (Griarri) Murati is the closest sounding to an extraterrestrial name transmitted through thought forms. He had 115 contactees on planet Earth, several of them physical. For the last 150 earthly years he has been in contact with earthly civilization, and all this time he has been studying it. He built various models of social societies in order to understand how best to integrate a particular society into galactic associations.

He observed the events of recent years on planet Earth with mixed feelings of anxiety and compassion. Griar always conveyed to his astral and physical contactees his position regarding the Earth, the path of a more harmonious relationship with the Earth, with each other, both in interpersonal communication and in communication between different peoples and states.

He came because, according to him, there was no better opportunity to convey his position to those people on Earth who can really change the future of their people and surrounding countries towards peace by choosing a higher vibrational line of probability in the Future Time Tape.

He also engaged in astral travel, including to the world of non-embodied Spirits, to his Higher Self. Being a sociologist, considering the development of society as a consistent unfolding of those events that are controlled by certain actions and choices of people, he saw key figures who could influence a certain a period of time in the future.

He wanted the earthlings to see that he was not dangerous, that he was deliberately making contact, and could tell their leadership about this. He planned to make voice contact with earthlings while removing anti-radar and photon protection from the ship.

As a sociologist, he studied what was happening on Earth and saw the feelings of hatred, revenge and manipulation of consciousness created here through the introduction of certain psychological images. He saw how people are reprogrammed through the reconfiguration of certain habits that are built into brain functions and can be excited at the reflex level by certain hormones when trigger words are mentioned. This is psychological manipulation. It is quite simple to implement, but requires some time and financial investment.

He had heard about the so-called earthly conspiracy theories, that earthlings were supposedly ruled by dark elites of various kinds. Grear believed that all these manipulations can be carried out with people who are in a state of imbalance and closed communication with their Light, with their Spiritual part from their Spiritual channel. If a person is in contact with the Higher Self, with the true Light of Love and in the grace of the Divine Presence, then these manipulations are impossible.

He saw in the Time Tape and in the events that took place in the Earth's egregor what the consequences of further ignoring this situation and pursuing the policy of non-interference of the Interstellar Union and the Galactic Federation of Light would be. Greear had seen the situation around Ukraine, whose capital he was heading to, deteriorate over the past six months. He believed that only those people who were born there and are responsible for what is happening can change this situation. Since these people are closed to mental and astral contact, he made a plan to meet them physically to talk. He planned to describe to them the consequences that await their country, state and people, for which they are responsible to the Almighty if the

current political line continues.

When he once again looked through the egregors of earthly states involved in a military conflict, he learned that one of the member countries of the so-called “NATO Union” had documented the supply of weapons with elements of radioactive substances to Ukraine. He “assessed” the balance of the amount of these weapons in service with various armies of the world, including in NATO countries and in Russia.

Having looked at the Time Tape, he saw that the use of such weapons would cause retaliatory use by the Russian army, since he found out that this country had large reserves of such shells on its balance sheet. It became clear to him that the mass use of such substances was more than 70% likely. Greear saw how shells hit certain places, and isotopes, that is, substances that have a long decay period in nature, are gradually washed away from rain and melting snow into the Dnieper River and the Black Sea.

Pollution of water, soil, black soil, fertile land on the territory of Ukraine, where many food products are now grown not only for itself, will remain for many generations.

He wanted to tell those who make such decisions about these consequences, draw them the graphs that he saw in the Time Tape, and wanted to invite them to find out the people's opinion about this. He said:

> If you have a democratic state where free elections are held, turn to your people and ask if they are ready to use such, largely experimental, types of weapons? And are they then ready to live on this land, eat what will grow from it, and swim in these reservoirs, and for their children, grandchildren, great-grandchildren to do the same.

It is in Ukraine that people live who plan to continue living in this country further, which means giving birth and raising their children, and then grandchildren. He wanted to address them like this:

> Those good people from overseas will remain there, in a clean place, but what will you get? A territory in which there will be increased levels of cancer and mental illness for decades, and decreased immunity. I think your scientists also know this, that even a slightly increased background radiation can negatively affect the brain.

When the anti-radar and photon protection was removed, the ship was detected by the military using radar and hit by a missile. The plasma field turned on, Grear braked the plate and urgently landed on the anti-gravity beam.

After some time, he was surrounded by the military. He communicated with military leaders, but could not get to those people who directly exercise legislative power. The military who detained him decided to transfer him to another country, where Greear did not want to go.

After a day and a half of the alien scientist's stay on the territory of Ukraine, he was secretly moved to the United States for interrogations and research. In order to maintain his condition, special food was developed. Despite this, his body developed a deficiency of iodine and molybdenum, which were insufficient in food; He was given oxygen, but in insufficient quantities, and then they stopped giving it altogether, which is why he felt muscle weakness. It was filled with energies from the light civilizations of the Galactic Federation of Light, and the Intergalactic Health Service was constantly working. The earthlings also conducted meditations and sent the Light of their Love to the alien guest.

To switch to an economical mode of oxygen exchange, Greear slept a lot, and when he woke up, he went into meditation or astral travel. His body continued to experience a lack of nutrients and oxygen, as a result of which he decided, with the help of special psychotechniques, to introduce his body into a state similar to suspended animation and lethargic sleep, when all processes in the body slow down. They tried in every possible way to return Griar to consciousness, introducing various drugs into his body that turned out to be harmful to his body. This led to the destruction of primary synaptic connections in the neural network of the brain, as well as damage to internal organs.

We mourn together with his home planet Futissa for this truly brave Humanoid for earthlings! On behalf of all humanity, we immeasurably thank our spiritual brother in the Light of God for his courageous and selfless act. The steadfastness of his intentions, his inspiring words and decisive actions became for us evidence of the boundless power of True Love, capable, despite mortal danger, of bringing spiritual Light to all Souls, no matter what state of perception they are in.

The act of Griar Murati and his messages will forever remain in our hearts and will inspire new generations of humanity to spiritual development in the Light of unconditional Love.

He told us:

> “The preacher of truth is believed only when he lives according to his words. When for you there are no light and dark, right and wrong, but there are simply Spirits with different perceptions and the same potential, then you will understand that any conflicts are lessons, which you chose while in the spiritual world."

From our hearts we send the Light of unconditional Love to Griar and wish his bright Spirit new favorable incarnations in the endless plans of the universe of our Creator.

With love, Cassiopeia Project

May 13, 2023

Message to earthlings from Griar Murati through Irina Podzorova

https://blog.cassiopeia.center/poslanie-zemlyanam-ot-griara-murati-cherez-irinu

The representative of the planet Futissa Griar Murati, who flew to Earth on April 19, 2023, was shot down by the earth's military over the Kyiv region of Ukraine and moved to a secret US base, came out of incarnation at the beginning of the day on May 12, 2023, as a result of the use by US scientists of potent drugs that were incompatible with his physical body.

The soul of Griar will remain in the Astral Plane for 14 earthly days, and then merge with the disembodied part, located at the twentieth level of the world of disembodied spirits.

On the day of his disincarnation, Grear came to me in his etheric body and asked me to convey these words to people:

"Dear earthlings to my heart!

I thank you all for supporting my body and spirit in difficult circumstances in which I found myself of my own free will. This support has helped me maintain the health of my physical body for so long under adverse conditions.

Despite the fact that I left the incarnation earlier than the appointed time, due to the consequences of my own choice, I completed the task of incarnation and moved from the seventeenth level of the world of disembodied spirits to the twentieth. I don’t consider myself a victim of circumstances or evil people, because I perfectly understood what I was doing and what I was risking.

I don’t harbor anger or resentment towards anyone, I forgave everyone in advance, deciding to take such a difficult step as flying to Earth without permission from my command.

Despite everything, I don't regret my decision. Even though it cost me

my life in my physical body, I know that I did everything I could to reconcile the peoples of the earth and the birth of healthy generations on my dear planet Earth. I did everything I could so that children lived without fear of bomb explosions, so that husbands took care of their wives, fathers of their children, and sons of their mothers, and not about how to kill exactly the same husbands, fathers and sons separated from them by a line front, carried out between people by the hands of greedy and cruel people who forgot about their future and the future of their children for the sake of temporary profit and a sense of complete power over other people.

Although my body has perished, I am alive and will live forever, like all of you, and will continue to communicate with everyone.

My family completely understood and accepted my decision, even though it was not easy for them.

The fleet commander of the Galactic Federation of Light, Ashtar Sheran, forgave me for violating the order prohibiting physical contact with earthlings without the approval of the Interstellar Union Contacts Commission, despite the big problems that my action brought him.

I love and thank all forms of life in the Universe. I bless everyone who has met and will meet along my path.

I ask you, earthly souls dear to my heart, not to be sad about my physical death. The light of my love for you and your love for me has forever changed the noosphere of your planet and as a result of this, the likelihood of materializing lighter lines in the future event series of the Earth has greatly increased.

And with each sunrise in the sky, this probability will increase if we, together with you, continue to cleanse the noosphere of your world from all destructive programs and energies, with peace and love in the soul, changing them to creative and positive ones.

My proposals for information contact with the Cassiopeia project, given by me on a live broadcast with contactee Irina Podzorova, remain

valid, despite my disincarnation.

I love you all with the eternal love of a soul that has realized its Divine origin. I consciously direct the energy of love to raise the vibrations of everyone who reads and listens to this message.

See you in the spiritual world."

The purpose of biorobots in the Interstellar Union

https://blog.cassiopeia.center/naznachenie-biorobotov-v-mezhzvyozdnom-soyuze

Biorobots can live in bases, can belong to different civilizations and be similar to this race. They have ordered program behavior and are programmed to solve various problems.

They are self-contained and do not have built-in batteries. Their cover, which imitates skin, can perceive energy from the Sun, from stars, magnetic fields and convert them into energy.

Biorobots perform various jobs in the Interstellar Union, mostly hard physical labor or some kind of work that, for some reason, is not unpleasant for humanoids to do, they just think that a robot will do it better. Most humanoids in the Interstellar Union are not engaged in physical labor, but in travel, research, spiritual development and art.

July 5, 2023

Who is the creator of the Asian race - Chinese and Japanese?

https://blog.cassiopeia.center/kto-yavlyaetsya-sozdatelem-aziatskoj-rasy-kitajcev

The creators are the same as ours: Burkhadians, Tumesoutians and Selbetians. Another thing is that they influenced their genetics in such a way that they could live in the steppes, in the mountains, so that they had a narrow eye shape. And they acquired yellow skin color due to a mutation.

After the war 12 thousand years ago, there were some races that came into contact with them. As you know, at one time representatives of alien civilizations were allowed to enter into contact with earthlings to have a child if they were genetically compatible. Even if there was no genetic compatibility, there was and still is a special technology that makes this compatibility almost ideal.

You may have read in your legends that the ancestors of various nations, including the Chinese and Japanese, were the so-called sons of the Gods. These were the descendants of alien civilizations from the Lyra constellation, from the Sirius civilization, there were civilizations from Ashtar, and also from different colonies. They also flew from the Tumesout colonies from the Pleiades.

July 28, 2023

Transformational energies of the

Light Network of the Galaxy

https://blog.cassiopeia.center/transformacionnye-ehnergii-svetovoj-seti-galaktiki

The Earth is going through a difficult period of quantum transition and has been in a lower vibration for the last few years than is necessary for the quantum transition. To help during this period the souls who are embodied here at the third level of density, we decided to transfer a connection to this network through a contactee now with the possibility of distributing transformational energy flows.

Saint Germain was the first to talk about this possibility. This was a joint decision of representatives of the plasmoid civilizations of the Spiritual World, representatives of the Spiritual World, representatives of the Interstellar Union and the Galactic Federation of Light.

The Light Network of the Galaxy is the energy field system of the 386th sector of the Milky Way Galaxy (according to the terminology of the Interstellar Union). It includes 1674 subtle-material civilizations of various density levels of the core of our Galaxy, as well as the systems of Vega, Sirius, Betelgeuse, Canopus, Deneb, Altair and many other stars, thousands of times greater in energy saturation and luminosity than the central star of the Solar System (the number may vary).

There are conditions for receiving such assistance. The first important condition for success is working on yourself, being willing to accept any result. It happens that a person's desire is not entirely compatible, so to speak, with his spiritual development. People often want to be happy here and now, so-called momentary happiness. And they often have no awareness of what this can lead to.

For example, a person may ask to take an exam at some university, but his inner desire will be to go to a completely different place of work, and he wants to graduate from this university, for example, out of obedience to his parents, or so that, as he understands, he had a reliable rear behind him, he had some fears or something else. And it happens that the timeline shows the scenario that if he enters this

university, studies there, and graduates, he will not be able to develop spiritually in this profession, because he will not like it, for example.

That is, she will not satisfy his soul, he will be constantly irritated by this, lowering his vibrations. Or even simpler: for example, going to this university, he may be attacked in the morning. There are situations that a person cannot calculate and see for himself, his guardian angels and, often, his family, his ancestral egregor, the forces that are there, spirits, there may also be plasmoid civilizations that are connected to this egregor, they can take him away from this university and, among other things, block him from passing exams. And a person will ask for this, for example, from the Light Network. When the “specialists” of the Light Network see this, they may not fulfill this desire, sending thoughts that he does not need it.

It is necessary to ask only for what is in accordance with the will of God, which corresponds to the law of love for everyone. Not only to you, but to all people.

For example, if a woman fell in love with a married man and asks the Light Network of the Galaxy for him to leave the family and come to her, because they have an unearthly love, this will not be fulfilled. Even it can get the opposite effect, since it is selfish love, which does not involve sympathy for this man’s wife, who may be left alone, and this will cause her to have some kind of fears, neuroses, and so on. If you haven't thought about her feelings, then it's quite possible that you haven't thought about yours either.

There is one more rule that you must adhere to - this is to ask only for yourself. If you ask my son to stop drinking, to get out of prison, or to quit drugs, that is his will; plasmoids cannot change his choice. They can give him advice, but he is also free to disobey them.

Light Galaxy Transformation Sessions are not a magic wand for controlling reality, but it is controlling your own reality, not the reality of other people, but controlling your own reality in respect for any choice of other people and other spirits. To use this tool harmoniously, always remember the rules.

No one owes nothing to nobody.

Your sons, husbands, daughters should not stop drinking because of you if they don’t want to. Just like you, they don’t owe anything. You don't owe them anything and you don't have to care about them if they get into some kind of trouble, it's only your choice. Theirs may be different, even if you don't like it.

Transformation is a sharp change in a person’s vibrations, his feelings, desires, thoughts, emotions and will, which ultimately lead to a transformation of his entire life and to changes in his spiritual level. The word "transformation" can also be translated as a blow, a push and a sudden change. Transformation is assistance in development by a sharp change in vibration.

This state is achieved by directed flows of ethereal energies from different density levels, with different frequency characteristics. These are the energies of those worlds in which intelligent Spirits participating in energy exchange are embodied in subtle bodies. In total, there are 6048 types of material energies, of which 9 types are physical, and 6039 types are subtle ethereal energies. And almost all of these types of energy are known and used in plasmoid civilizations that work through the transformation network (TTG).

The energies are aimed at activating the chakras, clearing blocks, clearing magical programs, healing various organs through restoration of the etheric field matrix, and even harmonizing and strengthening contacts with various egregors, as well as weakening the effects of destructive egregors and destructive plasmoid civilizations.

An obstacle may be a person’s reluctance to take responsibility and work with their problem themselves, shifting responsibility to others, including those who help you, to representatives of the transformational Network of the Galaxy. They can only help, but they will not live your life for you and will not take your spiritual lessons for you. This needs to be understood. This is your incarnation, and you are responsible for how you go and what results you achieve. This gift is called “Freedom of Choice.” It was given to everyone by our Absolute, the Supreme Mind, which on Earth is called God.

Video on the topic: #588 Light Network of the Galaxy - a new transformational practice. Interstellar and cosmic energies.

How will our civilization change after joining the Interstellar Union?

https://blog.cassiopeia.center/kak-izmenitsya-nasha-civilizaciya-posle-vstupleniy

Joining the Interstellar Union will only happen when your civilization is ready for this in terms of its spiritual level and when the majority of the inhabitants of planet Earth support joining the Interstellar Union.

A special Council will be created for the integration of the Earth into the Interstellar Union. It will include representatives of the planets closest to you in psychology, religious understanding, physiology, and even in such qualities as social and family structure. Of course, it will include representatives of the planet Disaru, who are your direct genetic relatives; it will include, of course, representatives of the planet Burhad, who gave the largest number of genes after the genes of the terrestrial animal; of course, it will include representatives of the planet Tumesout, who made a significant contribution to the development of your civilization.

Representatives of the above planets will be the central civilizations that will join the Council. There will be psychologists, sociologists, economists who, together with your authorities, will create a single Law, which will be adopted in the Interstellar Union and approved by it.

There will be laws for all occasions. There will be a law for civil society, what you call a “Civil Code”, there will be a law for education, medical care, crime prevention, etc. What you call "Criminal Law" will be brought to the standards of the Interstellar Union.

At the same time, your planet will become available for open mass contact from any planet of the Interstellar Union and the Galactic Federation of Light, which is in contractual relations with us.

Literally the very next month after the Earth joins the Interstellar Union, many specialists from many planets will fly here, and they will be here together with you, your scientists, engineers, and technicians to build cosmodromes. There will be a sufficient number of them according to the population of the planet so that every person will have the opportunity to travel around the Galaxy on civilian passenger starships. And not just travel, but with the opportunity to stay permanently on any planet in the Galaxy.

There will also be contacts with scientists in various fields of science: physicists, doctors, biologists, ecologists, etc. You will be given technologies so that you can build your ships. Also, of course, many trade organizations with biorobots, devices, anti-gravitators, etc. will have access here. Medical technologies will also be given. Each person will have access to the entire medical knowledge base of the Interstellar Union with all its capabilities.

Regarding education. Education according to the standards of the Interstellar Union will be introduced immediately. Firstly, the number of peoples and languages on Earth, even the smallest ones, will be calculated in detail. The textbooks of the Interstellar Union, adapted for your races, will be translated into these languages, with the help of special robots. And they will be used to teach your children, students, scientific intelligentsia, etc.

The Galaxy Security Service will come into contact with the intelligence services of all countries on Earth in order to cooperate with them in identifying and preventing various crimes. The criminal law will be changed and, for example, termination of pregnancy will be considered a crime. At that time, even selling a pack of cigarettes would be considered a crime without a special antidote, the price of which would be even higher than this pack.

An antidote is a substance that completely removes any harmful substance from the body and “repairs” cells after exposure.

All substances that are recognized as narcotic will be sold only with antidotes. Formulas will be given. The cost of developing these antidotes will be included in the packaging price of the substance. The end consumer will pay for this. Perhaps the sale will be limited in time, perhaps only in certain quantities per month - this will be decided according to circumstances.

Those who are already addicted, if they cause harm to their relatives and others, then upon their written application they can easily be isolated in rehabilitation centers.

According to information from a conference with MS representatives at the Cassiopeia project retreat in Ufa.

Subtle worlds

In the Interstellar Union, the entirety of the material world is called the Universe. In the concept of “material world” they include not only the physical, but also the subtle worlds. Subtle material beings (from subtle energies) are also inhabited by intelligent Spirits, just like us. In one of your incarnations, each of you must have been such a subtle-material being, because otherwise you cannot come to the dense world until you have passed through that stage.

These creatures, or plasmoids, as we call them on Earth, are better known in folklore, better known in mythology, because people contacted them and left traces of these contacts in legends and myths. They are often called Nature Spirits. You may have heard: Spirits of the forest, Spirits of water, Spirits of fire, but these are terrestrial plasmoids, and there are also stellar plasmoids.

There are such huge stars as, for example, Deneb, Antares, which are many thousands of times larger than the Sun. They release enormous amounts of energy. There are such supergiants near which any organic life is generally impossible, even the most primitive one, which may include some kind of animal or plant Souls.

Then you can ask the question: “For whom is this energy dissipated?” Spirit cannot exist without meaning. If there are such supergiants, but there are no planets there at all, then what is their energy for?

In the chromosphere of these stars and in the core of these stars there are subtle worlds. And the plasmoids themselves, whose subtle bodies are so much higher in vibration, that is, in the vibrations of their bodies, that they are not burned by temperatures of several million degrees Celsius. On the contrary, this energy of heat, this energy of Light, thermonuclear energy feeds them, they live there, develop, feed and solve their problems.

Both stellar plasmoids and terrestrial plasmoids are very actively in contact with earthlings. There are also a lot of their contactees, they convey various messages.

There are conscious ones who understand that this is not their work, for example, a poem. And there is a person who accepts (because he is not in conscious contact) their thoughts as his own. He simply wonders where they came from, but nevertheless believes that he is not in contact with anyone. The information that passes through him is indeed a product of his own creative thought, but also of the contact that exists unconsciously.

Criteria for selecting a contactee in the Interstellar Union

https://blog.cassiopeia.center/kriterii-vybora-kontaktyora-v-mezhzvyozdnom-soyuze

To select a particular person, many factors must coincide. When choosing **a physical** contactee, his beliefs regarding alien life forms

are of great importance. He should not experience any fears or phobias even towards earthly forms of animals, insects, darkness and other things. This will interfere with contact.

It is not of such global significance whether he had incarnations on Earth or on another planet, how many of them he had and on which planets. What matters is the state of the Spirit in this life, specifically in this incarnation. The energy characteristics of the future contactee are read, whether physical or astral.

For a physical contactee, more conditions must be met. He must not physically have diseases that will prevent him from making physical contacts (flights into space, for example) quite often. So that this does not harm either his physical or psychological state.

If we are talking about **an astral** contactee, he must have an energy structure that allows him to consciously go into the astral world and perceive information there, remember it normally and reproduce it after returning. At least 70% of the information must be without distortion, at least in his own subconscious.

If these are **mental** forms of telepathic contact, where everything is much more subtle, the vibrations of his mental body and the mental body of not even the civilization that is in contact, but of a specific person, must coincide, otherwise distortions are inevitable.

According to the law of the Interstellar Union, a person who wants this, who does not have negative beliefs about society, himself, religious structures, egregors, is chosen as a contactee. He should not reject anything incomprehensible. He should not have the prerequisites for creating long-term negative emotional states. This will interfere with contact, because usually specialists who are trained on the astral and energetic level are in contact with you. They are very sensitive to your radiation. They will not be able to work in the usual mode if the contactor does not correspond to a certain energy vibration.

Naturally, the prospective contactee must have a normal attitude towards the very idea of extraterrestrial life. He must accept this contact with confidence and openly, so that he does not have any

prejudice towards the information that is given to him. He must be broad-minded and interested in understanding the world, for example, the Universe. Because people who are only interested in their material existence, firstly, will not want to communicate for any long time. They simply won't need it.

What is important is that future contactees must be morally determined to perceive the norms of the society where they live as the norm. That is, they must fully approve and accept the laws of the country where they live. There should be no rejection of laws, much less approval of criminal actions on the part of anyone. This refers to deprivation of life and the like. It’s not that they themselves shouldn’t do this, but they shouldn’t somehow approve of these negative aspects. While maintaining peace in their Soul, they still must not put up with evil. Do not indulge in what is happening around them, because condoning evil only serves to increase it in many cases.

Therefore, many factors must coincide. It is not necessary that this person was previously embodied even in the civilization that chose him for contacting. This is possible, and it happens often, but it is not always the case.

Raom Tiyan on technological balance with nature on planet Burhad

https://blog.cassiopeia.center/raom-tijan-o-tekhnologicheskom-balanse-s-prirodoj

For a long time, our civilization developed only in the conditions of our planet, but we realized that natural resources need to be protected, including not only minerals, but also clean air, water, nature in general - this is the same resource as minerals, for future generations. Our civilization was able to realize this without going through environmental disasters or even those periods when they could threaten us.

Our civilization, since the advent of the first intelligent Burkhadians, lived more in fusion with nature than followed the technocratic path of development. Of course, we had technology, but it was only a means to achieve certain goals, and we never put it in first place. For us, even the exploration of space, the exploration of other planets and contacts with the Interstellar Union first began on the astral level, that is, without any spaceships.

We went into space on our spaceships later, but we developed interstellar flights much faster. We did not do so by first visiting some planets of our system, and then staying inside it for a long time - the development of interstellar flights in spaceships went much faster for us than for you after the beginning of the space age.

This, of course, also depends on the general level of awareness of spirits in a particular civilization, on development cycles, which are largely individual. I believe that the percentage of consumption of natural resources on a particular planet and the general attitude of civilization towards nature still largely depend on the ideology that is formed in society by one or another Government.

Now, after going into space and beginning the active exploration of our

Galaxy, the process of converting natural resources into our consumption of vitality, energy and other benefits that our civilization has on a technical and generally material level has been significantly simplified. We have already transferred many of the production of instruments and spacecraft either to planets that are not suitable for organic life, or even into outer space. And even the consumption of Burkhad's internal natural resources is under control in the sense that although we do not have birth control, as in many other worlds of the Interstellar Union, this is only because we are developing more and more new planets to create colonies and settlement throughout the Galaxy.

Our science is actively exploring those planets in star systems on which life was previously impossible. This is what you call "terraforming". We can install this or that planet, which was previously unsuitable for life, for example, due to excessive proximity to its star or an unsuitable atmosphere, but, of course, within certain limits, into a new orbit around the star. We can change the angle of inclination, change its atmosphere and many other parameters that allow us to still create a colony there if it is convenient for us for some reason. And this direction is now actively developing. We have colonies even outside the Galaxy, naturally, with the permission of the Interstellar Unions of those Galaxies.

There are extragalactic colonies of our planet and other worlds in other Galaxies, and there are also exchange processes - our Galaxy hosts colonies belonging to civilizations from other Galaxies.

There have been cases when a civilization that had mastered interstellar flights almost completely perished from an environmental disaster on its planet, and only a small part of its inhabitants could move to another world. This happened, for example, with the planet Daraal. This story is known to everyone in the Galaxy.

They lived on a planet in a completely different place in the Galaxy, and they had a catastrophe that claimed many, many lives of the inhabitants of that planet, and only a small part moved to that place in space that you call the constellation Cassiopeia. Because of this disaster, the government of Daraal decided to limit the birth rate, strictly control the number of inhabitants on their planet and introduce many other things into their laws so as not to repeat the fate of that

planet.

Socio-economic recommendations from aliens

https://blog.cassiopeia.center/socialno-ehkonomicheskie-rekomendacii-ot-inoplanet

With your prevailing materialistic perception, any socio-economic system will be filled with the same content as it is now. Even if you are given a socio-economic system where there will be no free market, but everything will be regulated by the state, as on many planets of the Interstellar Union, for example, on the same Daraal, then this will not lead to anything, because in those power government structures Those who will control the production and marketing of products will be the same people with a materialistic perception. Having access to the monetary, production, technological and other resources of your state, they will abuse it in any case, just like your capitalists. That is, if the manager changes, the control system itself will not change.

Capitalism, socialism and other forms are just forms of social structure for which the society of a particular civilization is prepared. In a given state, the system of government and economy that the given society

supports is established. In Burkhad it is democracy, in your language. From an economic point of view, we have both public administration, public organizations, and private ones involved in the production and sale of goods and necessities. We may have equity participation.

People who control the economic process undergo training and selection, including psychological selection, so that they understand that they are working with energy flows of money or financial flows. This is also a form of energy, and you also need to be able to work with it. You need to be able to keep yourself morally pure so as not to start using what is intended for the benefit of everyone for the benefit of yourself, that is, to understand the task of the common cause.

This is also taught, and you should constantly talk to those who study in financial institutions, in education, where they train financiers, economists and other people on whom the management of material consumption depends, and this is a very important aspect of civilization.

Both domestic and foreign policy depend on the development of economic status. I (Raom Tiyan) believe that under your ideology, any socio-economic system will fail in the ratio of the number of rich and poor.

MidgasCaus : we have a communal system of governance on our planet. Each city is responsible for the community, which resolves economic, social, and political issues.

The Esler Community Union resolves planetary issues, including relations with the Interstellar Union. As for our economic system, I would choose an analogue among your systems - socialism, but with permission not only for private property, but also for small-scale production. Cooperative socialism with social guarantees for all Esler citizens - medicine, education, etc.

The issue of ownership on many planets of the Interstellar Union is resolved this way: at birth, a citizen is the owner of this or that space that society gives him. Usually this is some kind of living space.

Many are raised in their own families at first, but when the time comes to create their own space, the child knows that it was created for him, and he will live there.

Wherever free housing is allocated to citizens, it cannot be sold or donated; such forms of transactions are prohibited. This is so that a person, under some kind of emotion, does not go to the point of losing what he has. He can sell what he has earned himself, but he must use or refuse what society has given him.

On the planets of the Interstellar Union, education, healthcare and the army are security issues, that is, the creation of an internal climate for citizens to live in and the issue of the security of the existence of power, that is, those specific individuals who lead.

The greater the number of people dissatisfied with the policies of the authorities, the more negative emotions and feelings go into the general egregor of the state and negatively affect the rulers themselves. They take away their health, success, luck - they block them energetically. Every ruler here understands this, and training in these energy processes is included in the program of educational institutions.

I have been in contact with the inhabitants of your world since 1983, and it was a great discovery for me that in your schools they do not teach the influence of egregors and, in general, energy processes in the most elementary form.

Even if you put a positive person at the head of power, not everything actually depends on him. The main thing is that the entire system is also configured so that the positive changes that he will introduce into the laws can pass, and not only pass on paper, but also be embodied in your practical life.

If the laws that the high-vibration spirit will adopt are incomprehensible to your large business, then these large entrepreneurs and other people who support them will in every possible way hinder the introduction of this law, explicitly and implicitly. By sending them a thought form of rejection, they will create dissonance in the general

egregor of the planet.

Therefore, the Interstellar Union believes that there are laws for which society is ready. And that is why he considers it useless and even harmful to introduce any premature changes, even positive ones, if society itself has not yet arrived at them along an evolutionary path.

MidgasCaus's wish to the inhabitants of Earth

https://blog.cassiopeia.center/pozhelanie-midgaskausa-zhitelyam-zemli

Dear inhabitants of the Earth! I am very glad that the Cassiopeia project exists. I was delighted to see a book in the physical world, not only about Irina and her contact, but also about many representatives of the Interstellar Union. I know that many, many Souls and people, not only earthly ones, who are embodied on Earth, participated in the creation of this book. Each of you has put a piece of your Light into this

book. The text is charged with the energies of the egregor “Cassiopeia”, which is a little more than three earth years old. It is actively developing and helps every person who comes to it to find answers to questions and turn to their Higher Self.

The Cassiopeia project was created not only so that you can learn about distant worlds, about various galaxies, since terrestrial astronomy talks about distant stars and galaxies. But, despite the abundance of sciences that earthlings study, wonderful mathematical theories, very beautiful scientific descriptions of your biosphere, you have a lot of popular science literature that describes the beautiful earthly world created by the Creator of the Universe for you. Despite all this abundance of knowledge, there are people living on Earth who have not yet recognized the Light within themselves.

Therefore, the main task of “Cassiopeia” is to turn each of you towards yourself, to seek answers from your Higher Self, from your divine particle, from your spark of the Higher Absolute Consciousness.

I wish each of you that this contact occurs in the current incarnation and brings many fruits of Love, goodness and unconditional happiness.

My Spirit sends you the Light of its Love, I am always close to each of you spiritually.

Geoglyphs in the Nazca Desert, Peru

https://blog.cassiopeia.center/geoglify-v-pustyne-naska-peru

These are figures whose meaning can be understood by looking at them from above. If you stand on the ground, the meaning will not be visible. Ancient people gave a sign to the gods in this way. This was a form of contact: when the “gods” flew over the plateau in spaceships, they saw these figures. Aliens were considered gods. The psychology of ancient man was such that, leaving drawings for many centuries, they showed the gods their presence. Just like artists paint pictures, only this was for the “gods.” The meaning can only be seen from a bird's eye view.

This is labor-intensive and time-consuming work. It was believed that this was a form of worship of the gods, that they invested energy. The gods will rejoice when they see images of earthly animals, insects, etc.

In some places on the planet, in order to strengthen earthlings’ faith in themselves, to show a miracle, they could use something similar, as in the construction of the pyramids. The anti-gravity beam helped build, although it was to support their religious cults.

This was after the war, about 8,000-7,000-5,000 years ago. At that time, the intensive formation of new peoples was underway on the territory of the Earth. Contacts with aliens, in the form of gods, helped and taught people agriculture, hunting, cattle breeding, and safe survival in the environment. They gave the first laws about the state, about religion, and passed on their experience in a form that they could perceive.

These were mainly representatives of Burkhad and their colonies from the constellation Cygnus, as well as Tumesout from the constellation Orion. There were also civilizations of Sirius. They could land to approve by their appearance the energy invested in these images, that they accepted this sacrifice. It's like a form of sacrifice.

Ancient man was no longer guided by abstract ideas about gods, but by the practical meaning of life. Life in nature was subject to strict natural rhythms. And if a person invested energy in these, at first glance, useless images for him, it means that it was really important for him.

Briefly about reptilians

https://blog.cassiopeia.center/korotko-o-reptiloidah

Reptilians are a civilization that, unlike anthropomorphs, has a different biological development cycle that resembles the forms of terrestrial reptiles. Often there is not a live birth, but the laying of eggs. The structure of the body is reminiscent of the structure of terrestrial reptiles, cold-blooded. They have a special brain structure, which, of course, determines the incarnate Spirit in a special way.

The Incarnate Spirit in its manifestations depends on the forms of the material body into which it finds itself. From receptors, hormones, from everything that he acquired. We prefer to use the word "humanoid" in a broader sense. In our understanding, a humanoid is any Spirit embodied in a dense material body, not only of the anthropomorphic type, but also of the reptilian, insectoid and other forms, which we also

call humanoids.

Representatives of the planet Selbet from the constellation Canes Venatici are humanoid creatures of the reptilian type. They are cold-blooded, oviparous, similar to our reptiles. They are intelligent, walk on two legs, are two meters tall, look like our lizards, have a triangular-shaped face, covered with scales, and have four webbed fingers on their hands. We have 5% of their genes, since they also wanted to participate in our creation.

October 23, 2023

Artificial intelligence in the understanding of the Interstellar Union

https://blog.cassiopeia.center/iskusstvennyj-intellekt-v-ponimanii-mezhzvyozdnogo

Artificial intelligence is a set of artificially created, automatically activated algorithms in solving various problems. There are many types of artificial intelligence. Depending on the tasks, these can be microdevices, macrodevices, devices that can operate in outer space, underground, underwater, among people - there are several hundred types of them.

A biorobot is artificial intelligence, like our computer. Its appearance and algorithm of operation resemble a living creature. You can make a biorobot that resembles a representative of any civilization.

When a civilization joins the Interstellar Union, it immediately gains access to all its achievements, including biorobots. There has never been a civilization that would refuse this.

There is no separate artificial intelligence egregor on Earth. But there is an egregor of technical development, which is an integral part of the egregor of science. And the egregor of science is part of the large egregor of scientific, social and community development, i.e. egregor of progress. The egregor of science includes the egregor of technical development. And the egregor of technical development is currently overseeing the spirit of Tsiolkovsky on Earth. After disincarnation, he found himself at the twenty-second level and was offered to oversee the egregor of technical development, which is part of the egregor of science. We can say that he is one of the curators of the egregor of science.

Some representatives of plasmoid civilizations take an informational part in the creation of artificial intelligence systems in the Interstellar Union and on Earth. They convey this at their level of awareness, how they understand the technique - with some numbers, rows of numbers. They can convey a picture where the numbers are twisted into a spiral, like a spring, they can show a matrix, recreating which at the technological level you can get a superconducting microcircuit. A person can accept such information at his level of awareness. If he has the appropriate vocabulary, he can do it.

The transfer of technology directly - what to make and how to make it - to civilizations outside the Interstellar Union is prohibited. It is possible to convey the principles of cybernetics and cyberpsychology.

Cybernetics is the science of artificial intelligence. Cyberpsychology is a doctrine, science or system of practices, technological solutions aimed at creating an artificial psyche of biorobots and interacting with it in the workspace.

The Interstellar Union can transmit the principles of robotics, cybernetics, and cyberpsychology. Many curators pass this knowledge on to their contactees upon request. Plasmoid civilizations can transmit any information; they have no prohibitions. But presenting information at its own level of density has its own difficulties. Sometimes they themselves will need to explain what, for example, a solid substance is.

The Interstellar Union monitors indirectly through contactees and various news media the development of artificial intelligence. There are scientists who study your technique, they are really interested in it, they are looking for information about it. The percentage of probability of a machine uprising is close to zero, since this requires a rather complex artificial psyche, it is necessary to use materials and technologies that do not yet exist on Earth, for example, nanotechnology associated with molecular soldering.

In the next 50 years, you will be able to create robots for all occasions. Not biorobots, but simple robots. A biorobot is a robot that resembles a person and imitates his life processes. Robots will perform various functions in medicine, agriculture, exploration and mining, and military affairs.

A wish to earthlings for awareness

https://blog.cassiopeia.center/pozhelanie-zemlyanam-ob-osoznannosti

We wish that every earthling realizes himself, his Light. Realized himself as a rational immortal Spirit. And in this you can help yourself enter the Interstellar Union, stop all war, injustice and oppression on

your planet.

By increasing your level of awareness, clearing your consciousness of negative thoughts, sending only thoughts full of goodness and Light to your, as you consider, evil rulers and oppressors, by doing this you change the space and drive away dark destructive entities from these people. You fill them on a spiritual level with the Light of Love, which they feel subconsciously. And with this you bring the hour of enlightenment of this person closer.

Our main task is to explain to you that any injustice that happens on Earth cannot be fought with violence. Violence can only be fought against direct crimes against life and health - this is the security service. But if you are not a member of this security service, then it is no longer up to you to eliminate this criminal, as it were (in your opinion), but only to cultivate that Light of Love in yourself and direct it to these people. If the majority of earthlings do this, then your world will change - this is reality. Because with his thoughts, every intelligent Spirit, as a part of God, can change the space where he lives. What you are filled with is the space you are in. What is inside you manifests itself in the outside world.

To make it easier for you to come to terms with the idea that you live in such an unfair world, I urge you to remember once again that you appeared here for a reason. You yourself chose this incarnation to take your lessons, which consist in a global sense - in developing the Light and conveying it to others, and not at all in condemning and forcibly correcting this distorted world. Change in yourself what causes your dissatisfaction - protest. Because only this path will lead to a change in the noosphere of the Earth, which now contains many of your negative thoughts for various reasons, directed against each other.

Timecode: 56:00, #258 Increasing awareness and vibrations of the Earth's noosphere. Support for contactees by governments of other countries.

Professional activities of MidgasCaus

https://blog.cassiopeia.center/professionalnaya-deyatelnost-midgaskausa

My work consists of contacts with earthlings (not only with Irina, but with many contactees in general). In this case, in astral contact. In my home or wherever I am (at the base, on Earth), I lie down in a special capsule, one might say, an astral capsule, which resembles your chair. I leave the body, having first given the body all the necessary substances. I leave the body and according to the plan of contacts that I have agreed upon with different contactees, I come for one or another purpose of contact.

Next, after the contact, I return to my body and transmit information about this contact to the brain. Then I have to go into the unconscious Astral state for a few minutes (about 15-20) so that the brain cells are restored. I need about 3-4 hours of sleep a day. But I can divide them into several phases.

My working day is around 10 of your hours. And in the future - communication, for example, with family: with sons, with wife. Any of my personal affairs, obtaining information, including about your science. Reading special texts compiled by the Interstellar Union, which tell, for example, about the situation in the world. I constantly communicate with contactees, and I need new information.

For example, now I'm here for an hour, but after contact I can stay for another forty minutes. I have other contacts planned in the future. I am already coming to another contactee with a different goal. I am here now to answer questions.
We understand work as a useful activity both for our development and for the development of the world. It is useful for my development to bring the light of knowledge, to tell you and the contactee about the Interstellar Union, about science, and so on.

And for the Esler Society and the Interstellar Union, my activity is useful in that with my work, with my work, I bring closer the time of the Earth's entry into the Interstellar Union, because through the contactee I transmit information to the society.

Spiritual Reasons for War 12,000 Years Ago from Metatron

https://blog.cassiopeia.center/duhovnye-prichiny-vojny-12000-let-nazad-ot-metatro

War is also a material process. This is a process that is formed by those Spirits who are in embodiment, with the help of material means

that consist of certain types of substances. These substances, as you know, also consist of the condensed energies of God. Spiritual entities, being in embodiment, use divine energy against each other, and therefore against themselves, because in the Spiritual world everyone is one. War is not only a destructive process that destroys material structures or kills physical bodies, it is also a process of self-destruction or, as you call it, self-degradation of those Spirits who are involved in it.

For what reason does this appear? Like any material process, it is born on a spiritual level. Naturally, you will ask about the karmic prerequisites for such a process, because you know that everything that happens in the Universe is allowed by God for some kind of spiritual lessons. And you know the words of my Spiritual teacher (despite the fact that He is my physical son, He is still a Teacher), Jesus Christ, who said: *"Without the will of God, not a single hair will fall from a man's head* . "

There were spiritual reasons for the war between Selbet and not only with the Earth, but also with the Interstellar Union. The root causes that gave rise to this physical conflict existed on Selbet, and on Burkhad (as the capital of the Interstellar Union), and on Earth itself. There were people from Earth on Mars and Venus. The destruction of Mars and the attempt to destroy Venus - this was a continuation of the physical destruction of earthly civilization. Selbetian reptilians did not separate the inhabitants of Venus and Mars from the inhabitants of the Earth according to their genotype.

The reason on Earth, which gave rise, one might say, the spiritual prerequisites for such aggression against oneself. As I already said, you may remember that long before the war, namely 40,000 years ago, I was incarnated in the body of Khaanoch on Earth, in a city that much later began to be called Atlantis on Earth. I said that I was a prophet or, as you say, a contactee, and received information from the Christ Consciousness, from Angels and was connected with the civilizations of Burkhad and Tumesout. And I already told you that some priests (one might say, representatives of the spiritual elite of the earthly community at that time) began to experiment on people with the help of plasmoid civilizations. I warned the priests about the inevitable consequences of such a path; they tried to take me out of incarnation with the help of poison. But the Burkhadians saved me, transporting me to Burkhad.

Those reasons that originated 40,000 years ago have not disappeared anywhere. People, these priests were representatives of human civilization. They haven't changed their behavior. And since they were the founders of the religious and political egregors of that time, they introduced into the noosphere of the Earth the idea of arrogance, the idea of social inequality, which then, after the war, degenerated into the slave system. You can even say the idea of social Darwinism. That is, not racial superiority, which did not exist at that time, but superiority in origin from certain tribal unions. There was one race.

They came into contact with suitable plasmoid civilizations, which made contacts through the corresponding vibrations. They formed such alliances so that the plasmoid would help them control the people with the help of certain bindings of energy influence. There were even plasmoids that created energy caps, like a dome over a village.

They experimented with ensuring that this effect was produced in a dream, when a person’s Soul leaves the body, and that he was met there by a plasmoid or its phantom. There were quite a lot of plasmoids there, when entire plasmoid worlds were connected there. The influence was made by suggestion. One might say, this is a form of hypnosis, only with the help of the energies of subtle beings who can very subtly influence the etheric body. And after the Soul returned from the Astral Plane, that is, after the physical body woke up, these people could change their decision, which looked like a fairly voluntary decision for the star creators from other planets.

This can be called magic, but there was not only magic on a subtle level with the help of some rituals and contacts with plasmoids, but also on a physical level with the help of experiments. They used the Science of Imagery, which was transmitted by your star creators from other planets. There were special teachers who taught earthly languages, flew in and taught young people, children, teenagers who came to the bases, and there they were explained what the Science of Imagery is. There they were also explained the true purpose of the stars and planets, that these are inhabited worlds.

Many of them (not all, of course), instead of using this information for the development of the entire earthly civilization and building a fair society in order to be accepted into the Interstellar Union, used it for

power over others, which gave rise to the idea of pride, superiority, arrogance and everything else that follows from these ideas. For the representatives of the planet Selbet, who saw all these processes on the astral level, like the rest of your creators, these experiments were a constant source of irritation.

Even before the war that occurred 12,000 years ago, the Selbetians repeatedly raised this issue at a meeting of the Interstellar Union of the Galaxy. And, naturally, the Commission for Contacts with Young Races of the Interstellar Union of the Galaxy resolved this issue with its contactees. But in a gentle way. The Interstellar Union does not have such a directive from its leadership to act harshly with its contactees, to manage them in any way. They can only recommend, point out the consequences of their actions. But to order in any way, to conduct a strict policy of control on the planets is not in the rules of the Interstellar Union. And for this reason, those earthly contactees who were in contact with the Interstellar Union, there were quite a lot of their representatives, played a double game (they tell them one thing, then do something else).

Destructive civilizations can connect to any person, no matter what he teaches, if he matches his vibrations. This means that he will use the Science of Imagery for his destructive purposes. And if destructive civilizations have joined him, they can help him with this.

I flew to Burkhad. They took me there to save my life from an assassination attempt. From those priests who called themselves spiritual, enlightened individuals, but secretly used even such means as poisoning, but they presented it as an accident. After I came out of incarnation, all these destructive processes on Earth continued. And this arrogance and pride gave rise to the spiritual process of attracting external aggression.

On Selbet, the spiritual cause of the war was the lack of Love, acceptance, forgiveness, lack of humility with the decision of the Interstellar Union on that genotype. That is, lack of humility and non-acceptance is their spiritual cause of war.

On Earth, the spiritual cause of war is the presence of vibrations of arrogance and pride in the noosphere.

Burkhad, and he was also involved in the war, like the fleet of Ashtar Sheran, and his supporters also had a spiritual reason for the war - this was spiritual carelessness in terms of insufficient perseverance in educating young civilizations. Because they could make sure that these priests were separated from their society, sent to another planet and lived according to the rules. Then civilization would have a greater opportunity to live with the rules of the Interstellar Union. That is, the Burkhadians were too soft. There was control, but not strict enough, which was required in this situation.

All this together led to a very brutal bloody war. Here it is necessary to understand that this does not justify either Selbet or their behavior. This is only an explanation of the spiritual reason. They might not have used a spiritual reason to attack. But this does not mean at all that if Selbet had not attacked Earth, then something else would not have happened. It could have been anything really.

I did not just follow events on Earth from the Spiritual World, or from the body of an intergalactic civilization, I was directly embodied as an earthling during that period in Atlantis when this destructive process began. And I, as a prophet, that is, as an angel-prophet, warned my colleagues, other prophets. They later began to be called priests. An approximate understanding of the word “priest” is one who is in continuous expanded consciousness.

Spiritual problems of humanoids of the Interstellar Union

https://blog.cassiopeia.center/duhovnye-problemy-gumanoidov-mezhzvyozdnogo-soyuza

We don’t call these problems, these are not so much unlearned lessons, but as tasks. The problems are the same as yours, they come from past incarnations: those qualities that need to be strengthened or reduced in yourself in order to increase your spiritual level. We are taught from childhood to recognize **our** true desires, **our** true goals. And harmoniously, in alliance with the forces of the Universe, go towards their materialization for the purpose of growing oneself in Love and the purpose of sharing with others.

Greed and deceit are types of fears; they are only a consequence of deeper violations that were not noticed in time. We call these fears of losing something, or not achieving our goals, or not being understood. For example, lying is often caused by the fear of being misunderstood or rejected. Greed is often generated by the fear of not being a happy, self-sufficient person in material terms. We are doing everything to prevent their development.

But, naturally, since we even have a planet of criminals, we also have criminals. As they say, this is the choice of every humanoid. But our lives are structured in such a way that in families, and then in schools, we teach our children how to work correctly with their fears so that they do not interfere with spiritual development.

All Spirits have fear as a reaction to a certain environment and a certain internal state. This is an innate emotional quality. And if you don’t work with it, don’t harmonize this fear, then it can develop into such forms of manifestation in the material world as those mentioned above.

In our society there is special knowledge, access to knowledge that will help you recognize this in yourself and harmonize it in time to turn it into Light. We do not remove any quality from character, but transform it. If you remove some feeling, some emotion, then, in fact, this cannot be done for a long time; it will be developed again (this emotion). And even if you constantly cleanse your astral body and emotional field from negative emotions, it will be ineffective without deep transformations in the spiritual heart.

To work with it, we teach you to meditate, communicate with the Higher Self, and analyze your emotions, for example, a diary of emotions helps with this. And the third tool is communication with your physical body and understanding its needs, and feeling, sensing its needs, which it cannot do without. And the fourth tool is a source of knowledge about how to distinguish your spiritual desires from your instincts, how to prioritize the former over the latter. This helps to reduce fears, and therefore less likely the occurrence of those already developed passions, an example of which is discussed above.

LiScioni on alien regression

Our school education system includes a compulsory subject called “Spiritual Psychology” or “Psychology of the Spirit.” Within this subject, all children are taught in theory and practice to connect with their Higher Self. The Higher Self of each incarnated Spirit works in contact with the embodied Self, with the Soul of that humanoid. Including it itself conducts regression, as you call it, at the request of the humanoid from Shimora.

We don’t have a special profession like you – a regressologist. We simply have a specialist, a master in the Spiritual world, if you can call it that, or in interaction with the Spiritual world, in your opinion. In Russian it would be “a specialist in astral interactions.” It’s just that our World of disembodied Spirits, the Astral World, and the Divine World are not so divided. We understand all this as separate areas of a single world. Therefore, my profession can also be called “a specialist in the study of the Spiritual world and its influence on the material world.”

I did not teach at school, because for this you also need to have a pedagogical education and special skills in working with children, but I know the programs in which children are trained, I studied myself. I can say that in contact with the Higher Self, any Shimorian can find out for himself any moments of past incarnations, being in the Spiritual world, as well as find out those experiences that negatively affected his perception in his current life. We usually call them “karmic knots,” but this is again a translation into Russian.

This is called a little differently, but the closest adequate transmission into Russian through a contactee is “karmic knots.” These are some events and situations that gave rise to a decrease in spiritual vibrations in a past life and were not harmonized by the Spirit before leaving incarnation. They pass in the karmic or causal body, that is, in one of the areas, so to speak, of the memory of the Spirit into the next incarnation in the form of its unresolved spiritual tasks. And all this can be seen and understood in contact with the Higher Self.

Shimorets also have the free choice to raise or lower their vibrations. If he lowers his vibrations and creates an energy block that blocks the

opportunity for him, makes it difficult or completely impossible for him to communicate with his Higher Self, with his Light, then he may need the help of a spiritual guide. But this happens quite rarely, because there are special energy techniques for clearing blocks. There are even such special devices - cameras, where a person walks in, sits down, and the device creates vibrations that affect the subtle structures of the etheric field, destroying the created grid that contains the negative.

A person or humanoid, if he wishes, can ask his Higher Self about his past life. But the answer will be given only if it is useful for spiritual development, and within this framework.

Perception of past incarnations by the Spirit in incarnation. Ahamkara

Information about other incarnations of the Spirit is stored in that area of the Spirit's memory, which is located in the vibrations of the state of the Higher Self. This memory does not exist in the incarnated part, in the Human Soul. This memory of past incarnations is not in the part of consciousness occupied by the physical brain. Because this body, this brain did not experience these events. We experienced other bodies through another brain, through another consciousness, through another perception of consciousness, to be more precise. That is, even the organs of perception could be different, the language in which this creature thought could be different, even the type of body could be different - thin or dense.

These memories, which come from the Higher Self, descend through the spiritual channel into the human consciousness, fall from the disembodied part of the Spirit to the embodied part.

What happens to these memories? They transform, undergo a metamorphosis, which is called "retransmission of these memories through the figurative understanding and memory of the person himself in the body." In any case, he will be able to remember this at his own level through those images and understanding that are close to him -

he will not be able to directly perceive that experience without having that body. And in some way it will be included, I would not even call it imagination - but such an automatic ability of consciousness, or rather self-awareness, like ahamkaras.

This is such a term, it is a part of consciousness aimed at the Spiritual world, at oneself. This is the ability of the Soul's self-consciousness to produce a metamorphosis of unknown images, unknown phenomena, even unknown letters (LiSioni), already into the familiar through memory. This is not called imagination. Imagination or fantasy is the creation of new images. But here new images are not created, here the so-called rewriting occurs. This is very reminiscent of transcription, which occurs in every cell of the human body when genetic information is rewritten from DNA to RNA.

From a dialogue with the "gray" - a representative of the planet Tashig, constellation Northern Crown

https://blog.cassiopeia.center/iz-dialoga-s-serym-predstavitelem-

planety-tashig

A representative of the so-called “gray” civilization was invited to one of the conversations. This is the civilization of the planet Tashig. They are one of the closest allies of the reptilians from the planet Selbet for research in our sector of the Galaxy. The representative of Tashig, whose name is Ari Shen Puros, is a biotechnologist and ecologist on his planet and directly conducts research on contactees from our planet under the permission of the Interstellar Union, which he received on the planet Burkhad in 1995 according to our chronology.

My height is 1 meter 32 cm, my physique is asthenic. Our bodies are very flexible and thin, especially our limbs. Due to the fact that they are very light, they can withstand the very strong attraction of planets, gravity. Our Tashig is slightly larger than your Earth and has a greater gravitational force. Therefore, my weight is less than 40 kilograms. The head is pear-shaped.

The head is pear-shaped, the eyes are wide towards the temples and narrow towards the nose, they are located slightly at an angle. The skin is grayish-green, without hair. In place of the nose there are two holes that protrude slightly above the face and narrow lips.

Our planet is located in the constellation Corona Borealis, about 400 (just shy of 400) light years from your Sun. It is located at a greater distance from the Central Star than your Earth is from the Sun. Therefore, its climate is colder. About the same as your Martian. Due to the fact that our body temperature is slightly lowered, we can live calmly at this temperature. On the contrary, on your planet we feel a little uncomfortable because of this. Our oxygen content is also lower, about 11-12%, and we feel quite comfortable with these indicators, because this is our home planet, and we evolved there from animals, such as seals.

We have many oceans. Most of the planet, more than yours, is covered in water. And on that part of the land that is available for our use there is very dense development. Only excluding spaceports, where we receive guests from other planets and places to grow food for food. True, there are fewer and fewer of our plants left. Our scientists have decided that we can eat concentrate. In your language,

these are tablet-capsules that contain all the substances we need in a form in which we can absorb it. We can live for many months only on them and only consume a little more liquid. The production of these capsules can also take place in space. We are autonomous and independent of our planet as the production site for our food.

We have developed ourselves. Evolved from animals. Our scientists in the early days were more concerned with biology than physics or spaceflight, and so we began to experiment quite early on with our genetic structure and the genetic program of our DNA. We ourselves conducted bold experiments in crossing ourselves first with living organisms of our planet. And when we joined the Interstellar Union, we ourselves proposed such experiments on crossing and breeding common creatures with other races. So, as we believe, and our civilization teaches this, and I also adhere to this opinion, that through genetic experiments it is possible to eliminate the disadvantages of one race and increase the advantages of all races that will be crossed there.

Is it true that you are doing experiments with earthlings?

Yes, we are authorized to do this by the Interstellar Union for the purpose of bringing out a common being, as with many other races in the Interstellar Union. We have common races with Shimor, with Esler, with Selbet and with one of the colonies of Burkhad. There was a positive experiment between creatures of hybridization of our race and the inhabitants of the planet Dissaru, who are complete genetic copies of you. True, the experiment there is not finished yet, but it is already showing positive trends.

Since our experiments concern ethical issues: breeding hybrids to embody Spirits in them, we are obliged to strictly adhere to the instructions specially developed for this purpose by the Interstellar Union commission for contact with your planet. This commission includes the inhabitants of 42 planets that are in contact with it, including our world. This includes the planet Selbet. Although she does not have official contactees, she is still included in this commission as one of your creators.

This commission very clearly outlined the instructions according to

which we can invite people to experiment. Full, informed consent to this intervention must be given, with an explanation of its reason, its consequences, and even a demonstration to him of the hybrid that will be obtained from his genetic material. We can also take genetic material from an adult, our contactee. But our scientists believe that it is more effective to take genetic material from the embryo when it is not yet born. Because when a person has already been born and lived for some time in your world, his genetic properties change. That is, he may already have genetic abnormalities, because mutations in cells, including DNA, are already occurring. This will no longer be the pure hybrid we wanted.

As a scientist, I naturally adhere to the norms of the Interstellar Union. Therefore, I do not have the right, without explaining, for example, to the woman why she needs it, let alone delivering an embryo, I do not have the right to even touch her with my instrument. I can contact and explain to the woman. She may ask: what is this for? The only thing I am authorized to answer is that the Interstellar Union is interested in this, that part of your DNA will then be in a stellar creature that will live among the stars, and it will be your son or daughter, will fly in space.

Many people only ask if it is possible for them to meet there later. And I answer that if they agree to this later. They can work in a completely different area of space, and we must always tell them whose genetic material was taken, from which planet, to create their physical body. That is, if they are hybrids, and they grew up in a person or using his genotype, then we must tell them about it. But in our country only part of the experiment is carried out with participation in cultivation in earthly women. Most of the experiment is carried out by taking genetic material from them and growing them in devices where artificial conditions are maintained. Rapiton.

> Is it true that after women carry such a child, their memory is erased?

Yes, this is done quite often, but this is a common practice for contacts with the Interstellar Union precisely because your planet has not yet entered the Interstellar Union, and therefore the stories of female or male contactees, after returning to Earth, can harm them themselves. But this is usually done with their consent and at their request. If we say that I am ready to leave this memory and I think that it is safe for

me, then we will not insist on that. And if we see that, according to his psychology, he will then behave adequately. That is, in the future, when time has passed after the contacts and he hears the opinions of other people about the kidnappings and everything else about what you said, he will not begin to think and believe these people that he has suffered any harm. Because if he starts to believe it, he can cause psychological harm to himself.

> How many hybrids of you and us earthlings already exist in nature?

Personally, I am currently working on a base that is located in interstellar space. It is located at a distance of 32 astronomical units from our star. On this base, I personally observe 1106 such hybrids today. These are those hybrids that have successfully completed the genetic material.

> Do you have bases on Earth?

Yes. Today we have 83 bases on your planet. The closest one to you, but not the largest, is located in the Zailiyskoye Alatau region. There are such mountains near Alma-Ata or the Ilik River.

> How do you personally feel about Earthlings?

Fine. You are a race with quite a large potential for physical, intellectual, moral and spiritual development. Which can still be improved by adding genes to your cells that will help you think positively.

> What do you think about what we call Satan?

This is a religious image formed in one of the religions of your planet in order to create an understandable image of negativity. As you say, an enemy, an adversary, against which you need to direct your energy in order to become better. It is clear that they formed this religion on the basis of your contacts with your creator races. This was the image of exactly those who wanted to destroy you in the war. This was the most

understandable image with that representative of the creator who formed your religion.

> What is your religion on your planet?

This cannot be called a religion in your generally accepted sense of the word. We do not worship deities, we do not build temples for them. We accept for God only that which seems to exist, like nature. This cannot be called materialism, and at the same time we recognize it as the creation of God. Nature itself is living and alive for us. But it does not require worship, because God in our concept, as the Universe, does not require worship as human, because this is like a meaningless waste of energy, our strength, thoughts. We must improve nature and ourselves, and only in this way can we get closer to it.

> What do you think the human body is capable of, what abilities can a person really have?

You, in fact, have a lot built in, and I confess to you, much more than is built into our race. Why is this because you are originally hybrids. You were created taking into account the further growth of your abilities and entry into the Interstellar Union as not only ordinary employees, but one of the leading allies. That is, those of your creators who spread life and explain its laws throughout the Galaxy and beyond.

Life outside the galaxy is now being explored. And taking into account the circumstances that I mentioned, you had the genetic abilities of three races and still retained the genetic characteristics and abilities of your earthly race, which you now call primates.

This is also a special race for us, although it was unreasonable, but, by the way, it had its own genetic, energy, and mental (wave) characteristics. I am very surprised by the situation of rejection, why you have a bad attitude towards genetic experiments, you are hybrids. It would probably be more difficult for us to get used to it, because we came naturally.

I would like to address this with the following words: ' *Dear to my heart,*

the inhabitants of this very beautiful and surprising for many galactic inhabitants of the world. I would like to contact you with a reminder of the truth that was said by one of your inhabitants, who also contacted me from the races of the Interstellar Union. He said that in this unimaginably vast Universe we need not fear that we will not have enough energy or matter, but we should fear that we may not have enough intelligence.

So I would like to wish you all reason and a conscious attitude. More reason and a conscious attitude towards contacts with representatives of the galactic community of the Interstellar Union. Remember that none of those who work, none of the employees of the Interstellar Union, want to cause you harm or pain. Well, if you nevertheless fell under the influence of criminals from our planet, then I ask you to report this through contactees to the Galactic Security system so that an investigation into this case begins, and all those responsible are punished in accordance with our rather strict law. Believe me, in any world irresponsible citizens whom you call criminals can be born. And this greatly hinders the work of us, scientists who want to improve this world and ourselves in various ways, by undertaking any, even the most risky, experiments. "

Video on the topic: #34 (transcription) Sensation. Dialogue with Gray - a representative of the planet Tashig from the constellation Northern Crown.

Methods of cognition of the Universe. Global issues of the Interstellar Union

> Where do the dense material civilizations of Burkhad and Esler get their knowledge? What global issues are facing the civilizations of Esler, Shimor and the Interstellar Union as a whole?

All sources of knowledge in the civilizations of the Interstellar Union, in this case, is the database that is the scientific property of the cultural community of the Interstellar Union. This is the sum of all knowledge about the universe and all mental attitudes that were recorded, in your opinion, in the form of books, for example, which were the processing of this knowledge. All this forms the basis of the Interstellar Union. This accumulated directly through learning how to act in certain situations.

For any Spirit embodied in any body, the process of cognition is no different. It goes through certain receptors of the body, and through processing by the mind. For example, if you observe the same phenomenon, say, electric current, then it can be explained in completely different ways from different positions of the concept of the Universe. If you already have an atomic system of knowledge in your mind, then you will explain these phenomena from its position. If you have a system of knowledge in your mind that is not based on the planetary model of the atom, then these will be different explanations.

Here it is very important to understand that explanations, theories, concepts and other mental attitudes that exist and are described in books and expressed in words in general are only part of that universal Truth that becomes known along one or another path of development of a civilization or an individual humanoid. Our source of knowledge, like yours, is the Universe that we study and of which we are a part.

As for the global problems facing the Interstellar Union, they are not too different from the global problems facing each planet that is part of the Interstellar Union. The first is further study of the Galaxy. The creation of colonies in the systems of those stars where this may be possible is the formation of planets. Further study of the theory of hybridization. That is, the crossing of different species to manifest certain qualities of intelligent Spirits. Contacts with those races that

were not included in the Interstellar Union, with the goal that they become part of us. Since we believe that our path of development corresponds to the plan of spiritual development that is intended by God.

Our next global task is contact with Interstellar Unions of other galaxies. Work in the Intergalactic Union. Harmonization of contacts with completely different forms of races that were not formed in our galaxy. Another task is contacts with plasmoid civilizations. Developing a general concept of the Universe, common terminology and ending disagreements over the different structure of the world, which cause various negative emotions and reduce vibrations. Further study of all the laws of the Universe. Studying the free energy of vacuum and creating devices and ships based on it. The study of black holes, quasars and all forms of galactic energy that may exist in our Galaxy. These are the challenges that our society faces. Everything else follows from them.

Kirchiton about himself and contacting

https://blog.cassiopeia.center/kirhiton-o-sebe-i-kontaktyorstve

I am a scientist, an astrophysicist, and I don’t often answer questions about spiritual development. I am mainly engaged in scientific work and contacts with earthlings. I will tell you that the main types of contacts I have are physical and mental.

Physical contacts are when I take a person, my contactee, who has given consent to contact me, in a physical body in order to show him the Galaxy in accordance with the program that the Interstellar Union (Interstellar Union Contact Commission) has developed specifically for such cases .

Mental contact is a substitute for physical contact when physical contact is not possible. This is contact on the mental level through the mental ray. It is accompanied by a mandatory exchange of energy. Otherwise, mental contact will be impossible.

As for astral contact with leaving the physical body, I have done this very rarely, since I am more inclined to be in the physical world and observe physical phenomena.

I remember the first day of meeting Irina, our first contact. My task in this contact was to open a new world to her, to open her awareness to the fact that other civilizations exist and that they can physically fly to contact.

Naturally, Irina - she was 13 years old at the time - like all children and teenagers of her age, grew up in an environment where conversations, books, and films about aliens were common. She saw it, heard it, so it wasn’t big news for her what aliens were. She just knew who appeared in front of her. When I invited her to visit our planet, she realized that we were talking about aliens, about flying to another planet.

The purpose of my incarnation on the planet Daraal is to transmit knowledge about space to that civilization, to representatives of that civilization for which the path to the Universe is closed. This is an increase in knowledge of the world. To contribute to increasing the knowledge of man and humanity about the surrounding Universe is for him like fulfilling the goal of incarnation, because this is also a form of Love.

Irina Podzorova about a toy in the form of Kirchiton, a Voronezh alien

This toy is based on the stories of Voronezh schoolchildren who saw unidentified flying objects in 1989, when I was three years old. It was a contact, quite famous, called the “Voronezh Incident”.

Newspapers wrote a lot about this and popular science films were made. And according to the stories of the schoolchildren, this is what the creatures looked like. They turned out to be Daraals. It was only later that Kirchiton told me about this, when I was in contact, that these were representatives of his planet, although he himself was not there.

These were representatives of his planet, as he explained, on a tourist ship who came to see Voronezh. At that time, there was not such a strict ban on appearing in front of people, because there had not yet been so many cases of attacks on flying objects and such attention from the special services to working with contactees. At that time it was just beginning and was not so developed. Therefore, the Security Service of the Interstellar Union then, one might say, turned a blind eye to such contacts.

Moreover, Kirchiton explains that this was a one-time contact, it did not continue in the physical world. That is why representatives of my planet appeared in front of these children.

Here's a toy. He should have one eye red, and two eyes yellow, and they are round. Not like on a toy, but round. And there are some claws attached to the toy, and it has a hand. He has hands with five fingers, and they are not so long that they reach down to the ground. They are just below his knees.

But here it is shown that he has no neck. Indeed, they have such a body because they evolved from creatures that vaguely resembled our bears. And even then they had, one might say, a head from the body, practically without a neck, because they did not have the part of the spine that is responsible for the neck. According to our chronology, he was born on April 4, 1844; in a month he will turn 180 years old.

Timecode: 07:20, #470 Live broadcast with Kirchiton, the first curator of Irina Podzorova.

Kirchiton is a representative of the planet Daraal, a specialist in contacts with representatives of other planets, a researcher of new planets; first curator of Irina Podzorova.

Training of doctors in the Interstellar Union

https://blog.cassiopeia.center/podgotovka-vrachej-v-mezhzvyozdnom-soyuze

Doctors are trained in special educational institutions under the medical service department. There are medical schools on every planet. The schools themselves, where children of the Interstellar Union study, are already arranged so that in the last 3-4 grades, depending on the planet, children are divided according to their abilities, capabilities and interests.

There is a class that is interested in natural science biology. There are special psychologists in the school itself, who in the graduating class talk with each student and ask where he wants to direct his path in adulthood. If the answer is that in medicine, then they conduct special tests on knowledge of primary information, which are taken on this topic at school. If the student passes this, he is given a special training warrant. It is given by the school and confirms that the student passed the test in a natural science biology class, that a psychologist spoke with him, and now he is ready to enter the first year.

We don't have any entrance exams in the institution itself, because school work is enough. He has already confirmed the seriousness of his intentions by taking this test at school and talking with a psychologist. An educational psychologist helps you choose the right profession. I know that your institute has entrance exams. I believe that the school knows its students best who are ready for this, since they have studied there for many years. There is also a psychological and spiritual component. A person can know all the material, but be psychologically and spiritually unprepared for it.

The psychologist advises to talk with your Higher Self - is this profession going to allow you to complete the task of your incarnation or not? If the Higher Self confirmed, the student says: “yes, I talked, everything is fine,” and plus he passed the test, then he is given a warrant, he is enrolled without any exams, absolutely free. We do not have such an understanding - payment for knowledge. This is information for the development of the Spirit. We believe that paying for information that develops a Spirit may limit access to it to those Spirits who have directed these funds to something else.

For humanoids of the anthropomorphic type like the Burkhadians, Disaru from the first year to the last, the training of a doctor takes 12 earthly years. In the last year, they undergo special practice in some institution under the guidance of doctors who work there. There is an agreement between this medical treatment institution and the educational institution regarding how many graduates they will hire. This is so that the specialist can immediately go to work from the threshold of the educational institution, so that he receives a salary next month and can support himself.

Of course, it is impossible to foresee all cases. Every year new humanoids arrive and, moreover, humanoids from completely different planets can arrive at each medical institution. There is a specialization, but anyone with a similar structure, but from another planet, can be brought there.

If this is the specialization of a space doctor, then he flies with different crews in outer space, discovers different planets on expeditions. He is also called an expedition doctor. Absolutely any humanoid and reptilian, and insectoid, and anthropomorphs can join the expedition, but there is only one doctor, and he must know the specifics of all

these organisms and work with them.

Naturally, the doctor has the right to take robotic assistants with him - biorobots. Usually they take two or three. They obey the doctor, like assistants, like orderlies, only not people, but robots. These robots have all the medical information, they can provide assistance, they can talk. Only they cannot make decisions on their own in situations that deviate from their program.

If the operation is included in the robot program (usually they have quite a lot of functions, that is, a sequence of actions), then they can operate, but under the supervision of the doctor himself, because there are emergency situations in which robots will not be able to make decisions. They have a set of programs that switch between each other quite quickly. In one millisecond, 250 programs can change.

Their brain consists of special silicon wool, of chains of silicon molecules on which information is recorded by transferring certain data by increasing or decreasing the electric field strength in each atom. Robots do not need sleep, and their source of energy in space is stellar radiation from the walls of the ship; they can put their hand on it and charge it. And on the planets they have something like a solar battery on their back, on their neck, on their head, disguised under the skin, this is how they receive energy.

Disease prevention in the Interstellar Union

https://blog.cassiopeia.center/profilaktika-zabolevanij-v-mezhzvyozdnom-soyuze

We have a law on fairly strong prevention of various diseases that begin not even from the moment of birth, but from the moment of conception. Our children leave school absolutely prepared for the moment of conception and birth of their children. They are told how to correctly structure their thoughts, their moods in such a way that the Soul, which comes to incarnate into the body that will be born, can enter this body, correctly forming its etheric matrices, on which the formation of physical structures already depends. So that there are no distortions at the genetic level.

When the soul enters the body, it reads certain information from the chromosomes and builds its etheric matrices from the etheric energy that exists. And what to fill the etheric matrices with, what type of physical matter, what organs to build, how exactly, this is already decided by the Soul. She is also influenced by the energies of her parents. She can take some specific information from DNA, but not take some.

For example, for a person, out of all the information recorded on DNA about the structure of the body, the various structural proteins that make up the tissues, the Soul takes only 3-5%. Everything else is in a dormant state.

Prevention of diseases occurs in childhood. Starting from the first grade, the school has a special subject, just like you have “Fundamentals of Life Safety,” and we have “Fundamentals of Life Safety in the Physical Body.” There they study what the physical body consists of, how to keep it in a state of health and harmony, how to talk with organs, how to harmonize with microorganisms. We have certain techniques, practices of a meditative nature that trigger the control of reality.

But, as you know, all humanoids have free will whether to use it or not. Those who do not use this sometimes get sick. It is for them that the medical service has been built and for those who have received any injuries. For example, while on expeditions or on their planets. Basically, we have those diseases that were a big problem before joining the Interstellar Union, they have been defeated.

We know what diseases there are on Earth. MidgasKaus also told us that he studied your illnesses using testing - astral diagnostics. He watched many people and then made special reports to a commission in the society of scientists of the Interstellar Union who study the Earth. He talked about the state of the organisms of earthly people, their energy.

I (MidgasKaus) said that a big problem for people is a cardiovascular problem, a metabolic problem, a hormonal problem, as well as infections, helminth infections, as well as mental diseases, i.e. brain We call mental illness certain states of the brain that prevent the full manifestation of certain abilities and qualities of the Spirit.

We had similar illnesses, such as depression, before joining the Interstellar Union. But then, when we joined, we took up prevention related to the mental sphere. If we had not done this for prevention, such lessons would have appeared in our country. These lessons appear for a reason, that a person must go through it, because it is impossible without it. But because he himself behaves in a certain way with his emotions. Therefore, he forces himself to undergo this lesson.

Every child in the first grade of our school is already taught how to keep an emotional diary, how to write down various emotions there so that they do not collect in blocks, and how to work on them. When the Spirit, while in the body, has already accumulated some kind of block, and the amount of Divine Light in its Soul has decreased, if it feels like a body and not a Spirit, then this is a sign of a decrease in vibrations. If then irritation, despondency begins, and faith disappears, this is already a far advanced process.

It needs to be stopped at the initial stages, working with your emotions before they obscure the Divine Light. If they obscured the Divine Light, and a person begins to live in these blocks, then his brain also

changes, his hormonal system adapts to his stressful state. Serotonin begins to decrease, cortisol and everything else begins to increase. This is only in response to the mood of the Spirit.

Timecode: 35:35, #482 Healthcare system on the planets of the Interstellar Union. Memory erasing technology.

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

About the assistance of aliens to humanity. Analysis with Irina Podzorova

https://blog.cassiopeia.center/o-sodejstvii-inoplanetyan-chelovechestvu-razbor

A.: Aliens for believing monks are demons... I once said that a monkey participated in the creation of man... By this I offended the monk obscenely and he did not communicate with me for a long time...

Irina: How do the monks justify that aliens are demons?

A.: I think the problem here is secrecy... Aliens, like demons, do not openly make contact... And everything that is mysterious, unknown and secret frightens the human consciousness... The world is teeming with all sorts of ghosts, horror stories and scares...

Irina: A person can be afraid of an Angel if he is not ready to see him. The aliens justify why they do not make open contact. Because humanity is not yet ready for it. Simply put, there is no need for aliens to make open contact while our civilization has the spiritual level of development that it has, because this can provoke conflicts on our planet.

They just understand perfectly well that if they come into open contact, they will have to openly interfere in our development. That is, bring us everything they have on a platter. And this could interfere with the independence of our civilization, but they don't want this, because they want to enter into open contact only with a civilization that is ready to become their equal collaborator

A.: This is generally some kind of frivolous excuse... Can't a rich person communicate and be friends with a poor one... Can't a rich person find common interests with a poor person and what can bring them together...

Irina: Of course it can. But if the poor man is aggressive and only thinks about what to steal from the rich man, then the rich man has the right to defend himself.

A.: Do you want to say that aliens will not be able to protect themselves from earthlings? Well this is too much(((

Irina: Of course they can. But this will lead to conflicts. Why do they need this?))

A.: So they don't care about us?

Irina: If they didn't give a damn, then they wouldn't fly here at all and wouldn't create here various spiritual communities, which are now

called religions.

A.: You have not yet answered or given significant reasons why aliens do not make open contact...

Irina: Because there must be a purpose for this open contact. Why might they need this?

A.: Let’s rephrase... You are saying that they don’t need it... I tell them not to care because they don’t need it... The well-fed don’t understand the hungry...

Irina: Then why do they even fly here, at least to the contactees? And they transmit information to us through the Astral? Is there nothing else to do?)) Why are we hungry? There are plenty of resources on our planet

A.: How do I know why they come...

Irina: So they have already answered this question: to prepare earthlings for open contact with the goal of our planet joining their Union. So no one just gives anyone a skeet ride. Everything has its own purpose😊

A.: We are hungry for everything... We want to know everything, study everything, strive to develop...

Irina: So full of knowledge. Take it and use it

A.: Nu-nu... In mythological tales... Especially about the world order of the universe...

Irina: Maybe someone just called them mythological?😊 It is necessary to develop figurative thinking in order to develop an understanding of what lies behind the images. Yes, and you need to learn to communicate with your higher self. No aliens will do this for us. The

teacher appears when the student is ready😊

A.: What higher level are you talking about... Everyone who previously communicated with him was locked in a psychiatric hospital... Is this a development in your opinion?

Irina: People used to be locked up in psychiatric hospitals for believing in God. Doesn't it develop a person's morality?

A: Who develops human morality? Mental hospital?

Irina: Vera

A.: Well, if you arrived with good intentions... Then act honestly and openly... And not behind the fireplace...

Irina: The governments of the countries of the world know about their existence, but have refused to cooperate. They told them that they wanted to go their own way. And what should their actions be in your opinion?

Why was the Interstellar Union created in the first place? To develop together and explore the Universe

A.: Irina! At first, you assured that alien civilizations do not enter into open contact because we are not ready, here is your message... It’s just that the aliens understand perfectly well that if they come into open contact, they will have to openly interfere in our development. That is, bring us everything they have on a silver platter.

And this could interfere with the independence of our civilization, but they don’t want this because they want to enter into open contact only with civilization and are ready to become their equal collaborator. Then you, Irina, assured that we can threaten them... Then you explained that there is no need for aliens to interfere because they don’t need it... Then you decided that they need and want to cooperate and offer to join their alliance... And now it turns out that this is The governments of

195 countries on earth have refused to cooperate...

Or are you, Irina, making a gag in this matter... Or are you receiving deliberately contradictory, incorrect information... You need to somehow come to a common denominator and openly and honestly make statements...

Irina: There was already a video on this topic, that all the governments of the earth know about their existence and refused to change the laws to those that exist in the interstellar union.

Well, no, there is no trial. You don't want it as you want. But it’s strange to demand mass contact in this case

A.: You see what ultimatums the Interstellar Union sets... Isn’t it possible to offer cooperation without an ultimatum... Cooperation on mutually beneficial long-term relations...

Irina: And what can we offer to the interstellar union and what can it offer us without joining their union?

A.: Where did you get the idea that cooperation implies emptying your pockets? Now in world diplomatic relations, especially between conflicting parties, the system of an outside observer is used...

When an independent party helps solve the problems of the conflicting parties... Aliens could become third-party observers to try on the warring states and actively raise the spiritual level of humanity by offering new knowledge about the world order...

Irina: So the aliens have already proposed, through contactees, a plan for resolving the military conflict in Ukraine, for example. If they were not listened to in this way, why do you think that they will be listened to without contactees?

A.: To listen or not to listen is the will of the country and its government... We are talking about what role aliens could take during

mass contact...

Irina: Well, if this is the will of the country, then why does this country need mass contact? Moreover, why do the aliens need this if their goal is to join us to their union? Just fly around and entertain us?

A.: Would you like us to behave like Banderlogs in front of aliens?

Banderlog... Can you see clearly?

- We'll see, Kaa...

Irina: Personally, everything suits me. But I don’t know what you want from aliens and Earthlings

A.: What do I personally want? I'll make a list right now)))

Trips! We will not knock down their plates... We can also offer other friendly relations...

Irina: Traveling on what?

A.: Not on what but where... Aliens can freely visit the earth... Sunbathe on the beaches, climb mountains and caves...

Irina: They still visit Earth now. If they do not remove the protection themselves, then no one can bring them down

A.: Irina! I see your good intentions... But let's talk like adults... We don't know what the Interstellar Union is and what its laws are... We don't know anything about how alien civilizations live and develop... With what Therefore, we must trust our lives, the fate and future of our descendants... Trust those about whom we know absolutely nothing...

Therefore, what kind of talk can there be about joining an unknown organization... In general, I think this is some kind of unhealthy topic regarding joining the MS... First, we need to get to know each other, create favorable friendly relations... And when we trust each other, then we will raise the question of joining the MC... As for open contact with representatives of the MC... If the Interstellar Union is interested in us in some way... I don't see any obstacles to open contact...

But so far it's working out... So far I only see ultimatums from the MS... And of course, perhaps this is alarming the governments of our countries...

Irina: If there is open contact now, then earthly governments will have some kind of agreements with alien governments. Naturally, earthlings will ask aliens for technologies that we do not have.

If the aliens refuse, it will immediately give rise to suspicion and resentment.

And if provided, then these technologies, given our level of spirituality, will most likely be used for military purposes. And then the entire Galaxy will have problems...

Of course, these are small problems, we will still be defeated if we show aggression towards other races, but in this case, those responsible for the death of many, many earthlings will be aliens who made open contact and provided technologies to which our minds and conscience are not yet ready.

Interstellar Alliance

March 19

Roswell contact

https://blog.cassiopeia.center/rozuehllskij-kontakt

Unfortunately, representatives of the planet Tashig did not provide information about the fall of the flying saucer to the Interstellar Union. The Interstellar Union only knows that there was contact between representatives of Tashig and earthlings. But the planet Tashig exercised its legal right not to report to the Interstellar Union details about the capture or voluntary contact between representatives of Tashig and the Earth, because each planet has the right not to report private things that concern only it. Therefore, all we know is that the contact really took place, but whether it was violent on the part of the earthlings or the Tashigans themselves agreed to it, and under what conditions, the Tashigans did not provide.

18:07, #46 Contactor Irina Podzorova on the radio Folk Wave Chicago Mind of God, evolution, hell and heaven

> Was there a Tashigan ship crash in the USA in 1947?

Regarding the incident in 1947 in America: I myself requested information about the disasters at the request of ufologists. The fact is that Tashigan ships quite often suffered disasters in the territories of North and South America, Central Asia, etc., but they do not always disclose information about their disasters to the Interstellar Union. According to the agreement, they have the right to do this, if, in the opinion of Tashigan politicians, it does not affect the Interstellar Union.

As for 1947, the Tashigans did not include such an incident in the database, but this does not mean that it did not happen. And it says that they did not consider it important to inform the Interstellar Union

about this contact, this catastrophe.

Galaxy Security investigated such an incident, and it was shown that the fall itself occurred 2.5 years earlier and in a different place.

It happens that Tashigans and criminals in general pass on information. But, if the ship was shot down and the pilots were captured alive, then they could transfer technology only in order to free themselves and fly to their planet. Naturally, they could have been given such a condition, as far as I understand the work of your special services, which are no different from modern ones.

They understand perfectly well that the alien wants to return to his world, so they could impose a condition on him, for example:

> “You will make contact with your people only if you reveal certain things to us, and if you try to contact them telepathically, then when the ship arrives we will take your life in a not entirely humane way.”

Cosmonaut scientists in the Interstellar Union are not afraid of physical death, because only those who have already studied the laws of the astral and Spiritual worlds go to work there, but they can be threatened not with death, but with some kind of suffering, etc. Here it depends on the personality of the one who finds himself in these conditions. They can, of course, talk differently. Just say:

> “You will contribute to the progress of our race, no one will know about your interference,”

- they can persuade more subtly; among your intelligence services there are also special psychologists who study, among other things, the biology and xenopsychology of extraterrestrial races.

They even have a map of the worlds that are most often told about by those who have visited them. This map was significantly expanded, for example, after the disaster of the downed Pleiadian ship.

As for the kidnapping. This refers to physical contact. It should be noted that according to the law of the Interstellar Union, it can only be voluntary. Of course, there are criminals, and they are being identified.

If scientists persuade, offer this contactee to donate his biological material for some experiments or install some kind of chip, there must be an intervention in the physical body - this is a certain physical contact, to which he must also give his informed consent.

The contact of contactees is carried out secretly from the government, and physical evidence is still not given to contactees so as not to attract the attention of the services. If there was an agreement between the Tashigans and the government, then the Tashigans would receive permission to give evidence to their physical contacts.

In this case, there would already be contactees who would say:

> “With the permission of our government, we are in contact with representatives of extraterrestrial intelligence, here is our evidence.”

Timecode: 52:47, #166 Kirchiton_ instantaneous quark-gluon coupling inside the Galaxy and our survey.

About the laws of the quantum world - from extraterrestrial intelligence

https://blog.cassiopeia.center/+nauka-i-tehnologii

Scientists of extraterrestrial civilizations of the Interstellar Union of the Galaxy reveal the secrets of the Universe, talking about the fundamental laws of the quantum world and the structure of elementary particles that form all natural and artificially created elements!

In the scientific institutes of planet Earth in recent decades, quantum physics has been actively studied, stimulating the development of scientific theories about the structure of matter and active knowledge of the world of energy vibrations (or wave disturbances of space), from which all physical reality is built. Each quantum of physical energy is created from finer matter, which in some teachings on Earth is usually called ether.

The ethereal membrane envelops every atom; it helps quanta at all energy levels to interact with each other, as well as to influence space, creating various physical fields, and then transmitting them along chains of atoms, ions and larger structural particles of physical dense matter.

At the same time, according to the science of the Interstellar Union, physical space makes up only 7% of the space of the entire material world, which contains many millions of worlds at finer levels of density. Each such level of density is a degree of manifestation of the Divine Light, which is in continuous rhythmic movement, generating vibrations or vibrations of the entire set of spaces and the matter filling them. The frequency of these vibrations is different at each level of density, which allows many spaces with corresponding material content to occupy the same volume. Spaces of different dimensions are separated from each other by ethereal fields designed to structure and stabilize these spaces. Thanks to this effect, all material worlds are isolated from each other and for their “inhabitants” embodied in each of them.

The science of the Interstellar Union and the Galactic Federation of Light knows 6048 types of material energies, 9 of which are considered physical energies. The remaining material energies are distributed among the levels of plasmoid worlds.

All material worlds are collected in clusters, which contain 3 levels of density. The first cluster is called physical. The space of this cluster is relatively homogeneous and in the language of your science is called a vacuum. Between the vacuum and the next cluster of the material world, containing the fourth, fifth and sixth levels of density, there is a vast ethereal field containing 700 times more potential energy than all the quanta of the physical Universe combined!

This energy is needed to stabilize the structure of the spaces of two clusters and contains material for the creation of new material structures of six density levels and systems from them. The use of

energies from this source by any civilizations of the first and second clusters is possible only with the permission of non-incarnate spirits of the 17th level of the Spiritual World and under their direct guidance. Piercing a vacuum without special training and supervision of the Angels of Nature is dangerous for matter of all six density levels that make up the first two clusters. This can cause enormous destruction and corresponding karmic consequences for Intelligent Spirits who decide to undertake such experiments without coordination with the Spiritual World.

In physical space, all substances consist of nine physical types of energies, rotating according to certain rhythms and trajectories. They are collected into 94 natural elements, which differ in the distribution and amount of energy in each of them.

Each element includes a special type of dense material structures synthesized from the energies of the etheric elements and called atoms. The peculiarities of the laws of compaction of energies in atoms create 3 energy levels in them, nested within each other in the form of vector-directed spirals of rotation. Different types of atoms contain different numbers of quanta. Energies are collected in the atom, following the law of the priority of energies of the internal structures of the atom over external ones.

The third energy level of an atom contains 55% of its energies, the second 33%, and the first 12%. At all energy levels of the atom, the energies are heterogeneous: the third and second levels each contain two types of energies, and the first external level contains five types of energies in various combinations with each other.

This gives rise to a wide variety of properties of elements, as well as their ability to interact with each other, giving rise to a wide variety of natural and artificially created substances. All natural elements are divided into 5 types - in accordance with the five types of energies at the first atomic level, one of which predominates in percentage terms over the rest in the atoms of each type.

In earthly language, these types of elements have the following names:

Active metals
Medium metals
Semimetals
Nonmetals
Noble gases

The properties of these types of elements differ from each other, which is due to the predominance of different types of energies at the first, external energy level of the atom:

In active metals, magnetism predominates.

In medium metals, electricity predominates.

In semimetals, radio waves predominate.
Non-metals are dominated by heat.
For noble gases, light predominates.
When creating an atom of the same element from the ethereal energies of the elements of the Universe, the same number of quanta is invested. The ratios of other energies in the atoms of different elements also differ, which determines the difference in their physical and chemical properties and the identity of the properties of atoms of one element.
The energies of the first atomic level are located in it according to the formula of a stepped pyramid, the same for all types of atoms. The formula for a step pyramid is as follows:
The predominant physical energy at the first atomic level is always 40% of the energy content of the first atomic level or 4.8% of the total number of quanta of the atom. All other energies of the first atomic level always follow in the same order according to the law of stepwise decrease.
The order of energies at the first atomic level is as follows:
heat - light - magnetism - electricity - radio waves
But what is the order of the percentage of energies at the first atomic level:
40% - 30% - 20% - 6% - 4%
For example, let's look at the quantum composition of the hydrogen atom
Hydrogen belongs to the group of non-metals, therefore, at the first energy level of the atom, heat will prevail in it, and there will be less radio waves.
Quantum composition of the hydrogen atom:
Total number of quanta – 1600
Third energy level – 880 quanta
Second energy level – 528 quanta
First energy level – 192 quanta
Distribution of physical energies at the first energy level of the hydrogen atom:
Heat – 77 quanta
World – 58 quantum
Magnetism – 38 quantum
Electricity – 11 quanta
Radio waves – 8 quanta
Due to such a number of quanta distributed at three atomic levels, hydrogen is the lightest element that is found in a gaseous state under normal conditions. This happens because 85% of quanta at the third energy level are aimed at macrogravity, and the remaining 15% do not provide attraction between atoms.

When gaseous hydrogen is cooled, its heat quanta move into the surrounding space or into the atoms of a colder object, as a result of which the redistribution of quanta at the third atomic level changes due to the law of compensation for energy losses, and more than 60% of the quanta at the third atomic level switch to microgravity.
Thanks to this, the atoms are attracted to each other, and a liquid is formed from the gas, and with a further decrease in temperature, a solid.
When calculating the number of quanta in different elements, it is necessary to multiply the number of hydrogen quanta by the relative atomic mass of the element. The result obtained will be the number of all quanta in an atom of a given element.

Gravity engines for fast interstellar travel

https://blog.cassiopeia.center/+nauka-i-tehnologii

The gravitational engines of their ships operate on the principle of accelerating gravitons in a plasma field. Gravitons are best obtained from tetravalent elements such as carbon and silicon.

The plasma field does not allow gravitons knocked out of matter to leave the engine; they begin to rotate along its internal contour, quickly picking up speed above the speed of light.

The pilot will only have to choose the flight direction and distance, after which there will be an instantaneous movement to the selected point.

Before turning on the gravitational engine, you need to fly away from the planet, using special engines that work on the principle of repulsion from magnetic fields.

Six kilograms of carbon in the form of finely ground graphite must be placed in the graviton chamber (this amount is enough to travel 30 light years if the mass of the ship with all its contents is no more than 700 kg).

A deep vacuum must be created in the graviton chamber and the internal circuit of the engine. To create a plasma field, 70% hydrogen and 30% helium must be sent to the plasma generator.

In the plasma generator itself, the smallest particles of calcium and sodium must be sprayed for the stability of the plasma field and its better controllability. The more these metals are purified, the better.

Turn on the power plant and heat hydrogen and helium to a temperature of 7000 degrees Kelvin, under a pressure of 15 earth atmospheres.

When a plasma field appears, direct it into the graviton chamber without breaking the seal of the latter. Change the intensity of the plasma field until the device shows the beginning of the release of gravitons from carbon. When gravitons are knocked out of matter, they will rotate along the internal circuit of the engine, quickly picking up speed.

The plasma field will not allow them to leave the engine or return back into matter. When the speed of gravitons reaches four times the speed of light, the accumulated energy will instantly transfer the ship to a pre-selected point in space, after which the gravitons will return to matter, but it will be unsuitable for repeated movement.

You can turn on the gravitational engine only in space, at a distance of at least 80 thousand kilometers from large gravitational masses, otherwise the movement will be impossible or will occur in another place, uncontrollable for the pilot. This happens because strong

gravitational fields disrupt the operation of the engine, slowing down the acceleration of gravitons and slowing down their release.

Composition of the “BADAR” alloy, which makes up the plasma generator and graviton chamber:

Titanium - 50%
Molybdenum - 26%
Tungsten - 14%
Carbon - 7%
Sulfur - 3%

General principle of operation of intra-atmospheric and planetary engines. Onboard power plant

https://blog.cassiopeia.center/ycPy4LY0_v3

The operating principle of the intra-atmospheric engine is based on interaction with the gravitational fields of the planets. A special anti-gravity electromagnetic field is created, which “screens” part of the ship from the planet’s gravity or changes the direction and strength of the gravitational field, thanks to which the ship can move in any direction, sharply changing direction and speed.

In this case, a protective plasma field is usually created around the ship, within which a constant level of gravity is maintained. Thanks to this, those who fly in a UFO do not experience overloads, and they do not deviate in different directions due to sharp turns. The protective plasma field appears as a ball of white to red color, depending on the amount of energy directed by the pilot to create it.

The planetary drive picks up the magnetic fields of the surrounding

planets and sends data about them to the computer. After the pilot selects a destination planet, the planetary drive creates a magnetic field around the ship, attracting it to the desired planet. The stronger this field, the faster the ship will fly. Its maximum speed is 1/8 of light speed.

If you just need to fly away from the planet into space, then you need to press the “move away from the planet” button on the remote control, after which the planetary engine will create a magnetic field around the ship, pushing it away from it. The stronger this field is, the faster the repulsion will be.

During operation of the intra-atmospheric and planetary engines, weightlessness can be created in the ship.

The ship's on-board computers recorded information about the characteristics of the magnetic fields of each planet where it was. The pilot takes off from the planet using intra-atmospheric engines, and at an altitude of about 150 km turns on the planetary engines.

On the remote control, he can select the “remove from the planet” button, after which the ship will move away along the trajectory specified by the atmospheric engine. The pilot can use special buttons to change the direction and speed of flight.

You can also immediately select a planet from a list on the computer, and a special computer program is adjusted to its magnetic field, which is detected by special magnetic-field-sensitive plates built into the outer walls of the ship.

Magnetic fields extend over many billions of kilometers from the planets, and the on-board computer distinguishes between them and selects the one needed to direct the flight there. So the computer already knows which planet is located at which point in space.

It’s easy to control the “plate” if you learn all the buttons on the remote control. Near them there are inscriptions in the Daraal language, but I don’t understand them. Kirchiton navigates these buttons with his eyes

closed and says that even an earthly teenager can be taught to fly on a saucer in about six months in our time.

In the power plant and in the planetary engines there are plates made of a special alloy “fakepa”, which convert cosmic radiation into electricity and visible light.

Cosmic radiation enters from the "antenna" on the roof of the "dish" into a converter in which these plates rotate rapidly to achieve a larger area of contact with cosmic radiation, due to which electricity and light are released.

Composition of the alloy "FAKEP":

Magnesium - 40%
Titanium - 25%
Tellurium - 20%
Palladium - 15%

Briefly about the Antiverse

https://blog.cassiopeia.center/tNzY8982bs3
The anti-universe is a state of matter when elemental forces form an atom in opposite proportions. According to your science, this is when the dimensionality of particle charges changes to the opposite.
Such Universes exist outside our Universe. There are passages like portals into these Universes. You can also get into them through gravitational clots of energy, which are called “black holes.”
Who lives there?
Spirits like us live there, embodied in bodies created from atoms of a

certain polarity, with a different ratio of elemental forces.
There are planets there too, there are stars there too, but they consist of antimatter. This Universe is part of the Universe and those Spirits who incarnate here can incarnate there, and vice versa.
We can incarnate in the Antiverse only when we have completed the lessons in our Universe, in the entirety of its dense and subtle material worlds.
When the Spirit begins to remember his past lives from the Antiverse, for him it will be the same as he remembered life on some other planet.
Antimatter is just a type of matter, it's just different. Upon contact with our matter, the elements begin to mix with each other in such a way in the atoms that the atoms are destroyed and energy is released.
There are humanoids in the Antiverse, their bodies consist of antimatter. They can physically fly only to those planets consisting of matter that is not antimatter for them.
For them we are the Anti-Universe. They cannot fly into our Universe without special protection, without a powerful gravitational field, otherwise their ship will immediately turn into energy and explode.

Instantaneous quark-gluon coupling inside the Galaxy

https://blog.cassiopeia.center/mgnovennaya-kvarkovo-glyuonnaya-svyaz

Let us recall that matter consists of atoms, which, in turn, contain various types of energy of three levels , and at these levels there are different types of energy. These energies can transform into one another, they can displace one type from the atom or take on them. Physical processes such as electricity, magnetism, radiation, and gravity are explained differently.

As for quarks. First I will explain what a quantum is. Quantum is the smallest portion of energy of one level or another. And a quark is a

state of a quantum, which is in the form of a point or pulsed disturbance of the medium, i.e. this is not just a certain portion of energy, but one that is taken per unit of time from the point of view of the observer.

We call a gluon the process of energy exchange of transmission and reception of energy between atoms, that is, one impulse, one process - this is a gluon. It is never single, i.e. According to the law of conservation of energy, atoms always exchange energy both in microspace and in macrospace. Therefore, the set of energy exchanges between atoms in a certain unit of time is called a gluon field.

As Earth science knows, the gluon field makes up most of the rest mass energy of your elementary particles. This suggests that in the elementary particles of the structural elements that make up the atom, you find only energy exchange, i.e. the process of energy exchange creates atoms.

What is quark-gluon coupling?

This is the process of directing a gluon field to a specific source, which is located at another point in space. Information from outside about the state of matter about which information needs to be transmitted is introduced into the gluon field: about color pulses, about sound waves, for example.

Because of this encoding, the gluon field turns into a gluon flow, but it does not travel the distance between two points like a radio wave or a beam of light does. Since the gluon field is structurally connected through space to a transmitter, which is located in another place at a distance, there are practically no boundaries of distances within the Galaxy. We are clarifying because the further you transmit the gluon field, the more energy is usually required, which is taken from the same quanta.

That is, in order to redirect this flow, to cause changes in the gluon field, transmitters appear instantly (there it is already instantaneously, which is why it is called “instantaneous communication”).

The Interstellar Union began to carry out experiments a very long time ago. Even before the formation of the Interstellar Union itself, each planet conducted such research independently due to the fact that the civilizations that created the Interstellar Union were already flying far into space and they needed communication.

At first, there was also no understanding of what materials and processes to use to create this gluon flow. Then the understanding came that in order for this information to be transmitted instantly and without distortion, it was necessary to ensure that these gluon fields had the same characteristics.

As is known, the position of the electron cannot be predicted even in earthly science, and it is different even for identical atoms of the same element.

The gluon field is not just the position of an electron or what you call a proton, it is a certain process in time, changes - spins, orbitals, the angle of inclination of particles relative to each other, etc., a set of processes.

Millions of years ago, special devices were created in which gluon fields were created. Structurally, oval-shaped shells made of a metal that you call technetium, filled with boron in its allotropic modification, are suitable for creating such devices.

The characteristics of these particular substances allow you to best receive and control this field. The transmitter and receiver must be made at the same time and be charged from each other, i.e. one field. When they are at any distance from each other, the information entered into the transmitter will immediately appear in the receiver.

In the receiver, in addition to the receiving antenna, a gluon field appears, which was introduced into the transmitter modified; there is a

decoder that translates this state of the gluon field, i.e. information that was entered into the familiar light pulses or sound signals.

What is text, photo or video? This is a stream of light pulses encoded in a certain order. Sounds are the same, only they are produced at a special frequency, familiar to the receptors of perceiving creatures.

#166 Kirchiton: instantaneous quark-gluon coupling inside the Galaxy and our survey.

Kirchiton is a specialist in contacts with representatives of other civilizations, a researcher of new planets, a representative of the planet Daraal.

What is lithotherapy and what energy is in stones?

https://blog.cassiopeia.center/litoterapiya-i-ehnergiya-v-kamnyah

Crystals and stones are objects made up of certain molecules that naturally emit certain types of energies. In the terminology of the Interstellar Union, these are first-level energies, that is, electromagnetic oscillations of one frequency or another.

By influencing the electromagnetic fields of the physical bodies of humanoids, they can activate or suppress one or another process in the cells, which is what lithotherapy is based on.

Some crystals and stones have the so-called “memory” of the crystal

lattice: these are special properties of stones and crystals that allow a person or humanoid, having directed their life force into this object, to charge this life force with one or another thought form, which will further influence already on the auras of other people and humanoids.

Not only stones have this, but also crystals, even salt and sugar, for example.
They have the ability to recharge, that is, to absorb charges of the vitality that comes from people and their emotional outbursts.

The stones themselves have energy of the first, second and third levels, like all substances . But mainly the energy of the first level comes from them: that is, these are electromagnetic fields of one frequency or another. They can influence the electromagnetic fields of the organs of the physical body and either activate or suppress certain metabolic processes; they synthesize various substances there.

In fact, lithotherapy is one of the subtypes of physiotherapy, that is, treatment by nature.

Your people are well aware of the effect that is observed in people who suffer from attacks of rheumatism: for example, from lying on hot stones or from covering themselves with sand, clay, mud and other forms of material energies that act through substances that penetrate the skin, and no less through heat, which we consider the same electromagnetic radiation, one of the types of energies of the first level of these substances.

And even the same minerals, the same belemnite, for example, has its own energy, its own substance, which at the chemical level acts as a substitute for many minerals that are sold. And at the energy level, since it is very ancient, lived in the atmosphere of that antediluvian earth, gained energy and substances there, it activates the human energy system.

The meaning of geometric shapes

https://blog.cassiopeia.center/znachenie-geometricheskih-figur
The outline of your plants, mountains, clouds, animals, animal body parts, their colors are not a random combination of elements. Sacred geometry uses geometric shapes, which are often symbols of inner mental states.
For example, an angle in any geometric figure is understood as a symbol of limitation and isolation. This isn't always a bad thing. Sometimes narrow-mindedness and isolation happen for negative things. I am aware of the custom among your people of placing their children in a corner as a symbol of restraint on their actions. This action is very ancient, older than your civilization. It comes from the subconscious memory of the fact that this figure limits freedom.
And then we look at the main geometric figure without angles - it is a circle, a circle or a sphere.
What does the absence of angles in this figure mean?
It acts as a symbol of harmony and connection with your Divine Self. This is the original designation of the source of Divine energy, all-accepting and all-pervasive, because there are no angles, limitations or contradictions in it.
Now look at round objects in nature. Round objects in nature are primarily stars, including your Sun. These are all planets where humanoids live. The shape of a sphere is the part of your body in which the organ responsible for your mind is concentrated. Also round in shape... (no, that's too much!)
An oval is a shape close to a circle; an oval also has no corners. You can look at other oval and round parts of your bodies. The organs found in men and women, where cells are produced to reproduce their own kind, are also round in shape.
What does earthly and cosmic nature hint to you?
She tells you in the language of sacred geometry that all of these objects are a source of Divine energy at their level of manifestation.
Further, if we look at information about other figures, we will see that the number of angles in them differs. If there is more than one angle, then this figure denotes a certain quality, limited in time.

Let's take, for example, a triangle. It has three corners. Each number has its own energetic vibration. The number “3” denotes the vibration of manifested strength, activity and the establishment of one’s own order.
The number "1" denotes the Absolute or sphere.
The number “2” denotes a line or deployment of the Absolute in space, creation, the first creation of someone. Contact can mean a connection, the appearance of someone in the Universe.
The number “3” denotes the activity of the Absolute and the mind it created to change the Universe. It is indicated by a triangle.
Look at triangular-shaped objects in nature: mountains, volcanoes, also some parts, animal and human organs. They also have a triangular shape. All these organs are responsible for activity. For example, humans have triangular-shaped skeletal bones, and the skeleton allows you to move in dense environments and resist external forces, pulling, and squeezing.
A mountain is a symbol of movement, the aspiration of the Earth towards the sky. The volcano is a symbol of the aspiration of earthly fire towards heavenly fire, towards the Sun.
Waves in the sea, if you consider them statically rather than dynamically, also have a triangular shape. Waves are a symbol of the movement of water. Very often they are directed towards the earth, like the desire of the elements of water to merge with the earth.
The leaves of some plants also have a triangular shape. A leaf is also a movement of energy (shows the Sun: the energy of the Sun passes into the earth). If you look at the shape of the tongue, it has a base and a tip. This is also a triangle. This is a symbol that you show your activity energy through speech. And even your dogs and cats have triangular ears because they spend more of their brain energy listening to their environment.
People create triangular-shaped artificial objects as a symbol of activity. For example, ancient spears and arrows were triangular in shape because this is a symbol of flight.
A pyramid, you talk a lot about pyramids, is not just a triangle. This is a connection of several triangles under one apex directed upward, which means the direction of all mental, physical and spiritual forces of a person towards the Absolute.
Harbius is a representative of the planet Jupiter, a plasmoid of the 19th density level, the leader of the transfer of artistic images to Spirits embodied in third density.

MidgasCause about the teleportation effect

https://blog.cassiopeia.center/ob-ehffekte-teleportacii

The effect of teleportation is associated with interdimensional energy: what you call the ether and the torsion field, and we call the free energy of the vacuum.

It is located not only in a vacuum, but also in any space.

Under certain conditions, using the same free energy of the vacuum, it is possible to transform the substances of a dense material body into a wave structure that can be moved in a device to any distance.

To conduct experiments of this scale and level, you need to understand exactly what you are doing and why, otherwise there may be negative consequences for the space and for the surrounding substances.

Where does cabbage come from and how to enable human superpowers

https://blog.cassiopeia.center/otkuda-u-kapusty-kochan

Where did the cabbage plant, which never had heads of cabbage at all, grow a head of cabbage? Look at the wild cabbage...

The head of cabbage appeared from DNA changes through mutations. Intelligence is a directed mutation, only it is directed by people. The initial changes must accumulate in the DNA. Until changes about the physical body accumulate in the DNA, nothing can change on the

physical plane.

Because information about what the appearance of a plant or animal should be, all information about this is stored in DNA, until you change them, enzymes will not work in cells in such a way as to build what you need.

The same bricks that make up DNA are the same in a butterfly, in a cabbage, in a cedar tree, and in a person, they are just located differently, have a different number and, most importantly, have a different rate of inclusion in the genetic process. They turn on one by one. First one piece of DNA, then another piece of DNA.

For example, if we take a person, he has a lot of regions of DNA that your scientists call “junk”, but which are still in your DNA and which are not turned on during life at all. That is, when DNA is digested by the polymerase enzyme, no significant rewriting of the transcriptions of these DNA sections into messenger RNA occurs and for this reason it is called “junk DNA”.

But in fact, there is also information there, including from your creators, the creators of your races, genetic information about what your body should be like if you raise your spiritual level, clear your thoughts, and then the DNA will turn on and allow you manage your body, independent development of all organs, their health, etc.

Briefly about gravity

https://blog.cassiopeia.center/korotko-o-gravitacii

Gravity is the energy of the third level, which is inherent in every atom, at the supermicroscopic level.

Each atom contains three levels of energy. The first is called electromagnetism, the second is what you call radiation and thermonuclear energy, the third is gravity.

At the micro level, it acts as a force that attracts atoms to each other and forms dense matter.

At the macro level, it acts as a force that allows all stars, galaxies, planets, and even the smallest stone, to move in space along their trajectories and in their orbits. That is, to attract each other and not fall on each other.

How butterflies evolved. Features of the stages “larva-pupa-butterfly”

https://blog.cassiopeia.center/kak-ehvolyucionirovali-babochki

The body of these insects is designed in such a way that their genes, their DNA, already contain the sequence of changes that they undergo, starting from leaving the egg and ending with the appearance of an adult.

It was laid down by certain plasmoid civilizations, which initiated the appearance of this particular creature in the world, with precisely this type of transformation. There are other types of insects that have incomplete metamorphosis.

If we are talking about how, for example, a butterfly differs from its own caterpillar, then even if we look at its internal structure, we can say that

the caterpillar itself resembles an adult butterfly, but only, of course, without wings and other organs . That is, she has a certain body structure.

But then, when a period in her life begins, the so-called “pupa,” then hitherto hidden mechanisms are activated in her DNA, which put her into a state of sleep, and very drastic changes occur in her body with the help of special enzymes. These enzymes are produced in the caterpillar's body exactly at the time recorded in its DNA.

How did this evolve? Such insects have existed for many, many millions of years. They were just different sizes, different types. If we are talking about butterflies, they evolved from those forms that at the beginning did not have wings, like worms. Gradually they acquired mutations that made it possible to transform into a pupa, and these mutations then made it possible to grow wings and all other organs. This all did not happen quickly, many thousands of years, but these mutations accumulated and in what year did the first butterfly appear?

That is, to put it very simply, the process went like this:

> at first there were just worms;
>
> then there were worms that mutated and turned into a pupa and out of it came a creature with underdeveloped wings that could only crawl, but it retained the features of both a worm and a half-butterfly, if it’s so easy to show in images;
>
> when mutations were still taking place, which were planned by intelligent subtle-material entities, in the end the first butterfly was formed.

Reviving Extinct Animals

https://blog.cassiopeia.center/ozhivlenie-vymershih-zhivotnyh

Mammoth DNA can be extracted. There are enough remains that contain DNA suitable for reproduction. There are cells from which DNA can be extracted, crossed with other DNA and a hybrid is obtained.

There are various technologies that make it possible to revive extinct animals using DNA. For example, by placing it in a special solution and apparatus that will stimulate the biosynthesis of substances that are provided in DNA to create a body, each of its cells, up to the creation of an organ system.

Naturally, such experiments, such experiments can only be carried out by agreement with subtle-material civilizations, plasmoid civilizations. Because if they do not create a soul, a group of souls for such creatures, then recreating the body using DNA will not work. It will just be a body. It will not be a living creature.

You can first come into contact with the plasmoids, show them your technologies for recreating the body, and already in contact with them, draw up a plan to create a mammoth again. Reproducing his body and soul is a joint process: you will recreate the body and they will create the soul.

About black holes

https://blog.cassiopeia.center/o-chyornyh-dyrah

A black hole is a collection of concentrated gravitational energy. This is not just a black color, it is a black space, like a gap, creating the feeling that someone is looking from there. The black holes (the central one and two on the sides) seem small, but in general they are probably the size of several suns. It's eye-catching.

When falling into a black hole, any physical body, be it a ship, a star or a person, will disintegrate into individual atoms. This will happen due to the influence of very strong gravitational waves that exist inside the black hole. Then the energies of the first and second levels will begin to emerge from the atoms, until only pure gravitational energy remains, which will become part of this black hole.

At the center of a black hole, any matter of the dense material world simply turns into radiation, into the light of radio waves.

Aliens have already sent there something like automatic probes with robots to study what kind of radiation matter is decomposed into.

The universe is cyclical, it appears and disappears. Everything disappears except black holes. Disappearing, dense matter turns into light. In general, our entire Galaxy and Universe are 96% composed of dark matter and energy, which is the basis of plasmoid worlds.

When the Universe ends its existence , all dense matter is first transferred into radiation and into a gravitational field, which is collected in the form of black holes.

And then, when everything is converted into subtle radiation, the black holes themselves also disappear. They decompose into subtle radiations, that is, the Universe passes into subtle material worlds, and then, in general, into the spiritual world, and there is no matter left.

When the Universe begins to unfold again, thin-material worlds arise first, and then dense-material ones arise.

First, there is gravitational energy, so it begins to gather into black holes, which are the first to form the Universe: the Universe begins with them and ends with them.

Timecodes: 00:17, #109; 49:34, #361

Kalachakra (representative of the Antiverse) about black holes

You can go through black holes into the Antiverse, but not everyone. Only those who have what you call an access code. This is a special state of the energy body, which, for example, your curators have. They were specially trained for this.

A “black hole” is an energy gap into another space. Through it you can get into both subtle worlds and another Universe.

We can decompose our body into etheric radiations, of which atoms are made . If you simply decompose it into atoms, the body will crumble, but will not move. We need to create this process more deeply.

Energy resources of planet Earth. Information for scientists and inhabitants of the planet from the Interstellar Union

https://blog.cassiopeia.center/ehnergeticheskie-resursy-planety-zemlya

The physical energy resources of the planet are the totality of all the energies of its physical plane. The accumulation and distribution of these resources is carried out by the plasmoid civilizations of this planet at all levels of density, creating the physical world in harmony and union with each other.

Planet Earth has a colossal reserve of energy on the physical plane of existence, which can be used in the continuous cycle of existence of twenty-three billion people.

But for this it is necessary to use energy not instinctively, according to the principle “owning a source of energy resources gives us material wealth and power, which means we can sell energy, instead of creating conditions for its harmonious use and renewal,” but with the help of spiritual reason.

It is the Eternal Spirit who tells you that you are only one of the generations of people on this planet, called to create here for other Eternal Spirits and for yourself in future incarnations a perfect and safe space where no one will lack matter or energy for life and creativity and development of physical and spiritual positive qualities.

Any interaction between civilization and energy resources consists of three stages: production, delivery to consumers and use. All these stages must be harmonized with each other and with all Spheres of the Earth as a physical and energetic object: Lithosphere, Hydrosphere, Atmosphere, Biosphere and Noosphere.

Earth civilization at the present stage of development has not appreciated the colossal work of plasmoid civilizations over hundreds of millions of Earth years to create solid, liquid and gaseous energy resources. These resources are now the basis of the energy infrastructure of planet Earth, but their extraction, processing, delivery and use are generally energy inefficient, uneconomical and environmentally unsafe.

In addition, aggression and intolerance of earthly civilizations, as an intelligent community, leads to local and worldwide wars for the right to access energy resources and their distribution to the inhabitants of your world. This, in turn, gives rise to the deliberate military destruction of energy resources and routes for their delivery to consumers, which leads to acute energy shortages in populated areas of the planet, environmental disasters and human suffering.
Listed below are recommendations for increasing the efficiency of all stages of interaction between earthly civilization and the energy resources of your planet.

Level of extraction and processing of energy resources:

Pay special attention to increasing the share of solar, wind and geothermal energy resources compared to hydrocarbon and nuclear in the overall energy infrastructure.

To study the possibilities of operating inflatable wind turbines with helium at an altitude of 400-600 meters above the Earth's surface.

To study the possibilities of operating solar lenses filled with water in conjunction with photovoltaic elements of solar panels.

In nuclear energy, focus on studying the preferential use of thorium rather than uranium and plutonium.

To study the possibility of using municipal solid waste as fuel in thermal power plants.

Supply level to consumers:

It is desirable to introduce free social norms for each person for the use of energy resources: water, gas, coal, gasoline, electricity, heat and public transport.

This will contribute to faster social development of society, reduction of social tension and positive evolution of the Earth's legal system, which will help your civilization increase the vibrations of the planet's noosphere, as well as all its subtle-material civilizations that participated and are now participating in the creation and maintenance of the energy resources of your world .

Energy support for the life of all people, regardless of their financial well-being, will be the best gratitude of your political structures to the plasmoid civilizations of the Earth and personally to Demeter , who every second takes care of the well-being of every earthling.

Energy consumption level:

Follow simple rules for saving electricity and heat indoors and teach your children the same. This will help improve the environmental situation on Earth and will allow the younger generation to develop frugality and modesty in everyday life, without which it is very difficult to develop gratitude and love for oneself, for people and for God.

The consumer attitude towards nature and its resources is formed

mainly in childhood, in the family, from the example of surrounding adults. If every person begins to thank God and plasmoid civilizations for energy, turning on the light in the room or throwing a log into the stove, and at the same time, in an accessible form, explains to children the ways of accumulating, obtaining and converting natural energy to the final forms of its use, then the next generation of earthlings will grow up more conscious and high vibrational.

Remember that without love for the Earth, without respect for nature, it is impossible to learn true love for people and develop bright and kind qualities of the soul.

Why was the hadron collider created?

https://blog.cassiopeia.center/dlya-chego-sozdan-adronnyj-kollajder

These are your attempts to extract gravitational energy from matter. The energy obtained as a result of the splitting of particles in the collider is not enough to penetrate beyond the free energy of the vacuum, where parallel spaces are located. To extract gravitational

energy, you do not need the Earth, since its gravitational field interferes with this.

The gravitational engine that Kirchiton spoke about is based on the same principle, but it is turned on at a distance of at least 80,000 km from large gravitational masses, otherwise it will not work and will not move the ship anywhere.

Your attempts to study matter are certainly useful for science, but you do not have a correct idea of the structure of matter and the distribution of energy among levels.

For us, the meaning of life is to explore the Universe, therefore, any knowledge is expensive, and there is meaning in studying matter and energy with the help of such devices. At the same time, it is important to learn to draw correct conclusions, to call portions of energy energies, and not to call them particles, introducing new ones when the unknown is obtained. These are not particles of matter, these are different energies, which you call electrons, quarks and various other names, of which there are a lot and they are all one thing: energy.

Garyaev's matrices - the effectiveness of the technique. Color therapy

https://blog.cassiopeia.center/matricy-garyaeva-ehffektivnost-metodiki

Pyotr Garyaev is a scientist who is very reminiscent of an Esler contactee. As for his theory, the laser beam, which passed through the photo not chaotically, but along certain trajectories, read not facial features, but energy. Any photograph saved in paper form bears the imprint of the energy of the vital force of the person who is captured on it.

If a person was imprinted as a child, then the information of his energy structure in the astral field will overlap the information of the physical body, and the opposite effect will result. In space there is not only the physical world, but also astral fields, mental fields, the Spiritual world, etc. The photograph reflects the picture of all these worlds, we just can't see everything. The photo leaves an imprint of the space-time segment, like a cast of space and time. Such a print can be made not only with a laser beam, but also with the help of water, by placing a glass of water on the photograph, but this process will simply be slower.

Goryaev created a device that sent a beam of energy, and this device remembered this energy. The beam itself acted as an indicator or a tentacle, and the device from which the beam emanated remembered the energy parameters. The laser can be tuned to different frequencies; it worked with sound, but it could also work with water. It is also important that these frequencies coincide with the frequencies of a person at this moment in time.

If a person has changed a lot with age and has acquired many energy blocks, then the method will not work. The structure will become alien to his body. If a person is more or less similar in energy to himself in childhood, then the effect will be positive.

The cells of each organ consist not only of physical matter, but also of ether, where there are projections of all organs. It is on the etheric projection that sounds act. And if you drink water, information will be delivered to every cell of the body.

It is better that the water used is already structured, for greater dissolution in the body. It will be easier for such water to perceive information. It is advisable to do this without bright light or sharp sounds from the outside, so that photons and air vibrations do not interfere with reading what is there. You can place water in a thin-walled glass vessel, in a darkened room, on a sheet of colored paper and activate the chakras and organs in the corresponding area. This method is called color therapy. It is used not only on Esler, but also on Earth.

The main differences in understanding the structure of the atom. Periodic table from the point of view of the Interstellar Union

https://blog.cassiopeia.center/osnovnye-razlichiya-tablicy-mendeleeva-i-atoma-ms

DI. Mendeleev was an astral contactor. Representatives of the planet Raom-Li contacted him. It is a colony of Burkhada and is located in the Pleiades cluster. They contacted many scientists.

Your table is based on the planetary model of atoms (albeit a slightly modified model since Rutherford's model), and we do not adhere to it. For example, you have all the elements arranged in order of increasing number of electrons (more precisely, the number of protons in the nucleus of an atom), but at the same time you have the doctrine of isotopes, which says that atoms of one element can contain different numbers of neutrons (but the same number protons and electrons). We can say that these are two different elements, but they have the same properties.

We don’t count by the number of electrons. We take into account elements according to vibration characteristics or, as you would call them, according to frequencies. For example, how is oxygen different from hydrogen? As you know, they consist of atoms of the same structure. Those. speaking from the point of view of our science, there are three levels of energy in every atom. Oxygen, hydrogen, and other elements are made up of the same material particles called atoms. But how are they different then?

From the point of view of your science, these elements differ in the number of protons, electrons, neutrons, everything that is included in your atoms. But, at the same time, you do not have a clear understanding of what energies the subatomic particles you named consist of. You split atoms, look at the resulting energies, give them different names, study their properties, etc. But when an atom splits, different types of energy are released. And you have the same energy, which was released under different conditions, in different quantities or in different directions, can be called by different names. And you say that, for example, a neutron consists of several quarks, or that a proton consists of several quarks (a proton and a neutron each consist of three quarks). But, in any case, you call the same energies by different names, and you discover new ones all the time. In fact, you are not discovering new ones, but registering the same energies, moving at different speeds, but giving them new names.

And at first glance, our concept of the physical world is simpler. Oxygen differs from hydrogen in that the atoms contain different frequency characteristics of the energies of the first, second and third levels. This is why, for example, oxygen and hydrogen together make up water. It depends on their individual properties.

You teach that one oxygen atom attaches two hydrogen atoms, and you call this valence, which depends on the number of electrons in a free orbit in the element. And you say that the more free electrons, the greater the valency and the ability to attach atoms. You believe that the ability to attract atoms of other elements is an electromagnetic property. You call an electron a quantum of electromagnetic radiation. (Editor's note: A quantum of electromagnetic radiation is a photon, and an electron is an elementary particle, although it can also behave like a particle or wave, like any other elementary particle). He is both a particle and a wave. And at the same time you say that one of the types of electromagnetic radiation helps atoms to attract and form

molecules of the same or different elements.

This is not the case with us. For us these are different interactions of energies. What you call electromagnetism, for us, is the first level of energy. What you call valence, the attraction of atoms, is our third energy level, which is called microgravity. Therefore, we do not have a similar table in which we could figure out how many electrons there are.

For example, oxygen has 8 electrons or hydrogen has 1. We formulate it this way: in an oxygen atom, the vibration of microgravity is 8 times stronger than in hydrogen - this is simplified. Therefore, our elementary particles are arranged according to frequencies. And we have no dependence on atomic weight. For you, the very concept of atomic weight used to depend on hydrogen, as far as I remember your history, and now on 1/12 of the carbon atom. And in our understanding, atomic weight or atomic mass is a microgravity component, that is, the third level of energy. We explain all physical, chemical, electrical and other processes, as well as gravitational and quantum interactions from the position that the atom has a homogeneous structure of all elements, differing only in the quantity and interaction of different types of energies.

The concept of ether. The spiritual world is the point of origin of the ether

https://blog.cassiopeia.center/ponyatie-ehfira-duhovnyj-mir-tochka-vozniknoveniya

We call ether one of the types of subtle energies, which are the border energies between the material world and the Spiritual world.

There is an outer ethereal shell and an inner spiritual shell. The outer spiritual shell is turned from the Spiritual world to the material world - this is what you call torsion fields. The inner ethereal shell is directed inward, which means into the Spiritual world, looking from the material world to the Spiritual, and it is called the Veil of the Astral.

If you look from the Spiritual World, it will be the other way around, the Astral Veil will be the outer shell, and the torsion fields will be the inner shell. It depends on the point of observation, that is, the name itself is largely relative, and these relative names reflect the fact that this etheric flow also has a point of origin, its source.

The word “source” is a Russian word, it accurately conveys one truth, that the source comes from the word “from a point”. This is the point of origin of the ether, from which the entire subtle-material world and the entire dense-material world in all its diversity are built. All that you observe around you are etheric waves in the form of an atom, in the dense form of atoms.

Your physicists will not develop a unified field theory until they unanimously recognize the existence of the Spiritual world and its priority over the existence of the material world. We, as your older brothers in the Galaxy, older brothers by birthright and by the right of creation of your bodies, can only give you a hint, but we cannot force you to accept this theory, because you have your own path of development.

The point of origin of the ether is the Spiritual world, that spiritual light, the pale reflection of which is the light of the stars and the Sun for the eyes of earthlings. Where does the ether flow tend to go? The etheric flow is not just mechanical energy that has passed from potential to kinetic, this flow is directed by a Mind of a higher order than a person with a materialistic consciousness can cognize.

The etheric flow strives to create all the energies of the material world, which, in turn, form the atoms of individual substances and create energies of 3 levels in them. That is, the etheric flow is divided in the material world into three components: one component contains torsion fields and the field of the astral veil to form the border between the Spiritual and material worlds; the second direction of the etheric flow is the formation of atoms and the density of matter, or its lower density, what you call nuclear interaction; and third, the formation of all types of energy in atoms, from gravity to electromagnetism.

Materialization of Spiritual Light

Stars are emitters of one type of energy. In general, this energy exists everywhere in space, it exists in that place that you would even call subspace. That is, it is some extra-spatial structure in which energies are formed.

Why extra-dimensional? Because it is already like the astral world. Now you are not only in the physical world, but you are simultaneously in all the subtle worlds: both in the astral world and in the Spiritual world. And the fact that I called the stars a weak semblance of spiritual light, I made here an analogy that just as the light of the Sun and the light of other stars creates physical life on the planet, so spiritual light creates life in the Spiritual world. This spiritual light materializes through the etheric flow anywhere in space, even in black holes there is matter, even in the core of the planet, in space, and so on.

For the organs of perception in empty space (and in empty space for any device, even ours), the energy of the ether still exists, because in three-dimensional space there is a wall, like a border, between the material world and the Spiritual.

Methods of combating bee diseases and strengthening their immunity. Varroa mite

https://blog.cassiopeia.center/metody-borby-s-boleznyami-pchyol

It is necessary to position the apiary in such a way as to create an optimal temperature microclimate. This will strengthen your immune system. If the mite is multiplying, this is a sign that you may be feeding too much sugar. They love sugar. Also, maybe they communicate with those bees that are already infected.

There are products that kill Varroa mites, but they also kill beneficial microorganisms that form immunity. Normally, wax and propolis contain substances that disinfect and inhibit the proliferation of these parasites, microbes and fungi. If this does not happen, it means that the immune system is already compromised.

Why has this increased in recent years? Because the immunity of bees is weakened by emissions from industrial enterprises: pesticides, herbicides that remain on plants and are consumed by bees as food. Therefore, natural immunity is weakened compared to what it was before.

Natural and harmless methods of combating these parasitic diseases and prevention: strengthening the immunity of bees. When you put water, a drinking bowl for bees (a wooden vessel), you can add a tablespoon of starch iodide or iodine (blue iodine) for each liter of water. This will help prevent fungal, bacterial, viral and parasitic infections.

If there is already a lesion, then inside the hive you need to fold paper

on which drops of, for example, eucalyptus oil are applied. If fir oil is used, it helps against ticks. The dosage is 5-7 drops per 1 hive. Apply to cotton wool or cardboard, but not to plastic, because... it kills all properties. It is better from below, because in the heat these vapors rise upward.

Tea tree oil and clove oil are more suitable for treating fungi. Fir and eucalyptus are more suitable for treating parasites and ticks. This is modern prevention. And in the 15th century, to prevent this from happening, they treated it with an infusion of wormwood, tansy and wormwood. They made an infusion and washed the hive with it using brushes.

You can give syrup, but the spores and eggs of these mites remain inside, in wooden buildings, so they used to treat them with wormwood infusion. Later, tobacco, tansy, and high temperatures became popular: the hives were dismantled, washed with hot water, or simply kept in direct sunlight for a certain amount of time. This killed the parasites.

I want to emphasize that the well-being of a bee colony depends on the mental and astral harmony of their owner. He feeds them with his energy. Communicating with them, he feeds them with his Light. If this Light is distorted by blocks, then the bees begin to suffer from various diseases.

Bees feel better and bring more honey from cheerful, highly spiritual, loving people, then the bees are not aggressive. They are like a reflection of their owner, because their collective animal Soul reacts to the state of the Soul of the incarnated intelligent Spirit.

Of the acids, the most harmless for bees are citric and succinic acid. Malic, citric and succinic acids at high concentrations are destructive to mites and do not destroy bee blood cells.

Oxalic and formic acids are effective, but they destroy the bees' blood cells. After this treatment they will need to recover. You will need to add anti-toxic herbs to your bee food. For example, violet infusion, which removes toxins.

It’s good if wild herbs such as tansy, sweet clover, mint, motherwort, that is, the entire family of Lamiaceae, grow around the apiary, and there should be families of cereals and cruciferous plants, like cress. The cruciferous and cereal family. They provide the necessary materials to produce food for the larvae.

Asian wasps and their control

Under no circumstances use any pesticides, especially organophosphorus compounds, in the apiary or within a radius of 2 kilometers from it. This will kill more bees than wasps. They can bring this poisonous food to the larvae and the queen bee and poison them, causing the death of the colony. Within a radius of 1.5–2 km, where there is a danger of treatment with similar preparations, for example, by other owners of summer cottages, it is generally undesirable to install an apiary.

If there are a lot of wasps and damage is felt from them, there are two main ways to deal with them. The first is to follow them, find the nest and destroy it in a protective suit. Fire is most effective. Do this not during the day, but at night, when they are all inside. In a protective suit, after sunset, usually around 23:00, when it is dark and the wasps go to sleep, you need to take a net or device that you can use to pick up the nest, put it in a plastic bag, tie it and burn it, if you can get it. If it is in a hard-to-reach place, then, if possible, pour boiling water there. Again, do it at night to make it more effective in killing the larvae.

But if you still haven’t found the nest, then you can use baits that the bees themselves don’t pay attention to, rather than pesticides. They can also be used in the apiary. They are capable of reducing the wasp population by 80% in a short time. There are two types. The first is to take a vessel like a bottle, only you don’t need to add sweets there: sweet water, syrup or fruit juice, but add juice that has already fermented.

It is best to use fermented grape juice or any compote for this, add a little yeast there, and put it in a warm place. Bees do not pay any

attention to it, because they are repelled by fermentation, but wasps, on the contrary, are attracted to it. You can place the vessel in such a way that once they get inside, they can't get out. If you place several of these traps on the windward side, from where they fly, they usually fly by smell, then you can quickly reduce the population of these insects.

And the second method is small pieces of minced meat, the protein of which is necessary for feeding wasp larvae. The bees pay no attention to him at all. There are hunter wasps that hunt bees and other insects. They pay more attention to minced meat. Mix it in a 1:1 ratio, for example, with boric acid, which is harmless to bees in this mixture, and spread it out. If there are pets in the apiary, then in places where they do not go, i.e. not on earth. This way you can also reduce their number in the summer. But don't use pesticides or add anything toxic to the water. This causes the bees to die.

Wasps not only kill, they also cause infection. Since they have the same family, they suffer from similar diseases. Even if a wasp just flies by quietly and eats something, it can infect the area. This is how wasp diseases spread. They live in the wild, outside of human care, so they exhibit various diseases.

The condition of the owner greatly influences the condition of the bees. You can represent the head of a bee family and send Light to her and her children that she gives birth to. You can talk to her mentally. Speak:

> "I love you, I send you Light, love and goodness. Thank you for the pleasure you give people."

They respond very well to this, their immunity increases, and their productivity increases.

Properties of royal jelly. How and why to use royal jelly and propolis. The healing properties of beeswax

https://blog.cassiopeia.center/svojstva-matochnogo-molochka-kak-i-dlya-chego

In moderate doses, royal jelly is beneficial. These are substances that are produced to feed the queen and her larvae. It comes in two types: for ordinary larvae and for queen larvae.

What is for the uterine larvae can be several tens of times higher in hormone content. Royal jelly contains a lot of female hormones. It can be used to stimulate metabolism, immunity, and nerve cell regeneration. For both women and men, it can be used as a genital stimulant during reproduction. Enhances reproductive ability, conception, sexual desire, pleasure and all experiences during sexual intercourse.

Of course, the benefits of bee bread, pollen, honey and royal jelly depend on many factors. The beneficial properties depend on the region of residence and the amount of different herbs for feeding bees. In coastal areas, honey is more saturated with iodine and is more beneficial. In mountainous areas, certain substances in the soil, such as calcite, contribute to the accumulation of a more concentrated dose of nutrients in honey and beekeeping products.

If, for the purpose of prevention, you give blue iodine in a dose of 1 tablespoon per 1 liter of water, then you will enrich the bees' diet with iodine, which is lacking in regions far from the sea.

How to use royal jelly correctly. It is advisable, of course, not to swallow it, but to keep it in your mouth under your tongue. There are many blood vessels into which all substances are absorbed, and gastric juice destroys them. It can be diluted with honey, as it has a rather specific and unpleasant taste for many. The usual dosage is 30 g per day, 5-10 g before meals. Can be placed under the tongue until completely absorbed. There are manufacturers who offer capsules for oral administration, but the most useful are what I named.

You can chew propolis to disinfect the oral cavity. Even if you swallow a certain amount of it, nothing will happen other than benefit. When you eat honey in the comb, do not spit out the wax. It can be swallowed in small quantities up to 25 g per day. It will only cleanse your blood of toxins. Natural beeswax disinfects the intestines from fungi, candida, and E. coli. It absorbs 20 times more toxic substances from your intestinal wall than it weighs. And in the intestinal wall there are a lot of lymphatic vessels. This way you can cleanse your lymphatic system.

Obtaining energy from the ether by Nikola Tesla

https://blog.cassiopeia.center/poluchenie-ehnergii-iz-ehfira-nikoloj-tesly

Nikola Tesla worked in an environment where, for example, radio waves, some features of atmospheric electricity, etc., were not described. Nikola Tesla was also a contactee. What was “ether” in his consciousness was some energy scattered in the earth, air and in

every particle. I personally know his curator well, who is still alive in Burkhad. What I saw with him was a device that, for example, extracts energy from atmospheric and terrestrial electricity, or from sound waves, etc. That is, from those forms of energy that charge the air, earth, water, wind.

As for obtaining energy from the ether, if this is understood as torsion fields, then here we are taking the path of danger for plasmoid civilizations. Because the device that would be invented (if it were possible to invent it) would threaten the existence of plasmoid civilizations. Since the transfer of energy from an apparent void without knowing where, in what place in space this occurs, can lead to damage to those worlds that you are not even aware of.

In order for you to discover other methods of obtaining energy, you first need to study, in general, all the forms of energy that exist. And also learn how to use the types of energy that you have economically. But this applies to all types of resources, both energy and food, mineralogical - what concerns the extraction of minerals, minerals, etc.

Timecode: 36:10, #258 Increasing awareness and vibrations of the Earth's noosphere. Support for contactees by governments of other countries.

Prospects for the development of ufology and anomalistics on earth

according to the spirit of Vadim Chernobrov

https://blog.cassiopeia.center/perspektivy-dlya-razvitiya-ufologii-i-anomalistiki

I believe that the prospects for the development of ufology and anomalistics on earth are quite large. Academic science is increasingly studying material reality and coming to the conclusion that everything that exists around a person is quantum energy. Now physicists, mathematicians and astronomers are raising questions that were unthinkable 100 years ago.

I believe that it is quite possible for enthusiasts of the study of anomalous phenomena to join the ranks of scientists. To do this, they must work themselves the way scientists are used to working. This is necessary in order to attract their attention.

You need to understand that science is always based on a series of evidence and on the search for the most optimal explanation of the observed phenomenon. For example, if a person observes a phenomenon and he has a number of hypotheses, he conducts various experiments in order to prove whether this hypothesis is true or not. If a fact comes across that contradicts the prevailing theory, a real scientist will reject the theory, admit the fact and build a new theory. This process is, in fact, continuous.

To establish relationships with academic scientists, enthusiasts of research into anomalous phenomena need to conduct research, record all the results in the manner accepted in science and be prepared for any results, even those that contradict their established worldview.

If you want scientists to understand you and make contact with you, you need to learn to speak the language of science, you need to understand the very heart of a scientist.

The desire of scientists to test the abilities or statements of contactees

and esotericists does not stem from a lack of trust in them. In science there is no word “trust”, there is the word “experiment”. There we are not talking about trusting or not trusting someone, but about understanding the nature of the phenomenon.

Since people have imperfect senses, every person can make mistakes, so science has adopted a number of experiments that will help minimize the possibility of error. If esoteric enthusiasts want to become closer to scientists, they themselves will take a step towards them, allowing themselves and their statements to be examined in scientific ways.

For example, if you want to be recognized in the scientific community, take several people from whom you first obtain a doctor's opinion on their health in writing; then give them a series of sessions that you consider necessary to heal this disease. After this, the person being healed (subject to his voluntary consent) must undergo a re-examination by doctors and provide the results. This will be a completely scientific method. This is how all technologies are researched and then introduced into practical medicine.

The fact that doctors often have a negative attitude towards various healers does not mean that doctors want to harm people in some way or that they want to make money. In the end, the healer also makes money - this is no secret to anyone. Even if it’s “paying according to your heart.” The point here is not about competition, but about the fact that doctors are trained at the institute to work according to science, according to evidence-based medicine. This is hardwired into their subconscious, into their brain.

Appeal to esotericists and contactees

> Dear contactees!
> Your contacts are often mistaken by people, at best, as your fantasies and inventions to attract attention, and in the worst case, as the result of a disease.
> Our Cosmopoisk even conducted a study of contactees, specially invited for this purpose by specialists in psychology and psychiatry. This was a test that is used in

clinical psychology. The result was mixed. A study of more than 150 contactees was conducted to identify signs of the most common mental illnesses, these results are available, and they are not unambiguous. But I want to say that in any case, a person can have contact regardless of the degree of his mental health or ill health.

In order for contactees to be able to show the world the benefits of their contacts, they first need to show the world, which is materialistic and does not want to perceive contacteeism as the ultimate truth... for you, contactees, this is the truth, but the world is accustomed to living according to other scenarios: “for me truth is what is useful to me.” You need to understand this logic.

In order for contactees to be useful to the world, it is necessary to find niches for using the information received from their curators. Whether it is medical information, technical information or simply information about other planets... It is necessary to think about who and how this can be useful and interesting in our world. If there is no application, then the contact is personal for the contactee and he personally must develop socially, spiritually, psychologically, make himself better, following the advice of his supervisors. Once the people around him see that this contact has a positive impact, they will begin to listen to him.

As for the scientific community, it would be very good to conduct a study of contactees if they agree. For example, provide information on the same issue, from the same curator, independently of each other. When the process of coincidences is large, then scientists will have questions about how to explain it.

Also, the trust of both scientists and the public is caused by, for example, fulfilled predictions and prophecies. Here I understand that it is not easy to do them, since the future has many options. Curators through contactees can simply answer questions, giving the same information, for example, about their planets, about which there is no information on Earth. If this coincides with different contactees, they will listen to this, including in the scientific world.

Schumann Frequency - Earth Vibrations

https://blog.cassiopeia.center/chastota-shumana-vibracii-zemli

What you call the Schumann frequency is the leading frequency of the Earth. We call it magnetic-gravitational potential. Each planet has its own. This includes the electric, electromagnetic, and magnetic fields of the planet, as well as the electricity of the earth's soil itself, the energy of the Earth's core, electrical processes occurring in the atmosphere and, naturally, gravitational forces.

What you call the gravitational field is all the combined frequencies of different fields and different types of energy of each planet. What you pick up on Earth are actually frequencies that contain higher frequencies that you don't pick up. Your brain operates at certain frequencies, but they are higher than the frequency of the planet. Why higher? Because you think, feel, perceive information and microimpulses that arise in the brain from the energy of your Spirit, which create fast electromagnetic bursts at high frequencies. When a person sleeps, he enters a state very close to the Schumann frequency.

The Schumann frequency reflects the general vibrational qualities of the planet: the biosphere, hydrosphere, atmosphere, lithosphere - all its layers.

What we translate in Russian as "vibrations" for the material environment are vibrations of the environment in which it is located, in this case, atoms, molecules, various fields and so on, that is, the movement of matter. According to the Interstellar Union, atoms contain energy and nothing else.

As for spiritual vibrations, since there is no matter there, there is nothing there to vibrate. But this is what we call analogues of material vibrations, which can be translated as “properties, nature, qualities” of this Spirit. We translate this into Russian with the same word “vibrations” in order to emphasize the inseparability of the Spiritual world from the material, the origin of the material world from the spiritual.

Material vibrations, what you call various electromagnetic waves, Schumann waves, light, sound, radiation and so on, we measure with special devices that are based on the resonance effect. The vibrating medium creates a resonance in this device, and it shows on a special scale the speed of these vibrations, their vector direction, and so on.

It can expand and grow depending on the radiation from the Sun. When solar activity decreases, the Earth's geomagnetic field also becomes less active. This is only until solar radiation is activated again. There are sharp fluctuations within one day. They can rise to peak numbers and then fall.

Raom Tiyan about the activities of the Elemental Spirits

https://blog.cassiopeia.center/raom-tijan-o-deyatelnosti-duhov-stihij

Elemental spirits are 4 ethereal forces, which in the material world are expressed as Water, Earth, Air and Fire - this is not just a mixture of some substances, these are certain elemental forces. Naturally, etheric fire is not the same as physical fire. These are not chemical reactions, they are like some kind of force, energy. Physical fire is its reflection, like a reflection in a mirror.

We have a physical, subtle-material reality and a spiritual reality. Although they come out of one another, they may not intersect with each other. A person can physically live in some poor shack, but spiritually he can be in a beautiful palace with his Spirit. Also vice versa.

Spirits of the elements, plasmoids of the elements, exist throughout the Universe, including on Earth. Each of these Spirits of the elements allocates a certain amount of energy (its mental energy, although there is also spiritual energy) in order to take the ether that is at its density level, put into it the charge of its vital force that it has. From these energies, collected from the four elements, the atoms that we can see are assembled.

I want to note that by the words “dense matter” we mean not only what can be touched, like solid substances, but also liquid and gaseous substances - these are also dense material elements for us, because they consist of substances.

The combination of four elements in matter. Electricity is the energy of Fire

We must harmonize the knowledge of our physics, chemistry with spiritual knowledge, this is very simple to do. But this requires some explanation.

Consider a salt solution. Here the element of the Earth will be salt. Many ancient civilizations obtained salt from the earth. There are even salt caves underground (everyone was probably in the halotherapy caves). So, salt here represents the element of Earth.

The element of Water, of course, is represented by the solvent itself.

The element of Air is represented by the air that is above the vessel, but this is not the only air that is there. Any water contains dissolved

gases: oxygen, carbon dioxide in some quantity. Since this water stood in an open vessel, it still dissolved some amount of gas. You just can't see them, but they are there inside.

Energy of Fire. We're not going to heat it all up, where could it come from? Even without an external source of energy, a certain fire energy still appears in this solution. Where does she come from?

It is sodium chloride (the one that represents the earth), when you put it in water, you see that it disappears from the water, the water becomes clear. But in reality it doesn't disappear anywhere. Naturally, salt does not evaporate anywhere from water, just a crystal of each salt is a complex structure that consists of two types of atoms. Specifically, table salt contains sodium and chlorine. They are connected to each other by a special chemical bond due to the very different structure of the atom itself. In the world of substances, opposites attract. One substance fits into another like a key into a lock, forming a specific molecule. But it is a molecule only when it lies in a solid state in these crystals.

When we place it in water, water molecules accumulate around the crystals. Water molecules consist of two substances: hydrogen, which, by the way, is also a gaseous state, and oxygen, which under normal conditions is a gas. Hydrogen oxide, of course, is a liquid substance under normal conditions.

So, water molecules, which consist of two hydrogen and oxygen atoms of different structures (there are more of them than salt crystals that fall into the water), each salt crystal is surrounded by a crowd of water molecules. But they do not surround them randomly. For example, a hydrogen atom is attracted to its opposite. It's not that it attracts, it's just that the water molecule turns around with the side where the chlorine is turned towards it with the side opposite in charge. You call it charges, we call it the ratio of elements.

It doesn't matter here, the result is important. Water molecules turn the side where they have oxygen to the opposite charge. It turns out that they begin to attract each other, and this causes the crystal to collapse. Water molecules pull out those atoms that were previously tightly held together there. And that's why you see the salt crystals

disappearing, visible disappearing.

This crystal is destroyed, and each separated atom is surrounded by many water molecules. Why is she surrounding him? Because the nature of these substances interacts with each other in this way. Any solvent tends to dilute the solute, that is, to surround it with a large number of its atoms (or its molecules in this case).

So, when all this is separated, energy appears in the solution. This is the first level of energy, which you call electricity. The structure of atoms is different, we say different numbers of elements, but you say different charges. We are talking about different ratios of elements or different vibrations, but you are talking about different charges. They give rise to the fact that energy of the first level comes out of the atoms of some elements, and it flows like a stream to other elements, that is, it pulls it out. And because it stretches out, it all goes on water. The water is electrically conductive. And it is the energy of electricity in this case that represents the energy of the element of Fire.

Raom Tiyan on the concept of plasma in the Interstellar Union. Plasmoid tasks

https://blog.cassiopeia.center/raom-tijan-o-ponyatii-plazmy-v-mezhzvyozdnom-soyuz

We call “thin” civilizations plasmoid. The word plasmoids (the root of “plasma”) is not at all accidental here. Even in your physics, plasma is considered the fourth state of matter, in which there is a transition from dense, from matter, to energies. This is a transitional link. But your understanding of plasma is somewhat different from that of the Interstellar Union.

Your understanding of plasma is either the plasma of stellar matter, or artificially created plasma by various devices on Earth, or it is a state of electric fields that you call lightning, and so on.

Our concept of plasma is much broader. We call plasma any state and manifestation of matter at 56 levels of density, starting from the 4th to the 59th state of energy fields, which can be expressed in Russian, approximately as ether, etheric fields.

Various worlds exist in these ethereal fields, including those that exist on Earth, underground and in the layers of the atmosphere. They exist in outer space and do not need oxygen because they have no metabolism. They also exist in the chromospheres of stars, even in huge giant stars and in their cores. The thin body of plasmoids is not subject to destruction from high temperature and thermonuclear reactions. On the contrary, they take part of this energy for their nutrition.

They exist there for a reason. It is no coincidence that they incarnated in that world; they also have their own tasks there: to monitor the development of star systems, the relationship of energy fields in outer space.

Outer space only seems like a vacuum to you, but in reality it is heterogeneous. There are different energy fields in it, and this also needs to be observed by different beings. Refusal to observe this space could lead to disaster, for example, of the entire Galaxy. If energy fields are incorrectly distributed, then macrogravity will manifest itself incorrectly among Galaxies and planets, and everything may collapse. This is observed by intergalactic plasmoids, galactic plasmoids, plasmoids from the galactic core of the energy center of each Galaxy.

Both on Earth and on Burkhad, on my home planet, there are planetary plasmoids. You call them earthly, we call them Burkhad. They are responsible for the ethereal forces that you call the four elements - these are the four types of plasmoids. They are also responsible for one or another part of the Earth or ocean. This is the second type of plasmoid - Nature Spirits. You call them Spirits, because you have any creature that has a subtle body or does not have one at all, since it is invisible, you call it Spirit. You don't differentiate these things.

We clearly say: we have a Spirit, embodied in a subtle body, and a non-embodied one - these are different entities for us.

There is a biosphere on Earth - these are plants, microbiota, animals that are in continuous energy and food interaction with each other, in exchange. Every organic being, no matter how small, must always be endowed with a Soul. These Souls also create plasmoids: those of microbes, plants, and animals. Different types of plasmoids create different Souls for the biosphere with the aim of their interaction with each other, evolution and, ultimately, leading to the emergence of a rational being, that is, an animal into which a rational Spirit can incarnate. And if it already exists, as, for example, on Earth, then the meaning of the existence of the biosphere is to support the civilization that arose there.

Types of energy in alien science

https://blog.cassiopeia.center/vidy-ehnergii-v-inoplanetnoi-nauke

Atoms contain 9 types of material energies, which we call physical in our science. This is gravity, again it is divided into two types: microgravity, which binds all atoms and molecules together, and macrogravity, which creates a gravitational field so that objects are attracted to each other. These are two energies. Thermonuclear energy, radioactivity are two more energies. And then there is heat, light, radio waves, electricity and magnetism. These are the 9 energies.

Radio waves are not just some kind of vibration somewhere out there, but they are also a type of energy. Heat is not just heat that cools or heats some area, it is also a certain type of energy. Electricity and magnetism are separated in them.

Recommendations from MS specialists on introducing new subjects for earthly schools

https://blog.cassiopeia.center/rekomendacii-ot-specialistov-ms-po-

Psychology of the spirit - the structure of the spiritual essence and the laws of its manifestation in a person, managing emotions and instincts, determining priorities and goals in life, developing thinking, imagination and memory, planning an effective work and leisure schedule, developing useful skills and habits.

Psychology of family life - communication skills with parents, rules for harmonious family relationships, protection from family violence, spiritual laws of conception, birth and upbringing of children.

Body harmony - physical education, proper nutrition, safety of physical activity, proper use of medicines and medicinal plants, mental communication with the organs of the body, self-healing of the etheric matrices of the body organs.

Harmony of the spirit - meditation, energy practices, communication with the higher self, astral travel.

Harmony of nature - information about plants, animals and natural phenomena, communication with nature spirits (plasmoids).
Periodic excursions to natural areas are needed here.

Harmony of society - laws of effective and correct interpersonal communication, rules of discussion, structure of social egregors (national, scientific, religious) and rules of interaction with them, laws of political and economic development of society and ways of influencing it.

The science of imagery - the meaning of symbols and images and their influence on human behavior, archetypes of the collective unconscious, management of subjective reality and its influence on the perception of objective reality.

Financial literacy - financial accounting, budget planning, labor, tax and pension laws, banking services, budget saving rules, financial security, rules for combining spiritual and financial development.

Household Life - the ability to cook food, restore order and comfort in the house, repair things, recognize and troubleshoot problems in home appliances, develop hygiene skills, the ability to work with agricultural plants and animals, skills in collecting and processing wild plants and mushrooms for food and therapeutic purposes , laws of room design and skills for their renovation. Here, too, periodic excursions to natural areas are needed, as well as to farms, household appliance factories, repair shops, etc.

Functions of physical energies

https://blog.cassiopeia.center/funkcii-fizicheskih-ehnergij
Energy is the active Force of a living Essence, found in any form of its manifestation.
The Universe is a set of energy structures generated by the Supreme Spiritual Mind and His self-sufficient Elements, aware of themselves in the flow of His existence.
The Supreme Spiritual Mind is the Source of the universe and all living beings living in it. To earthly people this Spiritual Entity is known as God.
It was God who emitted energies from Himself that gradually formed the physical universe visible to people. But this is only one of many universes or collections of worlds located at different levels of density, divided by the vibrations of the material substance that makes up them.
The universe consists of spiritual and material areas, in each of which there are energies characteristic of them.
In the spiritual realm there are billions of types of spiritual energies that belong to God Himself and were given by Him to His children - intelligent spirits.
Any Divine Energy is perceived by people as Spiritual Light.
God is a Spirit, with unique, that is, qualities inherent only to Him. We call them Divine Energies because He uses them to perform all actions in both the spiritual and material world.
Initially, in the Kingdom of Heaven, where the Spiritual Essence of God dwells, nine types of energies emanate from It, each of which is perceived by intelligent spirits as the Light of God:
Light of Love - The energy of unconditional love, the flow of feelings of love for everyone and everything without exception.
The Light of Truth is the energy of the information flow, containing data about the real structure of the Universe, its laws and the past, present and future.
Light of Grace - Energy that cleanses from all kinds of negativity.
Light of Holiness or Light of God's Glory - Energy for likening intelligent spirits to God, according to His qualities.
Light of Life - Energy that makes it possible for all living beings to exist.
Light of Happiness or Light of Bliss - The energy of the feeling of unconditional happiness from the awareness of one’s existence.

The Light of Will or the Light of Freedom is the Energy of the omnipotence of God.
Light of Reason or Light of Wisdom - Energy of God's omniscience.
Light of Eternity - The energy of the omnipresence of God, supporting His existence outside of time and space.
In the material realm, there are six thousand and forty-eight types of material energies that form worlds for the material life of the development of spiritual entities - parts of God, born from Himself like children.
All material energies are distributed across clusters of spaces that form the material reality of fifty-nine levels of density. The physical universe is in the first cluster and consists of nine material energies that make up three levels of density: solid, liquid and gas. Each type of energy has its own function, that is, a purpose established by God.
Physical energies originated from more subtle, but material, etheric energies that are located in the World Ethereal Ocean, and they, in turn, originated from spiritual energies, the Source of which is God.
Physical energies themselves do not originate from etheric ones. This requires the efforts of intelligent spirits living in ethereal bodies that are in a superplasmic state in terms of vibration levels, which in our system are called plasmoids.
To create each physical energy, the necessary etheric energy is compacted and acquires new frequency characteristics. Immediately after creation, any physical energy has the properties of an energy field, but to create atoms of elements it is quantized, that is, it acquires discreteness.
The created physical quanta of nine types are assembled according to special rules into stable structures - hydrogen atoms. Then, with the help of redistribution of quanta in them, other elements are gradually formed, with the same quantum set, but with a different number of quanta and their different distribution over the three energy levels of atoms.
Thus, over time, a set of physical elements appears, sufficient for the appearance of stars and planets, on which, with the help of plasmoids, chemical reactions take place leading to the appearance of organic substances.
When there are enough such substances on any physical planet, one group of plasmoids collects from them the bodies of simple microorganisms, and the other creates for them group souls with a set of instincts and vitality that will allow bodies consisting of sets of atoms to become living beings.
Thus begins the long path of natural evolution, directed by experienced plasmoids to the emergence of living beings, whose bodies will consist of physical matter and will acquire the ability to become temporary

homes for intelligent, immortal spirits - the children of God.
Birth in a physical body is a unique opportunity given to eternal spirits to gain invaluable experience of existence and awareness of themselves in this type of matter.
Below is a table describing the origin and purpose of each type of physical energy:
Physical Energy Table

LiShioni about the energy of natural and artificial minerals

https://blog.cassiopeia.center/lishioni-ob-ehnergii-prirodnyh-i-iskusstvennyh-min

A stone or mineral is a certain solid substance that consists of chemical elements arranged in a strict order. Due to the crystalline structure of this physical body, it can retain, collect and charge various types of energies, various vibrations, and, among other things, it receives vibrations from those who create it.

Natural stones are created by natural spirits - what we call plasmoids, and you call, for example, gnomes, kobolds, mountain spirits, volcano spirits, that is, these are certain subtle-material entities. They, creating every stone, every mineral, every crystal, do not create it by chance. Exactly his – the same in color and shape, chemical composition and physical properties. Otherwise all the stones would be the same. Why are they so different? Because different stones contain plasmoids with different properties.

If a mineral is created by man artificially, then plasmoids in this case are limited only to the delivery of elements, primary elements. Plasmoids of the elements are already involved in this, and people are collecting them, naturally, according to certain chemical and physical laws. They cannot be crossed, for example, take some substance and

assemble it from it or grow any stone, any mineral - it must be a certain stone or mineral.

Therefore, grown in an artificial environment, they are less saturated with the energies of plasmoids. Such a stone will contain the energy only of those people who made it. And if they did it at all, treating it as a routine job, then it will be filled with practically nothing.

Then, if you take this artificial stone or take a natural stone, you can fill it with your energies. But it will be easier to fill a natural stone, because all the distances, so to speak, between atomic structures, between ionic structures are already observed in it: plasmoids know all this. And how people collected, and how much they followed the laws, and how perfect they were in this, and how much this stone will even hold your energy - it always depends on the conditions in which it was created, and who was close to it at that moment artificial stone.

Recommendations from aliens for the development of medicine on Earth

https://blog.cassiopeia.center/rekomendacii-inoplanetyan-po-razvitiyu-mediciny-na

First, make medicine completely free, as far as possible. For the existence of hospitals, for the salaries of doctors, for all medicines,

technologies and operations, subsidies must be allocated from the state itself. This will immediately confront a person with the fact that they care about him, about his life, that someone needs him. It is not his money that is needed, but himself. This will increase confidence in medicine, and the doctors themselves will want to work with greater compassion, empathy, and a desire to help.

Secondly, if it is free, this does not mean that the state cannot but make other efforts to ensure that there are fewer sick people. This means that free medical care must be combined with preventive work. With preventive work against all the most common physical and mental diseases, starting from birth. Especially with preventive work among those women who want to give birth to a child.

It is necessary to educate, to introduce into the school curriculum certain knowledge not just about biology, but certain knowledge about the prevention of various diseases with mandatory practical exercises. For example, by watching various videos that will show the consequences of various diseases that people cause to themselves. It is not necessary to take them to hospitals; it will be enough to show a certain educational film. Not to scare them, but so they can make choices. They need to know what and what they are choosing between.

Be sure to explain how important it is to lead a healthy lifestyle. Physical activity, proper nutrition. Correct means varied. And naturally, the absence of those habits that destroy the body. This cannot be forced, but this needs to be talked about more on television and in school. Those. encourage a healthy lifestyle.

To the extent possible, reduce the availability of those substances that cause harm. They cannot be completely banned - this is freedom of choice. But they can be made available only in special stores that will be open a certain number of hours. Make it hard to get, or raise the price. From the profits that the producers of these substances, which cause health problems for many people, receive, they can be made to pay more taxes, and the difference in taxes can be used to develop medicine. After all, this is their contribution to the fact that many people are sick.

Another recommendation for doctors and scientists who are involved in scientific medicine is to study the influence of feelings, thoughts, emotions, and characters of patients on certain diseases. Conduct more psychological tests among patients with various diseases, study the influence of their emotions on recovery and on the deterioration of their condition. Accumulate factual material. Start studying energy treatment methods, study homeopathy in more detail, because the energy of the substance operates there.

Also study Cosmoenergetics, Reiki, all energy techniques that are considered esoteric or occult. You can make a selection of how they act, and this will all be widely covered in the public press. It is recommended to devote more time to the development and study of special devices that perform energy diagnostics of the body based on vibrations. We have had such devices for a long time. And you have them, but so far your medical officials are not interested in checking them. Diagnostics can reveal pathologies at a very early level, when there are still cellular disorders.

I recommend that every medical institution create a position such as a spiritual psychologist. He will take care of the patients who are there. It will help them connect with the Higher Self and find out the spiritual cause of the disease. This is very important because, for example, a person is admitted to the hospital with a heart attack, stroke, or exacerbation of angina. He was brought out of the acute condition, he was given medications that improve the activity of the heart, dilate blood vessels, remove blood clots, etc. This is a chemical effect.

But after discharge, this patient will return to the environment from which he came. But the situation that led him to the emergence of this bloc will not go away. Therefore, when he is in the hospital, he will dissolve this block of the heart chakra, forgive the person with whom he is offended, and when he returns home, he will look at this situation differently. Dissolving blocks already changes the perception of the situation. It doesn’t change the situation itself, it changes the attitude towards it. And this means that the likelihood of relapse in the first couple of months is reduced by about 30%.

It is also good for your scientists to conduct research into how meditation affects a person and the space of a city. For example, when 10 people meditate every day, mentally directing the Light of Love to

the city, and record how many reports of crimes and accidents were reported this week, and compare with the same period when this was not done. A very interesting pattern can be identified.

In psychiatric hospitals, where people end up with unharmonized contact, with blocks, a spiritual psychologist is even more necessary. He will help the patients who are there to connect with their Higher Self, dissolve blocks and correctly establish contact with the essence that they have. Finding out who it is, why he came, and harmonizing contact with him means controlling this contact. And this also needs to be taught to these unconscious or semi-conscious contactees who end up there, do not know what is happening, and are in panic, fear or aggression. The essence itself, with whom contact, whom he attracted by vibrations - you need to work with it.

Messing about the flights of earthlings into space in 2213

https://blog.cassiopeia.center/messing-o-polyotah-zemlyan-v-kosmos-v-2213-godu

In a previous incarnation, I was born in the suburbs of Paris, my name was Ellen. This incarnation was in 2213 from the Nativity of Christ. I became Wolf after that.

Next, the Spirit of Messing transmits information from the perception of the girl Ellen.

She heard that about 150 years before her birth, manned flights to the Moon and Mars were carried out, but then they stopped. The official version is lack of funding. And when contact with the Interstellar Union took place, the aliens said that the reason for the cessation of flights was a conflict on Mars between earthlings and some representatives of the alien base. After this, earthlings were banned from visiting Mars. They wanted to set up something like a nuclear test site there.

They brought nuclear weapons there, as we were told. This happened shortly before I ran away from home. They talked about it on the news, I remember it well.

A representative of the Cygnus Constellation, a Burkhadian (shows a picture on the screen: a Burkhadian speaks an incomprehensible language, his words are translated into the main languages of the world) says that for 85 years earthlings had their own base on Mars. At one time, people lived there; they wanted to explore Mars, but they didn't succeed. Then they flew away and the base was abandoned.

After some time, earthlings flew there again, brought a nuclear bomb and wanted to conduct tests. These were representatives of the Arabs (shows the Arabian Peninsula, Arabs).

At that time, the Arabs united into one country, a union, with common laws, like the European Union. Western countries wanted to attack the Arabs in order to take away oil, gas, and some other minerals, because they were raising prices. I know about this from news, programs, historical chronicles that were shown on television.

The Arab countries decided to create a large nuclear bomb to defeat the Western countries. At that time, a ban on the creation of nuclear

bombs was already in force, and disarmament was underway. The Arabs flew on their space rockets to an abandoned base of earthlings on Mars, ostensibly for research. Under the guise of a payload, they took with them components for creating a nuclear bomb and conducting experiments, since on Earth they would have been noticed and punished. And when they tried to do this, representatives of the Selbetites, reptilians, who at that time were at their base on Mars, underground, and were not far from the earthlings' base, came into contact with them. When Selbet's instruments detected radiation at the former earth base, they flew there and confiscated everything from the earthlings (shows how they take out boxes and tell them to fly away).

When the Arab cosmonauts returned to Earth, they told their government everything, and the information was classified.

#511 Anthropogenesis from aliens: the evolution of Homo sapiens. The first people. The origin of life on planets.

https://blog.cassiopeia.center/antropogenez-ot-inoplanetyan-ehvolyuciya-homo-sapi
https://www.youtube.com/watch?v=alCnW0J_sHA

00:00 Start of broadcast.

00:18 Background.

Voice-over: In the summer of 1999, a thirteen-year-old girl Irina Podzorova from the village of Peski near Voronezh agreed to take a short trip on a triangular-shaped ship with aliens from the constellation Cassiopeia.

Since then, for more than twenty years, representatives of the civilizations of the Interstellar Union of our Galaxy, which includes 116 of the 727 intelligent races present in it, have regularly come into contact with it.

1:52 Opening remarks.

Maria: Hello, dear friends! Today we invite you to a very interesting discussion with our alien friends through our contactee Irina. My name is Maria Sokalskaya, and today I will ask questions on the topic of anthropology, anthropogenesis, and about our civilization. Irochka, good afternoon, tell us who is our guest today.

Irina: Hello, dear friends, my name is Irina Podzorova, I am a

contactee with extraterrestrial civilizations. Today we have with us a representative of the planet Tumesout - a xenobiologist and specialist in the creation of different species (biological genetics), his name is Tuliari Kromers, or simply Tuliari. And, naturally, MidgasKaus is present with us - a biologist, psychologist from the planet Esler, a specialist in alien civilizations. He is a biologist and specialist who also studied our species. Tuliari, a representative of Tumesout, will answer, he studied the history of the creation of our race.

3:40 Earthly theories of the origin of man, a look at them from the point of view of a Tumesoutian.

Maria: I'm very glad, Tuliari and Mead, greetings, friends! Thank you very much for coming to our meeting today, because the topic is very interesting. Naturally, we are interested in our history of the origin and development of our species. We have already learned a lot from you - about how our species originated. In the following, I will briefly provide the theory of our scientists and the results of their research and ask you to comment and provide your history, based on knowledge about our race, and approximately to what time periods and stages of development those remains or the information that our scientists received belong.

Well, let me start with the fact that on our planet there are three main theories about the origin of our race. This is a religious theory, theological, which is based on the source of the Old Testament, and in which man is the creation of God. The next theory is the materialistic theory of Charles Darwin, which our science adheres to. And the theory of natural selection, where man is a biological species, a higher mammal and has a natural evolutionary origin. This theory is also complemented by the labor theory of human origin, according to which labor helped in the development of man and his evolution. We also have another theory - paleovisit, about the cosmic origin of man, which suggests that the emergence of humanity is associated with the activities of other civilizations and that in ancient times man directly communicated with representatives of alien intelligence. And one of the founders of this theory is the Soviet mathematician Mates Agreste, who in his article “Ancient Cosmonauts” suggested that our planet was visited by alien civilizations in the past.

These three theories are common on our planet. I think that based on

the information we received from you, there is some truth to every theory, yes?

Irina (Tuliari): Yes, it’s like three views of the same reality. Well, that's like three perceptions of the same reality. From them you can put together a single picture, just like from puzzles, just like from a construction set you can put together a single picture. In such a complex process as the emergence of man, or, as we prefer to say, the creation of man, all three theories, all three forces participated: the forces of the material world, the forces of the Divine world, and the forces of other civilizations. In addition, a fourth force also participated, which is the force of the subtle material world. That is, the dense material world, the subtle material world, the Spiritual world and other intelligent civilizations.

Maria: This is precisely the puzzle that we are missing, probably, in order to create an overall picture where all these three theories can harmoniously merge together. Our scientists naturally use those material remains or archaeological materials that they were able to obtain from various layers of the Earth.

Irina (Tuliari): And when your scientists find these materials, do they examine the contents of the etheric matrices on their astral screen or contact the Spirits of nature?

Irina: He’s asking seriously now.

Maria: Yes, I can explain to you that our scientists, unfortunately, do not yet possess such tools, such capabilities that our alien friends possess.

Irina (Tuliari): All of you have these opportunities.

Maria: Yes, the possibilities are all within us, but they have not yet been discovered and recognized by official science. So they study all fossil materials using the carbon isotope method and try to determine the age. That is, they have a very limited set of research tools.

Irina (Tuliari): Haven't they encountered such a paradox that in the same remains, taking analysis from different parts of the same bone, one can find different isotope ratios?

Maria: In fact, they have already come to the conclusion that this method is not one hundred percent accurate. They themselves understand that the error is high. But since they have no other methods of understanding our history, then from the remains that they extract, they try to create some kind of chronology in accordance with the place where they found them, with the layer, with age.

Irina (Tuliary): How is it possible to study history without referring to the Time Tape of the past?

Maria: Well, as you can see, perhaps our scientists do this too. That is, they find various remains of these primates, so to speak, or hominids, as they are called, and based on these remains and the cultural heritage that they left, they try to build a chronological line of how man evolved. Because, of course, they do not accept the theory of divine creation.

Irina (Tuliari): Not all the remains can be found, only a small part can be found.

Maria: Yes, naturally, they find a small part, but if they find some remains that are very different from each other in their structure, then they begin to attribute this to different stages of human evolution or to transitional forms. For example, the most ancient remains found were found in Africa, so scientists believe that it was in Africa that the human race got its origins. And these two species were called Australopithecus and Kenyanthropus. Then, based on these remains, they continue their research, looking for the next bones and skulls by age.

Irina (Tuliari): So, they believe that the mutation that led to the emergence of intelligent beings from non-intelligent ones, from animals, occurred somewhere in Africa, and then people, intelligent beings, began to settle?

Maria: Yes, this is exactly the theory that our species began its origin from primates with the help of mutations and began to spread to other continents. That is, that we had a single continent of Pangea - our scientists also came to this realization, so they proceed from the fact that these species began to spread across a single continent, approximately from the territory of Africa. Then, from them, “handy man” emerged, about one and a half million years ago, and then began to further develop with the help of tools, upright walking, and the result was “working man.”

Irina (Tuliari): By the way, if you look at this theory - if you want me to comment on this theory about the African origin of one or more ancestors of people from primates - I can only say that it turns out like this: the mutation turned out to be quite stable, and During the reproduction of the species, for some reason, a reverse mutation did not occur. This is despite the fact that they lived in nature, and there are many examples of the reverse development of a rational being, one might say, into a creature living by instincts, like an animal, with a suppressed mind, if it is left without education among rational beings. That is, if some creature has remained among animals since childhood, it will be like that. The tongue will not acquire and will not be able to manifest its intelligence.

Maria: Yes, we have such rare cases.

Irina (Tuliari): Because his brain will lack neural connections through which the Spirit can correctly navigate the world around him. He will form neural connections that will appropriately convey to him the reality of the world where he lives, among nature. And he will use only instincts.

Maria: I see. We have such examples, the so-called “Mowgli”, who grew up among animals. Naturally, they did not develop social qualities and abilities.

Irina (Tuliari): But you don’t have an example of raising an intelligent being from animals.

Maria: Yes, that's true.

Irina (Tuliari): What does the fact that you have an example of one, but not the other, say?

Maria: Yes, our scientists actually face a lot of questions to which they have no answer. Due to the fact that, firstly, they do not have enough tools to study historical facts, and secondly, they have not developed their own abilities, as you rightly said, to look into the Time Tape and get information.

Irina (Tuliari): Moreover, the very “mutation” that, according to this theory, caused the emergence of Homo sapiens, sharply separated him from animals, because they began to change the environment, cognize it and create their own language, their own culture. Accordingly, if this “mutation” existed on its own - one or its chain - then it could be identified by comparing, one might say, cellular DNA in those very first human remains and those primate bones that are also found next to them . It happens that they are together, I just know about it. And you can find out which DNA sequence has mutated. If this was found out, one could try to artificially induce such a mutation in modern primates. However, this does not happen, which means it is not a matter of mutation. And I know very well that with micromutations and their series it was impossible to ensure that a rational being, a person, would develop from primates, so that the Spirit would incarnate in him. Well, I will say more traditionally for science: so that consciousness arises in his brain.

Maria: Yes, these are actually logical questions that our scientists cannot answer.

Irina (Tuliari): We say “the Spirit became incarnate”, you say “consciousness arose” - consciousness, which was divided into self-consciousness and, in fact, consciousness. This means that a subjective reality began to form, which began to reflect the objective one. Moreover, consciously, because the subject understood his difference from the world around him and his uniqueness.

For this type of consciousness to arise, a simple mutation is not enough. The world where consciousness arises is outside the world of matter and is strictly hierarchical. This means that in order for a

consciousness of this type or a mind of this type to arise in the brain of one or another creature, protection or permission from similar consciousnesses located outside the material world is necessary. Now I'm just speaking for scientists - and do you think I'm explaining it clearly for scientists?

Maria: You know, I'll tell you that, probably, for those scientists who adhere to the theological theory of the creation of man, this will be a clear, logical and self-evident explanation. And for followers of the Darwinian or alien theory it is probably less acceptable. And this is understandable, because everyone has their own worldview.

Irina (Tuliari): That world that is outside the material world - let's call it the world of thoughts and feelings. Your thoughts and feelings are located in the matter itself, and seem to "permeate" it with very high vibration, very high frequency fields. And there are fields that are located in space, independent of the material world, which you call "space". The entire material world is usually called "cosmos", from the Greek "beautifully arranged", that is, "decorated". Greek philosophers called the material Universe this way, because in every object, in every object, they saw the beauty of the One who created it from his energies. That's why they called it a "decorated place." That is, the words "space" and "cosmetics" have the same root, from the words "beautiful", "to decorate".

Maria: "Well-appointed."

Irina (Tuliari): Yes, something pleasing to the eye.

Maria: Yes, a very precise definition. Our scientists are still far from such a deep and subtle understanding of all levels of the universe.

22:26 About the nature of consciousness, the Spiritual world in the understanding of earthly scientists, the reasoning of the Tumesoutian.

Irina (Tuliari): A scientist is also a certain consciousness that is located in the body. And in this consciousness there are thoughts, feelings, emotions, will, and so on - all the same components that we all have.

This means that the question arises: how does he explain to himself the existence of himself in the space where he lives? Yourself – that means, your thoughts, your feelings, your emotions. Does he call them material?

Maria: Yes, the majority of our scientists adhere exclusively to the material paradigm of understanding our Universe, the world order, because they do not have developed other senses and perceptions. They do not have astral vision, they do not have the opportunity to go into the Time Line and sense the Spiritual World.

Irina (Tuliari): They have a Spiritual heart, right?

Maria: They have a Spiritual heart, but it works at the level of moral and ethical standards of society, that is, they do not connect it with the Spiritual world, with the divine presence in our universe. Moreover, they have no idea about the existence of plasmoid worlds.

Irina (Tuliari): Maybe they call the Spiritual World something else? When we study other civilizations, we very often come across the fact that in the same civilization different, one might say, professional classes or social communities on one or another planet call the same phenomenon in completely different ways, use different words and describe different terms. And because of this, there are interpersonal and intergroup conflicts that can only involve the emotional-mental sphere, i.e. emotional-mental and emotional-mental sphere, and can even lead to certain physical consequences.

Maria: Yes, I understand you, all this is present in our society. But the fact is that, as you know, and MidgasCaus will confirm this to you, our society over the last few hundred years has developed exclusively in a materialistic way. This means that the spiritual sphere is completely ignored in scientific research.

Irina (Tuliari): Maybe they call Spirit just some special form of matter?

Maria: No, the Spirit is absolutely not taken into account and is not taken into account in scientific research. Moreover, this is called a

pseudoscientific theory - if they try to explain some material phenomena from the point of view of the Spiritual world or alien civilizations.

Irina (Tuliari): What do they call their child's faith, for example, in a fairy tale? This faith of his, which begins to create his reality for him?

Maria: Well, for them these are illusory ideas that are not confirmed in any way. That is, they are looking for confirmation of everything.

Irina (Tuliari): Illusory representation of whom?

Maria: A child who believes in a fairy tale. Because there is no material evidence of the phenomena in the fairy tale.

Irina (Tuliary): What place, what part of the child believes in a fairy tale?

Maria: His fantasies, fictitious.

Irina (Tuliari): Okay, fantasy. Where are his fantasies?

Maria: Naturally, scientists reduce it all to the activity of the brain, that is, again, to material objects.

Irina (Tuliari): So they believe that some part of the brain believes in a fairy tale?

Maria: That these are all thought processes, this is all the activity of the brain.

Irina (Tuliari): So, some part of the brain believes in a fairy tale, some part of the brain understands that it believes in this fairy tale, or what?

Maria: Naturally, the child’s brain believes in the fairy tale, because he has no other information that, let’s say, contradicts this.

Irina (Tuliari): But if the entire brain believes in a fairy tale... And this conversation, by the way, is related to the origin of man, because until we understand the nature of consciousness, it is pointless to talk about the difference between man and animals. And if we don’t distinguish humans from animals, we won’t figure it out, and no bone remains will help, no matter what they are called.

The question is deeper here. Here the question is more philosophical, it lies more in the sphere of feelings. Now we have come to a very important point. Any scientists, materialists have children. The child of any materialist can believe in the immaterial - that which does not exist in the material world. When he believes this, he imagines images that exist somewhere in his mind. The scientist himself knows very well that these images exist in the child’s mind.

Maria: But not in the material world.

Irina (Tuliari): Yes, but they are in the child’s mind. And if he considers consciousness itself to be something material, then it turns out that there are also images in the material world?

Maria: I don't think that consciousness is not considered material. That is, these are rather psychological concepts. Material for us is something that can be touched.

29:45 Tuliari about the brain and conscious activity.

Irina (Tuliari): Let’s not introduce new terms for now: “psychological” tells me absolutely nothing now, we are now talking about the material and immaterial world. We have now settled on the fact that consciousness is recognized as some form of brain activity. The brain is material. If the brain is material, then the form of its work can only be material - so it turns out? If these are precisely the forms of his work.

Maria: Neural connections are material.

Irina (Tuliari): So neural connections are consciousness?

Maria: Well, a product of their work.

Irina (Tuliari): And just knowledge?

Maria: Consciousness is probably not material after all. The question here is what do we mean by “material”. That is, for our scientists, “material” is something that has a physical form.

Irina (Tuliari): Yes, but physical form can be in the form of a substance, and it can be in the form of a field. There are also physical energies, physical matter, physical substance. Do you consider both physical matter and physical energy to be physical matter?

So you say that the materialist does not completely understand the fact that consciousness, before entering the brain... We will not now use the word “incarnate”. Because the word “incarnate” means “to acquire flesh” - to acquire a dense body or a subtle body. It’s just that the word “flesh” here means matter of any type: compared to the Spirit, they are all dense, in fact.

I'm trying to reason logically, I'm a rational being - and I'm trying to use ordinary logic. Logic for me is the laws of thinking, which are the same for all worlds, because they are based on the same principles. That is, now I use analysis - that logical operation that you call “analysis”. And, using ordinary analysis, I come to the conclusion that those material scientists who consider consciousness or mind to be a product of the brain cannot consider it immaterial. Because if they recognize it as immaterial, they will have to admit that it simply manifests itself through the brain, but is in no way created by it. The material can only give birth to the material.

Maria: I’ll explain to you now how our scientists reason. First, they obtained this material evidence of the existence of other species or subspecies of man that preceded him. They analyze the size of the brain and see that different remains have increasingly larger brains.

Irina (Tuliari): And what follows from this?

Maria: From this it follows that under the influence of external conditions, work, overcoming some difficulties, the human brain grows and develops - and thus human evolution occurs.

Irina (Tuliari): What does the evolution of a creature have to do with the size of its brain?

Maria: They connect the fact that the larger the brain volume of a conscious being, a humanoid being, the more conscious it is, the more viable and the closer it is, let's say, to the modern.

Irina (Tuliari): Well, then they should ask elephants to solve their physical, mathematical, economic problems. How many times greater is the volume of his brain?

Maria: I think that this is not the only factor, but one of the important ones.

Irina: He is also a comedian.

Maria: It's great that our guest has a good sense of humor, I completely agree with you.

Irina: Mead has already sent this: a cartoon of a scientist coming in, in a white coat, with a pencil and a notepad to the elephant, giving them to him - and he writes something with his trunk.

Maria: I really saw such elephants at work: there was no video editing, they really painted a picture in which there was an elephant. Elephant drew an elephant, drew a sun and green grass. It happened before my eyes.

Irina (Tuliari): In any case, these movements are no more difficult for his animal Soul, his animal instincts, than the movements of, for

example, the larynx, tongue, respiratory tract (there are also muscles there) of the same parrots, ravens, and so on, which pronounce quite complex phrases.

Maria: Moreover, I saw dolphins, and I even have this picture: dolphins also drew.

Irina (Tuliari): What kind of brain does a parrot have, for example, and what kind of brain does an elephant have? In any case, they can be taught, that is, this is called animal training, and they can remember these movements - like a parrot, like a crow, like an elephant. But now we are talking about conscious activity. Conscious activity is when an elephant, for example, draws not only an elephant, but takes and draws what it wants, some other images that it will see in the world around it. For example, he will come up himself, pat the driver on the shoulder with his trunk, show him a pencil and paper - and simply begin to draw the surrounding landscape, because he likes it. This is already a conscious activity, as an expression of the Soul, as creativity.

Maria: I understand you. But, returning to our primates...

Irina (Tuliari): Now we are talking about consciousness. So what is science’s idea of it, of the human mind? Is it a material object or not?

Maria: It is not a material object because it cannot be touched. This is a product of the activity of the nervous system, neural connections.

Irina (Tuliari): Does he really exist?

Maria: Naturally, it really exists in our individual.

Irina (Tuliari): In what world?

Maria: Well, it's not called the Spiritual World.

Irina (Tuliari): What do they call it?

Maria: This all happens in the physical world. That is, manifestation - what the mind does, how it manifests itself - it manifests itself in the physical world. Our scientists do not have such categories of understanding as the Spiritual world.

Irina (Tuliari): But do they have the concept of “immaterial”?

Maria: There is, of course, the “immaterial world” or there are “intangible values”, but they in no way relate to the spiritual, in the sense of the divine.

Irina (Tuliari): Can “immaterial” simply be called “spiritual”?

Maria: Well, there is such a thing in our society: there are spiritual values, etc.

Irina (Tuliari): “Spiritual heart.”

Maria: Yes, “Spiritual Heart.” But this is not the terms of our scientists. That is, they must adhere to certain work rules, certain criteria, how they evaluate any...

Irina (Tuliari): What prevents them from calling immaterial consciousness the word “Spirit”? It's easier.

Maria: That is, all this is something that cannot be touched, seen, or verified empirically.

Irina (Tuliari): How impossible it is to touch, to see, if they themselves see pictures in their minds that they cannot see with their eyes closed. They can see it, right?

Maria: Yes, but in their professional activities this is not evidence.

39:37 Evidence of human origins for earthly scientists.

Irina (Tuliari): Well, if they can see it, how can it not? What then can be evidence?

Maria: This is not evidence for the scientific community.

Irina (Tuliari): Why not?

Maria: In the evidence base of scientists, evidence is only what other scientists can see and touch.

Irina (Tuliari): Proof of what? What do they prove?

Maria: For example, proof of human origin. Therefore, they adhere only to those facts that they have in their hands as material evidence.

Irina (Tuliari): How can they then imagine that a certain animal acquired some kind of mutation - and the result was another animal, but with a more intelligent form of behavior? After all, if they do not understand what “consciousness” is, how will they compare how one animal differs from another?

Maria: So they do excavations, they get various fossil evidence in the form of bones and skulls. They also look at the environment they are in, and when they see that there is some kind of cultural layer (inscriptions, drawings on the walls), some tools around these bones, they try to build an evolutionary and chronological chain in this way. Scientists, naturally, measure the age of these remains in their own ways (for example, the one I mentioned, carbon isotope) and try to build such a chronological sequence from these remains. For example, a very interesting fact is that they date the first human, Australopithecus afarensis, to be about two and a half million years old. From four to two and a half.

Irina (Tuliari): How do they know that it was a human and not a

primate?

Maria: They already see that this primate is somehow different from other primates. Then they find other remains, which, again, are different.

Irina (Tuliari): What difference does Australopithecus have from primates?

Maria: That they are already erect, that is, they are already basically...

Irina (Tuliari): Well, they didn’t see how they walked, but they only see the bones. Yes, the skeletal structure is good. Yes, there you can distinguish an upright creature from a non-upright one. Well, how do they distinguish between what is reasonable and what is not? Here, upright walking is not yet intelligence.
